II. SIGNIFICANT CHANGES

A. Changes the Location Code structure from 9 to 12 positions for use by IMC or BISARS type facilities. This change will also be used for location conversion and Location Availability File (LAF) build processes for DWASP.

B. Establish the capability to record Lot Date Control and CAGE Code for JAN CLASS S material in the MOWASP Locator Trailer record.

C. Documentation is provided to include the new Chapter 16, Electrostatic Discharge Sensitive Devices.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

II. SIGNIFICANT CHANGES

A. Documentation is provided in support of SCR UWSOH7-018 to provide the depots the capability to inquire inprocess shipment units with current MDT/PDT, by warehouse location, using program UWFM60.

B. The DLA Depot Quality Control program is now contained in DLAM 4155.8, Quality Assurance Program Manual for DLA Depots, August 1987. Accordingly, while the title page is retained, the contents of chapter 10 have been deleted.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

II. SIGNIFICANT CHANGES.

A. The documentation for receipt, validation and processing of redistribution orders by the DLA depots is included in this change.

B. This change includes the documentation showing the printing of the supply bulletin price on the DD Form 1348-1 for DICOMSS brand name issues.

C. Receipt processing days have been changed to conform to MILSTRAP criteria.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

III-7-F260-3	Same

II. SIGNIFICANT CHANGES.

A. The Automated SEAVAN Shipment Planning System has been modified to provide an automated method of identifying hazardous items for special loading into SEAVANS.

B. Redistribution orders will be generated to the supply depots and perpetuated through the system with a Document Identifier Code (DIC) of A2_. A2_ documents were previously converted to DIC A5_, Material Release Orders, when sent to the depots and their identity as redistribution orders was lost.

C. Changes to the documentation include functional information required to operate the Center/Depot Complaint System (CDCS). The CDCS includes a mechanized request from the center for information needed to resolve customer complaints and a mechanized response to these requests. It also includes functional information on a mechanized response from the center acknowledging receipt of DD Form 1225 and SF 364 and subsequent receipt of disposition of materiel placed in a non-issuable condition and requiring center actions.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

II. SIGNIFICANT CHANGES.

A. Location reconciliation processes previously processed at the depot using DSC FAWESP tape and depot locator data will now be accomplished at the Center using MOWASP generated Location Reconciliation Requests.

B. MOWASP inventory processes are modified to comply with recent revisions to DoD 4140.22M (MILSTRAP) Chapter 7 and AMCL 41, 43, 45 and 46. These changes include raising the dollar value for reporting certain gains/losses without conducting extensive research from $25 to $800, and modification of data input and output media and various code structures to satisfy required standard Physical Inventory Controls.

C. The F-22, Classification Suspense Report, is modified to provide visibility of materiel in all nonissuable Condition Codes, with summary data and to also display the required data in age sequence.

D. Requirements relative to the approved MILSTRIP Change Letter 127A, Consolidation of ILP Shipments, which expanded the criteria for consolidation of Foreign Military Sales (FMS) are incorporated.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

II. SIGNIFICANT CHANGES.

A. The GBL print program, UWFM05 has been modified to print the word "MARKS" and the ultimate consignee's DoDAAC for each shipment unit on the Bill of Lading.

B. All COPAD shipments to Sharp Army Depot will be assigned Mode Q regardless of IPG. The COPAD Management Information Report (F-320) will be divided into three parts to reflect CONUS shipments, Overseas Eastern Area shipments and Overseas Western Area shipments.

C. The documentation required for assembling Deployable Medical Systems (DEPMEDS) is included in this change.

D. The MRO documentation process has been modified to print the consignees LOGAIR Station Code and the consignors servicing LOGAIR Terminal Code in the POD, POE blocks of the label portion of the DD Form 1348-1 for all CONUS MROs.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

II. SIGNIFICANT CHANGES.

A. Ability to enter commercial carriers statement during the GBL review process is provided. This data will be printed on the GBL and Microfiche history.

B. Mechanization of FMS Bill of Lading preparation has been accommodated.

C. State Code usage in the MOWASP System is revised from use of numeric codes to the standard Alpha Codes used by the United States Postal System.

D. All MOWASP programs will now use the Hazardous Material Transportation and Packaging File in lieu of the NIIN portion of the freight description file. This new file will be used for GBL and TCMD preparation as well as being inquirable and providing a listing to be used in packing. Maintenance of hazardous NIIN data in the Freight Description File wil be discontinued.

E. Document changes as a result of MILSTAMP Mode of Shipment Code changes are reflected in this change. Program changes will have been forwarded prior to June 1985. The most significant impact is that Mode of Shipment Code 5 is no longer United Parcel Service (UPS).

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

II. SIGNIFICANT CHANGES.

A. Changes have been made to the Activity File to accommodate Nine Position ZIP Code.

B. Modifications have been made to programs which consolidate Material Release Orders into Shipment Units. These changes include consideration of Less than Truck Load (LTL) Codes and Depot options of when material subject to damage from heat to freezing will be included in the same shipment units as general cargo.

C. Revisions to the on-line TK4, Intransit Data Card programs will provide easier maintenance.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

II. SIGNIFICANT CHANGES.

A. Mode of Shipment Selection for Navy 999/NMCS small parcel shipments has been revised to designate the mode of shipment SPA/FT in lieu of priority parcel post. Selection of carriers designated via the small parcel mode selection table will take precedence over SPA/FT.

B. Hazardous small parcel shipment of NSN's designated UPS Surface Shipment eligible via a new special requirements code will be automatically assigned Mode of Shipment UPS if the shipment is Issue Priority Group III.

C. CONUS small parcel IPB III shipment units which exceed the High Dollar Criteria in Table 04 will automatically be designated UPS for mode of shipment. Selection of carriers designated via the small parcel mode selection table will take precedence over automatic UPS.

D. Revisions have been made to the Government Bill of Lading print program to eliminate the use of continuation sheets whenever all necessary data can be on the continuation sheet has been accomplished. This change will reduce the number of GBL forms necessary to document shipments.

E. The Consolidated Pack Program has been revised to allow entry to the system of the Non MILS TCN assigned to the consolidated pack. All shipment units in the consolidate pack will be chained to the Non MILS TCN. The Non MILS TCN will be perpetuated into the AS Shipment Status and AR_ Materiel Release Order Confirmation transactions.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

II-7-F180-3 and III-7-F180-4	Same

II. SIGNIFICANT CHANGES.

A. Actions have been taken to correct both in process and MOWASP History Records to reflect the correct destination for shipments. Failure to update all records has created discrepancies in many of the transportation reports.

B. Changes have been made to provide Government Bill of Lading Number via a GBL Header Card when Transportation Control and Movement Documents (TCMDs) are sent to Water Terminal Clearance Authorities.

C. The F-61, MRO Depot Processing Time Analysis Report has been documented and minor revisions provided. This report was initially developed by Defense Depot Tracy.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

II. SIGNIFICANT CHANGES.

A. Contractor Operated Parts Depot (COPAD) support capabilities are being expanded to include CONUS customers.

B. MILSTRIP changes to include POE in Material Release Order (MRO) confirmation transactions and to provide United Parcel Service (UPS) Shipment Identification Numbers in MRO confirmations and customer shipment status transactions were implemented 1 May 1984.

C. MEDALOC System enhancements have been provided to improve management information.

D. Formal documentation of changes to improve cancellation processing is included. The program changes were implemented in March 1984.

III. This change sheet will be filed in front of the publication for reference purposes after changes have been made.

FOREWORD
(Supplementation is permitted at Defense Depots only)

This publication constitutes a complete revision of DLAM 4140.2, Vol III and incorporates the latest instructions governing the Defense Depot Transportation and Supply procedures including the change relative to the March 1984, release.

The purpose of this manual is to prescribe standard internal depot procedures for use in processing supply transactions, supply and transportation documents, and related storage and transportation functions associated with the basic DLA distribution system.

Users of this publication are encouraged to submit recommended changes and comments to improve the publication, through channels, to DSAC, ATTN: DSAC-D.

This DLAM 4140.2, Vol III, supersedes DLAM 4140.2, Vol III, dated 1 Sep 78, Changes 1 through 19 and working copy Change 20.

INDEX OF CHAPTERS

CHAPTER	TITLE
1	Policy and Administration
2	Depot Records and Files
3	Receipt Transactions
4	Issue Transactions
5	Adjustments Transactions
6	Loan of DLA Stock Fund Materiel
7	Physical Inventory Procedures
8	Warehousing/Rewarehousing
9	SEAVAN Shipment Planning
10	Storage and Transportation Quality Control Program
11	Control and Issue of Items Having Limited Shelf-Life
12	Disposal Transactions
13	Government Furnished Materiel
14	Inventory Transactions for Military Service-Owned Materiel
15	Assembly/Disassembly and Alteration, Conversion and Modification (ACM)
16	Electrostatic Discharge Sensitive Devices
17	Issues To and Receipts From Maintenance Activities
18	Foreign Military Sales (FMS) and Military Assistance Program (MAP) Grant Aid
19	Emergency Processing
20	Direct Commissary Support System (DICOMSS)
21	Acquisition, Receipt, Storage, Issue and Accounting for Multiple Managed Items

CHAPTER	TITLE
22 thru 59	Unassigned
60	Planning and Effecting Shipping Action
61	Violations (Controlled and Uncontrolled)
62	Location Survey
63	Reporting of Storage Space
64	Unassigned
65	MOWASP Entry-Exit System Processing
66	Stock Locator System
67	Local Management Decisions in MOWASP
68	Receipt, Storage and Issue of Controlled Substances, Sensitive Drug Abuse Control and Pilferable DLA Items
69	Unassigned
70	Storage Surveillance
71	MOWASP Central Data Bank
72	Reconciliation of Depot and ICP Balance and Transaction Records
73	Unassigned
74	Management Information and Reports
75 thru 79	Unassigned
80	Freight Classification/Description Data
81	Unassigned
82	Shipping Procedures
83	Bill of Lading
84	Transportation Intelligence

CHAPTER 1

POLICY AND ADMINISTRATION

SECTION 1 - GENERAL

301101 - PURPOSE

a. DLAM 4140.2, Supply Operations Manual, is published in three separate volumes, each of which prescribe policies, procedures, and criteria for an aspect of supply operations within DLA.

b. Volume I contains the policies and procedures for the DLA Distribution System and describes the interrelationship between DSCs and DLA distribution activities. Volume II prescribes internal DSC (except DFSC) procedures for determination of requirements, distribution, and inventory accounting of materiel on a centralized basis.

c. Volume III, entitled "Defense Depot Transportation and Supply Procedures" prescribes procedures and detailed criteria for operating personnel at DLA distribution activities (defense depots and DSCs with collocated storage activities), except DFSC storage sites.

301102 - SCOPE

The procedures contained in this volume are based on the Mechanization of Warehousing and Shipment Processing (MOWASP) System of the DLA Standard Automated Information System (SAIS) Change Procedure.

301103 - RESPONSIBILITIES

a. HQ DLA-O is responsible for:

(1) Developing the policy content of this volume and determining responsibilities for development and maintenance of functional area procedural content (chapters and appendices) and functional systems requirements changes. These responsibilities include the direct assignment of research and development projects, DoD directed programs, system improvements objectives, and major system changes to the Depot Management Systems Division for MOWASP or to other DLA distribution activities as required.

(2) Developing and/or maintaining procedural content of this volume and on a case-by-case basis, assigning specific development or maintenance tasks to DLA distribution activities (Defense Depots, DSAC, and DSCs with collocated storage activities).

(3) HQ DLA-OP, as the DLA-O focal point for MOWASP is responsible for task assignments and for furnishing policy guidance, direction, and general requirements relative to the development or maintenance of functional area procedural content (chapters and appendices) or functional system requirements changes assigned to DLA distribution activities and DSAC.

(4) Evaluating for approval or disapproval, proposed changes to procedural content and/or proposed functional system requirements changes prepared by DLA distribution activities or DSAC, within DoD and DLA policy, and considering known or projected impacts on the DLA Distribution System and resources and known or projected savings/benefits to be achieved.

(5) Accomplishing final coordination of draft procedural changes and/or proposed functional systems requirements changes within DLA, and as necessary with Services/Civil Agencies; determining (in conjunction with DSAC and other distribution activities, when necessary) the effective date of changes to procedural content of this volume and/or the implementation dates of approved functional systems revisions; and publishing of approved changes to the procedural content of this volume.

(6) Coordinating and maintaining interface and compatibility with SAMMS and other DoD systems.

(7) Performing liaison and surveillance functions with distribution activities and DSAC in the developmental and implementation phases of assigned R&D projects and other task assignments.

(8) Coordinating and conducting functional tests with DSAC to upgrade and improve the MOWASP System.

b. DLA distribution activities are responsible for:

(1) Developing, reviewing, and revising or recommending revisions to the functional area procedural content of this volume and/or data systems requirements changes as requested/assigned by HQ DLA on a case-by-case basis.

(2) Full implementation of the procedures expressed in this volume in a manner which will assure effective utilization of available resources and accomplishment of assigned missions.

c. Depot Management System Division (DSAC) is responsible for:

(1) Developing detailed functional system requirements and related procedural documentation for changes, revisions, or new system improvements approved by HQ DLA-O.

(2) Providing to HQ DLA-OP a system impact statement and a cost/benefit analysis for proposed functional system improvements.

(3) Coordinating approved changes with all distribution activities during the development state to ensure compatibility and applicability of system requirements.

(4) Coordinating with distribution activities and recommending to HQ DLA-OP short and long range solutions to operational problems when requested by HQ DLA-OP.

(5) Provide to HQ DLA (DLA-OPP) a monthly progress and status report for all open functional projects assigned by DLA-O.

(6) Coordinating training and implementation schedules with DLA-OP for new or revised functional system applications.

(7) Provide functional guidance to distribution activities assigned an R&D project to ensure SAIS interface.

(8) Initiating publication action for approved changes to this manual.

SECTION II - POLICY

301201 - PRINCIPLES OF THE MOWASP SYSTEM

The following policies, principles, and conceptual requirements will be observed when developing procedural materiel and changes to this volume:

a. DLA operates under a centralized inventory accounting and requisition processing system.

b. DoD 4140.22M, Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP) governs inventory segmentation in terms of ownership, purpose, and condition of materiel; prescribes authorized receipt and inventory adjustment transactions; and provides related authorized Document Identifier Codes (DICs).

c. DoD 4140.17M, Military Standard Requisitioning and Issue Procedures (MILSTRIP) prescribes authorized requisition, issue, and followup/cancellation transactions and provides related authorized DICs.

d. DoD 4500.32R, Military Standard Transportation and Movement Procedures (MILSTAMP) contains the forms, codes, procedures, rules, and methods required by Department of Defense (DoD) components to effect movement of materiel within the Defense Transportation System (DTS).

e. Information necessary for warehouse management, identification, and location of stock, packaging, shipment addressing, shipment routing and shipment planning, physical inventory, and related areas is stored within the MOWASP System and is fully documented within this volume.

f. Materiel Release Orders (MROs) with Issue Priority Designator (IPD) 1-8 are received, recorded, and released for immediate processing, while routine MROs with IPD 9-15 are accumulated for release and processing within the timeframes authorized by DLAR 4410.1, Uniform Materiel Movement and Issue Priority System (UMMIPS).

g. Stock locations are assigned; surveillance inspections are scheduled; operational tests are scheduled; data required for cost, performance, budget, space, and manpower reports are accumulated within the MOWASP System.

h. Input transactions, both externally generated and internally initiated, are validated, edited, and processed within the MOWASP System. The procedural materiel of this volume outlines the validation criteria for each input action and defines the research and processing instructions for correction and reentry of rejected transactions.

i. The 13-digit National Stock Number (NSN) will be used in all materiel management functions, both nationally and internationally. The configuration of the NSN when written, typed, or printed is as follows:

4 digits, hyphen, 2 digits, hyphen, 3 digits, hyphen, 4 digits, requiring a total of 16 spaces - 9999-00-999-9999.

The hyphen will not be included in machine records but may be machine generated when required for publication/printing purposes. The term "National Item Identification Number (NIIN)" has been selected to identify the 9-digit item identification number portion and differentiate it from the currently used "Federal Item Identification Number (FIIN)" of 7 digits (e.g., 00-999-9999).

301202 - CONTENTS OF VOLUME III

This volume includes:

a. Chapters containing procedures, criteria, and instructions for one or more related functional areas.

b. Seven types of appendices supporting the chapters as follows:

A - Codes used on input or output documents or as part of computer files and records.

B - Formats for punched card inputs and outputs.

C - Forms and miscellaneous instructions.

D - Procedure Decision Charts depicting the processing criteria for all types of transactions.

E - Step-by-step procedures for all documents requiring manual preparation, processing, or reviews or step-by-step procedures for a series of actions, i.e., conducting an inventory.

F - Operational documents and management information reports and listings.

G - Definitions, abbreviations, and symbols.

SECTION III - FORMATS

301301 - CHAPTERS

a. The chapters are prepared in essentially the same manner as the corresponding chapters in volume I and include a description of the policies, criteria, guidelines, and procedures for use in one or more related functional areas. They specify input documentation and outline the document validation and processing to accomplish a desired action or transaction.

b. The chapters are the media used to link together the related codes, input and output card formats, computer processes, output documents, and manual processing instructions for specific functional areas.

c. The basic format of chapters and detailed guidance for preparation, including page and paragraph numbering, is presented in section VI to this chapter.

301302 - APPENDICES

The appendices are prepared in the formats specified in section VI to this chapter which include detailed guidance for page and paragraph numbering.

SECTION IV - MAINTENANCE

301401 - ASSIGNMENT OF CHAPTER AND APPENDIX NUMBERS

a. Assignments of functional area development responsibilities by chapter and appendix to distribution activities are made as required by HQ DLA.

b. When numbers for new chapters and/or appendices are required, distribution activities will contact HQ DLA, ATTN: DLA-OPP.

c. All chapters and appendices are published, controlled, and maintained by DLA-OPP.

301402 - ASSIGNMENT OF CODES

All codes, except Z series DICs and Violation Reason Codes (VRCs), used in the manual and computer processes in this volume are controlled by DLA-OPP. For expediency, DSAC is delegated the responsibility of assigning and cataloging Z series DICs (internal codes) and VRCs. When required, VRCs may be obtained by telephone or mail from DLA-OPP.

301403 - PREPARATION AND SUBMISSION OF PROPOSED CHANGES

a. A proposed change to MOWASP may originate in HQ DLA, any DSC, distribution depot, DSAC or other PLFAs at any time. Proposed changes will be documented and submitted in accordance with DLAR 4730.3.

b. Actions to incorporate changes directed by higher headquarters such as military standard systems (i.e., MILSTRIP MILSTRAP and MILSTAMP) into MOWASP programs and this volume will be initiated by HQ DLA and forwarded to DSAC in accordance with DLAR 4730.3.

c. Originator of a proposed change to existing documentation will document the recommended change, addition, and/or deletion as completely as possible with specific proposed recommendations to all affected portions of this volume. Samples and instructions contained in section VI to chapter 1 of this volume will be used. Affected paragraphs, pages, chapters or appendices will be rewritten with changed portion identified by a vertical black line in the outside margin of the page. New appendices will not be marked; Table of Contents or Indices will indicate their insertion.

301404 - SCHEDULING OF PUBLICATION AND IMPLEMENTATION OF CHANGES

a. Planned implementation dates will be established during the quarterly review meetings attended by DSAC, DLA-LS and DLA-OP in accordance with DLAR 4730.3. Planned implementation dates will be determined by assessment of system change impact, availability of programing resources, training requirements at the distribution activities, time required to publish documentation changes the programing hours involved, testing requirements and the priority of the functional requirement.

b. Prior to the implementation date, all changes will undergo a functional test at DSAC prior to release to DDOU for environmental test. Functional tests will be conducted by HQ DLA functional personnel. Field activities may be requested to participate in the functional test.

c. No less than seventy days prior to system change implementation, DSAC will forward to HQ DLA-OPP draft page changes to this manual for final coordination and approval. Approved changes will be forwarded by DLA-OPP to DSAC no less than sixty days prior to final publication.

d. Changes to this volume, computer programs and/or detailed written instructions will be published and distributed by DSAC at least 15 days prior to system change implementation date to provide distribution activities adequate time for training.

e. All distribution activities will implement changes simultaneously to the extent possible.

f. Changes to this volume will normally be made on a quarterly basis.

301405 - PUBLICATION OF CHANGES

a. This volume is published in loose leaf form to facilitate revision of paragraphs, pages, chapters, or appendices which will be published as needed. Revisions will be primarily by deletion and insertion of pages in proper sequence. In rare instances, request will be made that change be indicated in pen and ink.

b. All revised pages will be identified in upper outside corner by the manual number, volume number, and change number. The changed portion will be identified by a vertical black line in outside margin.

c. Revisions to this volume will be transmitted by Change Sheets which will contain a resume of the revisions attached with effective dates; and may indicate minor changes which can be effected by pen and ink. After revisions have been received and posted into this volume, Change Sheets will be filed behind the cover of this volume.

301406 - LOCAL PROCEDURES

This volume is designed to provide detailed operating and desk procedures to the lowest practical level.

a. Local reproduction of this volume for the purpose of distribution or the assembling of functionally oriented desk procedures is prohibited. The incorporation of materiel contained herein into local publications is also prohibited.

b. Policy regarding the publication of local procedures is contained in DLAR 5025.3, Guide for Preparation of Regulatory Publications.

c. Policy regarding locally developed procedures designed to amplify this volume is as follows:

(1) Two copies of local procedures will be provided DLA-OPP for review.

(2) Included with each procedure or set of related procedures will be a statement of the reasons for the development of the local procedure. This statement will be in sufficient detail to ensure that the reviewing activity and related Headquarters functional managers gain a clear understanding of the intent of the procedure and its relation to the overall operation as it exists at the originating activity.

(3) DLA-OPP and appropriate Headquarters staff elements will review local procedures with the intent of ensuring:

(a) That Headquarters policy, as expressed in this volume or other DLA or higher Headquarters regulations or manuals, is not violated.

(b) Local procedures which amplify detailed procedures expressed in this volume do not adversely impact the overall MOWASP system.

(c) Incorporation into this volume of those procedures which are obviously applicable to all activities operating under this volume.

(4) In those cases wherein the guidelines established in subparagraph c(3)(a) and (b) above are not met, appropriate correspondence will be initiated with the originator of the procedure.

(5) Locally developed procedures should be prepared in the format outlined in attachments 1 through 6 to chapter 1 of this volume, except narrative portions of chapters and appendices for local procedures may be developed in single columns.

(6) Locally developed procedures will be printed on colored paper. Such procedures/appendices will be distinctly indicated by the addition of "(L)" to each numbered page; i.e., C-68(L)-3, E-005(L) P-5.

SECTION V - DISTRIBUTION AND RELATIONSHIP TO OTHER DIRECTIVES

301501 - DISTRIBUTION OF VOLUME III

This volume receives special distribution. Additional requirement or copies or amended distribution of changes to this volume should be forwarded through publication distribution channels.

301502 - RELATION TO OTHER DIRECTIVES

If the procedures contained in this volume appear to conflict with DoD or other DLA publications, the subject should be immediately submitted to HQ DLA, ATTN: DLA-OPP for consideration and correction.

SECTION VI - ATTACHMENTS TO CHAPTER 1

301601 - GUIDANCE FOR PREPARATION OF CHAPTERS

a. Each chapter:

(1) Is the general, narrative description of the policies, criteria and guidelines of one or more related functional areas.

(2) Specifies the precise documentation involved in processing transactions through the function and their interrelationships.

(3) Covers fully the procedures involved in processing transactions through the function without overlapping or being dependent upon other chapters. Interrelated chapters are integrated by making references to and from, without duplication of descriptive narrative.

(4) Corresponds with requirements of DLAM 4140.2, Volume I, where applicable, and is written in essentially the same manner as corresponding chapter.

(5) Is assigned a number, title and the responsible activity as recorded on CONTENTS pages.

(6) Is subdivided into sections.

(7) Utilizes the following paragraph numbering system:

(a) A six-digit number constructed as follows:

1st -x (specifies the volume)
2nd and 3rd-xx (specifies the chapter)
4th -x (specifies the section within chapter)
5th and 6th -xx (specifies the paragraph within the section)

(b) Subparagraphs are indicted by lower case alphabet, then numeral enclosed in parenthesis. Examples:

301234
301234a
301234(1)

(c) Pages are numbered in separate series for each chapter to identify the volume, part, chapter and page. For example, the tenth page of chapter 3 is numbered III-1-3-10. The index page is identified in similar manner but with an "i" inserted after the chapter number. For example, the index page for chapter 3 would be III-1-3-i1.

(8) Is preceded by an INDEX of the chapter.

b. The first section is entitled GENERAL and includes paragraphs, as appropriate, in the following order:

(1) PURPOSE

(2) SCOPE

(3) REFERENCES

(4) BACKGROUND

(5) POLICY

(6) RESPONSIBILITIES

c. Each following section:

(1) Covers the documentation and general procedures for a single transaction or a related group of transactions.

(2) Describes the processing of source documents.

(3) Describes internal computer processes, as necessary, to portray procedural logic for purposes of programing, training and management review.

(4) Describes the general processing of computer outputs and, if applicable, their reentry into the computer.

(5) Refers to all appropriate appendices which give the complete specific details of the procedures.

d. Chapters being submitted for publication will:

(1) Be typed on 8 1/2" x 11" white bond paper. Elite type is preferred.

(2) Be typed single spaced within the limits shown in SAMPLE/INSTRUCTION #1.

(3) Not to be stapled or punched.

SAMPLE INSTRUCTION #1

Single column format is used for chapters and all appendix narratives.

301602 - GUIDANCE FOR PREPARATION OF A APPENDICES

a. Each A Appendix:

(1) Describes and lists a series of codes used in more than one situation or instance in this volume.

(2) Corresponds, as appropriate, with appendix of same number in volume I, this manual.

(3) Is published, controlled and maintained by DSAC.

(4) Utilizes a separate series of page numbers for each appendix in sequence, with arabic numerals from 1. Each page will identify the volume, part, appendix and page. For example, the third page of appendix A-42 is numbered III-2-A42-3.

(5) Is listed in Alphabetic Index of A Appendices which appears ahead of A Appendices and is numbered in arabic numerical sequence, preceded by the letters A-i-. The first page of the Alphabetic Index of A Appendices is numbered III-2-Ai-1.

b. Codes:

(1) Conform to MILSTRIP, MILSTRAP, MILSTAMP Volume I, and so forth, as required and applicable.

(2) Are listed alphabetically, then numerically, if appropriate. The letters I and O will be omitted, if possible.

c. Format: See next page.

When new or revised A Appendices are proposed, submittals:

(1) Will be typed on 8 1/2" x 11" white bond paper. Elite type is preferred.

(2) Will be typed single spaced across the full page within the limits shown on SAMPLE/INSTRUCTION #1 to chapter 1.

(3) Will not be stapled or punched.

F O R M A T

T-------I-------T-------L-------E

1. Number of characters:

2. Type of code: (alphabetic, numeric or alphanumeric)

3. Explanation:

4. Source: (if applicable)

5. The following codes are assigned:

CODE	DEFINITION

6. References: (Related appendices and chapter(s))

301603 - GUIDANCE FOR PREPARATION OF B APPENDICES

a. Each B Appendix:

(1) Describes an input or output format used in the processes described in this volume. Describes the validation to be applied to input prior to being processed as shown in D Appendices.

(2) Corresponds, as appropriate, with appendix of same number in volume I, this manual.

(3) Conforms to MILSTRIP MILSTRAP and so forth, as required.

(4) Is published, controlled, and maintained by DSAC.

(5) Utilizes a separate series of page numbers for each appendix, in sequence, with arabic numerals from 1. The third page of appendix B-42 is numbered III-3-B42-3.

(6) Is listed in Alphabetic Index of B Appendices which appear ahead of B Appendices and is numbered in arabic numerical sequence, preceded by the letters Bi-. The first page to the Alphabetic Index of B Appendices is numbered III-3-Bi-1.

b. Format: See next page.

When new or revised B Appendices are proposed, submittals will:

(1) Be typed on 8 1/2" x 11" white bond paper. Elite type is preferred.

(2) Be typed single spaced across the full page within the limits shown on SAMPLE/INSTRUCTION #1 to Chapter 1 and in prescribed format.

(3) Not to be stapled or punched.

F O R M A T

APPENDIX B_

T-------I-------T-------L-------E

1. Explanation of use, source, form number of card, or card stock used and any pertinent instructions for preparation of the input or use of the output card. (Include reference to applicable chapter(s)).

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS *	EXPLANATION/INSTRUCTIONS **	INTERPRETER PRINT SPACES UPPER LOWER ***

3. Input will be validated as follows:

FIELD POSITION	VALIDATION	VIOLATION CODE

*All 80 positions are always identified consecutively.
**State, if appropriate, "Refer to applicable code in Appendix - ."
***If no interpretation is required, this position is omitted.

301604 - GUIDANCE FOR PREPARATION OF C APPENDICES

a. Each C Appendix:

(1) Depicts either a printed form, form letter or other format not included in another appendix or describes standard miscellaneous instructions which cross functional area lines.

(2) Corresponds, as appropriate, with appendix of same number in volume I, this Manual.

(3) Is assigned, by DLA-OPP, a number and responsible activity as recorded in the Index of C Appendices.

(4) Utilizes a separate series of page numbers for each appendix, in sequence, with arabic numerals from 1. The third page of appendix C-11 is numbered III-4-C11-3.

(5) Is listed in Alphabetic Index of C Appendices which appears ahead of C Appendices and is numbered in arabic numerical sequence preceded by the letters Ci-. The first page of the Alphabetic Index of C Appendices is numbered III-4-Ci-1.

b. Format: See following pages.

c. Proposed new forms or form letters are forwarded to HQ DLA ATTN: DLA/OPP for assignment of DLA form numbers, prior to preparation of C Appendix.

d. C Appendices, other than those depicting a printed form, will:

(1) Be typed on 8 1/2" x 11" white bond paper. Elite type is preferred.

(2) Be typed single spaced across the full page within the limits shown on SAMPLE/INSTRUCTION #1 to Chapter 1.

(3) Not to be stapled or punched.

F O R M A T

APPENDIX C_

T-------I-------T-------L-------E
(Form Number)

Fascimile of form

OR

APPENDIX C_

T-------I-------T-------L-------E

1. ORIGIN/SOURCE (Where appropriate)

2. PURPOSE/USE

3. REFERENCES (Includes all related appendices and chapters)

4. EXPLANATION/FORMAT

(Describe instructions, chart, graph or table fully or refer to attached page for format or contents)

301605 - GUIDANCE FOR PREPARATION OF D APPENDICES

a. Each D Appendix:

(1) Describes the system design requirements for a single process or for a group of closely related input transactions.

(2) Is prepared in two parts:

(a) A cover page or narrative which describes in general terms the process identified as the system design requirements and lists input(s), output(s), related references, and any other special considerations involved.

(b) A flow chart which depicts the linear flow, in question and answer form and the criteria for processing or posting the mechanical records or files involved.

(3) Is assigned a number by DLA-OPP, which is recorded on the Index of D Appendices.

(4) Utilizes a separate series of page numbers for each appendix, in sequence, with arabic numerals from 1. The third page of appendix D-42 is numbered III-5-D42-3.

(5) Is listed in Alphabetic Index of D Appendices which appears ahead of D Appendices and is numbered in arabic numerical sequence preceded by the letters Di-. The first page of the Alphabetic Index of D Appendices is numbered III-5-Di-1.

b. Each cover page or narrative of D Appendices being submitted for publication will be in the format as shown on page III-1-1-21 and will:

(1) Be typed on 8 1/2" x 11" white bond paper. Elite type is preferred.

(2) Be typed single space within the limits shown on the SAMPLE/INSTRUCTION #1 to chapter 1. See example on following pages.

(3) Not to be stapled or punched.

c. Each flow chart of D Appendices being submitted for publication will:

(1) Clearly reflect all specific processing instructions, actions, and outputs required.

(2) Reflect only English language or authorized abbreviations (see appendix G-2) in lieu of programing language or symbols.

(3) Reflect only authorized Charting Symbols (see appendix G-3).

(4) Be typed (or legibly printed) on 10 1/2" x 15" white bond paper. When typed, elite type is preferred.

(5) Be prepared within the limits shown on SAMPLE/INSTRUCTIONS #2 and in format as shown on following pages.

(6) Not to be stapled or punched.

F O R M A T

APPENDIX D_

T-------I-------T-------L-------E

1. INITIATING ACTION

List DIC, title, and appendix number of input card(s) or preset program trigger, e.g., first day of month; expiration of (specified) suspense period, and so on.

2. REFERENCES

List related appendices and chapter(s), as applicable.

3. GENERAL

Describe in general terms the purpose, process, action, or transactions involved and direct specific attention to those segments which deviate from normal expectations or require special emphasis.

4. OUTPUT(S)

List numerically within group; all B, C, and F documents by appendix number and exact title. If none, state none.

SAMPLE/INSTRUCTION # 2

S A M P L E

APPENDIX D-8

PROCESSING INVENTORY NUMBERING CONTROL CARD

1. INITIATING ACTION

Input of Inventory Numbering Control Card, Appendix B-68, to close an inventory and to prepare Summarized Inventory Count Cards.

2. REFERENCES

a. Chapter 7

b. Appendix A-82

c. Appendix B-68

d. Appendix E-068 P

e. Appendix E-068 V

3. GENERAL

This card is input when an inventory has been completed. This process clears the inventory suspense file or produces Research Count Cards if all initial Count Cards have not been returned. When all Count Cards are accounted for, Summarized Count Cards are produced and forwarded to the DSC.

4. OUTPUTS

a. Appendix B-25

b. Appendix B-84

c. Appendix F-17

d. Appendix F-85

301606 - GUIDANCE FOR PREPARATION OF E APPENDICES

a. A separate E Appendix provides precise and complete step-by-step procedural instructions for processing all documents which require manual attention as follows:

(1) Manual preparation of all internally originated inputs (certain B Appendices).

(2) Manual correction of ALL possible violations of ALL (external or internally originated) input cards and real-time inquiries (certain B Appendices).

(3) Manual processing of output cards not going immediately to AUTODIN (certain B Appendices).

(4) Manual processing of all printed forms which are computer-produced (certain C Appendices).

(5) Manual preparations of printed forms which are internally originated but not computer-produced (certain C Appendices).

(6) Manual processing of computer-produced reports/listings when not fully described in the F Appendix.

(7) Manual procedures for certain normal internal operations.

b. Each of the above seven categories of procedures will (with possible MINOR variations) fit one of the attached SAMPLE/INSTRUCTION #3, #4, or #5. These SAMPLE/INSTRUCTIONS are to be followed as closely as possible for uniformity, but are not intended to be over-restrictive.

c. Each E Appendix is to be written to the lowest possible operating element within the standard organization framework (DLAM 5810.1, Organization of DLA Field Activities).

d. Each E Appendix is assigned a number by DLA-OPP, which is recorded on the Index of E Appendices. This number is configured as follows:

1st alpha - E (constant)

3 numeric - 3 digits based on related B, C, or F appendix number, where possible (e.g., E-007 corresponds to B-7; E-011 corresponds to C-11, and so forth).

2nd alpha - P indicates:

preparation of input,

processing of output, or

procedure for specific action or all three possibilities.

V indicates processing of Violations for an input document.

e. Each page of an E Appendix submitted for publication will:

(1) Be typed on 8 1/2" x 11" white bond paper. Elite type is preferred.

(2) Be typed single spaced across the page. Margins are:

(a) 3/8" left and right edges.

(b) 1 1/2" at top.

(c) 1" at bottom with page number centered at 1/2" from bottom edge.

(3) Not to be stapled or punched.

SAMPLE/INSTRUCTION #3

APPENDIX E-000 V

PROCESSING LOGISTIC TRANSFER/DECAPITALIZATION CARD VIOLATIONS

1. INPUT DOCUMENT

Define the input document represented by the output violation notice (appendices B-65, F-122 and/or F-117).

EXAMPLE PARAGRAPH

Appendix B-1, Logistic Transfer/Decapitalization Card, DIC DE_.

2. INPUT TO PROCEDURE DECISION CHART(S)

Identify the applicable D Appendix(es) for the input document.

EXAMPLE PARAGRAPH

Appendix D-225.

3. PURPOSE, CONTENTS AND RESPONSIBILITIES

Define the purpose, contents and responsible organizational element, within the standard organization framework, responsible for the specific document/error conditions to be processed including reference to applicable chapter(s).

EXAMPLE PARAGRAPH

This appendix is applicable to chapter 8 and provides instructions for the research, correction and reentry of Logistic/Transfer/Decapitalization Cards which have been rejected from computer processing. Reasons for computer rejection by Violation Reason Code (VRC), in alphabetical order, are listed below. The Materiel Support Branch of the DSO is responsible for processing all these VRCs.

VIOLATION REASON CODE	DEFINITION
AB	Invalid RIC-FROM
AC	Invalid RIC-TO
AN	Invalid UI
AW	Invalid Management Code

4. PROCESSING/RESEARCH INSTRUCTIONS

Define processing actions and research instructions for each violation/error condition listed in paragraph 3 above, as follows:

a. VRC AW.

(1) REASON FOR VIOLATION/ERROR CONDITION

Define reason input document rejected from computer processing.

EXAMPLE PARAGRAPH

(1) VRC AW indicates that data in pos. 72 of the input document was other than an authorized Management Code as defined in Appendix A-13.

(2) PROCESSING/RESEARCH REQUIRED

Define specific processing or research actions required to obtain the correct data element.

(a) Include preparation and submission of specific required inquiry form(s) by referring to appropriate DIC, specific B Appendix number and specific Action Code(s) (appendix A-42). Do not duplicate column-by-column entries reflected in a B Appendix, unless such reiteration provides necessary clarity to the processing instructions.

(b) Include inquiry to source as necessary, and specify media of communication to be used, based on document priority or critical timing.

(c) Include reference to source documents by complete title and reference number (e.g., DLAR 5205.1, and so forth), when required.

(d) Include reference to related E and C Appendices as applicable without duplicating specific instructions. Manually prepared documents which are not covered by a specific E appendix should be fully documented and explained (entry-by-entry).

b. REPEAT PARAGRAPH(S) IN ALPHABETICAL ORDER SIMILAR TO 4a ABOVE FOR EACH VIOLATION REASON CODE/ERROR CONDITION LISTED IN PARAGRAPH 3 ABOVE.

5. REENTRY INSTRUCTION

Define exact procedures for preparation of keypunch source document.

EXAMPLE PARAGRAPH

a. Review remaining data elements contained in violation output documents to detect any other invalid data, and correct as necessary.

b. Reentry method for violations is contingent upon type of violation output document which is a local option and recorded in the Output Routing Code Table (appendix F-20). The following codes are the various options with reentry instuctions:

CODE	OUTPUT	REENTRY
1	ZLR - Controlled Violation Listing, Appendix F-122	Using either Violation Listing, Appendix F-122 or Violation/ Suspense Control Reentry Card, Appendices B-66 and C-41, enter corrected data and/or Violation Reentry Code (Appendix A-62) with colored pencil or ink and submit as prescribed in Appendix E-066 P.
2	ZSR - Violation Control Reentry Card, Appendices B-65 and C-57	Using Violation Control Reentry Card (Appendices B-65 and C-57), enter corrected data and/or Violation Reentry Code (Appendix A-62) in spaces provided with pencil or pen and submit as prescribed in Appendix E-065 P.
3	Uncontrolled Violation, Appendix F-117	Reentry, when required, is accomplished as prescribed in Appendix E-346 P.

6. FLOW CHART

E Appendices will be supported by a document processing flow chart only when necessary to further explain the manual processing/research actions required in the procedure. When a document processing flow chart is not deemed necessary, this paragraph will reflect the statement "Flow Chart not required".

SAMPLE/INSTRUCTION #4

APPENDIX E-000 P

PREPARATION OF REPORT OF RECEIPT SUSPENDED FOR CLASSIFICATION
(CUSTOMER EXCESS RETURNS)

1. FORM/REPORT USED

Appendix C-36, Report of Item Discrepancy, (SF 364).

2. REASON/CRITERIA FOR PREPARATION

Define the circumstances requiring the preparation and submission of the specific form/report.

EXAMPLE PARAGRAPH

"The Report of Item Discrepancy (SF 364) is prepared and submitted when materiel returned from customers is placed (and reported) in Condition Code K and technical information or assistance is required for proper materiel classification."

3. RESPONSIBLE ORGANIZATIONAL ELEMENT

Define the organizational element within the standard organization framework responsible for the preparation and processing of the form/report.

4. PROCEDURES/INSTRUCTIONS FOR PREPARATION OF FORM/REPORT

a. SOURCE(S) OF INFORMATION

Define source(s) of information/data to be included on the specific form/report being prepared.

EXAMPLE PARAGRAPH

"The SF 364 is prepared from information obtained from the DoD Single Line Item Release/Receipt Document (DD Form 1348-1) or the Shipping Document for GFM Turn-in (DD Form 1483) accompanying the materiel."

b. PREPARATION OF FORM/REPORT

Define the preparation of the form/report to include block-by-block entries, fully cross-referencing the source of each specific data element/informational entry.

EXAMPLE PARAGRAPH

"Prepare or complete SF 364 as follows:

BLOCK NUMBER	TITLE/INSTRUCTIONS
1	Document Number-Enter Document Number the Document Number field of the DD Form 1348-1 or DD Form 1483.
2	Date-Enter current Day, Month and Year.
3	Date Received-Enter date from Inspection/ Tally-in Sheet.
4	Remarks-Enter exact description of discrepancy and, when necessary, request the specific information or assistance."

c. SIGNATURE/APPROVAL REQUIREMENTS

Define signature/approval authority in relationship to originating individual/organizational element.

EXAMPLE PARAGRAPHS

"Signature block will be completed by originating inspector to include name, rank (or grade) and title." or

"Signature block (based on final approval) will be completed by the Branch Chief, supervising the originating warehouseman. Signature block must contain name, rank (or grade) and title."

d. DISTRIBUTION OF FORM/REPORT

Define the internal/external distribution of the completed form/report to include complete file name/title/nomenclature for those copies to be retained in internal files or suspense.

EXAMPLE PARAGRAPH

"The completed SF 364 will be distributed as follows:

Original and 3 copies - to DSC managing the materiel involved.
4th copy - to Report of Item Discrepancy Suspense File in date sequence.
5th copy - to Suspended Receipt Control File with suspended receiving documentation.
6th copy - with suspended materiel."

5. PROCEDURES/INSTRUCTIONS FOR PROCESSING RESPONSE TO OR RETURNED FORM/REPORT

Define each action required on receipt of reply or returned copy of the form/report from the action office/installation, to include instructions for preparation and submission of follow-on computer input by reference to appropriate DIC and B Appendix. Do not duplicate column-by-column entries described in the related B Appendix, unless reiteration lends necessary clarity to the processing instructions.

6. DISPOSITION OF FORM/REPORT AFTER FINAL ACTIONS

Define any mandatory timeframes for retention of completed form/report.

EXAMPLE PARAGRAPH:

"Completed SF 364 will be attached to and retained with corresponding receiving document (i.e., DD Form 1348-1) until the basic document is destroyed under current records disposition procedures." or

"Completed SF 364 will be destroyed on completion of all follow-on actions required by paragraph 5 above."

7. FLOW CHART

E Appendices will be supported by a document processing flow chart only when required to further explain the manual processing/research actions required. When a document processing flow chart is not deemed necessary, this paragraph will reflect the statement "Flow Chart not required."

SAMPLE/INSTRUCTION #5

APPENDIX E-001 P

CONDUCTING SAMPLE LOCATOR AUDIT - STOCK TO LOCATOR

1. PURPOSE

Define the purpose and necessity for the procedures being established.

EXAMPLE PARAGRAPH

"This procedure describes the method of conducting sample location audit of materiel in storage by comparison to the Item Locator Records. Sample audits may be conducted on the basis of location parameters, FSC parameters or commodity managers, contingent upon the type of storage, and are required to determine the degree of accuracy of the established Item Locator Records."

2. APPENDICES USED IN THIS PROCESS

Indicate related B, C and F Appendices required in the process/procedure established by this appendix.

EXAMPLE PARAGRAPH

a. C-64

b. F-8

c. F-27

d. F-27

e. F-36

f. F-53

g. F-56

3. RESPONSIBLE ORGANIZATIONAL ELEMENT

Define the organizational element, within the standard organization framework, responsible for the completion of the procedures/process described by this appendix.

4. PROCEDURES/INSRUCTIONS

Define the step-by-step actions required in the procedures being established by this appendix to include the uses and relationships of related appendices listed in paragraph 2 above.

a. Include preparation and submission of required computer input by referring to appropriate DIC, B appendix number and Action Code(s) (appendix A-42) without duplication instructions.

b. Include preparation and submission of hard-copy forms/reports, as applicable. Do not duplicate block-by-block entries on a C Appendix which are covered by a separate E Appendix. Manually-prepared documents which are not covered by an E Appendix should be fully documented and explained.

c. Include quality control and results evaluation techniques, when required.

d. Include disposition instructions or instructions for dissemination of results.

5. FLOW CHART

E Appendices will be supported by a document processing flow chart only when required to further explain the manual processing/research action in the procedure. When a document processing flow chart is not deemed necessary, this paragraph will reflect the statement "Flow Chart not required".

301607 - GUIDANCE FOR PREPARATION OF F APPENDICES

a. Each F Appendix:

(1) Describes a computer-prepared operating document or printout. Where possible, the word "report" is avoided to preclude the assignment of a Reports Symbol Number which is NOT required for operating documents and listings.

(2) A number is assigned by DLA-OPP as indicated in the Index to F Appendices.

(3) Consists of both explanatory page(s) and illustrative page(s).

(4) Utilize a separate series of page numbers with arabic numerals from 1. The second page of appendix F-2 is numbered III-7-F2-2.

(5) Is listed in Alphabetic Index of F Appendices which appears ahead of F Appendices and is numbered in arabic numerical sequence preceded by the letters Fi-. The first page of Alphabetic Index of F Appendices is numbered III-7-Fi-1.

b. The explanatory page(s) of each F Appendix submitted for publication will:

(1) Be in the format prescribed on the following pages.

(2) Be typed on 8 1/2" x 11" white bond paper. Elite type is preferred.

(3) Be typed within the limits shown on SAMPLE/INSTRUCTION #1 to Chapter 1.

(4) Not to be stapled or punched.

c. Each illustrative page will:

(1) Bear a heading in a single line across the top, as described in paragraph 4 of page III-1-1-36.

(2) Be a facsimile of actual document or printout or will be typed on white bond paper of a size sufficient to accommodate the entire report. Elite type is preferred. When typed, only upper case letters will be used and typing will be within the limits shown on attached SAMPLE/INSTRUCTION #6.

(3) Not to be stapled or punched.

APPENDIX F_*

T-------I-------T-------L-------E

1. PURPOSE

2. ORIGIN

(Indicate output of _ process as depicted in Appendix D-__.)

3. FREQUENCY

(Indicate daily, weekly (on Fridays), monthly (month ending), or upon submission of a specific input action, and so on.)

4. FORMAT (Use either Format Type A or Type B, following):

(Format Type A - THIS WORDAGE TO BE USED FOR PRINTOUTS IN REPORTS FORMAT FILE.)

a. This printout is included in the Reports Format File (RFF) as follows:

(1) Header line which is printed at top of each sheet:

(a) Identification - F-__.

(b) Version Number - incremented each time format is changed.

(c) Title - exactly as shown at top of this page.

*(d) Functional Routing Code

(e) Section/Cycle Number

(f) Date - month, day and year plus Julian date - xx xx xx xxx.

*(2) Number of lines per page:

*(3) Spacing: ___ (single, double, or triple).

*(4) Priority Group:

*(5) "Not Required" flag: ___ (yes or no).

*(6) Cover Sheet data (optional): (Maximum of six lines or 132 characters each).

*(7) Captions of Data Elements.

* May be changed locally; refer to Chapter 67.

b. In addition, the following is prescribed:

(1) Page break is on:

(2) Required totals are:

(Format Type B - THIS WORDAGE TO BE USED FOR PRINTOUTS NOT IN REPORTS FORMAT FILE)

a. This printout is not included in the Reports Format File. The following heading is prescribed and will be printed at top of each sheet:

(1) Identification - F-__.

(2) Version Number - incremented each time format is changed.

(3) Title - exactly as shown at top of this page.

(4) Functional Routing Code - (may be changed locally).

(5) Section/Cycle Number

(6) Date - month, day and year plus Julian date: xx xx xx xxx.

(7) Captions of Data Elements.

b. In addition, the following is prescribed:

(1) Page break is on:__.

(2) Required totals are:__.

5. SEQUENCE

(Indicate the data element on which the sequence of data contained in the printout is based.)

a. Major Sequence:___.

b. 1st Intermediate Sequence:___.

c. 2nd Intermediate Sequence:___.

d. Minor Sequence:___.

6. DATA ELEMENTS

a. Except for overriding reasons, the data element which is the major sequence is always printed in the leftmost column with intermediate and minor sequences following immediately in next right columns.

b. List each caption in the body of the printout and describe fully, including maximum length of field and nature of content of field (alpha, numeric or alpha/numeric).

7. DISTRIBUTION AND RETENTION

(Indicate specific recipients of each copy based on standard organization, DLAM 5810.1, and indicate appropriate disposition instructions.)

8. PROCEDURES FOR REVIEW AND PROCESSING

(Describe procedures for review and use of printout or refer to appropriate E Appendix for step-by-step processing.)

CHAPTER 2

DEPOT RECORDS AND FILES

SECTION I - GENERAL

302101 - PURPOSE

This chapter provides general policy guidance concerning the establishment and maintenance of manual and computer records and files at Defense Depots and DSCs with collocated storage activities.

302102 - SCOPE

This chapter encompasses authority provisions for the maintenance of computer and/or manual files and records for functions covered by DLAM 4140.2, Volume III.

a. Computer file controls and reference data for activity addresses, communications and program controls are detailed in this chapter.

b. Computer records on file accumulated as a result of functional procedures other than above are detailed in those chapters as authorized herein.

302103 - REFERENCES

a. DLAM 4140.2, Volume I.

b. DLAM 5015.1.

302104 - RESPONSIBILITIES

a. Depots will:

(1) Implement procedures as described herein.

(2) Maintain files under guidance herein, and schedule and effect disposition of files as authorized by reference paragraph 302103, and local implementation hereof.

(3) Constantly review record and file requirements to update the computer files and tables.

(4) Assure detail record and file controls utilized in the performance of warehousing and shipment processes are in consonance with this chapter.

(5) Plan the placement of files and records as near as practicable to the organizational element that uses the data the most frequently.

(6) Assure that records and file data are complete and accurate.

(7) Identify manual file records by a prescribed label.

(8) Maintain prescribed security controls.

(9) Assign responsibilities to personnel in file and reference development, suspense and routing control, usage and updating procedures.

b. Office of Data Systems will:

(1) Store and update information utilized in conjunction with management reports transaction controls, or as reference.

(2) Validate all input through edit criteria established for individual programs.

(3) Destroy reference files maintained in the computer, tapes or EAM Cards under an approved schedule.

(4) Provide reference data via remote (real-time) or inquiry programs (scheduled) to other organizational elements.

c. Directorate of Storage and Transportation will:

(1) Assure clarity, accuracy, and control in input source documents provided to the ODS.

(2) Perform research for establishment and maintenance of reference data used by the ODS when performing depot operations.

(3) Provide data accumulated during documentation processing through varied DS/T functional area to ODS.

(4) Review reports and records requiring management decisions.

(5) Maintain manual control, reference and/or history files for functional applications supported/not supported by computer operations.

d. Office of Comptroller will review and analyze manual and/or computer management data provided by ODS and/or DS/T.

SECTION II - CONCEPT OF OVERALL RECORDS, FILES AND DATA ELEMENTS

302201 - GENERAL

Each file or record is under one of three fields. These fields are composed of management reports or listings for review actions, transaction data for procedure controls, and reference data for documentation or research output.

302202 - MANAGEMENT DATA

a. Computer-compiled management data reports and listings are prepared for management review by distribution depots, DSCs and/or HQ DLA. This information is pertinent to controls and performance of shipping, receiving, and in-storage functions, and so forth.

b. The listing of data will be accomplished through various computer or punch card operations, supplemented by manual documentation and procedures. See chapter 63, Reporting of Storage Space and chapter 74, Management Information and Reports.

302203 - TRANSACTION DATA

a. Transaction data files will be retained on file in the computer as suspense control for documentation in-float. Information concerning these records may be updated or queried through card punch and/or remote operations. Specific controls for the functions involved in this procedure are detailed in the various chapters.

b. Audit trails of source documents for computer functions will be retained as specified in procedural chapters.

302204 - REFERENCE DATA

Reference data and controls for the accomplishment of functions covered in this manual may be maintained in the computer or supplied by manual material. Insofar as possible, computer references will be utilized.

a. Computer file data and controls detailed and processed under chapter 2 criteria are presented in sections III and IV.

b. Computer and transaction references are also covered in detail in other chapters of this manual.

302205 - FILE DATA RETRIEVAL

DLA PLFAs and PSEs have several management information retrieval techniques available for the extraction/compilation of ad hoc reports. These techniques are intended for those occasional data requests which are outside the realm of recurring management or operational reporting requirements. See chapter 74, Management Information and Reports, Section IV.

SECTION III - ADDRESS AND PROJECT REFERENCES

302301 - ACTIVITY ADDRESS FILES

a. The Activity Address File consists of coded and in-the-clear addresses supplied to the distribution storage points by DAAS or addresses processed locally for POE/POD addresses, project controls, and destination addresses.

b. The Activity Address File contains all addresses necessary for preparation of DoD Single Line Item Release/Receipt Document (DD Form 1348-1a), Military Shipment labels (DD Form 1387), and Government Bills of Lading (Standard Form 1103). In addition, shipment planning data related to receiving destinations is maintained.

c. Access to the file is random and on-line to support on-line Freight Labeling and Government Bill of Lading preparation.

d. File maintenance is random and on-line to assure currency of addresses.

e. Activity Address Code is the major key to this file. The Activity Address Code (AAC) is comprised on one of the following values and each AAC is a unique value.

(1) Department of Defense Activity Address Code (DoDAAC) - 6 alpha/numeric.

(2) Military Assistance Program Address Code (MAPAC) - 6 alpha/numeric.

(3) Aerial Port of Embarkation (APOE) Code - 3 alpha/numeric.

(4) Aerial Port of Debarkation (APOD) Code - 3 alpha/numeric.

(5) Water Port of Embarkation (WPOE) Code - 3 alpha/numeric.

(6) Water Port of Debarkation (WPOD) Code - 3 alpha/numeric.

(7) Military Service Code plus Special Project Code - 4 alpha/numeric.

(8) CONUS Military Air Terminal Identifier - 3 alpha/numeric.

(9) Destination Activity Address Code developed by DGSC-TTB - 6 alpha/numeric.

DoDAACs and MAPACs comprise the majority of the file - approximately 120,000 DoDAACs and 5,000 MAPACs. The remainder of AACs comprise approximately 4,000.

f. An AAC has the possibility of having from one to ten different Type of Address Codes (TACs). Each Type of Address may vary from one line to seven lines. Appendix A-43 explains the meaning of the TAC and further explains the categories of Activity Address Codes, the Type of Addresses each category may have, and the source of input for the address.

g. Address Use:

(1) TAC 1 (Parcel Post Address), TAC 2 (Freight Address), and TAC M (MAPAC In-country Mark for Address) are used in preparation of the Shipment Label. These addresses are maintained on most AACs. TAC 2 is not maintained if it is identical to TAC 1. Project Codes will have a TAC 1 and 2 if the project has a special shipping destination. TAC 1 is not maintained on Port of Embarkation and Port of Debarkation Codes.

(2) TAC 3, 5, 6, and 9.

(a) TAC 3, Notice of Availability Address, is maintained for Foreign Military Sales AACs. This address is printed in the freight label area on the second set of DD Form 1348-1a when a NOA is required. TAC 5, FMS Document Distribution Address for Parcel Post Shipments, and TAC 6, FMS Document Disbribution Address for Freight Shipments, are printed in the parcel post label area on the second set of DD Form 1348-1a.

(b) TAC 9 is a cross reference address for deleted MAPACs. Positions 19-24 of address line 1 will contain the new MAPAC.

(3) TAC A, B, C, and G.

(a) TAC A, Rail Destination and Delivery Instructions, TAC B, Motor Destination and Delivery Instructions, TAC C, Air Destination and Delivery Instructions, and TAC G, Government Bill of Lading To/Ship To, addresses are used in the preparation of the Government Bill of Lading. These addresses are only maintained against Aerial Ports of Embarkation, Water Ports of Embarkation, DoDAACs designated as CONUS Breakbulk Points, Water Ports of Debarkation Codes YC3 and YC6 (Alaska) and Destination Activity Address Codes.

(b) The Destination AAC is developed by DGSC for a group of AACs which are located at the same destination and through coordination with the receiving Transportation Officer it has been agreed that compatible commodity shipments for these activities may be shipped on the same Government Bill of Lading. The Destination AAC record contains the word 'MASTER' in the Destination Cross-Reference field. The Destination AAC value will be file maintained in the Address File as the Destination Cross-Reference for all other AACs in the homogenous group.

(c) In addition, TAC G need not be file maintained if TAC 2 or TAC 1 in order of availability will suffice as the GBL Bill To/Ship To address. Also, TAC A, B, or C need not be maintained if TACs G, 2, or 1 will suffice as the GBL Destination Address. Appendix D-153, DLAM 4140.2, Volume III, provides the decisions required in selecting the GBL addresses. These decisions and logic eliminate the need to maintain TACs G, A, B, and C on most MAPACs, FEDSTRIPs, POEs, and minor installations.

(d) TAC 8 provides control elements and the project name for project codes.

1. The initial input of the TA_ card does not provide a reference to project codes. These codes are reflected in Materiel Release Orders. Special instructions provide information concerning requirements to hold or place project controls in the computer file. MROs containing Project Codes will be processed strictly in accordance with the assigned Priority Designator as prescribed in the Uniform Materiel Movement and Issue Priority System and inferred/requested preferential treatment to the contrary will be disregarded.

2. When a requirement exists to activate project information controls, processes described in paragraph 302401 and herein are followed. Code titles and/or instructions to be provided on DD Forms 1348-1 during shipment processes will be added to the Activity Address File by processing a general purpose card DIC TA_, Shipping Address Directory input, as prescribed in appendix B-129.

h. The following data elements are also maintained in the On-Line Activity Address File.

(1) Each Activity Address Code may contain the following data elements:

DATA ELEMENTS	CHARACTERISTICS
Breakbulk Point Code	6 alpha/numeric
Destination Cross Reference	6 alpha/numeric
Zip Code/APO/FPO	5 numeric
Parcel Post Zone Code	1 numeric
Mode Restriction Code	1 alpha/numeric
Small Parcel/Carrier Code	1 alpha/numeric

(2) AACs including DoDAACs, MAPACs, Projects, and Breakbulk Points which are physically located outside of CONUS and Canada (parcel post zone code 9) may have the following data elements (see Note):

DATA ELEMENTS	CHARACTERISTICS
Aerial Port of Embarkation	3 alpha/numeric
Aerial Port of Debarkation	3 alpha/numeric
Water Port of Embarkation	3 alpha/numeric
Water Port of Debarkation	3 alpha/numeric
Government Bill of Lading Office Code	4 alpha
SEAVAN Eligible Code	1 numeric
DICOMSS Bank Code	1 alpha
Consolidated Pack Indicator	1 numeric
SEAVAN Load Plan Data	
Booking Group	2 alpha/numeric

DATA ELEMENTS	CHARACTERISTICS
Stop Number	2 numeric
Transit Time	2 numeric

NOTE: These data elements will not be maintained against an AAC that has a Destination Cross-Reference value other than 'MASTER' or blank.

(3) AACs including DoDAACs, MAPACs, Projects, Breakbulk Points, and POEs which are physically located within CONUS and Canada may have the following data elements (see Note):

DATA ELEMENTS	CHARACTERISTICS
Geographic Area Code	1 alpha
Geographic Sub-Area Code	3 alpha/numeric
Motor Standard Point Location Code	6 numeric
Small Parcel Carrier Codes	1 alpha/numeric
Government Bill of Lading	4 alpha
State Code	2 numeric
CONUS Military Air Terminal	3 alpha/numeric
Consolidated Pack Indicator	1 numeric

NOTE: These data elements will not be maintained if the AAC has a Destination Cross-Reference value other than 'MASTER' or blank.

(4) AACs which are MAPACs may have a Special Instruction Indicator, 1A, and a Freight Forwarder Location Code for each TAC.

i. Address inquiries for detailed information of address data on file may be processed to inquire for in-the-clear information.

Requests for individual address information may be satisfied by processing an Activity Address Inquiry.

(1) If the address is available on file, the information is matched by coded address followed by printout on the Activity Address Listing or display on a CRT.

(2) If the address is not available on file, manual research must be performed by review of the DoD Activity Address Directory, messages, or contact with the applicable stock accounting activity.

j. Reference material for file maintenance actions for the Activity Address is provided:

REFERENCES	CODES
Appendix A-11	Project Codes
Appendix A-43	Type Address Code
Appendix A-82	Violation Reason Codes

SECTION IV - COMPUTER TABLES AND CONTROLS

302401 - ESTABLISHING MAINTAINING TABLE AND CONTROL DATA

a. Initial and file maintenance actions to establish tables and constants control for other functional processing actions (e.g., shipping, adjustment, location) are provided by CRT teleprocessing inputs.

b. General processing controls for tables and constants are provided through CRT teleprocessing inputs. Action and Table Control Codes provide the means for establishing, changing, or deleting various tables.

(1) Table and Control CRT inputs, processed to the computer records, provide the following controls or tables:

TABLE 01

RIC "From" Table
DIC to FRC Table

TABLE 02

Special Project Table

TABLE 03

Inventory Control Table:

(a) Assignment control of document numbers for Materiel Adjustment Cards.

(b) Document release controls for item changes.

TABLE 04

(a) Stock Location Group Table.

(b) Table of Controls, Constants and Options.

1. Establishment of Depot AAC.

2. Establishment of Depot RIC.

3. Establishment of Maximum Weight/Cube Controls.

4. Establishment of Pick/Pack/Assembly Time Estimates for MROs.

5. Establishment of Property Disposal Office AAC.

6. Establishment of depots' sequence option for MRO processes.

7. Resetting Shipment Unit Control Number.

8. Mechanized Area Workload Batch Options.

9. Shipment Unit and Transportation Unit Assembly Area Table.

10. SPW Option.

11. ZBM-ZBP Option.

TABLE 19

F-61 Report Options and Mode Grouping (Part 1)

(a) Report Options

(b) Mode Group Assignments

(c) Mode Group Nomenclature Relationship

GEO - Area Standard Times (Part 2)

(1) Subparagraph b(1) above identifies the tables established by the Table and Control CRT inputs.

(a) Table 01:

1. Routing Identifier "From" Table is established by appendix B-66, part A, and maintained by Action Codes EA to delete and EB to add the computer references to RICs acceptable for depot processing.

2. DIC to Functional Routing Code Cross-Reference Table is established by appendix B-66, part A, and maintained by Action Codes EA to delete and EB to add the computer references to Functional Routing Codes to be applied to specific Document Identifier documents if FRC is missing.

(b) Table 02, Special Project Table, is established by appendix B-66, part B, and maintained by Action Codes EA to delete and EB to add the computer references to project codes in the Special Project Table. The file is maintained to provide the capability of identifying output DD Form 1348-1 and SPW DLA Form 674 with special addresses, Registered Parcel Post, or NO-GO Parcel Post indicators, and the requirement for special listings. This table also identifies those project codes eligible for SEAVAN shipment. Table limit is 714 entries.

(c) Table 03, Inventory Control Table, is established by appendix B-66, part C, and maintained by Action Codes EA to delete and EB to add the computer references for assignment of a mechanically generated Materiel Adjustment Card. Table limit is 40 entries. It also establishes the number of days prior to effective date of catalog changes for preparation of appendices C-104 and F-82.

(d) Table 04, Table of Controls, Constants and Options is established by appendix B-66, part D, and maintained by Action Code 01 to provide the following:

1. Depot Activity Address Code.
2. PDO Activity Address Code.
3. Depot RIC (To) Identification.
4. Shipment Unit Control Number.
5. Maximum Weight and Cube Factors.
6. HI-PRI Pick, Pack and Assembly Increments.
7. SPW Option.
8. Warehouse Selection Option.
9. ZBM-ZBP Option.
10. ZEN Option.
11. DICOMSS Compatibility Code Option.
12. Special Requirements Code Option.
13. DICOMSS Cycle Code Extent Option.
14. Mechanized Warehouse Automatic Clear Option.
15. Other Warehcuse Automatic Clear Option.
16. Print Suppression Flag.
17. Return Address Option.
18. Extended MRO Bank Option.
19. Inventory Consolidation Option.
20. MOFAST Exclusion Options.

best copy available

21. LOGAIR and QUICKTRANS Terminals and MAPAD Freight Forwarder.

22. MRO Processing Volume.

23. Planned Chute Capacity.

24. Maximum Chute Capacity.

Action Code 02 provides the following:

1. Mechanized Area Workload Batch Options.

2. SU and TU Assembly Areas.

3. Minimum Weight and Cube for Receipts Forecast.

4. Maximum Weight and Cube for MMHS.

(e) Table 04, Stock Location Group Table, is established by appendix B-66, part D, and maintained by Action Codes EA to delete and EB to add or change location grouping controls (e.g., group by first, first and second, or first, second, and third position of location codes into a single alpha Stock Location Group Code, or Warehouse Area). Table limit is 157 entries.

(f) Table 06, Area Shipping Cycle Table, is established by appendix B-66, part F. This table controls computer recognition of calendar and day of week for workdays throughout the year. It also provides for the establishment of the depot option for selecting the number of working days the DRD precedes the PDT. The difference between the days cannot exceed 05.

(g) Table 07, Tariff Number Cross-Reference Table and Depot Identification Table, is established by appendix B-66, part G. Action Codes EA to delete and EB to add are used to maintain the Tariff Number Cross-Reference Table. Action Code EE establishes a Depot Identification Code for use when processing transactions associated with updating the Freight Description File.

(h) Table 08, Transportation Appropriation Code Table, is established by appendix B-66, part H, and maintained by Action Codes EA to delete, EB to add or EC to change. This table will reflect the appropriation numbers and dollars assigned to defense depots for movement of materiel. Table limit is 55 entries.

(i) Table 09, Data Bank FSC Table, is established by appendix B-66, part I, and maintained by Action Codes EA to delete or EB to add the computer references to FSCs and the prime depots responsible for furnishing item data to the Central Data Bank. Table limit is 383 entries.

(j) Table 10, Count Card Matrix Table, is established by appendix B-66, part J, and maintained by Action Codes EA to delete and EB to add. This table establishes the following:

1. A Matrix Table for batching and sequencing of count cards.

2. Manhour Standards for inventory type storage codes.

3. Inventory Acceptance Options from $.00 to $500.00 for all DLA managers, any three non-DLA managers, and all other managers.

(k) Table 11, MOFAST Table and Control, is established by appendix B-66, part K, and maintained by Action Codes EA to delete and EB to add. This table contains three parts:

1. Part 1 - Transit Time Table. This table supports the MOFAST System in-process file build and subsequent GBL preparation process. The table identifies the number of days required to ship materiel via surface modes from a storage depot to a destination area identified by Standard Point Location Code (SPLC) or portion thereof. Table limit is 100 entries.

2. Part 2 - Air Shipment Exemption Table. This table identifies SPLCs which represent destination areas that are exempt from air shipment. Shipments to these areas will, during the MOFAST process, be assigned Process Code SA and subsequently be assigned to a GBL. Table limit is 100 entries.

3. Part 3 - Table of Frozen Port Consignees. This table identifies consignees which have restricted water shipping because of ice bound port facilities. Shipments to these consignees will receive Process Code AC. The shipment unit will not be assigned to a GBL unless special entries are processed to change the planned method of shipment. Table limit is 100 entries.

(l) Table 12, MOFAST Table and Control, is established by appendix B-66, part L, and maintained by Action Codes EA to delete and EB to add. This table contains two parts:

1. Part 1 - MOFAST Volume Destination Table. This table identifies shipment units which will be forwarded to volume shipping areas. Shipment Unit Records having DCRs which match this table will be flagged as a potential volume shipment. Table limit is 100 entries.

2. Part 2 - Mechanized Center Workload Parameters. This table identifies location group criteria used in formatting the F-177, MOFAST Mechanized Center Released Workload Schedule. Parameters will be used to establish report header categories and accumulate workload data to be presented in the report. Table limit is eight parameters for each depot mechanized center.

(m) Table 13, One Freight/All Freight Controls and Options, is established by appendix B-66, part M, and maintained by:

1. Action Codes 23 to add and 24 to delete controls to exempt MROs based on sequence code and IPG. Table limit is 24 entries.

2. Action Codes 25 to add and 26 to delete controls to exempt MROs based on geographic area. Table limit is 26 entries.

3. Action Code 27 to add/change minimum weight for eligible shipments. Table limit is not applicable.

4. Action Codes 28 to add and 29 to delete exception minimum weights for high volume DCRs or consignees when the consignee is equal to the DCR. Table limit is 25 entries.

(n) Table 14, Shipment Planning Table, is established by appendix B-66, part N, and maintained by Action Codes EA to delete and EB to add. This table establishes eligibility parameters for MROs to be automatically assigned to the SEAVAN Shipment Planning Process by:

1. Commodity Manager

2. Location Group

3. Service Code by IPG

4. Minimum Weight

5. Minimum Cube

(o) Table 15, POD Hazardous POE Cross-Reference Table, is established by appendix B-66, part O, and maintained by Action Codes EA to delete and EB to add. This table is used to identify specific POD-POE relationships for overseas shipments of hazardous materiel.

(p) Table 16, Mass Cancellation Alert Parameters, is established by appendix B-66, part P, and maintained by Action Codes EA to delete and EB to add. This table identifies MROs which are candidates for mass cancellation.

(q) Table 17, Small Parcel Carrier Table, is established by appendix B-66, part Q, and maintained by Action Codes EA to delete and EB to add. Part 1 of this table is used to identify the weight and mode of shipment (appendix A-17) which is to be assigned to a particular carrier. Part 2 identifies the preferred carrier for small parcel shipments by IPG.

(r) Table 19, Depot MRO Processing Time Analysis, is established by appendix B-66, part S, and maintained by Action Code C for a change. Part 1 of this table identifies F-61 Report Options (parts 1-3 mandatory), Mode Group and Mode of Shipment Code assignments, and Mode Group and Nomenclature assignments. Part 2 identifies bank, storage, transportation, and intransit standards by Geographical Area.

(2) Reference materiel concerning Controls and Constants Tables and Options are:

CHAPTER 3

RECEIPT TRANSACTIONS

SECTION I - GENERAL

303101 - PURPOSE

This chapter prescribes the standard procedures and responsibilities for processing receipt transactions except those indicated in paragraph 303103.

303102 - SCOPE

a. These procedures are applicable to HQ DLA, DSCs, and defense depots storing DLA materiel and encompass all receipt actions from the time for receipt of advance receiving documentation, to the actual tally-in, classification, storing and reporting confirmation of materiel received.

b. The preparation and distribution of required discrepancy reports and receiving documents, are also included in this chapter.

303103 - EXCLUSIONS

a. Procedures for recoupment of materiel from the Property Disposal Officer are contained in chapter 12.

b. Special returns programs approved by HQ DLA which are of limited application or duration.

c. Receipt of assets governed by special instructions in chapter 13, Government Furnished Materiel when such instructions deviate from those contained herein.

d. Receipt of Military Service-owned assets for storage by DLA as commingled stocks will be governed by special instructions in chapter 14. Receipt of these assets will be identified by Ownership Code 1, 4, 5 or 6 in column 70 of the Prepositioned Materiel Receipt Card.

303104 - RESPONSIBILITIES

Receipt processing requires active participation by transportation personnel, document control clerks, materiel handling personnel, inspectors, property checkers, stock locator clerks, warehousemen, procurement officers, contract administrative officers and commodity item managers. This chapter outlines the necessary functions and required actions of receiving activities.

a. The Directorate of Storage and Transportation is responsible for:

(1) Establishing and maintaining the manual file of receiving documents as outlined herein.

(2) The manual actions required in the processing of receipts as described in this chapter.

b. The Office of Data Systems is responsible for:

(1) The establishment and maintenance of Mechanical Files and Records which are described in this chapter and/or pertinent appendices.

(2) The mechanical processing of transactions related to the receipt of materiel which are prescribed in this chapter and/or pertinent appendices.

SECTION II - RECEIPT PROCESSING STANDARDS AND DOCUMENTATION

303201 - PROCESSING STANDARDS

The following standards are established for defense depots to accomplish tally-in, inspection, classification, physical location (permanent location for issuable materiel and temporary location for nonissuable materiel; e.g., Condition K or L), mechanical update of receipt and storage records, preparation and distribution of receiving documents, discrepancy reports, correction of input documentation (violations), and MRCs for all receipts. MRCs are to be reported and transmitted to the accountable DSC on a daily basis for those receipts which have been processed as prescribed above.

a. A total processing time of eight calendar days is established as the standard for processing receipts from central procurement and redistribution, DLA, other DoD Agencies, or Non-DoD Federal agencies.

(1) Defense depot - seven calendar days.

(2) DSC - One workday.

b. A total processing time of eleven calendar days is established as the standard for processing receipts from other than procurement and redistribution instrument source.

(1) Defense depot - ten calendar days.

(2) DSC - One workday.

c. Time of receipt for the purpose of applying these standards is defined as:

(1) Receipts from procurement and redistribution:

(a) Via Rail. Receipt processing time will commence on the date the carrier releases the railcar to the defense depot. This date will constitute the date of receipt to be entered on DD Form 250 or other available receiving documentation and the MRC. Since the eligibility timeframe to receive discounts offered by the contractor commences at this point in time for rail shipments, it is imperative that prompt spotting and unloading of railcars containing receipts of this nature are accomplished.

(b) Via Other Modes of Transportation Including Parcel Post. Receipt processing time will commence at the time materiel is made available for unloading at the defense depot unloading dock. Documentation accompanying materiel will be annotated by the in-checker upon tally-in to denote the date of receipt. This date will be entered in the MRC.

(2) Receipts from Other Sources:

(a) Receipt processing time will commence at the time materiel is made available for unloading at the defense depot unloading dock. In the case of railcars, spotting will normally be made in sufficient time to permit unloading and release of the railcar within the "free time" allowed by the carrier to keep demurrage at the minimum.

(b) In those instances where a consolidated shipment of large number of items is received and where circumstances preclude tally-in, inspection, classification, and physical location within the ten calendar day standard, these receipts will be unloaded, quantity verified by blind check, and reported to the appropriate DSC, not later than the ten calendar days after date of receipt, in Condition Code K. (SF 364 will not be prepared.) A maximum period of 10 workdays is established, from the date reported in Condition K, to reclassify and report the adjusted receipt transactions on these receipts.

NOTE: Materiel released from the Receiving Division as Condition Code A <u>will not</u> subsequently be reported to the DSC in Condition Code K in order to satisfy receipts processing timeframes.

d. When for any reason, receiving documents required for making payment cannot be processed within the seven calendar day standard, or insufficient time to qualify for the prompt payment discount, the designated paying office will be notified by teletype as to the date when receiving documents will be provided. When a DCASR is the paying office, the appropriate DSC will be listed as an information recipient of the teletype.

e. Defense depots processing time will be computed by counting the number of days between the date of receipt, input to the mechanical files via remote device (Type A Inquiry), or punch card (DIC ZB6), and the date the Materiel Receipt Confirmation document (DIC D4_ or D6_) is transmitted to the accountable DSC. Date of receipt will be subtracted from date MRC is forwarded to ICP.

f. Defense depots processing time will be computed, recorded, and reported mechanically IAW appendix D-58, producing automatically a daily Receipts Performance Report, appendix F-65.

g. Receipt transactions which have been in work process beyond established time standards will be mechanically identified from the Suspended Receipt File. The Late Receipt Report (appendix F-71) will be produced daily IAW appendix D-54 and will include these late transactions as well as those which will be identified as late, the following day if not properly cleared prior to the next report.

h. Defense depots will establish internal controls, which will ensure that the maximum time standard is not exceeded. Processing time beyond these standards is considered unsatisfactory, unless there are extenuating circumstances which have been reviewed and substantiated by the defense depot Commander.

i. All materiel received, whether from procurement or from other sources, will be stored in permanent or temporary locations and documents processed to the stock locator system prior to or simultaneously with notification of the receipt to a DSC. Additionally, warehouse denials will not be reported, regardless of priority until receipts in-process have been screened to determine if materiel is in temporary location or in transit to permanent locations.

j. Processing standards outlined in paragraph 303201a are established for distribution activities to accomplish tally-in, inspection, classification, storing in permanent or temporary location and processing of documents to the stock locator system prior to or simultaneously with preparation and distribution of receiving documents, discrepancy reports and MRCs for all receipts. These time standards also apply to the mailing of DD Form 250 to the paying office. When acceptance is at destination and a discount is involved, every effort should be made to process DD Form 250 for mailing to the paying office within two days from date of materiel receipt.

303202 - ADVANCE DOCUMENTATION

a. The defense depot scheduled to receive materiel will receive advance documentation in the form of:

(1) Prepositioned Materiel Receipt Cards.

(2) Contract Data Cards for Procurement Instruments from all commodity managers, excluding manager codes S and T.

(3) Procurement Instruments and Modification or Changes such as listed below. This excludes copies of Blanket Purchase Agreement (BPA) calls made under the program for automated procurements under $250.00 in value (documents on these actions will be included with materiel from vendors).

(a) SF 26, Award (Supply Contract).

(b) SF 33, Invitation, Bid and Award.

(c) DD Form 1155, Order for Supplies or Services.

(4) Copies of Inspection and/or Receiving Reports such as:

(a) DD Form 250, Materiel Inspection and Receiving Report (the retention of this document in the Active Award Document File is a depot option based upon experience on its usefulness).

(b) DD Form 1155, Order for Supplies or Services.

(c) Other DoD authorized receiving reports.

(5) Acceptance Alert Cards, DIC PK5.

b. Prepositioned Materiel Receipt Cards (PMRC) will be used for mechanical receipt processing and for storage planning purposes.

c. Contract Data Cards will be received with Procurement PMRCs and will establish a contract data file for mechanical assistance as:

(1) A source of inspection data required to accept procurement type receipts.

(2) A computer controlled record for mechanical maintenance of procurement instrument activity, thereby eliminating the manual posting of contract or procurement instruments.

(3) A mechanically maintained receipt history for inquiry, research, management or audit purposes relative to procurement items.

(4) A source of data permitting automatic generation of acceptance reports as outlined in paragraph 303308.

d. Advance copies of procurement instruments, inspection and receiving reports received by mail will continue to be placed in the Active Award Document File and/or the Advance Receiving Document File (from Other than Procurement Sources) and will be used when Automated Contract Data is not available or is insufficient:

(1) As a replacement for any receiving documents missing from the shipment.

(2) As a basis for preparation of additional copies as needed.

(3) To tally-in shipments when documentation is not received with the shipment.

e. Acceptance Alert data will be mechanically maintained to permit automatic preparation of the appropriate Acceptance Report. Manual Acceptance Report preparation is outlined IAW appendix E-094 P.

f. Defense depots will ensure that advance documentation is promptly filed in the proper manual receipt files.

303203 - DOCUMENT NUMBERS

a. When PMRCs are not on hand, defense depots will determine the document numbers to be used on receiving documents and materiel receipt cards in accordance with the following:

(1) For receipts of materiel from contractor, the contract number or procurement instrument number, constructed in accordance with appendix C-2 extracted from the materiel receiving documents DD Form 250, DD Form 1155, etc., will be used as the document number for reporting of receipts and control of documents.

(2) For those receipts of materiel from other than procurement source, valid document numbers, constructed in accordance with appendix C-2, extracted from the materiel receiving documents DD Forms 1348-1 will be used as the document numbers for reporting of receipts and control of documents.

(3) For those receipts of materiel which do not bear document numbers, or document number is not legible, defense depots will assign 14 digit number in accordance with appendix C-2. The DIC D6A and Management Code P, pos. 72, will be used when document numbers are assigned by the distribution activity (restricted to other than vendor receipts).

b. Defense depots will ensure that all receiving documents are recorded upon receipt and are maintained under control until processing is completed and distribution accomplished.

303204 - RECEIPT FILES

Receipt Files established and maintained by defense depots are of two categories: mechanical files, or computer records, established and maintained by card or remote input device for receipt processing and reporting; and manual files, consisting of hard copy documents required for receipt processing and research actions incident to receipts processing.

a. Mechanical Files:

(1) Prepositioned Materiel Receipt (PMR) Data:

(a) Prepositioned Materiel Receipt Cards (PMRCs) are received from the DSC in the format of appendices B-18, B-19, and B-35, via transceiver communication, or other appropriate means for those DSCs with collocated storage facilities, and are processed in accordance with appendix D-45 to establish the PMR File. Any Management Code, appendix A-13, authorized for a receipt transaction may be used.

(b) When corrections are necessary to PMR Data, DS/T will prepare a deletion PMRC with an X overpunch in pos. 25 to delete the incorrect record and then prepare a new PMRC with the corrected data to establish the new record. These locally generated PMRCs will be processed simultaneously with the new and/or corrected PMRCs received from the DSC IAW appendix D-45.

(c) On the second Saturday of each month, defense depots will mechanically screen the PMR File IAW appendix D-52, and any record, reflecting an EDD which has been passed by 60 days or more and does not reflect a receipt in-process indicator, will be deleted. For example: on the second Saturday of October 1978, all dues-in with EDDs of 807 or earlier and no receipt in-process flag, will be deleted.

(d) Simultaneously, any new PMRCs containing revised EDDs received from DSCs will be processed IAW appendix D-45, for those line items which are still due-in, though overdue by 60 days or more.

(e) If information is required on a PMRC, a Prepositioned Materiel Receipt File Inquiry Card, DIC ZBO (appendix B-61), or a Type P Remote Inquiry (appendix B-147) must be input to the computer. Response to the ZBO input will be a PMRC data printout (appendix F-1). An abbreviated response will be printed at the remote terminal from which the Type P Inquiry originated.

(2) Completed Receipts File:

(a) The Completed Receipts File is constructed mechanically in conjunction with preparation of Materiel Receipt Cards in the format of appendix B-20 and B-21, IAW appendix D-69 or D-70.

(b) If DS/T desires to obtain information from the Completed Receipt File (CRF), then CRF Inquiry Card, DIC ZB1, in the format of appendix B-61 must be prepared for processing IAW appendix D-47. The resultant output will be a Completed Receipt File Printout, appendix F-29. A Completed Receipt Inquiry, Type E, may also be prepared IAW appendix B-69 and input through a remote terminal for immediate response via CRT display. Hard copy can be printed at those terminals equipped for this purpose. Receipt history records will be retained for 90 days with Automated Contract Data or 90 days beyond MRC date for other types of receipt actions, i.e., returns, redistribution or nonautomated procurement receipts.

(3) Suspended Receipt Data:

(a) A Suspended Receipt record is initially established upon processing of a Type A or ZB6 Receipt Inquiry (Appendix B-41 or B-102) IAW appendix D-24.

(b) With two exceptions, records are maintained until a Receipt Confirmation Card (appendix B-108 or B-109) and a corresponding Receipt Stow Notice (appendix B-46 or B-144) have been processed and matched to the record. For receipts being forwarded to PDO or destroyed (Condition Code H, Management Code J or M) and lost receipts (Management Code L) input of a Receipt Confirmation Card alone will clear the Suspended Receipt record.

(c) Upon matching necessary inputs to the Suspense record:

1. An MRC, DIC D4, or D6 (appendix B-20 or B-21), will be transceived to the appropriate DSC.

2. The corresponding PMRC record will be updated or deleted.

3. A record will be passed to the Inventory process if the item is under inventory.

4. Data will be passed to the Classification Suspense file if the item is confirmed in Condition Code D, E, F, G, J, K or L.

5. A Locator Subrecord Add, DIC 9BA (internal), will be passed to the Locator process if the Receipt Stow Notice reflected a new location add.

6. The Completed Receipt Data will be updated.

(d) A Suspended Receipt record can be deleted by entering the inputs defined in appendix B-43 or B-97.

(e) Data elements in a Suspended Receipt Data record can be changed by entering the input defined appendix B-145.

(f) Suspended Receipt Data can be inquired by entering the inputs defined in appendix B-44, B-45 or B-146.

(4) Contract Data:

(a) Procurement Contract Data Cards, DIC pos. (1-4), are received from the DSC in the formats described in appendix B-31 via transceiver communications together with their matching PMRC (DIC DU-) data. The Contract Data Cards will establish a mechanical file similar in function to the manual Active Award Document File to eliminate the manual maintenance activity associated with these documents.

(b) Contract Data will be mechanically maintained to record receipt activity associated with a Procurement Item Instrument Number (PIIN) and to furnish necessary information required by a depot for use in procurement receipt inspection or classification for commodity managers C, E, G, I, T and M. The Exception to this will be Subsistence (item manager S) contracts or procurement instruments. These documents will not be mechanically maintained or included in the provisions of Automated Contract Data at this time.

(c) Deletions or modifications to contract data will be prepared by the DSC or depot as necessary under the provision outlined in appendix B-31, utilizing the various action code options. Deletions affecting Contract Data will be prepared and output as a daily report, appendix F-203 part 2, for review and receipt management action outlined in the Completed Award Document Files, paragraph b(3) below.

(d) Completed procurement instruments/contracts will be retained mechanically until a monthly purge removes them from active status. Contracts completed will be displayed in the Contract Audit Report, appendix F-203, part 1.

(e) Open or active PIINs will be retained on the mechanical file until the quantity (per line) is completed, canceled, deleted or the PMRR expires and is not reinstated. A procurement instrument will be considered complete when all line quantities on the contract are complete, either by receipt action or deletion via appendix B-31. Contract Line Item quantities received in non-issuable condition will hold the contract or PIIN in active or open status until reclassification of the suspended quantity. Manual deletion action will be required to remove these records from active to history status.

(f) Automated contract data may be inquired by remote keyboard during its active status via:

1. Type A Inquiry, appendix B-41 or B-102.

2. Contract Data Inquiry, appendix B-68.

(g) Selected updates or changes involving PIIN, CLIN, NSN, Condition, SPIIN, and quantity processed to the Completed Receipt File will also update and correct the appropriate procurement instrument record in Contract Data. The format to accomplished this is outlined in appendix B-106.

(h) All MRC activity, DIC D4_, will be available in the automated contract file by procurement instrument number even if the MRC was released from the suspended receipt file, confirmed, and stored prior to receipt of the Contract Data.

(i) Evidence indicating Acceptance Report (A/R) activity will also be maintained as a portion of the Contract Data activity. A/R information will be visible via the appendix F-204 report, IAW appendix E-061.

(5) The Acceptance Alert/Acceptance Report Data:

(a) Acceptance Alert (A/A) cards, DIC PK5, appendix B-133, will be received from the Contract Administration Offices and mechanically recorded. A/A data may be inquired in conjunction with DIC ZBO PMR Inquiry activity IAW appendix E-061.

(b) Procurement receipts as completed will be matched to the Acceptance Alerts to generate an automatic Acceptance Report when a matching Acceptance Alert is available.

(c) Acceptance followup will be received and mechanically processed to Completed Receipts Data. If a matching receipt action is found, the appropriate A/R will be prepared automatically.

(d) Records of A/R activity will be mechanically retained and associated with the matching contract data for review via Contract Data Inquiry previously outlined.

(e) Exceptions to the above automatic acceptance reporting are outined in appendix E-094, a procedure describing manual actions necessary to prepare Acceptance Reports.

b. Manual Files:

(1) The Pending Classification Suspense File.

(a) The Pending Classification Suspense File consists of a partially punched Materiel Adjustment Card, in the format of appendix B-22, DIC ZAC, less quantity and condition To fields. This document is prepared mechanically at the time of processing a materiel receipt which reported receipt of materiel in Condition D, E, F, G, J, K or L.

(b) The partially punched Materiel Adjustment Card, appendix B-22, DIC ZAC, will be manually filed in NSN sequence, for use as the reinput document to adjust materiel to the proper condition on completion of processing the related SF 364, Report of Item Discrepancy, and subsequent materiel reclassification.

(c) Using PIIN and CLIN data, inquire the Contract File IAW appendix B-68 to determine if quantity reclassified to issuable status will complete balance of contract due-in. If quantity reclassified satisfies due-in quantity, release that line IAW appendix B-31, Action Code 4. This action will allow the contract to be transferred to history providing all other line quantities and requirements are satisfied, reference appendix F-203.

(2) The Active Award Document Files:

(a) The use of this manual file for receipt processing functions will be limited to those receipts which have incomplete or no Automated Contract Data, i.e., Clothing and Textile and Subsistence receipts.

(b) The Active Award Document Files consist of copies of the Contracts, Purchase Orders, Delivery Orders, Purchase Instrument Changes, Modifications, and/or Amendments furnished to the defense depot by the procuring DSC/DCAS for use in receipt inspection or classification.

(c) The Active Award Documents are filed in document number sequence and include advance copies of the receiving reports (DD Forms 250, 1155, etc.) received at the defense depots prior to receipt of the Award Document.

(d) The Active Award Document Files may also contain copies of discrepancy reports, i.e., DD Form 6, SFs 361, 363, and 364, pending resolution by the reviewing authority, DSC or DCAS.

(e) It is the defense depots responsibility to keep DSCs informed of the organization and office symbol to which contractual documents should be mailed.

(3) The Completed Award Document Files:

(a) Monthly, active contract data will be purged of those PIINs in a complete status - all lines received or canceled. Completed contract information will be output on appendix F-203 part I, Contract Audit Report. Receipt history will continue to maintain MRC data reflecting all receipts for a period of 90 days. This report will be the source for transferring the Active Award Documents to Completed status.

(b) The Completed Award Document Files will, therefore, consist of the Contract Audit Report, F-203 part 1, and copies of completed (to include canceled) Contracts, Purchase Orders, Delivery Order, Purchase Instrument changes, modifications, and/or amendments, related resolved discrepancy reports, (i.e., DD Form 6, SFs 361, 363, and 364), related completed receiving documentation (i.e., DD Forms 250, 1155, etc.), and related correspondence.

(c) The Completed Award Document Files will be destroyed three months after receipt of final shipments, except as noted in subparagraph (d) below, and any inquiries received thereafter will be referred to the DSC. The Contract Audit Report will reflect this future (purge) date to assist in final contract disposition.

(d) DD Forms 250/1155 which serve as proof of acceptance and support an acceptance report (DIC PKN/PKP) will be maintained separately and filed by date of acceptance. The files will be cutoff annually, held for one year, and then retired to the Records Center where they will be retained for a period of six years and three months after the cutoff date.

(4) The Advance Receiving Document Files (from Other Than Procurement Sources).

(a) The Advance Receiving Document Files (from Other Than Procurement Sources) consist of copies of DD Form 1348-1, DoD Single Line Item Release/Receipt Document, furnished by consignors of materiel (i.e., customers for excess return, and other defense depots for redistributions), and information copies of Manual Requisitions, DD Form 1348-1, for recoupments from PDO as advance notice of a receipt. (The retention of this advance documentation is a depot option based upon experience on its usefulness.)

(b) The Advance Receiving Document Files (from Other Than Procurement Sources) may also contain copies of discrepancy reports (i.e., SFs 361, 363, and 364) pending resolution by the reviewing authority or DSC.

(5) The Completed Receiving Document Files (from Other Than Procurement Sources):

(a) The Completed Receiving Document Files (from Other Than Procurement Sources) consist of completed (to include canceled) copies of DD Form 1348-1 used during the receiving process for materiel received from other than procurement sources; related resolved discrepancy reports (i.e., SFs 361, 363, and 364) and related resolved correspondence.

(b) The Completed Receiving Document Files will be destroyed 3 months after receipt of final shipments and any inquiries received thereafter will be referred to the DSC.

(6) GBL File:

(a) The GBL File consists of the advance GBLs received by the Transportation Officer, and includes copies of each related document, such as: the Commercial Bill of Lading, Discrepancy Reports (SFs 361, 363, and 364) and related resolved correspondence. GBLs are filed in GBL number sequence.

(b) The GBL File will be established, maintained, and retired IAW separate transportation manuals, procedures, and/or DLAM 5015.1.

303205 - RECEIPT OF MATERIEL WITHOUT ACCOMPANYING DOCUMENTATION

a. When materiel is received without accompanying documentation, DS/T will develop receiving documents from information available from local sources. Types of records, documentation, and information normally available are:

(1) Prepositioned Materiel Receipt Data.

(2) Advance copies of procurement instruments, receiving reports, contract data sheets and other authorized delivery documents including vendor's invoice and/or packing lists.

(3) Advance copies of DD Form 1348-1, DD Form 1149, DD Form 250, DD Form 1155, and other related documents.

(4) Transportation Records.

(5) Container markings.

(6) Account Number of appropriate DSC (see DoD 4000.25-D - DoDAAD).

b. When the above documentation or information is not available or necessary information cannot be obtained, DS/T will:

(1) For contractor receipts, contact the appropriate DSC, via telephone, for missing documentation or information to permit proper preparation of receiving documents. Receipt documents for vendor receipts must contain applicable contract/delivery order number/line item number. Paying office copies also must reflect the proper paying office. Contract unit prices, extensions, and totals will not be entered.

(2) Contractor receipts, with acceptance and/or inspection at destination indicated on the DD Form 250, 1155, any other inspection, and/or receiving document, or on the prepositioned receipt data and for which a copy of the procurement instrument is not available at the receiving activity, will be processed by utilizing the data obtained in subparagraph (1) above. In the event a copy of the contract cannot be obtained within the allowable depot processing time and sufficient data cannot be obtained by telephone or message to permit a determination to be made of item acceptability, the receipt will be reported in Condition Code L and an SF Form 364 prepared IAW appendix E-159 P.

(3) For receipts other than from contractors, prepare the appropriate receiving inquiry and DD Form 1348-1, to the extent possible, based on information concerning the shipment developed through inspection.

303206 - RECEIPT PROCESSING

Receipt processing is a combination of manual and mechanical actions which encompasses the receiving, tallying-in, inspecting, warehousing, and reporting of materiel received. DS/T and ODS will perform the following actions:

a. Processing of Receipts - Manual Action:

(1) Establish and maintain in a current condition, those manual files listed in paragraph 303204b, above. These files will continue to represent the main source of inspection information for Subsistence and Clothing and Textile items.

(2) Perform the tallying-in action, to include:

(a) Verification that the receiving document is properly addressed to the receiving depot, especially when processing customer returns. When a discrepancy in depot addressee exists, i.e., materiel addressed to another DLA distribution point, the shipment will be refused and the carrier informed of the proper rerouting.

(b) The removing of receiving documents from each shipment, sorting and matching packages and unpackaged units with the appropriate documents.

(c) Obtaining the signature of the carrier or carrier's agent to acknowledge damage to materiel and/or discrepancies in shipment.

(3) Perform the inspection, in checking and classification actions, to include:

(a) Non-Procurement Receipts - Obtaining or preparing receiving reports when shipments are not accompanied by receiving documents or when sufficient copies of receiving documents are not received.

(b) Procurement Receipts - Obtaining receiving document and contracts for commodity managers not provided in the mechanized contract data; or, when the procurement receipt is not accompanied by sufficient information, preparing the necessary inquiry, reference appendix B-68 or B-69.

(c) Classifying receipts of materiel without documentation to Condition K within ten calendar days after receipt.

(d) Ensuring that packages or containers that contain a single line item, properly tagged, marked, or labeled are not opened unless there is evidence of mishandling, damage to the contents, error, or when specific instructions require inspection or reinspection at destination.

(e) Changing receiving documents as necessary to reflect the quantity, identity and condition of each item, as determined by inspection, including preparation of receiving reports required when a document is found to contain items of more than one commodity class or condition. All tags and labels will be completed and/or changed to reflect the true condition code, stock number, and quantity actually received.

(f) Reporting and/or correcting within prescribed limitations, deficiencies in preservation/packaging, packing, and marking of materiel as required after inspection, and in checking has been accomplished.

(g) Textile short pieces in issuable condition will be recorded and reported to DPSC in Condition Code C. Short pieces are defined as: single pieces, full width, less than a full length piece, but not less than 10 yards in the case of frieze and pile fabrics; not less than 18 yards in the case of woolens and worsteds and not less than 20 yards in the case of all other fabrics.

(h) Preparing and distributing discrepancy reports IAW section V.

(i) Ensuring that all misdirected shipments are receipted and reported to the respective item manager for subsequent redistribution or distribution action. These discrepant returns will be processed as outlined in paragraph 303505 and appendix E-150 P.

(4) Initiate receipt reporting by annotating the Receipt Control Document (appendix F-200) with all necessary data required by the receipt confirmation process in accordance with general provisions outlined in appendix E-047 P.

(5) Taking special measures to safeguard materiel in receiving areas where open containers, small packages, and loose items on conveyor lines can encourage theft.

(6) Ensuring that physical count of materiel being moved from receiving areas to final storage agrees exactly with the amount that was tallied in, or reporting immediately any losses.

b. Processing of Receipts - Mechanical Actions:

(1) Receive Prepositioned Materiel Receipt Cards and Contract Data Cards from the DSC in the format of appendix B-18, B-19, B-35 or B-31 via transceiver communications, or other appropriate means for those DSCs with collocated storage facilities. (NOTE: Locally generated PMRCs will be processed simultaneously with the normal PMRCs received for the DSC).

(2) At the time materiel in bulk quantity is received at the unloading dock (receiving area) the DS/T initiates a receipt inquiry through remote equipment in the format of appendix B-41 or B-102 as the input source document. This inquiry is necessary to obtain Item Locator File data, PMR File data, and Contract Data required for the inspection and warehousing of materiel, establishing the Suspended Receipt record, to alert receiving personnel of a receipt item with backorder(s) pending at the DSC, and calling for expedited processing of the receipt. The Type A inquiry routine is further used as the medium for establishing the Date Received, within the Suspended Receipts Records, for control of all new receipts. Appendix E-102 P gives instructions for preparation of appendix B-41 or B-102.

(3) The above inquiries are mechanically processed IAW appendix D-24.

(4) When the remote Type A inquiry is processed IAW appendix B-41, missing, invalid, or incomplete data elements (mandatory or optional) will result in the

inquiry being rejected with an error message printed at the remote station. The error will be corrected and the inquiry immediately reentered IAW appendix E-102. No Suspended Receipt Record will be established for invalid inquiry action.

(5) When the inquiry is processed by card input, appendix B-102, missing or incomplete data elements (mandatory or optional) will be output (rejected) in the format of Violation Printout, appendix F-85, for processing IAW chapter 61 and the appendix E-102.

(6) A Type D remote input prepared IAW appendix B-43 is used to delete a Type A Inquiry if an error is made in posting receipt data to the Suspense File. Appendix B-97, DIC ZZN, provides an alternate card format for processing the reversal/delete action.

(7) Additional locations can be requested from the sublocator record by the input of a Type B Inquiry (remote) prepared IAW appendix E-163 P.

(8) A Type N or Q Inquiry in the format of appendix B-44 or B-45 may be used to obtain information from the Suspended Receipt File. A ZZQ card input in the format of appendix B-146 may also be used to inquire file records or obtain a complete file printout. A ZZR card or Type R (remote) input in the format of appendix B-145 or B-148, respectively, may be used to change data elements in the file.

(9) Contract Data and completed receipts data are immediately available by remote inquiry. Appendix B-68, Type C inquiry will display total contract information for procurement items. Appendix B-69, Type E inquiry will display at the remote terminal, completed receipts history for all receipts for 90 days from the MRC date.

(10) After materiel is tallied-in, inspected, classified, stored, and computer receipt and storage records updated, the receipt is mechanically reported to the DSC on a daily basis. Separate MRCs with appropriate suffix codes will be mechanically prepared by the computer to report quantities received greater than 99,999. This automatic action will be based upon quantity input by receiving personnel on the Receipt Confirmation Cards (reference paragraph 303206 b(11)). Suffix codes entered on split condition receipts will be assigned by Receiving Division.

(11) Input documentation for the reporting of receipts will be in the format of appendix B-108 or B-109. Invalid documents will be output (rejected) in the format of a Violation Printout, appendix F-85, or via remote terminal messages appearing on the CRT. Receipt Confirmations (RCC) are prepared IAW appendix E-108 P. Violations are process IAW appendix E-108 V.

(12) The receipt being confirmed will be matched to the PMR file by NSN, Document Number/PIIN, Supplementary PIIN (when applicable), Contract Line Item Number (CLIN), and DICOMSS Cycle Code (when applicable). In the event the receipt being confirmed matches to multiple PMR records (for the same NSN, Contract Number/PIIN, Supplementary PIIN when applicable, CLIN, and DICOMSS Cycle Code when applicable), but different EDDs, the quantity being confirmed

is subtracted first from the PMR record with the earliest EDD. PMR records which reach zero are flagged for removal from the PMR file. When an RCC is processed with a different CLIN than that accessed the PMR file on the Type A Inquiry, the flag on the original PMR record will be removed and a search will be made for a PMR record with the new CLIN. If found, that PMR record will be updated; if not found, no PMR update will be processed.

(13) Contract data will be updated (concurrent with the PMR records being decremented or flagged for removal) by the Materiel Receipt Confirmation (MRC) for all Procurement Items Managers E, I, G, C, T, and M). All receipt lines, procurement or other than procurement will be recorded in the CRF. All procurement MRCs except those for item manager S will be recorded in Contract Data regardless of the presence of a matching procurement instrument contract award at the time of confirmation. Therefore, items received and confirmed prior to the processing of the Contract Data Card will still be recorded in Contract Data.

(14) On a monthly basis, contract data records will be mechanically audited. Completed or canceled/deleted PIINs will be reviewed and output on a Contract Audit Report (appendix F-203). This report will be used to maintain the Active Award Document File (manual) as previously outlined.

(15) When the materiel being reported is being classified into Condition D, E, F, G, J, K or L, a record will be mechanically established in the Classification Suspense File, IAW appendix D-63. This processing routine will also prepare a partially punched Materiel Adjustment Card, in the format of appendix B-22, with DIC ZAC, less quantity and condition, for use in control and processing of discrepant receipts.

(16) Materiel Receipt Followup Cards, in the format of appendix B-59, received from the DSCs 45 days from the posted shipped date, (for the same NSN, Document Number/PIIN, Supplementary PIIN when applicable, Contract Line Item Number, and DICOMSS Cycle Codes when applicable but with different EDDs) will be processed IAW appendix D-60.

(17) Acceptance Alerts (A/As) prepared by the CAO and forwarded to the depot will be mechanically recorded. When the matching materiel is received, mechanically generate an Acceptance Report (A/R). Output records for a mechanical A/R cannot be prepared on a daily basis as appendix F-204, Acceptance Action/Inquiry Report.

c. Appendix E-47 P provides for receipt processing from the time materiel is unloaded until it is placed in the storage location. Also it outlines the various operational elements that are responsible for the functions as designated.

303207 - RECEIPT FOLLOWUP PROCESSING

a. Followup to distribution activities for MRCs, based on receipt by the DSC of vendor invoices or other evidence of shipment, will be made by the DSC only after search indicates the MRC has not been received. The DSC will mechanically prepare and forward a Materiel Receipt Followup Card, appendix

B-59. The DIC is DXA for Procurement Instrument Sources or DXB for Other Than Procurement Instrument Sources. The minimum timeframe for initiating followup action is established as 45 days from shipment.

b. Distribution activity actions relative to Materiel Receipt Followup Cards received from DSCs are as follows:

(1) When the Materiel Receipt Card, DIC D4_ or D6_ was previously prepared and transmitted, a duplicate MRC will be computer prepared in the format of appendix B-20 or B-21 and forward to the DSC. Multiple D4_ or D6_ replies can occur.

(2) When the materiel is not matched to a Completed Receipts Record and is not a receipt in process, prepare and forward to the DSC a Materiel Receipt Followup Reply, appendix B-59, DIC DXC (if followup is DXA) or, DXD (if followup is DXB).

(3) When the materiel is not matched to a Completed Receipts Record and the receipt is in process, no reply will be made to the DIC DXB followup. The DIC DXA (procurement) followup will, when matched to an inprocess or suspended receipt, cause a reply via DIC DXC to be prepared and returned to the DSC. The reply will reflect a 997 entry in pos. 73-75, Estimated Date of Delivery, as notification to the DSC that the receipt has arrived at the depot.

(4) When there is no record of due-in, prepare and forward to the DSC a Materiel Receipt Followup Reply, appendix B-59, DIC DXC or DXD with 998 in the date field, pos. 73-75.

(5) Replies will be transmitted to DSCs within four workdays.

303208 - PROCESSING RECEIPT REVERSALS

The reversal of a materiel receipt posted to the DSC records can be initiated only by the DSC. The requirement for a reversal action can develop as a result of the distribution activity discovering that an erroneous receipt action was forwarded to the DSC or by DSC review of transaction activity which reveals a reporting or processing error. On errors discovered by the distribution activity, the erroneous action and the correction required are reported to the DSC and the reversal action is fully coordinated with the activity involved if there appears to be any possibility that it will affect the records of the activity.

SECTION III - RECEIVING SHIPMENTS FROM VENDORS

303301 - GENERAL INSTRUCTIONS

a. Prompt processing of vendor shipments is of prime importance in maintaining satisfactory relations with vendors and providing desired supply support. In this regard, it is imperative that all receiving reports be accomplished within the processing standards (timeframes) outlined in section II of this chapter and as follows:

Special attention will be given by defense depots to incoming shipments involving prompt payment discounts. This special attention is required to ensure that the necessary receiving documents are furnished by the paying Accounting and Finance Activity to obtain the authorized discount terms. Documentation applicable to prompt payment discount will normally be stamped "DISCOUNT EXPEDITE;" however, certain vendor shipping documents may specify a favorable discount which has not been stated in the applicable contract or purchase order. Such indicated discounts will be assumed to be valid, conspicuously stamped "DISCOUNT EXPEDITE" and processed accordingly.

b. In no case will "destination acceptance" materiel be issued without prior accomplishment of receiving documents, required to support payment to the vendor.

c. The proper accomplishment of inspection and acceptance certificates is determined by the indicated point of inspection and acceptance. Receiving personnel will carefully note the point of inspection specified in the PMRC or procurement certificates. Contracts covering shipment to defense depots prescribe inspection and acceptance by one of the following methods:

(1) Inspection and acceptance at destination.

(2) Inspection and acceptance at origin.

(3) Inspection at origin and acceptance at destination.

d. During "tally-in" and inspection operations at defense depots, inchecker and inspection personnel will ensure that the quantity and UI are those reflected in contractual/catalog records, as opposed to those used commercially. Only serviceable property will be entered in the quantity received column of receiving documents. Property found to be unservicable by qualified inspectors at the time of receipt from vendors for reasons other than Carrier related causes, will be reported as outlined in appendix E-150 P on SF 364 (appendix C-36) and will be handled as indicated in subsequent paragraph; carrier related causes will be reported as outlined in subsequent paragraphs and in appendices E-155 P and E-156 P on SF 363 or 361.

(1) If the unserviceable condition is attributed to damage incurred while in the possession of the carrier, the Transportation Officer will:

(a) If inspection and acceptance at origin, retain custodial responsibility for damaged property pending disposition instructions IAW paragraph 303303.

(b) If inspection at origin and acceptance at destination, process IAW paragraph 303304.

(c) If inspection and acceptance at destination, process IAW paragraph 303305.

(2) Other unservicable property received from vendors will be the custodial responsibility of the receiving activity pending receipt of final disposition instructions from the DSC. Unserviceable materiel received will be reported to the DSC IAW appendix E-108 P, entering Condition Code L in appropriate card column.

(3) Quantities of a contract line item or subline received in excess of the quantity called for by the contract or order (after considering any allowable variation in quantity) will be processed as follows:

(a) If the quantity in excess of the authorized quantity variance has a value in excess of $100.00, the entire overage (in excess of the authorized quantity variance) will be reported to the managing DSC in Condition Code L IAW appendix E-150 P.

(b) If the quantity in excess of the authorized quantity variance has a value of $100.00 or less, the entire quantity received will be reported in Condition Code A.

(4) Receipt transactions reported by the depot in an issuable condition and subsequently placed in Condition L by the managing DSC computer system, will be processed as documented in paragraph 305303. Completed receipts history will not be changed to reflect the new condition code.

(5) Contractor-risk shipments which are subject to testing and/or inspection at origin and are received by the defense depot without prescribed certificates will be reported to the appropriate DSC in Condition Code L if the reporting cannot be accomplished within the processing standard timeframe outlined in Section II of this chapter. Upon receipt of satisfactory certificates from the contractor, materiel will be transferred from Condition Code L to the proper condition code by Materiel Adjustment Card, IAW appendix B-22, using DIC ZAC, which will produce a Materiel Adjustment Card, DIC DAC, for transmission to the DSC/ICP.

(6) Materiel placed in Condition Code L will be held pending receipt of disposition instructions from the appropriate DSC. If materiel has Automated Contract Data, the history record will be maintained until the contract line is deleted by manual action. This deletion will be prepared at the time the suspended quantity is reclassified. Deletion of the Contract Record will not affect the Receipt History

(a) If applicable, an interim A/R will be automatically prepared with an estimated acceptance date as outlined in paragraph 303308 for Condition Code L receipts.

(b) A manual A/R must be prepared IAW appendix E-094 P when a receipt (previously reported in an interim status) is reclassified from Condition Code L to A.

(7) When a discrepancy is involved, the only distribution of receiving documents will be IAW the provisions of section V, except that normal distribution will be made for any portion of the shipment which may be serviceable.

(8) Defense depots, upon request of the Procuring Contracting Officer, will compute and furnish the applicable storage and handling cost data. When the data cannot be forwarded within 30 days, an interim reply will be sent. The interim Contracting Officer can expect complete data.

e. When preservation and packaging cannot be procured from vendors, materiel may be received for stock which requires packing, marking, or other stock readiness work prior to being ready for issue. Under these circumstances, if there is clearly no contract violation involved, the materiel should be reported to the DSC in Condition Code E.

f. When preservation and packaging cannot be procured from vendors, commercial service contractors, or port packing facilities when required for overseas shipments, they may be directed to DLA receiving activities for overpacking and reshipment on DD Form 1348-1. Although these shipments are not received into stock and materiel receipt cards are not submitted, receiving activities must complete required copies of the receipt document and submit to proper paying office. Shipment status will be furnished appropriate activity at time of reshipment.

303302 - RECEIPT OF MATERIEL WITH INSPECTION AND RECEIVING REPORTS

a. The documentation covering these receipts will be one of the following types:

(1) DD Form 250, Materiel Inspection and Receiving Report - Appendix C-14.

(2) DD Form 1155, Order for Supplies or Services - Appendix C-13.

(3) Other DoD authorized Receiving Reports.

b. The distribution activity scheduled to receive materiel will receive advance copies of inspection and receiving reports by mail. These copies may be manually filed at the distribution activity for use as a replacement for missing automated contract data or for use as required to tally-in shipments when mechanical contract data is unavailable.

c. Four copies of inspection and receiving reports (DD Form 250 or DD Form 1155) will normally accompany each shipment as prescribed in appendix I to the Armed Service Procurement Regulation (ASPR). These copies will be attached to the lowest numbered shipping container or palletized unit and will be used to tally-in the shipment.

d. Utilizing information on accompanying documentation, receiving activities will initiate a receipt inquiry IAW appendix E-102 P.

e. Contract Data and PMR record will normally be available in the computer files. In accordance with appendix E-102, the receipt inquiry will produce the following documents as indicated:

(1) When Contract Data and PMRR are available, the Receipt Control Document, appendix F-200, and the Contract Data Sheet, appendix F-201, will be printed at the remote terminal. The Receipt Control Document will offer an input format IAW appendix B-108, DIC ZV_.

(2) When only the PMRR is available, the Receipt Control Document, IAW appendix B-108, DIC ZV_, will be output; no contract data sheet will be produced.

(3) When the Type A inquiry does not find either a Contract PIIN or a PMRR data match, the Receipt Control Document will be output IAW appendix B-109, DIC ZX_.

(4) The RCD and CDS will be produced in two copies (copy color/stripes, etc. will be by depot option). The documents will be processed and distributed IAW appendix E-047 P.

f. In conjunction with the receipt inquiry into the Contract Data and PMRR file, the locator record will also be queried. This response will appear, also at the remote terminal, as the Storage Action Document (SAD), appendix F-202. Processing instructions are contained in appendix E-110 P.

(1) The SAD will display basic locator, sub-locator (location) information, and requests for expedited Receiving/Storage action due to pending backorders. The SAD will be produced in two copies.

(2) One copy of the Storage Action Document will be used as a manual coding/input form IAW appendix B-46/144. The second copy will be used as a temporary label for new location additions IAW appendix E-110 P.

g. The RCC completed IAW appendix E-108 P, will be used to complete established computer records and will be the source of information from which the completed receipt of materiel is reported to the DSC on the MRC. All MRCs DIC D4_, are mechanically prepared and transmitted to the DSC/ICP after a valid RCC and Receipt Stow Notice (appendix B-46 or B-144) have been processed IAW appendices D-69 and D-70.

h. A valid DD Form 250 will be completed as indicated in appendix E-017 P based on inspection of materiel. If any part of the shipment is discrepant, the paying office copy of the DD Form 250 will be annotated accordingly. A DD Form 250 will be considered valid only if at least one copy has been completed as follows:

(1) Contractor's statement and signature for shipment made under alternate release procedures.

(2) A Contractor-Signee COC accompanies or is entered upon the DD Form 250.

(3) Quality Assurance Representative's signature in Item 21A with both the PQA and Acceptance blocks checked when contract specifies inspection and acceptance at origin.

(4) Quality Assurance Representative's signature in Item 21A with the PQA block checked when contract specifies inspection at origin and acceptance at destination.

(5) The words Fast Pay in Item 21A for shipments made under these procedures.

i. When materiel is received from vendors without accompanying documentation, receiving documents will be accomplished IAW paragraph 303205.

j. Distribution of DD Form 250/1155 by Defense Depots will be IAW appendix E-017 P.

k. When it is necessary to mail paying office copies, they will be mailed in a separate envelope marked or stamped PAYMENT OFFICE - DELIVER UNOPENED.

l. If the DD Form 1155 is used in lieu of the DD Form 250, the verification/entries will be as prescribed in appendix 1 of ASPR or DLAR 8205.1. Receiving personnel will place special emphasis on the following:

(1) Check the quantity shipped in the "Quantity Order/Accepted" column (block 20) if acceptance is at origin and the total quantity is shipped in the shipment. If different, enter the actual quantity accepted below the quantity ordered and encircle.

(2) Check the appropriate block of the block title "Quantity in Column 20 Has Been" (block 26) to indicate receipt, inspection, and acceptance of materiel IAW the terms of the contract.

(3) Check the appropriate block of the block title "Shipment No". (block 27) and where applicable, enter the Partial Shipment Number to the right of "Partial".

m. Procurement instruments will be removed from active files at distribution activities and placed in completed files upon receipt of final shipment. This activity will be controlled by the use of appendix F-203, Contract Audit Report. This report will list all procurement instruments completed for the previous month. In addition, contracts in a completed status due to cancellation or deletion will also be identified on the report. Inactive, mechanized Contract Data records will also be purged and passed to the audit report with the completion of the PMRR purge. Automated Contracts will be considered eligible for purge when no matching PMRR exists, even if the Contract Data CLIN record indicates a balance due. A mechanized Contract Data record is not inactive (not subject to purge) if it reflects a balance suspended in Condition Code L with a balance due. Subsistence and Clothing and Textile Procurement Instruments will not be reflected on the report. Manual maintenance or review for those contracts will remain as currently practiced.

(1) This file will be used to reply to telephone queries and to assist in the correction or reentry of invalid actions only for those Item Managers S and T for which no contract data records are mechanically maintained.

(2) Normally, telephone requests for receipt data will be answered by preparing a remote Completed Receipt File inquiry IAW appendix B-69.

(3) Both the manual document file and the mechanized receipt history will be disposed of 90 days from completion date.

n. Materiel procured by the managing DSC for which mandatory vendor supply has been directed through the provision of the ASPR 1-307.3, and found to have sustained damage attributable to the carrier, will be removed from the delivering conveyance and reported to the DSC. The preparation of reports, as directed by applicable sections of this chapter, will be accomplished to permit the proper adjustment/recoupment actions by the managing DSC. Distribution depots, which are designated to receive materiel, will be notified by the procuring activity by means of a message or letter of procurement actions for which mandatory supply has been directed.

303303 - RECEIVING SHIPMENTS WITH INSPECTION AND ACCEPTANCE AT ORIGIN

a. Materiel received against this type procurement is the property of the Government prior to actual receipt at a defense depot and materiel will be treated as such during the tally-in count and (cursory) inspection operation.

For clothing and textile products: At least one container/package and/or roll per NSN, per contract line item, per shipment will be selected as the representative sample size. At least one base item per container/package and/or at least the five yards of product per package/roll selected should be inspected.

b. Receipts of this type will normally be accompanied by four signed copies of the DD Form 250 or 1155 attached to the lowest number shipping container or palletized unit. These documents will be stamped, marked, and utilized as outlined in this section and appendix E-017 P. Depots will ensure that at least one copy of the Inspection and Receiving Report is annotated as indicated in appendix E-017 P. If a copy of the DD Form 250 or 1155 annotated as indicated in appendix E-017 P is not available, action will be taken as follows:

(1) Contact the inspection office by phone to determine if the materiel was in fact accepted and/or inspected. The Directory of Contract Administration Services Components (CAS) DoD 4105.59-H, contains the CAS codes and locations. This handbook should be used in conjunction with DLAH 5805.1, the DLA Organizational Directory, which contains the CAO telephone numbers.

(2) If it is determined that the materiel was accepted and/or inspected, the inspection office will be asked to submit a signed DD Form 250 via facsimile transmission or priority mail to defense depots.

(3) If the inspection office cannot be determined or contacted, or if contact results in a determination that the required acceptance and/or inspection was not made, the materiel should be suspended and reported to the managing DSC for disposition instructions IAW section V of this chapter.

c. Receipt of the materiel will be reported to the DSC by the input of a Receipt Confirmation Card IAW appendix E-108 P, together with a matching Receipt Stow Notice, appendix E-110 P, which will cause the mechanical generation and transmittal of an MRC DIC D4_ in the format of appendix B-20. Materiel inspected and accepted at origin and found to be unsatisfactory by qualified inspector at the time of receipt from vendors will be reported to the DSC by the input of a Receipt Confirmation Card, (RCC), DIC ZV_ or ZX_ entering Condition Code L as outlined in procedures in appendix E-108 P. Transmission of the MRC, DIC D4 will occur concurrent with the establishment of a Contract Data update. A record documenting the quantity, condition, A/R Status (if required), date of receipt, and MRC date, etc., will be mechanically posted to the appropriate procurement instrument. In the event a carrier-related discrepancy is noted prior to unloading the materiel and the quantity is sufficiently large (a carload or truckload or similar large quantity) so as to be economically unfeasible to unload, the materiel may be rejected to the carrier, SF 363 or 361 prepared (as pertinent), and the receipt action will not be reported to the DSC/ICP by submission of a D4_. Details of the discrepancy will be furnished IAW provisions of section V. All MRCs, DIC D4_, are mechanically prepared and transmitted to the DSC/ICP processing is covered by appendix D-69 or 70.

303304 - RECEIVING SHIPMENTS WITH INSPECTION AT ORIGIN AND ACCEPTANCE AT DESTINATION

a. Receipts of this type do not become the property of the Government until tally-in, cursory inspection, and acceptance by receiving personnel to support payment under the contract terms has been accomplished.

For clothing and textile products: At least one container/package and/or roll per NSN, per contract line item, per shipment will be selected as the representative sample size. At least one base item per container/package and/or at least the first five yards of product per package/roll selected should be inspected.

b. Depots will ensure that at least one copy of the DD Form 250/1155 is annotated as indicated in appendix E-017 P indicating inspection at origin. If the annotated copy of the DD Form 250/1155 is not available, the procedures in paragraph 303303b will be followed.

c. Materiel found to be satisfactory will be reported to the DSC IAW appendix E-108 P. All MRCs, DIC D4_, are mechanically prepared and transmitted to the DSC/ICP processing is covered by appendix D-69 or D-70.

d. Receipts specifying acceptance at destination require Acceptance Reporting IAW DoD 4105.63-M.

(1) The Receipt Confirmation process outlined in appendices D-69 and D-70 will generate Automatic Acceptance Reports, DIC PKN or PKP when:

(a) A matching Acceptance Alert is available.

(b) The matching Prepositioned Materiel Receipt Record reflects a Management Code D or F, reference appendix A-13, and an appropriate Administering Location Code is available.

(c) The RCC, DIC ZV_/ZX_, reflects an Administering Location Code (ADM) entry of 001 through 172. All other forms of ADM codes will be invalid for RCC entries. Alpha, alpha/numeric or numeric codes exceeding 172, if available in the mechanized Contract Data, will not be used to prepare Acceptance Reports, DIC PKN/P.

(2) A manual Acceptance Report shall be prepared IAW appendix E-094 P when limitations are encountered which inhibit automatic Acceptance Report output.

e. Materiel inspected at origin and contractual documentation specifies acceptance at destination and found unacceptable at destination will be processed as follows:

(1) Carrier Damage:

(a) Materiel received and discovered to have sustained damage which is apparently the responsibility of the carrier, will be rejected to the carrier, the Bill of Lading annotated accordingly, and a SF 363 prepared and distributed IAW appendix E-155 P. In instances when only a portion of the materiel has sustained damage, the undamaged portion may be received and reported IAW appendix E-108 P and the balance rejected to the carrier, Bill of Lading annotated accordingly, and an SF 363 prepared and distributed IAW appendix E-155 P. Materiel will be accepted only in complete UIs. Receipt confirmation will be prepared for the quantity accepted.

(b) An exception to the above is materiel classified as Confidential or higher, sensitive, narcotics, drug abuse items and materiel considered as contraband in the civilian market, as specified in DLAR 4500.15, paragraph 2 4 E (2) and DLAR 4500.3, Chapter 221, Section 2, paragraph 221013. Such materiel will be physically received and placed in the custody of the transportation officer pending receipt of disposition instructions. Document will be prepared as noted above. Receipt confirmation will be prepared.

(2) Vendor Responsibility:

Materiel received and found to contain a discrepancy in violation of contractual specifications and attributed to no fault of the carrier, will be accepted by the depot IAW appendix E-108 P and reported to the DSC in Condition Code L. An SF 364 will be prepared and distributed IAW appendix E-150 P.

(3) Concealed Damage:

(a) In instances where the materiel was received from the carrier in apparently good condition but an apparent carrier damage is discovered prior to confirmation of the receipt to the appropriate DSC, the depot Transportation Officer will be immediately notified and the materiel placed in a temporary holding area pending receipt of disposition instructions from the Transportation Officer. Upon receipt of notification of damaged materiel, the Transportation Officer will take immediate steps to inspect the indicated shipment and, if in agreement with initial findings, notify the carrier's agent to pick up the materiel. SF 363 will be prepared IAW appendix E-155 P and no receipt confirmation will be prepared. In the event the carrier's agent refuses to act, the discrepant materiel will be placed in Condition Code L, receipt confirmation forwarded to the DSC, and an SF 364 and SF 361 prepared IAW pertinent appendices.

(b) When materiel was received from the carrier in apparently good condition, receipt confirmation accomplished, and subsequent carrier damage found, the materiel will be changed to Condition Code L by means of DIC DAC transaction (appendix B-22), a supporting DD Form 1225 prepared IAW appendix E-160 P, and the Transportation Officer notified to inspect the materiel and prepare a SF 361/363 report.

303305 - RECEIVING SHIPMENTS WITH INSPECTION AND ACCEPTANCE AT DESTINATION

a. Materiel received against this type procurement does not become the property of the Government until inspection and acceptance at the defense depot by qualified Government inspectors have been accomplished, reference paragraph 303304d.

b. Materiel receipts under these contract terms should be documented at source IAW ASPR appendix I/DLAR 8205.1. When an advance copy of the vendor's invoice or other information indicating quantities shipped is available, a reproducible master may be prepared in advance and held pending receipt of the shipment. If documents are not prepared at source, they will be prepared at destination IAW ASPR appendix I and documented with the applicable DD Form 250 (appendix C-14) or DD Form 1155 (appendix C-13). Contract unit prices, extensions, and totals will not be entered. Authorized personnel will execute the document IAW ASPR appendix I/DLAR 82/5.1 and will sign for NSN/Part Number, quantity, and condition only, unless the contract specifically requires a technical inspection. When such inspection is required, a qualified inspector will sign the inspection certificate.

c. Inspection and acceptance operations will be accomplished as concurrent actions.

d. Materiel determined to sustained carrier damage will be processed as outlined in paragraph 303304 above.

303306 - RECEIPT OF REPLACEMENT ITEMS FROM VENDORS

When vendor makes a replacement shipment which requires an adjustment to original shipment and acceptance is at destination, and executed, receipt document (DD Form 250) will be forwarded by defense depot to the paying office within the time frame prescribed in section II. In such cases, the adjustment document (DD Form 250) will contain a statement making reference to original payment copy which was submitted for the serviceable portion.

303307 - RECEIPTS FROM VENDORS ON A NO CHARGE BASIS

a. Vendors will send No Charge materiel to the DSC Procuring Contracting Officer. On this type of receipt, the due-in file will be updated with award feedback data as prescribed by the DSC

b. Following instructions apply for Stock Replenishment:

(1) The DSC will forward materiel to the distribution activity with advice that it was furnished by the vendor free of charge together with the PIIN, NSN Ownership/Purpose Codes, Quantity and UI.

(2) A PMRC will be furnished by the DSC to the distribution activity.

(3) A DD Form 250 will not be sent to a payment office.

(4) An MRC, appendix B-20 (DIC D4_), will be submitted to the DSC.

c. Following instructions apply for Direct Delivery:

If formal packing is required beyond the capability of the DSC, DSC will forward materiel to nearest DLA depot with DD Form 1348-1 filled out as follows:

(1) DIC A5E format.

(2) Unit Price: One cent for SSC-2 items; standard price for all others (Block E).

(3) Packaging Level; i.e., A, B, C, if known; otherwise, IAW project code or requirements of the ultimate consignee (Block AA).

(4) PIIN (Block BB).

(5) No shipment status nor Materiel Release Confirmation will be furnished by the distribution activity.

303308 - PROCESSING ACCEPTANCE ALERT AND ACCEPTANCE REPORT TRANSACTION

a. Appendix B-133, DIC PK5, is received by AUTODIN from CAO. The Acceptance Alert (A/A) information is mechanically recorded and suspended if a matching receipt is not available. Otherwise, an Acceptance Report (A/R) is mechanically generated. A/As will be mechanically matched to completed receipt data by:

(1) PIIN

(2) Call Order Number

(3) CLIN

(4) Shipment Number

(5) Shipment Number Suffix

b. Automatic preparation of DIC PKN A/Rs will not occur if the PU to UI conversion factor is required and is missing in Contract Data, the item is reclassified from Condition Code L to A, the DIC PK5 requests a corrected reply (Transaction Status E), there is no match on Shipment Number and/or Shipment Number Suffix Code between the A/A and receipt confirmation, or the A/A is a followup with a Transaction Status Code of 2 or greater, or the A/A or followup contains a PU which does not match to the UI and the Quantity Variance Code is not available. Automatic preparation of DIC PKP (no Acceptance Alert received) will occur when the Prepositioned Materiel Receipt record contains Management Code D or F, appendix A-13, indicating destination acceptance. Either Management Code must be accompanied by an Administering Location Code of 001 through 172 only. The Administering Location Code may be furnished by mechanized Contract Data or via a RCC, DIC ZV_/ZX_. The Purchase Unit, Shipment Number, and Quantity Shipped fields in the automatically generated DIC PKP A/R may reflect zero fill when this data is not available either via Receipt Confirmation or mechanical Contract Data Files.

c. In addition to the above, automatic A/R output cannot be anticipated for any receipt whose Procurement Instrument/Contract specifies transshipment action only. These receipts are not processed through the mechanized receipt system and, therefore, are not involved in the process outlined in appendix D-69. Completed receipt data/history is not available. Preparation of the appropriate A/R is still required and particular attention must be exercised when processing and posting receipts in this category. See appendix E-094 P for further details.

303309 - PROCEDURES FOR THE RECEIPT AND DOCUMENTING CARRIER LOSS AND DAMAGE OF MATERIALS

Since the title and risk of loss and damage remains with the contractor until acceptance at destination, material received with a shortage and/or damage will be processed as follows regardless of the point of acceptance or F.O.B. point.

a. Government Bill of Lading Shipment

The Government accepts the material at the point of origin and arranges for its shipment with the carrier. Title and risk of loss pass to the Government at origin. Process discrepancies as follows:

(1) Damaged Material

Annotate carriers waybill of damages and acknowledge receipt of material and file claim in accordance with procedures of DLAR 4500.15, Reporting of Transportation Discrepancies in Shipments (claims actions are between the Government and carrier).

(2) Shortages

File claim in accordance with DLAR 4500.15 (claims actions are between the Government and the carrier).

b. Commercial Bills of Lading

(1) Fast Payment

Under Fast Payment procedures the title to the supplies vests in the Government upon delivery to a Post Office or common carrier for shipment to a specific destination. If shipment is by means other than Post Office or common carrier, title to the supplies shall vest in the Government upon delivery to the point of first receipt by the Government. Notwithstanding any other provision of the Purchase Order, the contractor assumes all responsibility and risk of loss for supplies (a) Not received at destination (b) Damaged in transit (c) Not conforming to purchase requirements. The contractor shall either replace, repair, or correct such supplies promptly at their expense, provided instructions to do so are furnished by the contracting officer within ninety days from the date title to the supplies vests in the Government. Process discrepancies as follows:

(a) Damaged Material

1. Annotate Carriers waybill of damages, acknowledge receipt of material and receive material.

2. Prepare SF 361 (DISREP) short form and send to the appropriate contracting office administering the contract. This could be a DLA supply center or DCAS office (claims actions are between the contractor and the carrier).

(b) Shortages

1. Annotate carriers waybill of shortages and acknowledge receipt of remaining material.

2. Prepare SF 361 (DISREP) short form and send to the appropriate contracting office administering the contract (claims actions are between the contractor and the carrier).

(2) F.O.B. Destination With Acceptance at Origin

The Government accepts the material and title passes at the point of origin, but the risk of loss remains with the contractor until delivery at the point of destination. Process discrepancies as outlined in Fast Payment, paragraph 303309b(1).

(3) F.O.B. Destination with Acceptance of Destination

Title and risk of loss do not pass to the Government until formal acceptance of the material at the point of destination. In cases where the material does not conform to contract specifications, the Government may reject the shipment (i.e., not accept the material for purposes of claiming title) and notify the contractor of the rejection. However, in most cases, the Government is obligated to take possession of the rejected material. In turn, the contractor is obligated to remove the supplies or correct them in place, if permitted by the contracting officer. The only time the Government may rightfully refuse to take possession of a rejected shipment is when the material has been totally destroyed in transit and is valueless. Process discrepancies as outlined in Fast Payment, paragraph 303309b(1).

SECTION IV - PROCESSING RECEIPTS OTHER THAN PROCUREMENT

303401 - RECEIPTS OF MATERIEL WITH DD FORM 1348-1

a. Defense depots will receive materiel documented on DD Form 1348-1 (appendix C-11). These receipts may generate from many supply actions, such as:

(1) Requisitions.

(2) Supply Directives.

(3) Redistribution Orders (Timeframe identical with Procurement items).

(4) Returns to the supply distribution system, both automatic and directed.

(5) Returns from Maintenance Activities.

(6) Frustrated cargo shipments.

(7) Cannibalization actions.

b. The accompanying DD Form 1348-1, or advance documents if available/required will be used during inspection and tallying processes. The quantity and condition of materiel received will be verified against data on the DD Form 1348-1. Block 7 (Received by and Date) and Block 8 (Inspected by Date) of DD Form 1348-1 will be completed upon completion of tally-in and inspection actions.

c. Receiving activities will initiate a a new receipt inquiry IAW appendix E-102 P.

d. When a PMRC record is in the computer file, a ZW_ Receipt Confirmation Card (RCC) in the format of appendix B-108 will be completed. If no PMRC record is in the computer file, the receiving activity will prepare a DIC ZY_ RCC (appendix B-109) IAW appendix E-108 P.

e. The Receipt Control Document and the Storage Action Document will be used for routing the materiel to the assigned storage location and for reporting condition and quantity discrepancies as outlined in appendix E-047 P.

f. The RCC will be completed IAW appendix E-108 P. This card will be used to complete established computer records and will be the source of information from which the completed receipt of materiel is reported to the DSC on the MRC.

g. Materiel Receipt Confirmation Cards (DIC D6_) are mechanically generated and transmitted as described in appendices D-69 and 70.

h. A shipment diversion receipt of materiel by the alternate consignee depot requires an entry of Code RB (reverse billing) in the Materiel Receipt Confirmation Card (DIC D6_) forwarded to DSC.

303402 - CLASSIFICATION OF RECEIPTS OTHER THAN PROCUREMENT

Materiel identification and condition will be verified/determined from inspection and classification actions at time of receipt. Based on the findings of the inspection and classification actions, the appropriate condition code (see appendix A-16 for definitions of codes) will be noted in appropriate receiving documentation. Normally, receiving activities will enter only Code A, B, D, E, F, G, H, J, K, or L.

a. When materiel is classified to Condition Code F (Unserviceable Reparable) or G (Unserviceable - Incomplete) at time of receipt, the RCC (DIC ZW_ or ZY_), will reflect Management Code R in pos. 38 and an SF 364 will be prepared IAW section V.

b. Condition Code J may be used when Redistribution Order receipt processing is delayed due to lack of technical data. The input will be prepared as stated in subparagraph a. An SF 364 will be forwarded to the DSC. See appendix E-047 for processing incorrectly identified known materiel.

c. Condition Code K may be used:

(1) When receipt processing is delayed due to lack of technical information. In this instance, the input will be prepared as stated in subparagraph a. An SF 364 will be forwarded to the DSC with technical information required to effect classification on IAW section V. Reporting in Condition Code K will be made no later than the tenth calendar day after date of receipt. Condition Code K will not be used in receipt of Army Bag Items.

(2) In those instances where a consolidated shipment of large numbers of line items is received and where circumstances preclude inspection and classification within ten calendar days, these receipts may be unloaded, quantity verified by blind check and reported to the appropriate DSC in Condition Code K. A maximum period of 10 calendar days is established from the date reported in Condition Code K to reclassify and report the adjusted receipt transaction on these receipts. If, during the processing of this materiel, it is determined that additional technical information is needed, an SF 364 will be forwarded to the DSC. Otherwise, an SF 364 will not be prepared.

(a) Suspended receipts (Condition K) will be stored by lot and location established in a holding location pending determination of actual condition.

(b) Inspection and classification of items suspended in Condition K will be scheduled on the basis of "first-in, first-out" unless otherwise directed by the appropriate DSC to meet priority issue requirements.

(c) Upon determination of actual condition after inspection and classification, separate Materiel Adjustment Cards in the format of appendix B-22, using DIC DAC, reflecting such condition will be provided appropriate DSCs. Adjustment card will bear the same document number under which the materiel was received.

(d) Materiel determined to be in a ready-for-issue condition will be properly preserved, packaged, and marked and put in permanent storage locations. Stock Locator Files will be adjusted.

(e) When materiel has been placed in Condition Code K and is subsequently determined to be unserviceable, uneconomically reparable, it will be transferred directly to the Property Disposal Officer and reported on Materiel Adjustment Card, appendix B-22, DIC DAC, with Condition Code H (To) and Condition Code K (From) and Management Code M. The DSC will use this card to decrease balance for Condition code K, increase balance for Condition Code H, and simultaneously decrease balance in Condition Code H to record transfer to the PDO.

d. Unserviceable uneconomically reparable materiel will be automatically shipped to the Property Disposal Officer on DD Form 1348-1, using the original receiving document number. Condition Code H and Management Code M (or J if materiel is to be destroyed) will be entered in the Receipt Confirmation Card, DICs ZW_ and ZY. An SF 364 will be prepared IAW Section V when the dollar value exceeds $100. No Receipt Stow Notice (appendix B-46 or B-144) will be required to generate the MRC.

303403 - RECEIPT OF SERVICEABLE NONSTOCKED MATERIEL

a. Defense depots will report receipts of nonstocked materiel, other than GSA materiel, to the applicable DSC IAW the provisions of paragraphs 303401 and 303402.

b. Disposition action will be made IAW instructions received from the DSC.

303404 - RECEIPT - DISPOSITION OF GSA MATERIEL

Receipts of misdirected returns of GSA managed materiel will be reported to GSA IAW FEDSTRIP Operating Guide, FPMR 101-26.2, Chapter 4. Detail accounting and disposition instructions are contained in DLA-CS letter, 11 August 1971, subject: Receipt of Misdirected Returns of GSA Managed Items.

303405 - RECEIPT OF UNIDENTIFIABLE MATERIEL

a. If no established stock number can be applied by a defense depot and the estimated total dollar value of the unidentified materiel is $100.00 or more, the materiel will be reported to the DSC on SF 364 with as much descriptive information as possible, to include nomenclature, application, or use, physical dimensions, materiel composition, manufacturer's code, part number, and so forth. SF 364 will be submitted in original and three copies. The DSC will return one copy of SF 364 to the defense depot, indicating correct stock number and/or disposition instructions, within 30 days. Pending receipt of this returned copy of SF 364, the unidentified materiel will be held in a manually controlled location.

b. When the estimated total dollar value of unidentified materiel is $99.99 or less, the unidentified materiel will be shipped to the PDO, on DD Form 1348-1, using the original receiving document number. This materiel will not be reported to a DSC.

303406 - CREDITABLE AND NONCREDITABLE RETURNS

The following special instructions apply to creditable and noncreditable returns IAW DLAR 7000-4, Reporting and Returns of Excess Materiel to the DLA Distribution System, letter DLA-CF, 29 August 1963, subject: Policies for Return of Materiel to SSDs and DSSPs by Authorized Navy Requisitioners, and letter 23 December 1963, subject: Automatic Returns of Nonperishable food.

a. PMRC Document Identifier DW_ will be forwarded to distribution activities scheduled to receive the materiel. PMRCs will not be forwarded for materiel returned under automatic returns procedures.

b. When appropriate, i.e., customer cancellations, DSCs will cancel PMRCs by forwarding a PMRC with an X overpunch in pos. 25 (quantity field). DSCs will furnish replacement PMRC when amended excess report is received.

c. Upon receipt of tracer from the DSC, distribution activity will determine if shipment under cited Bill of Lading number has been received.

(1) If not, tracer action will be instituted IAW DLAR 4500.3, paragraphs 220009 and 220011.

(2) If shipment was received, records will be researched to determine action taken. Receipt cards or duplicate receipt cards will be mailed to the DSC.

(3) In either case, an explanation of circumstances will be furnished the DSC.

303407 - RECEIPTS FROM UNDELIVERED (FRUSTRATED CARGO) SHIPMENTS

Shipments (frustrated) that cannot be delivered to the consignee will be returned to the distribution activity designated by the DSC. Frustrated shipments, received at depot addressed in Block A of the DD Form 1348-1, will be routed to the Shipping Division for investigation. Frustrated shipments which the receiving depot did not initially ship and those returned to storage after investigation by the Shipping Division will be receipted for and placed in storage the same as a normal receipt. An MRC with DIC D6_, Management Code N, Reverse Billing Code RB, and the same document number as the MRO of the undelivered (frustrated) cargo will be prepared by the distribution activity and submitted to the DSC.

303408 - RECEIPTS OF DELETED ITEMS

a. When materiel is received and identified as an item that has been deleted from the catalog record, such an item will be recorded on the depot stock locator record and reported to the appropriate DSC on a Materiel Receipt Card.

b. The DSC will furnish a Disposal Release Order for the deleted item to the distribution activity.

c. The distribution activity will process the Disposal Release Order to transfer the materiel to the Property Disposal Offices.

303409 - RECEIPTS FOR ITEMS WITH NO RECORDED MANAGER

When materiel is received which cannot be identified to a specific manager, it will be received and processed as outlined in appendix E-108 P. This procedure will make use of the long form receipt confirmation to generate a MRC, DIC D6, appendix B-21, to the DSC which has the responsibility for Federal Supply Class of the returned item.

SECTION V - DISCREPANCIES IN SHIPMENT

303501 - GENERAL INSTRUCTIONS

a. Defense depots will report discrepancies of lost, damaged, or destroyed property and overages or shortages incident to shipment. Various forms as prescribed in this chapter will be used to report discrepancies. In addition to the reporting requirement outlined in this section, an MRC, with an appropriate Management Code will be forwarded to the DSC.

(1) Management Code R will be used in position 72 of the Receipt Confirmation Card, DIC D4_, D6_, as a Discrepant Receipt Indicator. This action will serve as notification to the DSC/ICP that the receipt was discrepant and that additional information is following via a discrepany report. This Code R, will never be entered in any receipt transaction if a formal discrepancy report is not submitted.

(2) If part of the receipt is not affected by the discrepancy (requiring submission of a discrepancy report), receipt reporting procedures may require the storage activity to report the nondiscrepant quantity in a separate transaction. This transaction would not cite the Discrepant Indicator. Special circumstances may require the use of another management code (e.g., M for automatic disposal, P for storage activity created document number, Z for explanatory remarks, S for misdirected shipments or U for contract overages received) even though submission of a discrepancy report is required. Omission/replacement of the Discrepancy Receipt Indicator does not obviate the requirement to submit a discrepancy report.

b. Controls will be established to ensure that discrepancies found are judiciously reported. It is equally important to establish similar controls to preclude initiation of reports which cannot reasonably be expected to result in overall benefits at least equal to the administrative cost of processing the report. Minor discrepancies such as insignificant typographical errors, which do not constitute a misrepresentation of the property being shipped, will not be reported. Activities preparing discrepancy reports will ensure that copies intended for DSC use are correctly routed to the DSC managing the item.

c. When defective DLA stocks are shipped to the manufacturer for repair/replacement, the only proof of shipment (contract number and quantity) is on the transportation document. The Directorate of Supply Operations at the Defense Supply Centers requires a copy of the transportation documents in their files so that proof of shipment can be used as part of the negotiation process with the manufacturer. Accordingly, the following documentation (1 copy) will be provided to the Defense Supply Center that directed the return to the contractor: On freight shipments - provide the Bill of Lading (commercial collect) and DD Form 1348-1 (DoD Single Line Item Release/Receipt Document); On United Parcel Service (UPS) - provide the DD Form 1348-1 (DoD Single Line Item Release/Receipt Document) annotated with the pickup record number, date shipped and UPS number. These proof of shipment documents will be addressed to: Directorate of Supply Operations, ATTN: Stock Control Branch, at the appropriate Defense Supply Center.

d. Receipts from vendors which require immediate corrective action may be reported by teletype to the DSC with all pertinent information regarding the discrepant shipment. Distribution of the teletype will be the same as specified for the SF 364 in paragraph 303505. When a report is made by teletype, confirmation by SF 364 will not be required unless requested by the DSC.

e. Discrepancies in DICOMSS receipts will be reported by phone to the DPSC Contract Quality Assurance Element (CQAE) in accordance with DPSCM 4155.6, Subsistence Inspection Manual. When immediate disposition instructions are received and implemented, confirmation by SF-364 is not required. The DPSC CQAE will make a written record of the report and disposition instructions and will include it as a discrepancy in any reporting system.

f. When a quantity or container shortage is discovered, the discrepancies will be fully explained on the reverse side of all receiving documents including the weight (as indicated on the freight bill or bill of lading) of the quantity or containers not received. In all instances of discrepancy between the consignor's figures and the inchecker's count, the count will be verified by another inchecker. The consignor's entries (quantity of pieces and containers) will not be obliterated but will be lined through, and the actual quantity thereto received will be annotated adjacent or in the quantity received column and encircled.

303502 - DISCREPANCY IN SHIPMENT NOTIFICATION TO CARRIER (SF 363)

The SF 363 (appendix C-37) will be initiated IAW Joint Regulation DLAR 4500.15/AR 55-38/NAVSUP PUB 459/AFM 75-34/MCO P4610.19. This form will be used to confirm telephone conversations relative to discrepancy in shipment to carriers.

303503 - DISCREPANCY IN SHIPMENT REPORT (SF 361)

a. Defense depots will prepare and distribute SF 363 (appendix C-37) and/or SF 361 (appendix C-38) IAW Joint Regulation DLAR 4500.15/AR 55-38/NAVSUP PUB 459/AFM 75-34/MCO P4610.19, when transportation discrepancies exist for shipments received from any source, via all modes of transportation as outlined in the above regulation.

b. Additional procedures/instructions covering the preparation of SF 363 (DISCON) and SF 361 (DISREP) are outlined as follows:

Appendix E-155 P, Discrepancy in Shipment Confirmation.

Appendix E-156 P, Discrepancy in Shipment Reports.

303504 - PREPARATION OF REPORT OF ITEM DISCREPANCY (ROID) (SF 364)

a. Defense depots will prepare SF 364 (Appendix C-36) IAW Joint Regulation DLAR 4140.55/AR 735-11-2/NAVSUP INST 4440.127B/AFR 67-16/MCO 4430.3B. Discrepant shipments received from GSA sources will be reported using an SF 364.

b. Discrepancies which are attributable to, or the responsibility of, the shipper will be reported in order that the cause of such discrepancies can be determined and corrective/remedial actions taken. This form is also prepared and distributed when a shipment is received in a damaged or otherwise unsatisfactory condition as a result of improper packing, packaging, preservation, marking, loading and handling. These reports will be reported within 15 working days from date of receipt of discrepant shipment.

c. Additional procedures/instructions are outlined in the following appendix and will be used for processing discrepancies applicable to the SF 364.

Appendix E-150 P, Procedures for Report of Item Discrepancy.

d. The SF 364 will be prepared in sufficient copies to provide distribution IAW DLAR 4140.55, paragraph VII F. File copies will be retained used for processing discrepancies applicable to the SF 364.

e. Flagrant violation of accepted shipping practices or repetitive discrepancies in shipment from the same DoD installation will be treated as follows:

(1) A letter of complaint should be addressed to the Commander of the offending activity. Copies of shipping documents annotated as to the deficiencies and a copy of the applicable Receipt Discrepancy Report (appendix F-144) should be enclosed.

(2) Assistance of DLA Customer Supply Assistance Office personnel should be solicited, where appropriate, for the matter of deficient shipments to be discussed with the Commander of the offending activity. Applicable procedures are described in appendix E-181 P.

(3) When efforts under subparagraphs (1) and (2), above, have failed to correct the situation, copies of letters to the activity Commander should be sent to HQ DLA ATTN: DLA-OW and statement made as to dates of liaison visits when this subject was discussed with the activity Commander. The transmittal letter should contain a summary of the deficiencies and the period covered, by activity, if the transmittal letter covers more than one activity.

303505 - DISCREPANCIES IN NARCOTIC SHIPMENTS

In addition to the above requirements for reporting discrepancies, defense depots will ensure that shortages, overages, or losses in narcotic shipments are reported to the nearest Department of Justice, Bureau of Narcotics and Dangerous Drugs Regional Office, IAW Article 151.472 (B), Title 26, Code of Federal Regulations. In addition, shortages and losses of narcotics will be reported to HQ DLA ATTN: DLA-XP, under the provisions of DLAR 5705.1., Reports of Criminal Activity/Serious Incidents (exempt from RCS), with a copy to the appropriate DSC.

SECTION VI- RECLASSIFICATION ACTIONS

303601 - GENERAL

a. Materiel received and reported in Condition Codes D, E, F, G, J, K and L by the input of a Receipt Confirmation Card (DIC ZV_, ZW_, ZX_, or ZY_) establishes a classification suspense date in the computer record. As a result, a Classification Suspense Report (appendix F-22) will be output to DS/T the next report period after the suspense date is established and weekly thereafter, until the suspense date is deleted as a result of a physical reclassification of the materiel.

b. The input of a Receipt Confirmation Card which has established a classification suspense date in the record also causes the mechanical preparation of a Materiel Receipt Confirmation Card (DIC D4_ or D6_) for transmittal to the appropriate DSC/ICP and the output of a partially punched Materiel Adjustment Card (DIC ZAC) (appendix B-22) to DS/T. The quantity field and the Condition Code TO field of the Materiel Adjustment Card will be blank. This card will be held in a Pending Classification Suspense File in DS/T.

303602 - PROCESSING MATERIEL RECEIPT ADJUSTMENT ACTIONS

a. Materiel received from other than vendor sources and reported in Condition K because circumstances at the time of unloading precluded the completion of inspection and classification within ten calendar days will be inspected and reclassified on a "first-in, first-out" basis unless otherwise directed by the pertinent DSC/ICP. Upon determination of the actual condition, the appropriate prepunched Materiel Adjustment Card (DIC ZAC) will be pulled from the Pending Classification Suspense File and completed IAW the procedures set forth in appendix E-022 P. This Materiel Adjustment Card will then be reinput for processing as shown in the Procedure Decision Chart, appendix D-63. Stock Locator Records will be adjusted if necessary IAW the procedures outlined in appendix E-071 P. Computer processing actions to adjust these records are stated in appendix D-15.

b. Upon receipt of technical data and/or disposition instructions for materiel which was previously reported in Condition Code J or K, or upon receipt of disposition instruction for materiel which was previously reported in Condition Code D, E, F, G or L, the distribution activities will take the following actions as appropriate:

(1) Reclassify the materiel to the proper materiel condition and prepare the Materiel Adjustment Card in the format shown in appendix B-22, using DIC ZAC, in the same manner as outlined in subparagraph a.

NOTE: When disposition instructions indicate retention will be at no charge to the Government, Management Code R (appendix A-13) will be entered in pos. 72 of the DIC ZAC.

(2) Expedite copies of the receipt document (DD Form 250) to the paying office for materiel which is reclassified from Condition Code L to Condition Code A.

(3) Process the Materiel Release Order attached to the SF 364 by the DSC to reship materiel to the vendor or to other appropriate consignors, IAW procedures in appendix E-150 P. No statement which might adversely affect the Governments claim will be shown on the copy sent with the shipment.

(4) Transfer damaged or improper materiel held in Condition Code K to the PDO and complete the Materiel Adjustment Card, DIC ZAC, held in suspense, DIC DAC Condition Code H (To) and Condition Code K (From) and Management Code M (or J if materiel is to be destroyed) and input for mechanical processing IAW appendix D-63.

(5) Process the DRO attached to the SF 364 to transfer damaged or improper materiel held in Condition Code L to PDO.

(6) Stock Locator Records will be adjusted, as required, IAW the procedures of appendix E-071 P, and mechanical processes of appendix D-15.

(7) Determine if Acceptance Reporting is required and prepare manual A/R IAW appendix E-094 P.

(8) Inquire to determine if item has Automated Contract Data on receipts being reclassified from Condition Code L to A. If the quantity being reclassified completes the balance due in for the CLIN, it will be necessary to manually delete the Contract Data (CLIN) Record IAW appendix B-31.

SECTION VII - RECEIVING WORKLOAD PLANNING AND FORECASTING

303701 - GENERAL

On an as required basis receiving and storage personnel can access the Prepositioned Materiel Receipt File for forecasts of future receiving workload. Receipt Forecast Request Cards will be processed IAW appendix E-084 P, to obtain the forecasts when necessary. As a result of processing the request cards the following reports will be prepared mechanically: The Receipt Forecast Report (appendix F-93), or the Bulk Receipt Forecast Report (appendix F-94).

303702 - RECEIPT FORECAST REPORTS

a. The Receipt Forecast Report will be prepared in the format of appendix F-93, as a result of processing a Receipt Forecast Request Card (appendix B-84). The report will be prepared as part 1 or part 2 depending upon the selection option chosen. The two parts of the report differ only by the sequence in which they are produced.

b. Part 1 of the report provides a listing of PMR records for a specific EDD. The report is arranged to facilitate utilization with manual hard copy contract files.

c. Part 2 of the report also provides a listing of PMR records by EDD, but allows selection by type of receipt and source, if desired. The report is produced in PIIN/Document Number Sequence.

d. The F-93 Report in its various forms provides a convenient tool for purging contract files, planning or rearranging workload, and determining workload originating from specific projects or sources.

303703 - BULK RECEIPT FORECAST REPORT

a. The Bulk Receipt Forecast Report will be prepared in the format of appendix F-94 as a result of processing a Receipt Forecast Request Card (appendix E-84) IAW appendix E-084 P. The primary criterion for selecting PMR records for this report will be a minimum cube parameter which is variable at depot option.

b. The F-94 Report will provide a tool for storage planning and resource allocation based on projected bulk receipts for a specific period. The report can be limited to a specific type of receipt, if desired.

SECTION VIII - RECEIPTS LOST DURING PROCESSING

303801 - REPORTING LOST RECEIPTS BY DISTRIBUTION ACTIVITIES

a. Upon discovery of lost receipts from any source, distribution activities will immediately conduct an extensive search to locate the materiel. If the results of the search are negative, the Receipt Confirmation Card (appendix B-108 or B-109) with Management Code L or, if the RCC has already been processed, a Suspended Receipt File Maintenance Card (appendix B-145) with Management Code L will cause the MRC to be processed to the DSC and all files updated IAW appendix D-69 or D-70.

b. An arbitrary dollar limit (floor), below which no research need be conducted should not apply to discrepancies of this nature. The aforementioned should not be construed as a license to expend $50 researching a $5 loss receipt when management is satisfied that no culpability is involved. It does, however, dictate that each loss be individually examined prior to any directed action on the part of the Accountable Officer.

c. If materiel is located at any time subsequent to the submission of the MRC, the distribution activity will so inform DSC.

CHAPTER 4

ISSUE TRANSACTIONS

SECTION I - GENERAL

304101 - PURPOSE AND SCOPE

a. This chapter prescribes the responsibilities and procedures governing the processing of issue transactions and related documents by defense depots. These procedures cover the manual (see appendix E-007 P for processing manual MROs) and computer processing of MROs, the processing of MRO Confirmation, Shipment Status, MRO Denial/Adjustment, and the processing of all followups and cancellations.

b. Detailed instructions for processing peculiar types of transactions are contained in applicable chapters, i.e., Disposal Release Orders (DRO) - Chapter 12; Government Furnished Materiel - Chapter 13; Processing Issues to and Receipts from Maintenance Activities - Chapter 17, and Military Assistance Program (MAP Materiel Release Orders) - Chapter 18.

c. Detailed procedures for clearing controlled violations that pertain to issue transactions are covered in appendix E-007 V and Violation Processing, Chapter 61.

d. This chapter also established the media for status inquiries of issue transactions in-process, or completed MRO History for a period of 45 days for regular DLA MROs, 90 days for MAP MROs.

e. Processing of Redistribution Orders (A2_) will be accomplished in accordance with this chapter (Issue Transactions). Exceptions will be found in paragraph 304216.

304102 - APPLICABILITY

The procedures in this chapter are applicable to defense depots and to DSCs with depot operations. The term ICP refers to Military Services Inventory Control Points issuance of MROs for Service owned stock stored at defense depots.

SECTION II - DEPOT ISSUE PROCESSING PROCEDURES

304201 - DOCUMENTATION RECEIVED FROM CENTERS

Issue transaction, as generated by the cognizant DSC/ICP, IAW Volumes I and II of DLAM 4140.2, will be forwarded to the depot.

a. Depots that receive MROs, Cancellations or Followups, irrespective of form or method of transmission will process such transactions IAW the provisions of this manual. Procedures are included for the processing of MROs received by message (appendix E-001 P) and the control of MROs containing exception data (appendix E-007 P).

b. The following types of documents will be received by the depot via AUTODIN directly into the computer.

(1) MRO A5_, except A55/A5E (appendix B-7).

(2) DRO A5J (appendix B-32).

(3) Cancellation Notice AC6/ACJ (appendix B-17 and B-227).

(4) MRO Followup AF6/AFJ (appendix B-60 and B-227).

(5) Followup on Cancellation Request AK6/AKJ (appendix B-17 and B-227).

(6) Document Modifier AM_ (appendix B-4).

(7) Redistribution Order (A2_) (appendix B-192).

304202 - VALIDATION AND EDIT

Each MRO will be mechanically subjected to validation edit to assure that all essential data therein are complete to the extent possible and acceptable MROs will be released to processing (see chapter 60). MROs are validated and edited in accordance with appendices D-41, D-65, and D-108. Violations are processed in accordance with appendices E-007 V and E-032 V.

304203 - PROCESSING PRODUCTS FROM VALIDATION AND EDIT

a. MROs that fail validation edits and cannot be corrected automatically by the computer, and/or for which mechanical rejection capabilities do not exist between the defense depot and DSC, will be rejected and output on a Violation listing, appendix F-85, with all applicable Violation Code(s). (See appendix A-82 and chapter 61).

b. Processing personnel of the Shipping Documentation Branch will receive Violation Output F-85, and attempt to correct the invalid element of data, identified by the Violation Reason Code(s) in accordance with appendix E-007 V. Prior to reinput of the corrected document, all other data elements will be reviewed for validity to avoid additional rejection on subsequent processing. Invalid or blank data elements which cannot be corrected by depot processing personnel will be resolved through communication with the applicable DSC. Immediate resolution via offline means, i.e., telephone, is required for all priorities 1-8 transactions. DSC will in all cases confirm, by letter or TWX the corrected data element.

c. All MRO Violations, except those with Invalid Document Numbers, and Invalid "From" Routing Identifier are mechanically controlled. All MROs remaining in Cumulative Register, after each routing cycle has been processed, will be printed on the F-118 for processing as outlined in appendix E-148 P. These violations will remain in Cumulative Register and printout on the F-118 daily until cleared. (See appendix E-148 P.)

d. MROs will be rejected to the DSCs for invalid Signal Code, invalid Supplementary Address, or invalid RDD with Advice Code 2T, 21 or 32. System will mechanically prepare and transmit a Supply Status Card, appendix B-94, with the appropriate Status Code in pos. 65-66.

e. The document number, i.e., entries in pos. 30 through 43, and pos. 44 when a suffix code is applicable, will be used as a basis for determining duplicate documents. Duplicate MROs will be disregarded when received.

304204 - PROCESSING MATERIEL RELEASE ORDERS

a. The MRO will be entered into the MRO Cumulative Register and/or History File with a four digit current date of receipt where the information is available for inquiry. (See appendices E-115 P and E-115 V).

b. Preparation and control of shipping documentation for MROs and DROs will be in accordance with chapter 60, appendix D-27, "Processing of Workload Release" and appendix D-98, "Procedure Decision Chart Shipment Unit and Documentation Process".

c. The MRO Shipping Unit file will be updated by input of MRO Control and Status Request Card, DIC ZBM, appendix B-99, Shipment Unit Completion Card, DIC ZBP, appendix B-101, and/or Bill of Lading Closeout Cards, DIC ZEN, appendix B-128. These input actions will cause the preparation and transmission of Materiel Release Confirmations, DIC AR_, appendix B-14, Materiel Release Denial/Adjustment Cards, DIC A6_, appendix B-8, and/or Shipment Status Cards, DIC AS_, appendix B-24.

d. Shipment Status Card DIC AS8 will reflect the POE Address code under the following conditions:

(1) CONUS shipment - leave blank.

(2) For shipments moving to overseas destinations via Defense Transportation System (DTS) and GBL/CBL, Parcel Post (except APO/FPO) and small package carrier shipments entering the DTS at the POE.

(3) Leave blank for parcel post movement through an APO or FPO.

(4) Enter the POE for FMS or Grant Aid transactions moving via DTS. If not moving via the DTS, leave blank.

(5) FMS Shipment Date available for shipment. Blank on parcel post.

e. Shipment Status Data DIC AS8 that is not transmitted to the Defense Automatic Addressing System (DAAS) will be output for processing as follows:

(1) Shipment Status Cards (Main) (F-115 report).

(2) Shipment Status - Without Communication Routing Identifier (F-111 report).

(3) Shipment Status to Collocated Activities (F-112 report).

(4) Shipment Status to Activities when Computer has no AUTODIN Routing Indicator (F-113 report). See appendix E-143 P.

(5) Shipment Status to Collocated DSC/SAMMS Tape.

f. When the requested quantity or any part thereof has been accounted for, that action will be retained in the Shipment Unit File (IAW chapter 60) until action has been received on the total MRO/DRO quantity. When the total release order quantity has been shipped, denied, and/or canceled, the release order will be transferred to the MRO/DRO History File where it will remain available for interrogation for 45 days for regular DLA customers, 90 days for MAP customers.

g. When a transshipment receipt (a Direct Vendor Delivery shipment sent to the depot for packing or marking) has been prepared for shipment by the Stock Readiness branch, a DD Form 1348-1 may be obtained by entering a manually prepared A5_ MRO Transaction. This will produce necessary documentation to complete shipment including mail and freight labels. When constructing this A5_, the original document number should be used, and the FSC entered should be 1111; this FSC entry will prevent the MRO from appearing in the Depot Balance and Transaction Register (DB & TR) program as a mismatched transaction. The MRO should be placed in off-line processing IAW appendix B-99 and E-010 P to prevent production of Shipment Status and Materiel Release Confirmation transactions.

304205 - UNIFORM MATERIEL MOVEMENT AND ISSUE PRIORITY SYSTEM

a. The Uniform Materiel Movement and Issue Priority System (UMMIPS) is outlined in DLAR 4410.1 and contains the time cycles for processing of requisitions for each Issue Priority Group (IPG).

b. The allowable processing time for depots will be computed on the following:

(1) IPG I (IPD 01-03). The transmission date (extracted from the DAAS AUTODIN batch header card) plus 1 day.

(2) IPG II (IPD 04-08). The transmission date (extracted form the DAAS AUTODIN batch header card) plus 2 days.

(3) IPG III (IPD 09-15). The transmission date (extracted from the DAAS AUTODIN batch header card) plus 8 days.

NOTE: When the DSC and the Defense Depot are collocated the transmission date is generated by the Entry/Exit subsystem and placed in the transmission tape(s) forwarded from the DSC to the Defense Depot.

(4) In instances when an RDD on an MRO requires delivery of materiel to the consignee in a timeframe shorter than that established by the PDD appropriate to the Priority Designator on the MRO, depots will expedite processing

wherever possible to effect shipment in time to meet the RDD, regardless of the allowable processing time calculated in subparagraph (3). Also, when MRO contains Advice Code 2T and RDD cannot be met, the MRO will be rejected to the DSC, using Supply Status Card, appendix B-94, (DIC AE6/AEJ with Code CB in pos. 65-66). MROs which contain Advice Code 2T and do not contain a date in pos. 62-64 will be processed under the assigned priority designator without regard to the 2T Advice Code.

(5) Code A, S or X in pos. 62 will be entered by the requisitioner who desires an extended RDD. These entries indicate that the customer requires the materiel by a date computed as the last day of the month of the document date (pos. 36-39) plus the number of months indicated in pos. 63-64 (e.g., 03 = 3 months).

(6) All the above computations will be in terms of calendar days, including Saturday, Sunday, and holidays.

c. Processing time will be computed in accordance with the following:

(1) Depots. Processing time charged to depots will be computed from the day of receipt of the MRO including Saturday, Sunday and holidays to date materiel made available to consignor transportation officer or released to carrier (whichever is the earliest) as follows: subtract date MRO was received from date materiel made available to consignor transportation officer or released to carrier.

(2) Since hourly data are not included in MRO or MRC cards, for IPG I or II, internal controls will be established to ensure compliance with above indicated timeframes. Controls will also be maintained to ensure that the recorded dates of MRO transmission or receipt coincide to the maximum extent practicable with the actual dates of physical transmission of receipt.

d. As indicated in DLAR 4410.1, the Storage Site Processing Segment of UMMIPS ends when an item is properly packed and marked for movement. This is the normal "point-of-count" for "offer" to transportation in measuring on-time effectiveness. This point-of-count is established on the premise that Parcel Post items will be shipped, or documentation on freight shipments will be provided to the Transportation Officer, on that same day. A continuing effort must be made to ensure that documentation is moved to the transportation element as soon as possible subsequent to packing and marking of materiel.

304206 - SHIPMENT STATUS/MATERIEL RELEASE ORDER CONFIRMATION

a. The depot will prepare and transmit shipment status for each shipment as follows:

(1) For each DSC-directed materiel/DRO using DIC AR_.

(2) To requisitioner or supplementary address as dictated by pos. 7 and authorized alpha/numeric code in pos. 54, using DIC AS8.

(3) In response to DSC initiated followup DIC AF6/AFJ, using DIC AR_ or AE6/AEJ.

(4) In response to a DSC initiated cancellation DIC AC6/ACJ using DIC AU_, AG6/AGJ, AE6/AEJ, or A6_ with C Management Code.

b. Shipment Status/Confirmation Cards will be prepared in the format as prescribed in appendices B-14, B-24, and B-225, Shipment Status Cards will specify the quantity actually shipped. The computer will automatically prepare supply status for transmission via AUTODIN teletype, and/or mail as outlined in appendices D-28, D-30, and D-31 (see appendix A-3).

c. When Materiel Release Confirmation/Shipment Status Cards are submitted for the purpose of updating information on cards that were submitted previously (e.g., made of shipment or date shipped), such cards will be transmitted by mail. In these instances, the Remarks block will be annotated with information that the card submitted contains corrected data to a Shipment Status/ Confirmation Card that was submitted previously. A manual MRO Control File will be established for each corrected and/or updated MRO as outlined in appendices E-123 P and/or E-099 P, as applicable. The MROs will be listed on the F-107 Report and all future supply actions (shipments, denials, followups and cancellations) for these manually controlled MROs will be processed IAW appendix E-050 P.

d. Shipment Status/MRO Confirmation will be dispatched within the time-frames prescribed below:

(1) Twenty-four hours after shipment (i.e., release to carrier) for PD 01-03 documents.

(2) Forty-eight hours after shipment for PD 04-08 documents.

(3) Three working days after shipment for PD 09-15.

304207 - MATERIEL RELEASE DENIAL/ADJUSTMENT

a. When the quantity of materiel shipped is different from the quantity ordered to be shipped, the following actions will be taken:

(1) Prepare MRO Control and Status Request Card (ZBM) to depict the quantity denied or adjusted in alignment and format as prescribed in appendix B-99. Enter applicable Action Code (appendix A-42) in pos. 79-80.

(2) Based on Action Code in ZBM card, The computer will enter appropriate Management Code, as shown in appendix A-13 in pos. 72 to indicate reason for the denial adjustment action.

(3) As a result, a DD Form 1348, Materiel Release Denial/Adjustment Document, will be transmitted to the DSC/ICP.

b. Warehouse denials will not be reported, regardless of shipment priority, until receipts in-process have been screened to determine if materiel is in the receiving area or other temporary location or enroute to permanent location.

304208 - PROCESSING CANCELLATIONS

a. MRO/DRO Cancellation Request (DIC AC6/ACJ, AC7 appendix B-17 and B-227) and Followup on Cancellation Request (DIC AK6/AKJ, appendix B-17 and B-227) will be received via AUTODIN for processing IAW appendix D-43.

b. A reply or combination of replies to Cancellation Request and Followup on Cancellation Requests will be prepared mechanically by the computer when sufficient data are available in the MRO/DRO Cumulative Register or in the MRO History Files, as follows:

(1) The MRO/DRO previously denied (DIC AE6/AEJ with applicable Management Code, pos. 72 and Code BY in pos. 65-66, appendix B-94 and B-225).

(2) Shipment could not be canceled. Furnish complete Shipping Information (DIC AU_, appendix B-14).

(3) When the MRO/DRO is in the computer Cumulative Register as a Violation, the Cancellation Request will be recycled. When the MRO/DRO is in consolidation bank and has not been released to storage, computer will prepare cancellation accomplished transaction (AG6/AGJ with Status Code BQ, appendix B-81).

c. If the DD Form 1348-1 flimsy has been released to Storage and the cancellation is AC7, the computer will flag the record and prepare a Notice of Cancellation Request Report, F-69 Report; Part I will be processed IAW appendix E-005 P. If the MRO is inprocess and cancellation is AC6, the extended line item value must be greater than $25.00 (A5_ only) if the MRO is a single shipment unit or $200.00 (A5_ only) if the MRO is part of a multiline shipment unit before the computer record will be flagged and a Notice of Cancellation output on the F-69 Part I. An AE6/AEJ with Status Code B8 will be prepared for MROs which do not meet dollar criteria for AC6 cancellation.

d. If the MRO/DRO is shipped or denied and record reflects a cancellation flag, the computer will prepare DIC AU_ for any quantity shipped and a standard denial document (with applicable Management Code in pos. 72) for any quantity being denied.

e. If no record of the MRO/DRO exists in MRO History File, or the Cumulative Register, computer will reply to cancellation by changing DIC of the cancellation request to AE6/AEJ and inserting BF in pos. 65-66 (appendix B-81, no record of MRO).

f. A Cancellation request received on MROs Code DP (manual processing) in the MRO History File will be output on the F-50 report for processing as outlined in appendix E-050 P.

g. If MRO History record contains a Force Close Indicator, computer will prepare a AE6 with Status Code BE. (Status Code BE is not valid for DROs.)

h. If MRO History record contains a record of being previously canceled, prepare a AE6/AEJ with Status Code BQ.

i. If the MRO has been recorded in History as shipped and cancellation is AC6, request for Cancellation Report, F-69, Part 2 will be produced and action to intercept shipment at terminal will be taken and an AE6/AEJ with Status Code B9 will be prepared unless:

(1) Items consolidated in a multiline shipment unit (AC6 only).

(2) Item shipped to CONUS customers by and mode.

(3) Item shipped to overseas customers more than 35 days for surface mode and 10 days by air mode prior to receipt of cancellation request.

(4) Item shipped to overseas customer by air or parcel post.

(5) The canceled quantity is $200 or less in a single shipment unit (A5_ only).

(6) Single line item shipment unit having a total dollar value of less than $1000 when shipped in consolidation with other shipment units in a larger container, e.g., CONEX and SEAVAN (A5_ only).

(7) Item to be canceled is part of a multiline shipment unit and value of the canceled quantity is $200 or less (A5_ only).

j. If MRO has been recorded in history as shipped and cancellation is AC7, the computer generates an AU7 to DAAS (same format as appendix B-24).

k. Cancellation/diversion action will not be attempted beyond the shipping activity against:

(1) Partial MRO/Shipment quantities, unless it is known that the partial quantity represents a total shipment unit.

(2) Assemblies, kits, and sets whose component parts are shipped via multiple or memorandum MROs.

l. A completed cancellation will transfer the MRO record to MRO History File and the F-69 Report, Part 2 will be processed IAW appendix E-005 P and:

(1) When shipment can be diverted, depot will provide DSC with cancellation accomplished transaction (AG6/AGJ with blank in pos. 62-64, and Status Code B6, appendix B-81).

(2) When shipment can not be diverted, depot will provide DSC with shipping information (AU_, appendix B-14).

m. Depots will furnish status of cancellation actions with 5 days of receipt of AC_ or AK_ documents. This status will be updated as further actions are taken on the cancellation request.

304209 - PROCESSING MATERIEL RELEASE ORDER FOLLOWUPS

a. MRO/DRO Followups (DIC AF6/AFJ, appendix B-60 and B-227) will be received via AUTODIN for processing IAW appendix D-44.

b. Replies to followups will be prepared mechanically by the computer when sufficient data are available in the MRO Cumulative Register or MRO History File as follows:

(1) If a shipment has been made, computer will prepare DIC AR_, appendix B-14 or B-225).

(2) If initial MRO/DRO or any quantity was denied, the computer will prepare DIC AE6/AEJ with applicable management code in pos. 72 and Code BY in pos. 65-66 (appendix B-94 and B-225).

(3) If MRO/DRO or any quantity was previously canceled, the computer will prepare DIC AG6/AGJ with Code BQ in pos. 65-66 (appendix B-81).

(4) When a shipment has not been made, materiel has been selected, and in-a-hold status awaiting transportation release, prepare and submit a DIC ARO/OARJ, ARA/ARK, or ARB/ARL, as applicable, with type of hold code in pos. 51, and estimated shipping date in pos. 57-59.

(5) If the MRO is for FMS and a Notice of Availability (NOA) has been furnished to the freight forwarder IAW Chapter 18, prepare AE6 transaction with Status Code BL (pos. 65-66), the date of the transaction in pos. 62-64, and date offered in pos. 70-73.

(6) If MRO was previously rejected, not available to consignee by RDD, the computer will prepare DIC AE6 with Status Code CB in pos. 65-66 (appendix B-94).

c. If pertinent data are not available in the MRO History Field or if the MRO/DRO is suspended in the Cumulative Register, an estimated availability date (pos. 70-73) will be provided automatically by the computer (DIC AE6/AEJ, appendix B-94 and B-225 with Status Code BA) as follows:

(1) IPG I or II - Add two days to current date.

(2) IPG III - Add five days to current date.

d. Followups received on MRO/DROs Code DP in the MRO History File will be output on the F-50 report for processing as outlined in appendix E-050 P.

e. If no record of the MRO/DRO exists in the Cumulative Register or History File, the computer will prepare a "No Record" (BF) reply (DIC AE6/AEJ, appendix B-94 or B-225).

f. If the MRO History record contains a Force Close Indicator, the computer will prepare a "Force-Close" (BE) reply (DIC AE6, appendix B-94. BE does not apply to DIC AEJ). (DROs cannot be forced closed.)

g. Shipment Status in response to followups will be dispatched within the timeframes prescribed below:

(1) Twenty-four hours from receipt of PD 001-03 followups.

(2) Forty-eight hours from receipt of PD 004-08 followups.

(3) Three working days from receipt of PD 09-15 followups.

h. MRO Followups (DIC AF6) from the ICP/DSC with a BE Status Code will force close depot inprocess records and remove the MRO from the MRO Status Detail - Part I (appendix F-78) and the MRO Status Detail - Part 2 (appendix F-87). A force closed MRO listing will be produced in accordance with appendix F-89, with a 3 in the document origin portion of the TCN field. A reply (DIC AE6) will not be generated to the ICP/DSC.

304210 - MATERIEL RELEASE ORDER CUMULATIVE REGISTER/HISTORY INQUIRY

a. Each acceptable MRO/DRO is recorded in MRO Cumulative Register or MRO History File and is available for interrogation through card reading equipment. An inquiry, DIC ZCT (appendix B-115), will be prepared. This input will produce on MRO status reply on the F-67 report. In the event there is no record of the document number in MRO Cumulative Register or MRO History File, a no record F-67 report will be output.

b. Any violation on appendix B-115 input will be placed on the F-85 report.

c. The Inquiry Answer, appendix F-67, will be routed to applicable component as determined by the FRC.

304211 - CHANGES TO THE MRO/DRO HISTORY FILE

a. When an error in MRO/DRO History File has been detected, an input document with DIC ZAQ, appendix B-123, will be prepared IAW appendix E-123 P. Action will change the MRO/DRO History Status of the MRO to DP. The MRO will be printed on the F-107 report and all future followup and cancellation actions will be printed out on the F-50 report for processing as outlined in the appendices.

b. Violations on the appendix B-123 input will be processed as outlined in appendix E-123 V.

c. Significant elements of data such as quantity actually shipped and/or denied will require notification to applicable DSC and shipment status recipients via letter or message as applicable.

304212 - MODES OF SHIPMENT

a. Parcel Post. Shipments not excluded by special requirements codes, water commodity codes, special project requirements, Polaris shipments, or consignee exclusions and not weighing more than 46 pounds or exceeding dimension criteria for parcel post and except as indicated in subparagraph c(1)(a) below, will be scheduled and addressed for movement as follows:

(1) Overseas:

(a) REGISTERED.

Classified and controlled substances with Physical Security Code Q or R. (Note: Registered will be printed after the parcel post shipment category and can only be used in conjunction with priority and first class mail).

(b) EXPRESS/WSP - NMCS/999 with DoDAAD mode restriction flag code 7.

(c) FIRST CLASS PRIORITY MAIL - NUMBERED INSURED.

ALL NMCS/999 - for U.S. Army only, except as indicated in subparagraph c(1)(a) below.

(d) FIRST CLASS PRIORITY MAIL.

1. All IPG Is and IIs.

2. All medical items designated for mandatory air shipment and coded air challenge exemption IAW appendix A-94.

(e) SURFACE PARCEL POST 4TH CLASS.

All IPG III shipments except subparagraph (a) above.

(2) CONUS:

(a) REGISTERED.

Classified and controlled substances with physical security code Q or R. (Note: Registered will be printed after the parcel post shipment category and can be only used in conjunction with priority and first class mail).

(b) EXPRESS MAIL - NMCS/999 with DoDAAD mode restriction flag code 7.

(c) PRIORITY MAIL - NUMBERED INSURED.

All NMCS/999 - for Army, Air Force and Marines except as indicated in paragraph c(1)(a) below.

(d) PRIORITY MAIL

1. All IPG Is and IIs except shipments to postal zones 1 through 3.

2. Medical items designated for mandatory air shipment and coded Air Challenge Exempt in accordance with appendix A-94.

(e) SURFACE PARCEL POST - 4TH CLASS

All IPG Is and IIs destined for Postal Zones 1 through 3, and all IPG IIIs except subparagraph (a) above.

b. Freight Shipments:

(1) All IPG I shipments, to both domestic and overseas consignees, will be scheduled and addressed for movement by AIR.

(2) IPG II shipments will be scheduled and addressed for movement as follows:

(a) Domestic freight shipments will be routed IAW the Military Traffic Management Regulation.

(b) Overseas freight shipments will be scheduled as follows:

1. All shipments will be scheduled for movement by AIR with the exception of those categories shown in the following paragraphs.

2. Army and Marines (Service Code A, B, C, K, M, W) shipments which are not identified as 999, NMCS, or Medical Items Designated Mandatory Air in accordance with appendix A-94.

3. Air Force (Service Codes D, E, F, and J) items in FSG 19, 22, 23, 24, 37, 55, 56, 71, 74, 75, 87, 88, 7220, 7230, 7290, 8010, 8020, 9505, 9510, 9515, 9520, 9640, or 9905 which are not identified as 999, NMCS, or Project Alpha - 04 will be scheduled for surface movement.

4. Air Force shipments for those DoDAACs listed in NOTE at the end of the chapter other than items designated for mandatory airlift and coded Air Challenge Exempt in accordance with appendix A-94.

(3) IPG III freight shipments will be scheduled for surface mode except medical items designated for mandatory airlift overseas and coded Air Challenge Exempt in accordance with appendix A-94.

c. Small Shipments Other than by USPS.

(1) The use of Small Parcel Carriers Other Than USPS, is authorized for the movement of DLA small parcels when the rate is lower than other shipping modes. It is not intended as a substitute for other modes of transportation, such as LOGAIR or QUICKTRANS.

(a) For NMCS within CONUS for Air Force, Marines and Army to include the Army's DSS Consolidation and Containerization Points (CCPs), Small Parcel Carrier will be used as indicated below.

(b) NMCS identified in subparagraph (a) above destined for consignees within 300 miles (Postal Zone 3) will be shipped by a surface carrier which provides a traceable means of shipment.

(c) NMCS identified in subparagraph (a) above destined for consignees over 300 miles (Postal Zone 4) will be shipped by air carriers which provide a traceable means of shipment.

(2) Shipments other than NMCS may be shipped as follows:

(a) Surface Small Parcel Carriers.

IPGs I and II shipments to CONUS destinations not more than 300 miles (Postal Zone 3 or lower) will be shipped by Surface Small Parcel Carriers when rates do not exceed USPS fourth class rates. IPG III shipments to CONUS destinations more than 300 miles (Postal Zone 4 or higher) will be shipped by Surface Small Parcel Carriers when rates do not exceed USPS fourth class rates.

(b) Air Small Parcel Carriers.

IPGs I and II shipments to CONUS destination more than 300 miles (Postal Zone 4 or higher will be shipped by Small Parcel Air Carriers which are cost favorable, and capable of meeting the RDD.

304213 - PROCESSING DOCUMENT MODIFIERS

On receipt of AM_ modifier documents, storage activities will take the following actions:

a. When document is not recorded on the Cumulative Register or MRO History File, the AM_ will be converted to an MRO and processed accordingly.

b. If the MRO is recorded in history as denied a DIC AE6 Supply Status with 'BY' Status Code is generated to the originating DSC/ICP.

c. If the document is still recorded as unshipped, overlay the M&S Code in pos. 7 and Distribution Code in pos. 54 in all records to include the MRO Bank, Shipment Unit File, and History Files. If the MRO is still in the MRO bank, the RDD will also be overlayed. If the priority designator was modified the MROs priority designator will be overlayed and the Issue Priority Group, and MDT/PDT will be reconfigured.

d. If the document is recorded as shipped, generate a DIC AR9 confirmation to the originating DSC/ICP.

304214 - DUPLICATE SHIPMENTS

Distribution depots will furnish the DSC notification of duplicate shipments, which the distribution depot was unable to catch; such notifications will be by letter. At a minimum, the notification will reflect the NSN, Quantity, Unit of Issue, Document Number, and Suffix, if applicable, and RIC of shipping depot from initiating MRO, plus the date shipped, mode of shipment, bill of lading number/TNC, and any other shipment data pertinent to the duplicate shipment.

304215 - RECEIPT DETAIL DATA FROM SHIPMENT

The DLA depots in support of the Department of the Army Direct Support System (DSS) will provide automatic generation from the MOWASP system MRO confirmation process of a Receipt Detail Card, appendix B-3, DIC DWA, on all Army Project Code XDC or NSC shipments. This document will be output to the DAAS for routing.

304216 - REDISTRIBUTION ORDER (A2_)

Each Redistribution Order will follow the same process as described in this chapter with the following exceptions.

a. There will be no FMS or Grant Aid Redistribution Orders.

b. No price will be provided on Redistribution Orders. Any areas or reports that require price will be blank.

c. Redistribution Orders can be shipped via SEAVAN process.

(1) Eligible SEAVAN Redistribution Orders will be accepted into ASSP in the same format as an A5 MRO. Exception will be the DIC will be A2_ and the price field pos. 74-80 will be blank.

(2) Upon release of Redistribution Order for printing, the Routing Identifier Code will be moved from pos. 67-69 to pos. 74-76. Date of receipt will then be placed in pos. 67-69. Field position 77-80 will show inventory control codes if required.

NOTE: Automatic Surface DoDAACs (reference paragraph 304212 b(2)(b)4) are listed on the following pages. The "=" character in the 2nd position of the DoDAAC represents any alpha character.

ADJUSTMENTS TRANSACTIONS

SECTION I - GENERAL

305101 - PURPOSE AND SCOPE

a. This chapter prescribes procedures for the processing of adjustment transactions by defense depots. The following types of actions are covered:

(1) Changes resulting from receipt of Storage Item Change (SIC) Cards.

(2) Condition changes.

(3) Container quantity changes.

(4) Identification changes.

(5) Support documents for Inventory Adjustment Vouchers.

(6) Classification Suspense File.

b. Detailed procedures covering the reporting of transactions resulting from discrepancies in issue, receipt, physical inventory, and storage surveillance inspection actions are included in the respective chapters of this manual. Procedures contained in this chapter relating to the transfer of materiel to the PDO are limited to materiel discovered to be in unserviceable, uneconomically reparable, or condemned condition on other than receipt or storage surveillance inspection.

305102 - APPLICABILITY

The procedures contained in this chapter are applicable to defense depots receiving, storing, and issuing materiel under the cognizance of DSC/ICP IMs.

SECTION II - PROCESSING STORAGE ITEM CHANGE ACTIONS

305201 - GENERAL

Procedures prescribed in this section cover the updating of files and the remarking of stock and containers.

305202 - PROCESSING STORAGE ITEM CHANGE (SIC) CARDS

a. Upon receipt, at least 30 days prior to the effective date, SIC Cards (appendix B-23) will be mechanically subjected to a screening so that only cards applicable to depot records are processed to the Locator File. Applicable DICs and Phrase Codes retained for further processing are as follows:

DIC	PHRASE CODE	EXPLANATION
CMC	Blank	Data change other than NSN
CMD	Blank	Deleted, not replaced
CML	Blank	NSN change & logistic transfer
CMM	Blank	Logistic transfer
CMR	A	Consolidate with
CMR	C	Change to NSN
CMR	D	Change to FSC

b. The above SIC Cards are validated for old and new stock numbers effective date, old and new UI, shelf-life, physical security, manager, and conversion factor IAW appendix D-66. Those cards failing validation are rejected for corrective action prior to further processing. All violations are printed on the Violation Reject Listing, appendix F-85. After correction or determination of erroneous or missing data, a corrected SIC transaction must be keypunched and reinput.

c. Applicable SIC cards are processed to the locator file IAW appendix D-36 and chapter 66. Specific SICs are also forwarded to update the Classification Suspense File. UI changes via DIC CMC and stock number changes via DICs CMR and CML are the specific changes which will affect CMM, CMN, CMD, and CMC (other than the specified UI changes) will not affect the records. Changes to the suspense file will cause an updated Materiel Adjustment Card, appendix B-22, to be prepared for processing IAW appendix E-022 P, or a Surveillance Inspection/Operational Test Notice Card, appendix B-166, as applicable. When reclassification is authorized, the appropriate updated DIC ZAC/ZCO will be reinput to accomplish or complete the required action.

SECTION III - REPORTING OF STOCK DISCREPANCIES

305301 - ASSIGNMENT OF DOCUMENT NUMBERS

a. Document numbers assigned by depots to transactions as delineated in this chapter will be constructed as follows:

(1) First six digits - Account number of the DSC/ICP to which the document is to be processed.

(2) Next four digits - Julian date.

(3) Last four digits - Serial number from block assigned for the purpose by the respective DSC/ICP.

b. A document number will be assigned to each DD Form 1225, Storage Quality Control Report (appendix C-5), which is prepared in accordance with the provisions of appendix E-160 P. When a Materiel Adjustment Card (appendix C-16) is also prepared and submitted IAW appendix E-022 P, the same document number will be assigned to the adjustment card. Appropriate Suffix Codes will be assigned when required.

305302 - GENERAL

a. Procedures prescribed herein cover the reporting of the following discrepancies discovered during the inspection of on hand stock:

(1) Changes of the condition of materiel through damage or deterioration of stock or packaging and other causes which render materiel unsuitable for issue.

(2) A discrepancy between the contents of a container and the stock number marked on the container.

(3) Discovery of unidentified or misidentified materiel in stock.

(4) When warehouse denials with Management Code 2 in pos. 72 as a result of finding property which has changed conditions in storage and immediate classification is beyond current capabilities, depots will transmit a Materiel Adjustment Card (appendix B-22), DIC DAC, with Condition Code J in pos. 66 to the DSC/ICP within 3 workdays. To be used whenever stock selection of an MRO discloses the condition of materiel is other than that indicated on the MRO.

(5) When warehouse denials with Management Code 5 in pos. 72 from finding materiel requiring reidentification and immediate reclassification is beyond current capabilities, depots will promptly remark materiel, prepare and forward a DD Form 1225 to the appropriate DSC or Service/GSA manager within 3 workdays. To be used whenever stock selection of an MRO reveals materiel is misidentified and a discrepancy report is required.

b. For condition changes to D, E, F, G, J, K or L and from J, the DS/T will initiate a Surveillance/Inspection Test Notice Card (DIC ZCO) or a Materiel Adjustment Card (DIC ZAC) IAW appendix E-116 P or E-022 P, as applicable, to cause a Materiel Adjustment Card, DIC DAC, to be transmitted to the DSC/ICP.

c. Materiel reported to the DSC in Condition Code J or K and supported by submission of a DD Form 1225 or SF 364, may subsequently be determined by the DSC to be excess to stockage requirements at a depot. The DD Form 1225/SF 364 will be annotated by the DSC to dispose of the reported quantity to the local PDO and to submit a DAC transaction reflecting the action taken. The depot will prepare a DRO, DIC A5J, by utilizing the original document number.

(1) DROs will be automatically created at the depots as a result of receiving materiel (DIC D6_) in Condition Code H with Management Code M or T and from adjustment transactions (DIC ZAC/DAC, ZCO/ZC9) placing the materiel in Condition Code H with Management Code M or T. The DROs that are created will be automatically released as part of the next low priority cycle and will not be suspended in the MRO workload bank. If there's insufficient data to complete all required fields, and F-85 (Validation Reject Report) will be generated IAW appendix E-032 V. Appropriate transactions will be processed to the DB&TR.

(2) Manually prepared (typed) DD Form 1348-1 may be prepared with a Condition Code which reflects the actual materiel condition (other than J or K which are not acceptable Condition Codes for disposal action; Condition Code H may be used if the materiel condition is thereby accurately reflected). Sufficient data will be typed in the body of DD Form 1348-1 to provide necessary detail for stock selection. The shipment will not be confirmed.

(3) Computer prepared DD Form 1348-1 may be used with Condition Code J or K, as pertinent, and Management Code Z. Upon receipt of the documentation, the actual materiel condition will be entered into applicable spaces on the DD Form 1348-1. The computer record will subsequently be placed in DP status; shipment will not be confirmed.

(4) A DIC ZAC or ZCO, as applicable, will be submitted to cause submission of a DAC to the DSC with Condition Code H in the new condition field, J or K, as appropriate, in current or old Condition Code field and Code M entered in the Management Code field. The DIC ZCO will be used when a partially prepunched card has been produced and is available as result of previous ZCO actions.

(5) Condition Codes J, K, L, M and N are not acceptable for transfer of materiel to PDO. Condition Codes will be modified to accurately reflect the actual condition of the materiel.

305303 - CHANGE IN CONDITION

a. Materiel Receipt Confirmations (D4S) forwarded to the managing DSC reflecting a quantity received in Condition Code A which is in excess of the allowable contract quantity (including authorized overages) will have the excess quantity placed in Condition Code L by DSC computer program.

(1) The DSC will prepare a DIC DAC with the depot RIC in pos. 4-6, the DSC RIC in pos. 67-69, Condition Code L in pos. 66, and Management Code blank in pos. 72; other positions will be filled as appropriate. The DAC will be transceived to the depot indicated in pos. 4-6.

(2) The receiving depot will mechanically create a suspense record to the classification suspense file and output a DIC ZAC, reflecting the RICs as contained in the DAC input. Suspended records will also be reflected on the F-022 report, with records containing the depot RIC in pos. 4-6 printed with a series of asterisks following the record data.

(3) DIC ZAC cards received in DS/T, with the depot RIC in pos. 4-6, will be utilized as notification to segregate the materiel identified in the card and to change locator records accordingly. A DIC DAC transaction will not be forwarded to the DSC for transactions reflecting a blank Management Code; a mechanical transaction will be processed to and recorded in the depot DB and TR.

(4) When negotiations between the DSC and the vendor have determined the overage is to be retained by the Government at no cost, the DSC will originate a DIC DAC transaction to the receiving depot with Management Code B in pos. 72.

(5) The receiving depot will mechanically create a DIC ZAC transaction, perpetuating all data, and forward to DS/T. Computer records will not be changed by the transaction.

(6) DS/T will utilize the data contained in the DIC ZAC to correct locator records to reflect Condition Code A and submit a DIC ZAC transaction, with corrected RICs, for computer processing. Management Code B will be perpetuated in the submitted DIC ZAC transaction.

(7) Report of Item Discrepancy Reports (SF 364) will not be prepared or submitted to the DSC unless specifically requested on an exception basis.

b. When inspection of stock in-storage reveals a change in condition, depots will prepare, process, and forward the required DD Form 1225 and/or Materiel Adjustment Card (appendix B-22) to the cognizant DSC/ICP within established MILSTRAP timeframes.

c. The following types of condition adjustment transactions are prepared by the depot:

(1) Transfer of materiel to condemned or unserviceable, uneconomically reparable condition. These adjustments are prepared IAW appendix B-22, Materiel Adjustment Card. The condition code prior to determination of unserviceability will be entered in pos. 71, Condition Code H in pos. 66, and Management Code M in pos. 72.

(2) A DD Form 1348-1, DoD Single Line Item Release/Receipt Document (appendix C-11) will be prepared to ship the materiel to the PDO. The same document number assigned to the DD Form 1348-1 to ship materiel to disposal will be assigned to the Materiel Adjustment Card required by subparagraph (1) above.

(3) When there is evidence that the condition is due to fault or neglect, review the circumstances surrounding the loss to determine if an investigation or Report of Survey is required to establish liability IAW DLAR 7500.1. Requests for investigation or reports of survey will not be initiated for insignificant losses or when reports will not result in overall benefits in excess of the costs of processing the report. When required, Reports of Survey will be processed IAW DLAR 7500.1 at other appropriate Service regulations. Whenever Reports of Survey are prepared to cover losses of materiel, a copy of the report will be provided the cognizant DSC/ICP.

(4) If there is evidence that there may have been contractor liability for the loss that was not discovered upon receipt of the materiel, a SF 364, Report of Discrepancy (ROD) will be prepared and forwarded to the DSC/ICP. The Materiel Adjustment Card submitted to the DSC/ICP will contain the condition under which the materiel was carried in pos. 71 and Condition Code L or J in pos. 66. Condition Code L or J in pos. 66. Condition Code L should only be used if complete contract data are available (see appendix E-160 P).

(5) In the case of subparagraph (4) above, downgraded stocks will be marked and held pending receipt of disposition instructions from the DSC/ICP or contract administrator.

(6) When materiel is changed to other than Condition J or H, the depot will prepare and transmit a Materiel Adjustment Card to the DSC/ICP. The condition under which the item was carried on the records will be entered in pos. 71 of the adjustment card and the new condition will be entered in pos. 66. All Materiel Adjustment Cards documenting a change of condition from conditions (pos. 71) D, E, F, G, K and L are compared to the Classification Suspense File to clear the file of controlled classification suspense actions. Additional instructions for the establishment and clearing of the Classification Suspense File are contained in Chapter 3, Receipts and Chapter 70, Storage Surveillance.

(7) Deficiencies in packaging, labeling, and identification data or other minor causes which render materiel in storage unsuitable for issue will be corrected by the depot. Materiel will be changed to Condition Code E unless deficiencies can be corrected in two days or less. When deficiencies have been corrected, the depot will transceive a Materiel Adjustment Card to the DSC/ICP to transfer the materiel from Condition Code E to the applicable condition. The Classification Suspense record will be updated accordingly.

(8) When stocks are determined to be unsuitable for issue or resale as excess property and it is required that the materiel be disposed of by destruction, the materiel will be destroyed by the depot. If the condition of the materiel destroyed had not been reported to the DSC/ICP, the depot will submit a Materiel Adjustment Card, DIC DAC, Condition Code H in pos. 66, present Condition Code in pos. 71, and Management Code J in pos. 72. Supporting data and destruction certificate will be retained in the depot's records for a period of two years, then destroyed.

d. The following general policies apply to the initiation and processing of condition changes:

(1) When a change of condition is supported by a DD Form 1225, Management Code Z will be entered in pos. 72 of the Materiel Adjustment Card.

(2) The condition data field in the Item Locator Subrecord must be updated by submission of an Item Locator Subrecord Addition, Deletion, and Change Card, appendix B-71, IAW appendix E-071 P.

(3) Stock, containers, and locations must be properly remarked.

e. Depots will submit DD Form 1225 only when materiel is transferred from any condition to Condition Code F, G or L.

f. DD Form 1225 will be submitted only when requested by the DSC/ICP for condition changes of dated materiel other than subparagraph e above, and for the transfer of materiel to Condition D.

g. DD Form 1225 submitted in support of a Materiel Adjustment Card will be assigned the same document number as the Materiel Adjustment Card.

h. DD Form 1225 will be submitted to DSC/ICP in the number of copies prescribed by appendix E-160 P.

305304 - CHANGE IN CONTAINER QUANTITY

When inspection of materiel in storage reveals a difference between the actual quantity in the container and the quantitative data marked on the container, depots will report the discrepancy to the DSC/ICP on a DD Form 1225, appendix C-5. If there is a difference between the contents of a container and the quantitative data marked on the container and if the depot determines that there may have been an over/short shipment from a vendor or other source, such information will be entered on the DD Form 1225.

305305 - STOCK IDENTIFICATION

a. When inspection reveals that a difference exists between materiel in stock and the identification data assigned thereto, the depot will:

(1) Determine the correct stock number from the Federal Supply Catalog or other official publication.

(2) Prepare a DD Form 1225 for forwarding to the DSC/ICP. Both the incorrect and the correct stock number will be shown on the DD Form 1225. If the materiel cannot be identified to a NSN, process the materiel IAW subparagraph below.

(3) Interrogate the Item Data Locator File for both the old and new stock number IAW appendix E-079 P.

(4) Update the Item Data Locator File IAW appendix E-071 P.

(5) Remark all stock, locations, and containers to the correct stock number; rewarehouse materiel if required.

b. When inspection reveals materiel in stock has no NSN identification, or no established NSN can be assigned thereto, the depot will:

(1) If the unidentifiable materiel has an estimated dollar value of $100 or less, a DD Form 1225 is not required. Prepare a DD Form 1348-1 (appendix C-11) to ship the materiel to the Property Disposal Officer. A document number will be assigned by the depot and the stock number field may contain the manufacturer's part number, manufacturer's code, or other assigned control number to locally identify the item. The disposal action will not be reported to the DSC/ICP but a copy of the DD Form 1348-1 will be filed for 6 months as a reference in the event DSC/ICP queries concerning unidentified materiel are received.

(2) If excess of $100, a DD Form 1225 will be prepared and forwarded to the DSC/ICP. The DD Form 1225 will contain as much descriptive information as possible to include item nomenclature, application, or use, physical dimensions, composition, finish, lot number, contract number, manufacturer's code, and part number. The materiel will be segregated and placard awaiting disposition or identification instructions from the DSC/ICP. If DSC/ICP cannot be determined, an inquiry will be made to DLSC files to obtain data relative to the NSN and/or the manager of an item.

c. When requested by the DCS to correct the NSN or UI on stock (recent receipt) where there is a change which has occurred between the time that the original documentation was forwarded to the depot and the materiel was received and reported to the DSC. Change records and remark/repackage stocks to the correct NSN or UI upon request. Notify DSC when project is completed.

SECTION IV - SUPPORT DOCUMENT FOR INVENTORY ADJUSTMENT VOUCHERS

305401 - GENERAL

a. DSC/ICPs are required to review and research adjustments to the accountable records as a result of special and complete physical inventories. Documentation resulting from the research is included as part of the Inventory Adjustment Voucher.

b. In the event of inventory losses or gains for narcotics, security classified items, and when there is evidence of fault or neglect, a DD Form 200, Report of Survey (appendix C-6), or comparable service form is required to support the voucher. When requested by the DSC/ICP, this supporting documentation will be prepared and processed IAW DLAR 7500.1.

SECTION V - ADJUSTMENT DOCUMENTS FORWARDED TO DSC/ICPs

305501 - PROCESSING VIOLATION NOTICES

a. Materiel Adjustment Cards forwarded to the DSC/ICP by the depot are mechanically edited for correctness and validity of data by the DSC/ICP and cards containing incomplete or invalid data are rejected as violations.

b. Those violations which cannot be corrected by the DSC may result in an inquiry to the depot, the forwarding of information regarding the violation to the depot, or a request to resubmit the original transaction correctly.

c. Dependent upon the type error and the assistance required by the DCS/ICP, the depot will research the source document and prepare and forward requested information or corrected Materiel Adjustment Card to the DSC/ICP.

SECTION VI - CLASSIFICATION SUSPENSE RECORD

305601 - GENERAL INSTRUCTIONS

The provisions of chapters 3 and 70 of this manual apply to the processing of the adjustment documents by the depot.

305602 - MATERIEL ADJUSTMENT DOCUMENT (DD FORM 1487)

a. The DD form 1487 (appendix B-22, DIC ZAC) will be mechanically generated for those certain materiel receipt transactions which result in placing materiel in condition status D, E, F, G, J, K or L. This process is covered by appendices D-69 and D-70.

b. For such materiel receipt transactions, a Materiel Adjustment Card, DIC ZAC, will be received, processed IAW appendix E-022 P, and used for reinput after classification is completed.

c. For Inspection/Surveillance Transactions, when the DSC has been notified of the materiel adjustment, an Inspection/Surveillance Test Notice, DIC ZCO (appendix B-116) with Condition Code J in pos. 65 will be received, processed IAW appendix E-116 P, and used for reinput after classification.

d. The DIC ZAC with Action Code RA will be manually prepared for an item discovered in-storage with latent defects to place materiel in condition status L. Input of ZAC transaction as covered by appendix D-63, will establish Record, and a Materiel Adjustment Card, DIC ZAC with Action Code RD will be received, processed IAW appendix E-022 P, and used for reinput after classification is completed.

305603 - CLASSIFICATION SUSPENSE REPORT

a. The Classification Suspense File (CSF) will contain records of NSNs suspended in nonissuable Condition Codes D, E, F, G, J, K and L. The Classification Suspense Report, F-022, will be printed weekly and will display all CSF records established on the file.

b. The CSF will continue to display the records as outlined in subparagraph a above until reclassification to other than Condition Codes D, E, F, G, J, K or L or until the record is deleted.

c. Location data will be represented on the report when this information is available either through a receipt action processed in Condition Code D, E, F, G, J, K or L, or when a record on file was prepared from an Inspection Surveillance Test Notice, DIC ZCO Record added to the file via the Materiel Adjustment Card, DIC ZAC, will not display location data unless this data is entered by separate/additional DIC ZAC, Action Code RB update.

d. The depot, on receiving the report, will initiate followup action on those items listed.

305604 - CLASSIFICATION SUSPENSE DELETE CARD

a. The Classification Suspense Delete Card, DIC ZHW (appendix B-74) is manually prepared by the depot to clear a transaction suspended on the Classification Suspense File. Clearance of file may be required because materiel in Condition D, E, F, G, J, K or L has been shipped or entry was made in error.

b. The delete document is prepared by extracting data from the MRO and attached copy of DD Form 1225. The document number of the original transaction, as shown on Classification Suspense Report (appendix F-22) will be shown in pos. 30-44 for materiel in Condition D, E, F, G, J, K or L which was placed in suspense as a result of receiving activity.

c. The delete document is prepared by extracting data from the Classification Suspense Report (appendix F-22) for all other delete actions and will reflect the warehouse location in pos. 46-54, in lieu of document number in pos. 30-44.

CHAPTER 6

LOAN OF DLA STOCK FUND MATERIEL

SECTION I - GENERAL

306101 - PURPOSE AND SCOPE

This chapter prescribes responsibilities and procedures for issue and return of Loaned DLA Stock Fund Materiel. Military Services are authorized to submit requisitions to DSCs for loan of DLA material for such purposes as maneuvers and so forth. The DSC will provide an MRO to the defense depot.

306102 - REFERENCES

Basic policies governing the loan of DLA stock fund materiel are contained in DLAR 4140.27.

306103 - RESPONSIBILITIES

Directorate of Storage and Transportation is responsible for:

a. Accomplishing shipment of materiel as directed by MROs.

b. Processing receipt of loaned materiel upon completion of use by customer.

306104 - INPUT DOCUMENTS

a. DSCs will provide defense depots with MRO, DIC AS_, appendix B7, and Prepositioned Materiel Receipt Card (PMRC) DIC DWN appendix B-19.

b. MROs and PMRCs will contain a Project Code and will reflect Purpose Code A.

c. DSCs will also provide depots with written instructions concerning return of materiel, e.g., condition acceptable, reporting of damages, method and location of inspection, disposition of materiel of other than serviceable, repairing depot if repair needed, or any other instructions necessary to cover the receipt of returned materiel.

306105 - OUTPUT DOCUMENTS

Defense depots will furnish DSCs with:

a. Materiel Release Confirmation, DIC ARO, appendix B-14, at time of shipment.

b. MRC, DIC D6N, appendix B-21, upon receipt of materiel at the end of the loan period.

c. SF 364, appendix C-36, if returned materiel is classified into condition H (condemned) and when DSCs request data concerning repair and cost for unserviceable materiel.

306106 - CODES

a. A Project Code will be assigned by the DSC to be used in both issue and receipt documents; defense depots will perpetuate this code.

b. Purpose Code A will be reflected in issue and receiving documents and defense depots will perpetuate this purpose code.

306107 - RECORDS

Since MROs for shipment and Materiel Receipt Document for receipt of loaned materiels are identical to other issue and receipt documents, normal computer records, e.g., MRO files and PMRC files will be utilized.

SECTION II - ISSUE TRANSACTIONS

306201 - SHIPPING PROCEDURES GENERAL

a. MROs for loan will be processed in accordance with chapters 4 and 60.

b. MROs for loan will normally contain exception data in the form of in-the-clear shipping addresses and transportation appropriate charges.

306202 - EXCEPTION DATA

MROs containing exception data will be processed in accordance with appendix E-007 P.

306203 - SHIPMENT OF LOANED MATERIEL

a. Stock selection, packing, and storage updating of MRO suspense files will be in accordance with chapter 60.

b. Transportation charges may be paid by the customer. In this event, a Commercial Bill of Lading will be prepared citing the information in the remarks block of the DD Form 1348-1.

c. If DLA is paying for transportation and normal GBL is to be issued, the GBL and Continuation Sheet will be prepared as indicated in appendix E-095 P, and normal DLA stock funds will be cited unless specific appropriation is cited in the remarks block of the DD Form 1348-1.

SECTION III - RETURNS

306301 - RECEIVING GENERAL

a. PRMC DIC DWN received from the DSC will be added to the PMRC File referenced in chapter 3. Document will contain the Loan Project Code and cite Purpose Code A.

b. Specific Manual Instructions concerning condition of returned loaned materiel will be maintained in the Receiving Activity Manual File, when received from DSC, until receipt of materiel. Such documentation will include return instructions issued to borrowers, and appropriate guidance for classifying returned materiel and reporting damages, loss, and cost of repairs and renovations.

306302 - PROCESSING RECEIPT OF LOANED ITEM

a. Physical Receipt Processing, including location and PMRC inquiries, will be performed in accordance with appendix E-047 P.

b. The receiving activity, in addition to normal receipt processing, will:

(1) Inspect materiel in accordance with the instructions received from the DSC. Depot will not process return of loaned inventory until classification has been completed.

(2) Prepare SF 364 if materiel is classified into Condition H (condemned) or other unserviceable conditions at the instructions of the DSC.

(3) Assure that manual generated MRC indicates the Project Code as cited on the receiving document, use DIC D6N and Purpose Code A.

CHAPTER 7

PHYSICAL INVENTORY PROCEDURES

SECTION I - GENERAL

307101 - PURPOSE

This chapter prescribes policies, responsibilities, and procedures for conducting physical inventories of materiel stored at distribution activities.

307102 - SCOPE

This chapter is applicable to the Directorate of Storage and Transportation (DS/T) and Data Processing Elements (DPE) of defense depots.

307103 - BACKGROUND

a. Basis for Physical Inventory:

(1) Effectiveness of materiel procurement, distribution, and overall supply management is contingent upon the accuracy of stock records and related financial records maintained by DSCs and location records maintained by distribution activities. Since stock records maintained by designated organizational units are updated on a continuous basis as issues, receipts, and adjustments occur; and, since physical stocks are subject to movement and handling within defense depots, it is recognized that an incidence of error will develop to the end that records and physical stocks are not in agreement. Accordingly, periodic physical inventories are required to establish the validity between assets and accountable records.

(2) The primary purpose of counting property is to reconcile the stock record balance with the actual quantity on hand. Since this process is usually time consuming, costly, and often delays customer service, certain objectives must be reflected in policy decisions.

(a) Inventory supervisory personnel must be highly competent, fully trained, and employed on a full time basis. Inventories will be conducted by personnel under their supervision.

(b) The time period that an item is under inventory must be kept to a minimum.

(c) The method and procedures adopted must reflect minimum overall costs consistent with the mission.

(d) Systems error growth must be recognized and action initiated to reduce errors to acceptable standards. System errors detected should cause remedial actions to be taken to preclude recurrence. The objective of an error free inventory program can only be achieved by the continuous elimination of conditions that cause imbalances between physical and accountable records.

(e) Customer service must be uninterrupted and effective.

b. Inventory Sampling:

(1) Conceptually, the adoption of statistical quality sampling into the physical inventory program is a recognition of the acceptability of proven quality control techniques in the inventory process. The basic principles upon which the successful execution of the program is based are:

(a) The science of testing, through random sampling, to determine the degree to which the characteristics of the whole meet the prescribed conditions or standards desired.

(b) The conduct of penetrating analysis of the facts uncovered and the attendant action required to prevent recurrence of below standard performance.

(2) The ultimate goal of the entire program is to maintain a high plane of effectiveness to the end that stocks on hand equate with the recorded quantitative balances, within acceptable standards.

307104 - POLICY

a. All materiel (excluding stocks in Condition Codes H and K) will be scheduled for inventory with the frequency and using the method outlined below. Inventory lots will be constructed to permit "one day counts" by distribution activities.

(1) A closed quarterly inventory will be conducted of all drug abuse and sensitive items to include narcotics, precious metals, alcohol, wine, whiskey, and brandy. Items are identified by Inventory Category Code (ICC) U.

(2) A complete annual inventory will be conducted on all items listed below, regardless of demand frequency or dollar value. Items are identified by ICC E.

(a) Security classified items.

(b) Major assemblages (those stock numbered items that contain several separately stock numbered components, e.g., hospital assemblages). Do not include low-cost items such as tool kits.

(c) Serially numbered items when control is maintained by serial numbers.

(d) Pilferable items.

(3) A complete annual inventory will be conducted on all high dollar items. A high dollar item is defined as any item having three or more annual demands and an annual dollar demand of $4,500.00 or more. Items are identified by ICC H.

(4) As a minimum, a closed inventory will be conducted of all nonperishable subsistence items annually, except DICOMSS Brand Name Resale residual items, which will be conducted at least semiannually. Items are identified by ICC H and Commodity Manager Code S.

(5) A sample inventory will be conducted triennially on all low dollar items. One-third of the items, by FSC, will be inventoried each year. Low dollar items are defined as all items having:

(a) Forty annual demand frequencies and an annual dollar demand value of $1,399.99 or less. Item assigned ICC T.

(b) Three annual demand frequencies and an annual dollar demand value of $1,400.00 to $4,499.99. Item assigned ICC L.

(c) All other items not falling into above categories. Item assigned ICC O.

b. Inventories will be on an open basis except as prescribed in subparagraph a(1) and (4) above. MROs will be held in MRO Workload Bank or released based on criteria in paragraph 307903. Inventory Monitor will review daily the MROs held and release MROs in sufficient time to assure that the RDD is met.

c. Physical inventories of DLA material need not be scheduled or accomplished during the calendar year preceding any planned movement or attrition of stock, or any planned closing, with the exception that items logistically transferred to the GSA will be subject to a physical inventory within a period of 120 days prior to effective transfer date.

d. Where an item is scheduled for inventory and undergoing a catalog change NSN Manager, or unit of issue during the same period, the item will be released from inventory and rescheduled at a later date.

e. Receipt of a property dispcsal transaction at the distribution depot when the NSN is scheduled for inventory, will cause the inventory to be canceled and rescheduled at a later date.

307105 - RESPONSIBILITIES

Directorate of Storage and Transportation will:

(1) Plan and schedule inventories and location reconciliations in coordination with the applicable DSCs.

(2) Develop and establish training programs in order to ensure the proper training of inventory personnel. Training conducted will include both formal classroom and on-the-job instructions.

(3) Establish necessary procedures to ensure continued/controlled processing of issue, receipt, and adjustment type documentation during the taking of physical counts.

(4) Perform counts on a 1-day schedule.

(5) Input counts to computer in a timely manner.

(6) Prepare and submit reports to HQ DLA, ATTN: DLA-OSC as required.

(7) Cancel inventories stored in the computer, if required, utilizing card input DIC ZAS, Inventory Cancellation Card (appendix B-70) for processing IAW appendix D-6.

(8) Review Inventory Count Comparison and Sample Inventory Analysis reports and the results of quality control checks, performed as prescribed by chapter 1, this manual, to isolate causes of record imbalance and assure corrective action is taken.

307106 - TYPE OF PHYSICAL INVENTORY CODE

In order to permit identification of the type of inventories being conducted, a "Type of Physical Inventory Code" is provided to identify various types of cyclic and special inventories. These codes are outlined in appendix A-18. To amplify the MILSTRAP Type of Physical Inventory Codes, an Inventory Management Code (appendix A-13) has been developed which tells why and by whom the inventory action is being taken.

307107 - INVENTORY CATEGORY CODES

a. In order to facilitate the identification of items to be included in annual versus quarterly or triennial inventory schedules, a code has been developed and applied by DSCs to all NSNs within their management records. These codes are outlined in appendix A-54. Annually (as of 30 June) DSCs will provide the Item Data Bank (DDMP) with all ICCs other than 0 in the format of appendix B-130. Changes should arrive at DDMP no later than 9 July each year. All changes resulting from receipt of the above transactions will be distributed to each depot, who is a recorded user of that NSN, no later than 15 July each year.

b. Except for sensitive, drug abuse, or pilferable items, new items coming into the DLA Distribution System between the period of annual update will be automatically coded by Item Data Bank as Category Code 0. This action is necessary pending accumulation of demand experience. Category Codes E and U will be assigned on a case-by-case determination by the DSC.

c. When an existing item is assigned a newly developed NSN, the ICC assigned under the old/deleted NSN will apply. When a single NSN is replacing a number of items assigned different ICCs, the ICC indicative of the highest annual demand previously assigned will apply. For this purpose, the sequence of priority assignments will be H, L, T, and 0. Category Codes E and U will be assigned on a case-by-case determination.

d. Changes to ICC other than prescribed above will not be made.

307108 - PHYSICAL INVENTORY COUNTS

Inventory counts will be recorded on Service/Agency prescribed forms, prepared as outlined in appendix B-25, under DIC ZKA, utilizing a separate

count card by condition (Type of Pack subsistence) for each warehouse location. For control purposes, a 6-digit control number will be assigned by mechanical processes.

307109 - WAREHOUSE COUNT

DSCs may request a warehouse count by telephone, teletype, or letter, when the required information is urgent. Defense depots will perform this count without delay and will reply by telephone, teletype, or letter, as appropriate. All such requests will require approval of the DSC Inventory Monitor. A listing of DSC personnel authorized to request warehouse counts will be provided to the appropriate distribution activity and maintained in a current status by the DSC. No records will be adjusted based on the results of this count.

SECTION II - PREINVENTORY ACTIONS

307201 - RECONCILIATION OF LOCATOR RECORDS WITH DSC RECORDS

In order to sustain maximum effectiveness in day-to-day operations, and at the same time achieve the desired results of physical inventories, reconciliation of defense depot locator record files with DSC inventory balance records will be accomplished as prescribed in chapter 72. A complete reconciliation of locator records with DSC records will be accomplished at least once quarterly. More frequent reconciliations may be made if schedules can be arranged with the appropriate DSC. (The complete reconciliation of locator records and DSC records will only be accomplished between DLA depots and DSCs which are not utilizing the SAMMS system. As the DSCs implement SAMMS, they will no longer make depot locator and DSC reconciliations.) The locator and Depot Balance/Transaction Register (DB&TR) will be matched daily. Locator updates (resulting in first adds or last deletes, NSN, Manager, Unit of Issue Condition Code, or Type of Pack changes) will be passed to the DB&TR subsystem. When the DB&TR Balance File goes to zero it will be flagged to indicate that a last locator delete action should process. If a last locator delete action does not process or the balance does not go positive, a disagreement exists between the DB&TR and the locator. Disagreements will result in either physical inventory or correction of the DB&TR balance record. This will cause the DB&TR and locator subsystems to be in agreement.

307202 - RECONCILIATION OF LOCATOR RECORDS WITH OTHER ICP RECORDS

DS/T will conduct reconciliation of locator and ICP records with activities other than the DSCs at least annually. Reconciliation will be conducted as outlined in chapter 72.

307203 - PREINVENTORY CLEANUP

a. Prior to the conduct of inventories, actions will be taken by DS/T to ensure that physical conditions are made ready for the count. As a minimum, this will include the following:

(1) Accomplish required rewarehousing actions to include consolidations of stock locations where feasible, and updating of locator records.

(2) Ensure proper identification of storage locations and materiels in locations.

(3) Establish closed stacks, where appropriate, for inventory purposes. A closed stack placard, containing identification and item count, will be prominently displayed on each closed stack.

(4) Ensure that no containers are open in storage.

(5) Ensure uniformity in pallet patterns and container quantities.

(6) Ensure that marking on containers is legible and visible.

(7) Ensure that NSNs in stacks or on pallets are not commingled.

b. Maximum effort will be exerted to accomplish the movement of materiel directed by preinventory documents prior to counting.

307204 - INVENTORY CUTOFF DATE

The cutoff day is the date that all preinventory actions must be completed. Close of Business (COB) on cutoff date is that point in time when all transactions affecting an inventory should have been posted with the resulting balance furnished the distribution activity via Inventory Balance Notification Card (CKE), appendix B-166. Exact cutoff dates will be assigned by the defense depot in accordance with approved schedules. DSCs may assign cutoff date when an urgent requirement exists for a special inventory. Defense depots and supply centers must adhere to established dates in order that accountable balances, as reflected at the conclusion of business on the cutoff date, can be used for comparison with the count and, if applicable, subsequent inventory adjustments.

SECTION III - INVENTORY SCHEDULING

307301 - INVENTORY ITEM CATEGORIZATION FOR SCHEDULING

a. DSCs will determine items that are subject to annual and triennial inventory based on available system-wide demand data. DSCs will furnish the Item Data Bank cards in accordance with paragraph 307107. The Data Bank will transmit this data to defense depots.

b. Changes for other than DLA items will be made with appendix B-130, DIC ZEP by defense depots.

c. The above actions are required prior to the preparation of appendix F-8, Locator Inventory Analysis, which is used in preparation of annual inventory schedule.

307302 - PREPARATION OF INVENTORY SCHEDULE

a. The Inventory Office, DS/T will prepare an annual inventory schedule, DLA(A and AR)450(0), in the format of C-67 for the conduct of all inventories. This schedule will enable the DS/T, in coordination with the DSCs to perform physical inventories in an orderly and timely manner.

b. In order to prepare this schedule, appendix F-8, Locator Inventory Analysis is required. This listing will be obtained via card input DIC ZEU, Inventory Analysis Request Card, appendix B-132.

c. The schedule will group the depot stocks into lots of comparable size, which can be counted in one day. A lot may be a single NSN or Federal Supply Class or an aggregation of several NSNs, Federal Supply Classes, or Groups. Insofar as possible, all aggregate classes or groups should reflect like class or group activity and other conditions so that lots will be homogeneous. Lots will contain only those FSCs assigned to one DSC.

d. It is emphasized that the size of each lot is a key consideration under the open inventory method, i.e., active items lots should be relatively smaller than inactive item lots to equalize the transaction workload and expedite completion of physical inventories.

e. High dollar items and items exempt from sample inventory, identified by ICC H, will be scheduled for a complete annual inventory.

f. Sensitive and drug abuse items will be scheduled for a closed quarterly inventory. Items are identified by ICC U.

g. The Annual Inventory Schedule will contain an estimate of specials to be performed based on the number of like inventories actually required due to preceding Location Reconciliations.

h. Nonperishable subsistence items will be scheduled for a closed annual inventory.

i. Low dollar items will be scheduled for sample inventory on triennial basis with one-third of the items, by NSN and ICC, being scheduled for each of the three years. Items are identified by ICCs T, L, and O.

j. Annual schedule will consider the requirement to schedule in the next quarter a complete inventory of all items represented in the sample lot which failed to meet acceptable standards.

k. Physical inventories of DLA materiel will not be scheduled during the calendar year preceding any planned movement or attrition of stock or any planned closing of a storage site.

l. Schedules will be prepared and coordinated with the applicable DSC. Mutually agreeable periods of count for the inventories will be established prior to 15 August each year. Two copies of the inventory schedules will be forwarded by 1 September of each year to the appropriate DSC.

best copy available

SECTION IV - WORKLOAD PLANNING

307401 - WORKLOAD BANK

a. Control of workload and in-float documentation is vital to the accuracy of inventory records. A Workload Bank is established for scheduled workload and special requests received from DSCs.

b. Based on established schedule, the Workload Bank will be loaded by input of a B-67 Inventory Workload Establishment Card with items to be inventoried within the next 30 days. Special requests from DSC will move mechanically into the bank.

c. All data necessary to complete inventory will be contained in the bank. For planning use, the data will be displayed in three parts; part 1 by FSC, part 2 by Inventory Cutoff date, and part 5 by NSN (part 5 is an inquiry into the Inventory Workload Bank), appendix F-16.

307402 - WORKLOAD PULL

a. Based on resources available and workload requirements, daily workload pull cards (appendices B-90 and B-91) will be prepared. Cutoff day must be at least five days in the future. Should workload pull be activated more than five days prior to cutoff date, the locator will not become flagged and document control (MROs and receipts) will not commence until five days prior to cutoff date regardless of date the NSN is activated. DSCs will be notified of pending inventory by generation of a CK5 card (Inventory Notification Card) to the DSC except for special inventories where the DSC has established the cutoff date.

(1) Unless volume of mismatches from the locator reconciliation program precludes a rapid inventory action, all actions in the Inventory Workload Bank resulting from reconciliation mismatches should be activated within six days from date established.

(2) All other inventories should be initiated within 30 days from date record was established on Inventory Workload Bank.

b. Mandatory action dates must be considered and workload pull should be activated on or before these dates. Mandatory action dates are determined by adding 30 days to the date the record was established on the Workload Bank.

(1) All actions in Workload Bank, as a result of reconciliation mismatches, will have a mandatory action date of six days from date established.

(2) All other inventories will be initiated by the depot and the mandatory action date will be 30 days from the date of establishment in the Workload Bank.

c. DSC-initiated special inventories will be automatically released from the Workload Bank in the same cycle they enter the bank, unless there are not five days remaining until the cutoff date selected by the DSC. Thus, those special inventories arriving six days prior to cutoff date will represent unplanned

workload requirements for that cutoff date. Resources should be reserved for these inventories, based on experience. DJAs processed through the Workload Bank will appear on the Forecast of NSNs to be Inventoried, appendix F-122, and will be identified as free-flowing inventories. When pulling workload for a specific cutoff date, F-122 should be examined to determine if an unusual number of DJAs for that cutoff date were processed. The possibility of a resulting carryover of workload should be considered when allocating resources and pulling workload for the following cutoff date.

d. When the last location has been deleted for an NSN and condition and the DB&TR balance file indicates a positive balance, a DIC ZJA will be created with Type Inventory Code C and Management Code A. The DB&TR positive balance also indicates the DSC has recorded a positive balance. To get the records and the materiel to agree, input of a ZJA will establish an inventory with the inventory cutoff day six days from current day. Also, any MRO in the bank for this NSN and condition will be denied.

e. Inventory cutoff day will automatically be established six days from current day for all inventories with Type Inventory Code C and Management Code B, and also for inventories of non-DLA items.

SECTION V - DOCUMENT CONTROL

307501 - INVENTORY DOCUMENT CONTROL

a. Control of documents against items being counted during the inventory cycle is vital to the accuracy of inventory records. In-float documentation must be considered during the physical count to preclude incorrect inventory adjustments.

b. An Inventory Document Control (IDC) File is established to record all open preflag MRO and receipts and other preinventory transactions occurring after an NSN has been flagged as being under inventory. Positive actions must be recorded in the IDC File for each recorded action prior to count day. Lack of response will cause non-acceptance of first counts when processed to the inventory system. The IDC File is on line each working day to receive positive status on open transactions via a teleprocessing unit (remote). The updating of open receipt and MRO records will be accomplished IAW procedures outlined in appendix E-190 P. The IDC file will also be mechanically updated when a cancellation, denial, or adjustment is made to an MRO with a NSN under inventory; or when an MRO is offered to transportation on or before inventory cutoff day.

c. Appendix F-108, parts 1 and 2, will be prepared to reflect open receipt documents which are in-process and must be controlled during the inventory. Preflag receipts will appear two days before cutoff day and receipts having date of receipt on or after flag day will appear one day before cutoff day. The documents reflected on this listing should be stowed before physical count is made. The receipt update process into the IDC File is accomplished mechanically as a result of receiving, stowing, and confirmation actions,

except in cases where a receipt will be held in receiving division until completion of the inventory or the identity of a placarded receipt cannot be retained.

d. On the date the NSN is flagged for inventory, appendix F-72, Open Preflag MROs four days old or older, will be prepared to reflect all MROs in an open status in the Shipment Unit File. MROs released for picking action, after the NSN has been flagged, will be recorded in the IDC File for control. Suspended MROs will appear on appendix F-120. A Subsequent report, appendix F-108, part III, IDC Record on Cutoff Day will be produced after the last processing cycle prior to the Inventory Cutoff Date. All MROs will be held in MRO Workload Bank or released based on criteria in paragraph 307903.

e. Adjustment Documents (DAC) processed while the Locator File is flagged, will be rejected for review and/or continued action if the accuracy of the inventory is not affected.

f. DROs on hand or received after the locator is flagged will cause the inventory to be canceled. Receipt of a Storage Item Change Notice which changes the NSN Manager or UI will also cause the inventory to be canceled. Also, receipt documents having a date of receipt before flag day which are still open after cutoff day will cause the inventory to be canceled.

SECTION VI - INVENTORIES

307601 - SPECIAL INVENTORY

a. Physical Inventory Request Cards, with DIC DJA prepared as outlined in appendix B-26, will be initiated by DSCs and transmitted to defense depots to request special inventories. When an inventory of a specific condition and type pack is desired, the condition code will be entered in pos. 71 and type pack in pos. 22. If inventory is to include all conditions and type pack, pos. 71 and pos. 22, will be blank.

b. Physical Inventory Request Cards, DIC DJA, appendix B-26, received for an NSN already undergoing inventory of any type or containing erroneous data entries will cause a Inventory Reject Card, DIC CK4, appendix B-47, to be generated and returned to the DSC. Rejected DJA cards will be reported on F-85 report.

c. Valid DJA cards will be entered into the Workload Bank and automatically activated in the same cycle. DJA cards processed into the Workload Bank less than five days prior to the DSC assigned cutoff date will be rejected using a DIC CK4. The DJA cards entered into and activated from the Workload Bank will be identified as such on the Forecast of NSNs to be Inventoried, appendix F-122.

d. Count card preparation, control, and counting will be the same as for all inventories as outlined in paragraph 307604.

307602 - SAMPLE AND COMPLETE INVENTORY

a. Sample and complete inventories will be scheduled based on criteria set forth in paragraphs 307104 and 307302.

b. The Inventory Workload Bank Card, prepared as outlined in appendix B-67, will be input to establish the inventory in the Workload Bank. Input is processed IAW appendix D-7. Card will be entered at least 30 days prior to the planned inventory date.

c. Sample inventory sizes will be selected based on maximum size shown in appendix C-21. In the event a sample size is selected and placed in the Workload Bank and upon subsequent inventory activation fails to meet appendix C-21 maximum/minimum size range, it will be canceled (DIC appendix B-70), and a new sample inventory established. The DSC Inventory Monitor will be advised of this action. Conversely, DSCs subject CK5 transactions to edit and validation. If number of CK5 rejects exceeds minimum sample size range, sample inventory is to be canceled and a new sample inventory scheduled.

d. Upon input of workload pull card, appendices B-90/91, the computer will flag locator records for items selected for inventory and generate Inventory Notification Cards, DIC CK5, appendix B-29, for submission to the DSC. The CK5 is subsequently used by the DSC to strike balances on the inventory cutoff date.

e. Count card preparation, control, and counting of the sample inventory is the same as that for all inventories as outlined in paragraph 307604, except that a Lot Number will appear in count cards and summary count cards to identify those counts representing the sample inventory. This control is required to determine if the sample passed or failed, when DSC reviews the results of inventory.

307603 - CLOSED INVENTORY

a. Items identified in paragraph 307104a(1) and (4) will be inventoried by closed inventory method.

b. A closed inventory is that type of inventory where all transactions are frozen or suspended from cutoff date to completion of count and reconciliation of adjustments.

c. Annual schedule will contain the following agreed upon dates by both DSC and depot:

(1) Date MROs will cease going to depots.

(2) Date depot will commence holding receipts and discontinue submission of denials and change of condition.

(3) Period of time in which the inventory will be taken.

d. The Inventory Workload Bank Card, appendix B-67, will be input to establish the inventory in the Workload Bank. Input is processed IAW appendix D-7. Card will be entered at least 30 days prior to planned inventory date.

307604 - COUNT CARD PREPARATION CONTROL AND COUNTING OF INVENTORY

a. By COB on the day after cutoff date, computer prepared count cards, DIC ZKA, appendix B-25, will be received by DS/T for each location established for NSN to be inventoried.

b. Each count card will be serially numbered by the computer and count card summary listing, appendix F-11, will be provided DS/T for internal control purposes. Count cards will be sequenced based on depot option selected as outlined in appendix B-66.

c. DS/T will normally begin counts on the first workday after the established cutoff date. Priority must be given to counts with suspended MROs and multiple counts in both bin and bulk. Result of counts will be entered via teleprocessor (remote) on an expedited basis. Computer will continuously match counts, DSC balance and release inventory, and/or suspended MROs when records match. Inventory Monitors will review via the remote all discrepancies and direct a second or third count as required. A depot option is provided to set the acceptable limits under $800.00 for each Commodity Manager, by which the computer will automatically accept counts. This does not apply to ICC E and U items with Physical Security Code J, Q, or R.

307605 - CANCELLATIONS

a. The computer will automatically cancel an inventory when one of the following conditions exist:

(1) Receipt of catalog change notice which changes the NSN Manager or UI.

(2) Receipt of a property disposal transaction.

(3) Reject of CK5 card from DSC when inventory cannot be completed as scheduled.

(4) When there is an open preflag receipt on the IDC File after cutoff day.

(5) Receipt into the IDC File of a Materiel Receipt Confirmation (MRC) having a matching TP Control Number but which does not match existing Condition and Type Pack Codes.

(6) Attempting to break a placarded receipt which was previously being held in Receiving Division until completion of inventory after the count adjustment action has been completed for that NSN, Condition, and Type Pack.

(7) Attempting to enter a Status Code 1 (indicating receipt will be held in Receiving Division until completion of inventory), and count adjust action has been completed for that NSN, Condition, and Type Pack.

(8) When an inventory is still open, 15 days after cutoff day, it will be automatically canceled. (Eight days after cutoff day, an F-140 listing is produced which indicates that the inventory will be canceled if it has not been completed.)

(9) If an NSN under inventory is a non-DLA NSN and an issue/receipt transaction is in process, or comes in process, the inventory for that NSN will automatically cancel. There is no document control between an ICP and a DLA Depot for an NSN under inventory and therefore, no feasibility to adjust a count if these documents pass into the system.

(10) If an MRO processes and has a document number identical to an MRO currently in the IDC File, the inventory for the NSN will automatically cancel.

(11) When a downgrade or upgrade action is encountered (Condition Code Changes).

b. Inventory Monitor may cancel a scheduled inventory of a specific NSN or FSC by input of ZAS card (appendix B-70). Cutoff date cannot be amended, if cutoff date is to be changed, the inventory must be canceled and rescheduled through the Inventory Workload Bank.

307606 - INVENTORY NON-DLA ITEMS

The standard MOWASP Inventory System will be used to inventory non-DLA items. The inventory will be initiated at the depot through input of a Physical Inventory Request Card, appendix B-26, DIC DJA. There is no strike balance from the ICP so no adjustment will be made to the depot count. Any transaction (issue or receipt) which processes while the NSN is under inventory will cause the inventory to be canceled. When the inventory has been completed the Physical Inventory Count Card, appendix B-25, DIC DKA, will be produced as a hard card to be mailed to the ICP.

307607 - INVENTORY DELETED ITEMS

Items which have been deleted by a Storage Item Change Card will be inventoried through the standard MOWASP Inventory System. These items will be automatically loaded into the Inventory Workload Bank on the 7th day of the month following the effective day of the delete action. A check will be made with the shipping process for a disposal action. If there is a Disposal Release Order in process the item will not be loaded in the Inventory Workload Bank, and if a DRO processes into the system for the item after the inventory procedure has started, the inventory will be canceled (as is currently done with any other item). When the inventory has been completed, a DIC CK8, appendix B-33, Deleted Item Report and Reply Card, will be forwarded to the DSC/ICP in lieu of a DIC DKA.

SECTION VII - RESEARCH

307701 - INVENTORY RESEARCH

a. An important part of the physical inventory activity is the determination of system procedural deficiencies. The following reports are generated by the inventory programs:

(1) Discrepancy Evaluation Listing (F-7) - This is the key report in the total program and it can be displayed on the remote or printed in hard copy.

(2) Inventory History:

(a) F-98, Part I - This listing is created by input of DIC ZAT. It contains inventory history data for all inventories taken since the last F-98, part II was produced, including transactions for discrepancies $800.00 and over, and NSNs with ICC E or U. Inventory history for discrepancies $800.00 and over and NSNs with ICC E or U will be retained until next inventory.

(b) F-98, Part II - This listing/microfiche is automatically created monthly for inventories 30 days or more old. It contains inventory history data for all inventories.

(3) Inventory Count Comparison (F-110) - This report will compare first, second, and third counts against DSC strike balances and report the percent of acceptance.

(4) Analysis of Sample Inventory (F-102) - Will list number of errors in sample counts and provide data as to pass or fail of sample inventory.

(5) Inventory Cancellations Control (F-117) - This report will list all count cards that have been canceled and by whom.

(6) Inventory Cancellation from Manager (F-117) - This report will list all cancellations received for which count cards have not been generated.

(7) Open Count Cards (F-17) - This report will list all count cards which have not been processed through count card update procedures three days after inventory cutoff date.

(8) Delinquent Inventory Listing (F-140) - This listing reflects all inventories for which no Summarized Count Card (DKA) has been forwarded to the center (open inventories) eight days after inventory cutoff day.

b. The above reports will be utilized by personnel of DS/T to develop trends and recommend changes to the functional manager when inventory results are below acceptable standards.

c. Inventory Adjustment Vouchers (IAVs) are reviewed by DSCs to determine causes and responsibility for the discrepancies. When appropriate, the DSC

will forward a copy of the approved IAV to the distribution activity, pointing out areas where deficiencies in storage appear to exist. Corrective action will be taken by DS/T to prevent recurrence.

SECTION VIII - REPORTS

307801 - INVENTORY REPORTING

DS/T will submit quarterly progress reports to HQ DLA, ATTN: DLA-OSC on DLA Form 1377 to arrive NLT 15 days subsequent to period covered. This report will be submitted with a Narrative Evaluation Report of Inventory and Location Reconciliation, highlighting areas of unsatisfactory performance, contributing circumstances and conditions and appropriate corrective actions initiated. In addition, a copy of each appendix F-250 (MOWASP) will be submitted as an enclosure to the report. Procedural guidance for preparation of the report is contained in appendix E-027 P.

SECTION IX - MISCELLANEOUS

307901 - WAR EMERGENCY SUPPORT PROCEDURES FOR SCHEDULED INVENTORIES

During war emergency conditions, upon direction of HQ DLA, scheduled inventories may be suspended indefinitely. During such a period, special inventories as prescribed in section VI will be used for any stock investigation actions required to reconcile accountable records.

307902 - RETENTION OF RECORDS REQUIRED FOR INVENTORY RESEARCH AND EVALUATION

a. It is necessary that records in support of inventories and actions directly affecting inventories such as location surveys, receipts, and denials be readily available to facilitate inventory recounts, analysis, and research required by letters of investigation and reports of survey. Record retention periods prescribed below are minimum. The procedures for the disposition of files based on standards for specific time periods as set forth in DLAM 5015.1, will be followed.

b. The following records will be retained as indicated (exclusive of ICC E and U items, which have a mandatory two year retention period):

(1) Transaction History (MROs and denials) - one year from date of final action.

(2) Receipts - one year from date of receipt (see note below).

(3) Location Establishment/Deletion History - six months.

(4) Location Survey and Reconciliation Results Records - nine months.

(5) Discrepancy Reports - at least one year from date of preparation or completion, whichever is later (see note below).

(6) Inventory Reports - one year.

(7) Inventory Count Cards - All inventory count cards will be retained for one year only, i.e., the ICC E and U exclusion does not apply.

(8) Inventory Schedules - three years.

(9) Other records pertaining to inventories - one year.

NOTE: Source documents may be held for a longer period when so required under certain circumstances prescribed by other directives.

307903 - MRO RELEASE CRITERIA

a. Upon receipt, all MROs will be reviewed for release criteria when the Locator File contains an inventory flag.

(1) All IPGs I and II MROs will be released during inventory but will be controlled on the IDC File.

(2) All IPG III MROs subject to MOWASP Workload Bank criteria will be released until cutoff date unless the MDT is two days greater than cutoff date. If MDT is greater than cutoff date plus two days, hold in bank.

b. All MROs in the Workload Bank on the day locator is flagged will be reviewed and an R placed in Management Code field if blank. Criteria for hold or release in subparagraph a(2) will be applied to MROs in bank on flag day.

c. The IDC File will be updated with record of all MROs held in Workload Bank and those released while the inventory flag is on.

d. If cancellation request (AC6) is received for inventory MROs in the Workload Bank and cancellation is confirmed, an update to IDC File indicating complete or partial cancellation has been processed.

e. If automatic denial action is taken on inventory MROs being suspended on Workload Bank, an update to IDC File indicating complete or partial denial action has been processed.

CHAPTER 8

WAREHOUSING/REWAREHOUSING

SECTION I - GENERAL

308101 - PURPOSE AND SCOPE

This chapter prescribes the concept of popularity storage, which is expressed as an on going job of warehouse management, and the procedures required for accomplishment of rewarehousing actions. This is applicable to all defense depots.

308102 - REFERENCES

a. DLAR 4145.3, Storage Space Management

b. DLAR 4145.19, Storage and Warehousing Service and Facilities

308103 - POLICY

a. Popularity storage concepts are consistent with productivity objectives to increase operational efficiency at the depots, reduce costs and improve customer service.

b. Rewarehousing of supplies must be considered double handling of stock and will be done only in connection with the improvement of warehousing methods and practices and as indicated by planned special requirements. During any rewarehousing, consideration will be given to the References cited in paragraph 308102 above.

c. Open containers (loose items) in bulk storage areas are contrary to good storage management principles, promote pilferage, and impede the conduct of physical inventories. Every effort should be made to minimize such practices. Should it become necessary to open a container in bulk storage, efforts should be made to relocate the residual quantities to an appropriate bin location. If space is not available in the bin area to accommodate the residuals, the open containers must be resealed and the remaining quantities conspicuously marked thereon. Subsequent issues from the same bulk location should utilize the contents of the previously opened container.

308104 - DEFINITIONS

a. Popularity Storage - The arrangement of active bin and bulk storage items in the most accessible warehouse locations to optinize the usage of automation and mechanization.

b. Rewarehousing - Rearrangement of supplies from one storage area to another within the same storage activity under specific program.

c. Major Rewarehousing - The rewarehousing of 500 tons or more of supplies.

d. Minor Rewarehousing - The rewarehousing of less than 500 tons.

e. Routine Rewarehousing - Day-to-Day rewarehousing for the purpose of eliminating honeycombing or potential vacant space, or for consolidating locations.

f. Planograph - A scale drawing of a storage area showing the approved layout.

308105 - BACKGROUND

The attainment of optimum warehousing standards in the DLA depots, as prescribed in DoD 4145.19-R-1, requires carefully planned and supervised programs that will include all checking, counting, reporting, physical handling, and repalletizing. Justification for rewarehousing must be based on the following elements:

a. Consolidation of locations, whenever it is determined that a savings will result from this action.

b. Provision of specified space for a newly assigned mission. Careful consideration must be given to reasons for this type of rewarehousing.

c. Placement of storage buildings in a standby status. Storage management personnel must review this type action to ensure that space remains in a standby status and is not used within a short period of time after completion of rewarehousing, except in emergency situations or upon direction of HQ DLA.

d. Rearrangement of storage plans to provide for movement of fast moving supplies that conform with the provisions of storage of stocks by popularity.

e. Realization of additional storage space by improved storage methods such as reclaiming of cubic space.

f. Elimination of hazards to personnel or supplies.

g. Correction of warehousing malpractices such as commingled Shelf-Life Items or inaccessability to older stocks.

SECTION II - POPULARITY STORAGE

308201 - CONCEPTS

a. When planning the storage layout of materiel in a warehouse, an important factor to consider is the activity or popularity of the bin/bulk stocks. The fastest moving stocks should be stored in areas that are quickly and easily accessible, with the objective of reducing travel of materiels handling equipment and personnel.

b. There are, however, certain items of supply which require special handling or special storage areas. These items have characteristics which are hazardous, sensitive, perishable, deteriorative, and/or require special security.

308202 - PROCESSING BY POPULARITY GROUP CODES

Storage items are assigned a Popularity Group Code (appendix A-52) based on MRO demand. The computation formula that produces this code utilizes a six month moving average.

308203 - REPORTS

a. Appendix F-24, Popularity Group Report - To provide monthly, a listing of those items which have changed popularity group in the last month.

b. Appendix F-25, Popularity Group Exception Report - To provide knowledge of rate of turnover of items by selected popularity group codes in order to position fast moving items in close proximity to assembly areas, conveyor lines, and so on. Report and input are restricted to a single popularity group code, to first three positions of Warehouse Location (within parameters), or to NSNs within FSC parameters.

SECTION III - REWAREHOUSING PROCESS

308301 - MAJOR/MINOR REWAREHOUSING OF MATERIEL

Rewarehousing plans are based on knowledge of the master storage plan (planograph) and a need to position stock in a different area. (See paragraph 308105.)

308302 - INQUIRY METHOD

The Rewarehousing Request Card, appendix B-89, DIC ZUK, will be submitted IAW appendix E-100 P, which will generate the following output depending on parameters and action codes used.

a. Appendix B-72, Rewarehousing Cards, DIC ZUN

b. Appendix F-23 listing in location sequence, if Action Code FQ.

c. Appendix F-23 listing in NSN sequence, if Action Code FR.

d. Appendix F-30 listing in location sequence, if Action Code FS.

e. Appendix F-30 listing in NSN sequence, if Action Code FT.

308303 - PROCEDURES

a. Warehousing Division will:

(1) Plan rewarehousing action.

(2) Initiate Rewarehousing Request Card identifying parameters.

(3) Accomplish rewarehousing action using cards and listings provided based on request card.

(4) Forward updated Rewarehousing Cards through keypunch for computer locator file update.

b. Depot planograph will be maintained in a current status.

308304 - ROUTINE REWAREHOUSING

The Rewarehousing Document DLA Form 676 will be used when moving items into a different location due to size of item, as when required for consolidation of materiel. The Stock Locator Change Document, DLA Form 536 will not be used to relocate stocks from one location to another; only the DLA Form 676 will be used for this purpose.

SECTION IV - OTHER USES OF REWAREHOUSING TRANSACTIONS

308401 - ACQUISITION OF STORAGE LOCATION IDENTIFICATION LABEL

a. Input of a Rewarehousing Document, DLA Form 676, DIZ ZUN, containing only the NSN, Location, and Action Code FU (appendix A-42) will result only in the production of a Storage Location Identification Label for that location.

b. The computer will provide a Storage Location Identification Label for this location in conjunction with the normal label output.

308402 - CONTROL OF SUSPENDED MATERIEL AND UPDATE OF CLASSIFICATION SUSPENSE FILE

a. When suspended materiel (Condition Code D, E, F, G, J, K. or L) is rewarehoused, a partially completed Inspection/Test Card, DIC ZCO (B-116) will be prepared and forwarded to the Quality Control Office to replace the card held in suspense. (Suspense Cards, DIC ZAC, do not reflect locations and will not be replaced.)

b. The Classification Suspense File will be updated to reflect the new location. Subsequent to this action, copies of the F-22 Classification Suspense Report will indicate items that have been relocated by an asterisk in the card column next to the affected location.

CHAPTER 9

SEAVAN SHIPMENT PLANNING

SECTION I - GENERAL

309101 - PURPOSE AND SCOPE

a. This chapter prescribes the policies, responsibilities and procedures for operation of the Automated SEAVAN Shipment Planning (ASSP) System.

b. ASSP functions as a separate Module for the purpose of controlling, planning and documenting Materiel Release Orders (MROs) and Transshipments for movement in SEAVAN containers. The MOWASP Table and Control File, ole 04, must be maintained to indicate whether or not the ASSP System is operational at a given depot. If operational, MROs are selected for ASSP based on criteria established in the MOWASP Address File and Table and Control Files.

309102 - APPLICABILITY

The procedures in this chapter apply to the Transportation Operations Division at defense depots and DSCs with depot operations. Determination of whether to utilize ASSP must be a joint decision between the depot and HQ DLA based on the volume of SEAVAN shipping.

SECTION II - IMPLEMENTATION AND MRO SELECTION

309201 - IMPLEMENTATION PROCEDURES

If the ASSP is to be implemented, the Transportation Operation Division will take the following actions:

a. Depots must establish the SEAVAN Option Code in the MOWASP Table and Control File, Table 04 (appendix B-66 D). A Y option indicates ASSP is operational.

b. File maintain the MOWASP Address File to indicate destinations/consignees which are SEAVAN eligible. Per appendix E-129 P (ZGP transaction), enter D in DICOMSS Code for all authorized DICOMSS consignees. Enter 1 in the SEAVAN Eligible Flag for Non-DICOMSS destinations/consignees which have sufficient volume of MROs to warrent SEAVAN shipment. The following data elements should be established for SEAVAN destinations as necessary and available to improve the results of the mechanized shipment plan.

(1) Booking Group

(2) Stop Number

(3) Transit time

Review of SEAVAN eligible destinations and maintenance of associated data will be a continuing effort.

c. Indicate SEAVAN eligible projects by establishing Mode Eligibility in Project Table, Table 02 (appendix B-66 B). MROs with project codes which are SEAVAN eligible will be considered for ASSP if remaining criteria are met.

d. Update the MOWASP Table and Control File, Table 14, with additional MRO Selection Criteria (appendix B-66 N). Non-DICOMSS MROs for SEAVAN eligible destinations are compared against these criteria before being selected for ASSP.

(1) Establish Commodity Managers eligible for ASSP.

(2) Establish Location Group Codes which are eligible for ASSP.

(3) Establish minimum MRO weight and cube to be considered for SEAVAN.

(4) Establish Service Code and IPG Option if IPG I and/or II MROs are to be considered for ASSP.

e. Maintain the SEAVAN Table and Control File per appendix E-038 P, part L.

(1) Establish SEAVAN Capacity Table. This table indicates SEAVAN weight and cube capacities by size of van and refrigeration code. This table is mandatory and must contain capacities for 20, 35 and 40-foot SEAVANS at a minimum. If this information is not present, the system will fail to operate during the load planning function.

(2) Establish the Compatible Type Cargo Codes Table. This table indicates type cargo codes other than general cargo (Code Z) which may be planned and shipped on the same SEAVAN. Type cargo codes not on this table will be planned for shipment with only like type cargo and general cargo.

(3) Establish the Table of Constants and Controls.

(a) Depot Consignor DoDAAC.

(b) Depot Consignor ZIP Code.

(c) DD Form 1348-1 Consignor Print Code. Input a Y if it is necessary for the computer to print the Consignor (Ship from) Clear Text Address on the DD Form 1348-1; otherwise, leave blank.

(d) Establish depot processing time parameter. This parameter represents the normal processing time from document release date to ship date.

(e) Establish automatic denial parameter for no location MROs. MROs which have been suspended because of no location for the number of days indicated by this parameter will be automatically denied.

(f) Consignor Clear Text Address.

(g) Establish Location Group Codes which are eligible for batch control.

(h) Establish acceptable Load Plan Weight Utilization Percentage. This percentage is used in the Mechanized Load Planning Function to determine at what percentage of SEAVAN weight capacity it is acceptable to discontinue adding additional MROs/Transshipments to a planned load.

(i) Establish acceptable Load Plan Cube Utilization Percentage. This percentage is used in the Mechanized Load Planning Function to determine at what percentage of SEAVAN cube capacity it is acceptable to discontinue adding MROs/Transshipments to a planned load.

(j) Establish acceptable Load Plan Weight Utilization Percentage when cube is fully utilized. If the cube of a SEAVAN is utilized and this parameter is not met, the Mechanized Load Planning Function will increase the SEAVAN size and continue planning until the largest SEAVAN (40 Ft) has been planned.

(k) Establish Shipment Unit (SU) General Assembly Area and SU Assembly Area Weight and Cube Parameter. Shipment Units which exceed the weight and cube parameters will be assigned the warehouse code as the SU Assembly Area; otherwise, the General Assembly Area will be assigned.

(l) Establish the General Assembly Area and Transportation Unit (TU) Assembly Area Weight and Cube Parameter. Shipment Units which exceed the weight and cube parameters will be assigned the warehouse code as the TU Assembly Area; otherwise, the General TU Assembly Area will be assigned.

(m) Establish Transportation Account Code (TAC) Information. This provides necessary relationship to mechanically assign TACs to SUs.

(n) Establish Transshipment Processing Time. This is the normal processing time allowed for Transshipments (date materiel is received to date materiel is shipped).

f. Establish the MTMC Release File per appendix E-038 P, part B. This file accommodates Block Booking information requested as a result of review of the Commissary Support Cycle Planning Report, F-73. This file is not mandatory; MTMC release data may be obtained and added directly to the load record after release and prior to shipping. It may also be requested as a result of reviewing the SEAVAN Load Plan, F-210. If the data are received prior to load release it should be added to this file.

g. Establish the SEAVAN Equipment Pool File per appendix E-038 P, part D. This file is an inventory of on-hand SEAVANs.

h. Review the Locator File to assure that all DICOMSS items contain the appropriate Water Commodity Code, Type Item Code, Compatibility Code, Special Requirements Code, Case Pack, Shelf-Life Code, etc. The ASSP System utilizes the Type Cargo Code from the Water Commodity Code, Compatibility Codes A and B, and Special Requirement Codes 3, 5 and 6 to plan compatible loads.

309202 - MRO SELECTION FOR SEAVAN SHIPMENT PLANNING

The selection process for determining which MROs will be processed by the ASSP programs is detailed in appendix D-41. The following will be processed by ASSP if the depot option is exercised.

a. DICOMSS MROs - All IPG II and III MROs for destinations/consignees which have been file maintained as DICOMSS in the Address File, the From Routing ID Code is S9S or S9U, and the requested NSN has Type Item Code B, L, or T in the Locator File.

b. Non-DICOMSS MROs - All IPG III MROs for destinations/consignees which have been file maintained as SEAVAN eligible in the Address File and IPG III MROs for Project Codes which have been file maintained as SEAVAN eligible in Table 02 of the MOWASP Table and Control File which meet or exceed criteria listed below. IPG I and II MROs for destinations/consignees or projects which are SEAVAN eligible as stated above for IPG III and the MOWASP Table and Control File indicates the Service Code plus IPG is authorized SEAVAN shipment and the MRO meets or exceeds the following Table and Control File parameters. IPG II MROs for destinations/consignees which are SEAVAN eligible, consignees match automatic surface DoDAAC in chapter 4, paragraph 304212, b(2)(b)4 and meet or exceed criteria listed below.

(1) MRO exceeds minimum weight and cube parameter.

(2) The Commodity Manager from the MRO matches SEAVAN Eligible Commodity Manager.

(3) The Location Group Code for the MRO matches SEAVAN Eligible Location Group Codes.

SECTION III - SYSTEMS OPERATION AND PROCEDURES

309301 - INITIAL TRANSACTION PROCESSING

Cancellations, requisition modifiers, and MROs received in ASSP are processed in accordance with appendix D-190. All followup transactions and replies will be processed by MOWASP.

a. MROs received into ASSP which have missing data elements essential for mechanized shipment planning will be suspended and output on the SEAVAN MRO Missing Data Report, appendix F-215. Action will not be taken to plan these MROs until the missing data elements have been provided. MROs will continue to appear daily on the F-215 Report until resolved. Functional personnel should research the missing data elements and file maintain them to the MRO record in accordance with appendix E-038 P, part J. MROs which are missing the materiel location will be automatically denied if they are suspended for the number of days equal to the Automatic Denial Parameter Record in the SEAVAN Table of Constants and Controls. In addition, data should be added to the appropriate MOWASP files to preclude problems with future MROs.

b. MROs received into ASSP which are missing the Consignee Freight Address will be output on the MRO Missing Data Report, F-215, one time only. Load planning for this type MRO will not be delayed. Action should be taken by functional personnel to add the freight address to the MOWASP Address File to assure the address is available to prepare the Military Shipment Label, if required.

c. Transshipment processing provides for receipt and recording of Advanced Transshipment Control and Movement Documents (TCMD) via AUTODIN. Appendix D-200, SEAVAN Transshipment File TCMD Inquiry/Update, details processing of TCMDs. Appendix E-038, part O explains actions necessary to record receipt of transshipment materiel. Appendix D-199, SEAVAN Transshipment Receipt Transaction Processing, details processing of receipt transactions. Transshipments received for which no advance TCMD data are recorded or there is a piece count discrepancy will be suspended until TCMD data is provided and/or discrepancies in piece count are resolved. Advanced TCMD data received which contain invalid data and/or receipt processing discrepancies will be output on the Transshipment Action/Error List, F-216, until errors are resolved.

d. Density is computed for each MRO/Transshipment, a Load Accumulation Key is assigned, and MROs/Transshipments are merged with other undocumented MROs/Transshipments. The following comprise the Load Accumulation Key:

(1) Destination - Contains Destination Cross-Reference (DCR), Activity Address Code (AAC) from MOWASP Address File, or the Consignee AAC if a DCR was not present.

(2) Special Requirements Code - Will only contain a value if the MRO Special Requirements Code is 3, 5 or 6.

(3) Precedence Code - Precedence Code 1, 2, or 3 is recomputed daily based on Required Delivery Date (RDD) or Mandatory Date to Transportation (MDT).

(4) Type Cargo Group Code - Z if MRO/Transshipment Type Cargo Code is Z, blank if MRO Type Cargo Code matches SEAVAN Compatible Type Cargo Code Table or specific Type Cargo Codes.

(5) Compatibility Code - A or B if MRO/Transshipment Compatibility Code is A or B; otherwise, this field will contain Z.

e. Cancellations which match undocumented MROs are processed and a reply automatically generated to the DSC. Cancellations which match documented MROs establish a cancellation pending flag and quantity and are output by MOWASP on the F-60, Notice of Cancellation Request Report. Any subsequent teleprocessing entry against an MRO which is flagged with a pending cancellation will cause output of a cancellation pending message on the CRT.

f. Requisition modifier transactions are processed against undocumented MROs to update Media and Status Code, Distribution Code, and/or RDD. Changes in RDD will result in computation of a new Precedence Code for the MRO.

309302 - SEAVAN LOAD PLANNING

a. Daily, all undocumented MROs/Transshipments and in-process MROs/Transshipments which have been designated for replanning, are planned into optimum SEAVAN loads. Appendix D-191 details the Load Planning Function. Shipments are planned by destination using the Load Accumulation Key to assure compatibility of loads. Unless SEAVAN size is designated by Workload Request Transactions, the loads are planned for 20, 35, and 40-foot SEAVANs. Partial loads which contain Booking Group and Stop Number are planned into Stop-off Loads.

b. Planned loads are processed against the Workload Request File and released for documentation as indicated. Planned loads which are not released are output on the SEAVAN Load Plan, F-210.

309303 - WORKLOAD RELEASE PROCESS

a. Released workload is processed as indicated in appendix D-193. Loads which are selected for release are matched against the MTMC Release File by Destination. If a match is found, MTMC data are appended to the load information using the Voyage Number which has the earliest sailing date. If a match is not found by destination, then the WPOD for the load is matched to the MTMC Release File.

b. Loads which matched the MTMC Release Data File are then processed against the SEAVAN Equipment Pool File using the van owner, size, and type van to select an available SEAVAN. If a match is found, the SEAVAN number is appended to the load information and deleted from the equipment file.

c. Loads which do not match the MTMC Release File and/or the SEAVAN Equipment Pool will continue processing; however, the SEAVAN Load List, F-212, will not contain MTMC or equipment data. In addition, the load number will be output on the SEAVAN Equipment/MTMC Release Missing Data Report, F-213.

d. SEAVAN Load List, F-212, is prepared for each load. A DD Form 1348-1, DoD Single Line Item Release/Document, is prepared for each MRO in the load. If the NSN for an MRO is under inventory at time of release, a DD Form 1348-1 (F-2 Format), MRO Inventory Transaction, is prepared.

309304 - TRANSPORTATION DIVISION - SHIPMENT PLANNING AND PROCESSING

a. Receive the SEAVAN MRO Missing Data Report, F-215, daily. Take necessary actions to research and file maintain the missing data elements per appendix E-038, Part J, MRO Inquiry/Update. With the exception of addresses, missing data must be added to the MRO before the MRO will be planned.

b. Receive the Transshipment Action/Error List, F-216, daily. Take necessary actions to research and correct the missing/incomplete data. corrections to TCMD and transshipment receipt data can be made per appendix E-038 part O. Transshipments with discrepancies in piece count or receipts with no/incorrect TCMD data will be suspended from processing until errors are corrected.

c. Each day receive the SEAVAN Load Plan, F-210. In coordination with the responsible organization, determine the number of containers that may be loaded in one day. Review the load plan and determine the destinations and number of loads to be pulled. Input workload requests by destination per appendix E-38 P, part E.

d. If it is necessary to release an individual MRO/Transshipment for expedite shipment via a mode other than SEAVAN, shipment planning personnel should prepare a SEAVAN Workload Request by Document Number per appendix E-038 P, part E. The MRO/Transshipment will be released and assigned a load number of zeros. Action should be taken to make shipment via desired mode. Shipment confirmation will be prepared and input per appendix E-038 P, part H, Special Processing, SEAVAN Confirmation for MROs/Transshipments Shipped other than SEAVAN Mode.

e. The SEAVAN Load Plan, F-210, may also be used as a source to request MTMC releases.

309305 - TRANSPORTATION DIVISION - PROCESSING OF RELEASED WORKLOAD

a. Daily receive from the Office of Data Systems the SEAVAN Load List, F-212; DoD Single-Line Item Release/Receipt Documents, DD Form 1348-1; MRO Inventory Transaction, DD Form 1348-1, F-2 Format; Workload Data (mechanized areas), F-58; and SEAVAN Equipment/MTMC Release Missing Data Report.

b. Review SEAVAN Load List, F-212, for accuracy of the TU Assembly Area which was mechanically assigned. Revise assembly area on load list and DD Form 1348-1 as necessary. If the SEAVAN is to be direct loaded, assign a dock loading location.

c. Forward a copy of the load list and DD Form 1348-1 to the applicable stock selection function. For Transshipments, forward a copy of the load list to the transshipment staging area. (DD Form 1348-1 is not prepared for transshipments.) For a given load, the load list page changes when the Location Group Code changes.

d. Coordinate the placement of assigned SEAVAN equipment at the assembly area. Forward the original copy of the load list to the assembly area.

e. For all loads listed on the F-213, SEAVAN Equipment/MTMC Release Missing Data report, take necessary action to obtain MTMC releases and/or SEAVAN equipment. Upon obtaining a MTMC release, file maintain this information in the SEAVAN Load Record per appendix E-038 P, part C. Equipment data will be added during load review and closeout.

309306 - WAREHOUSING DIVISION - STOCK SELECTION

The Stock Selector, Warehousing Division will:

a. Proceed to the prime location shown in Block F of the DD Form 1348-1. If the MRO is for DICOMSS Cycle Code I (residual) stock and the locations shown on the DD Form 1348-1 are void of stock or do not have the entire quantity required, forward the MRO to the DICOMSS Administration Branch for comparison with part 4 of the F-92 report. This report will display previous locations and Cycle Codes for stock which DPSC has converted to DICOMSS Cycle Code I.

b. Verify the stock number of the materiel to be selected.

c. Select the number of cartons indicated on the lower line in Block S of the DD Form 1348-1.

d. Verify the number of cases times unit pack equals quantity in Block Q of the DD Form 1348-1.

e. Enter in Block 5 the number of cartons selected and sign and date in Block 1 of the DD Form 1348-1.

NOTE: Shortages will be annotated in the same manner as in the current MOWASP System. Overages will be processed as directed in paragraph 360901b(2).

f. Forward materiel to the assembly area.

309307 - WAREHOUSEMEN ASSEMBLY AREA

The warehousemen in the assembly area will:

a. Utilize the Load List, F-212, to select transshipments to be loaded.

b. Check dock loading area and obtain serial numbers of those SEAVAN containers available for loading.

c. Upon receipt of MRO materiel, check load list to determine if direct loading can be accomplished.

d. If direct loading can be effected, verify the quantity selected with the quantity indicated on the load list and, if in agreement, check off the load and annotate date materiel was received in assembly area on load list. If not in agreement, determine cause and correct. When an authorized overage or shortage exists, annotate quantity shipped, quantity denied/canceled, and appropriate action code in columns provided on the load list. Assure that any adjustments are correctly coded on the DD Form 1348-1.

e. In the event direct loading is not possible, locate materiel in the assigned assembly area indicated on the DD Form 1348-1.

f. After the appropriate SEAVAN container has been spotted, load and verify each item on the load list.

NOTE: It is mandatory that the materiel being loaded is in agreement with that listed on the load list.

g. Inform the supervisor whenever there is a vacant space in the SEAVAN container or there is additional materiel shown on the load list that cannot be loaded.

h. If military shipment labels are required, process SEAVAN Offer Transaction per appendix E-038 P, part G.

309308 - WAREHOUSEMEN SECURED STORAGE AREA

The warehousemen in the secured storage area will:

a. Immediately upon receipt of container, follow procedures outlined in subparagraph 309306. Prior to loading, assure that sufficient authorized personnel are available at all times to provide constant surveillance of the materiel until van is loaded and doors are sealed.

b. Partial loads - Retain one copy (except original) of the DD Form 1348-1 and place remaining copies in waterproof envelope and attach to the inside of the van door. Release van back to the Commissary Support Division.

c. Solid load - Annotate load list in same manner as subparagraph 309307.

(1) Attach one copy of DD Form 1348-1 to the inside of the container door. Annotate seal number to be used on the load list.

(2) Retain one copy of the DD Form 1348-1.

(3) Forward load list and DD Forms 1348-1 to Shipment Planning for load review and preparation of SEAVAN Consist and TCMD Listing.

(4) Receive the Consist and TCMD List from Shipment Planning and attach to the inside of the container door. Close door, seal (permanent seal) and attach shipping tag.

d. Upon completion of loading, annotate appendix C-77, Transaction Record of Sensitive Items, with date shipped document number, quantity issued, balance on hand, and initials.

e. Retain the DD Form 1348-1 in reference file and destroy after 90 days.

309309 - WAREHOUSE SUPERVISOR, ASSEMBLY AREA

The Warehouse Supervisor in the assembly area will:

a. Examine the container load and if all materiel cannot be satisfactorily loaded, adjust the appropriate line item on the SEAVAN Load List to reflect the exact contents and quantity shipped and deferred. Annotate on load list the assembly area location for deferred materiel.

b. Immediately notify the Shipment Planning Branch of materiel that could not be loaded.

c. When vacant space is available, request Shipment Planning Branch to furnish additional MROs to complete the load or select additional transshipments from the staging area and annotate the additional TCNs, piece, weight and cube on the Load List.

NOTE: All quantity adjustments will be reflected on the DD Form 1348-1.

d. Upon completion of loading, forward all documentation to the Load Review and Closeout Function for preparation of the SEAVAN Consist and/or the TCMD Listing.

309310 - LOAD REVIEW AND CLOSEOUT FUNCTION

a. Receive the annotated Load List, F-212, and DD Forms 1348-1 from the assembly area. If additional MROs are required, input a CRT request for additional MROs per appendix E-038 P, part F. This input will result in immediate output of additional DD Forms 1348-1 on the remote on-line printer. Forward the DD Forms 1348-1 to the warehouse function. If additional transshipments were added to the load, input TCNs, pieces, weight and cube per appendix E-038, part P.

b. Process all denials and cancellation transactions annotated on the load list per appendix E-038 P, part G.

c. Single-line all MROs per appendix E-038 P, part F, SEAVAN Transaction Code VU, which were part of a multiline SU and were not received in the assembly area.

d. Remove all single-line SUs per appendix E-038 P, part F, SEAVAN Transaction Code DY which were not received in the assembly area.

e. If all materiel which was received in the assembly area could not be loaded, process additional load adjustments per appendix E-038 P, part F as follows:

(1) If total SU was not loaded (either transshipment, single-line or multiline SU), remove using SEAVAN Transaction Code DY.

(2) If a total MRO for a multiline SU was not loaded, remove using SEAVAN Transaction Code VU.

(3) If a part of an MRO/Transshipment was not loaded, remove the total MRO/Transshipment from the load as stated in (1) and (2) above. Then partial the MRO/Transshipment transaction using SEAVAN Transaction Code VV. Add the part of the was MRO/Transshipment which loaded back to the load using SEAVAN Transaction Code DY.

(4) Either add the SUs/MROs/Transshipments that were removed from the load to another load using SEAVAN Transaction Code DY or process SEAVAN Transaction Code VW which will cause them to be planned on a new load. All MROs which are

replanned will be assigned Warehouse Location Group Code Number. This will cause them to print on a separate portion of the SEAVAN Load List, F-212, for the new load they are assigned.

f. Process Load Review and Consist/TCMD Preparation per appendix E-038 P, part I, after completion of all denial, cancellation, and adjustment transactions which were annotated on the SEAVAN load list. This review results in output of the SEAVAN Consist and/or the TCMD Listing. Completion of the Load Review process will also generate an Advance SEAVAN Consist in message format, generated in accordance with appendix F-162, and forwarded to the addresses maintained in the SEAVAN Table and Control File, table 04, appendix B-277. When necessary, manually prepare a GBL for shipment of the SEAVAN.

309311 - SHIPMENT DOCUMENTATION DISTRIBUTION

a. Distribute documentation as follows:

(1) Original copy of DD Form 1348-1, annotated copy of SEAVAN Load List, copy number two of SEAVAN Consist and/or TCMD Listing, and file copy of GBL to the Commercial Traffic Branch (identified as SEAVAN Documentation) for filing.

(2) One copy of DD Form 1348-1 for Non-DICOMSS shipments, one copy of DD Form 1348-1 for Army Commissaries, and three copies of the DD Form 1348-1 for Air Force Commissaries; copy number one of the Consist and/or TCMD List; related seal and shipping tag to the SEAVAN Assembly Area.

(3) Copy three of SEAVAN Consist to Comstore Army.

(4) One copy of DD Form 1348-1 and copies number three and four of SEAVAN Consist to Comstore Air Force.

(5) Copy number four of SEAVAN Consist to appropriate Command.

(6) Copy number three of TCMD List (advance copy) to appropriate ocean terminal.

(7) Destroy excess copies of DD Form 1348-1.

NOTE: To assure prompt arrival of SEAVAN Consists in overseas areas, Consists will be dispatched via AIRMAIL, with an RDD specified on indicia labels. RDD will be constructed on the basis of five days after the Consist data are ready for mailing.

b. Warehousemen in SEAVAN Assembly Area will, upon receipt of shipping documentation, place it in a waterproof envelope and attach to inside of container door. Close doors, seal, and attach shipping tag.

c. Commercial Traffic Branch will file GBL/TCMD and/or support documentation in a separate file identified as SEAVAN Documentation.

d. Shipment Planning Branch will compile necessary reporting data for Transportation funding.

e. Inventory Control Office - In DICOMSS, only Troop Issue items will involved in inventory. Items under inventory will appear on the Open MRO Flagged for Inventory Report, appendix F-72.

(1) Part I - Open MROs Flagged for Inventory.

(2) Part II - Deleted.

309312 - SEAVAN INQUIRIES

a. Inquiries may be made for in process load data by load number, SU number, and line item number per appendix E-038 P, part K.

b. Inquiries by MRO document number/suffix may be made per appendix E-038 P, part J. This inquiry provides information for both documented and undocumented MROs.

c. Inquiries may be made for transshipment TCMD, receipt and history data by entering the Transportation Control Number per appendix E-038, part O.

CHAPTER 11

CONTROL AND ISSUE OF ITEMS HAVING LIMITED SHELF-LIFE

SECTION I - GENERAL

311101 - PURPOSE AND SCOPE

These procedures apply to distribution activities and DSCs with collocated depot type activity and provide methods for control and issue of DLA items which have been assigned shelf-life codes. This chapter provides criteria for assuring that stocks of shelf-life items are properly classified as to condition and are issued in a manner to satisfy customer requirements and minimize losses of these items due to expiration of potency date or shelf-life expectancy. Also, specified are the inspection/test/restorative actions to be taken when the item has reached its storage shelf-life expiration date.

j. Appendix E-091 P.

k. Appendix F-20.

l. Appendix F-82.

311103 - BACKGROUND

a. There is considerable emphasis placed upon the identification, control, and issue of shelf-life materiel:

(1) To assure materiel will perform satisfactorily in service.

(2) To assure the issuance of such materiel prior to that materiel becoming unserviceable in storage.

b. An item of supply possessing deteriorative or unstable characteristics to the degree that a storage time period must be assigned to assure that it will perform satisfactorily in service is identified as a shelf-life item. There are two types of shelf-life items:

(1) Type I - Shelf-Life Item - An item of supply having a definite (non-extendable) storage time period terminated by an expiration date which was established by empirical and technical test data.

(2) Type II - Shelf-Life Item - An item of supply with an assigned storage time period which may be extended after the completion of prescribed inspection and/or restorative action.

c. Within the DLA Distribution System:

(1) Identification of shelf-life items is made by the Defense Supply Centers and promulgated to distribution activities in the form of Storage Item Change Cards (appendix B-23) containing the NSN, Shelf-Life Code (appendix A-47), and any other data deemed necessary for control of these items.

(2) Control of shelf-life items is based on condition coding of materiel in stock by distribution activities IAW established Condition Codes, appendix A-16.

(3) Issue of shelf-life items is made by distribution activities based on the following expressed policy as modified by Management Codes, appendix A-13, which provide more detailed instructions on Materiel Release Orders (MROs).

311104 - POLICY

Control and issue of items assigned Shelf-Life Codes will be exercised IAW the following principles:

a. In the absence of specific exception type instructions (Management Code), distribution activities will issue those items having the earliest expiration date first.

b. Distribution activities will perform Storage Surveillance required for items assigned Shelf-Life Codes, as prescribed in chapter 70 and make materiel adjustment actions prescribed in chapter 5, IAW the Condition Code change principles in section II.

c. Distribution activities will recognize and adhere to the exception type instructions furnished by the DSCs on MROs and effect Materiel Release Confirmation or Denial/Adjustment actions prescribed by chapters 4 and 60, to include the use of Management Codes related specifically to Shelf-Life Code items.

d. Test, restorative, and serviceability standards or other technical documentation promulgated by the DSC will be applied for the protection of materiels which deteriorate in storage during periods of normal stock turnover.

311105 - RESPONSIBILITIES

Distribution activities are responsible for executing the Control Program as directed by the DSC. Effective shelf-life control at the warehouse level requires vigilance on the part of all personnel, careful supervision, and understanding of the intent and letter of the controlling procedures.

SECTION II - CONTROL PROCEDURES

311201 - APPLICATION OF SHELF-LIFE CODES

a. An initial assignment or revision of a Shelf-Life Code will cause the computer to produce a Storage Change Listing, appendix F-82, for review and processing.

b. A SLID appendix C-104, will also be automatically prepared to permit location identification of the new Shelf-Life Code assignment.

c. DS/T will assign a new or revised next inspection date in the Locator Subrecord commensurate with Shelf-Life Code and test, restorative and serviceability standards promulgated by the DSC.

311202 - USE OF CONDITION CODES

Condition Codes in appendix A-16 will be utilized for control and issue of items assigned a Shelf-Life Code as follows:

a. Condition Code A will be used for items when shelf-life is such that it may be issued to all customers.

b. Condition Code B will be used to segment stocks when the shelf-life is such that the issue may not be made to all customers, i.e., CONUS only or other similar restrictions.

c. Condition Code C will be used for specified items which are issuable only to selected customers and must be used before Condition Codes A and B materiel to avoid loss as a useable asset.

311203 - REPORTING OF CONDITION CHANGES

Distribution activities are charged porting changes in condition of stock in-storage, so that proper adjustment to the accountable record, held by the DSC, may be made.

a. The Surveillance Inspection/Operational Test Notice Cards, when processed as indicated in chapter 70, will cause the updating of the Item Locator Record by posting the new Condition Code of materiel and the next Inspection Date. The process will also cause the preparation and transmission of a Materiel Adjustment Card, DIC DAC, in the format of appendix B-22, each time there is a Condition Code change recorded for a specific NSN and quantity.

b. The application of Condition Code changes to shelf-life items will be applied IAW the following table:

TABLE FOR THE APPLICATION OF CONDITION CHANGES TO SHELF-LIFE ITEMS

REMAINING LIFE IS	ASSIGN CONDITION CODE
Less than 3 months	C
3 through 6 months (inclusive)	B
More than 6 months	A

c. Exception to the above table may be applied to selective items having a Shelf-Life Code of nine months or less when directed by the DSC. These items will be isolated and close surveillance maintained to ensure that items are issued prior to the expiration date.

d. The Materiel Adjustment Card, DIC DAC, reporting the change of condition for dated, shelf-life coded Medical and Subsistence items, will reflect Management Code Z in pos. 72 and will be followed by a DD Form 1225, Storage Quality Control Report, prepared and distributed IAW appendix E-091 P.

e. The Materiel Adjustment Card, DIC DAC, changing shelf-life materiel to Condition B or C will be forwarded to the DSC within 15 days preceding the first day of the 6-month or 3-month timeframe. As an example, for an item with an expiration date of December 1977, the DAC changing the item to Condition B would be forwarded to the DSC during the period 16-30 June 1977, preferably near the end of the period.

f. Computer prepared automatic reclassification actions, DIC ZC9, will be utilized for downgrading of nonextendable Type I shelf-life items. These adjustment actions will be mechanically prepared and completed IAW chapter 70 and appendix E-116 P under provisions outlined in the following criteria:

(1) Condition Code A - Maintained for Type I items with more than six months shelf-life remaining.

(2) Condition Code B - Assigned for Type I items having three through six months of remaining shelf-life.

(3) Condition Code C - Assigned when Type I items exhibit less than three months of remaining shelf-life.

(4) Downgrade Type I items to Condition Code H on expiration date.

g. The computer-prepared Materiel Adjustment Documents, DIC DAC, will be identified by a specific document number constructed using the 6-position DoDAAC of the managing DSC, 4-position Julian date, followed by a constant 9999 and processed in conjunction with the provisions outlined in subparagraph e above and appendix D-39.

h. The Surveillance Inspection/Operational Test Notice Cards, DIC ZC0 or ZC9, will be produced during the same inspection cycle.

311204 - WAREHOUSE CONTROLS

a. Shelf-life items in-storage will be segregated by expiration date to permit identity of and access to stocks with the least remaining shelf-life.

b. All shelf-life items will be identified on storage records by the codes authorized in appendix A-47.

c. Storage personnel in the normal routine of surveillance of their spaces and stock should be alert for expired shelf-life dates and will notify the Chief, Stock Readiness Branch, DSOT, of this condition for corrective action.

SECTION III - PROCESSING MATERIEL RELEASE ORDERS FOR SHELF-LIFE ITEMS

311301 - USE OF MANAGEMENT CODES

a. Management Codes are used by DSCs when it is necessary to supplement Advice Codes and/or Condition Codes, as shown on the MRO or when it is necessary to deviate from the first-in, first-out principle. These codes are to be used only to supplement the Condition Code shown on the MRO and are not to be used as a substitute for the Condition Code.

b. Authorized Management Code (extracted from appendix A-13) for use on MROs for shelf-life coded items are:

CODE	DESCRIPTION
F	Issue newest stock only (applies to all commodities)
G	Issue stocks having at least one year shelf-life remaining

c. If no Management Code appears in pos. 72, distribution activities will issue those items having the earliest expiration date within the Condition Code specified in the MRO. For example, if the MRO calls for Condition B materiel, the materiel in Condition B with the earliest expiration date will be shipped first. If the MRO specifies Condition B materiel with Management Code F in pos. 72, only materiel in Condition B with the latest expiration date will be shipped.

311302 - STOCK SELECTION

On receipt of a DD Form 1348-1, DoD Single Line Item Release/Receipt Document, DS/T will select stock and Condition Code (and related Management Code) of materiel to be issued.

311303 - WAREHOUSE DENIALS

a. Warehouse denials/adjustments on MROs for shelf-life coded items will be processed IAW chapters 4 and 60. Management Codes 1, 2, 3, 4 and 5 will be used as appropriate.

b. When the denial occurs as a result of insufficient stock of materiel to meet the instructions conveyed by Management Code G in pos. 72 of the MRO, Management Code 3 will be used in lieu of 1.

(1) Management Code 3 will indicate to the DSC that stock is on hand in the condition requested on the MRO, but that no stock is on hand to meet the specific expiration period requested in that condition.

(2) Distribution activities will not conduct a special inventory or provide other reports to the DSCs when Management Code 3 is used.

c. Warehouse denials may also occur as a result of condition changes, in materiel on hand, detected during the course of stock selection for shipment.

(1) In the event materiel on hand is found to be in a condition other than that specified on the MRO, appropriate action will be taken to advise the DSC of the condition change IAW the provisions of chapter 5.

(2) When warehouse denials occur as a result of finding materiel which has changed condition, Management Code 2 will be used in lieu of 1.

CHAPTER 12

DISPOSAL TRANSACTIONS

SECTION I - GENERAL

312101 - PURPOSE

This chapter prescribes the policies, responsibilities, criteria, and standard internal procedures to be used by a defense depot, or the Directorate of Storage and Transportation (DS/T) where depots are collocated with Defense Supply Centers (DSCs), applicable to the release or transfer of disposable materiel from a defense depot to a Defense Reutilization and Marketing Office (DRMO).

312102 - SCOPE

a. Information contained in this chapter outlines the depots' manual and mechanical procedures for processing disposal orders issued by the controlling DSC. It encompasses documentation transactions initiated by the depot to the DRMO, the DSC, and the applicable Military Service (hereinafter referred to as Service), as required.

b. It includes the general procedures and requirements related to the validation, control, processing, and recording of information pertaining to the issue, denial, adjustment, confirmation, and status of materiel designated for disposal action.

c. This chapter defines only the peculiarities which apply to disposal of materiel. It augments and supplements standard detailed procedures contained in other chapters of this volume.

312103 - REFERENCES

Applicable references will be covered in each subsequent section or paragraph.

312104 - POLICY

a. Orders for the disposal of materiel stored at a defense depot are received at the depot from either the Service owner of the item or from the applicable DSC or may be originated by the depot. The depot is responsible for processing the disposal transactions as ordered, furnishing the applicable DRMO certain documents, and informing the DSC the status of all actions taken.

b. Disposal Release Orders (DROs) are generally processed in the same manner as Materiel Release Orders (MROs). This chapter emphasizes the peculiarities that require exceptions to normal procedures.

c. The major exception is effected by use of the presence of a Management Code Z on the incoming release order document. This requires either decision making outside the computer, the mailing of EAM punched cards supplemented with special remarks or messages, the designating of release and retention quantities on Orders, or recognition of dual ownership materiel.

d. Demilitarization (Demil) requirements will be provided to the DRMO by a Demil Code entered on each DRO. The code will be entered in the DRO by the originating DSC/ICP and perpetuated to the ensuing DD Form 1348-1. DRMO documents originated by the distribution depot will have the applicable code entered prior to distribution of documentation and transfer of the materiel to the disposal function.

e. Other exceptions to normal MRO processing are: Issue priority is usually comparatively low; materiel may not be physically transferred at the time it is removed from records; transfer dates are established outside UMMIPS timeframes and are based on the DTD, MTD, and the presence of a Purpose Code M on the DRO. Additionally, DRO items will be consolidated in accordance with appendix D-98.

f. The true condition of the materiel being transferred to the DRMO will be indicated on the transfer documentation. In this regard, MILSTRAP Condition Codes J, K, L, M and N will not be indicated as these codes denote a suspense category and are meaningless to the Defense Disposal Program. Further, in those instances where it has been determined that materiel is to be disposed of because of failure to meet specifications relative to item identification/composition, such materiel will be transferred to the DRMO as Condition H and turn in documentation annotated CONDEMNED - NOT TO BE USED FOR PURPOSE DESCRIBED UNDER THIS NSN/PN.

SECTION II - GENERAL PROCEDURES

312201 - FILES AND REPORTS

Procedures for processing disposal transactions provide access to any computer file or table or output reports which are normally available for processing or control of documents related to issuance of materiel. Certain files contain additional data especially pertinent to disposal actions.

312202 - VALIDATION AND VIOLATION CONTROL

The mechanized system provides for validation and recognition of violations on all input documents. In the case of DROs, certain card fields are ignored or a valid entry is automatically made to permit processing. Invalid card fields critical to disposal decisions are mechanically identified, assigned a violation code, and rejected. A daily listing of violations, identified by DIC, is printed in the format of F-85 and submitted to the responsible office for correction in accordance with applicable E appendices, and entry of a valid document.

312203 - REPORTING DELETED ITEMS

a. The depot is responsible for cognizance of deleted items subject to disposal action, and to bring to attention of the applicable DSC the identity of items in storage which apparently require DROs.

b. Items to be deleted from Supply System are identified at the depot through receipt of a Storage Item Change Card from the applicable DSC through the MOWASP Data Bank. A DRO should be received at the depot to dispose of on hand assets prior to the effective date of the Storage Item Change Card.

c. If no DRO for a deleted item is received within seven calendar days subsequent to the catalog change date, the distribution depot reports the quantity and condition of materiel on hand under a deleted stock number to the cognizant DSC by Deleted Item Report Card, prepared in the format of appendix B-33. Report cards are identified by DIC CK8.

d. Chapter 66, Stock Locator System, provides the information applicable to reporting deleted items.

312204 - FINANCIAL ACCOUNTING

Transfer of financial accountability of disposed materiel is not related to its physical movement. Change of accountability records at the DSC reflect the MTD as shown on the DRO or, the date the DRMO signs for (accepts) accountability. Discrepancies subsequently disclosed during inspection or preparation for shipment which result in denials or quantity changes will effect submission of an adjustment document from the depot to the DSC.

SECTION III - PROCESSING DISPOSAL RELEASE ORDERS

312301 - GENERAL

a. DROs can be received at the depot from either the DSC or the Service owner of the item. A normal Type Disposal Card (A5J) can be received via AUTODIN direct to the computer. However, the mechanized system will reject any A5J that contains a Z as Management Code to the F-113. These require manual exception processing contingent on additional information to be furnished by mail, phone or TWX. After manual functions have been performed on the exception DRO, it will be reentered to the system with the second position of the DIC as blank. ENTRY programs will then recognize the DRO as having manual processing accomplished, validate the document and continue processing accordingly.

b. Materiel initially reported to the managing DSC as Condition Code J, K, L, M or N may be directed to be shipped to the DRMO. These condition codes will be changed on the documents accompanying the materiel to a condition code which accurately reflects the actual materiel condition. Additional detail is provided in chapter 5, paragraph 305302.

c. Materiel received in Condition Code H with Management Code M or T or by an adjustment transaction (DIC DAC) putting materiel in Condition Code H with Management Code M or T will result in automatic generation of a DRO. If there have been insufficient data to complete all required fields in the DRO, an F-85 reject listing will be generated. DS/T will research missing data elements on the F-85 and when completed will input the DRO through normal processing for the next issue cycle.

d. When disposal of radioactive materiel is appropriate, refer to chapter 68, section VI, paragraph 368602 for guidance regarding requests for instructions or information, if necessary.

312302 - DROs FROM DSCs

a. Defense depots receive DROs from DSCs by transceiver or on punched cards in accordance with appendix B-32 and bearing DIC A5J. It is mechanically validated as shown in appendix D-65.

b. Entries on the card which are peculiar to, or have emphasis on, DRO actions are: Retention Quantity, Effective Transfer Date, Purpose Code, Demilitarization Code, Management Code, Condition Code, Reclamation Code, and Screening Code.

c. The following criteria apply to the quantity to be disposed or retained:

(1) Blank. A blank retention quantity field (pos. 55-61) indicates that the quantity in pos. 25-29 is to be transferred to the DRMO. A blank retention quantity field may be used by the DSC when materiel is known to be commingled in-storage and accounted for on more than one accountable record. A blank retention quantity will always be used when when transferring materiel from Purpose Code M to the DRMO.

(2) Zero-Filled. A zero-filled retention quantity field indicates that the total quantity of materiel in-storage in the Condition Code cited in pos. 71 is to be transferred to the DRMO regardless of the quantity in pos. 25-29. A zero-filled retention quantity may be used when an item is being deleted from the system and the total quantity is to be transferred to the DRMO.

(3) Quantity. A quantity in the retention quantity field indicates that stock in the quantity entered in pos. 55-61 and in the Condition Code indicated in pos. 71 is to be retained in-storage and the residual balance is to be transferred to the DRMO; however, if the residual quantity available for transfer to the DRMO is greater or lesser than the quantity reflected in pos. 25-29, the provisions of paragraph 312403 will apply as applicable. The DSC will use the retention quantity entry on DROs with discretion and will recognize materiel which is recorded on the DSC inventory control record under more than one ownership and commingled in-storage. The retention quantity entry will represent the total retention quantity for all ownerships on the DSC record notwithstanding the entry in pos. 70; and when a quantity is reflected in this field, it will be considered the governing quantity were a conflict to occur between it and the disposal quantity contained in pos. 25-29.

d. The date established for transfer of disposable materiel is mechanically determined by computing the MDT based on the date of transmission plus 30 days; the PDT is based on the scheduled Geographical Area shipment date which immediately precedes or is equal to the MDT.

e. Validation is accomplished and violations are determined by the mechanized system on all DIC A5J documents. Certain data fields in the card are corrected within the computer complex. Mechanically uncorrectable data fields are identified by a Violation Reason Code (VRC) (appendix F-85) which is provided to the depot office responsible for correction and reinput. The procedures for manual processing of the Validation Reject Report are described in appendix E-032 V.

f. Manual processing of a DRO DIC A5J is required to accumulate exception instructions from the DSC and to add this information to the computer developed materiel release document DD Form 1348-1 flimsy.

(1) Exception DROs via AUTODIN:

(a) When the depot receives an exception DRO (identified by a "Z" in pos. 72) the DRO image will be output on the F-113.

(b) Exception data will be obtained from the DSC and placed in suspense for subsequent annotation on the DRO document.

(c) The A5J will be reinput to the system with a blank in the second position of the DIC to bypass duplicate document checks. Entry may be by card or remote entry device.

(d) The exception DRO will be printed (DD Form 1348-1) and forwarded to special processing.

(e) Exception data are annotated on the DD Form 1348-1, one copy retained for suspense, and the DRO forwarded to the warehouse stock selection area.

(2) Exception DROs received via means other than AUTODIN:

(a) Exception DROs may be received via mail, TWX or telephone message.

(b) If the DRO message is for DRMO or retention quantities exceeding 99,999, process the DRO off-line; i.e., do not enter to MOWASP.

(c) The DRO may be input to MOWASP in accordance with appendix B-32 with two options:

1. If output is desired on the F-113, enter the complete DRO format as specified. Procedures outlined in subparagraph (1)(a) through (e) above apply.

2. If the F-113 output is to be bypassed, enter a blank in the second position of the DIC. Procedures outlined in subparagraph (1)(d) and (e) above apply.

SECTION IV - RELEASE/STATUS REPORT DOCUMENTS

312401 - SINGLE LINE ITEM RELEASE DOCUMENT

a. The DD Form 1348-1 flimsy, annotated with the supplementary or special instructions pertinent to the disposal order, is received in the warehouse storage area. It is the basic document from which information is subsequently obtained to effect the preparation of computer input documents regarding shipment confirmation, denials, or adjustments. DD Forms 1348-1 that apply to DLA initiated DROs will contain the statement: "DoD Excess."

(1) Verify the availability of Purpose Code M materiel and notify the DSC if a discrepancy is disclosed.

(2) Correct the quantity field (pos. 25-29) and related fields of DD Form 1348-1, as necessary, and for Purpose Code M materiel only, forward a copy of the DD 1348-1 to the DRMO as advance notification of transfer.

b. Chapters 4, 5, 60, and 66 adequately describe the procedures and reference appendices used to process a DRO through the depot until issuance of the materiel.

312402 - SHIPMENT/RELEASE CONFIRMATION

a. Finalization of the DD Form 1348-1 flimsy and supplementary documents in the shipping area instigates submission of status cards into the computer for posting to file records and the preparation of an ARJ, ARK, or ARL confirmation card for transmission via AUTODIN to the DSC/ICP

b. Chapters 4 and 60 describe these procedures and the conditions which determined the usage and completion of input cards DICs, ZBM (appendix B-99), ZBP (appendix B-101), or ZEN (appendix B-128), to transmit shipment status to the depot computer.

c. For disposable materiel <u>not</u> in Purpose Code M, the depot will inform the DRMO of the shipment of materiel as soon as possible, but in no event will it be later than the effective transfer date.

d. When the materiel <u>is</u> in Purpose Code M, the depot will expeditiously verify the availability of the materiel and arrange with the DRMO for its transfer on or before the MDT.

e. The depot will furnish the DRMO advance notice of transfer of Purpose Code M materiel by sending copies of the DD Form 1348-1 flimsy, annotated with supplementary disposal instructions.

312403 - MATERIEL RELEASE DENIAL/ADJUSTMENT (MRD/A)

a. DROs require the same degree of controls and reporting of denials or adjustments to the DSC/ICP that are applicable to other issuance actions.

b. Chapters 4, 5, and 60 describe the procedures subsequent to the time a DRO has reentered the mechanized system.

c. Materiel Denials or Adjustments are submitted by the depot via AUTODIN or mailed as applicable.

d. When the depot is unable to satisfy the exact quantity to be transferred to the DRMO, pos. 25-29, and/or retain the exact quantity in the retention quantity field, pos. 55-61, the actions to be taken and the applicable document(s) provided to the DSC/ICP are outlined in appendix E-081 P.

312404 - CANCELLATIONS

a. Request to cancel a previously issued DRO is initiated by the DSC/ICP and sent to the depot via AUTODIN. DIC ACJ on the card format of appendix B-17 is used. It enters the computer system for validation and processing according to appendix D-43.

b. Chapters 4 and 60 provide the detail for cancellation actions by the depot.

c. When sufficient data are available in either the Active or History Record File, the applicable following reply will automatically be transmitted:

(1) Cancellation accomplished, DIC ACJ with Status Code BQ (appendix A-12).

(2) DRO previously denied, DIC AEJ, Code BY in pos. 65-66, Management Code in pos. 72 (appendix B-94).

(3) Shipment could not be canceled, DIC ARJ, ARK,ARL.

d. If the MRO/DRO Active or History File does not contain sufficient data, indicating the DRO is inprocess, a report, Notice of Cancellation Request, is output in the format of appendix D-69, for manual research and input of the proper document (ZBM or A_J, exception DRO).

e. If no record of the DRO can be found in the depot, the DSC/ICP is furnished an AGJ document in the format of appendix B-81. Field positions 65-66 will contain a BF to indicate no record.

312405 - FOLLOWUPS

a. DSCs will followup (DIC AFJ) to distribution depots on unconfirmed/outstanding DROs monthly on the last working day of each month on those DROs which are 10 days old past the DTD/MTD reflected in pos. 62-64 of the DRO. The DTD/MTD will normally be the date of transmission, plus 30 days, thereby making the DRO followup date normally 45 days past the requisition date.

b. Defense depots will process the Followup Card in accordance with chapter 4 of this manual and respond with the following documentation:

(1) Materiel Release Confirmation, DIC ARJ/ARK/ARL appendix B-225, to advise that:

(a) Transfer to the DRMO has been made. (Date Shipped field, pos. 57-59, and date available for shipment field, pos. 78-80, will both be completed).

(b) Transfer to the DRMO has not been accomplished. (Estimated shipment date field, pos. 57-59 will be completed indicating estimated date shipment will be made and date available for shipment field, pos. 78-80, must be blank).

(2) Supply Status - DIC AEJ.

(a) Prepare reply DIC AEJ with BF in the pos. 65-66 when it is necessary to advise the DSC that the depot has no record of the DRO. Supply Status will be prepared in the format of appendix B-94.

(b) Prepare Supply Status DIC AEJ in response to a DRO Followup when it is necessary to advise the DSC that the original DRO was previously denied. Supply Status Cards will be prepared in the format of appendix B-94 with applicable Management Code in pos. 72, and quantity denied in pos. 25-29 and Code BY in pos. 65-66.

(c) Prepare a DIC AGJ in response to a DRO Followup when it is necessary to advise the DSC that the original DRO was previously canceled. Reply will be prepared in the format of appendix B-81 with Code BQ in pos. 65-66.

312406 - INTRANSIT CONTROL OF SHIPMENTS TO DISPOSAL ACTIVITIES

a. A Shipment Status (DIC AS8) will be generated to DAAS for distribution of an AS3 to the Defense Reutilization and Marketing Service (DRMS) when:

(1) The dollar value of the shipment is $100 or more.

(2) The item (NSN) has a Physical Security and Pilferage Code other than U or X.

b. Shipment History will be maintained for 120 days on all shipments to disposal for which shipment status is provided to the DRMS.

c. The Defense Reutilization and Marketing Office will indicate acceptance of disposal materiel received by providing the shipping depot a signed copy of the DTID which should be filed for future research.

d. Disposal Shipment Confirmation Followup Cards (DIC AFX or AFZ) will be received by the depot (via applicable DSC) from the Defense Reutilization and Marketing Service on discrepant or overage shipments.

e. If no record of shipment is available at the depot, a supply status card (DIC AE3) with supply status code BF in field positions 65-66 will be generated to the DRMS.

f. When a record of shipment is available, the depot will investigate discrepancies and provide a Disposal Shipment Confirmation Card (DIC ASZ) to the Defense Reutilization and Marketing Service in accordance with appendix E-046 P.

SECTION V - TRANSFERRED MATERIEL

312501 - NONSHIPPED DISPOSED MATERIEL

a. Movement of DoD excess materiel transferred to the DRMO will be accomplished when practical. If for reasons of economy or operating feasibility the defense depot Commander determines that it is impractical to move DoD excess materiel to specially designated disposal areas under control of the DRMO, and will ensure positive and adequate identification of the excess stock left in storage areas. Bin stocks, however, will be removed from bin storage areas; they either may be consolidated with disposal bulk stocks in reserve storage locations or moved to the DRMO Area. Stocks left in storage areas will be identified by use of a card or tag attached to the exterior of a single container, or attached to the pallet load for bulk stock. The affixed card or tag bearing the stock number, unit of issue, and quantity will be plainly marked, "DO NOT INVENTORY - TRANSFERRED TO THE DRMO DISPOSAL DIRECTIVE NUMBER_____". The Item Locator Record for materiel transferred to the accountability of the DRMO will be deleted from the Item Locator File since there is no code provided to reflect DRMO ownership on an item locator record.

b. The absence of mechanized record data pertaining to the identification of items, ownership, quantity, and warehouse location of disposed materiel that has been removed from accountability records but still stored within the depot can cause management problems. Therefore, each DLA depot should develop a manual record system for the control of disposable stored items. Consideration could be given to the input of a DIC ZBM card with Action Code DP, to obtain an F-107 report indicating the materiel had not been shipped. Data pertaining to disposed items in the warehouses could be extracted from the F-107 listing, supplemented with location and other pertinent data, and become the basis for a manual control file.

312502 - LIAISON WITH DEFENSE REUTILIZATION AND MARKETING OFFICE

a. The depot will establish procedures to assure that the DRMO receives adequate notification of shipments, and instructions regarding disposition of materiel and documents.

b. Original copy of the DD Form 1348-1 will be used by the depot for preparation of shipment confirmation. Balance of copies will accompany the materiel to the DRMO.

c. The depot will annotate the Remarks block of the flimsy with any or all of the following statements which may apply:

(1) Reclamation required.

(2) Proceeds of sale to be credited to account number (insert number).

(3) Additional instructions attached.

d. The use of statements specified above may require additional explanations or instructions to be attached such as the method or requirement for performing reclamation.

e. When the disposal transaction is accompanied by a technical report based on latent defects in the materiel being shipped to the DRMO, the DD Form 1348-1 will be annotated as described in subparagraph c(3) above, and a copy of the technical report forwarded to DRMO with the DD Form 1348-1.

f. The DRMO will also comply with the supplementary or exception instructions. Liaison will be maintained between the depot and DRMO, by phone, mail, or TWX, to resolve any discrepancies or questions concerning the disposal transactions.

SECTION VI - INSTRUCTIONS FOR RECOUPMENT

312601 - GENERAL

An unanticipated requirement may develop which dictates the recovery of materiel from a property disposal activity for stockage in the DLA supply distribution system. For this reason procedures for recoupment of materiel from the DRMO are provided in the following paragraph. These procedures are applicable only to recoupment of materiel originally declared excess and transferred to the DRMO by the DSC effecting recovery action. Acquisition of materiel other than that originally declared excess is treated as a receipt from an outside source and provisions of chapter 2 pertain in processing the receipt transaction.

312602 - RECOUPMENT PROCEDURES

For recoupment of DoD excess materiel from the DRMO, these procedures apply:

a. The DSC will:

(1) Prepare a Manual Requisition as illustrated in appendix C-9 and forward the original copy to the DRMO who is to return the materiel and one copy to the distribution depot receiving the returned materiel.

(2) Produce a PMRC, in the format of appendix B-35, bearing DIC DWJ.

(3) Forward the PMRC to the distribution depot which is to receive the materiel.

b. The distribution depot will:

(1) Incheck materiel recouped from the DRMO.

(2) Inspect materiel to the extent necessary to verify its identity and condition.

(3) Reject to the DRMO materiel in excess of the quantity shown in the quantity field (Block 8) or not in agreement with the stock number (Blocks 4-6) or condition (pos. 71 of Block 23) specified on the manual requisition copy.

(4) Forward to the DSC a MRC in the format of appendix B-36, bearing DIC D6J, for the quantity of materiel accepted from the DRMO.

SECTION VII - PROPERTY DISPOSAL CHALLENGE PROGRAM (PDCP)

312701 - GENERAL

This section prescribes basic policies and assigns basic responsibilities for accomplishing the Property Disposal Challenge Program (PDCP) at DLA depots. The PDCP is intended to further property reutilization by preventing the transfer of apparently usable materiel to property disposal inventories. This is accomplished through the establishment of procedures to allow for human intervention/challenge of disposal actions during processing. This challenge program has been called SAVES, Save All Valuable Equipment and Supplies. The SAVES procedures are provided as follows: (Supplementation is permitted).

312702 - SAVES PROCEDURES

a. A SAVES Program will be established at each DLA Depot. This program will be administered by the Directorate of Distribution and controlled by the Distribution Management Division (DMD).

b. The SAVES card, DLA Form 1757, will be made available/provided to distribution depot warehouse employees.

1. PART ONE OF DLA FORM 1757 - CHALLENGER

a. The SAVES card should be completed by the depot employees during the Disposal Release Order processing when:

(1) Container markings/contract date indicate that the items are 3 years old or less.

(2) Knowledge of a recent issue of the same item.

(3) Knowledge of a recent receipt of the same item.

b. The information required to complete the SAVES card is self-explanatory. This information can be obtained from the Disposal Release Order (DRO) and the disposal candidate markings.

c. Once completed the SAVES card should be attached to the DRO and forwarded through the challenger's supervisor to the Distribution Management Division (DMD), Directorate of Distribution for processing. The challenger will be notified of all findings/results.

2. PART TWO OF DLA FORM 1757 - DISTRIBUTION MANAGEMENT DIVISION

The DMD will suspend the DRO action, complete the appropriate blocks of the SAVES, annotate the date forwarded, and forward via a control letter to the challenged items managing DSC POC as follows:

Defense Construction Supply Center
ATTN: DCSC-OMR
Columbus, OH 43216-5000
(AV 850-3883)

Defense General Supply Center
ATTN: DGSC-OMMR
Richmond, VA 23297-5000
(AV 695-3100)

Defense Electronics Supply Center
ATTN: DESC-OMMA
1507 Wilmington Pike
Dayton, OH 45444-5000
(AV 986-5716)

Defense Personnel Support Center
C&T - ATTN: DPSC-TSO (AV 444-3062)
MED - ATTN: DPSC-ASI (AV 444-2164)
POLICY - ATTN: DPSC-LX (AV 444-4447)
2800 South 20th Street
Philadelphia, PA 19101-8419

Defense Industrial Supply Center
ATTN: DISC-OBA
700 Robbins Avenue
Philadelphia, PA 19111-5096
(AV 442-2407)

3. PART THREE OF DLA FORM 1757 - DEFENSE SUPPLY CENTER

a. The DSC will be allowed three weeks from the date forwarded by the initiating depot to process the SAVES card. The DSC will internally distribute the SAVES card to the appropriate item manager for review. The item manager will research the challenged item to determine if the disposal action is valid. If the disposal action is found to be invalid, the item manager will continue research to determine if disposal actions are in progress and/or completed at other storage sites. If so, the appropriate action to cancel the DROs and/or recoupment of the disposal items will be taken.

b. When the item manager has completed the review/evaluation of the disposal action, the SAVES card will be annotated as appropriate. If the determination has been made to retain the item and retention/recoupment actions at other sites have resulted, the quantity and the dollar value total (quantity SAVED X unit price) of the SAVED item will be entered on the SAVES card as appropriate. The item manager will return the completed SAVES card to the DSC POC. The DSC POC will annotate the SAVES card with the date forwarded and return to the initiating depots' DMD. (Record keeping and reports are not required by the DSC).

4. PART FOUR OF DLA FORM 1757 - DISTRIBUTION MANAGEMENT DIVISION

Upon receipt of the completed SAVES card from the DSC POC, the DMD will take action as follows:

a. The DMD will obtain the appropriate SAVES suspense card and the DRO:

(1) If DISPOSE: Conspicuously annotate the DRO as CHALLENGED (to prevent any further challenges of the item) and continue DRO processing.

(2) If CANCEL: Hold for DSC input of DIC AC_ document to cancel DRO action.

b. The DMD will complete the SAVES card to include the information concerning materiel saved at other storage sites, and forward it to the Challenger. Rebuttals and/or resubmissions of challenges are inappropriate and will not be accepted by the DMD.

c. The DMD will retain the completed SAVES card for reporting purposes.

5. FOLLOWUP PROCEDURES

The DSC will have approximately three weeks from the date forwarded by the initiating depot to process the SAVES card. The followups will be accomplished at three week intervals, as required. The followups will consist of a routine message citing the SAVES control letter, the DRO document number and the followup identification (i.e., first followup etc.). A copy of the SAVES followup will be directed to the Defense Logistics Agency, ATTN: DLA-OWO (Depot Operations Division). The third and final followup will be directed to the Depot Operations Division (DLA-OWO) for action. The Depot Operations Division (DLA-OWO) will assume responsibility for obtaining a response from the managing DSC. No further actions will be required from the initiating depot until resolved by DLA.

6. REPORTING REQUIREMENTS

a. The DMD is required to provide to HQ DLA, ATTN: DLA-OW a quarterly report of the SAVES program. The required format and data elements are as follows:

DEPOT SAVES PROGRAM

Challenges to Item Managers:

a. Disposal Release Orders Received: _____.

b. Disposal Release Orders Challenged: _____.

c. Materiel Recovered:

	LINES	DOLLAR VALUE
(1) DPSC		
(2) DGSC		
(3) DISC		
(4) DESC		
(5) DCSC		
(6) OTHER		
TOTAL	_____	_____

b. This information will be included as an attachment to the quarterly Physical Inventory Performance Report (RCS DD-M(Q)935).

c. The DSCs are not required to maintain SAVES records or produce reports.

CHAPTER 13

GOVERNMENT FURNISHED MATERIEL

CHAPTER 13

GOVERNMENT FURNISHED MATERIEL

SECTION I - GENERAL

313101 - PURPOSE

This chapter prescribes responsibilities and procedures governing the processing of loans, issues, and receipts of Government Furnished Materiel (GFM) for the purpose of manufacture.

313102 - SCOPE

The provisions of this chapter cover specific procedures as follows:

a. Issues or loans of materiel to contractors.

b. Issues of materiel to DoD manufacturing activities.

c. Return of completed items, Government Loaned Property (GLP), and unused DLA-owned materiel to depot stocks from the above.

313103 - RESPONSIBILITIES

Defense depots, DSCs with a depot type activity supply operations, and DoD manufacturing activities will implement the procedures prescribed herein. Specific responsibilities are as follows:

a. Defense depots and DSCs with a depot type activity supply operation.

(1) Process receipts and issues of GFM IAW special instructions received from the DSCs and as outlined in chapters 3 and 4.

(2) Process adjustments IAW chapter 5.

(3) Return DLA-owned materiel to stock IAW instructions received from DSCs.

(4) To maximum extent feasible, ship request for GFM from the same lot number, contract number, and contractor.

(5) Process shipments of Government Furnished Textile Materiel IAW DLAM 4140.2, Volume I, Part 1, Chapter 25.

b. DoD manufacturing activities.

Forward completed items, GLP, and unused DLA-owned materiel to depots with proper shipment markings and documentation.

313104 - INPUT AND OUTPUT DOCUMENTS

No special action required relevant to using computer input and output documents for GFM is developed in this chapter. Procedures as outlined in chapters 3 and 4 will be used as a basis for computer input and output requirements.

313105 - CODES - RECORDS

a. Codes

(1) Codes utilized in conjunction with GFM transactions, other than shoe lasts, are described in detail in appendices A-5, A-12, and A-15.

(2) Codes utilized in conjuction with shoe last transactions are described in detail in appendices A-15 and A-16.

b. Records

(1) In the handling of textiles, one copy each of DD Form 1348-1, Release Receipt Document, and Shipment Planning Worksheet (SPW) signed by the contractor's representative is to be filed with one copy of the DD Form 1527, Unit Load Tally Sheet (appendix C-32), in completed GFM File.

(2) In the handling of other GFM such as shoe lasts, two copies of SPW will be forwarded to the DSC concerned for record purposes.

SECTION II - ISSUE TRANSACTIONS

313201 - SHIPPING PROCEDURES

a. Shipment of GFM will be accomplished on DD Form 1348-1 except for shoe lasts which will be shipped on SPW.

(1) Textiles are provided to contractors under two methods, via bailment and nonbailment. The methods of shipment are distinguished by the Advice Code in pos. 65-66 of DD Form 1348-1 or exception data furnished by the DSC. Exception data will include complete routing instructions.

NOTE: BAILMENT - The method of issuing GFM to contractors whereby the contractors pay transportation costs and dictate the mode of shipment. NONBAILMENT - The method of issuing GFM to contractors whereby the Government pays transportation costs and determines the mode of shipment.

(2) Under the bailment method the following specific criteria apply:

(a) The RDD is the date shipment must be available for movement to the contractor or picked up by the contractor's carrier.

(b) An MRO will be transceived utilizing appropriate Advice Code 8A, 8B, or blank in pos. 65-66 to facilitate mechanical processing.

(c) An MRO may be received via mail as an exception MRO when directing use of methods of shipment other than those for which codes have been provided. Exception data given will contain complete written instructions in Remarks.

(3) Under the nonbailment method, the following specific criteria apply:

(a) The RDD includes shipping time and is the date when shipment is to be delivered to the contractor's plant.

(b) MROs will be received via mail as exception MROs. Exception data given will contain complete written instructions in Remarks to include complete routing instructions.

(4) Project Code 2G7 will be recognized in pos. 57-59 as identifying shipments of GFM to commercial contractors.

b. Special instructions applicable to shipment of Government Furnished Textile Materiel.

(1) Identify GFM MROs by Purpose/Condition Code HA in pos. 70-71.

(2) Ship over or under in full rolls and/or containers, whichever is nearer to quantity requested on the MRO. In the case of tape or webbing, containers may be broken to obtain the required number of full rolls to satisfy the quantity shown on MRO. Under no circumstances will any materiel be cut to make a shipment equal the exact quantity ordered. In all cases, indicate on the Release Document and MRCC the actual quantity shipped.

(3) A maximum of 10 percent short lengths of all materiels, excluding narrow fabrics (tape and webbing), is authorized to be shipped except when special instructions are furnished by the DSC.

(4) A copy of DD Form 1348-1 and one copy of the Unit Load Tally Sheet will be forwarded to the appropriate DSC upon completion of shipment or when shipment is picked up.

(5) Transportation Officer will ensure on contractor pickups that the signature of the truck driver is obtained on a copy of DD Form 1348-1 or SPW and retained in transportation files.

c. Special instructions applicable to shipment of Government furnished shoe lasts.

(1) Shipments will be accomplished on SPW in lieu of DD Form 1348-1 and no Unit Load Tally Sheet is required.

(2) The item description block of the SPW will contain a full item description utilizing a maximum of nine spaces:

EXAMPLE: SL 12.5XL
EXPLANATION: SL = Shoe Last
Blank
12.5 = Size 12 1/2
XL = Extra Large

(3) Shoe lasts, Purpose/Condition Code A/A, will be shipped in burlap bags by size, 25 pairs to a bag. A shipment of less than 25 pairs of mixed sizes may be placed in one bag and so indicated on the shipping document. Each bag is to be identified with a tag showing MIL Number, NSN, Size, Quantity, and Bag Number.

(4) A shipment of less than the quantity requested will be indicated by circling that quantity in red and annotating the actual quantity shipped in the quantity column on the shipping document.

(5) Distribution of the SPW.

(a) One copy in the number one bag.

(b) One copy mailed to consignee.

(c) Two copies mailed to DSC.

(d) Original copy for Transportation File.

(6) Transportation Officer will ensure, on all contractor pickups, that the truck driver's signature is obtained on the original copy of the SPW.

313202 - DENIAL PROCEDURES

a. All partial or complete denials of GFM will be reported by telephone to appropiate DSC and confirmed by Materiel Release Denial Card (Appendix A-6). Shipment will not be effected on partial denials unless so instructed by DSC.

b. For shoe lasts, denials will be made only when no shoe lasts of the NSN requisitioned are available.

SECTION III - RECEIPT TRANSACTIONS

313301 - RECEIPT PROCEDURES

a. Textiles

(1) Receipts of materiel, issued as GFM from contractors and DoD manufacturing facilities, will be accomplished on DD Form 1483 and processed IAW chapter 3.

(2) Textile short pieces in issuable condition will be recorded and reported to the DSC in Condition Code C.

(3) Two copies of DD Form 1483, annotated with actual quantity received, to be forwarded to the appropriate DSC.

b. Shoe Lasts

(1) Receipts of shoe lasts from footwear manufacturers will be accomplished on DD Form 1483. The Document Number is contained in blocks 30-43.

(2) Shoe lasts are to be shipped in burlap bags, and contractors are required to affix tags (DPSC 276-1) to each bag showing Manufacturer, Contractor Number, B/L Number, Size, and Quantity.

(3) Tallying-in will be accomplished by using the quantities as shown on the tag affixed to the burlap bags. Annotate the quantity received on DD Form 1483.

(4) Transceive, to the appropriate DSC, the amount received, in Purpose/Condition Code A/A, utilizing the Document Number as shown in blocks 30-43 on DD Form 1483.

(5) Mismatched shoe lasts, in appropriate tagged containers (shown as "Each" in the UI Column on DD Form 1483) will be tallied in and annotated on DD Form 1483 in Quantity Received Column. These quantities will not be transceived. Two copies of the annotated DD Form 1483 will be mailed to the DSC concerned.

(6) After receipt, containers will be forwarded to the shoe last repair area for classification, repair and necessary adjustment action to the accountable records.

313302 - GENERAL INSTRUCTIONS

When advance information is available, DSCs will furnish PMRC (DIC DWH) to the distribution activity scheduled to receive the unused GFM. The Materiel Receipt Card (other than Procurement Instrument Source) will be prepared in the format of appendix B-21 using DIC D6H. This procedure also applies to the return of loaned items necessary for the manufacturer of the end item but which do not become a part of the finished product.

CHAPTER 14

INVENTORY TRANSACTIONS FOR MILITARY SERVICE-OWNED MATERIEL

SECTION I - GENERAL

314101 - PURPOSE AND SCOPE

This Chapter provides standard detailed instructions for processing inventory transactions involving materiel accounted for on the DSC inventory control record and stored in authorized DLA distribution depots - but owned, financed and managed by the United States Army, Navy, Air Force, or Marine Corps. It is applicable to defense depots and DSCs with a collocated depot type activity and is of interest to the Military Service(s) owning materiel accounted for on DSC inventory control records and stored in DLA distribution depots.

314102 - EXCLUSIONS

This chapter does not pertain to service-owned materiel which is stored in DLA-managed distribution depots in segregated storage and accounted for on inventory control records maintained or prescribed by the owning Military Service. Under these circumstances, storage of service-owned materiel in DLA-managed depots is on a space-available basis. The terms of negotiated Interservice Supply Support Agreement will dictate the storage services performed by the DLA establishment and the inventory transaction reporting system used in the execution of these services.

314103 - DEFINITION OF TERMS

a. Accountability. The term, "custodial accountability", is defined as the obligation to maintain records of item balances, in accordance with the inventory accounting system prescribed by DLAM 4140.2, showing authorized debits, credits, available balances, and such other identifying and supporting data as determined and required by DLA for proper control and administration of recorded balances. Data processing functions attendant to record maintenance is an integral part of this obligation. Quantitative and monetary responsibility for accountable item balances is limited to that directly related to record maintenance and excludes any obligation for computation of requirements, asset reporting of service-owned excess personal property, positioning and redistribution of materiel, financial reporting of supply system inventories, customer billing of issues, and related supply or financial management functions in compliance with Department of Defense issuances and Military Service implementations.

b. Storage Facilities. The terms "DLA distribution depot(s), DLA depot(s), and distribution depot(s)," as used in this chapter are synonymous and are inclusive of the storage facilities listed in DLAR 4140.48 unless otherwise stated. The term "DLAR-managed depot(s)" refers to one or more of the storage facilities listed in DLAR 4140.48 exclusive of Military Service-managed activities.

c. Commingled Stocks. As applied herein, the consolidation for storage purposes of the total quantity of like items in like condition involving ownership of DLA and one or more other agencies, without regard to maintaining ownership identity in the warehouse storage locations. Ownership quantities of commingled stocks will be maintained on appropriate DSC inventory control records.

314104 - POLICY

a. DLA will consider commingling of service-owned stocks of DLA centrally managed items with DLA-owned stocks in DLA principal distribution depots upon request of a Military Service in order to achieve economic benefits such as stock rotation which could not be accomplished in storage activities of the requesting Military Service distribution system.

b. The cognizant DSC, on request of the Military Service, will determine those service-owned stocks of DLA centrally managed items which are eligible under the provisions of DLAR 4140.48 for storage in DLA distribution depots under DLA custodial accountability.

c. DSCs will accept custodial accountability for service-owned materiel which is authorized for commingling in storage with like DLA-owned materiel. The DLA inventory accounting system prescribed in this manual will be used in accounting for this materiel. Coding limitations imposed by the system will not be exceeded. Additional data elements, e.g., stratification codes, project codes, cognizance codes, will not be introduced in the DSC inventory control record solely to accommodate Military Service needs. Receipt, issue and adjustment transaction reporting and processing internal to the DLA distribution system will be identical for all materiel regardless of ownership unless an exception is specifically recognized.

d. Positioning of service-owned stocks in DLA storage activities will be in accordance with DLA established stockage patterns.

e. Military Services will not be permitted to establish decks of prepositioned Materiel Release Orders (MROs) at DLA storage activities for service-owned stocks maintained under DLA custodial accountability. The restriction of prepositioned MROs also applies to service-owned stock, maintained under Military Service accountability, which is stored in DLA-managed storage activities.

f. Customer returns into DLA distribution depots for service-ownership under DLA custodial accountability are not authorized except for returns made upon the specific direction of a DSC. Return of materiel to the DLA distribution system will be governed by the credit policy for return of materiel to the Defense Stock Fund (DSF) and receipts will be processed accordingly under DLA ownership.

g. Issues and other disposition of service-owned assets will be made at the owner's direction through the media of requisitions or supply directives submitted to the accountable DSC by the owning Military Service. All instructions to storage activities relative to DLA-owned and service-owned commingled items will emanate from the cognizant DSC as the sole source authorized to direct release or other disposition of these stocks.

(1) Excepted are issues to meet demands placed on the DSC when DLA-owned stocks are depleted. To satisfy these demands, service-owned materiel may be transferred to DLA ownership on the initiative of the DSC. The extent of DLA latitude in this regard will be established by mutual agreement between DLA and the Military Service. Reimbursement to the Military Service for materiel transferred from service ownership to DLA ownership by the DSC will be effected by customer billing action originated by the service.

(2) Excepted also are service-owned assets not meeting the condition or stockage criteria prescribed for acceptance or storage of materiel in the DLA distribution system. Distribution depots are authorized to dispose of service-owned materiel under the provisions applying to DLA-owned materiel.

h. Transportation and handling costs incurred in Military Service-directed actions involving Military Service-owned materiel between DLA distribution depots or from DLA depots to customers, Military Service depots, property disposal activities, or to other consignees will be charged to the owning Military Service. Transportation funds of the owning Military Service will be cited on movement documentation.

i. Discrepancies relating to shipments of Military Service-owned materiel originating at DLA depots which are reported by customers will be adjudicated by the DSC on a case-by-case basis. The DSC will be guided by the provisions of DLAR 7350.2, DLAR 7240.2, and chapter 11, DLAM 7000.1 in making any restitution to the Military Service for shipping discrepancies. All transportation charges involved in return of erroneously shipped materiel or subsequent shipment of correct materiel to the consignee will not be born by DLA unless investigation proves that DLA was responsible for making the erroneous shipment.

j. Within capability, DLA will perform modification of Military Service-owned materiel under the custodial accountability of DLA as requested by the owning Military Service. DLA will bill the owning Military Service for all costs incurred incident to performing the requested modification. If such modification is peculiar to a Military Service requirement and changes the configuration of the item from that of the standard issue item, the modified materiel will be placed in segregated storage and the accountability for the quantity of the modified item returned to the owning Military Service.

k. Classification standards applying to DLA-owned materiel will also apply to Military Service-owned materiel received, stored, or accounted for in the DLA distribution system.

l. Surveillance inspection will be performed on Military Service-owned stocks following the in-storage inspection criteria and cycles established for DLA-owned stocks.

m. Physical inventory of Military Service-owned stocks will be conducted following the procedure and on the schedule prescribed for like DLA-owned stocks.

n. Inventory adjustment losses or gains resultant from surveillance inspections, physical inventories, stock discrepancies including warehouse denial and stock reidentification actions will be assumed by DLA. If the DLA ownership balance (by condition-location) is insufficient to absorb the loss, the residual credit will be apportioned (by ownership-condition-location) to the Military Service(s) on the basis of the ratio each Military Service ownership balance represents to the total recorded balance for the Military Service(s) at the time that the DSC inventory control record is adjusted. (In the case of physical inventory, at the time the DSC inventory cut-off balance is established.) Reimbursement of the Military Service(s) for losses sustained will be effected by issuance of a full return credit allowance to the losing Military Service(s).

o. The DSC will process catalog changes to its inventory control record and will advise distribution depots to effect the necessary remarking or consolidation of stocks in storage, following the storage item change procedures established for the DLA distribution system in chapter 5 of this manual. Management actions related to catalog changes, however, remain the responsibility of the Military Service(s). The owning Military Service will issue disposition instructions for materiel no longer eligible for commingled storage in the DLA distribution system (e.g., items deleted from Federal Supply Catalogs, items changed to Supply Status Code 2) as provided in subparagraph g above.

p. Military Service communication with distribution depots storing Military Service-owned materiel under DSC custodial accountability will be through the accountable DSC unless direct contact is expressly authorized in this chapter. This is not intended to preclude Military Service communication with distribution depots storing Service-managed materiel.

q. Depots will obtain reimbursement from Military Services for warehousing services incident to storing Military Service-owned materiel as prescribed herein in accordance with DoD Instruction 4145.19, Storage and Warehousing Facilities, as implemented by DLAR 4145.9, Storage and Warehousing Services. Reimbursement for inventory accounting, transaction reporting, and asset reporting services incident to custodial accountability functions will be on the basis of a negotiated Interservice Supply Support (ISS) Agreement.

314105 - PROCEDURE

Unless an exception of prohibition is herein stated, the procedures, forms, formats, and coding prescribed for processing receipt, issue and adjustment transactions applicable to DLA-owned materiel apply equally to the processing of like inventory transactions for Military Service-owned stocks. In this regard, special instructions in the following sections of this chapter either modify processing procedures prescribed in other chapters of this manual or establish inventory accounting and transaction reporting procedures peculiar to Military Service-owned materiel.

314106 - CHANGE OF OWNERSHIP

There is no need for distribution depots to be advised when change-of-ownership actions involving commingled materiel are effected by record change only.

SECTION II - ESTABLISHMENT OF CUSTODIAL ACCOUNTABILITY

314201 - GENERAL

Custodial accountability will be transferred to the DSC on authorized shipment of Military Service-owned materiel into DLA distribution depots from Military Service storage points or Military Service customers, or will be assumed by the DSC on change of ownership (DLA to Military Service) for materiel in storage in DLA depots.

314202 - IN-SHIPPED MATERIEL PROCESSING

a. In-shipped materiel is limited to that meeting the eligibility criteria of DLAR 4140.48. If on inchecking, the distribution depot determines the materiel to be other than equal to or better than the condition code in pos. 71 of the Prepositioned Materiel Receipt Card, the receipt will be reported to the accountable DSC with the proper condition code in pos. 71 of the Materiel Receipt Card(s), IAW paragraphs 303401 and 303402, Chapter 3, of this manual. Military Service-owned materiel, in other than the acceptable condition, however, will not be commingled with DLA-owned materiel but will be stored in segregated storage under Military Service accountability. If disposition instructions are not received within 90 days, the distribution depot will transmit followup to the accountable DSC.

b. Unserviceable uneconomically reparable materiel will be automatically shipped to the PDO as outlined in chapter 3, paragraph 303402c.

SECTION III - TERMINATION OF CUSTODIAL ACCOUNTABILITY

314301 - GENERAL

The DSC will be relieved of custodial accountability on effecting shipment of Service-owned materiel from DLA distribution depots to Service storage points, DoD disposal activities, customers or other consignee, or on change of ownership (Service to DLA) for materiel in storage in DLA depots.

314302 - OUT-SHIPPED MATERIEL PROCESSING PROCEDURES

a. MROs:

(1) The distribution depot receives the MRO,, DIC A5_, in the format of appendix B-7, from the DSC.

(2) Process the MROs in accordance with appendices D-41 and D-98.

b. DD Form 1348-1 - Distribution depots will prepare a DD 1348-1 and effect shipment directed by the MRO, using Service transportation funds cited in the remarks field of the MRO if transportation charges are incurred. Distribution depots will not make upward or downward adjustment in the quantity shown on the MRO. Exact quantity will be shipped; therefore, Confirmation DIC ARA (Adjustment, quantity field indicates quantity overshipped due to item packaging characteristics) and Confirmation DIC ARB (Adjustment, quantity field indicates quantity undershipped due to item packaging characteristics) are inappropriate and will not be used. See section V for reimbursement for warehousing services.

c. Materiel Release Confirmation Card - The distribution depot prepares the Materiel Release Confirmation Card, DIC ARO, in the format of appendix B-14 for the quantity actually shipped and forwards to the DSC.

d. Materiel Release Denial Card (MRD) - The distribution depot prepares the MRD, DIC A6_, (in the format of appendix B-8) with approximate Management Code shown in appendix A-13 entered in pos. 72 to indicate reason for transaction for the quantity denied following normal practice and transmits to the DSC that directed the shipment.

314303 - CATALOG CHANGES

a. General - Distribution depots will be advised to effect the necessary remarking or consolidation of commingled stock following procedures in chapter 5.

b. Stock Segregation Notice (SSN):

(1) The SSN, originated by the DSC, as a result of certain catalog changes, identified by DIC CNS, in the format of appendix B-209, substituted for the MRO is received by the distribution depot. In that the MOWASP computer system is not now programed to recognize a CNS input, the CNS input will appear on the Document Reject Listing, appendix F-113, in card image of appendix B-209.

(2) The distribution depot will select the quantity of commingled stock indicated in pos. 25-29 and store in segregated storage under direct accountability and control of the Service ICP indicated in pos. 78-80 of the CNS card.

c. Materiel Release Confirmation Card - The distribution depot reports the segregated quantity to the DSC (pos. 67-69 of CNS Card) by Materiel Release Confirmation Card, DIC ARO, in the format of appendix B-204. This confirmation will be made directly to the DSC bypassing the MOWASP computer.

d. Materiel Release Denial Card (MRD) - The distribution depot prepares the MRD DIC A6_, (in the format of appendix B-8) with appropriate management code in pos. 72, for the quantity denied, responding to the SSN as it would to an MRO and forwards to the DSC (pos. 67-69) originating the SSN.

e. Materiel Receipt Card - Concurrently with the Materiel Release Confirmation Card, the distribution depot prepares the Materiel Receipt Card, prepared on DoD Materiel Receipt Document identified by DIC D6Z, for the segregated quantity and forwards to the owning service ICP indicated in pos. 78-80 of the SSN.

SECTION IV - FOLLOWUP AND CANCELLATION ACTIONS

314401 - FOLLOWUP AND CANCELLATION ACTIONS

a. Followup or cancellation actions to distribution depots on open MROs with Advice Codes 8D through 8G in pos. 65-66 are inappropriate and will not be processed to depots.

b. This prohibition does not apply to requisitions (including Referral Orders) or Supply Directives ordering outshipment of Service-owned materiel by MRO or Supply Directives, identified by Advice Code 8H ordering segregation of commingled stock by SSN (DIC CNS). Section II of chapter 4 applies in processing cancellation of followup action related to either the MRO or the SSN in these circumstances.

SECTION V - CROSS-SERVICING OF WAREHOUSE SERVICES

314501 - REIMBURSEMENT FOR WAREHOUSING SERVICES

Defense depots and DSCs with storage activities will provide cross-servicing of warehouse services to Services under policies prescribed in DLAR 4145.9. Storage will report to the Comptroller the cost of services rendered not less frequently than monthly, to obtain reimbursement in accordance with DLAR 4145.9 from the Service whose materiel is stored and handled.

314502 - INSTRUCTIONS FOR REPORTING GROSS SPACE CROSS-SERVICED

a. Defense depots, DSCs with storage activities, and Service Installations (as listed in Enclosure 1 of DLAR 4145.3) are responsible for preparing and submitting reports in DD Form 805, Storage Space Utilization and Occupancy Report, in accordance with the instructions detailed in DLAR 4145.3.

b. Defense depots and DSCs with storage activities will allocate and control net storage space for non-DLA commodities as directed by HQ DLA.

c. Storage areas, DS/T will report in units of square feet occupied for Gross Space Cross-Service identified to service, on DLA Form 527, Space Recapitulation Record (appendix C-83) as prescribed in chapter 63 and forward through MSO to Office of Planning and Management who will prepare DD Form 805 in accordance with appendix E037 P.

CHAPTER 15

ASSEMBLY/DISASSEMBLY AND ALTERATION, CONVERSION AND MODIFICATION PROCEDURES

CHAPTER 15

ASSEMBLY/DISASSEMBLY AND ALTERATION, CONVERSION AND MODIFICATION (ACM)

SECTION I - GENERAL

315101 - PURPOSE

This chapter prescribes the responsibilities and procedures governing the assembly/disassembly and alteration, conversion and modification (ACM) actions directed by the DSC. It includes the related functions associated with the issues to and receipts from DoD contractors and other DoD activities in support of these actions.

315102 - SCOPE

The provisions of this chapter are applicable to DLA Depots having an assembly/disassembly and ACM mission responsibility.

315103 POLICY

a. To ensure maximum utilization of assembled units and to preclude unnecessary refurbishing costs, only material with acceptable remaining shelf-life or in acceptable condition will be incorporated into kits and assemblies.

b. Kits and assemblies with minor components missing, but which are technically and functionally complete, may be shipped in an incomplete condition when so directed by the DSC.

c. Multiple managed items received and marked for a particular assembly directive will be processed in accordance with the provisions of chapter 21 of this manual.

d. Controlled substances, sensitive, Drug Abuse Control and Pilferable Items assigned to or removed from kits and assemblies will be managed in accordance with the provisions of chapter 68 of this manual. All controlled substance items will be packed for shipment, set aside and identified with the end item NSN, build directive number and parent assembly. These items will be shipped separately but concurrently with the parent assembly.

e. The provisions of DLAM 4155.5 - Quality Control Depot Serviceability Standards, apply to items contained in kits and assemblies.

f. No assembly or disassembly action will be accomplished without reimbursement of costs by the DSC.

315104 - RESPONSIBILITIES

a. Directorate of Storage and Transportation will:

(1) Receive all Assembly/Disassembly and ACM Directives, Project Orders (DLA Form 531) and correspondence from the DSC. Check to assure that sufficient funds and all instructions necessary for the accomplishment of the directed action are included. (See paragraph 315201.)

(2) Accept Build Directives which can be accomplished within cited fund and time limitations; accepted copies of directives/project orders will be routed through the local Accounting and Finance Division, Office of the Comptroller, to the applicable DSC to ensure that the local office is aware of reimbursable orders accepted. See (7) below.

(3) Coordinate requirement for additional funds with Office of Comptroller who will submit request to the DSC.

(4) Perform necessary assembly/disassembly and ACM actions.

(5) Establish and maintain management controls necessary to assure that required assembly/disassembly and ACM actions are accomplished in a timely manner and within dollar limitation cited in the project order.

(6) Return to stock or otherwise dispose of materiel generated from disassembly and ACM actions in accordance with instructions received from the DSC. The provisions of chapter 3 will be followed in disposing of unserviceable and uneconomically reparable items. Materiel Receipt Card (MRC), DIC D6L, with Condition Code H and Management Code M will be transmitted to the DSC.

(7) Provide the Accounting and Finance Division with data on work accomplished on accepted directives (subparagraph a(2) above) in order that reimbursable job orders will be assigned for such purposes, and that the Comptroller may assure reimbursement for work performed. Information will be submitted on the Job Order(s) assigned to collect reimbursable information.

(8) Prepare and disseminate documents required for proper accounting.

(9) Prepare required reports.

b. Office of the Comptroller will:

(1) Receive Project Order from the Directorate of Storage and Transportation. Execute as the acceptance authority and make appropriate disposition, including copies to the DSC.

(2) Request additional funds from the DSC when required.

(3) Maintain a Job Order Accounting System for the accumulation of cost associated with the performance of the Assembly/Disassembly directives received.

(4) Perform required billing action.

315105 - ASSIGNMENT OF BUILD DIRECTIVE OR DISASSEMBLY DIRECTIVE NUMBERS

Directive numbers will be assigned to assembly/disassembly and ACM actions by the DSC. The number will be cited in all directives issued and will appear in pos. 54-56 of MROs, PMRCs or other DD Form 1348 or documents related to these actions. Field position 54 will always be numeric 7 for ACM actions and 7 or 8 for assembly/disassembly actions. (Usually 7 for Minor and 8 for Major Assemblies.)

315106 - SERVICE IDENTIFICATION NUMBERS

Service identification numbers are numbers (usually serially sequenced) assigned to major assemblages by a Military Service to permit individual identification of each separate assemblage built. The numbers are furnished to depots in the assembly/disassembly directive for inclusion in the marking and documentation of the assemblage to which assigned. An example of the service identification number is the consignee combination and serial number assigned by the Department of the Army.

315107 - PACKING, PACKAGING AND PRESERVATION

Instructions as to level of pack and preservation are usually included in the assembly order. Should such instructions be lacking, sets will be packed and preserved as level A pack.

SECTION II - MATERIEL FURNISHED FOR ASSEMBLY/DISASSEMBLY

315201 - ASSEMBLY/DISASSEMBLY DIRECTIVES

a. Assembly or disassembly directives, as applicable, will be received from the DSC and will contain a directive number, service identification number for major assemblages, NSN quantity, packing, marking, shipping, or other applicable data, instructions for preparation of the packing list, appropriate completion and shipping dates. Disassembly directives will also contain appropriate instructions for the disposition of items removed from an assemblage or may contain instructions to dispose of the entire kit. A project order authorizing the expenditure of funds to perform the directed action will accompany the directive. The Office of Comptroller acts as the office of principal interest in all funding matters, and will be responsible for the acceptance of the project order or letter from the Build Directive which is billed under the Service Order concept.

b. Selected minor assemblies, sets, kits or outfits are carried in stock and issued under a single NSN. The DSC will ensure adequate levels of supply for component items for minor assemblies based on component item demand experience and/or forecast demands for assemblies to permit an uninterupted flow in meeting customer requirements. Periodic assembly directives will be furnished to assembly activities to ensure timely replenishment of stock levels, consistent with the availability of component items.

315202 - INVENTORY ACCOUNTING PROCEDURES

To provide that transactions are properly coded and that required data are recorded for financial accounting, shipments will be directed by MRO (DD Form 1348-1). MROs for assembly/disassembly actions will have the directive number entered in pos. 54-56, in lieu of the distribution code. The entry in pos. 54 will always be numeric 7 or 8. Advice Code 2D (furnish exact quantity requested, i.e., do not adjust to unit pack quantity) will be entered in pos. 65-66.

315203 - ISSUES TO ASSEMBLY AND RECEIPT FROM DISASSEMBLY

a. Issue transactions will be processed in accordance with the provisions of chapter 4 of this manual.

b. DLA managed items, kits, sets or minor assemblies received in support of an assembly directive will be processed in accordance with the provisions of chapter 3 of this manual.

c. Multiple managed items received in support of an assembly directive will be processed in accordance with the provisions of chapter 21 of this manual.

d. Serviceable receipts generated from disassembly actions will be documented by the preparation of a MRC (DIC D6L Management Code Z) for transmission to the DSC.

315204 - UNSERVICEABLE, UNECONOMICALLY REPARABLE, CONDEMNED, OBSOLETE AND DELETED ITEMS

a. Transfer unserviceable, uneconomically reparable, condemned, obsolete and deleted items resulting from disassembly actions to the DPDO regardless of dollar value. The DSC will be advised by the transmission of a MRC (DIC D6L, Condition Code H, and Management Code M). Equipment items will be cannabalized to recover usuable parts when applicable (i.e., when the entire kit is not to be disposed of), prior to transfer to the DPDO. Parts recovered will be reported to the DSC under MRC, DIC D6L. Under either circumstance (entire kit, or parts thereof) only items authorized for transfer to a DPDO will be released (see DoD 4160.21-M, chapter IV, paragraph D and Chapter VI).

b. Unserviceable controlled substance items, regardless of dollar value, will be processed in accordance with the provisions of chapter 68 of this manual. Materiel Receipt cards will be transmitted to the DSC in accordance with subparagraph a above.

c. Report losses of items in accordance with the provisions of section IV of this chapter.

315205 - MATERIEL SHORTAGES

a. ASSEMBLY ACTIONS - DLA Depots discovering discrepancies in receipt on DD Form 1348-1 documents for assembly actions will forward Form 364 (Report of Item Discrepancy). If the depot or DSC cannot locate the missing quantity, a new requisition/MRO will be issued for the balance.

b. DISASSEMBLY ACTIONS - DLA Depots will report shortages resulting from non-recovery of component items from disassembly actions in accordance with the provisions of paragraph 315402 of this chapter.

315206 - NARCOTICS, DRUG ABUSE, SENSITIVE, DATED ITEMS AND OTHER ITEMS

a. Normally the assembly directive will identify all items to be included in a given assembly. Item accountability will be dropped from the stock record and accounted for financially as assembly/disassembly inventory. Accordingly, if narcotics or other items requiring special handling are not packed (stored) with the assembly they will be physically segregated and identified to the parent assembly. Such items will not be included in any subsequent inventory count. At the time of shipment such items will be married up with the parent assembly, but shipped separately and concurrently.

b. The MRO for the issue of the assembly will contain data regarding deviations in shipments for MAP, narcotics, and other items which are subject to the provisions of DLAR 4145.11, Safeguarding of Sensitive and Pilferable DLA Items of Supply. Directives will provide further instruction as to the completion and shipment of assemblies. When items already packed must be removed from an assembly before shipment, in compliance with instructions received, they will be returned to stock and reported to the DSC under MRC, DIC D6L.

315207 - PROVIDING MATERIEL TO CONTRACTORS AND MILITARY MANUFACTURERS

Materiel furnished to contractors or military manufacturers in support of a assembly/disassembly or ACM directive will be processed in accordance with procedures contained in chapter 13 of this volume.

SECTION III - ALTERATION CONVERSION AND MODIFICATION (ACM)

315301 - GENERAL

a. End items or component items ordered shipped on a non-reimbursable basis to a contractor or an industrially or non-industrially funded DoD facility for conversion or modification will be in accordance with the MRO provided (DIC D7L). The ACM directive number will be entered in pos. 54-56 in lieu of the Distribution Code. The entry in pos. 54 will always be numeric 7. Dues-in will be established for the items to be returned using DFL. Prepositioned MRCs, DIC DWL, will be forwarded to the distribution depot scheduled to receive the completed end items or unused component items.

b. The MRC (other than Procurement Instrument Source) will be prepared using DIC D6L.

SECTION IV - REPORTS

315401 - GENERAL

DLA Depots performing assembly/disassembly and ACM functions will maintain adequate records of items and quantities received and returned, lost in processing, end items shipped and submit appropriate status reports to ensure that Government property is accounted for properly and that necessary adjustments are made to financial records by the DSC.

315402 - NOTIFICATION OF STATUS/LOSSES FOR ASSEMBLY/DISASSEMBLY, ACM

a. Distribution activities and DoD manufacturing and maintenance facilities will notify DSCs of status and losses during assembly/disassembly, and ACM operations whenever a change in data occurs between the initial build or disassembly directive, and completion of the project. DLA Form 768a, Appendix C-34, Production Control Item Status Feeder Data, reference DLAM 4151.1, chapter 5, will be utilized to notify the DSCs. The DLA Form 768a on an individual basis is exempt from a report control symbol in accordance with DLAR 5000.12, Management and Control of DLA Information Requirements.

b. The notification will contain individual item data, identified to the applicable directive number assigned by the DSC for items lost in processing. DSCs will utilize this information to adjust due-in records, plan placement of future directive actions, and provide reports to the Services on the status of these actions, as appropriate. DLA Form 768a will not be used to report consumption of component items used in the assembly, conversion, or modification of end items. Control is maintained by the simultaneous establishment of dues-in when component items are dropped from the on-hand balance. Losses will be deducted on the financial records from the total dollar value of the standard price of the item reflected in the directive for assembly/disassembly.

c. The notification will be prepared in triplicate, with headings indicating either STATUS or LOSSES. Two copies will be forwarded to the DSC and one will be retained by the assembly/disassembly facility.

(1) The REMARKS column will be used to reflect status/losses and any other pertinent information thereto.

(2) Where a Service identification number has been assigned to a particular assembly, the number must be entered under REMARKS. All entries under REMARKS will be identified with the applicable line number for which status/losses is being reported.

CHAPTER 16

ELECTROSTATIC DISCHARGE SENSITIVE DEVICES

SECTION I - GENERAL

316101 - PURPOSE

This chapter prescribes the standard procedures and organizational responsibilities for processing materials which are susceptible to damage or degradation from electrostatic discharge. The definition of electrostatic charges, referred to in this chapter, are generated and stored on surfaces of ordinary plastics, most common textile garments, personnel handling material when they are not grounded, and many other commonly unnoticed electrostatic generators. The passage of these electrostatic charges through an Electrostatic Discharge Sensitive (ESDS) device may result in catastrophic failure or performance degradation of the part.

316102 - SCOPE

a. These procedures are applicable to HQ DLA and Defense Depots which receive, store and ship ESDS material.

b. Processing specifications contained in this chapter, unless otherwise specified, are to be implemented in addition to, or in conjunction with, existing DLA policy, procedures and standards, as stipulated within the applicable specifications contained in this manual, plus any other regulation that may apply to the processing or handling of ESDS material.

c. ESDS parts, as used in this chapter, are space quality military standard electronic parts as described in MIL-S-19500 for semiconductors and MIL-M-38510 for microcircuits and associated specifications for passive electronic parts.

d. Specifications contained herein apply to JAN Class S, Class B, and any other ESDS microelectronic parts received, stored, and shipped by a DLA depot.

316103 - REFERENCES

a. Memorandum of Understanding between Space Division of the Air Force Systems Command, Sacramento Air Logistics Center of the Air Force Logistics Command, and The Defense Logistics Agency.

b. JEDEC Publication No. 108, Distributor Requirements for Handling ESDS Devices.

c. JEDEC Publication No. 109, Distributors of Military Integrated Circuits.

d. MIL-S-19500, Semiconductor Device Specifications.

e. MIL-S-19491, Packaging of Semiconductor Devices.

f. MIL-M-38510, Microcircuit Specification.

g. MIL-M-55565, Packaging of Microcircuits.

h. The Department of Defense has recognized the problem presented by ESD and has prepared two documents on control measures. The documents, which are not official publications, are intended for information only. The pamphlets are:

(1) DoD-STD-1686 - Electrostatic Discharge Control Program

(2) DoD-HDBK-263 - Electrostatic Discharge Control Handbook.

316104 - BACKGROUND

In early 1985, the Space Division of the Air Force Systems Command, NASA, and the Defense Logistics Agency initiated plans to develop a Government stock of JAN Class S/B space quality parts. The primary purposes of procuring operating stocks are to reduce procurement lead times for space systems in production, and to avoid minimum buy requirements imposed by the part manufacturers. Additional benefits include:

a. Reduce reliability compromises resulting from substitute parts when JAN Class S/B parts are delayed in the procurement cycle.

b. Have spare parts available in the event of emergencies.

c. Increase the availability of JAN Class S/B military standard parts and reduce the need for costly nonstandard source control drawing parts.

316105 - POLICY

a. The depots shall establish and maintain systems, processes, and procedures which are in compliance with the referenced documents in section 316103. Depot quality control procedures are subject to review, analysis and approval at any time by authorized Government representatives. Audits may also be performed by the manufacturer to provide information to improve handling procedures for ESD material. The depot shall provide the necessary information, facilities, and equipment to allow these audits, tests, and inspections to be performed. Any corrective action identified during the audit will be undertaken by the depot immediately.

b. DLA will obtain National Stock Numbers (NSNs) for all required parts, fund, and manage the stock using existing Military Standard Requisitioning and Issue Procedures (MILSTRIP). Under this system, DLA will purchase, receive, store, issue and replenish JAN Class S/B NSNs based on projected program needs.

c. Defense Depot Ogden Utah (DDOU), has been designated as the primary storage facility for all JAN Class S/B NSNs. However, all DLA depots are subject to implementing the specifications and procedures in this chapter, in the event JAN Class S/B parts or any other microelectronic part, subject to damage by electrostatic discharge, are received, stored and issued.

316106 - RESPONSIBILITIES

a. Defense Depots will:

(1) Appoint an ESDS coordinator. Essential responsibilities include: Assuring that the specifications of this manual and cited references are followed; assuring all personnel who handle and process ESDS material are fully trained, and coordinating any audits which may be performed by other Government agencies, manufacturers and users of ESDS material.

(2) Establish an ESDS control program which meets the policies and procedures in this chapter.

(3) Establish static-free work stations that satisfy the requirements of paragraph 316202 specifications and the requirements, policies and procedures in this chapter.

b. Defense Depot ESDS coordinators will:

(1) Control the ESDS control program for the Depot.

(2) Assure that specifications of this manual and cited references are followed.

(3) Assure that all personnel who handle and process ESDS materiel are fully trained.

(4) Coordinate any audits which may be performed by other Government agencies, manufacturers and users of ESDS material.

(5) Maintain an audit trail of actions and correspondence regarding the ESDS program at their Depot.

(6) Stay current with state-of-the-art methods and procedures of ESDS, and incorporate new methods in the Depot ESDS program.

SECTION II - PROCEDURES

316201 - STORAGE

Defense Depots will:

a. Designate a separate storage area, within a heated warehouse, for the storage of JAN Class S/B material. This storage area must be clearly defined and restricted from casual or unnecessary access by warehouse workers. The area does not need to be enclosed, but material should be protected from tampering or unnecessary handling. The ESD storage area should be limited to the upper level(s) where package rack storage aides are available.

b. Condition Code A and L material will be separated and clearly labeled to prevent commingling or inadvertant selection for issue of Code L material.

316202 - WORK STATION

a. The minimum acceptable static-free work station shall consist of the work surface covered with a static dissipative or conductive material attached to ground through a 1M + 10% resistor and a grounding wrist strap with 1M + 10% resistor for each operator. The wrist strap shall be connected to the static dissipative material at a metallic contact or button.

b. Air ionizer shall be positioned so that the devices at the static-free work station are within a 4 foot arc measured by a vertical line from the face of the ionizer and 45 degrees on each side of the line. The ionizer shall be aimed at the devices and operator's hands rather than at the operator.

c. It is the responsibility of the depot to ensure that the static-free work area is clear of unnecessary static hazards, especially plastic and vinyl, including such personal items as plastic cups, combs, tissue boxes, cigarette packages and plastic or vinyl purses. Work surface and mats will be kept clean, and mopped as required.

d. The depot will not use antistatic chemical application in any area when raw parts, packages, and/or personnel are exposed to spray mist and evaporation vapors, or apply antistatic spray or solution in any form to energized electrical parts, assemblies, panels or equipment.

e. Hard abused surfaces (floors, table tops, tools, etc.) will be treated each week and after cleaning with antistatic spray.

f. Hard unabused surfaces (cabinets, walls, fixtures, etc.) will be treated each 6 months and after cleaning with antistatic spray.

g. Government furnished and maintained clothing and smocks will be treated with antistatic spray after each cleaning.

h. Care shall be taken in antistatic chemical application to assure that the spray mist solution and evaporation vapors are not applied to raw parts, packages, electrical parts, assemblies, panels or equipment. Personnel shall take appropriate measures to prevent exposure and/or inhalation of antistatic chemicals.

i. ESDS items will remain in their protective container except when actually in work at the static-free station.

j. Ionizer and monitors shall be in operation prior to opening any package and will remain in operation during the entire period items are at the work station.

k. An operator's clothing should never make contact or come in close proximity with ESD items, long sleeves must be rolled up at least as far as the elbow, and conductive smocks will be used when available. Only cotton gloves or antistatic finger cots may be used.

1. Work station will be identified for each location where handling of ESDS material occurs including receipt, packaging, inspection and testing.

316203 - ESDS HANDLING METHODS

a. Prior to item being removed from a package the operator will:

(1) Place package on ESDS work table for a minimum of 3 seconds.

(2) Tools and equipment will be of conductive or dissipative material and will be placed on ESD work table for a minimum of 3 seconds prior to use.

(3) The grounding wrist strap will be placed on the bare wrist, the operator will ensure a snug fit, and assure that the wrist strap is connected to the grounding receptacle.

(4) Operator will place hands (palm flat) on ESDS table for a minimum of 3 seconds.

(5) All operations and inspections on the item should be performed with the item in contact with the ESDS work surface.

(6) Operators will avoid touching leads or contacts on the part, even though grounded.

(7) Plastic snow, polystyrene foam, or other high-dielectric material shall never come in contact with, or be used around, electrostatic sensitive items.

(8) Signs shall be posted at all work stations performing any handling operations with ESDS items. These signs shall contain the following information, or its equivalent:

CAUTION
STATIC CAN DAMAGE COMPONENTS

Do not handle ESDS items unless grounding wrist strap is properly worn and grounded. Do not let clothing or plain plastic materials contact or come in close proximity to ESDS items.

(9) ESD caution signs at work stations and work areas, and labels on ESDS parts and containers, shall be consistent in color, symbols, class, voltage sensitivity identification, and appropriate instructions.

b. Training

(1) Designated personnel processing/handling ESDS material will receive initial training and every 12 months thereafter to maintain proficiency in proper handling methods, and an awareness of current procedures.

(2) Training should include static fundamentals, a review of applicable parts of this specification, and actual applications in the work area.

(3) Training records shall be maintained for each individual. The records shall show dates of training and the topics covered.

316204 - RECEIPT PROCESSING

a. Depots will receive receipt documentation as stipulated in chapter 3, of this manual and also addressed in the DWASP Receipt Users Manual.

b. General policies, procedures, and methods as directed by chapter 3 of this manual apply to receiving JAN Class S/B material, except as outlined in the following paragraphs:

(1) To assist in identification of these items, the manufacturer(s) are required to stamp JAN Class S on the exterior and intermediate containers with 1 inch high block red lettering.

(2) Special Requirement Code T has been assigned as an automated method to further ensure correct identity of this material. (Reference paragraph 316207 for update criteria of the SRC). SRC T will appear on the DWASP Inspection/ Verification Notice (I/VN) CRT screen following the Receipt Information Data Request (RIDR) entry.

(3) Each receipt of JAN Class S/B material will be segregated into individual Lot Date Code (LDC) groups within manufacturer. One unit, equal to the unit of issue, will be randomly selected from each lot and a bare item inspection performed to confirm NSN identity. If a discrepancy is identified, prepare a SF 364, Report of Discrepancy, or initiate Rapid Rod procedures and process IAW established criteria. The total quantity received will be placed in Condition Code (CC) L. The item inspected will be conspicuously marked and placed with the material to be forwarded to storage to ensure this item is available for shipment to the testing facility.

(4) If no receipt discrepancy is encountered, prepare a DD Form 1222, Request for and Results of Tests, for each LDC group within manufacturer. The DD Form 1222 will be processed IAW established criteria, reference DLAM 4140.2, Volume III, Part 6, Appendix E-033 P.

(5) An individual RIDR, I/VN and Material Movement Document (MMD) will be generated for each manufacturers LDC group. In addition to the prescribed entries on the I/VN, enter the Contractor and Government Entity (CAGE) code plus annotate the LDC in the Date PK/EXP field, on the MMD, i.e., XX month, XX week, plus one alpha character when appropriate.

316205 - STORAGE PROCESSING

a. In the predesignated storage area, establish a new location for each LDC within manufacturer. Note: Incoming material may be commingled in an existing location, providing the manufacturer and the LDC are identical with the material in the existing location.

b. Until the automated system, (MOWASP/DWASP) provides the capability for automatic recording of the CAGE/LDC, the following procedure will apply:

(1) In the ZBA/Long Form stow, enter the CAGE (5 position A/N) in the lot number field for each location.

(2) In the ZBA/Long Form stow, enter the first four positions of the LDC (4 position numeric, MO/WK) in the date of pack field.

(3) In the first position of the Type Storage Code, enter the alpha character that may be part of the LDC. These entries also apply to ZBA stow updates. (Note: Until the automated system is changed (MOWASP/DWASP), the long form stow will cause the current month and year to be entered in the locator subrecord in the date of pack field. In this event, resubmit the correct date (YR/WK) with a ZBA Action Code FZ).

316206 - ISSUE PROCESSING

a. MROs without exception data will be received into depot system and processed IAW chapter 4 of this manual.

b. When the issue documentation is received at the designated storage area, a locator inquiry must be run to obtain the location(s) for each LDC (year/week). The MRO quantity must be selected from the oldest LDC and when necessary, from remaining LDC(s), in ascending order (FIFO). Following this action, normal issue procedures will apply.

c. If an MRO is received with exception data, honor these provisions as stated, except when the exception data cites the requisite for the depot to ship a specific LDC and/or CAGE, when the following will apply:

(1) Obtain the locator subrecord for the NSN within MRO condition code.

(2) Determine LDC and/or CAGE and select the MRO quantity from these specific entity(s). If the MRO quantity is not available, for cited LDC and/or CAGE, select the residual quantity from the oldest LDC(s)/CAGE(s), by condition code, in ascending order. If sufficient quantity for the NSN and condition code is not available, invoke standard warehouse refusal procedures.

316207 - SPECIAL REQUIREMENT CODE

Special Requirement Code (SRC) T has been authorized for use to identify JAN CLASS S/B NSNs. These can be updated with DIC - ZBC after a master record has been established on the locator. DDOU is assigned responsibility to enter SRC T for all JAN CLASS S/B NSNs.

CHAPTER 17

ISSUES TO AND RECEIPTS FROM MAINTENANCE ACTIVITIES

TABLE OF CONTENTS

SECTION IV	REPORTING	
317401	Reporting of Status/Losses of Items Undergoing Repair	III-1-17-3

CHAPTER 17

ISSUES TO AND RECEIPTS FROM MAINTENANCE ACTIVITIES

SECTION I - GENERAL

317101 - PURPOSE

This chapter prescribes uniform procedures for the following:

(1) Issue of Condition F and G end items to DoD Maintenance Activities for repair, and return of completed items to applicable distribution activities.

(2) Issue of Condition G end items and related repair parts/components to distribution activities, and return of completed end items and unused spares to depot stocks.

317102 - SCOPE

These procedures are applicable to the Directorate of Storage and Transportation and at DLA defense depots.

SECTION II - PROCEDURES

317201 - REPAIR OF CONDITION E MATERIEL

a. Materiel classified as condition E will be restored to an issuable condition by Directorate of Storage and Transportation personnel. Repair/restoration of materiel of this nature is considered to be part of normal stock readiness program; therefore, all costs incident to the repair/restoration action will be born by the distribution activity.

b. Project orders and MROs will not be initiated by the accountable DSC for repair/restoration of condition E materiel.

c. Subsequent to repair/restoration of condition E materiel, the Directorate of Storage and Transportation will report condition changes to the applicable DSC in accordance with instructions contained in chapter 5 of this volume.

317202 - PROCESSING PROJECT ORDERS

a. Condition F and G materiel will be reported to the accountable DSC by the Directorate of Storage and Transportation on DD Form 1225 or SF 364 as prescribed in chapters 3 and 5 of this volume.

best copy available

b. Based upon review of DD Form 1225 or SF 364 indicating that completion of Condition G materiel can be performed by the reporting distribution activity, the accountable DSC will initiate a project order, (DLA Form 531) in format of appendix C-65. Two copies of the project order will be submitted to the distribution activity for acceptance of work to be performed. For control purposes, a three-position project order number will be assigned by the accountable DSC and will be entered in Block 4 of the project order. The project order number will be perpetuated in pos. 54-56 of all follow-on documentation related to the repair action.

c. The Directorate of Storage and Transportation will process the project order as prescribed in appendix E-065 P.

317203 - SELECTION OF CONDITION F AND G MATERIEL FOR SHIPMENT

a. MROs (DIC A5) in the format of appendix B-7 will be initiated by accountable DSCs and forwarded to distribution activities for shipment of Condition F and G end items to DoD Maintenance Activities and for shipment of certain Condition G end items and repair parts/components to distribution activities. Advice Code 8C (appendix A-12) will be assigned to all MROs involving repair action. The activity address code of the distribution activity will be entered in pos. 45-50 of the MRO when completion of Condition G items is to be performed "in storage."

b. To preclude suspension of MROs by distribution activities, DSCs directing shipment of Condition F and G materiel to DoD Maintenance Activities will ensure that MROs are issued not more than 15 days prior to the FY quarter in which item is scheduled for repair. The Directorate of Storage and Transportation (DST) will coordinate the movement of such materiel with the repairing activity.

c. DST will process repair MROs received from DSCs as prescribed in chapters 4 and 60 of this volume.

d. Upon receipt of MRO for repair of a partial quantity of the total repairables under the FSN, DST will give first priority to those individual items within the FSN costing the least to repair when selecting the items for shipment to repairing activities.

e. Materiel Release Denials and requests for cancellation related to the issue of Condition F and G materiel will be processed in accordance with chapter 4 of this volume.

SECTION III - PROCESSING RETURNS PROCEDURES

317301 - REPORTING RECEIPTS OF RETURNED MATERIEL

a. DSCs will furnish Prepositioned Materiel Receipt Cards, (PMRC) appendix B-19 (DIC DWH or DWM), to distribution activities scheduled to receive items from repairing activities. The project order number assigned to the original project order will be perpetuated in pos. 54-56 of the PMRC.

b. DST will report receipt of materiel from repairing activities in the format of appendix B-21, utilizing DIC D6H or D6M, as appropriate, and perpetuating the original document number assigned to the PMRC in pos. 30-43 and the project order number in pos. 54-56. Materiel Receipt Processing will be as prescribed in chapter 3 of this volume.

317302 - REPORTING RECEIPTS OF UNUSED SPARES

DST will report unused repair parts/components generated from completion of Condition G end items to DSCs, utilizing Materiel Receipt Card (DIC D6H) appendix B-21.

SECTION IV - REPORTING

317401 - REPORTING OF STATUS/LOSSES OF ITEMS UNDERGOING REPAIR

DLA Form 768A (appendix C-34), will be utilized by DST to report status/losses to accountable DSCs resulting from completion of Condition G materiel. The report will be prepared and submitted as prescribed in appendix E-031 P.

CHAPTER 18

FOREIGN MILITARY SALES (FMS) AND MILITARY ASSISTANCE PROGRAM (MAP) GRANT AID

SECTION I - GENERAL

318101 - PURPOSE

This chapter prescribes policies, procedures, and responsibilities governing the processing of shipments for the MAP. These programs include FMS and MAP Grant Aid.

318102 - SCOPE

a. This chapter is applicable to defense depots and to DSCs with a depot type activity/supply operation.

b. The policies, procedures, and instructions delineated in other chapters of the volume, particularly chapters 4, 60, and 83 will apply to all MAP transactions except as specified herein. This chapter provides additional or special instructions required for processing and application of codes peculiar to FMS and MAP Grant Aid.

c. Utilization of NORS Code 999 does not apply to FMS amd MAP Grant Aid MROs.

318103 - RESPONSIBILITIES

Defense depots are responsible for:

a. Accomplishment of shipments for FMS and MAP Grant Aid and processing related documentation.

b. Appointing a FMS and MAP coordinator, furnish name, telephone extension, and any changes of the MAP coordinators to HQ DLA, ATTN: DLA-OSR. Responsibilities of the coordinator shall include, as a minimum, the monitoring of the implementation of this directive ensuring that the necessary controls are established over all open FMS and MAP MROs.

c. Establishing and maintaining in process controls and management reports necessary to clearly identify all open FMS and MAP MROs and the current status of these MROs.

d. Providing timely response to the monthly reconciliation of open FMS and MAP MROs initiated by DSCs.

e. Maintaining a record of completed FMS and MAP MROs in a closed history file at least 45 days.

318104 - REFERENCE

DoD 4140.17 M, Military Standard Requisitioning and Issue Procedure.

318105 - BACKGROUND

MAP was authorized by the Foreign Assistance Act of 1961 and consists of MAP Grant Aid and FMS. MAP Grant Aid is military assistance rendered for which the U.S. receives no reimbursement. FMS differs from MAP Grant Aid in that it is purchased by the recipient country and is for both defense articles and services.

318106 - 13-DIGIT STOCK NUMBER

The designation NSN is selected as the official nomenclature to be used for identification of the US 13-digit stock number in all materiel management functions. However, in logistics matters involving the NATO Headquarters or the individual NATO countries, the abbreviation "NSN" shall be interpreted to mean "NATO Stock Number".

318107 - MRO MODIFIERS

Only the DSC may initiate MRO modifiers, DIC AM_, for modification of MAP Grant Aid and FMS MROs in accordance with the provision of chapter 4.

SECTION II - CONFIGURATION OF DOCUMENT NUMBER FOR (MAP) GRANT AID AND FMS MATERIEL RELEASE ORDERS (MRO)

318201 - SERVICE

Field position 30 will contain the Service Assignment Code of the U.S. Military Service responsible for administering either the MAP Grant Aid Program Line or FMS Case for process. Service Assignment Codes for MAP use are reflected in appendix A-5.

318202 - REQUISITIONER

Entries are alpha, numeric, or a combination of both. These entries identify the following:

a. Country - Field positions 31-32. A two-digit alpha or alphanumeric code (appendix A-19).

b. Customer Within Country Code field position 33. A one-digit alpha or numeric code to indicate the final recipient or place/port of discharge within the country for FMS and MAP shipments. (See appendix A-22.)

(1) MAP Grant Aid - For Grant Aid transactions. The Customer Within Country Code must always be entered so overseas shipments can be directed to the designated consignee.

(2) Foreign Military Sales (FMS) The Customer Within Country Code must be entered in pos. 33 to provide the shipper identification of the overseas destination. Shipments will only be made to the pos. 33 addressee when an XX appears in pos. 46-47 of the MRO. When materiel is to be shipped to a freight forwarder (MAPAD) as indicated by an entry other than XX or XW in pos. 46-47, the country representative may elect to enter a specific code or a meaningless numeric zero in pos. 33. With the latter condition, the entry in pos. 33 is not meaningful to the supply system but does indicate to the freight forwarder the final customer within country destination.

c. FMS Delivery Term Code pos. 34. A one digit numeric code to identify the method of shipment and point of acceptance by the country representative/freight forwarder for FMS shipment (appendix A-23).

d. FMS and MAP Grant Aid Type of Assistance/Financing Code - Field position 35. A one-digit alpha or numeric code to identify the type of assistance and/or method of financing. This code is categorized by MAP Grant Aid or FMS (appendix A-24).

318203 - MRO FORMATS

FMS and MAP Grant Aid MRO formats will vary from the construction of MROs in support of U.S. Military Services/Agencies. Coding peculiar to MAP Grant Aid and FMS MROs are listed in the foregoing designated appendices and the Military Assistance Program Directory (MAPAD), DoD 5105.38-D.

SECTION III - SUPPLEMENTARY ADDRESS

318301 - FOREIGN MILITARY SALES (FMS)

The supplementary address is used in all FMS transactions as follows:

a. FMS Service Code, pos. 45. The Service Assignment Code of the FMS Country Military Service. These codes are the same as prescribed for MAP Grant Aid use in appendix A-5. (Example B in pos. 45 would indicate Army for country involved.) The entries in this column do not have to correspond to the pos. 30 Service Assignment Code entry, but must be valid in appendix A-5.

b. FMS Offer/Release Code, pos. 46, will contain A, X, Y or Z to specify whether prior notice to the CR/FF is or is not required before release of materiel for shipment. The type of Offer/Release option is prenegotiated between the CR and the responsible U.S. Service administering the FMS case. Shipping depots will abide by the provisions of these codes; however, Offer/Release Option Codes are not applicable to requisitions for Canada (Country Code CN) since FFs are not utilized for Canada and pos. 46-47 is used to denote shipment addresses. Country Option Codes and their explanations are:

OPTION CODE	EXPLANATION
A	Shipments are to be released automatically by the shipping activity without advance notice.
X	Shipments are released automatically or as specified by in-the-clear exception data. X denotes that U.S. is responsible for transportation arrangements.
Y	Advance Notice (NOA) to the CR/FF is required before release of shipment, but shipment may be released automatically if release instructions are not received by the shipping activity within 15 days subsequent to the date of NOA.
Z	Advance Notice (NOA) to the CR/FF is required before release of shipment and specific release/shipping instructions must be received by the shipping activity before shipment may be made.

NOTE: When the shipment is unclassified and is to be accomplished by parcel post/small parcel delivery service, the shipment will be released automatically without a Notice of Availability (NOA) regardless of the entry in pos. 46.

c. If, consistent with the conditions of the FMS case agreements, transportation arrangements for shipments will be accomplished by the U.S. Service, code X will be entered in pos. 46 in lieu of a Country FMS Offer/Release Option Code. When code X is authorized and entered in pos. 46, a code X or W (denoting shipment to an address within the customer country or shipment to an assembly point or staging area) must be entered in pos. 47.

d. FMS Country Representative/Freight Forwarder Code, pos. 47. This entry will be the code as identified in appendix A-25 for designation of CR/FF addresses or X or W to indicate that a CR/FF is not applicable. The CR/FF code will designate the recipient of shipments and documentation.

e. FMS Case Number, pos. 48-50. Contains the specific FMS case designator applicable to the support agreement between U.S. Military Service and the country in pos. 31-32. Case designator will consist of a 3-position alpha/numeric code. The first position will always be alphabetic and the second and third positions may be alphabetic or numeric. The administering U.S. Military Service will always use this code in correspondence for identification purposes.

318302 - MILITARY ASSISTANCE PROGRAM (MAP) GRANT AID

a. On all MAP Grant Aid transactions, the DSAA (Defense Security Assistance Agency) Record Control Number will be entered in manual MRO, block 15, or in pos. 46-50 of the mechanical MRO. An alpha Y will be entered in block 14 or pos. 45. The first position of block 15 or pos. 46 will indicate the last digit of the program year in which the requisitioned item was approved and funded. The requisitioned last four positions of block 15 or pos. 47-50 will indicate the 4-digit program line item number of the program requisitioned item.

b. The Y entry in block 14 or pos. 45 indicates that the contents of the block 15 or pos. 46-50 are not meaningful to the system, but are to be prepetuated in all output documentation.

c. MAP Grant Aid addresses will be selected from the MAPAD using the following procedures.

(1) The Service Assignment Code in pos. 30 will have no bearing in selecting the Ship To address, as it denotes the administering U.S. Military Service in the requisition and the U.S. Military Service which sponsored the address data in the MAPAD.

(2) The country code in positions 31-32 will be matched with the corresponding code in the MAPAD.

(3) The customer within country code in pos. 33 (for countries using 2-digit codes, pos. 33-34) will be matched with the corresponding code in field position of the MAPAD.

(4) After matching the coded data contained in the requisition with the coded data contained in the MAPAD, the appropriate Ship To or Mail To address will be determined based on the mode of shipment to be used or the type of correspondence to be mailed. The In-Country Requisitioner (IR) address will always be used as a Mark For address on the shipment regardless of which Ship To address is used.

318303 - SHIPMENT STATUS

a. Shipment status is similar to normal status as pos. 62-76 may contain a TCN, GBL, or registered parcel number.

b. Shipment Status Cards, appendix B-24, DIC AS3, will be forwarded to the Distribution Code, pos. 54 of MRO. Media and Status Code, pos. 7 of MRO, is applicable to FMS and MAP transactions at shipping activities.

SECTION IV - FOREIGN MILITARY SALES OFFER/RELEASE PROCEDURES

318401 - GENERAL

a. Subject to prior Service agreement, materiel for FMS customers is not, in all instances, automatically released for immediate shipment. Therefore, during shipment planning, or following materiel packing operation, release of these shipments will be accomplished IAW one of the methods prescribed in this section.

b. Notices of Availability Document, DD Form 1348m or DD Form 1348-5, will be prepared for each item in a shipment unit as prescribed in appendix E-053 P for all shipments excluding option Type A, and parcel post but including explosives and classified shipments and transmitted to address contained in DoD 4000.25.8-M (MAPAD), designated to receive the notice of availability. Notices of Availability Key Documents will be submitted to the designated country representative/freight forwarder on the date contained in the notice number field. The Notice of Availability Detail Document will be prepared as prescribed in appendix E-053 P for each line item in the shipment unit. Shipment status will be prepared for each line item included in an FMS shipment and furnished to the appropriate country representative/freight forwarder designated in DoD 4000.25.8-M (MAPAD), to receive shipment status.

c. All Republic of Germany FMS MROs except those containing Service Assignment Code P in pos. 45 and 3 or 5 in pos. 47 will require a NOA, unless shipped via parcel post.

d. A duplicate set of Release/Receipt documents (DD Form 1348-1) will be mechanically prepared for all FMS transactions. This duplicate set will be mailed to the recipient of NOA notice if NOA notice is required or mailed to recipient of Release/Receipt documents if NOA is not required. When manual Notice of Availability (DD Form 1348-5) is prepared, the duplicate set of DD Forms 1348-1 will be attached to NOA.

318402 - SELECTING CONSIGNEE ("SHIP TO") ADDRESS

a. MOWASP determines the MRO Consignee in accordance with appendix D-187 and "ship to" address in accordance with appendix D-084.

b. When pos. 46-47 contains XW the MRO is processed as an exception MRO and the address should have been provided with the MRO.

*It should be noted that unique consignees are built for specific Saudia Arabia FMS MROs not in DoD 4000.25.8-M (MAPAD) to allow for maintenance of addresses based on priority as required by special instruction in the MAPAD. Because these addresses are not maintained by Defense Automated Addressing System (DAAS), local depots must maintain all Type Address Codes (TACs) for issue priorities 9 through 15 under the original MAPACs in the MAPAD; DSR003, DSR004, DSR008, and DSR009. TACs for issue priorities 1 through 8 must be locally maintained under the "unique" MAPACs; DSR013, DSR014, DSR018, and DSR019. Maintenance is input in accordance with appendix B-127 and E-129 P.

318403 - AUTOMATIC SHIPMENTS

Materiel will be shipped automatically for the following:

*a. Parcel post shipments (regardless of entry in pos. 46 of MRO).

*b. When pos. 46 of the MRO contains Option Code A, materiel will be shipped to the freight forwarder designated in pos. 47 without prior notice. All shipments destined for Canada will be automatic regardless of entry in pos. 46.

c. All shipments to all FMS customers (including Federal Republic of Germany) regardless of the coded entry in pos. 46 or intended mode of shipment when DoD 5105.36-D (MAPAD) does not provide a requirement for a Notice of Availability for Country Representative/Freight Forwarder (CR/FP) Code contained in pos. 47.

d. When MRO contains XX or XW in pos. 46-47.

*Except those shipments of explosives, dangerous materiel or classified materiel (reference paragraph 318410) which will require the preparation of an NOA and will be held pending receipt of shipping instructions.

318404 - RELEASE OF MATERIEL SUBSEQUENT TO ADVANCE NOTICE OF AVAILABILITY

For FMS shipments to countries when a Y or Z Option Code is entered in pos. 46 of the MRO, Notice of Availability Documents will be transmitted to the country representative/freight forwarder.

a. FMS Offer/Release Option Code Y - When pos. 46 contains a Y, shipment will be released to the freight forwarder designated in pos. 47 on the 15th calendar day following the date contained in the Notice of Availability Key Document unless alternate shipping instructions are received.

b. FMS Offer/Release Option Code Z - When pos. 46 contains a Z, shipment will be held pending release and shipping instructions from the country representative/freight forwarder. If release and shipping instructions are not received within 15 calendar days after the date contained in the Notice of Availability Key Documents, a duplicate of the Notice of Availability will be prepared and transmitted to the country representative/freight forwarder. The card image (DD Form 1348m) will contain DICs AD3 and AD4 if required and the DD Form 1348-5 will be annotated to indicate that the shipment delay is caused by the CR/FFs failure to furnish release and shipping instructions. After 30 days from the date of submission of the Delay Key NOA (a total of 45 days from submission of initial NOA) to country representative/freight forwarder, if no reply is received, the shipping activity will:

(1) Contact the FMS Requisition Control Office (RCO), identified by the alpha distribution code in position 54 of the MRO, to obtain release and shipping data. If the FMS RCO is unable to furnish release and shipping data

within 30 days from date of request (a minimum of 75 from submission of initial NOA), the addressee will be considered an invalid shipping address. Materiel will be returned to stock, and the documentation canceled IAW subparagraph (2) below.

(2) If shipping action cannot be taken due to the lack of a valid shipping address, the FMS RCO will be contacted to obtain valid shipping address. If FMS RCO cannot provide valid shipping address, return materiel to stock. For FMS materiel returned to stock, prepare MRO Control/Status Request Card to cancel shipment unit/line item, see appendix E-099/E-101 P, Action Code DC. (Management Code C applies.)

c. When an export release is required the shipping activity will submit a request for export release to the MTMC Area Command before shipment. A Notice of Availability will be furnished to the CR/FF and indicate that an export release has been requested. The export release provided by the MTMC releasing authority will include shipping instructions as coordinated with the CR/FF.

d. When the shipping activity determines that the shipment includes materiel which is dangerous/hazardous, sensitive, or otherwise requires a high degree of protection or control within CONUS but does not require a release from MTMC, a NOA will be furnished to the CR/FF regardless of the entry in pos. 46 and the shipment will be held pending receipt of release and shipping instructions from the CR/FF. Notices of Availability for classified shipments will be forwarded to the CR identified in the MAPAD.

318405 - NOTICE OF AVAILABILITY

a. Notice of Availability (NOA). The document by which the U.S. shipping installation will notify the designated FMS CR/FF that the materiel is ready for shipment and, where appropriate, that the shipment requires an export release under the provisions of the MTMR, DLAR 4500.3.

b. The NOA documents will consist of card image formats, (DD Form 1348m, appendix C-10), or a DoD Notice of Availability/Shipment Documents, DD Form 1348-5 (appendix C-41) as prescribed in appendices B-53 and B-54. The DD Form 1348m will be transmitted via transceiver to the country representative/freight forwarder when transceiver facilities are available. When transceiver facilities are not available, a DD Form 1348-5 will be prepared and mailed to the country representative/freight forwarder.

c. The NOA number will be the TCN of the shipment unit and is utilized as follows:

(1) Identification of Notices of Availability Key and Detail Documents.

(2) Shipping marking.

d. A NOA, will be prepared and processed by the shipping activity. It will be transceived/mailed to the address authorized to receive NOAs (reference MAPAD) on the date of offer.

e. NOAs are not required for authorized automatic release shipments, reference paragraph 318403.

f. Distribution depots will furnish the DSC a notification of NOA action under DIC AE6 with Status Code BL reflecting the date the shipment is initially released to the transportation Officer when:

(1) Field position 46 contains a Y or Z.

(2) The mode of shipment is other than parcel post, e.g., Mode of Shipment Code (reference appendix A-17) G, H or 5.

(3) The shipment includes materiel which is dangerous/hazardous, sensitive, or requires a high degree of control or protection.

(4) In reply to a MRO followup (DIC AF6) on a FMS shipment awaiting release instructions.

318406 - REPLIES TO NOTICE OF AVAILABILITY

a. Manual NOAs.

(1) Replies will be acomplished by two different methods. When an export release is required, the CR/FF will furnish specifying consignment instructions, if any, and coordinate these or other shipment or delivery instructions with MTMC releasing authority. When an export release is not required, the reply will be accomplished by insertion of shipment release instructions on the third copy which will be returned to the shipping activity.

(a) Instructions to CR/FFs regarding replies to NOAs will specify the need for coordinated instructions when an export release is required and include provisions for the following minimum data in replies to other NOAs:

1. The complete name and address of the consignee except when materiel will be picked up by the CR/FF.

2. The date materiel is to be shipped or the date the materiel will be picked up by the CR/FF.

3. The complete name and telephone number(s) of the individual(s) who will be available and authorized to receive on behalf of the purchasing country, for the specific classified shipment covered by the NOA advising availability of a classified shipment.

(b) In instances where the shipment does not require an export release or the shipping activity has determined that there is no requirement for a high degree of protection or control and FMS Offer/Release Option Code Y is contained in pos. 46, the shipment will be released to the CR/FF on the 15th calendar day after the NOA date, unless alternate shipping instructions are received. When an export release is required, the shipment will be held pending receipt of release and shipping instructions from the MTMC releasing authority and if such instructions are not received within 15 calendar days

after the NOA date, a followup only to MTMC will be made in lieu of transmitting a duplicate NOA. In instances where the shipping activity has determined a need for a high degree of protection or control or FMS Offer/Release Option Code Z is contained in pos. 46 the shipment will be held pending receipt of release and shipping instructions from the CR/FF. Should such instructions not be received within 15 calendar days after the NOA date, a duplicate of the NOA will be transmitted to the designated notice recipient, with the same shipment unit number assigned. This duplicate NOA will be annotated to indicate that the shipment delay is caused by the CR/FF's failure to furnish release and shipping instructions. Two copies of the DD Form 1348-5 together with DD Form(s) 1348-1 will constitute the Delay NOA.

b. Mechanized NOAs. The FMS NOA Reply Document (DIC AD5) will always be used when replying to a mechanized NOA other than DIC ADR. When replying to a DIC ADE NOA key document the specifying consignment instructions and/or other shipment or delivery instructions will be provided to the MTMC releasing authority to facilitate provision of a coordinated (export) release to the shipping activity. In replying to mechanized NOA other than DIC ADR, the following rules will apply. When shipment release is to be made to the addresses identified by coded entries in the MAPAD, the AD5 document will contain code R in pos. 60. When shipment release instructions are being mailed under separate cover the AD5 document will contain code E in pos. 60. The shipment release instructions which are mailed may be accomplished by letter, country design forms or other appropriate communications; however, such instructions must reach the shipping activity within 15 days for transactions coded with FMS Offer/Release Option Code Y; otherwise, the shipment will be released automatically to the appropriate address contained in the MAPAD. The military department's implementation of these procedures will provide for such replies to be transmitted to the activity designated by the routing identifier code contained in pos. 4-6 of the NOA documents.

c. Replies to Notices of Availability will provide for shipment or delivery of materiel to a single destination by shipment unit. Shipment units identified by TCNs will not be split by shipping activities to accommodate shipments or deliveries to multiple points.

318407 - STOCK SELECTION

a. DD Form 1348-1 (appendix E-011 P) will be received for each line item released for shipment.

b. Materiel is selected from location based on data contained in the DD Form 1348-1, location, condition, quantity, stock number, and ship newest stock message. The exact quantity contained on the MRO will be selected when possible. An exception may be made by distribution depots to effect upward or downward quantity adjustments for items contained in rolls, lengths, spools, or other configurations subject to being cut. This would normally be confined to such items as textiles, wire, cable, metal bars and strapping. Distribution depots will not effect adjustments if the value decrease or increase exceeds $50.00. Adjustments greater than $50.00 will require telephone/message contact with the DSC that issued the MRO. The DSC will contact the FMS Requisition Control Office, pos. 54, to determine the acceptability of the new quantity.

318408 - SHIPMENT UNIT CONTROL NUMBER

TCN will be entered in the Shipment Status Card (see appendix B-24).

318409 - FOLLOWUPS

a. A DSC will not initiate a followup (AF6) for an FMS MRO bearing Option Code Z until 45 days after the issuance of the MRO.

b. Depots receiving followups on MAP Grant Aid/FMS requisitions will process these followups IAW chapter 4, section II, paragraph 304209.

318410 - EXPLOSIVES

Explosives (including hazardous/dangerous items) will be shipped IAW Service requirements. Classified materiel will be shipped IAW Section A, DoD 5105.38-D (MAPAD) and Chapter 6, DoD 4140.17M (MILSTRIP).

318411 - DENIAL OF CONTROLLED SUBSTANCE ITEM

The Comprehensive Drug Abuse Prevention and Control Act of 1970 requires that MAP/FMS shipments of Controlled Substance Items, which require an export permit, must have the exact quantity specified in the MRO satisfied prior to release by the depot for movement to the port. When the exact quantity specified in the MRO is not available for shipment, the total MRO quantity will be denied.

a. Prepare MRO Control and Status Request Card, (ZBM), to depict the total quantity denied and format as prescribed in appendix B-99. Enter Action Code DL (appendix A-42) in pos. 79-80.

b. Based on Action Code in ZBM card the computer will enter Management Code 8 in pos. 72 of the Materiel Release Denial (A6_) appendix B-8 output to the DSC.

SECTION V - COUNTRY REJECTION OF MATERIEL

318501 - COUNTRY REJECTION OF MATERIEL

The country may elect to reject an FMS shipment in its FMS NOA Reply Document because the shipment unit contains materiel which will constitute a duplicate shipment.

a. If the rejection advice is received subsequent to the automatic shipment release date for the applicable Option Code and shipment has been accomplished, a notification by TWX or letter will be furnished to the Freight forwarder/ country representative informing them that shipment has been made and cancellation of the item(s) cannot be effected.

b. If shipment has not been made:

(1) Materiel involved will be withdrawn and returned to stock.

(2) An MRO Control/Status Request Card will be prepared to cancel items (Action Code DC) (Management Code C applies).

(3) Prepare a new NOA (DICs AD1 and AD2 or ADR for mechanized notices and DD Form 1348-5 for manual notices) and furnish to the country representative/ freight forwarder. The new manual NOA will be annotated to indicate that the new NOA is caused by the rejection of materiel by the country representative. The new NOA will contain the revised number of pieces, weight, and cube resulting from withdrawal of the rejected materiel.

SECTION VI - CONSOLIDATION OF FMS AND MAP GRANT AID SHIPMENTS

318601 - IDENTIFICATION OF MAP GRANT AID MATERIEL RELEASE ORDERS

The prime determinants for identification of the type of FMS or MAP transaction under process will be pos. 30 and 45. When pos. 30 contains Service Code B, D, K, P, or T, and pos. 45 contains a Y, the transaction will be considered a MAP Grant Aid requisition for processing purposes. When pos. 30 contains Service Code B, D, K, P, or T and pos. 45 contains either B, D, K, P, or T, the transaction will be considered an FMS requisition for processing purposes.

318602 - CONSOLIDATION CRITERIA FOR FMS

FMS shipments will be considered for and consolidated by the Country Service Code (pos. 45), Country Code (pos. 31-32), Customer Within Country Code (pos. 33), FMS Delivery Term Code (pos. 34), Option and Freight Forwarder Codes (pos. 46-47), and Case Number (pos. 48-50). When a numeric zero appears in pos. 33, consolidation will be accomplished based upon Country Service Code (pos. 45), Country Code (pos. 31-32), Option and Freight Forwarder Code (pos. 46-47), and the Case Number (pos. 48-50). (See NOTE.)

318603 - CONSOLIDATION CRITERIA FOR MAP GRANT AID

MAP Grant Aid MROs will be consolidated into shipping units when all of the following data elements are equal: (See NOTE.)

a. Service Assignment Code (pos. 30).

b. Country Code (pos. 31-32).

c. Customer Within Country Code (pos. 33).

NOTE: Consolidation will not be accomplished when the physical configuration of an item is rendered incompatible with other items to be shipped to the same destination. Items designated as explosives or other dangerous articles will not be consolidated with other items destined to the same consignee. Aircraft, missiles, engines, and large (excess dimensions) spares or assemblies for any item of equipment subject to special handling or construction or requiring movement as a single shipment unit will not be consolidated with other line items. Radioactive or magnetic materiel will not be consolidated together or with other materiel.

318604 - MARKING OF SHIPMENTS

a. Shipment marking will be accomplished IAW the provisions of Military Standard Marking for Shipment and Storage, MIL STD 129.

b. When FMS materiel is to be shipped to a freight forwarder (other than XX), being counted during the inventory cycle is vital to the accuracy of inventory recontainers. Shipping activities will ascertain "MARK FOR" information by correlating the country code (pos. 31-32) and the country MAP service code (pos. 45) with the "MARK FOR" code (pos. 33). "MARK FOR" codes and related clear text address information are contained in DoD 5105.38-D, MAPAD.

SECTION VII - ESTABLISHMENT OF MANDATORY DATE TO TRANSPORTATION (MDT) AND PLANNED DATE TO TRANSPORTATION (PDT) FOR FMS AND MAP GRANT AID SHIPMENTS

318701 - CRITERIA

a. A MDT and a PDT will be established for each MRO received.

b. The MDT for IPG III will be based on the date of requisition (MRO) plus submission time (pos. 21-22 of MRO) plus UMMIPS system processing time. If allowable processing time (MDT minus date MRO is received at the depot) is zero days, the MDT will be established as the current date at the depot plus four.

c. The MDT for IPGs I and II will be based on UMMIPS processing time.

d. The PDT for IPGs II and III will be established as prior to the MDT. The PDT for IPG I will be identical to the MDT.

SECTION VIII - REQUIRED AVAILABILITY DATE

318801 - RAD DESIGNATION

MAP Grant Aid and FMS MROs for item requirements which qualify under the RAD criteria of the FMS and MAP will contain a RAD entry in manual block 21, mechanical pos. 62-64 (appendix B-54).

318802 - CONFIGURATION OF RAD ENTRY

a. Identification Code. The first position of manual block 21, mechanical pos. 62, will always contain an alpha A to identify a FMS and MAP MRO for an item which is subject to a RAD.

b. RAD. The second and third position of manual block 21, mechanical pos. 63-64, will always be numeric and will indicate the RAD expressed in a number of months. The actual required availability date will be the last day of the month depicted in pos. 63-64 computed from the requisition date. Significant digits (number of months), when they appear in pos. 64 only, will be prefixed by a numeric 0 in pos. 63.

SECTION IX - MAP OVERAGE MRO LISTING

318901 - MAP OVERAGE MRO LISTING FOR DEPOTS

a. Monthly, each DSC operating under the SAMMS System will produce and forward to the appropriate DLA Depot a MAP Overage MRO Listing for Depots. This listing, which is intended for manual followup purposes, is produced as the SAMMS F-121 B Report.

b. The procedures for processing this listing are contained in appendix E-120 P.

CHAPTER 19

EMERGENCY PROCESSING

CHAPTER 19

EMERGENCY PROCESSING

SECTION I - GENERAL

319101 - PURPOSE AND SCOPE

a. Section 5, Annex N, DLA War and Emergency Support Plan (WESP), concerning continuity of supply and depot operations, requires that DLA Principal Distribution Depots/Specialized Support Points (PDDs/SSPs) have certain emergency operating capabilities in the event a DSC or a DLA PDD/SSP becomes inoperable. Annex N to the WESP provides for manual requisition, issue, and investigation (inventory) procedures during power or computer outages, general war, post-attack period, or when directed by HQ DLA or other higher authority. Use of mechanical capability which exists during periods of emergency will not be denied.

b. This chapter implements/augments the WESP by prescribing responsibilities and procedures governing the processing of receipt and issue transactions and related documents with Automatic Data Processing Equipment (ADPE) and/or manually.

c. Detailed instructions are contained herein for the conversion of customer requisitions into MROs, processing by the MOWASP System, and the deviations from the normal process. Procedures also provide for processing customer requisition cancellations.

d. This chapter also establishes the media for status inquiries or issue transaction in process, or completed MRO History for a period of 45 days for regular DLA MROs, 90 days for other than DLA, and 45 days for International Logistics Program (ILP) MROs.

e. Section 7, Annex S, DLA WESP, provides policy and guidance to minimize the impact of a disruption in postal service. This chapter implements/augments the WESP by prescribing the procedures and responsibilities for diverting shipments to freight shipments during such a disruption.

319102 - APPLICABILITY

a. This chapter is applicable to PDDs/SSPs operating under the MOWASP System. Implementation will be directed by HQ DLA, or if HQ DLA is out of communication with Primary Level Field Activities (PLFA), by the Commander(s) of affected PLFA(s). Reference Continuity of Operations Policy in paragraph N-5104, DLA WESP, it is not envisioned that these procedures will be applied during DSC ADPE outages of seven days or less. These procedures could be applied for periods of up to 60 days.

b. All action on MRO/issue documents in process at PDDs/SSPs upon nuclear attack on CONUS will cease and these issue documents, plus related MILSTRIP/MILSTRAP documents (followups, status, and so forth) will be canceled by the

DLA Distribution System. Cancellation/shipment to surviving customers will be directed by HQ DLA/DSC. MROs authorized by a DSC to be processed under these provisions will contain Management Code H in pos. 72.

c. Disruption in postal service may result from a postal employee work slowdown/strike, natural disaster, railroad strike, or civil disorder. The United States Postal Service (USPS) will establish postal embargoes on affected areas. Materiel normally distributed by USPS will not be offered to the postal system if the local authorities cannot assure delivery at destination by the RDD under UMMIPS. Such mailable materiel will be consolidated to maximum extent possible and diverted to alternate means of transportation.

319103 - INTERIM FUNCTIONAL ALTERNATES (IFAs)

There are several alternatives available to DLA to continue processing of MILSTRIP documents under emergency conditions. These alternatives are:

a. When a DSC operating under Standard Automated Materiel Management System (SAMMS) is inoperative:

(1) The first alternative for processing requisitions to MRO format will be the DLA Systems Automation Center (DSAC). Such documents will be received and processed as usual by activities.

(2) The second alternative for processing requisitions to MRO format will be a DLA PDD/SSP.

b. When a DSC (except one operating under SAMMS) is inoperative, processing of requisitions to MRO format may be accomplished by a DLA PDD/SSP.

c. When a defense depot (PDD) operating under the MOWASP system is inoperative.

(1) DSAC will be considered as an alternate.

(2) Another defense depot (PDD) will serve as the alternate.

d. DCSC, DDMP, DIPEF (Atchison), and DDTC will serve as IFAs for DIPEC if that DSC becomes inoperable because of damage or loss of communications.

SECTION II - INOPERATIVE DEFENSE SUPPLY CENTER

319201 - DOCUMENTS RECEIVED UNDER EMERGENCY CONDITIONS DIRECT FROM REQUISITIONER

Requests from the requisitioners will be received direct in DoD-M 4140.17 (MILSTRIP) and DLAM 4140.2, Volume I formats and processed IAW the instructions contained herein.

a. Documents will be received by the DLA PDDs/SSPs via AUTODIN, mail, or any available media. Documents received in other than a mechanical processable form will be converted to the extent of available capabilities.

b. The following types of documents will be received:

(1) Appendix B-4, DIC A0_

(2) Appendix B-6, Passing Orders, DIC A3_

(3) Appendix B-9, Referral Orders, DIC A4_

(4) Appendix B-117, Cancellations, DIC AC_

319202 - RECEIPT AND CONVERSIONS

All documents received will be processed as follows:

a. All documents with DICs A0_, A3_, A4_ and AC_ (1, 2 or 3):

(1) Received via AUTODIN will be processed as indicated by appendix D-75, Special Entry-Exit Print/Punch program and will be output with appendix F-113, Entry-Exit Exception List (Code C) accompanied by the Appropriate document in card format.

(2) Received in other than mechanical processable form will be converted to card format by keypunch operation.

b. All requisitions, passing orders, and referral orders (A0_, A3_, A4_) will be:

(1) Mechanically/manually sorted by Federal Stock Class (FSC) and Issue Priority Group (IPG).

(2) Documents (Issue Priority Designator (IPD) 01-08) for FSCs not stocked at the PDD/SSP will be checked against Section 5, TAB A, Annex N, DLA WESP and forwarded by most expeditious method to the nearest DLA activity listed for stock positioning.

(3) Documents (IPD 01-08) for FSC stocked at the PDD/SSP will be converted to MRO format (A5_) by Punch Card Accounting Machine (PCAM)/ADPE operation.

(4) Documents (IPD 09-15) will be processed to the extent feasible or retained on tape/card pending the return of the applicable DSC to an operational status.

c. All cancellations will be processed as in paragraph 319207.

319203 - PROCESSING MATERIEL RELEASE ORDERS

a. MROs will be documented and scheduled for a special cycle (IFA) by the normal MOWASP System. Processing schedules and timeframes will be as prescribed by DLAM 4140.2, Volume III, Chapter 4, Paragraph 304205.

b. MRO processing will be as prescribed by DLAM 4140.2, Volume III, Chapter 4, Paragraph 30204.

c. Functional processing of MROs under this system will, in addition to the above, be processed in accordance with appendix E-151.

d. Requisitions received with exception data will be processed in accordance with appendix E-154 P.

319204 - PROCESSING PRODUCTS FROM VALIDATION AND EDIT

a. MROs that fail validation edits and cannot be corrected automatically by the computer will be rejected and output on a violation listing, appendix F-85, with applicable Violation Codes (see appendix A-82).

b. Processing personnel of Shipping Documentation will receive Violations Output F-85, and attempt to correct the invalid element of data identified by the Violation Reason Code in accordance with applicable E Appendices.

319205 - SHIPMENT STATUS/MATERIEL RELEASE CONFIRMATION

MROs utilizing emergency processing procedures will be confirmed as follows:

The MRO Shipping Unit File will be updated by input of MRO Control and Status Request Card, ZBM, appendix B-99, Shipment Unit Completed Card, ZBP, appendix B-101, and/or Bill of Lading Closeout Cards, ZEN, appendix B-128. These input actions will cause the preparation of Materiel Release Confirmation, DIC ARO, appendix B-14.

a. Materiel Release Order Confirmation, DIC ARO, appendix B-14 will be blocked from release by the Entry/Exit program and retained on tape/card by date pending the return of the applicable DSC to an operational status.

b. Shipment Status Cards, DIC AS1, AS2, and AS3 will be suppressed on all shipments to customers under these procedures.

319206 - MATERIEL RELEASE DENIALS

a. Denial actions on MROs released under this emergency processing will be submitted as follows:

(1) Prepare a DIC ZBM with Action Code DP in pos. 79-80 for items not available in-storage. The MOWASP System, appendix D-28 will process this transaction in the manner as now prescribed and close the MRO History record.

(2) Review A5_/DD 1348-1 and process as directed in paragraph 319202b(2).

b. Backorders will not be established.

c. When an MRO has passed through known supply sources, the A5_ will be converted to Supply Status, DIC AE_ in accordance with Media and Status Code in pos. 7, Status Code CA will be entered in pos. 65-66, and the status card mailed to requisitioner in accordance with appendix E-153 P.

319207 - PROCESSING CANCELLATION

Upon receipt of a customer cancellation DIC AC1, 2, or 3, convert the third position by PCAM/ADPE to a numeric six and process as follows:

a. Enter the Cancellation Request DIC AC6 into MOWASP system for mechanical processing.

b. When the document number is not in the MRO History File, "No Record" suppress output.

c. When a document number is located in the MRO History File coded as a shipment, suppress output.

d. When the document number is located in the MRO History File, not coded as a shipment, a Notice of Cancellation Request Report, appendix F-69, part 1, will be prepared and received for processing as directed by appendix E-005 P.

e. When the document number is located in the MRO History File with Status Code DP, and F-50 Report for manual processing will be prepared. Review the AC6 record and process as directed in paragraph 319202b(2).

319208 - MATERIEL RELEASE ORDER REGISTER HISTORY

All MROs processed under these emergency instructions will be recorded in the MRO History File and may be interrogated by the input of a ZCT inquiry transaction.

319209 - MRO RECORDS

All transactions normally prepared and transmitted to the DSC will be retained on tape by date, pending the return of the applicable DSC to an operational status.

319210 - DSCs MONTHLY ASSET TAPE

Each PDD will be furnished an availability tape monthly from each DSC having stocks positioned at that storage location, to reflect on-hand balances and other pertinent data on each NSN instorage at that specific storage activity. When operating as a direct requisitioning point for any DLA commodity, the asset tape of the inoperative DSC will be printed out for basis in editing requisitions and maintaining on-hand balances of each NSN.

319211 - ASSET STATUS CARDS

Under emergency conditions, PDDs operating as an IFA will attempt to protect and reserve the Service-owned Medical and Clothing and Textile stocks for issues only to the owning Service. Twice yearly (during January and July) DPSC will prepare a deck of Asset Status Cards, DIC DZA, appendix B-210, for each on-hand balance, by NSN, condition, location recorded at DPSC under Service ownership. The tailored decks will be mailed to the respective PDD. When directed by HQ DLA, these cards will be printed out for use in requisition editing under IFA procedures.

319212 - RECEIPTS PROCESSING

During emergency situations calling for the utilization of procedures prescribed herein, materiel receipts will be processed as prescribed by chapter 3, this volume, with the exception that all transactions normally transmitted to the DSC will be retained on tape pending the return of the applicable DSC to an operational status.

319213 - LOCAL PROCUREMENT

a. Procurement Procedures:

(1) All defense depots, when serving as an IFA, are authorized to purchase off-the-shelf items to satisfy customer requirements in accordance with prescribed funding and accounting procedures.

(2) Purchases may include both stocked and nonstocked items.

b. Records:

(1) A simple ledger will be maintained showing the item, quantity, vendor, customer, and price. No formal contract files will be required.

(2) Local stock levels will be established based on issue experience obtained from requisitions processed by the storage site during emergency operations.

c. Emergency Files:

Files considered minimum essential to the accomplishment of the local procurement function will be maintained by each defense depot.

SECTION III - INOPERATIVE DEFENSE DISTRIBUTION DEPOT

319301 - EMERGENCY NOTIFICATION

This and subsequent paragraphs prescribe the actions required by a DLA PDD during emergency situations that preclude the use of local ADPE in support of the MOWASP System.

a. PDDs will advise HQ DLA and DSCs of situations which, in the opinion of the Commander, require implementation of alternate emergency procedures for assigned commodities.

b. Notification will be by Situation Report (SITREP), to include:

(1) Anticipated length of time outage is expected to continue.

(2) Number of MROs in IPG I and IPG II that exceed the activity's capability to process manually.

319302 - EMERGENCY SITUATION DESIGNATIONS

A PDD has lost its electrical power and/or some situation denies ADPE processing of the MOWASP System.

a. The following actions will be taken:

(1) If it is determined that the prevailing situation will be corrected within 24 hours, hold all processing until the correction has been accomplished.

(2) If it is determined that the prevailing situation will exceed 24 hours but will be corrected within 72 hours, notify HQ DLA and all affected DSCs of the condition and request that secondary sources of supply be utilized. Process on-hand MROs in IPGs I and II by utilization of other mechanical equipment or manual processing. Hold routine MROs pending correction of the outage situation. Ensure that:

(a) Sufficient data are maintained to record all MRO transactions.

(b) Sufficient data are maintained to record all receipts transactions.

(c) No duplications are created by the updating process.

(3) If it is determined that the prevailing situation will exceed 72 hours, notify HQ DLA and all affected DSCs of the condition and request that secondary sources of supply be utilized. Additionally, request that HQ DLA establish a backup support site.

b. DSCs will divert MROs to other storage locations having available stocks. If the inoperative PDD is the only location where stocks are available and IPD is 01 through 08, the MRO will be directed to that storage site through the backup support site.

319303 - BACKUP SUPPORT SITE

The backup support site, DSAC, or another PDD will receive the diverted MRO documents from/in lieu of the inoperative defense depot and will schedule at a mimimum one MRO process per day as follows:

a. Mechanically/manually sort the MROs (DIC A5_) by IPD using PCAM/ADPE equipment as available.

b. Based on the IPD of the MROs (DIC A5_) continue as follows:

(1) IPD 01 through 03 MROs will be printed onto the top line of DD Form 1348-1, using red flimsy stock.

(2) IPD 04 through 08 MROs will be printed onto the top line of DD Form 1348-1, using yellow flimsy stock.

(3) All other MROs (IPD 09 through 15) will be retained by date, pending the return of the applicable PDD to an operational status.

c. Forward/deliver to courier the printed DD Form 1348-1 to the inoperative PDD.

d. It is envisioned that total ADPE time at a backup PDD/SSP will cause some interruption in processing their own documents while they provide backup support. Those ADPE processes not essential to receipt and issue transactions (i.e., inventory, reconciliation, inspection) may be waived.

319304 - INOPERATIVE DEFENSE DEPOT

The inoperative PDD will provide such communication/courier service as is required to transfer MROs and DD Forms 1348-1 (flimsies) to and from the backup support site. Only IPD 01 through 08 MROs (DIC A5_) will be prepared for stock picking.

a. Provide DD Form 1348-1 stock with imprint of the inoperative PDD to the backup support site, or on receipt of the DD Form 1348-1 flimsies printed by the backup support site process as follows:

(1) Obliterate in Block A and parcel post label of each DD Form 1348-1, the name and address of the backup support site.

(2) Annotate/stamp name of PDD into Block A and parcel post label of flimsy.

b. Obtain location(s) for stock picking purposes by screening the Emergency Item Locator Record Listing, appendix F-51 and the Item Locator Transaction Record, appendix F-52 as directed by appendix E-052 P.

c. Select materiel from location(s).

d. Package, mark for shipment. Obtain shipping address from DOD 4000.25D, Activity Address Directory (DoDAAD).

e. Annotate quantity shipped, date, weight, cube, addressee, and mode, to the DD Form 1348-1.

f. Release shipment:

(1) To postal service.

(2) Forward materiel and applicable copies of DD Form 1348-1 to the Transportation and Traffic Management Office (T&TMO) for release to consignee via carrier (Government/commercial).

g. Retain copy of issue transaction for updating the DSCs files/records upon resumption of ADPE operation.

319305 - RECEIPT PROCESSING

a. During the time that a PDD is being supported by a backup site, receipt processing will be as prescribed by chapter 3 with the following exceptions:

(1) Initial interrogation capability will not be available.

(2) Locations for storage purposes will be obtained by screening appendices F-51 and F-52.

(3) Receipt transactions will be forwarded by mail or courier in the form of DD Form 250 or DD Form 1348-1 to the DSC.

b. Materiel and one copy of applicable receipts document will be forwarded to storage branch for processing IAW appendix E-159 P.

SECTION IV - KEY ESSENTIAL ITEM/DAMAGE ASSESSMENT

319401 - KEY ESSENTIAL ITEM/DAMAGE ASSESSMENT CARD

Monthly, distribution activities receive Key Essential Item/Damage Assessment Cards, appendix B-104, DIC CZW, from DLA Administrative Services Center (DLASC). These cards are computer processed IAW appendix D-92 to produce documentation required for use in damage assessment as prescribed in Annex N, Section II of the WESP. The output documentation is forwarded to the Logistics Readiness Center (LRC) to be placed in secure storage until needed or replaced.

SECTION V - GENERAL SERVICES ADMINISTRATION (GSA)

319501 - REQUISITIONING PROCEDURES FOR GSA STOCKS

a. When communications permit, requisition for GSA stocks will be submitted to appropriate GSA relocation sites by telephone.

b. If communications do not permit contact with relocation site, requisitions will be forwarded to the nearest GSA supply activity.

319502 - PREPARATION AND PROCESSING OF REQUISITION FOR GSA STOCKS

a. Requisitions may be prepared in any format, however DLA field activities will, as soon as possible, submit their requisitions in the MILSTRIP format.

b. GSA will process shipments of available materiel IAW MILSTRIP priority requirements.

c. Items in short supply will be allocated.

d. DLA activities are expected to cooperate in the acceptance of substitute items unless they do not meet technical requirements.

e. To the extent feasible, GSA will advise DLA activities when requisitioned items will not be shipped.

SECTION VI - SERVICE-OWNED MATERIEL STORED AT A DEFENSE DEPOT

319601 - ISSUES OF SERVICE-OWNED MATERIEL

a. Under emergency conditions, storage activities operating as IFAs will attempt to protect and reserve the Service-owned stock for issue only to the owning Service. In extreme emergencies, storage activities may issue stock without regard to ownership to alleviate human suffering.

b. The defense depot operating as an IFA will receive requisitions for Service-owned materiel, convert requisitions into MROs and process the following procedures in section II of this chapter.

SECTION VII - DISRUPTION OF POSTAL SERVICE

319701 - ADP PROCESSING

a. The DLA Systems Automation Center (DSAC-D) maintains a patch program that MOWASP depots may request or HQ DLA can direct for all depots to cause all shipments to be considered freight in lieu of parcel post in a disruption.

b. Commanders of MOWASP depot activities may request this patch program and instigate freight shipments, should their local situation dictate. HQ DLA advised immediately of such local determination.

319702 - DEPOT OPERATIONS

a. All mailable materiel will be packed for parcel post shipment complete with APO, FPO, or ZIP code address prior to consolidation of freight. Parcel post for overseas will be consolidated by POD. Parcel post to Alaska and Hawaii will be handled as freight export shipments.

b. Perishable medical materiel will be shipped by premium freight transportation IAW DLAR 4500.21.

c. Maximum consolidation will be effected within depot processing time under the UMMIPS for IPG I.

d. IPG II and III shipments will be accumulated for not more than one calendar week.

e. Foreign Military Sales (FMS) shipments will not be sent through consolidation points, but will be handled as CONUS shipments, using freight forwarders.

f. Direct Vendor Delivery (DVD) items may be consigned to consolidation points.

319703 - CONUS MAILABLE SHIPMENTS

a. IPG I shipments will be placed in a package service such as United Parcel Service (UPS) or offered to an air freight forwarder for pickup and direct delivery to the consignee.

b. IPG II and III shipments will be moved as freight using that commercial transportation service which best supports the requirements of the customer. Consolidate for LTL/LCL freight and ship to the most active customer within the the same ZIP Code.

319704 - APO MAILABLE SHIPMENTS

a. IPG I shipments will be offered for shipment through the Military Airlift Command (MAC) system, or by commercial air freight forwarders on a through Bill of Lading.

(1) European Area, ship to Rhein-Main AFB, Germany.

(2) England Area, ship to Air Mail Terminal, London.

(3) Pacific Area, ship via MAC only.

b. IPG II and III shipments consolidating all lines destined for a single consignee will be accumulated for shipment not less frequently than weekly. When such consolidation effort results in packages that can be classified as freight shipments, they will be entered into the normal Defense Transportation System (DTS). All other APO addressed packages/containers moved to consolidation points are not to exceed width of 40 inches, length of 45 inches, height of 43 inches, nor weight in excess of 200 pounds and will be consolidated as follows:

(1) Atlantic Area:

(a) All parcel post destined for England, container marked for Air Mail Terminal in London, England.

(b) All parcel post destined for Europe, container marked for Air Mail Terminal, Rhein-Main AFB, Germany.

(c) Consolidate all parcel post to maximum extent for each POD.

(2) Ship by UPS or a freight mode to the appropriate Service CCP or POE.

319705 - FPO MAILABLE SHIPMENTS

a. IPG I shipments will be offered for shipment through MAC or commercial air freight forwarder.

(1) Atlantic Area - Ship to Transportation Officer, Naval Supply Center, Norfolk, Virginia, marked for requisitioner.

(2) Pacific Area - Ship to Transportation Officer, Naval Supply Center, Oakland, California, marked for requisitioner.

(3) Ships in CONUS coastal ports - Ship to nearest Naval support activity marked for final delivery to requisitioner.

b. IPG II and III shipments are authorized to be consolidated by POD and shipped LCL/LTL.

(1) Atlantic Area - Consolidate all addressees in Europe and England, ship to Transportation Officer, Naval Supply Center, Norfolk, Virginia, marked for requisitioner.

(2) Pacific Area - Consolidate all addresses in Pacific, ship to Transportation Officer, Naval Supply Center, Oakland, California, marked for requisitioner.

(3) Ship to CONUS coastal ports. Ship to nearest Naval support activity, marked for final delivery to requisitioner.

319706 - REPORTS

a. The Daily DLA Field Activity Situation Report (RCS: DLA(AR)377(L)MIN) may be activated to provide the Director, DLA, and his staff with daily information on the postal disruption.

b. A daily cargo report will be submitted each workday as part of the daily SITREP from defense depots. Report consists of two parts:

(1) Part I, Section A, will reflect the total pounds of parcel post cargo by destination (CONUS, SEA, Europe, SOUTHCOM, Other, Total), Super, Priority IPG I, II and III. Section B will identify critical shipments by consignee, RDD, priority, commodity, weight, and cube.

(2) Part II will provide a narrative statement covering impact on operations, actions taken, and any other comments or recommendations that are appropriate.

c. Recurring reports normally submitted by mail may be suspended during a postal emergency for the number of days indicated by the numerical suffix to the Emergency Status Precedence Code (ESPC) within DLAH 5000.5.

CHAPTER 20

DIRECT COMMISSARY SUPPORT SYSTEM (DICOMSS)

SECTION I - GENERAL

320101 - PURPOSE

This chapter prescribes the policies, responsibilities, and uniform procedures for the implementation of the Direct Commissary Support System (DICOMSS) encompassing total interface with MILSTRIP, MILSTAMP, and MOWASP at defense depots.

320102 - SCOPE

This chapter is applicable to selected distribution depots authorized to participate in the DICOMSS. Procedures prescribed herein are applicable to the total processing of routine Materiel Release Order (MROs) (Priority 9-15) for Brand Name nonperishable items, local purchase items, and troop issue items to commissary addressee, as depicted in appendix D-120. Manual procedures for step-by-step processing are included in chapter 9, appendix E-038 P and appendix E-140 P.

320103 - POLICY

a. It shall be the policy of the defense depots to provide expeditious supply support to all authorized customers and effect maximum responsiveness.

b. This system will utilize MILSTRIP codes, formats, and procedures. Additionally, the codes, formats, and procedures of the receipt and issue processes in other chapters of this manual will supplement the DICOMSS.

c. Electronic transmission media will be used to the maximum extent possible.

d. Priority MROs (1-3) will be excluded from this system because of cyclic processing.

320104 - RESPONSIBILITIES

The distribution depot will:

a. Provide adequate storage facilities to ensure proper safekeeping of supplies received.

b. Process and receipt for supplies shipped from vendors.

c. Receive MROs and assemble shipment for dispatch to customers.

d. Effect maximum consolidation of MROs on van shipments.

e. Maintain accurate records of receipts and issues of supplies in the Receipts and MRO History Files, and the DB&TR Transaction File.

f. Furnish appropriate shipment status to customers and feedback data to the DSC concerning receipts, shipments, denials, and confirmations, IAW MILSTRIP status, followup, and cancellation procedures.

g. Advise overseas commands and commissaries involved when it is known that a van probably will be delayed, resulting in missing the Required Delivery Date (RDD).

h. Report item and shipment discrepancies IAW existing defense depot procedures.

i. Furnish disposition instructions for frustrated cargo as required.

SECTION II - DICOMSS FILES

320201 - GENERAL

The Brand Name Master Item File (BNMIF), the DICOMSS Locator File, and the SEAVAN Shipment Planning MRO Bank will be maintained at the distribution depot. The files are a part of the MOWASP system and only the input and output differ from normal MOWASP process.

320202 - MAINTENANCE OF THE BRAND NAME MASTER ITEM FILE

Changes to the BNMIF received from the DSC are generally caused by vendor changes to item identification, deletion from future availability, or addition of new items based on commissary customer interest. The file maintained at the distribution depot will be limited to elements of data required for depot operations only. The distribution depot will:

a. Receive special update Commissary Support Item Identification Cards (DIC CKK), appendix B-15, that are generated and transceived by the DSC containing DICOMSS Type of Item Code (appendix A-31), and so on for updating the depot item file for new items or when changes affect the depot data. Deletion update cards will not be received at the distribution depot until 90 days from the transaction date.

b. Update the defense depot's BNMIF semimonthly at file maintenance cutoff dates established for each 10th and 25th processing cycle (appendix D-120).

c. Receive the DICOMSS Locator Update Listing, appendix F-104, for processing to input missing data elements.

d. Direct inquiries regarding item file maintenance to the DSC.

320203 - DICOMSS LOCATOR FILE

a. All DICOMSS locator transactions are processed IAW chapter 66 of this manual. Additionally, through the use of the Item Locator Record Card, DIC ZBJ, appendix B-79, and the appropriate action code, special DICOMSS listings are available. Use of Action Code GA will provide output of the DICOMSS Locator Inquiry Listing, appendix F-105, containing a printout of active

locator data for selected NSN. Use of Action Code GB will provide output of the DICOMSS Emergency Locator Listing, appendix F-106, containing a printout of all active locator data for commissary items, by manager. This listing is produced in three parts: Part I, Brand Name Items; Part II, Local Purchase Items; and Part III, Troop Issue Items. Also when the Item Locator File is scanned, the DICOMSS NSNs are counted and reflected on the F-63 (Feeder Storage Space Report) with Type Item Code T and L shown under Commodity Manager "S" and TIC B shown under non-DLA Commodity Manager "U".

b. At depot option (Table of Controls and Constants, appendix B-66, Table 04, Action Code 09), DICOMSS stocks can be stowed by using a cycle code extent as the ninth (last) position of the warehouse location code. The cycle extent code is configured by using the first DICOMSS cycle code (appendix A-30) of a group of cycle codes (see option above); e.g., Cycles A, B, C, and D equal Cycle Extent Code A, Cycles E, F, G, and H equal Cycle Extent Code E). Cycle Code "I" (Frustrated Cargo/Residual Materiel) is not included in this process.

320204 - SEAVAN SHIPMENT PLANNING

All MROs for subsistence items for commissary customers identified on the MOWASP Locator File as Troop Issue, Brand Name Resale, or L Coded Local Purchase Items are processed to SEAVAN Shipment Planning. Detailed instructions are provided in appendix E-038 P and chapter 9.

320205 - DELIVERY ORDER FILE

A copy of all delivery orders (appendix C-51) containing DICOMSS items is received from the DSC. A manual file of the delivery orders is maintained for use when a shipment is received from vendor and arrives without an accompanying shipping document.

320206 - ACTIVITY ADDRESS FILE

When a DICOMSS consignee is authorized receipt of Troop Issue and Local Purchase items with Brand Name items, such addresses are coded within the MOWASP DoDAAD File by input of an Activity Address Local Data Change Card, DIC ZGP with a D in DICOMSS Bank Code. This action will cause Local Purchase and Troop Issue IPG III MROs for the activity to be entered into SEAVAN Shipment Planning.

SECTION III - CANCELLATION REQUESTS

320301 - GENERAL

a. Cancellation requests and cancellation request followups will be processed in accordance with chapter 4.

b. Cancellations will be attempted wherever feasible.

c. Receive and process Prepositioned Materiel Receipt Cards (PMRCs) change cards at the distribution depot whenever successful cancellation is made in part or all of an award.

d. Notice of cancellation for in-process MROs will appear on the F-69, Notice of Cancellation Request Report. MROs which have not been released will be automatically canceled.

SECTION IV - AWARD TRANSACTIONS

320401 - GENERAL

DICOMSS depots will receive:

a. Computer-prepared delivery orders (appendix C-51), Commissary Support Planning Cards and PMRCs generated by the DSC for all requisitioned Brand Name items on the Brand Name Master Item Identification List (BNMIIL).

b. Commissary Support Planning Card data generated by the DSC for all requisitioned Local Purchase items.

320402 - PROCEDURE

The distribution depot will:

a. Receive on the date scheduled for mechanical preparation of delivery orders by the DSC, the following:

(1) Commissary Support Planning Cards (DIC CKJ), appendix B-16.

(2) Prepositioned Materiel Receipt Cards (PMRCs), DIC DUS, appendix B-18.

(3) Award data records, advance tissue copies of delivery orders containing DICOMSS requirements.

b. Receive PMRC change cards from the DSC for new stock numbers and/or quantities when award data changes the stock number, quantity, unit of issue, and/or Estimated Shipment Date (ESD).

c. Receive within 15 days after receipt of delivery orders, formal printed copies of delivery orders from the DSC.

d. Receive one copy of the Purchase Order Register from the DSC with DICOMSS order numbers highlighted.

e. Process PMRC and PMRC change cards in accordance with chapter 3.

f. Process Commissary Support Planning Cards containing DICOMSS Cycle Code (appendix A-30) and Transportation Compatibility Code (appendix A-68) and plan appropriate storage and workload requirements.

g. Receive the Commissary Support Cycle Planning Report, appendix F-73, and review the projected workload. Forward one copy of report to the DSC.

SECTION V - MATERIEL RECEIPTS PROCESSING

320501 - GENERAL

PMRCs, Materiel Receipt Confirmation Cards, and reports of discrepancies in shipments/receipts will be used for DICOMSS processing similar to that prescribed for elsewhere in this manual.

320502 - PROCEDURE

a. The distribution depot will:

(1) Upon receipt of PMRCs, DIC DUS (appendix B-18), from the DSC, update necessary files for establishing the due-in (appendix D-45).

(2) Maintain a file of Delivery Orders for use when a shipment from vendor arrives without a shipping document.

(3) Receive and unload carrier's equipment and identify process Receipt and Locator Inquiry (Type A) tally-in, locate materiel received, and process the Receipt Stow Notice (appendices E-047 P and E-140 P).

(4) Input Receipt Confirmation Card (appendix B-108 or B-109 with receipt data and generate the Materiel Receipt Confirmation Card, DIC D4S (appendix B-20), citing the DICOMSS Indicator and DICOMSS Cycle Code (appendix A-30) as appropriate.

(5) Process damaged and discrepant materiel the same as other DLA materiel IAW applicable appendices.

(6) Upon completion of the confirmation processing, forward the following to the DSC:

(a) Materiel Receipt Confirmation Cards, D4S (appendices D-69/D-70).

(b) Any SF 361s, Discrepancy in Shipment Report, indicating carrier discrepancy (appendix E-156 P).

(c) Any SF 364, Report of Item Discrepancy (ROID) indicating vendor discrepancy (appendix E-150 P).

(7) Refer to section VI for guidance in processing disposal MROs resulting from receipt of nonissuable materiel.

(8) Materiel Receipt Followup Cards, DIC CD__ (appendix B-59), will be received from the DSC for processing against DICOMSS records, when the original requisition contained Advice Code 2C and the RDD plus 60 days have elapsed.

320503 - RESIDUAL DICOMSS MATERIEL

The procedures for reporting and disposing of DICOMSS residual materiel accumulated at defense depots, are included in appendix E-214 P. All DICOMSS receipts not shipped within 90 days are considered residual materiel, except tax-free cigarettes.

SECTION VI - MATERIEL RELEASE ORDERS PROCESSING

320601 - GENERAL

a. The DSC will prepare and transmit MROs to the distribution depot for the processing of DICOMSS materiel. The MROs will be validated and entered into SEAVAN Shipment Planning by the MOWASP system. MRO confirmations, denials, followups, and replies will be processed as described in chapter 4.

b. An option provided DICOMSS depots allows stock stowage by groups of cycle codes (see paragraph 320203 above). If exercised, this option will also be used in MRO documentation programs to select stock locations by cycle code extent. If the cycle code in a group indicated by the extent (e.g., pos. 73 is B and the Extent Option A includes Cycles A, B, C, and D) then the appropriate stock location(s) with last position A will appear on the MRO. If the above match is not made, the MRO will be printed with no locations and processed accordingly. Cycle Code "I" (Frustrated Cargo) is not included in this process.

320602 - MRO PROCESSING

Refer to Chapter 9, SEAVAN Shipment Planning.

SECTION VII - MANAGEMENT DATA

320701 - GENERAL

Management data are required to establish the various milestones against which actual performance will be measured for each DICOMSS Cycle. Management Information Constants are input for each cycle into the MOWASP Management Information System (MIS) files.

320702 - MANAGEMENT INFORMATION CONSTANTS

Constants are input using the Commissary Support Management Data Card, DIC ZUW, appendix B-211, and established in the MIS files as depicted in appendix D-121. Manual procedures for processing are included in appendix E-213 P.

320703 - COMMISSARY SUPPORT MANAGEMENT REPORT

The Commissary Support Management Report, appendix F-92, is output with data based on the daily workload of commissary related receipts and shipments. Such data are required to plan workload, detect trends, and respond to HQ DLA requests for information. Item data as follows:

a. Part 1 contains data related to Brand Name (Code B) items.

b. Part 2 contains data related to Local Purchase (Code L) items.

c. Part 3 contains data related to Troop Issue (Code T) items.

d. Parts 4 & 5 will provide the DICOMSS Residual Materiel Reports.

(1) Part 4. This report will be produced using DPSC generated DIC CRS transactions, reference appendix B-27, which are transmitted to the depot. The report will reflect DIC CRS data in conjunction with related location information obtained by mechanical inquiry. The locations reflected on the report will be related to the DIC CRS data by NSN, condition code, and DICOMSS cycle code if the DICOMSS cycle code extent option has been exercised. If the DICOMSS cycle code extent option has not been utilized, the locations displayed will be related to the DIC CRS data by NSN and condition code.

(2) Part 5. This report will be produced using depot generated Reply to Cancellation Request (DIC AG6, Status BQ, appendix B-81) which is transmitted to the DSC. The report reflects information pertaining to DICOMSS MRO cancellations and is used to assist depot personnel in identifying and segregating residual materiel.

SECTION VIII - INVENTORY

320801 - GENERAL

The policies, responsibilities, and procedures for conducting physical inventories of DICOMSS materiel stored at the distribution depot are as prescribe undergoing in chapter 7. Troop issue specification items can be inventoried while MROs are being held in the DICOMSS Work Bank. Complete, sample inventories of such items may be processed.

320802 - DOCUMENT CONTROL

a. All IPG III MROs for DICOMSS eligible Troop Issue items are input to SEAVAN Shipment Planning for consolidation in lieu of being free-flowed as are other IPG III MROs under inventory. MROs documented from SEAVAN Shipment Planning when the locator record is flagged for inventory, will be accompanied by a DIC ZUE document, appendix F-2.

b. The Open MRO Flagged for Inventory, appendix F-72, part II, will be output for all affected DICOMSS NSNs resident in SEAVAN Shipment Planning for documented (but not closed) MROs of DICOMSS Items.

CHAPTER 21

ACQUISITION RECEIPT STORAGE ISSUE AND ACCOUNTING FOR MULTIPLE-MANAGED ITEMS

TABLE OF CONTENTS

		PAGE
SECTION I	GENERAL	
321101	Purpose	III-1-21-1
321102	Scope	III-1-21-1
321103	Policy	III-1-21-1
321104	Responsibilities	III-1-21-1
SECTION II	PROCEDURES	
321201	Receipt, Issue, and Adjustments	III-1-21-3
321202	Inventory	III-1-21-4

CHAPTER 21

ACQUISITION, RECEIPT, STORAGE, ISSUE AND ACCOUNTING FOR MULTIPLE-MANAGED ITEMS

SECTION 1 - GENERAL

321101 - PURPOSE

This chapter prescribes policies, responsibilities, and procedures for the procurement, receipt, and issue of multiple-managed items stored in a distribution depot which are owned by one DSC while the management responsibility is invested in a different DSC, Service, or agency. Multiple-managed items are required for inclusion in end items for which the owning DSC has management responsibility.

321102 - SCOPE

This chapter is applicable to DSCs, DLA distribution activities, and the Service depots storing and issuing DLA materiel. Procedures prescribed within this chapter apply to the following:

a. Procurement of the component item.

b. Recording of receipts and issues on the accountable record.

c. Issue of the component items for inclusion in the end item.

d. Processing adjustment to records.

321103 - POLICY

a. Multiple-managed component items required for inclusion in the end item will be shipped directly to the activity performing the operation.

b. Due-in and on-hand assets will be recorded on the DSCs inventory record.

c. Special inventories will be the method of reconciling DSC balances.

d. Transceiving facilities will not be used in the processing of transactions between DSCs and depots. Mail will be the method of communication.

321104 - RESPONSIBILITIES

a. DSCs will:

(1) Procure or requisition for direct delivery to the activity performing the end item operation, those items which are managed by another DSC, Service, or agency and are required for inclusion in the end item.

(2) Record assets both due-in and on hand on the inventory record.

(3) Provide the depot performing the operating Status Cards, DIC AE_, indicating the quantity, by item, the assembly point will be receiving and the estimated delivery date.

(4) Post quantities received to the inventory record from the DD Form 250, 1155, or 1348-1.

(5) Forward a MRO (DIC A5_) to the activity performing the operation. This document will serve as the authority to physically move the component item to the operation point.

(6) Receive a DD Form 1348-1 from the depot which will indicate that materiel has been physically moved from the storage area to the actual operation point.

(7) Receive DD Form 1348-1, 250, or 1155 from depot upon receipt of materiel due-in for assembly operation.

(8) Provide disposition of excess multiple-managed component items that may be generated at the depot level.

(9) When known, furnish by letter to the activity performing the operation information relative to UI and NSN changes and deletions.

(10) Furnish copies of any contractual documents to the activity performing the operation. Where possible, the contract will stipulate inspection at origin.

(11) Adjust accountable records and initiate secondary supply action when a denial is received or when the MRC indicates that the quantity issued is less than the quantity requested.

b. Distribution depots will:

(1) Receive and receipt for the multiple-managed component items shipped directly into the activity performing the operation.

(2) All stocks will be stored and documents processed to the manual Locator File.

(3) Receive from the DSC and process applicable MROs.

(4) Furnish the DSC confirmation that the materiel has been physically moved.

(5) Process Special Inventories when requested by the DSC.

(6) Follow instructions of DSCs when performing a disassembly operation insofar as the disposition of multiple-managed items is concerned.

(7) Maintain issue and receipt history records for one year. Hard copy documents may be destroyed after completion of the operation.

SECTION II - PROCEDURES

321201 - RECEIPT ISSUE AND ADJUSTMENTS

Distribution depots will:

a. Receive Status Cards, DIC AE_, indicating the quantity, by item, the assembly point will be receiving and the estimated delivery date.

b. Receive from DSC copies of any contractual documents at the activity performing the operation. Where possible, the contract will stipulate inspection at origin.

c. Receive and receipt for the multiple-managed component items shipped directly into the activity performing the operation.

d. Furnish the DSC a DD Form 1348-1, 250, or 1155 indicating receipt of materiel due-in for assembly operation.

e. Create a locator record for each NSN. Annotate the location and quantity on the record. NOTE: These locator records will be created and maintained manually at defense depots.

f. Process NSN, UI, changes, and so on, against the manual Locator File and make necessary changes both to the locator record and/or physical stock where applicable.

g. Receive from the DSCs a MRO which will be the authority to move the component items from the storage area to the actual operation point. Furnish the DSC a DD Form 1348-1 as confirmation that the materiel has been physically moved.

h. Follow instructions of DSCs when performing a disassembly operation insofar as the disposition of multiple-managed items is concerned.

i. Submit DD Forms 1348-1 to the DSC for multiple-managed items physically moved to the storage area as a result of a disassembly operation.

j. Take appropriate disposal action on excess items procured from commercial sources.

k. Maintain issue and receipt history records for one year. Hard copy documents may be destroyed after completion of the operation.

321202 - INVENTORY

Distribution depots will:

a. On an annual basis, receive a request for special inventory, DIC DJA, forwarded by mail from the DSC.

b. Process special inventories when requested by the DSC.

c. Mail the completed documents, DIC DJA, to the applicable DSC.

CHAPTER 60

PLANNING AND EFFECTING SHIPPING ACTION

SECTION I - GENERAL

360101 - PURPOSE

This chapter prescribes the general policies and concepts for workload and shipment planning functions.

360102 - SCOPE

Policy and guidance contained in this chapter will cover processing of MROs (A2_, A5_) and DROs through the following operational areas:

a. Establishment and operation of the MRO/DRO consolidation file.

b. Preparation of Workload Forecast.

c. Preparation and control of shipping documentation.

d. Shipment planning.

e. Selection of stocks, packing, and assembly of stock for shipment.

360103 - REFERENCES

Applicable references will be covered in each subsequent section or paragraph.

SECTION II - RECEIPT OF MRO/DRO AND ESTABLISHMENT OF FILES

360201 - GENERAL

a. MROs/DROs will be processed in the same manner and under the same criteria. All references to MRO processing in subsequent sections and paragraphs pertain to both MROs and DROs unless otherwise specified.

b. MROs are received for processing and validation IAW chapter 4 and appendix D-41.

c. DROs are received for processing and validation IAW chapter 12 and appendix D-65.

360202 - FILES

a. Cumulative Register - All MROs/DROs received for the day are processed through appendices D-41 and D-65. All MROs in IPG I and II are processed through appendix D-98.

b. Consolidation File - MROs in IPG III are processed through appendix D-27.

c. Shipment Unit File - All MROs are placed in the Shipment Unit File through appendix D-98.

d. History File - All MROs are placed in the History File on a daily basis from the Cumulative Register and subsequently updated with additional data.

360203 - PROCESSING CYCLES

a. IPG I and II will be processed as volume dictates and as computer time is available to meet UMMIPS timeframes.

b. All other MROs will be processed daily.

360204 - AREA SHIPPING CYCLE

a. An Area Shipping Cycle Table will be established by each defense depot (appendices B-66, part F). This table will consist of the geographical shipping area with shipping rotation cycle(s) assigned for each area; by workdays.

b. The Area Shipping Cycle Table is a table of predetermined geographical shipping areas and the shipping rotation cycles(s) assigned to each area; for example:

Geographical Area Code	Rotation Cycle
A	Mon, Tue, Wed
B	Mon
C	Mon, Tue, Wed, Thr, Fri
D	Wed

c. A geographical shipping area represents a station or a group of stations in the same general area to which consolidated rail or truck shipments can be made to obtain the most economical freight rates.

d. A shipping rotation cycle is the day(s) of the week that MROs for a specific geographical area(s) are to be released for shipment processing. This cycle represents the minimum normal time to accumulate a shipment unit to the area.

e. Shipping rotation cycles are established based on the critieria that IPG III MROs will not be in the depot in excess of allowance processing time established by UMMIPS.

f. The days of the week (Monday through Sunday) may be used to establish the day(s) of the week in the cycle that the MROs will be released for processing for a specific geographic area(s). Saturdays, Sundays and holidays may be included or excluded at depot option.

g. Geographical shipping area and shipping rotation cycles will be determined based on the following:

(1) Geographical segregations that are common to the depot distribution system.

(2) Number of lines processed to a given area during a set period of time.

(3) Identification of Consignee stations associated with a geographical area.

(4) Optimum holding periods to gain most effective and economical shipment consolidations.

(5) Maximum holding times within UMMIPS not to exceed remaining supply system processing time.

(6) Local capabilities for processing MROs.

360205 - ESTABLISHING PDT AND MDT

Establish a Planned Date to Transportation (PDT) and Mandatory Date to Transportation (MDT) for each MRO as follows:

a. IPG I - Compute MDT/PDT as AUTODIN Transmission Date from DSC plus one day.

b. IPG II - Compute MDT/PDT as AUTODIN Transmission Date from DSC plus two days.

c. IPG III -

(1) Compute MDT as DSC Transmission Date plus eight days.

(2) The PDT is established for IPG III MROs as follows:

(a) The Area Shipping Cycle Table is queried to obtain the pertinent rotation cycle.

(b) The PDT is based upon the date in the Area Cycle Shipping Table nearest to, but not exceeding the MDT.

(c) When the PDT has been established for IPG III MROs, they are then put in the Consolidation File under the PDT and appropriate geographic area except when MDT does not allow banking.

(3) The PDT/MDT is established for DROs as follows:

(a) PDT is based on the scheduled Geographic Area shipment date which immediately precedes or its equal to the MDT.

(b) MDT is based on the date of the document, pos. 36-39, plus 30 days.

SECTION III - SHIPMENT UNIT CONFIGURATION

360301 - SHIPMENT UNIT

a. A shipment unit is normally a group of compatible MROs which have been brought together in the computer process for simultaneous shipment to a single consignee.

b. A shipment unit may consist of a single MRO when identified for separate shipment.

c. Shipment units are applicable to parcel post as well as freight shipments.

360302 - SHIPMENT UNIT NUMBERING SYSTEM

a. Each shipment unit, whether a group of MROs or a single MRO, is identified by a unique Shipment Unit Number.

(1) Shipment Unit Numbers are assigned consecutively from the beginning of each day's processing. A Shipment Unit Number is comprised of a 3-digit Julian date and a 4-digit serial number, i.e., 0400078.

(2) The Shipment Unit Number is the basic control medium in subsequent processing.

b. Each MRO, while in the Shipment Unit File, is identified by the Shipment Unit Number and a 4-digit Shipment Unit Line Item Number, i.e., 0050107 0001. The Shipment Unit Line Item Number is also a control medium in subsequent processing.

360303 - TRANSPORTATION CONTROL NUMBER

a. A Transportation Control Number (TCN) is assigned to each shipment unit in addition to the Shipment Unit Number.

b. If a Required Delivery Date (RDD) is furnished, the TCN is selected from the document number of the MRO with the earliest RDD in the shipment unit. If an RDD is not furnished, the TCN is selected from the document number of the MRO with the earliest document (Julian) date in the shipment unit.

360304 - FORMATION OF SHIPMENT UNITS

a. MROs are formed into shipment units via computer processing.

b. Certain types of MROs are formed into shipment units during initial processing and immediately released for document preparation, e.g., IPGs I and II. This type of shipment unit is considered a firm shipment unit and is placed in the Shipment Unit File.

c. Other types of MROs are formed into tentative shipment units during initial processing and are then placed as shipment units into a Consolidation File to enable further consolidation through receipt of additional MROs.

(1) Shipment units which are placed in the Consolidation File are considered to be tentative shipment units.

(2) Tentative shipment units become firm shipment units when released and shipping documentation is prepared. Firm shipment units are then placed in the Shipment Unit File.

d. MROs, Issue Priority Groups I and II are consolidated in firm shipment units during processing for shipment documentation. Separate consolidations are made for each IPG.

e. All other MROs, Issue Priority Group III, are placed in the MRO Consolidation File as tentative shipment units pending further consolidation prior to document release. Separate consolidations are made for DROs. IPG III MROs will be consolidated into shipment units.

f. Consolidation of MROs into shipment units is based upon the following common data:

(1) IPG.

(2) PDT.

(3) Consignee.

(4) Water Commodity Code Group. (Overseas shipment only.)

(5) Special Requirement Codes K, L, M, Q, S, W, Z, 0, 2, 3, 5, 6 will only be consolidated with like codes, i.e., K coded materiel with other K coded materiel. Codes H, J, 1, and 9 may be consolidated together or with items coded Z.

(6) NSNs with Hazardous Storage Compatibility Code A1 (Radioactive Regulated) will not be consolidated.

(7) Type of Cargo Code (fourth position of the Water Commodity Code). These codes and criteria are reflected in appendix A-34.

(8) Project Code, together with pos. 30, Service Assignment Code. (MROs to Navy consignees with Navy Project Codes that have other than D or Z in the first position may be consolidated in the same shipment unit.)

(9) Warehouse Area Code (Location Group Code).

(10) MAP MROs are consolidated when consignees are equal.

g. The following criteria govern consolidation of MROs into shipment units:

(1) Exception MROs, DICs A55 and A5E, will only be consolidated with other A55 or A5E MROs.

(2) A single unit will not exceed 9,999 MROs.

(3) No location MROs will not be consolidated.

(4) MROs with Advice Codes 8A and 8B will only be consolidated with other 8A or 8B MROs respectively.

(5) NMCS MROs will not be consolidated.

(6) Alphas in Stock Number.

(7) New receipt MROs.

(8) Fifth position of the Water Commodity Code is K, X or Z for overseas shipments.

(9) IPE MROs.

(10) MROs for items held in the MRO Bank for inventory will only consolidate with other items held for inventory, (See appendix D-98).

360305 - CRITERIA FOR FREIGHT AND PARCEL POST SHIPMENT UNITS

a. Criteria are established in the computer with which to determine and identify shipment units and lines thereof as freight, USPS, and other small shipment carriers. One Freight/All Freight (OFAF) is a concept of mode assignment which assigns a freight mode to parcel post eligible shipments if there is another legitimate freight shipment with an equal document release date going to the same place. It assumes that the shipments will probably meet in the freight shipping terminal and be moved under the same GBL thereby saving the difference in transportation charges between parcel post and freight on the previously planned parcel post shipment. A cost comparison will be made by each activity of small shipment carriers and consignee DoDAAD records will be appropriately coded IAW appendix B-66 Q.

b. Freight criteria are as follows:

(1) MROs with Special Requirement Codes B, J, K, L, W, 3, 4, 5, 6.

(2) NSNs with Hazardous Storage Compatibility Code A1 (Radioactive Regulated).

(3) Type of Cargo Codes B, D, E, F, G, I, J, K, L, M, N, O, P, R, S, T, U, V, W, X, Y.

(4) All MROs for which the DoDAAD File has been coded "No Go" parcel post and have not been coded with a small Parcel Carrier Code.

(5) Total weight of a shipment unit exceeds designated Small Parcel Carrier weight limits established in table 17 part 1 (appendix B-66Q).

(6) Total cube of a shipment unit exceeds 3.5.

c. USPS criteria are as follows:

(1) Total weight of a shipment unit does not exceed USPS Weight Limits established in Table 17 Part 1, or 46 pounds if a weight limit is not established.

(2) Total cube of a shipment unit does not exceed 3.5.

(3) Activity address in the DoDAAD File is not coded "No Go" parcel post.

(4) Transportation rates are less than for UPS or other Small Parcel Carriers.

d. Criteria for Small Parcel Carriers other than USPS:

(1) Total weight of Shipment Unit Does not exceed designated carrier weight limits established in Table 17 Part 1 (appendix B-66Q).

(2) Total Cube of Shipment Unit does not exceed 3.5.

(3) To CONUS location in lieu of USPS when the designated Small Parcel Carriers rates are lower.

(4) All MROs for which the DoDAAD File has been coded "No Go" parcel post.

(5) Fleet Ballistic Missile shipments.

e. The computer determined (see paragraph 304212) mode of shipment is utilized for guidelines and informational purposes. Actual shipments may be made by the most desirable method.

SECTION IV - TRANSPORTATION UNIT

360401 - GENERAL

Tentative shipment units are sorted into transportation units and assigned a Transportation Unit Number when:

a. Destination Cross-Reference (DCR) Code is common for CONUS freight shipment of overseas SEAVAN shipments.

b. POE is common for O/S freight.

c. Parcel Post shipments will be separate transportation units.

d. Shipment units with the following Special Requirement Codes will not be consolidated with shipment units having unequal Special Requirements Codes: 3, 4, 5, 6, and N (N applies only on O/S shipment).

e. Shipment units with following unequal fourth position of the Water Commodity codes will not be consolidated: B, I, J, P, S, and T.

f. Shipment units which are Air Challenge Exempt (Code 1, 2, or 3 in the first position of the Air Commodity Code) will not be consolidated with nonexempt items (alpha in the first position of the Air Commodity Code) for overseas shipment.

NOTE: DCR is a code which is common to all customers within a destination and is included in the Activity Address File.

SECTION V - PROCESSING OF HIGH PRIORITY MRO(S)

360501 - GENERAL

a. The processing of MROs through the various phases of assignment of MDT and PDT, consolidation of shipment units is outlined in section II and III.

b. This section outlines the processing of High Priority MROs.

360502 - PROCESSING OF HIGH PRIORITY MRO(S) FOR SHIPPING DOCUMENTATION

a. All IPGs I and II MROs are placed in the input holding file; after receipt, all IPG I or IPG II MROs are pulled separately from the input holding file during the initial Hi Pri processing cycle and additional High Priority cycles. Selection of IPG I or IPG II MROs for processing in separate cycles will be controlled through the Computer Console for the initial and additional High Priority cycles. This will separate the documentation for IPG I and IPG II MROs, and permit more flexibility in scheduling of processing cycles. Inprocess files for all single line IPG I and IPG II MROs released in additional High Priority cycles will be updated immediately following documentation. This will enable MROs to be offered, labeled and billed on the same day as released and permit UPS Shipment Records and Parcel Post Records which are not under automatic clear procedures to be closed. Multiline MROs in additional high priority cycles will be released and documented in accordance with the table entry in the "priority options for multiline documentation" field of appendix B-66 D. In process records for IPG I and II Multiline MROs cannot be updated until one day following documentation.

b. Access the following files or tables to obtain necessary data to enable subsequent processing of the MRO:

(1) DoDAAD File for DCR Parcel Post Zone Code, Geographic Area Code, and "No Go" Parcel Post Code.

(2) From Table and Control File, obtain Warehouse Area Table and MRO Processing Volume Constant.

(3) Stock Locator Record File - Obtain necessary freight data and applicable storage location.

c. Select warehouse location IAW criteria established in appendix D-98.

d. Consolidate MROs into shipment units and assign a Transportation Control Number.

e. Sort shipment units into transportation units in DCR sequence.

f. The time that picking, packing and assembly actions are to be completed will be calculated for each shipment unit. Data for calculations is entered prior to computer cycle by appendix B-66, part D.

g. Each shipment unit will be identified as freight or parcel post according to computer calculations. Parcel Post shipments will be further identified based on IPG, destination, and item for dispatch via AIRMAIL, MOM, FIRST CLASS MAIL, EXPRESS/WSP or SURFACE Parcel Post. NMCS will be printed on the shipping label of the DD Form 1348-1 when applicable regardless of the mode of shipment.

h. Assign Transportation Unit Number, Shipment Unit Numbers, and Shipment Unit Line Item Numbers to all shipment units. Lines within each shipment unit will be arranged in prime location sequence prior to assignment of the Shipment Unit Line Item Number.

i. An in-the-clear address will be obtained from the shipping address directory for the consignee and POE, POD where applicable.

j. MRO/DRO Inventory Transaction Documents (F-2 format) will be prepared for each MRO/DRO prepared when an Inventory Flag is reflected on the Locator File. The DD Form 1348-1 will be sequenced directly behind the MRO/DRO to which it relates. This document will be processed as outlined in appendix E-064 P.

k. The following shipping documentation will be prepared and distributed:

(1) Shipment Planning Worksheet, appendix C-19 (appendix E-016 P).

(2) DoD Single Line Item Release/Receipt Document (DD Form 1348-1 appendix C-11 (appendix E-011 P)).

(3) Summary analysis of released workload.

(a) Part 1 - Warehouse, appendix F-41.

(b) Part 2 - Total, appendix F-42.

(c) Part 3 - Geographic Area, appendix F-88.

(4) Military Shipment Label Stencil, appendix C-58.

(5) Transportation Unit Summary List, appendix F-39 (appendix E-039 P).

*(6) Shipment Unit Completion Card, DIC ZBP, appendix B-101, (appendix E-101 P).

*(7) MRO Control/Status Request Card, DIC ZBM, appendix B-99, (appendix E-099 P).

*(8) GBL Closeout Card, DIC ZEN appendix B-128, (appendix E-128 P).

(9) MRO/DRO Inventory Transaction (appendix E-064 P). (Duplicate DD Form 1348-1).

(10) Special Project and FMS Case Control Listing, appendix F-4.

(11) Advance Domestic Air Challenge Listing (appendix F-174).

(12) Advance Air TCMDS Transceived to the Air ATCO.

(13) MOFAST TCMD Transaction Listing - Advance Air TCMDS.

l. Shipment unit information is placed in the Shipment Unit File. Data are available from file on inquiry, using DIC ZMB, with Action Code DN. Appendix F-40, Shipment Unit Line Item Inquiry Answer will be received.

m. Assign assembly area and print data onto appendices C-11, C-19, and F-39.

*In accordance with depot option (appendix B-66, part D).

SECTION VI - WORKLOAD PLANNING AND FORECASTING

360601 - GENERAL

a. The processing of MROs through the various steps of assignment of MDT and PDT, consolidation of shipment units is outlined in sections II and III.

b. This section prescribes the policies and procedures for establishment of the Workload Consolidation File, workload forecasting and pull, and other processes related to low priority MROs.

c. The Area Shipping Cycle Table is outlined in section II and is further explained in this section for purposes of continuity.

360602 - AREA SHIPPING CYCLE TABLE

a. An Area Shipping Cycle Table will be established by each depot. This table will consist of the geographic shipping area, with shipping rotation cycles assigned to each such area.

b. Geographic shipping area will be determined based on the following:

(1) Geographic segregations which are common to the local depot distribution area.

(2) Number of lines or tons shipped to a given area during a set period of time.

(3) Identification of consignees associated with a geographical shipping area.

(4) Optimum holding periods to gain the most effective and economical shipment consolidations; maximum holding times not to exceed remaining supply system processing time.

(5) Local capabilities for processing MROs.

c. Area Shipping Cycle Tables are applicable to processing of MROs, IPG III.

(1) The Area Shipping Cycle Table is the media by which the PDT is determined for such MROs.

(2) The PDT governs the placement of data in the workload forecast, appendix F-38.

360603 - MRO CONSOLIDATION FILE

a. As outlined in paragraph 360304, section III, all low priority MROs are consolidated into tentative shipment units and placed in the MRO Consolidation File.

b. These MROs remain in the MRO Consolidation File as tentative shipment units. Additional MROs as received are matched with data in the MRO Consolidation File to add to tentative shipment units or to create additional tentative shipment units.

360604 - WORKLOAD CONSOLIDATION FILE AND WORKLOAD FORECAST

a. MROs in IPG III are processed for computation of weight, man-hours, MDT, PDT, determination of geographic area, and warehouse locations. Following this process, MROs are placed in the Workload Consolidation File.

b. The placement of MROs in the Workload Consolidation File is based upon the PDT derived from the MDT and Area Shipping Cycle Table.

c. The placement of DROs in the Workload Consolidation File is automatic, based on the MDT computed from the document date plus 30 days.

d. All workload is presented for review and action on the Workload Forecast, appendix F-38. This forecast presents the workload by PDT, by warehouse and geographic area as well as totals by area and warehouse. Workload is expressed in terms of line item and weight.

e. The Workload Forecast is prepared once daily.

360605 - WORKLOAD PULL

a. The Workload Forecast, appendix F-38, is utilized to determine workload pulled today and workload in bank by warehouse area and customer. Coordination between the storage and transportation elements, a knowledge of MROs in process and resources available is essential.

b. Workload will be released automatically contingent upon the number of workdays by which the Document Release Date (DRD) precedes the PDT. This number of workdays is established by each depot by means of appendix B-66, part F. For example, assume that the current Julian date is 100 and the day is Monday; if the number of workdays (DRD) has been established as four, the workload for PDT Julian date 104 will be the earliest PDT shown on the report. The workload for date 104 will be released automatically in the next low priority cycle.

c. Additional workload, in addition to that being released automatically, is requested by submitting a Workload Request Card, appendix B-98. Cards must be submitted prior to the Lo Pri Shipping Cycle.

d. Additional workload may be requested by the following elements as shown on the Workload Forecast, appendix F-38. Processing of Workload Request Card is covered in appendix E-098 P.

(1) Line Items

(2) Geographic Shipping Area

(3) Warehouse Area (one-digit code)

(4) PDT

(5) DCR (Destination Cross-Reference) Code

(6) Consignee - under emergency condition only

(7) Special Projects, together with Service Assignment Code

(8) Combination of (1) through (4)

(9) DROs

e. Input Limits are as follows:

(1) Fifteen cards may be entered to pull workload by Special Project Code, together with Service Assignment Code.

(2) Fifteen cards may be entered by pull workload by consignee under emergency conditions only.

(3) A hundred cards may be entered to pull workload by DCR

(4) Fifteen cards may be entered to pull workload by:

(a) Line Items

(b) Geographic Area

(c) Warehouse Area

(d) Planned Date to Transportation

(e) A combination of (a) through (d)

f. Stock Location Group Table lists the first, the first and second, or the first, second, and third positions of the location code to a single alpha Stock Location Group Code (or Warehouse Area), established in accordance with appendix B-66, part D.

g. Procedure for processing violations relative to the Workload Request Card, DIC ZBL, are outlined in appendix E-098 V.

SECTION VII - PROCESSING IPG III MRO(S)/DRO(S)

360701 - PROCESSING IPG III MRO(S)/DRO(S) FOR DOCUMENTATION

a. Following the validity of MROs/DROs in appendix D-41 and appendix D-65, the following action is taken:

Access the following files to obtain necessary data to enable subsequent processing of the MRO:

(1) DoDAAD File for SPLC, Parcel Post Zone Code, and Geographic Area Code, and "No Go" Parcel Post Code.

(2) From Locator Record File obtain necessary freight data and applicable storage location. Select warehouse location in accordance with criteria outlined in appendix D-26.

b. Compute PDT and MDT in accordance with section II, paragraph 360205.

c. New MRO input is merged in the consolidation file by Geographic Area and VDT.

d. The consolidation file is accessed to determine the PDT to be released for documentation.

e. Establish eight PDTs to be shown on Workload Forecast, appendix F-38.

f. MROs eligible for documentation will be selected from the Consolidation File.

g. Workload Forecast is prepared and distributed in accordance with appendix F-38.

h. History file is updated.

i. Selected MROs are released for documentation and shipment unit consolidation in accordance with appendix D-98.

j. MROs will be consolidated into final shipment units. MROs will not be consolidated with DROs.

k. A shipment unit number and shipment unit line item number are assigned.

l. A Transportation Control Number is assigned to each shipment unit.

m. Shipment units are sequenced into transportation units by DCR and assigned a Transportation Unit Number.

n. The shipment unit is identified as parcel post or freight.

o. An in-the-clear address is obtained from the shipping address directory for the consignee and the POD, POE if applicable.

p. The time that picking, packing, and assembly actions are to be completed will be calculated for each shipment unit. Data for calculations are entered prior to computer cycle via appendix B-66, part D.

q. MRO/DRO Inventory Transaction Documents (F-2 Format) will be prepared for each MRO/DRO prepared when an inventory flag is reflected on the Locator File. The DD Form 1348-1 will be sequenced directly behind the MRO/DRO to which it relates. This document will be processed as outlined in appendix E-064 P.

r. The following shipping documentation is prepared and distributed:

(1) Shipment Planning Worksheet, appendix C-19.

(2) DoD Single Line Item Release/Receipt Document (DD Form 1348-1) appendix C-11 (appendix E-011 P).

(3) Summary Analysis of Released Workload.

(a) Part 1 - Warehouse, appendix F-41.

(b) Part 2 - Total, appendix F-42.

(c) Part 3 - Geographic Area, appendix F-88.

(4) Military Shipment Label Stencil, appendix C-58.

(5) Transportation Unit Summary List, appendix F-39 (appendix E-039 P).

*(6) Shipment Unit Completion Card, DIC ZBP, appendix B-101 (appendix E101 P).

*(7) MRO Control/Status Request Card, DIC ZBM, appendix B-99 (appendix E-099 P).

*(8) GBL Closeout Card, DIC ZEN, appendix B-128 (appendix E-128 P).

(9) MRO/DRO Inventory Transaction, appendix F-2 (appendix E-064).

(10) Special Project and FMS Case Control Listing, appendix F-4.

* In accordance with depot option, Appendix B-66 D, cards will be produced for items not eligible for processing via the MOFAST System.

s. Shipment unit information is placed in the Shipment Unit File.

t. Assign assembly area and print data onto appendices C-11, C-19, and F-39.

SECTION VIII - SHIPMENT PLANNING

360801 - GENERAL

A Shipment Planning Function, under the Transportation Officer, is established to effect maximum consolidation of line items into shipment units to ensure that the available transportation capability is effectively utilized at minimum cost.

a. Advance shipment planning documentation is made available to the Transportation Officer after each machine processing cycle.

b. Optimum use of mechanized data processing techniques are made are effecting line item consolidation and minimizing manual shipment planning.

c. The functions of shipment planning are accomplished by various organizational elements within the Directorate of Storage and Transportation.

d. The concept of shipment planning includes, but is not limited to the following elements:

(1) Advance planning and scheduling of shipment

(2) Consolidating compatible MROs into shipment units

(3) Consolidating shipment units into transportation units

(4) Cyclic movement planning of less than load shipment

(5) Freight planning

(6) Forecasting workload

(7) Predetermining and acquiring transportation releases and routings

(8) Providing data for evaluation and purification of shipping characteristic data

(9) Transceiving Advance Air TCMD Formats to ATCO

(10) Challenging High Priority Domestic Air shipments to the consignee

360802 - DOCUMENT DISTRIBUTION

a. Upon computer release of workload, the following document distribution will be accomplished:

(1) Freight shipments.

(a) Shipment Planning Worksheets (SPWs) for other than mechanized complex in consignee (Shipment Unit Number) sequence will be delivered directly to Shipment Planning Branch, Transportation and Traffic Management Office for shipment planning. SPWs for the mechanized complex (Warehouse Area Code X) will be sequenced by batch control number and deliver directly to the Warehouse Area Control Office with the DD Forms 1348-1.

(b) DD Form 1348-1 - flimsy in sequence determined by depot option, appendix A-50 will be burst by the Office of Data Systems of Shipping Documentation Branch and delivered to appropriate Area Control Branch or Bin Operations Branch Office for stock selection.

(2) Line Parcel Post shipments (two or more line items).

SPWs for other than mechanized complex in consignee sequence and DD Form 1348-1 flimsy in sequence determined by depot option, appendix A-50 will be burst by Office of Data Systems and delivered directly to Area Control or Bin Operations Branch, as appropriate. SPWs for the mechanized complex (Warehouse Area Code X) will be sequenced by batch and batch control number and delivered directly to the Warehouse Area Control Office with the DD Forms 1348-1.

(3) The Area Control Offices will provide Shipment Planning Branch, T&TMO and Shipping Documentation Control Branch, Shipping Division with two copies of each SPW. This distribution will be made upon receipt by the indicated Warehousing Division elements.

(4) Parcel Post Shipments.

(a) SPW will be prepared for multiline parcel post shipments IAW depot option entered through appendix B-66, part D. SPWs will not be prepared for single line parcel post shipments.

(b) DD Form 1348-1 flimsy in sequence determined by depot option (appendix A-50), will be burst by ODS and delivered to appropriate Area Control Branch or Bin Operations Branch Office for pick, pack, assembly, and shipment.

b. Processing of above output documentation will be IAW applicable E appendices and outlined below.

360803 - DOCUMENT PROCESSING

a. Shipment Planning Branch, T&TMO.

(1) SPWs will also serve as the basis for requesting releases from clearance authorities on release eligible shipment units. For supply performance reporting, shipment unit is available for transportation when a release is requested.

(2) Shipment planning determinations applicable to each item listed on the SPW will be annotated thereon.

(3) Number 1 and 2 copies will be forwarded to Shipping Documentation Control Branch, Shipping Division.

(4) Number 3 and 4 copies will be forwarded to the appropriate Area Control or Bin Operations Branch.

(5) Number 5 copy will be retained by Shipment Planning Branch.

b. In addition to the above, the following output documents will be used as a guide in shipment planning:

(1) Workload Forecast, appendix F-38.

(2) Summary Analysis of Released Workload, part I, appendix F-41.

(3) Summary Analysis of Released Workload, part II (Total), appendix F-42.

(4) Summary Analysis of Released Workload, part III (Geographic Area), appendix F-88.

(5) Transportation Unit Summary Listing, appendix F-39.

SECTION IX - MATERIEL SELECTION, PACKING AND ASSEMBLY FOR SHIPMENT

360901 - SELECTION OF MATERIEL

a. DD Form 1348-1 (appendix E-011 P) will be received for each line item released for shipment.

b. Materiel is selected from location based on the following data contained in the DD Form 1348-1: location, condition, quantity, and stock number. The exact quantity contained in the MRO will be selected whenever possible. An exception may be made by distribution depots to effect the following:

(1) Upward or downward quantity adjustments for items contained in rolls, lengths, spools, or other configurations subject to being cut, or containers of liquids subject to being repackaged. This would normally be confined to such items as textiles, wire, cable, metal bars, strapping, and so on, or packaged liquids.

(2) Upward quantity adjustments for nonperishable subsistence items in less than case quantity, accrued through operational or transit damage. DIC ARA will be used to confirm shipment.

(3) In all other instances, adjustments to the original requisition quantity will be limited to those adjustments made by the DSC when a standard pack quantity is involved. Distribution depots will not make further quantity adjustments, except as previously noted. Distribution depots will not effect adjustments, under the exceptions noted, if the value decrease or increase exceeds $50.00. Adjustments greater than $50.00 will require telephone/message contact with the DSC so that customer concurrence/nonconcurrence can be determined. Quantity adjustments will not be made by distribution depots on any MOR which contains Advice Code 2D in pos. 65-66. Documentation of adjustments will be IAW appendix B-99 utilizing appropriate Action Code from appendix A-42. Type of Hold Code, appendix A-21, or Delayed Shipment Reason Code, appendix A-64, will be entered in pos. 19 when applicable. Materiel will be forwarded to assembly area to be consolidated with other items in the same shipment unit.

c. If quantity is not available (partial or entire quantity), process IAW appendix E-180 P.

d. Materiel shipped as GFM to contractors will be selected IAW special instructions provided by DSCs. On GFM, procedures contained in chapter 13 will govern quantity/monetary adjustments. DSCS will advise depots of special project codes and instructions to be entered into the depot Project In-The-Clear Table. These special instructions apply to selection of compatible colors of cloth mainly to be shipped to clothing manufacturers.

360902 - PACKING OF MATERIEL

Materiel picked for shipment will be packed and marked IAW MILSTD 129-D, and forwarded to designated assembly area.

360903 - ASSEMBLY FOR SHIPMENT

a. Parcel Post - Assemble and ship.

b. Freight - Freight shipments will be assembled IAW instructions annotated on the SPW by the Shipment Planning Branch.

NOTE: When a requisitioner desires that:

a. Specific materiel shipments not be released prior to 50 days before expiration of the extended RDD, he will enter Code S in pos. 62. Shipping activities will assure that this request is honored.

b. Delivery of the materiel be made to the ultimate consignee by the RDD or cancel the requirement be canceled, he will enter Advice Code 2T. Shipping activity unable to meet this RDD will process IAW appendix E-099 P, paragraph 4j. Return materiel to stock.

360904 - RECAPITULATION OF DATA

a. Parcel Post, Single Line - All pertinent picking and packaging data will be recapped on the DD Form 1348-1 IAW appendix E-011 P.

b. Parcel Post, multiline, and freight - all pertinent picking and packaging data will be recapped on the SPW, DLA Form 674 IAW appendix E-016 P.

360905 - FINAL DOCUMENTATION AND SHIPPING ACTIONS

a, T&TMO will receive the recapped copy of SPW from Warehouse or Shipping Division and will plan final transportation unit shipping action, prepare necessary MILSTAMP documentation. Prepare GBL IAW chapter 83 and appendix E-095 P utilizing data contained in the SPW. Make distribution of GBL, establish complete shipping file for GBLs with applicable SPW as backup data.

b. Shipping Division will receive the following documents in conjunction with shipping documentation output. These documents will be held in suspense pending subsequent actions:

(1) MRO Control/Status Request Card, DIC ZBM, appendix B-99 - This card is utilized to report materiel as offered or shipped; to report denials or cancellations IAW appendix E-099 P.

(2) Shipment Unit Completion Card, DIC ZBP, appendix B-101 - This card is utilized to report materiel as offered or shipped IAW appendix E-101 P.

(3) GBL Closeout Card, DIC ZEN, appendix B-128 - This card is utilized to closeout freight shipments IAW appendix E-128 P.

c. Data for completion of above cards will be obtained from the DD Form 1348-1 for Parcel post single line shipments and from the SPW, DLA Form 674 for multiline parcel post and freight shipments.

360906 - PARCEL POST AUTOMATIC CLEAR TRANSACTIONS

a. The MOWASP system provides the capability to automatically confirm parcel post shipments without preparing and entering DIC ZBM and ZBP transactions.

b. Depots can elect to use the automatic clear option by entering DIC appendix B-66, part D, Action Code 01, and including a numeric 1-9 in the Automatic Clear Option field. Depots can elect to not use the automatic clear process by entering zero in the field.

c. Automatic clear dates will not be assigned to:

(1) Freight Shipments.

(2) DROs.

(3) IPE MROs.

(4) No Address MROs.

(5) No Location MROs.

(6) Exception Data MROs.

(7) Registered Parcel Post (Physical Security Code equal to Q or R).

(8) Insured Parcel Post.

(9) EXPRESS/WSP Parcel Post.

d. The automatic clear date is computer-assigned during the shipping documentation process. The assigned date will appear on DD Form 1348-1 in block Y per appendix C-11. This date is computed using the logic noted in appendix D-98 and represents the prescribed shipment date based upon either the earliest MDT in the shipment unit or the computed automatic clear date (developed from automatic clear data in Table and Control 04). Items suspended in the MRO bank for inventory or extended banking receive specialized shipment unit consolidation and automatic clear date considerations as noted in appendix D-98.

e. Confirmation of eligible parcel post shipment units will occur automatically. ZBP and/or ZBM transactions will be generated within the history update process as the following date criteria are reached.

(1) IPG I and II - Automatic Clear Date plus one day.

(2) IPG III - Automatic Clear Date plus two days.

f. The date offered/shipped will be equal to the automatic clear date shown in the shipment unit/line item record.

g. Depots must ensure that actions to incorporate quantity changes, denials or hold codes, and the like, into shipment unit/line item records be accomplished prior to the confirmation date. Failure to do this will result in incorrect information being reported to MOWASP history.

h. The automatic clear date must be deleted from the shipment unit record using appendix B-99/B-101 input formats when the following conditions are encountered:

(1) Parcel Post to Freight conversion.

(2) The planned shipment date will occur after the clear date.

i. Shipment unit/line items records which have the automatic clear date deleted must be offered/confirmed using manually prepared ZBM/ZBP cards per appendix B-99 and B-101.

360907 - MANAGEMENT DATA REPORTS

The following Management Reports are received as output from appendix D-50 and D-105 and will be utilized as outlined in appropriate E Appendices:

a. MRO Status Summary Listing, appendix F-44 (daily).

*b. MRO Status Detail - Part 1 - Warehouse PDT Control Listing, appendix F-78 (as required).

c. MRO Status Detail - Part 2 - Lines Open In Transportation Listing, appendix F-87 (daily).

*The MRO Status Detail - Part I - Warehouse PDT Control Listing, appendix F-78, is only prepared on an as required basis when requested by the Director of Storage and Transportation, when the MRO Status Detail - Part 2 - Transportation DTT Control Listing, appendix F-87, is not produced.

CHAPTER 61

VIOLATIONS (CONTROLLED AND UNCONTROLLED)

TABLE OF CONTENTS

		PAGE
SECTION I	GENERAL	
361101	Purpose and Scope	III-1-61-1
361102	Responsibilities	III-1-61-1
SECTION II	VIOLATIONS - CONTROLLED AND UNCONTROLLED	
361201	General Instructions	III-1-61-1
361202	Violation Control Listings	III-1-61-2

SECTION III	VIOLATION FOLLOWUP RECORDS AND REPORTS	
361301	Followup Report F-118	III-1-61-3
361302	Violation Record Count (Appendices F-85, F-118, E-002 P, E-007 V, and E-032 V)	III-1-61-3
361303	Depot Violation Summary	III-1-61-4

CHAPTER 61

VIOLATIONS (CONTROLLED AND UNCONTROLLED)

SECTION I - GENERAL

361101 - PURPOSE AND SCOPE

This chapter prescribes the responsibilities and procedures governing the processing of violations as they apply to depots. These procedures include the processing of a controlled violation transaction from establishment to clearance by reinput of correct data or deletion, and the processing of uncontrolled violations from receipt to reinput of new document or administrative cancellation.

361102 - RESPONSIBILITIES

Depots will:

a. Implement procedures internally as prescribed herein.

b. Process violations IAW instructions contained in this chapter and the applicable E Appendices.

c. Perform manual review and research of appendices F-85 and F-118 listings.

d. Process both controlled and uncontrolled violations within the established timeframes.

e. Implement adequate controls to ensure that all input documentation is accurate, complete, and in alignment with prescribed format to prevent violations.

f. Keep the DSCs informed of substantial workload resulting from erroneous output from the DSC to the depot system through statistical compilation of violations and exceptions received.

SECTION II - VIOLATIONS - CONTROLLED AND UNCONTROLLED

361201 - GENERAL INSTRUCTIONS

a. Prompt correction of errors in documentation is important in establishing and maintaining a high degree of supply effectiveness, It is imperative that both controlled and uncontrolled violations be researched and cleared within the established time periods. In no case will a violation be deleted in lieu of reinput or processing to completion where the correcting data are available. Special attention will be directed to those functional areas where the incident of violation is unacceptable.

b. Computer controlled violations are restricted to MRO/DRO transactions failing to pass the validation test of appendices D-41 and D-65. Those violations are suspended in the Cumulative Register File. Suspended violations are updated through a reentry process directing release or deletion of the violation transaction. Initial MRO/DRO violations are output on the appendix F-85, Violation Printout, and processed IAW appendices E-007 V, or E-032 V. Followup output from the Cumulative Register File is shown in appendix F-118, Violation Followup Listing.

NOTE: MRO/DRO violations with invalid RIC (VRC AB) or invalid document number field (VRC AI) will not be suspended in the Cumulative Register File. Errors in these fields cannot be addressed mechanically for reinput/deletion actions.

c. Uncontrolled violations (transactions other than MRO/DRO) failing to pass various edit and validation checks are assigned a VRC by the applicable process and printed out on the appendix F-85, Violation Printout; however, these violations will not be established and maintained in the Cumulative Register File and no followups will be made by the MOWASP computer.

361202 - VIOLATION CONTROL LISTINGS

a. The violation control listings, e.g., appendices F-85 and F-118, are originated mechanically to provide the depot notice of transactions failing to pass validation checks and will serve as a means for manual control during research and corrective action. MRO/DRO transactions identified by the DIC on the listing will be suspended until such time as corrective data is reinput.

NOTE: VRC AA reflects an invalid DIC, see appendix E-002 P.

b. In correcting the violations, the depot will:

(1) Determine the cause for the discrepancy.

(2) Initiate a reentry document or, as necessary, a new input document by reflecting the correct data on the listing IAW the applicable E appendix. All violations recorded against the document must be corrected prior to reinput.

361203 - VIOLATION REASON CODES (APPENDIX A-82)

A 2-digit VRC will be assigned mechanically by the MOWASP computer to provide processing personnel with the reason for which transaction was not accepted for processing. The VRCs (up to 150) will be entered on the appendix F-85 listing following each input image.

361204 - PROCESSING STANDARDS

a. Depots will make every effort to meet the time standard established by the Uniform Materiel Movement and Issue Priority System for processing transactions.

b. A processing time of eight hours is established as a standard for clearing a violation where the original MRO/DRO transaction involved IPGs I and II.

c. A processing time of two workdays is established as the standard for clearing uncontrolled violations (violations not suspended in computer).

SECTION III - VIOLATION FOLLOWUP RECORDS AND REPORTS

361301 - FOLLOWUP REPORT F-118

a. The purpose of the followup action is to identify those violation suspense records which have not been corrected or deleted at the time the daily cumulative register scan and history update is made as shown in appendix D-57.

b. Followup categories are manually established as follows:

(1) Category 1 OVERAGE - The first followup of a violation suspense record having reached the established criteria of overaged.

(2) Category 2 DELINQUENT - The second followup on a given suspense record having passed the established time frame and previously recorded as overage.

(3) Category 3 CRITICAL - The third and subsequent followup of a suspense record until cleared.

c. Data to prepare the Violation Followup Listing (appendix F-118) is stored in the computer and printed daily until violation is cleared. The depot on receipt of a Followup Report will:

(1) Locate initial violation document and process.

(2) Expedite reentry action.

NOTE: If previously reentered, check complete basic document for possible reentry reject action.

361302 - VIOLATION RECORD COUNT (APPENDICES F-85, F-118, E-002 P, E-007 V, and E-032 V)

a. The count is made manually from these listings of controlled and uncontrolled violations, identified to the responsible area with a breakout by DIC and VRC.

b. The count will be used by the depot to ensure compliance with the instructions for preventing and/or clearing violations, and as a quality check on the work performed by the various functional areas.

c. Determination that an undue number of violations are accruing from sources outside the direct supervision of the depot will be made known to the proper authority for corrective action.

361303 - DEPOT VIOLATION SUMMARY

a. The printout (appendix F-85) and followup listings (appendix F-118) will provide the depot with a listing from the computer of uncontrolled and controlled violations rejected due to invalid data. An asterisk (*) will appear under each position of the input image which is to be corrected. If all fields are valid, but the input does not match a record, no asterisks will appear. However, the appropriate VRC will appear in the data line containing the input image and VRCs.

b. The reports will be used to:

(1) Prepare a new input of the transaction with corrected data entered directly below the erroneous field corresponding to the appropriate position. Use ink or distinctive colored pencil for entering correct data. When a column is to be left blank, so indicate by placing a check (✓) mark below the applicable position.

(2) Record administrative decisions to delete transactions which are not suspended and are to be reinput when all actions to correct and identify the violations have failed.

(3) Provide statistical data for evaluation of errors, responsible organizational elements, resolution, and corrective actions.

c. Destroy the appendices F-85 and F-118 listings after 30 days unless required to support statistical summaries or administrative decisions to delete uncontrolled transactions.

CHAPTER 62

LOCATION SURVEY

SECTION I - GENERAL

362101 - PURPOSE

This chapter prescribes the policies, procedures, and responsibilities for conducting location surveys.

362102 - SCOPE

This chapter is applicable to DLA distribution activities and covers all phases of location surveys including the research of violation entries to the computer.

362103 - RESPONSIBILITIES

DLA distribution activities will:

a. Establish a daily location survey program and nonshelf-life surveillance inspection program to comply with provisions of this chapter.

b. Install systems and procedures as outlined in this chapter and related appendices.

362104 - REFERENCES

a. Chapter 7, Physical Inventory Procedures.

b. Chapter 66, Stock Locator System.

c. Supply and Logistics Handbook, Inspection H 105, Administration of Sampling Procedures for Acceptance Inspection.

d. MIL STD - 10D, Sampling Procedures and Tables for Inspection by Attributes.

SECTION II - LOCATION SURVEYS

362201 - CONDUCT OF SURVEYS

a. A vigorous Location Survey program is considered to be a high priority requirement for maintenance of adequate asset information.

b. The validation of Location and Management Data, reflected in the Locator records, with those at the physical location, will be conducted on a continuing basis and all locations surveyed not less than once each fiscal year. The number of surveys to be made per location over and above the required one will be as determined by the Activity Commander.

c. Location Surveys will be performed by regularly assigned and thoroughly trained personnel.

d. Surveys will be scheduled to ensure that each survey lot will be completed and records updated within 24 hours from beginning of survey.

e. Data surveyed in each location will be sufficient to:

(1) Assure accurate data are recorded on locator records to reflect the identity and characteristics of the materiel in the storage location.

(2) Provide information necessary for reconciliation of materiel and accountable records.

(3) Accomplish surveillance inspection or provide necessary information for surveillance inspector to complete inspection.

(4) Alert warehousing personnel to management deficiencies.

362202 - SCHEDULE OF LOCATION SURVEYS

a. Distribution activities will prepare an annual schedule for conducting location surveys. A copy of the schedule will be maintained for a period of two years to verify accomplishment of surveillance inspection of nonshelf-life items.

b. In addition to the required annual schedule of a complete survey, the capability is provided, by computer programing technique, to extract a sample of locations within defined parameters. The extracted sample may be used to examine and determine locator accuracy for the limited area and isolate causes for error and to effect the necessary corrective actions. Additionally, the sample technique may be used as an indicator to isolate warehouse areas which may require additional surveys to be scheduled to achieve and maintain the required locator accuracy.

SECTION III - ERROR CRITERIA

362301 - ERROR CHARACTERISTICS

a. The following locator deficiencies will be identified during a location survey:

(1) Location on record, no stock in location.

(2) Location not on record, stock in location.

(3) Stock number on materiel in location differs from stock number on locator record.

(4) Condition of materiel differs from condition code on locator record

(5) Date of pack on materiel for other than bin stocks differs by more than 12 months from date in locator record.

(6) Unit of issue on materiel in location differs from unit of issue on locator record.

(7) Type of pack (subsistence only) of materiel differs from type of pack on locator record.

(8) Shelf-Life Code on materiel in location differs from Shelf-Life Code on locator record.

(9) Type Storage Code on location label differs from Type Storage Code on locator record.

(10) Unit Pack on materiel in location differs from Unit Pack on locator record.

b. Surveillance Inspection deficiencies identified during survey.

(1) Inspection required.

(2) Care and Preservation required.

(3) Marking required.

(4) Packaging required.

(5) Critical Item - immediate care required to preserve condition of materiel.

c. Management Deficiencies identified during survey:

(1) Bin Label required (storage depots which use a permanent label to identify the warehouse location).

(2) Warehouse Marking(s) required.

(3) C-104 Stack Label required.

(4) Warehouse Housekeeping required.

362302 - LOCATOR ACCURACY

a. In order to establish a common basis for measurement of accuracy, firm guidelines are necessary.

b. Classification of errors and development of locator accuracy percentage for reporting purposes will consider thematériel in the storage location to be correct and errors will be recorded on that basis. Subsequent research may disclose the locator record to be correct and require the materiel to be repackaged and/or remarked to be compatible with recorded data.

c. Multiple errors for one location, although recorded separately, will be counted as one when reported accuracy of locator.

d. Locator accuracy will be computed as follows:

$$100 - \frac{(\text{Location in Error} \times 100)}{(\text{Number of Locations Surveyed})} = \text{Percent of Accuracy}$$

e. The prescribed level of accuracy of Locator Records is 99 percent.

SECTION IV - PROCEDURES

362401 - LOCATION SURVEY

a. The processing of a Location Survey Request Card, appendix B-77, is outlined in appendix E-077 P and the correction of violations which may occur is outlined in appendix E-077 V.

b. The processing of a Location Survey Card, appendix B-78, is provided in appendix E-089 P and the correction of violations which may occur upon reinput is outlined in appendix E-078 V.

c. The detailed procedures for conducting a locator survey are outlined in appendix E-089 P.

d. The preparation and processing of a Location Survey Completion Card, appendix B-105, is provided in appendix E-105 P and the correction of possible violations is outlined in appendix E-105 V.

SECTION V - REPORTS

362501 - LOCATION SURVEY REPORT

Appendix F-90 is provided with Location Audit Cards of Listing. It identifies the assigned lot number, type survey, high and low parameters and total locations in the survey.

362502 - LOCATION SURVEY ANALYSIS REPORT

Appendix F-53 will be prepared following completion of computer processed location survey. Reports will be utilized to analyze operations.

362503 - LOCATION SURVEY STATISTICAL ANALYSIS

Appendix F-154:

a. Part 1 - Prepared monthly from completed data obtained during survey. This report provides statistical information on survey accomplishment and the percent of accuracy by survey and overall by Area Control Branch.

b. Part 2 - Prepared monthly and provides statistical data on the occurrence of location surveys for the month and for the FY to date.

c. Part 3 - Prepared on a monthly basis to serve as a record of all incomplete survey actions which have been activated and not completed. Surveys, by number, will be selected for reporting purposes when the survey action has not been completed 10 or more calendar days beyond date of survey preparation or establishment (reference appendix D-21). Old survey actions completed on or before report period will not be displayed nor reported as a delinquent record.

362504 - LOCATION SURVEY LIST

Appendix F-152 provides a detail listing of all items to be surveyed and is used in lieu of location survey card B-78 when desired.

362505 - LOCATION SURVEY MANAGEMENT ACTIONS (DETAIL AND SUMMARY)

Appendix F-151 will provide detail location information, part 1, and summary information, part 2, of locations identified during location survey which require internal warehousing action to accomplish.

CHAPTER 63

REPORTING OF STORAGE SPACE

SECTION I - GENERAL

363101 - PURPOSE

This chapter prescribes procedural steps for reporting utilization and occupancy of storage space at defense depots and DSCs maintaining storage operations.

363102 - SCOPE

These procedures encompass the compilation of space data required in preparation of Storage Space Management Report, DD Form 805. The reports are controlled as follows:

RCS DD-M-SA(1337) is a quarterly report for periods ending 31 March, 30 June, 30 September, and 31 December. Reports are forwarded to reach HQ DLA, ATTN: DLA-OW by 12th calendar day of the month following the report period.

363103 - REFERENCE

DLAR 4145.3, Storage Space Management Report.

363104 - BACKGROUND

Local storage space control records are maintained by MSO, DS/T.

a. As required for planning current and future storage space assignments.

b. By compiling and adjusting constant data elements. These elements, reported in units of square and cubic feet, identify the type of space by storage section and the commodity assigned to each section.

(1) Gross Storage Space:

(a) Unuseable

(b) Standby

(c) Outgranted to DoD and non-DoD users

(d) Used for Storage Operations

(e) Aisles, Support, Structural Loss

(2) Net Storage Space:

(a) Total Square Feet

(b) Total Cubic Feet

(c) Attainable Cubic Feet

363105 - RESPONSIBILITIES

Defense depot and DSCs with storage activities will:

a. Assign and control net storage space for DLA commodities. Assignments will be IAW space allocations developed and provided by HQ DLA, ATTN: DLA-OW.

b. Assign and control net storage space for non-DLA commodities. Assignments will be IAW space allocations developed and provided by HQ DLA, ATTN: DLA-OW.

SECTION II - COMPLETING SPACE REIORTS

363201 - MONTHLY SPACE REVIEW

a. The MSO, DS/T adjusts assignment of storage space during report period if required.

b. Storage areas, DS/T, will complete DLA Form 527 (appendix C-83) as of the COB the last working day of each fiscal year quarter (30 September, 31 December, 31 March, and 30 June). This action requires warehousemen to:

(1) Measure occupied or vacant net storage space in each storage section.

(2) Break down occupied net storage space by commodity when more than one commodity is stored in a section.

(3) Convert all measurements into square feet and cubic feet.

(4) Enter figures on appropriate lines on DLA Form 527.

(5) Subtract total occupied net storage space in each section from the total amount of net storage spce in the section or area. (Source: The Storage Space Control Records.)

(6) Enter figure obtained i Step (5) on the appropriate line in Column VACANT SPACE.

(7) Enter totals for all colums on TOTALS line.

(8) Complete other entries (self-explanatory).

(9) Forward original and copy of the DLA Form 527 to Office of Chief, Warehousing Division.

(10) Warehousing Division retains copy and forwards original of DLA Form 527 to arrive at the MSO, DS/T, the first working day of the subsequent month.

363202 - FINALIZING SPACE REPORTS

a. MSO, DS/T, reviews and consolidates DLA Form 527 for all storage areas into the statistical data required for the Storage Space Management Report, DD Form 805 (appendix E-037 P).

b. Prepare and forward space data (appendix C-43) to the Office of the Comptroller.

c. Retain file copy.

CHAPTER 65

MOWASP ENTRY-EXIT SYSTEM PROCESSING

SECTION I - GENERAL

365101 - PURPOSE

a. This chapter describes the computer processing of incoming AUTODIN data, the Entry process and control of all input into the MOWASP Computer System and the scheduled output of processed documentation.

b. This chapter also describes the capability of inquiry into AUTODIN history records; related processes involving communication and communication history files; and the establishment and maintenance of the Document Control Tables (DCTs) used in the Entry and Exit processes.

365102 - SCOPE

This chapter is applicable to Defense Depots and DSCs with collocated storage activities. It describes the AUTODIN communication aspects of the MOWASP Computer System and to some extent the internal document processing control, where these functions can be defined in nontechnical, noncommunication language.

365103 - BACKGROUND

a. The MOWASP Entry-Exit System is an integral part of the overall computer process designed to support the Defense Depot Transportation and Supply Procedures. It includes the beginning of processing for all input documentation and the final processing of output documentation intended for recipients outside the MOWASP System. The Computer Exit process also produces documentation related to the transmission of output cards and documentation for processing products for local use.

b. The system will be discussed in terms of an Entry and an Exit process. The inquiry capability and related processes will be explained in separate section of this chapter.

365104 - RESPONSIBILITIES

The processes described in this chapter are the joint responsibility of the Directorate of Storage and Transportation, the Office of Data Systems and the Digital Communications Branch, Telecommunication Division, Directorate of Installations Services. The procedures prescribed for the Digital Communications Branch may be performed by the counterpart branch in the Office of Data Systems at those DSCs where such organization is authorized by DLAM 5810.1, Organization of DLA Field Activities. As used herein, and in related E Appendices, the term "Communication Element" may be interpreted to mean either the Office of Data Systems or Directorate of Installation Services.

SECTION II - ENTRY PROCESS

365201 - GENERAL

The Entry process consists of two major processing areas, i.e., Communication Validation as depicted in appendix D-71, and the Entry Process and Control, as shown in appendix D-72.

365202 - COMMUNICATION VALIDATION

a. The Communication Validation process provides for the receipt of a magnetic tape from the local AUTODIN terminal containing messages (batches of logistic documents in data pattern format) accompanied by communication control headers and End of Transmission (EOT) formats. Header and EOT records are required for control and flow of messages within the AUTODIN. Header and EOT formats are shown in Joint Army, Navy and Air Force Publication Number 128 (short title JANAP 128).

b. The date and time received is added to the input AUTODIN message header record and the entire input message is placed in the Temporary Storage File (up to 550 records per message) for validation of the header and EOT records as indicated in the paragraphs which follow.

c. The Communication Routing Indicator (COMM RI) must represent the processing depot. When the COMM RI does not represent the processing depot, and the input message is not multicall, the incoming message will be rejected on a Communication Reject List, appendix F-116, with the message COMM RI IN ERROR.

d. On multicall the entire COMM RI block (up to 50 addresses) will be searched to locate the processing depots COMM RI and when found, will be mechanically moved to proper position for continued processing. When the processing depots COMM RI is not found on a multicall message, the incoming message will be rejected with the message: ERROR - MULTICALL MSG on APPENDIX F-116.

e. The Security Sentinel (and Redundancy field) must be U (Unclassified) or E (Unclassified EFTO-Encrypt for transmission only) for normal mechanical processing. All other AUTODIN messages will be bypassed, but controlled in such a way as not to compound a possible security compromise. These messages are retained on tape (the AUTODIN Received Message History Tape) and a message is printed on the computer console as follows: SUSPECTED CLASSIFIED MESSAGE ON TAPE - NOTIFY PROPERLY CLEARED PERSONNEL IMMEDIATELY. In addition, the incoming AUTODIN message header record is printed on the Communication Reject List, appendix F-116, with the message: SUS CLASS MSG - CONSOLE MSG - CONSOLE MESSAGE PRTD.

f. Messages which contain a DM (Disregard Message) Sentinel, indicating that for some reason an AUTODIN Electronic Relay is unable to continue a transmission, are rejected on a Communication Reject List, appendix F-116, with the message: DM - DISREGARD MSG.

g. Messages are checked to assure that header and EOT format records are received, are properly positioned within the message, are similar as prescribed by communication regulations and that the tabular record count agrees with the record counts entered in both the header format and the EOT record. Several error circumstances could occur during this validation and erroneous messages are rejected under one of the following messages:

(1) NO HEADER

(2) HDR BEFORE EXPECTED EOT

(3) EOT NOT EQUAL TO HDR

(4) RECORD COUNT IN ERROR

(5) RECORD COUNT = 2

h. Pilot Header Format (PHF) records received as part of an input message as specified in communication regulations are stripped out and processing is continued on the AUTODIN message. The PHF is listed on the Communication Reject List, appendix F-116, under the message: PILOT HDR.

i. Incoming AUTODIN messages are checked against the header records recorded in Received Header History File to ensure that duplicate transmissions are not processed mechanically. Duplicate messages are rejected under the message: DUPLICATE MSG - NO PROCESSED.

j. Input AUTODIN messages received in teletype format are checked to determine whether the header record indicates a data transmission or a clear text teletype. Those teletype messages containing a data transmission header record are rejected on a Communication Reject List, appendix F-116, with the message TTY W/DP HDR. Other teletype format messages appear on the appendix F-116 under the message: TTY W/TTY HDR.

NOTE: All Communication Reject Lists, appendix F-116, except those representing AUTODIN messages in teletype format, are accompanied by card output and are to be processed as indicated in appendix E-146 P.

k. After validation, the header and EOT records are stripped from the incoming message, replaced by an abbreviated Information Header Format, and the header record is placed in the Received Header History File for use in the monthly Communication Traffic Analysis Report and for use in future duplicate AUTODIN message checks. The valid message is further processed as indicated in appendix D-72.

l. The Received AUTODIN Message Tape, from the AUTODIN terminal, is placed in the Received History File in tape library for future inquiry processing, if required and for use in duplication edit of future AUTODIN transmissions.

365203 - ENTRY PROCESS AND CONTROL

a. The Entry Process and Control Procedures accepts input records from the Standard Automated Materiel Management System (SAMMS) Exit process (at DSCs with collocated storage activities) from card reading devices, from teleprocessing (remote entry equipment), from Sequential Peripheral Operations On Line (SPOOL) and from the Communication Validation process.

b. Those input records from the Communication Validation process are checked to ensure that the first record following the Information Header Format record contains a 3-position code in the DIC field. When this code is not recognized, the entire message is rejected under the message, SUSPECT NARRATIVE, on appendix F-114. These messages should be reviewed to determine if the documents can be processed under MOWASP. The punched data cards accompanying these messages should be returned to the Office of Data Systems for input in the next MOWASP Entry process.

NOTE: In the Entry Process and Control programs those documents that are rejected are not output on hard copy documentation, but are assigned to the Exception Working Data Set for output in the Exit system. See appendix D-75, Special Entry - Exit Print-Punch process, for information.

c. All input records are checked to assure that pos. 1-3 contain a valid DIC as listed in appendix A-1. Documents containing a blank or invalid DIC field are rejected. Invalid input from teleprocessing reflect the message, INVALID DIC FROM TP; invalid input from card reading device reflect the message, INVALID DIC-LOCAL INPUT; invalid input from SPOOL or the SAMMS Exit process reflect the message, BAD DIC, and invalid documentation from the Communication Validation process will reflect the data from the related Information Header Format record for cross-reference purposes.

NOTE: There are certain input documents for which the Entry system only checks the first two positions of the DIC. An invalid entry in the third position of these documents will be rejected under VRC AA on a Violation Printout, appendix F-85.

d. Input records are further checked to determine whether or not the input DIC is valid for entry into the MOWASP System. This validity check is based on the entries of the DCT used in the Entry process. Those documents which are not authorized for entry into MOWASP are further checked to determine whether or not the input is valid for local activity use (i.e., DIC AE1 with local activity address in pos. 30-35). Those documents that are required by a local activity are rejected with the message LOCAL ACTIVITY DOC. Documents which are not valid for entry into MOWASP and not intended for a local activity are assigned to the Entry-to-Exit Working Data Set (WDS) for attempted rerouting under the Exit Program routine depicted by appendix D-73.

e. Those input records which require validation of the Routing Identifier Code - To (RIC-TO) field documents with other than Z in pos. 1, will be checked to assure that the processing depots RIC-TO appears in pos. 4-6, pos. 67-69, or pos. 71-73 as applicable. Documents with other than the correct RIC-TO will be assigned to the Entry-to-Exit WDS for attempted rerouting.

NOTE: Documents other than MROs with an R in pos. 6 will reject to appendix F-113.

f. Input documents with DIC A5E, A55, C5E, or C55 are checked to assure that exception data has been reviewed and mechanical processing has been approved (identified by an 8 or 9 overpunch in pos. 3). Exception data MROs input over a card reading device are rejected to the correct pocket on that equipment while documents input from other sources are assigned to the Exception WDS with the message, INVALID DIC-LOCAL INPUT.

g. The Entry validation process also includes several special routines since certain documents require special handling or checks to determine specific disposition for those documents as follows:

(1) Special Routine A - Applicable to MRO documents. This routine checks the Project Code field (pos. 57-59) to determine control information.

(2) Special Routine B - Applicable for CB_ and QUR documents. These documents are assigned to Warehouse Input WDS and at DDMP assigned to Data Bank WDS. Unmatched documents will be assigned to Entry-to-Exit File.

(3) Special Routine C - Applicable for CCC documents. These documents are assigned to Exception WDS (appendix F-113). Unmatched documents will be assigned to Entry-to-Exit File.

(4) Special Routine D - Applicable for CM_ documents. These documents are assigned to Warehouse Input WDS and at DDMP assigned to Data Bank WDS. Unmatched documents will be assigned to Exception WDS (F-113).

(5) Special Routine E - Applicable for C5J documents. These documents are assigned to MRO WDS. Unmatched documents will be assigned to Exception WDS (F-113).

(6) Special Routine F - Applicable for DJA documents. These documents are assigned to Warehouse Input WDS.

(7) Special Routine G - Applicable for MILSCAP documents. These documents are assigned to Exception WDS (F-112).

(8) Special Routine H - Applicable for ZBJ documents. These documents are assigned to Warehouse Input WDS.

(9) Special Routine J - Applicable for MILSTRIP status documents. These documents will be assigned to Exception WDS (F-112). Unmatched documents are assigned to the Entry-to-Exit File.

(10) Special Routine K - Applicable for A55, A5E, C55, and C5E documents. These documents will be rejected to the Exception WDS (F-113).

(11) Special Routine L - Applicable for AD5 documents. These documents will be rejected to the Exception WDS (F-113).

(12) Special Routine M - Applicable for CKE documents. These documents are assigned Depot Balance WDS and a copy written to Exception WDS (F-113).

(13) Special Routine N - Provides a count of documents written to the TP WDS. The count is added by Entry for balancing of Entry input.

(14) There are additional special routines for Direct Commissary Support documents received at DDMP and DDTC from DPSC.

h. Input documents with DIC ZF6 or ZF7, intended to update the AUTODIN Routing File (ARF), are assigned to a separate WDS for input to the ARF Update Program in the Exit Process.

i. Valid input documents are assigned to operational WDS for further validation and processing as indicated in the procedure decision charts listed in appendix D-72.

j. Backup records are prepared for each WDS to include each document assigned for use in reloading a WDS, if required. Counts of documents assigned to each WDS are accumulated daily for use in preparing Input-Output Control Officers reports of workload, and also for the appendix F-14, Transaction Received Via AUTODIN.

SECTION III - EXIT PROCESS

365301 - GENERAL

The Exit process consists of three major segments, i.e., the cyclic Exit Process and Control as depicted in appendix D-73, a Special Entry-Exit Print-Punch Program, shown in appendix D-75, and the AUTODIN Routing File Update Program shown in appendices D-59 and D-62.

365302 - CYLIC EXIT PROCESS AND CONTROL

a. The Cyclic Exit process provides a common facility for all MOWASP Subsystems to route data out of the system. Those output documents intended for a Routing Identifier Code (i.e., DSC/ICP or another defense depot) or a Service/Distribution Code, and for transmission by AUTODIN and those output documents intended for an Activity Address Code (DoDAAD) are processed. Process provides for separation of DAAS and NON-DAAS data. DAAS data is flagged to indicate documents eligible for MINIMIZE. Ready to transmit AUTODIN tapes are prepared.

b. The Cyclic Exit accepts documentation from the Entry-to-Exit WDS. (Entry process, see appendix D-72), operational WDS (actual document processing as depicted in the Procedure Decision Charts from other chapters of this volume) or from SPOOL. There are no provisions for card input direct to the Exit process. Card input for exit is either SPOOLED or controlled through the Entry-to-Exit EDS.

c. All input documentation is checked to assure that the DIC (pos. 1-3) is valid. The Exit Document Control Table is used to identify valid DICs and route documents out of the MOWASP SYSTEM. Invalid documents are rejected with the message, INVALID EXIT DIC.

NOTE: In the Cycle Exit process, those documents that are rejected are not output on hard copy documentation but are assigned to the Exception WDS for processing in the Special Entry-Exit Print-Punch routine depicted in appendix D-75.

d. Counts of documents required for the Management Information System (MIS) are accumulated and assigned to the MIS EDS for further processing.

e. Output documentation intended for a local activity are assigned to the Exception WDS with the message LOCAL ACTIVITY DOC.

f. Output documents intended for a customer address, pos. 30-35 or pos. 45-50 of most supply documentation, require screening of the DoDAAD File to determine the routing information, DAAS or otherwise.

(1) Those documents for which the Activity Address Code (AAC) was not located in the DoDAAD are assigned to the Exception WDS with the message CODED ADDRESS NOT FOUND. Those documents for which a mail address was not found in the DoDAAD are assigned to the Exception WDS under the message TAC 1 ADDR NOT AVAILABLE.

(2) Output documents which are to be transmitted by mail are assigned to the Exception WDS under the message MAIL DATA and the applicable TAC 1 (mail) addresses are printed on a Shipment Status Address Label, appendix C-60.

(3) Output documents which are to be transmitted by AUTODIN or in teletype format are matched into the DoDAAD to pickup AUTODIN Routing Indicator Codes. Those documents for which AUTODIN Routing Indicator Codes are not found, and which are not to be transmitted in teletype format, are assigned to the Exception WDS under the message NO COMM RI.

(4) Output documents for which AUTODIN Routing Indicator Codes are not found and which are to be transmitted in teletype format are converted to teletype format to include the correct mail (TAC 1) address, Communication Precedence Code, computer assigned data time group, month and year. These pretext format teletypes are printed out in the format of a Shipment Status Message Listing, appendix F-3, for introduction into the administrative teletype network.

(5) Output documents for which AUTODIN Routing Indicator Codes are found and which are to be transmitted in teletype formats; however, these documents remain on the AUTODIN output tape for further processing.

g. Output documentation intended for a collocated DSC is forwarded to the DSC/SAMMS Entry process.

h. Documents intended to update the ARF by Service/Distribution Code cross-reference to AUTODIN Routing Indicators (DICs ZF6 and ZF7) are processed as indicated in appendices D-59 and D-62 as part of the Cyclic Exit.

i. Output documentation is sorted by DoD AAC to develop AUTODIN batches and each batch is screened into the updated ARF to pick up the applicable AUTODIN Routing Indicator. Output records for which an AUTODIN Routing Indicator is not available are rejected with the message NO COMM RI.

j. AUTODIN header and EOT format records are built mechanically for each AUTODIN batch and merged into a complete AUTODIN message. AUTODIN messages are formatted into data pattern format for transmission direct or to/through DAAS. A record of the AUTODIN header record is placed in the Transmitted Header History File for use in the monthly Communication Traffic Analysis Report and future inquiry actions, if required.

k. The completed AUTODIN message is forwarded to the AUTODIN terminal in the form of a magnetic tape for transmission. The transmitted message tape is placed in the Transmitted History File in the tape library for future inquiry processing if required.

l. When required, based on console operators instructions, there are Special AUTODIN Print-Punch Programs available which may be inserted in the Cyclic Exit process. These programs can cause an entire AUTODIN output tape to be printed and punched in card format; or when operation MINIMIZE is in effect, remove those low precedence AUTODIN messages (other than those documents routed through DAAS) from the transmit tape and cause these messages to be printed and punched in card format.

NOTE: If operation MINIMIZE is in Effect at the depot, the MOWASP Exit process will transceive authorized documents via AUTODIN to DAAS and for the remaining documents that must be sent via mail, the Special Operation MINIMIZE Routine will output these documents in either card format or at the discretion of the depot the documents will be loaded on tape as if for electrical transmission. These tapes will be in message format including header and EOT, IAW the rules and limitations prescribed in JANAP 128. Further, under this method a single tape would normally consist of several 500 card messages; however, it will provide necessary controls, record of transmission, and Audit Trail. It will also permit electrical transmission from the tape in the event that the MINIMIZE condition is lifted before the tape is mailed. These tapes or cards will be mailed once a day and the mailing containers will be conspicuously marked MINIMIZE DOCUMENTS. Further adequate controls will be implemented to ensure that these tapes are returned to the depot.

365303 - ENTRY-EXIT PRINT-PUNCH PROCESS

a. The Special Entry-Exit Print-Punch process is designed to print the MOWASP Entry/Exit Exception Listings for those documents rejected, i.e., assigned to the Exception WDS during the Entry Process and Control (appendix D-72), and the Cyclic Exit (appendix D-73).

b. Documents assigned to the Exception WDS with the in-the-clear message NO COMM RI, are output on appendix F-111 for manual processing.

c. Documents which are intended for local activity use (i.e., base property documents) identified by the in-the-clear message, LOCAL ACTIVITY DOC, are output on appendix F-112 for manual processing.

d. Documents which could not be identified or which could not be mechanically dispatched are output on appendix F-113 for manual processing IAW appendix E-143 P. These documents are identified by in-the-clear messages INVALID EXIT DIC INVALID DIC FROM TP INVALID DIC-LOCAL INPUT CODED ADDRESS NOT FOUND TAC 1 ADDR NOT AVAILABLE MANUAL REVIEW REQUIRED, or document was received from ICP/SCA rejecting a transaction which could not be processed due to erroneous or missing data (DIC DZG with Reject Advice Code, pos. 79-80, appendix A-41) or document received is a Storage Item Data Correction Card, DIC DZB, from ICP/SCA indicating corrective action required by Item Data Correction Code in pos. 7 (appendix A-40).

e. AUTODIN messages received but not processed because of suspected narrative instructions in the message text, identified in the Exception WDS with the message, SUSPECT NARRATIVE, are output on appendix F-114 for processing.

f. Documents which were to be transmitted to the recipient by mail media, identified by message MAIL DATA are output on appendix F-115 for association with gummed Shipment Status Address Labels, appendix C-60. This listing and labels are manually processed.

g. All MOWASP Entry/Exit Exception Listings, appendices F-111 through F-115, are accompanied by punched cards which are also handled as indicated in the appropriate E and F appendices.

h. Documents with DIC CKJ are passed direct from Entry to Print-Punch Program, to output the Commissary Support Cycle Planning Report, appendix F-73.

i. If, during the process, data for one or more reports are not present in the Exception WDS, a skeleton report will be generated containing no data, therefore indicating a negative report for that period.

SECTION IV - DOCUMENT CONTROL TABLES

365401 - GENERAL

a. The Specialized Entry/Exit Support consists of one program, used to update the Document Control Tables (DCT).

b. There are two DCTs used in MOWASP processing. These tables are:

TABLE	CONTENTS
Entry DCT	All documents input to MOWASP
Exit DCT	All documents output from MOWASP

c. The contents and usage of these two DCTs have been described under Entry or Exit processing. This section will describe the maintenance of DCTs.

365402 - MAINTENANCE OF DOCUMENT CONTROL TABLES

a. The initial Entry and Exit DCTs are established by the Data Systems Automation Center (DSAC) for MOWASP. Maintenance, based on new or revised requirements of the system functional manager, is the responsibility of the Defense Depots in coordination with DSAC. Personnel of DS/T in conjunction with the Data Systems I/O Control Officer are responsible for the preparation of the input to update the DCTs and scheduling the off-the-shelf Specialized Entry/Exit Support Program.

b. The input document for the maintenance of the Entry DCT is the Entry DCT Update Card, DIC ZVB, appendix B-55. This input will be processed in an off-the-shelf program (appendix D-74) to be coordinated with the Office of Data Systems.

c. The input document for the maintenance of the Exit DCT is the Exit DCT Update Card, DIC ZVC, appendix B-56. This input will be processed in an off-the-shelf program (appendix D-74) to be coordinated with the Office of Data Systems.

d. Reject DCT Update Cards are output as a data image of the ZVB/ZVC input.

e. Valid update records are matched against their respective DCTs, creating new DCTs.

SECTION V - INQUIRIES AND OTHER RELATED PROCESSES

365501 - GENERAL

The Entry/Exit processes of MOWASP include various Specialized Communications Programs each supporting an operating requirement which, if the program did not exist, would have to be accomplished manually.

a. The Special AUTODIN Print-punch will process only certain messages and rewrite a new AUTODIN tape containing the other AUTODIN messages. This capability is provided to cope with MINIMIZE, a communication curtailment of messages to certain geographical areas.

b. The AUTODIN Tape Search provides for search of either Entry or Exit AUTODIN Tape for one or more AUTODIN messages.

c. The Received Header History File Inquiry/Update performs two processes.

(1) Inquire the Received Header History File to verify the receipt of certain messages.

(2) Update the Received Header History File information from logistics messages received in media other than magnetic tape.

d. The AUTODIN Tape Merge provides a capability for merging multiple AUTODIN receive or transmit tapes to a single receive or transmit tape as required or on a scheduled basis.

e. Extract header records from AUTODIN tapes provide for the requirement should communication operations maintain a Header Card File.

f. The Create AUTODIN Tape from cards process can be used in the event of tape failure in communication and traffic is received in card form.

g. The Header History File Purge reads all current Header History Files and purges all header records whose Date-Time-Group is within the Purge-Date period.

h. The Traffic Analysis Report prepares a Digital Traffic Analysis Report of Received and Transmitted Header Records contained on the Purge File.

365502 - SPECIAL AUTODIN PRINT-PUNCH TAPE

a. This process is provided for the requirements of communications. When used for MINIMIZE, routine traffic is punched in card form and priority traffic is placed on tape for transmission.

b. The program provides the following capabilities:

(1) MINIMIZE an entire AUTODIN tape.

(2) Print-punch an entire AUTODIN tape.

(3) MINIMIZE on AUTODIN Message Relay Centers and/or MINIMIZE on Communication Routing Identifiers.

365503 - INQUIRY TO RECEIVED AUTODIN MESSAGE HISTORY TAPE

a. This process, depicted in appendix D-77, requires that the console operator receive the Input Message Inquiry Card, DIC ZZB in the format of appendix B-87 (see appendix E-147 P); locate the applicable Received Message Tape in the tape library; mount the applicable tape on the computer and input the inquiry card.

b. The inquiry card matches to the Received Message Tape and when matched prints the message with an in-the-clear note, THIS MESSAGE PUNCHED FROM AN AUTODIN TAPE WHICH WAS PROCESSED BY THE ENTRY SYSTEM. This in-the-clear message is intended to prevent inadvertent reentry of the processed AUTODIN

message. The message printout will be accompanied by punched cards and will be delivered to the requester by the communication operations element of the Office of Data Systems.

c. When the inquiry card does not match the Received Message Tape, an image of the inquiry and the statement MESSAGE NOT FOUND will appear on the console. This statement will be delivered to the requester by the communication operations element of the Office of Data Systems.

d. A log of messages found/not found will be accumulated on the console for use in workload planning.

365504 - INQUIRY TO TRANSMITTED AUTODIN MESSAGE HISTORY TAPE

a. This process, depicted by appendix D-78, also requires that the console operator receive the Output Message Inquiry Card, DIC ZZC, in the format of appendix B-88, prepared IAW appendix E-147 P, locate and mount the applicable Transmitted Message Tape and input the inquiry card.

b. Inquiry to the Transmitted AUTODIN Message Tapes could be made for two purposes, either to obtain information to answer a telephonic or teletype inquiry or to obtain source data required to retransmit an AUTODIN message. The inquiry card is coded in the Pilot Header Content Indicator Code field, pos. 15-18, and/or the operating signals field, pos. 20-80, to indicate these purposes. These fields are completed by the communications operations element of the Office of Data Systems prior to delivery of the inquiry card to the console operator.

c. When input, the inquiry card matches to the Transmitted AUTODIN Message Tape and when matched determines whether or not a Pilot Header Format record is required, based on contents of pos. 15-18 and pos. 20-80. Pilot Header Format records are required for retransmission.

d. When required for retransmission, the Pilot Header Format record will be prepared IAW communication regulations and printed out with the corresponding AUTODIN message and punched cards. This package will be routed to the AUTODIN terminal for retransmission.

e. When the inquiry card does not indicate that retransmission is required, a Pilot Header Format record will be prepared with the message SUSPECTED DUPLICATE. This Pilot Header Format will be printed out with the corresponding AUTODIN message and corresponding punched cards for delivery to the requester by communications operations element of the Office of Data Systems.

f. When the inquiry card does not match the Transmitted Message Tape, an image of the inquiry and the statement MESSAGE NOT FOUND will appear on the console. This statement will be delivered to the requester by the communications operations element of the Office of Data Systems.

g. A log of messages found/not found will be accumulated on the console for use in workload planning.

365505 - INQUIRY TO RECEIVED HEADER HISTORY FILES

a. The Received Header History File serves the twofold purpose of inhibiting the processing of duplicate AUTODIN messages and for preparation of the monthly communication analysis as required by communication regulations.

b. Day-to-day operations may require that records be added to this history file from sources other than AUTODIN tapes. To this purpose the inquiry process into this communication history file has been designed to obtain an image of a specific header record or to add a new header record to history.

c. Inquiry into the Received Header History File can be made only from input through the computer console. Instructions for this inquiry are contained in the Office of Data Systems Operating Manual and will not be duplicated in this chapter. The process for this input action is depicted in appendix D-79.

d. When the inquiry input dictates that a record be added to the Received Header History Tape, the computer process checks only to ensure that a duplicate record is not already on file. Duplicate records will not be accepted.

e. When the inquiry (other than Add actions) matches a record in the Header History File, an image of the Inquiry and the Header History Record will appear on the console. This information will be delivered to the requester by the communication operations element of the Office of Data Systems.

f. When the inquiry (other than Add actions) does not match a record in the Header History File, an image of the inquiry and the statement, HEADER HISTORY RECORD NOT FOUND, will appear on the console. This information will be delivered to the requester by the communication operations element of the Office of Data Systems.

365506 - AUTODIN TAPE MERGE

a. This process will merge "short" AUTODIN tapes for storage purposes. Program must be executed with either all Received tapes or all Transmitted tapes. Never mix traffic.

b. The process is to be used at depots where frequency of communication program processes may result in many AUTODIN tapes with minimal volume. Keep to a minumum the number of tapes held in storage for history and research purposes as required by regulations.

365507 - EXTRACT HEADER RECORDS FROM AUTODIN TAPES

This process converts header records on AUTODIN tape to cards where communication operations have a requirement to maintain a Header Card File.

365508 - CREATE AUTODIN TAPE FROM CARDS

This process provides the capability of creating an AUTODIN-Received tape from cards in the event of tape terminal failure. Program will select proper Content Indicator Codes and build an AUTODIN tape which will be processed as indicated in appendix D-71.

365509 - HEADER HISTORY FILE PURGE

This process will purge data that are not within purge date from the Header History Files. This routine establishes the purge date to be from the first to the last of the month preceding the current month. After the purge date is established, all input data within the purge date are purged from their respective files.

365510 - COMMUNICATIONS TRAFFIC ANALYSIS AND HEADER HISTORY FILE PURGE

a. The Received and Transmitted Header History Files are maintained on a monthly basis. This indicates that one entire month plus the accumulation of records for the current month will constitute the minimum file available for reporting and inquiry.

b. The Communication Management and System Analysis Report is prepared monthly or on a "Called for" basis as desired by HQ DLA or local commander. This report provides statistics as to number of messages transmitted and received, number of records and average number of records per message, with subtotals by AUTODIN Routing Indicator Codes and grand totals as required. This report also includes a count of header records placed in violation within AUTODIN Routing Indicator Code and reason for violation.

c. Since this report is primarily for use in the communication system, a format will not be included in DS/T and Supply Procedures.

CHAPTER 66

STOCK LOCATOR SYSTEM

TABLE OF CONTENTS

		PAGE
SECTION I	GENERAL	
366101	Purpose	III-1-66-1
366102	Scope	III-1-66-1

CHAPTER 66

STOCK LOCATOR SYSTEM

SECTION I - GENERAL

366101 - PURPOSE

a. This chapter prescribes policies, procedures, and responsibilities governing the establishment and maintenance of the Stock Locator System.

b. This chapter also establishes the media for Storage Item Change Notices.

366102 - SCOPE

a. This chapter is applicable to Defense Depots and to Defense Supply Centers with depot operations.

b. This chapter is applicable to all stocks in storage at Defense Depots/Defense Supply Centers whether stored for DLA GSA or service commodity managers.

366103 - POLICIES

a. All storage locations assigned to supply operations for storage of mission stocks will be recorded in the Stock Locator System.

b. Storage locations will be assigned in conformance with the following:

(1) Each bin compartment (pull box, drawer, etc.) will be assigned a separate location.

(2) Each rack will be assigned a separate storage location.

(3) Assignment pattern of storage locations to bulk storage will be in accordance with appendix A-59 of this manual.

c. A single storage location will be utilized to the extent possible and practicable for a single stock number.

d. The Stock Locator System will include National Stock Numbers (all numerics) and alpha/numeric for Direct Commissary Support Items.

e. All stocks will be stored and documents processed to the Stock Locator System prior to or simultaneous with receipts processing.

f. Materiel in storage care and preservation activities for repair, assembly, packaging, and/or preservation will be recorded in the Stock Locator System.

g. Materiel suspended for disposition instructions from DSCs, service managers, or contracting offices will be recorded in the Stock Locator System.

h. Materiel shipped to a maintenance activity, on or off depot, will not be on record in the Stock Locator System.

366104 - RESPONSIBILITIES

a. Defense Supply Centers: Furnish data such as identification of high dollar value items, critical and sensitive items, short shelf-life items, etc., as delineated in Volumes I and II to Defense Depots.

b. Defense Depots:

(1) Develop or obtain data from the MOWASP Central Shipping Data Bank for establishment and maintenance of Stock Locator Systems.

(2) Install systems and procedures as outlined in this chapter.

366105 - STOCK LOCATOR SYSTEM RECORDS

a. The complete record utilized in the Stock Locator System is termed the Item Locator Record; however, this record has several subrecords or components each composed of a variety of data elements. The Item Locator Record is composed of the following elements, each of which is described in subsequent paragraphs:

(1) Basic Record.

(2) Locator Subrecord.

b. The Basic Record consists of common data applicable to a Stock Number regardless of the location in which it is stored. Examples of such data elements are: Stock Number, Description, Unit Weight, Water Commodity Code, etc.

c. The Location Subrecord identifies obligated locations and reserved bin storage locations.

(1) An obligated location is one in which materiel is stored. In this instance the record describes the characteristics or peculiarities of a Stock Number in its storage location. The characteristics of an item may vary, i.e., Condition Code may vary, the Type of Pack may vary, Inspection Dates and Dates of Pack may vary. These different characteristics require storage in separate locations in order that appropriate materiel may be selected for each shipment.

(2) A reserved location is a bin location that becomes vacant but is retained on record for storage of materiel due-in.

366106 - USE AND IMPORTANCE OF THE ITEM LOCATOR RECORD

a. The Item Locator Record is basic to all depot supply operations. It is utilized in receiving and shipping processing, inspection and inventory, and the preparation of management reports.

b. It is imperative that all data elements of the Item Locator Record be maintained on a current and accurate basis.

366107 - RELATION OF RECORDS TO THE PREPOSITIONED MATERIEL RECEIPT RECORD

a. The Item Locator Record is closely allied to, and utilized in conjunction with the Prepositioned Materiel Receipt Record in many processes, for information, action, or decision purposes.

b. Many data elements of the Item Locator Record are established from Prepositioned Materiel Receipt Cards.

c. Simultaneous or joint inquiries are made into the Item Locator Record and Prepositioned Materiel Receipt Card Records. Inquiry answers are furnished on the same document.

SECTION II - BASIC RECORD

366201 - GENERAL

a. This section outlines policies and procedures for establishment and maintenance of data elements in the Basic Record of the Item Locator Record.

b. The Basic Record describes the common characteristics of Stock Numbers for stock catalog and shipping purposes and also identifies items for specific or specialized applications.

c. Each depot will establish and maintain files and records necessary to facilitate development of data for the Basic Record.

366202 - CONTINGENT AND MANDATORY DATA ELEMENTS

a. Although there are many data elements in the Basic Record, all data elements are not required for each Stock Number; however, certain elements of data are mandatory for each Stock Number.

b. The following portrays the data elements of the Basic Record and mandatory or contingent provisions:

DATA ELEMENT	PROVISIONS
Stock Number	Mandatory
Item Description	Mandatory
Unit of Issue	Mandatory
Commodity Manager Code	Mandatory
National Motor Freight Classification	Mandatory

DATA ELEMENT	PROVISIONS
National Motor Freight Classification Suffix Code	Mandatory
Freight Rating LTL Code	Mandatory
Freight Rating LCL Code	Mandatory
Water Commodity Code	Mandatory
Air Commodity Code	Mandatory
Air Cargo Dimension Code	Mandatory
Storage Intransit Privilege Code	Contingent
Unit Weight	Mandatory
Unit Cube	Mandatory
Months Demand	Contingent
Popularity Group Code	Contingent
Shelf-Life Code	Mandatory
Inventory Category Code	Contingent
Inventory In-Process Code	Contingent
Deleted Item Code	Contingent
Physical Security Code	Mandatory
Manhour Standard Application Code	Mandatory
Special Requirements Code	Mandatory

c. Data elements for those items identified in subparagraph b above as "contingent" will be entered in the Basic Record only when applicable.

366203 - CONTINGENT ITEMS

a. Contingent data elements may be separated further into two subdivisions or groups as follows:

(1) Group 1 - This group consists of those data elements for which data are not static. Data are developed and entered in the record contingent upon other operations. Data may be entered for a short period of time and later deleted from the record.

(2) Group 2 - This group consists of data elements that are known; however, it is not considered desirable to enter data for all Stock Numbers due to the fact all data may not be pertinent to the individual depots operation or mission at a particular point in time.

b. Group 1 Data.

The following governs entry, changes, and deletions of data:

(1) Storage Intransit Privilege Code. This entry is contingent upon the method of receipt and mode of transportation. Transit is applicable in certain instances for materiel received in carload or truckload lots.

(2) Inventory In Process Code. This entry is applicable only when inventories are in process, and is removed upon completion of inventory count processing actions.

(3) Deleted Item Code. This entry is entered from the processing of SIC Card, DIC CMR, Phrase Code L, and DIC CMD, Phrase Code blank. The code is removed upon reinstatement of a deleted item.

(4) Frequency Count and Popularity Group Code. These entries are made up by the computer, and may not exist for a period of time for new items.

(5) Special Requirement Codes. This element is based upon the nature or physical characteristics of the item.

c. Group II Elements:

(1) This group includes sample inventory exception items.

(2) In this instance, the identity of Stock Numbers is known; however, it may be undesirable to enter all data in the record inasmuch as items may not be stored at the depot, either currently or in the foreseeable future.

(3) Data elements will be entered only when materiel is in stock or when a Prepositioned Materiel Receipt Card is received for such items.

366204 - MANDATORY DATA ELEMENTS

a. The following mandatory data elements are entered in the record from Prepositioned Materiel Receipt Cards:

(1) Stock Number

(2) Unit of Issue

(3) Commodity Manager Code

b. An Incomplete Item Locator Data Report (appendix F-34) is prepared by the computer in those instances wherein a record is established and data elements are either missing or incomplete.

c. Basis for preparation of this research report is as follows:

(1) Prepositioned Materiel Receipt Card is received; data elements of the record are missing or incomplete; or

(2) Location is established in the Subrecord; Basic Record does not exist, or data elements are incomplete.

d. The Incomplete Item Locator Data Report will be utilized to conduct research to obtain all necessary data elements not furnished on the report.

e. Data will be entered on the report which will then be utilized to prepare input cards to establish data elements in the Basic Record.

f. In some instances the NMFC Code may change; this may affect numerous stock numbers in the Item Locator Record. DIC ZBE, appendix B-75, Item Location Record (Freight Classification), will be utilized for this purpose (see appendix E-075 P).

366205 - PURIFICATION OF BASIC RECORD DATA

a. The Basic Record and data elements therein will be established and maintained for those stock numbers essential to the operations and mission of each installation.

b. The Basic Record will be searched and matched with the Locator Subrecord and Prepositioned Materiel Record. The Basic Record will be canceled for all stock numbers based on the following criteria:

(1) A Location Subrecord does not exist for stock number.

(2) Prepositioned Materiel Receipt Record does not exist for the stock number.

(3) The above two conditions have existed for shelf-life items other than 0, deleted flag, or cross-reference flag for at least 360 days.

366206 - INQUIRY METHODS

DIC ZBJ, Locator Inquiry Card, appendix B-79, prepared as indicated in appendix E-079 P, utilized in conjunction with appropriate Action Codes, appendix A-42, provides a method of inquiry into the Basic and Subrecord. Inquiry data is provided in listing format. Remote inquiry is also available as described in appendix E-163 P.

366207 - MANAGEMENT REPORTS

Management Reports, as well as listings of data required for emergency operations, that are prepared on a periodic basis without submission of card input are detailed in the F Series appendices. These reports are as follows:

a. Appendix F-24, Popularity Group Report

b. Appendix F-28, Delinquent Deleted Item Report

c. Appendix F-51, Emergency Item Locator Record Listing

d. Appendix F-52, Item Locator Transaction Record

e. Appendix F-56, Summary Storage Location Analysis Report

f. Appendix F-81, SIC Multiple Location Listings

g. Appendix F-82, Storage Item Change Listing

h. Appendix F-96, Locator File Overflow Locations

i. Appendix F-97, Reinstatement of Deleted Items

SECTION III - STOCK LOCATOR SUBRECORD

366301 - GENERAL

a. This section outlines policies and procedures for establishment and maintenance of data elements in the Stock Locator Subrecord of the Item Locator Record.

b. The Stock Locator Subrecord:

(1) Describes the peculiarities or detailed characteristics of materiel in-storage and identifies the exact location of such materiel in storage for occupied locations.

(2) Identifies bin storage locations that have not been deleted but are reserved, identified by Stock Number and Type Location Code for storage of due-in materiel.

366302 - DATA ELEMENTS

a. Many of the data elements of the Locator Subrecord are mandatory while others are assigned only when necessary or required.

b. The following outlines the mandatory and contingent provisions for each data element:

*(1) Type Location Code	Contingent
(2) Location	Mandatory
(3) Type of Storage	Mandatory
(4) Condition Code	Mandatory

(5) Inspection Date	Contingent (Mandatory for shelf-life items)
*(6) Date of Pack/Expiration	Contingent (Mandatory for shelf-line items)
(7) Lot/Contract Number	Contingent
(8) Unit Pack	Mandatory
(9) Type of Pack	Contingent (Mandatory for Subsistence)

*Initially computer assigned. See paragraph 366303 c(1) below, which provides depot option in storing by year date of pack.

366303 - CONTINGENT DATA ELEMENTS

a. Detailed explanations of all data elements of this record are provided in the A and G Series of appendices; however, additional definition and rationale is furnished herein for purposes of clarity and continuity.

b. Inspection Date. This element is applicable to shelf-life items and to items for which storage serviceability standards have been established. This entry does not pertain to bin stocks except for shelf-life items.

c. Date of Pack:

(1) This element is not applicable to bin type stocks (other than short shelf-life items). The depots have the option to store like nonshelf-life items with the same year date of pack in the same location. This option will reduce the number of multilocations for like items with the same year date of pack. However, issues must be made using "FIFO" principles.

(2) In the absence of a manually assigned Date of Pack/Expiration Date, the date of record establishment will be entered into this field by the computer for record sequencing purposes.

d. Lot/Contract Number. This entry has limited application and will be entered on an exception basis only when essential to operations.

e. Type of Pack Code. This entry is applicable to certain specific commodities (mandatory for subsistence) and has little application to bin stocks.

366304 - GENERAL PROCEDURE FOR ESTABLISHMENT OF DATA ELEMENTS

a. The establishment of locations and data elements in the Item Locator Record is normally due to receipt of a Prepositioned Materiel Receipt Card (PMRC), particularly in those instances wherein the items due-in or received have not been stored previously.

b. When materiel is received, a Type A Remote Receipt Inquiry is processed to obtain data from the Locator and PMR Files. The reponse is printed on the Receipt Control Document and the Storage Action Document, appendices F-200 and F-202 respectively.

c. If no locator record is available, the computer will automatically create an item locator record from the location subrecord addition transaction. An inquiry to the MOWASP Central Data Bank will be prepared and processed by the computer to acquire the missing data, which will be automatically processed to the deficient record when received.

366305 - RECEIPT DOCUMENT

a. The Receipt Storage Action Document (SAD), appendix F-202, is used to reflect locator and sub-locator information obtained from the input of a Type A or DIC ZB6 Receipt Inquiry action. This document contains locator information on the materiel received and is used as a coding sheet for Receipt Stow Notices (appendix B-46 or B-144) which, in their long form, will add new locations to the locator file.

b. The Type A or DIC ZB6 Receipt Inquiry inputs will not be used for routine locator inquiries.

366306 - STORAGE LOCATION IDENTIFICATION LABELS

a. Storage Location Identification Labels are normally referred to as stack cards or labels (see appendices C-104 and E-104 P).

b. The Storage Location Identification Label serves the following purposes:

(1) Identifies materiel in storage and the applicable location.

(2) Identifies reserved bin locations.

(3) Provides a means of deleting locations and data from the locator Subrecord.

c. Storage Location Identification Labels are furnished for:

(1) Each obligated location in the Locator Subrecord.

(2) Each reserved bin location in the Locator Subrecord.

d. New or revised Storage Location Identification Labels will be furnished:

(1) When the status of a location changes between obligated and reserved or from unobligated to obligated bin storage.

(2) When SIC processing consolidates National Stock Numbers.

(3) When Condition Code, Unit of Issue, Commodity Manager Code, Shelf-Life Code, or Type Storage Code for a specific location is changed.

(4) When the Inspection Date for a specific location is changed.

e. Storage Location Identification Labels will be:

(1) Affixed to bins, pull boxes, racks, frames, and so forth.

(2) Affixed to pallets, boxes, or containers for occupied bulk locations.

f. At DGSC, in DISARS controlled warehouses a DISARS Control Document (DCD) will be used in lieu of the C-104 label and processed in accordance with DISARS operating procedures.

366307 - LOCATOR UPDATE - RECEIPTS PROCESSING

a. The Type A remote input or ZB6 card input will be used to inquire for stock locator information when a receipt arrives at the depot. Use of the resulting documentation output by this type of inquiry action is outlined in appendices F-200 and F-202. Details reflecting the use of the storage portion are contained in appendix E-110. A summary of the stock locator related actions associated with this input is as follows:

(1) Print locator data.

(a) Occupied location

(b) Reserved bin location

(2) Establish a new receipt indicator in the Stock Locator File.

(a) Indicator flag is automatically removed after six days.

(b) Indicator prints out on the MRO, appendix C-11, block BB, when applicable.

b. During processing of the receipt in Receiving Division, data pertinent to the Stock Locator File may be annotated by receiving personnel on the Stow Action Document (SAD), appendix F-202. The following data will be entered as required:

(1) Inspection Date

(2) Unit Pack

(3) Date of Pack/Expiration

(4) Lot/Contract Number

(5) Lot/Contract Indicator

(6) Condition Code (new) - Inspectors will circle the old or incorrect condition code and annotate the new or corrected conditions when a stock condition code change has occurred during the receipt inspection. Locations reflected on the SAD are also incorrect and should not be used in accordance with Appendix E-047 P.

(7) Type Location Code, if A or K.

366308 - LOCATOR DOCUMENT DISTRIBUTION - RECEIPTS

a. Two copies of the SAD and one copy of the RCD will be provided for each receipt when receipt is forwarded to the Storage Area. These documents will be used to control the required stowage actions.

b. Distribution of the SAD/RCD will be as follows:

(1) Original copy of the RCD will remain with the receiving documents for receipts processing.

(2) One copy of the RCD and two copies of the SAD annotated as required by receiving personnel will be forwarded with the materiel to the storage location. One of these SAD copies will be used as the source document for preparation of the Receipt Stow Notice (appendix E-110 P) to clear the Suspended Receipt File record and add a new location, when necessary. The other copy of the RCD and SAD will be used as a temporary label until a new location is established.

366309 - STORING OF MATERIEL IN LOCATION

a. During the processing of stowing a new receipt, the SAD, appendices B-46 and B-144, is utilized to determine if an existing active location or a reserved bin location can be used to stow the materiel. The locations provided on the form will always be checked for possible use when the Condition Code of the Type A/ZB6 Receipt Inquiry input corresponds to the actual condition of the materiel.

b. When an occupied location can be used to stow the receipt, the Storage Action Document (SAD) will be processed to clear the receipt suspense. When an occupied location cannot be used, the materiel will be stowed in a vacant location and the Receipt Stow Notice will be processed to clear the receipt suspense and add the new location.

c. When a reserved bin location (Type Location 1) is provided on the SAD and the location is used, it is necessary only to process a Receipt Stow Notice to clear the receipt suspense. When a furnished reserved bin location is not used, the Receipt Stow Notice will be processed to clear the suspense and add the location used. In addition it is necessary to delete the reserved bin location since this location was automatically converted to active status when the Type A inquiry was processed.

d. When no locations are provided on the SAD, it will always be necessary to process a Receipt Stow Notice which includes a new location. Adding a location with the Receipt Stow Notice will also be necessary when the Condition Code of the materiel is J, K or L. Processing of a Receipt Stow Notice which includes a location will result in automatic generation of a locator update transaction to add the new location to the Stock Locator File. Detailed procedures for stowing materiel and processing Receipt Stow Notices in various situations appear in appendix E-110 P.

366310 - STOCK LOCATOR ADJUSTMENTS/DISCREPANCIES

a. Surveillance inspections and other daily operations may necessitate processing of changes to data elements of the Locator Subrecord. Such changes may include, but are not limited to the following:

(1) Stock Number

(2) Condition Code

(3) Inspection Date

b. The Storage Location Identification Label will be utilized to delete data currently on record.

c. DLA Form 536, Stock Locator Change Document, will be completed to correct data:

(1) One copy will be forwarded to keypunch operation.

(2) A Condition Code change will be IAW Chapter 5.

d. Where surveillance inspection is based on computer schedule and output, the Inspection Test Card, DIC ZC0, will be utilized to update the Locator Subrecord (see appendix E-116 P).

366311 - CONTROL DURING REWAREHOUSING

a. Normally rewarehousing is accomplished or based upon knowledge of all locations, all data elements, and applicable Type of Storage Codes. Rewarehousing instructions will provide for assignment or reassignment of Type of Storage, as appropriate.

b. The Type Location Code, appendix A-58, is usually computer assigned based on data on the input document (primarily Type of Storage Code) which establishes the Locator Subrecord.

(1) This code is entered in each Item Locator Subrecord to indicate the order of selection of the appropriate bin or bulk location from which stock is to be selected. It may be manually assigned when determined that stock in a specific location should be utilized prior to other similar stock.

(2) In some instances, bulk items may exceed the desired number of locations. When such a condition occurs, consideration will be given to depleting stock from specific locations through use of the Type Location Code, rather than to accomplish complete rewarehousing action.

c. The establishment of the new location and deletion of the old location will be accomplished simultaneously through the submission of DLA Form 676, Rewarehousing Card, appendix C-47, prepared as indicated in appendix E-072 P.

366312 - DELETION ACTIONS

a. When all stocks are removed from a storage location, a transaction will be processed to delete data elements from the Locator Subrecord. The Storage Location Identification Label may be removed, annotated with "delete" and Organization Code and forwarded to keypunch operation for preparation of a ZBA card. DLA Form 536 may be used when the label is not available or cannot be removed.

b. A delete transaction for an item:

(1) Which is identified in the Basic Record with a Deleted Item Code will delete both the Basic Record and the Locator Subrecord, provided the location is the only location on record.

(2) Which is identified with Action Code FW will delete the Locator Subrecord.

c. All delete transactions other than those identified in subparagraph b above will be processed against the PMRC File:

(1) If a PMRC is not on record, the data elements will be deleted.

(2) If a PMRC is on record, and the location is identified as a bin location, it will be retained and identified as Type Location Code 1. All other data elements will be deleted. This process will apply when the bin location is the only one on record; if two or more locations are on record, the location specified will be deleted.

d. An automatic purge of the Basic Item Locator Record is made by the computer during the run of the Locator Scan to produce the F-51 or F-52.

(1) When last location is deleted from the Locator Subrecord and there is no PMR on file, Basic Record is flagged; at least 90 days after flag is established and during the next Scan to produce the F51/F52, record will purge.

(2) When last bin location is deleted from the Locator Subrecord and there is a PMR on file, the Basic Record will be retained on file.

366313 - PURIFICATION OF RESERVED BIN LOCATIONS

a. The procedures herein prescribe for retention of a vacant bin location as a reserved location provided a Prepositioned Materiel Receipt Record exists and the location is the only one on record.

b. The status of reserved bin location may change based upon changes to the prepositioned Materiel Receipt Record.

c. Once each quarter the reserved bin locations, Type Location Code number one, will be matched with the Prepositioned Materiel Receipt Record.

d. In those instances wherein the Stock Number assigned to the reserved bin location does not match the Stock Number of a Prepositioned Materiel Receipt Record, action will be taken as follows:

(1) Location will be deleted from the Locator Subrecord.

(2) Location will be established in the Location Availability Record.

366314 - LOCATOR SUBRECORD INQUIRY METHODS

a. A variety of methods have been established to obtain data from the Locator Subrecord for management, operational or investigative purposes. These methods are in addition to use of DIC ZB6 and are outlined in subsequent paragraphs.

b. General Locator Inquiry Answer, Type of Inquiry Code B (Remote use only), appendices A-53, C-63, and E-163 P.

c. Type A Remote Receipt Inquiry and Receipt Inquiry Card (appendix B-41 and B-102) used by receipt processing activities only, reference appendix E-047 P.

d. Card Input, Locator Inquiry Card, DIC ZBJ, see appendices B-79, E-079 P, F-25, F-26, F-27, F-36, and F-37.

366315 - MANAGEMENT REPORTS

Management Reports pertinent to the Locator Subrecord, which are produced on a periodic basis without submission of an input card, are listed in the F appendices (see paragraph 366207, Section II).

SECTION IV - STOCK CATALOG CHANGES - DLA

366401 - GENERAL

This section establishes policies and procedures governing depot processing of catalog changes from punched card data and manual communications received from DSCs.

366402 - STORAGE ITEM CHANGE (SIC) CARD

a. The DLA System provides that DSCs will furnish depots with SIC Cards covering Stock Catalog Changes in the format of appendix B-23.

b. Cards are required for processing only when the catalog data is pertinent to depot operations. For example, unit price changes, identification of an item as a substitute item are not applicable, and therefore catalog data should not be furnished.

366403 - IDENTIFICATION OF SIC CARDS

SIC Cards are identified by the following DICs:

a. CMC

b. CMD

c. CML

d. CMR

e. CMM

366404 - RECEIPT AND DISTRIBUTION OF SIC CARDS

a. SIC Cards may be received via AUTODIN Mail Parcel Post, and so on. Regardless of the method of receipt, all cards will be forwarded to Data Systems for validation and processing to the SIC Holding File in the computer.

b. An effective date is specified on SIC Cards. This is normally the first day of the month.

366405 - SIC LISTINGS

a. Listings are received for all SIC Cards. These listings are in NSN Sequence and list all actions.

b. Listings will be retained by the MSO DS/T.

366406 - EFFECT OF SIC CARDS

a. The following types of actions pertinent to depot operations are included in SIC Cards:

(1) Changes to NSNs

(2) Consolidation of one NSN with another NSN

(3) Identification of NSNs as deleted items - no longer required in the supply systems

(4) UI changes

(5) Logistical Transfer actions

b. SIC Cards effect the Item Locator Record and Subrecord. These cards also have an impact on operations requiring identification of materiel in storage, repackaging of materiel, and consolidation of stocks from various locations.

366407 - DATA ELEMENTS SUBJECT TO CHANGE

a. The detailed format of the SIC Cards is outlined in appendix B-23.

b. The following are elements of data which, when changed, will effect depot operations:

(1) NSN as prescribed by Phrase Code or DIC, pos. 5-17

(2) Losing Management Activity, pos. 18-19

(3) New or Current UI, pos. 37-38

(4) NSN as prescribed by Phrase Code or DIC, pos. 22-34

(5) Gaining Management Activity, pos. 20-21

(6) Shelf-Life Code, pos. 35

(7) Physical Security Code, pos. 36

366408 - CODES EFFECTING CHANGES

a. The DLA system utilizes DICs in conjunction with Phrase Codes to effect changes to the data elements NSN and UI.

b. The DIC is furnished in pos. 1-3 and identifies the basic action or change.

c. A Phrase Code may be furnished to modify or outline the specific action or change required. The Phrase Code is furnished in pos. 4 of the SIC Card.

d. A complete description of DICs and Phrase Codes is furnished in appendix B-23.

e. The table below depicts the correlation between DICs and Phrase Codes and action required.

366409 - PROCESSING OF SIC CARDS

On the effective date, all SIC Cards with the effective date will be removed from the SIC Card Hold File for processing to the Item Locator Record and the Classification Suspense File.

DIC (1-3)	PHRASE CODE (4)	DESCRIPTION	NSN (5-17)	UI (37-38)	LOSING MGR. (18-19)	NSN (22-34)	GAINING MGR. (20-21)	LOCAL DEPOT ACTION
CMR	A	Consolidated with (NSN) 1						process
CMR	C	Changed to (FSC) 1						process
CMR	D	Changed to (NSN) 1						process
CMD	blank	NSN deleted 1						process
CMM	blank	NSN logistically tr'sd			1			process on exception basis
CML	blank	NSN changed and tr'sd 1						process on exception basis
CMC	blank	Other than NSN 1						process

a. Changes will be made to Stock Number and UI, as appropriate.

b. Where a conversion factor is furnished with a UI Change, new Unit Weight and Unit Cube will be computed and placed in the record.

c. Changes to Commodity Manager Code will be processed to prepare a listing for review and manual processing. See paragraph 366411.

d. SIC Cards identifying deleted items will be processed to identify the NSN in the Basic Record with the appropriate Deleted Item Code.

e. Selected SIC actions will update the Classification Suspense Files data element. Stock number changes, DIC CML, and DIC CMR, together with DIC CMC (UI Change only) specifically, will accomplish the update. No action will be taken on other SIC DICs CMM CMN CMD and (other than UI) CMC cards.

366410 - OUTPUT FROM SIC CARD PROCESSING

The following will be produced resultant to processing:

a. Storage Location Identification Labels, appendix C-104

b. Storage Item Change Listing, appendix F-82

c. Multiple Location Listing, appendix F-81

d. Deleted Item Inventory Count Card, appendix B-76

e. Delinquent Deleted Item Report, appendix F-28, 90 days subsequent to effective date

366411 - CHANGES IN COMMODITY MANAGER

a. Processing of changes in Manager, although received via card media, will require manual processing rather than computer application for the following reasons:

(1) The Manager Code utilized in the Locator System is a single-digit code, whereas the SICC utilizes the 2-digit code outlined in the FMSC, M1-7.

(2) Correlation is feasible only by establishment of extensive lookup tables.

(3) The number of transactions involved on a monthly basis does not warrant computer application.

b. The SIC Listing will be reviewed to determine if the Locator File must be changed manually. Entries in the last three columns of Part II, F-82, (Manager changes) will require a manual update of Locator File to reflect the new Manager Code.

c. Item Locator Record Card, DIC ZBC, will be prepared and processed to change the Commodity Manager Code in the Item Locator Record, as indicated in appendix E-073 P.

366412 - CHANGES IN NONDEFINITIVE UNITS OF ISSUE

a. Change in a nondefinitive UI may result in change to QE data in the catalog files. Storage activities will be notified of pending QE data changes to items, via TWX or letter, no later than 15 days prior to the effective date of the change.

b. DS/T will manually process QE data changes as follows:

(1) Annotate the SIC Listing (F-82), Part III, with the new QE data.

(2) Contact UI coordinator in the appropriate DSC MSO to get QE data if no TWX or letter is received for a nondefinitive UI change appearing on the F-82 report.

(3) Take action to remark/repackage/placard stocks per paragraph 366413d.

(4) Notify the appropriate DSC IM by telephone upon completion of repackaging/remarking/placarding of stocks.

NOTE: There are times when the QE data for a nondefinitive UI may be changed without change to the UI. This type of change will not result in an SICC transaction to the storage activity. Such changes will be processed manually as described above except that a locally developed manual listing will be substituted for the F-82 report.

366413 - STORAGE ACTION

a. DS/T will receive SIC Listings, Storage Location Identification Labels, and Multiple Location Listings.

b. NSN changes and consolidations:

(1) New Storage Location Identification Labels will be placed on pull boxes, racks, pallets, or materiel. Old labels will be removed and destroyed.

(2) Stocks in storage will be remarked:

(a) Unit packages, if not in an unbroken intermediate container, will be remarked.

(b) Intermediate packages will be remarked if not opened. Unit packages need not be remarked.

(c) Bulk containers in rack storage will be remarked.

(d) Bulk containers in bulk storage will be remarked or placarded and remarked at time of shipment.

c. Multiple Location List will be utilized to consolidate locations (appendix E-021 P).

d. UI changes:

(1) Where the UI is definitive (i.e., EA GL FT) change is self-explanatory.

(2) Where the UI is nondefinitive (i.e., BX DR LG) consult the F-82 report, Part III, annotated with an in-the-clear QE per paragraph 366412 and perpetuate the QE data on the label.

(3) Loose stocks in bin storage will be repackaged to conform to the new UI.

(4) In other instances the new UI will be marked on containers as outlined in subparagraph b(2) above.

e. Stocks should be remarked and repackaged no earlier than necessary prior to the effective date. This will reduce the chance of stock selection errors.

366414 - DISPOSITION OF DELETED ITEMS

a. An alpha code has been established for each month of the year to identify the month during which a stock catalog change was processed identifying NSNs as deleted items; e.g., A-January, B-February, and so on.

b. DSCs are required to ship all deleted items to disposal either prior to or within 7 days after the effective date of the stock catalog change.

c. If stocks are on hand after this time, depots are required to followup to the DSCs for disposition.

d. When all stocks in a location are shipped to property disposal, the location will be deleted from the Stock Locator Record.

e. As of the seventh day of each month the computer will generate an Inventory for items deleted by a Storage Item Change Card. These items will be automatically loaded into the Inventory workload bank, following the effective day of the deleted action. (Standard MOWASP Inventory Procedure will be followed.)

f. If there is a disposal release order in process, the item will not be loaded in the Inventory workload bank. If a DRO (DIC A5J) processes into the system for the item after the Inventory procedure has started, the Inventory will be canceled. When the Inventory has been completed, a DIC CK8, appendix B-33, deleted item report and reply card, will be forwarded to the DSC/IPC.

CHAPTER 67

LOCAL MANAGEMENT DECISIONS IN MOWASP

SECTION I - GENERAL

367101 - PURPOSE

This chapter delineates the various decisions which must be made within the defense depot or DSC with collocated storage activity (subsequently referred to as depot) due to the implementation of MOWASP.

367102 - SCOPE

These decisions will have a significant effect on the local operating procedures within the depot and will involve various areas throughout the Directorate of Storage and Transportation.

367103 - REFERENCES

Various appendices are related and are referred to in subsequent sections of this chapter.

367104 - BACKGROUND

During the development of MOWASP, it became apparent that local conditions might require certain variations from the standard system; hence, the depot options have been provided in certain areas. These are described in this chapter.

367105 - POLICY

Standardized procedures prescribed under the Standard Automation Information System (SAIS) will be followed by all DLA field activities. The deviations included in this chapter are allowed.

367106 - RESPONSIBILITIES

Decisions required by this chapter are to be made by management personnel who are in positions of authority over the functions involved.

SECTION II - ESTABLISHMENT OF TABLES IN THE COMPUTER

367201 - "RIC FROM" TABLE

a. This table is required in the computer to indicate all activities from which MROs will be accepted by the local depot.

b. This table is limited to 100 entries and is established and maintained by appendix B-66, part A.

367202 - DIC/FRC CROSS-REFERENCE TABLE

a. This table is used in the mechanized assignment of Functional Routing Codes (FRCs) to be applied to special document identifier documents if the FRC is missing.

b. This table is limited to 148 entries and is established and maintained by appendix B-66, part A.

367203 - SPECIAL PROJECT TABLE

a. This table is required in the computer to indicate all applicable Project Codes (appendix A-11) that require special control or treatment during MRO and shipment processing. This table provides:

(1) A SEAVAN Eligibility Mode Indicator.

(2) A Parcel Post Indicator on those shipments which may not be shipped by parcel post; or that parcel post shipments must be registered.

(3) A special code to indicate that shipments should be made to an assembly/consolidation address in lieu of address shown in the MRO.

(4) Control List Indicator (see appendix F-4).

(5) Special Instructions or cross-reference to special instructional documents.

b. This table is limited to 714 entries and is established and maintained by appendix B-66, part B.

367204 - INVENTORY CONTROL TABLE

a. This table is required in the computer to serve the following functions:

(1) Establish serial numbers to be assigned as document numbers to computer-generated DoD Materiel Adjustment Documents (DD Form 1487) (appendix B-22). Indicated for each Commodity Manager is the start, ending and current serial numbers.

(2) Establish the number of days prior to effective date on which the local depot desires the printing of the Storage Item Change Listing (appendix F-82) and the Storage Location Identification Labels (appendix C-104). On the print-out of the table (see subparagraph b below) the number appears under the caption CMDM PRE-DOC INTERVAL.

b. This table is limited to 40 entries and is established and maintained by appendix B-66, part C.

367205 - AREA SHIPPING CYCLE TABLE

a. This table is required in the computer to be used in selecting stored MROs for timely release for processing. This involves the following:

(1) Each Activity Address Code in the DoDAAD File may be assigned a Geographic Area Code (appendix A-97) to aid in scheduling shipments.

(2) Each Geographic Area Code is assigned one or more Area Shipping Cycle Table Rotation Codes (appendix A-78) to indicate the day(s) of the week on which MROs are to be released.

b. This table identifies, by Julian day and day of week, every day of the year which is scheduled to be a Planned Date to Transportation (PDT). Inclusion of Saturdays, Sundays, and holidays is at the option of the depot.

c. For each Geographic Area Code, this table indicates the specific workdays on which documents are to be released for processing. Local depot may specify these workdays by either of the following:

(1) Particular days of the week.

(2) Based on an established interval/schedule.

d. This table is established and maintained by appendix B-66, part F.

367206 - TARIFF NUMBER CROSS-REFERENCE TABLE AND DEPOT IDENTIFICATION TABLE

a. The Tariff Number Cross-Reference Table is used in conjunction with Freight Description File transactions originating from entry of DICs ZUK and ZVL. Tariff Identification Codes noted in these DICs which match this table are converted to the in-the-clear tariff number prior to accessing the Freight Description File.

b. The Depot Identification Table establishes a Depot Identification Code for use when processing transactions associated with updating the Freight Description File.

c. These tables are established and maintained by appendix B-66, part G.

367207 - TRANSPORTATION APPROPRIATION TABLE

a. This table is used to reflect the appropriation numbers and dollars assigned to depots for movement of materiel.

b. This table is limited to 55 entries and is established and maintained by appendix B-66, part H.

367208 - DATA BANK FSC TABLE

a. This table is used to furnish item data to the Central Data Bank by prime depot and Federal Supply Class.

b. This table is limited to 383 entries and is established and maintained by appendix B-66, part I.

367209 - COUNT CARD MATRIX TABLE

a. This table serves three purposes:

(1) Establishment of a matrix table for batching and sequencing of count cards.

(2) Establishment of manhour standards for Inventory Type Storage Codes.

(3) Establishment of Inventory Acceptance Options from $.00 to $500.00 for all DLA managers, any three non-DLA managers and all other managers.

b. This table is established and maintained by appendix B-66, part J.

367210 - MOFAST TABLE AND CONTROL

a. Three separate tables are established as follows:

(1) Part 1 - Transit Time Table. This table identifies the number of days required to ship materiel via surface modes from a storage depot to a destination area identified by a Standard Point Location Code (SPLC).

(2) Part 2 - Air Shipment Exemption Table. This table identifies SPLCs which represent destination areas that are exempt from air shipment. Shipments to these SPLCs will, during the MOFAST process, be assigned Process Code SA and subsequently be assigned to a GBL.

(3) Part 3 - Table of Frozen Port Consignees. This table identifies consignees which have restricted water shipping because of ice bound port facilities.

b. These tables are limited to 100 entries each and are established and maintained by appendix B-66, part K.

367211 - MOFAST TABLE AND CONTROL

a. Two separate tables are established as follows:

(1) Part 1 - MOFAST Volume Destination Table. This table is used to identify shipment units which will be forwarded to volume shipping areas.

(2) Part 2 - Mechanized Center Workload Report Parameters. This table identifies Location Group criteria used in formatting the F-177, MOFAST Mechanized Center Release Workload Schedule.

367212 - ONE FREIGHT/ALL FREIGHT CONTROLS AND OPTIONS

a. This table is used to:

(1) Identify MROs exempt from One Freight/All Freight eligibility based on Service Code and IPG.

(2) Identify MROs exempt from One Freight/All Freight eligibility based on Geographic Area.

(3) Establishes minimum weight for shipments to be eligible for One Freight/All Freight.

(4) Identifies exception minimum weights for One Freight/All Freight processing of high volume DCRs or consignees when the consignee is equal to the DCR.

b. This table is established and maintained by appendix B-66, part M.

367213 - SHIPMENT PLANNING TABLE

a. This table establishes eligibility parameters for MROs to be automatically assigned to the SEAVAN Shipment Planning Process by:

(1) Commodity

(2) Location Group Code

(3) Service Code by IPG

(4) Minimum MRO Weight

(5) Minimum MRO Cube

367214 - POD HAZARDOUS POE CROSS-REFERENCE TABLE

a. This table is used to identify POD/POE relationships for overseas shipment of hazardous materiel.

b. This table is established and maintained by appendix B-66, part O.

367215 - FMS TRANSCEIVING/COUNTRY TABLE

This table indicates countries capable of receiving FMS NOAs by AUTODIN and the corresponding communications routing. It is also used to provide the in-the-clear country name.

SECTION III - ESTABLISHMENT OF SIGNIFICANT CONSTANTS

367301 - DEPOT ACTIVITY ADDRESS CODE

It is necessary that this code be established in the computer. This is entered by appendix B-66, part D, Action Code 01.

367302 - PROPERTY DISPOSAL OFFICER'S ADDRESS

It is necessary that the AAC of the PDO who serves the depot be entered in the computer. This is entered by appendix B-66, part D, Action Code 01.

367303 - DEPOT ROUTING IDENTIFIER

It is necessary that the middle character only of the RIC of the local depot be established in the computer. This is entered by appendix B-66, part D, Action Code 01.

367304 - MAXIMUM WEIGHT AND CUBE PER DD FORM 1348-1

a. Each depot must specify the maximum pounds and cubic feet allowed for the issuance of any stock by a single DD Form 1348-1.

b. This is entered by appendix B-66, part D, Action Code 01.

367305 - PROCESSING TIME INCREMENTS

a. Within the total allowed processing time, each depot must specify the allowed time increments to pick, pack, and assemble MROs, as follows:

(1) For IPGs I and II - in specified hours for completion.

(2) For IPG III - number of days and hour of that day. For each MRO, the computer calculates these increments and prints on DD Form 1348-1.

b. These times are entered by appendix B-66, part D, Action Code 01.

367306 - DICOMSS COMPATIBILITY CODE OPTION

This option is to be exercised if appendix A-68 Codes E and F are to be considered equal to Codes B and C respectively during warm months. This is entered by appendix B-66, part D, Action Code 01.

367307 - SPECIAL REQUIREMENTS CODE OPTION

This option is to be exercised if appendix A-81 Code Q is to be considered equal to Code Z during warm months. The option is entered by appendix B-66, part D, Action Code 01.

367308 - DICOMSS CYCLE CODE EXTENT OPTION

This option is provided to DICOMSS depots as an alternate to the normal MRO program selection of locations with the earliest date of pack. When exercised, MOWASP MRO location selection will be controlled by the last position of the warehouse location code which equates to a predetermined number of cycle codes. The extent option codes are machine determined from the number of cycle codes to be considered in each extent (i.e., an entry of 4 in the table provides Extent Option Code A to Cycle Codes A, B, C, and D and E to Cycles E, F, G, and H). Initiation of the option will provide extent option codes for the appropriate intervals beginning with Cycle Code A. The option is entered by appendix B-66, part D, Action Code 01. Cycle Code I (Frustrated Cargo) is not included in this process.

367309 - MECHANIZED WAREHOUSE AUTOMATIC CLEAR OPTION

This option identifies the number of days after the Document Release Date required to ship IPG III parcel post shipments from mechanized warehouse areas. This is entered by appendix B-66, part D, Action Code 01.

367310 - OTHER WAREHOUSE AUTOMATIC CLEAR OPTION

This option identifies the number of days after the Document Release Date required to ship IPG III parcel post shipments from other than mechanized warehouse areas. This is entered by appendix B-66, part D, Action Code 01.

367311 - PRINT SUPPRESSION FLAG

a. Exercising this option will cause the following data not to print on the F-84, Activity Address Record Listing:

(1) DIC TA1 adds for FEDSTRIP Addresses

(2) DIC TA4 and MA3 deletions

(3) DIC TA3 and MA2 changes to Inactive Addresses

b. The option is entered by appendix B-66, part D, Action Code 01.

367312 - RETURN ADDRESS OPTION

This option is exercised if the return address is to be printed on the DD Form 1348-1. This is entered by appendix B-66, part D, Action Code 01.

367313 - EXTENDED MRO BANK OPTION

This option is exercised if extended banking is desired. This is entered by appendix B-66, part D, Action Code 01.

367314 - INVENTORY CONSOLIDATION OPTION

This option is exercised if consolidation of MROs under inventory is desired. This is entered by appendix B-66, part D, Action Code 01.

367315 - SEAVAN INDICATOR OPTION

This option is entered if the depot desires Automated SEAVAN Shipment Planning. This is entered by appendix B-66, part D, Action Code 01.

367316 - GRANT AID - HAZARDOUS SORT GROUP OPTIONS

These options are entered if the depot desires that all Grant Aid and/or Hazardous MROs be sorted separately. This is entered by appendix B-66, part D, Action Code 01.

367317 - MOFAST EXCLUSION OPTIONS

a. MROs may be excluded from the MOFAST System by:

(1) Issue Priority Group

(2) Location Group Code

(3) Geographical Area Code

b. These are entered by appendix B-66, part D, Action Code 01.

367318 - MAPAD FREIGHT FORWARDER LOCATION CODE

This option is used to identify and select, in order of depot preference, the Location Code for MAPAD Freight Forwarders. This is entered by appendix B-66 D, part D, Action Code 01.

367319 - SERVICING LOGAIR TERMINAL

This option is used to identify the servicing LOGAIR terminal, if applicable. This is entered by appendix B-66, part D, Action Code 01.

367320 - SERVICING QUICKTRANS TERMINAL

This option is used to identify the servicing QUICKTRANS terminal, if applicable. This is entered by appendix B-66, part D, Action Code 01.

367321 - MRO PROCESSING VOLUME

This option provides the capability for each depot to specify the maximum quantity of MROs which are to be released by the computer on any Saturday, Sunday, or Holiday. The IPG I MROs and the NORS/ANORS IPG II MROs will be released regardless of an entry in this table; the difference between the quantity automatically released and the value entered into this table will normally cause an additional quantity of IPG II MROs to be documented. Special

emphasis should be made to assure shipment on Saturday of parcel post mode MROs or action to cancel the automatic clear date must be initiated. This is entered by appendix B-66, part D, Action Code 01.

367322 - PLANNED LI ASSIGNED TO PACKING CHUTE

This option is used to enter the planned quantity of line items to be assigned to each packing chute for the first routine batch each day. This is entered by appendix B-66, part D, Action Code 01.

367323 - MAXIMUM LI ACCUMULATED IN PACKING CHUTE

This option is used to enter the maximum number of line items to be accumulated in each packing chute. This is entered by appendix B-66, part D, Action Code 01.

367324 - SU AND TU GENERAL ASSEMBLY AREAS

a. This option provides the capability to establish:

(1) General Shipment and Transportation Unit Assembly Areas

(2) General Shipment and Transportation Unit Assembly Area Weight Limits

(3) General Shipment and Transportation Unit Assembly Area Cube Limits

b. These are entered by appendix B-66, part D, Action Code 02.

367325 - RECEIPT FORECAST MINIMUM WEIGHT AND CUBE

This option is used to enter the minimum weight and cube to be considered by Receipts Forecast. This is entered by appendix B-66, part D, Action Code 02.

367326 - MAXIMUM WEIGHT AND CUBE FOR MMHS

This option is used to enter the maximum weight and cube to be picked from the bulk MMHS. This is entered by appendix B-66, part D, Action Code 02.

367327 - DOCUMENTATION RELEASE DATE (DRD)

This number is required in the computer to indicate the local depot's selection of the number of 1-5 workdays that document will be released by the PDT. This number is entered by appendix B-66, part F, Action Code 01 and is printed in the Area Shipping Cycle Table (appendix F-45) as "XX days from DRD to PDT".

SECTION IV - CONSOLIDATION OF SHIPMENT UNITS BY WORK AREA

367401 - STOCK LOCATION GROUP TABLE

a. A Stock Location Group Code (SLGC) defines the basic work areas for which MROs will be consolidated into shipment units and related documentation sequenced IAW depot sequence option. Depot must determine the SLGC in one of the following methods:

(1) The first digit of the Physical Location Code (appendix A-59)

(2) The first and second digits of the Physical Location Code

(3) The first three digits of the Physical Location Code

SLGC will be a single alphanumeric character. SLGC X will be assigned DLA-wide to identify a mechanized complex; numeric codes will be utilized to identify Mechanized Materiel Handling System (MMHS) areas to which an MRO batching technique is to be applied to include the printing of a batch number and batch control number on the label extension portion of the DD Form 1348-1. Depots not utilizing the batching technique will not assign SLGC X or numeric codes.

b. This table, which is limited to 100 entries, is established and maintained by entry of appendix B-66, part D, with Action Codes EA or EB.

367402 - BATCH CONTROLS

a. Batching controls for SLGC X and for numeric codes are based on the following:

(1) Total line items in a batch

(2) Total number of multiline items

(3) Percent of multiline versus single lines in batch

(4) Overflow.

b. DS/T will determine the number of MROs in batch one and the number desired in second and subsequent batches. In addition, based on work force and physical layout, the mix of multilines and single line shipment units in a single batch will be determined. The overflow figure is that number of MROs which can be added to a batch if this will complete all documents ready for documentation and prevent the generation of a small batch.

c. If batching is desired, then parameters are loaded by entry appendix B-66, part D, Action Code 02. When batching controls are desired, further option is available to designate the MRO processing cycle to which batching parameters are to be applied.

d. The sorter chute selection control is provided by a 2-digit batch number and a 4-digit Batch Control Number printed in the margin outside the label of the DD Form 1348-1 for numeric and X SLGC. Batch control numbers will be assigned sequentially within each batch within each SLGC when the batching option is elected by the depot.

SECTION V - SEQUENCING OF CERTAIN PRINTED OUTPUTS

367501 - DoD SINGLE LINE ITEM REQUISITION SYSTEM DOCUMENTS (DD FORM 1348-1)

a. Each depot must determine the sequence in which DD Forms 1348-1 will be released for processing. This sequence will apply to each SLGC; therefore, one of the three options may be assigned to a single SLGC. Sequence options (appendix A-50) are as follows:

(1) Option 1 - DD Form 1348-1 will be in straight warehouse location.

(2) Option 2 - DD Form 1348-1 will be in prime warehouse location based on first, first and second, or first, second, and third position of the warehouse location code, (this is based on Warehouse Selection Option Code), then by Shipment Unit Number and balance of the 9-digit warehouse location.

(3) Option 3 - DD Form 1348-1 for multiline shipment units will be sequenced by Shipment Unit Number and then Warehouse Location Code, for single line shipment units sequence will be in warehouse location.

b. Choice of option is entered on the same card as the Stock Location Group Code as shown in paragraph 367401b.

367502 - SHIPPING CONTROL DOCUMENTS

a. Local depots must select the sequencing of the following operating documents which are produced along with the DD Forms 1348-1:

(1) Appendix F-38, Workload Forecast

(2) Appendix F-41, Summary Analysis of Released Workload (Part 1)

(3) Appendix F-42, Summary Analysis of Released Workload (Part 2)

(4) Appendix F-44, MRO Late-In-Process Report

b. While the choice of options, which follow, are the same as for the Consolidation of Shipment Units by Work Area (see paragraph 367401), they need not correspond:

(1) The first digit of Physical Location Code (appendix A-59)

(2) The first and second digit of Physical Location Code

(3) The first three digits of Physical Location Code

c. Choice of option is entered by appendix B-66, part D, Action Code 01.

SECTION VI - PUNCHING OF CARDS FOR REENTRY

367601 - MRO CONTROL/STATUS CARDS ZBMs (APPENDIX B-99) AND SHIPMENT UNIT COMPLETION CARDS ZBPs (APPENDIX B-101)

a. Local depots must determine the most suitable mode of indicating to the computer that processing in-storage has been completed and materiel is either offered to Transportation, has been mailed, or forwarded by Government truck. The following options for providing partially punched ZBM/ZBP cards for use in reentering are:

(1) Receive ZBMs for every Line Item (freight and parcel post) and ZBPs for every Shipment Unit (freight and parcel post).

(2) Receive ZBMs for only freight Line Items and ZBPs for only freight Shipment Units.

(3) Receive ZBMs for only freight Line Items and ZBPs for every Shipment Unit.

(4) Receive no ZBMs but ZBPs for every Shipment Unit.

b. Choice of option is entered by appendix B-66, part D, Action Code 01.

367602 - GBL CLOSEOUT CARDS, ZEN (APPENDIX B-128)

a. Local depot must determine the most suitable mode of indicating to the computer that freight shipments have been accomplished. The following options for providing partially punched ZEN cards for use in reentering are:

(1) Receive ZEN for each freight Shipment Unit

(2) Receive ZEN for each freight Line Item

b. Choice of option is entered by appendix B-66, part D, Action Code 01.

SECTION VII - FORMAT OF PRINTED REPORTS

367701 - GENERAL

Local depot may prescribe certain aspects of the format of reports produced by MOWASP. The extent of control over the format depends on whether or not the specific report is in the Reports Format File (RFF) as explained in following paragraphs.

367702 - REPORTS FORMAT FILE (RFF)

a. In the computer is established an RFF containing all reports produced in MOWASP <u>except</u>:

(1) Appendix F-8, Locator Inventory Analysis Report

(2) Appendix F-45, Area Shipping Cycle Table

(3) Appendix F-49, Table Reject Table

(4) Appendix F-56, Summary Storage Location Analysis Report

(5) Appendix F-118, Violation Followup Listing

b. For each report the RFF record includes:

(1) Report heading, in standard format except that Functional Routing Code may be specified.

(2) Number of lines per page (see subparagraph c(1)).

(3) Spacing (see subparagraph c(2)).

(4) Priority Group assigned (see subparagraph c(3)).

(5) "NOT REQUIRED" flag, if designated (see subparagraph c(4)).

(6) Cover sheet data (see subparagraph c(5)).

c. To alter appearance or workability of various reports, local depot may select and establish in the RFF the following options:

(1) Lines per page - Except for preprinted forms, number of lines per page may be specified from 01 to 99.

(2) Spacing - Local depot may determine preferred spacing as single, double, or triple. This may be done on reports other than those produced on preprinted forms that have interspersed headings in body of report of for other valid reasons. Spacing on reports in RFF may be specified except those indicated by following appendix numbers: C-11, C-41, C-63, C-104, F-6, F-8, F-9, F-11, F-14, F-15, F-16, F-17, F-20, F-21, F-22, F-24, F-25, F-26, F-27, F-28, F-33, F-34, F-35, F-36, F-37, F-39, F-40, F-51, F-52, F-53, F-54, F-56, F-63, F-65, F-67, F-69, F-79, F-81, F-82, F-84, F-90, F-91, F-96, F-97 and F-124.

(3) Priority Group - Each report may be assigned to a Priority Group numbered 0 through 9. When computer operating time is at a premium and certain reports are required more urgently than others, all reports in a specified Priority Group can be produced separately.

(4) "NOT REQUIRED" Flag - Depots may determine that certain reports are not required by including a flag in the report record in the RFF. The flag will cause the report to be bypassed and the action indicated by message on the Input-Output Control Officer's Report. The following reports cannot be bypassed; if the flag is placed on the record in RFF, the computer will stop and require that the file be corrected:

(a) Appendix C-11, Single Line Item Release/Receipt Document, DD Form 1348-1

(b) Appendix F-50, Manual Cancellation/Followup List

(c) Appendix F-69, Notice of Cancellation Request Report

(d) Appendix F-79, Shipment Planning and Movement Support Document (SPMSD)

(e) Appendix F-85, Violation Printout

(f) Appendix F-107, History File Listing of Items in DP Status

(g) Appendix F-118, Violation Followup Listing

(5) Cover Sheet - Depots may prescribe data to be printed as a cover sheet each time the report is printed. Six lines of 132 characters each may prescribe routing information or other identification desired by the depot.

367703 - REPORTS NOT IN RFF

Format is programed and may not be altered except to indicate the FRC. (Listed in paragraph 367702a.)

CHAPTER 68

RECEIPT, STORAGE AND ISSUE OF CONTROLLED SUBSTANCES, SENSITIVE DRUG ABUSE CONTROL AND PILFERABLE DLA ITEMS

CHAPTER 68

RECEIPT, STORAGE AND ISSUE OF CONTROLLED SUBSTANCES, SENSITIVE DRUG ABUSE CONTROL AND PILFERABLE DLA ITEMS

SECTION I - GENERAL

368101 - PURPOSE

This chapter prescribes policies, responsibilities, and procedures for the receipt, storage, shipment, and safeguarding of controlled substances, sensitive, drug abuse control, narcotics paraphernalia, precious metals, alcohol (fit for human consumption), and alcoholic beverages.

368102 - SCOPE

The provisions of this chapter are applicable to defense depots in accordance with DLAM 5710.1, DLAR 4145.11, and DLAR 4500.3.

368103 - RESPONSIBILITIES

a. The DSC will determine and designate sensitive items, drug abuse control (controlled substances), and pilferable items of supply as applicable through the Storage Item Change Process. Items will be designated by the applicable Physical Security Code and by inclusion of pertinent stock numbers on the enclosures to DLAR 4145.11.

b. Defense depots will:

(1) Establish custodial responsibility for controlled substances, sensitive drug abuse control and alcoholic beverages by the appointment of a commissioned Officer or responsible civilian.

(2) Ensure required protective measures for safeguarding designated controlled substances, sensitive, drug abuse control, and pilferable items.

(3) Provide applicable physical security facilities and develop local plans for acquisition of additional secure facilities required for designated items. Actual acquisition of additional secure facilities is subject to established program and budget procedures.

(4) Establish necessary administrative controls.

(5) Provide, as necessary, for the safeguarding of items not covered in DLAR 4145.11 which may require protection from pilferage during handling or storage.

(6) Ensure that, for narcotics, precious metals, and drug abuse control items, locator records DD Form 1348-1, Shipment Planning Worksheets, Transportation Support Documents and Exterior Container Markings, identify the above items as "Medical Supplies."

(7) Send to DSCs lists of candidate items for addition or deletion to enclosures to DLAR 4145.11.

c. Security Officers will:

(1) Indoctrinate responsible personnel and provide technical advice and guidance on matters regarding security measures to be taken to safeguard controlled substances, sensitive, drug abuse control, and pilferable items.

(2) Develop and direct a security program to establish and enforce proper security measures in warehouses, industrial shops, and other operating areas.

(3) Supervise issuance of identification badges for visitors to warehouses.

(4) Supervise issuance of area identification badges to assigned warehouse personnel.

(5) Regulate the assignment of personnel to the controlled substances, sensitive drug abuse control area, and authorization for personnel to gain access to the area by performing the following:

(a) Determine, by investigation, the suitability of the person named in the request submitted by the Director/Chief of the element.

(b) Report results of the investigation to the Depot Commander for approval and when approved, provide individual's name to the custodian.

(c) If not approved, inform the requester.

(d) Security Officers may accompany and identify persons without clearance into the sensitive storage area without prior investigation in the following circumstances:

1. During emergencies

2. Off-post official visitors who have a need to tour the sensitive storage facilities.

(6) Conduct unscheduled monthly inspections of secure facilities to assure adequacy of physical security measures and adherence to security regulations. Maintain copy of inspection report for review by HQ DLA personnel during annual inspection.

(7) Submit a report of findings, resulting from these inspections, to the Depot Commander via the Director/Chief of the affected element and the Deputy Commander.

d. Custodians of controlled substances, sensitive, and drug abuse control items, or alternate custodians (who function in the absence of the custodian) will:

(1) Safeguard these items from pilferage.

(2) Maintain, in the sensitive storage area, a list of persons authorized to gain access to the area.

(3) Prohibit the admission of unauthorized persons to the area.

(4) Exercise established security measures for receipt, storage, and shipment of these items. This includes the witnessing of receipts from transfer of custody from the carrier to the completion of storage action, and of shipments from selection of materiel to the transfer of custody to the carrier.

(5) Maintain appendix C-77, Inventory Record of Sensitive and Drug Abuse Control Items.

(6) Assist the Inventory function, as requested.

e. Regularly assigned warehouse personnel of individual warehouses containing pilferable items are responsible for adherence by all personnel in their buildings to procedures prescribed for safeguarding these items from pilferage.

368104 - CONTROLLED SUBSTANCES, SENSITIVE AND DRUG ABUSE ITEMS

The protective measures to be afforded controlled substances, sensitive, and drug abuse items constitute controlled movement under constant surveillance; hand-to-hand receipt upon delivery, with signature; and restricted access to the storage area. A listing of sensitive and drug abuse items is published as an enclosure to DLAR 4145.11.

368105 - DRUG ABUSE CONTROL ITEMS/CONTROLLED SUBSTANCES

Stimulant and depressant drugs, as covered by the Comprehensive Drug Abuse Prevention and Control Act of 1970, that require secure storage. They are designated by the letter Q in enclosures to DLAR 4145.11. Storage activities are to keep their listings current by reference to the "Federal Supply Catalog, Identification List, Cumulative Change Bulletin." In accordance with Federal regulations, controlled substances are coded C-III or III; C-IV or IV; C-V. These drugs were previously identified by a distinctive Drug Abuse Control Symbol that consists of RX within a capital letter C. The manufacturer places appropriate controlled substance symbol on the immediate container and carton, as applicable; however, to deter pilferage, the symbol does not appear on intermediate or shipping containers.

368106 - SENSITIVE ITEMS/CONTROLLED SUBSTANCES

Items (not classified in relation to interests of national defense) such as narcotics and precious metals, which require a high degree of protection and control during receipt, storage, and shipment because of statutory and regulatory requirements to prevent loss from theft or pilferage. Items are designated by the letter R in the notes column of Federal Supply Catalog, Identification List, C-6500-IL. Storage activities are to maintain their listings current by reference to the "Federal Supply Catalog, Identification

List, Cumulative Change Bulletin". In accordance with Federal regulations, controlled substances (Schedule II) are coded II or C-II. These drugs were previously identified by a distinctive Drug Abuse Control Symbol that consists of RX within a capital letter C. The manufacturer places the control symbol on the immediate container and carton, as applicable; however, to deter pilferage, the symbol does not appear on intermediate or shipping containers.

368107 - NARCOTICS PARAPHERNALIA

Needles, syringes, needle units and related drugs used in the administration of heroin/hard narcotics which are in demand for personal use. These items will be protected to the same degree as that provided pilferable items (paragraph 368108 below). A listing of the narcotics paraphernalia items is included in the pilferable listing published as an enclosure to DLAR 4145.11.

368108 - PILFERABLE ITEMS

Items other than sensitive and drug abuse control that have a ready resale value, civilian utility, or application as to personal possession, and are therefore especially subject to theft. Pilferable items will be protected to the extent that movement will be controlled through proper documentation; access to the storage area will be limited to assigned personnel. A listing of pilferable items is published as an enclosure to DLAR 4145.11. Local Commander may designate additional items as pilferable for their activity and publish as an enclosure to the chapter. Depot application of pilferable code X reference appendix A-28 is provided when an item is considered pilferable based on local Commander determination. The pilferable code placed on the locator record by a DIC ZBC will only override physical security code U or a blank field, but any transmission of data received from the Data Bank other than security code U will overlay the field in the location record. Pilferable code X will not be transmitted from a prime depot to the MCWASP Data Bank.

368109 - KEYS AND COMBINATIONS OF LOCKING DEVICES

a. Combinations of sensitive storage areas will be made available to the Depot Custodian and alternate custodians or their authorized representatives. Combinations will be changed at least once each year or when any personnel having access to combination is reassigned, separated, or no longer has need for this information; or the combinations have been subject to compromise.

b. Keys for drug abuse control storage areas will be made available to the Depot Custodian and alternate custodians or their authorized representatives. Keys to storage areas for highly pilferable items will be safeguarded and will be made available to a minimum number of authorized persons.

c. Locking devices for all storage buildings will be approved by the Depot Security Offices.

368110 - RECORDS

a. For each controlled substance, sensitive/drug abuse control item in stock (including items set aside for assembly program) and for precious metals, alcohol, and alcoholic beverages, a Jacket File, DLA Form 539 (appendix C-77), will be maintained in NSN sequence in which each receipt, issue, and inventory adjustment document will be recorded.

b. All records pertaining to controlled substances, sensitive, and drug abuse control materiel will be maintained by the Depot Custodian. Prompt, accurate posting of amounts received and/or issued are to be recorded to the Jacket File, DLA Form 539 (appendix C-77), by the custodian, alternate custodian, or a previously cleared clerk.

c. Perform transaction analysis of controlled substances, sensitive, and drug abuse control items, by comparing the balances on DSC record with the quantities actually in stock. Immediate action must be taken to resolve any imbalances between depot and DSC records. Any unresolved discrepancies (paragraph 368503) will be supported by a Report of Survey, DLAR 7500.1. Losses/shortages will be reported as in Section V.

d. After recording of each transaction, all applicable documents will be retained in NSN sequence by month, in the office of Depot Custodian or in the sensitive storage area, for a period of one year, then moved to the Depot Records Holding Area, for retention for an additional year, IAW DLAM 5015.1.

SECTION II - RECEIVING PROCEDURES

368201 - RECEIVING ELEMENTS

a. Process receipt of controlled substances, sensitive, drug abuse control, and pilferable items IAW chapter 3 of this manual, calling the custodian to witness transfer of custody of sensitive items from the carrier and to oversee the handling of the materiel until stored in secure facilities. Whenever possible, receive the items directly into secure facilities.

b. Check the seals on full carloads or truckloads. Inform the appropriate Storage personnel when seals have been broken prior to arrival at the unloading area.

c. Visually inspect the containers in less-than-truckload/carload lots to locate any evidence that containers have been opened and obtain additional witnesses of such evidence.

d. Conspicuously annotate and obtain witness of any storage on the receipt document in addition to the normal annotation on the bill of lading or way bill.

e. Shortages of controlled substances, sensitive, drug abuse control, and pilferable items will be reported in accordance with paragraph 368503.

368202 - STORAGE ELEMENTS

a. Receive controlled substances, sensitive, or drug abuse control items under the supervision of the custodian or designated alternate.

b. Pilferable items will be received under the supervision of warehouse personnel who will be responsible for their safeguarding until items are placed in controlled storage areas.

c. When informed that the seal to a car or truck has been broken or that containers appear to have been opened, have materiel counted in the presence of at least one witness.

d. Call inspectors, when inspection is required.

SECTION III - STORAGE AND HANDLING

368301 - STORAGE AND PACKING ELEMENTS

a. Receipts

(1) Controlled substances (Schedule II)/sensitive items will be stored in 750-pound safes, in anchored safes, or in vaults, with a three tumbler combination, unless a U.S. Department of Justice, Bureau of Narcotics and Dangerous Drugs (BNDD) Regional Office has approved another type of secure facility.

(2) Controlled substances (Schedules III, IV, and V), drug abuse control items will be stored in limited access areas, entry limited by badge control system, in fully-enclosed chain link barricades against windowless walls, and with locking devices approved by the installation security officer. Small quantities and less than container quantities will be stored and protected in the same manner as sensitive items.

(3) Pilferable items will be stored to the extent possible in a single building or in contiguous buildings with controlled access, the maximum number of cargo and personnel doors being locked at all times. Approved locking devices will be used on doors of all storage buildings.

b. Issues

(1) Inspect, select, pack, and mark shipments of controlled substances, sensitive items, and small lots of drug abuse control items, precious metals, alcohol, and alcoholic beverages within the vault under the supervision of the custodian or designated alternate, and transfer custody direct to the carrier with proper documentation.

(2) Record issue in accordance with paragraph 368110.

(3) Bulk issues of controlled substances, drug abuse control items, alcohol, and alcoholic beverages will be selected, packed, and marked within the secure cages, and delivery will be made directly to the carrier.

(4) Prepare small individual amounts of sensitive and drug abuse control items for shipment by registered parcel post (Return Receipt Requested Service) subject to size and weight limitations prescribed by the U.S. Post Office Department. See exception in subparagraph b(12).

(5) Containers prepared for shipment will be secured as follows:

(a) Inside packages will be sealed with manufacturers seals or resealed with locally applied seals in accordance with subparagraph c(2)(c).

(b) Shipping containers, excluding parcel post, will be strapped and sealed with steel strapping and a serialized metal seal.

(c) Outside serial numbers will be annotated to the DD Form 1348-1.

(6) Other issues of controlled substance (Schedule II)/sensitive items will be prepared for shipment by Air or Railway Express under the special signature service systems of hand-to-hand receipts or money delivery service.

(7) When so directed on the issue document (prepared from a MRO), remove narcotics from assemblies destined for shipment to MAP countries or other agencies not authorized to receive narcotics.

(8) If required for assemblies, narcotics will be shipped separately but concurrently with the assemblies under the export permit provisions stated above.

(9) Reject any issue document for shipment of narcotics to MAP consignees if it does not contain an exception data, the export permit number, expiration date of export permit, export terminal to receive supplies and, when applicable, terminal delivery date.

(10) The issue document (DD Form 1348-1) shipment invoice, GBLs and containers will be marked with the export permit number.

(11) Remove from exterior containers of sensitive and drug abuse control items any information which will identify the contents, such as the NSN and nomenclature. Description of items on documentation and exterior containers will be general in nature (Medical Supplies). Use of the word NARCOTICS on shipping containers or documentation is prohibited. Packing lists, when required, will be placed inside the container.

NOTE: Interior unit packages will not have identification obliterated. Containers which serve both as the unit package and shipping container will be overpacked in suitable metal, wood, or fiberboard shipping container to conceal the identification marking.

(12) Parcel Post will not be used for shipment of narcotics to export terminals.

(13) Apply the following restrictive procedures to surface shipments of clothing to Air Force consignees in the European command (including Turkey and Morocco) and Japan and Korea of the Far East command:

(a) NSN, nomenclature, UI, in-the-clear "Mark For" (Clothing Sales Officer), and contractor markings (e.g., Tennessee Overall Company) which tend to indicate the types of items, will be omitted or obliterated from shipping containers. "Mark For" codes will be applied.

(b) Wacking lists will be placed inside the shipping container.

c. Storage

(1) Set Assemblies:

(a) Controlled substances, sensitive, drug abuse control items awaiting packaging into sets will be stored within a secured container containing a combination lock. Combination will be controlled in accordance with provisions of paragraph 368109.

(b) Set assemblies containing controlled substances, sensitive, drug abuse control items will be stored and controlled as outlined in this chapter. Set assemblies not practicable to store within controlled substances, sensitive, drug abuse control storage areas, because of size and quantity, will have their controlled substances, sensitive drug abuse control items removed and forwarded to the controlled substances, sensitive, drug abuse control storage area for protective storage. Set assemblies will be placarded to indicate that the required controlled substances, sensitive, drug abuse control items have been removed and are located in the controlled substances, sensitive, drug abuse control storage area. Materiel so removed and so located will be placarded to reflect its relationship to the parent assembly and control will be maintained in accordance with provisions of paragraph 368109.

(2) Inspections:

(a) Surveillance inspections will be conducted in accordance with provisions of chapter 70.

(b) When narcotics seals are broken during inspection, the materiel:

1. Found unserviceable, will be disposed of in accordance with paragraph 368601.

2. Found serviceable, will be resealed and returned to location.

(c) Seals applied locally, will contain as a minimum, date inspected, name of depot, and signature of inspector.

(d) If materiel is packed in kits or reserved for kits, replacement of stock due to overage will not take place without prior concurrence of applicable DSC.

SECTION IV - SHIPPING PROCEDURES

368401 - SHIPPING ELEMENTS

a. Verify that packing and marking are in agreement with paragraph 368301 above.

b. Controlled substances, sensitive, and drug abuse control items will be selected and prepared for shipment under the supervision of the applicable custodian or his designated representative. Items should be packaged, packed, marked and held within the secure facilities until proper transfer of custodianship to the carrier. Pilferable items will be packaged, packed, and marked and entered into normal shipping channels by one of two methods:

(1) Movement of the materiel to a packing area by secure means and surveillance during the packing process by a responsible individual.

(2) Completion of the packing process in the controlled access area prior to entry into the normal shipping cycle.

c. The Mode of Shipment will conform to existing requirements of the Department of Transportation.

d. Armed guard service or armored vehicles will be utilized only when the type and quantity of sensitive items or the circumstances of shipment require the added protection.

e. Export shipment of narcotics to countries under MAP will be controlled by export permits IAW the Comprehensive Drug Abuse Prevention and Control Act of 1970. Export permit numbers will be marked both on the documentation and on the containers.

f. Shipments of narcotics to MAP countries will be directed to the transportation terminal prior to the expiration date specified by the permit authorization, or prior to the terminal required date, when applicable. Items for a single export permit will not be shipped on more than one shipment invoice from any single supplying location.

g. Direct shipments of narcotics to MAP countries are prohibited.

SECTION V - INVENTORY PROCEDURES

368501 - FREQUENCY AND METHOD

a. Inventory of controlled substances and sensitive, drug abuse control, and pilferable items will be conducted according to the frequency and method authorized in chapter 7.

b. Additional inventories will be conducted for controlled substances, sensitive items, and drug abuse control items as follows:

(1) Upon change of the vault custodian

(2) At least quarterly

c. These additional inventories must be a physical count comparison to the balances shown on the Transaction Record of Sensitive Items, DLA Form 539 (appendix C-77).

368502 - INVENTORY DISCREPANCIES

a. Discrepancies resulting from inventories conducted IAW chapter 7 will be resolved in the manner described therein.

b. Discrepancies resulting from additional inventories or transaction analysis conducted IAW paragraph 368501 will be directed to the Inventory Branch for conduction of a special inventory IAW chapter 7.

368503 - SHORTAGES

Discrepancies (shortages or overages) of controlled substances, sensitive items, drug abuse control items, precious metals, alcohol, and alcoholic beverages will be reported immediately to the Command Security Officer for expeditious reporting identified below. Confirmed shortages or overages of the above items/substances must be supported by a report of survey. Discrepancies will be reported by the pertinent DSC/ICP as follows:

a. Depot Commander.

b. The nearest Drug Enforcement Administration Office (report loss/gain of controlled substances only).

c. Command Security Officer, who will notify:

(1) Appropriate supporting investigative agency IAW DLAR 5705.2, Criminal Investigative Support to the Defense Logistics Agency.

(2) HQ DLA, ATTN: DLA-T by telephone IAW DLAR 5705.1, Reporting of Security and Criminal Violations.

SECTION VI - DISPOSAL PROCEDURES

368601 - DISPOSITION OF UNSERVICEABLE/SERVICEABLE ITEMS

Reporting and disposition of unserviceable controlled substances, sensitive items, and drug abuse control items will be IAW DLAR 4145.11, Safeguarding of Controlled Substances, Sensitive, Drug Abuse Control, and Pilferable DLA Items of Supply; DoD 4160.21-M, Defense Disposal Manual, part 3, chapter 5, paragraph 305303b(8) of this manual.

368602 - DISPOSAL OF UNWANTED RADIOACTIVE MATERIAL

Current guidance allows the DPDO to provide a clearing house service without accepting physical custody; but, it does not allow the DPDO to accept radioactive waste materials for ultimate disposal processing. The responsibility for commodities that survive the DPDO's screening cycles (as well as stocks administratively condemned by the DSC and other radioactive wastes) belongs to the generating/storage activity. Addresses for requesting instructions or information on matters relating to Disposal or Radioactive Material are as follows:

a. For administrative matters which include requests for disposal instructions, fiscal/contractual responsibilities, policy/procedural matters, the mailing address is: Commander, USAAMCCOM, Attn: DRSMC-DSM-D(R), Rock Island, IL 61299. The telephone number is AUTOVON 793-3980/5534 or commercial (309) 794-3980/5534.

b. For safety and health or technical matters requiring the expertise of the Command Health Physicist, the mailing address is: Commander, USAAMCCOM, Attn: DRSMC-SF(R), Rock Island, IL 61299. The telephone number is AUTOVON 793-3383 or commercial (309) 794-3383.

CHAPTER 70

STORAGE SURVEILLANCE

SECTION I - GENERAL

370101 - PURPOSE

This chapter prescribes policies, procedures, and responsibilities governing the establishment and maintenance of the Storage Surveillance Inspection Program for depots.

370102 - SCOPE

a. This chapter is applicable to defense depots and DSCs with a depot type activity/supply operation.

b. This chapter is applicable to all stocks in storage at defense depot/DSCs whether stored for DLA, GSA, or Service commodity managers.

370103 - POLICIES

a. The DoD policy for management of inventories of materiel provides that "materiel in the custody of supply and storage activities will be subject to periodic and systematic quality evaluation in order to ensure its readiness and reliability. When quality deficiencies are uncovered, action shall be taken promptly to identify nonserviceable materiel from serviceable stocks and to correct the causes of such deficiencies."

b. The objectives of the stock readiness storage surveillance program are to:

(1) Determine the condition of supplies in storage, enabling segregration of unserviceable from serviceable materiel, and to make proper disposition.

(2) Assure the serviceability of supplies in storage to meet supply demand of the Services at a minimum cost in money, manpower, and other sources.

(3) Maintain complete and accurate knowledge of the condition status of supplies in storage.

(4) Permit adjustments in storage inspection and quality control effort to provide greater efficiency and economy through analysis of data concerning variation in deterioration rates.

(5) Achieve longer shelf-life and reduce quality control costs through analysis of information regarding stability and reliability of materiels and feedback of data for improvement of specifications.

370104 - RESPONSIBILITIES

a. Receiving Division, Directorate of Distribution will install and administer systems and procedures outlined in this chapter.

b. Stock Readiness Branch, Warehousing Division, DS/T will conduct the surveillance inspection outlined in this chapter.

370105 - INSPECTION CRITERIA

a. Serviceability:

(1) Background - For most supplies, each phase in the logistics cycle and the passage of time contribute to a successive lowering of quality levels. Very few supplies improve with age. For some quality characteristics of a specific item of supply, no significant change in quality level will occur in storage. But most frequently, quality does deteriorate with age. Identification of items whose significant quality characteristics exhibit deterioration with age is a key factor in storage quality control.

(2) Rate of Deterioration - The rate of deterioration of supplies in storage is dependent on the nature of the materiel (design characteristics), the unit protection given the materiel, and the environment in which the materiel is stored. The deterioration rate of many, but not all, supplies can be controlled to some degree by adjustments in unit protection and storage environment.

(3) Serviceablity Limits - Since some degree of deterioration can be anticipated in storage, serviceability limits cannot coincide with the original procurement specification limits. Further, allowance must be provided for the effect of deviations, waivers, engineering changes, and quality slippage inherent in the procurement phase of the logistic cycle. Additionally, once title for supplies has passed to the Government, it is essential that materiel be utilized, if at all serviceable. Thus, restrictive serviceability limits must be avoided. For purpose of storage quality evaluation, serviceability is defined as the ability of supplies to render satisfactory service when utilized for the purpose of originally intended. For purposes of serviceability, supplies will be classified in accordance with provisions of appendix A-16.

(4) Percent Defective - Upon inspection, units found unserviceable will be considered defective. The extent of defective units in a lot or batch is measured in terms of percent defective units. The percent defective of any given quantity of supplies is the number of defective units contained therein, divided by the total number of units, and the quotient multiplied by 100. A unit is considered defective if it contains one or more defects. Expressed as an equation:

$$\text{Percent Defective} = \frac{\text{Number of Defectives}}{\text{Number of Units}} \times 100$$

(5) Serviceability Quality Level (SQL) - The SQL is an expression of the permissible lot or batch tolerance for defectiveness. It is a nominal value expressed in terms of percent defective. An SQL may be provided for all defects that may be found in an item of supply, or separate SQLs may be designated for specialized groups of defects. The assigned SQL can be viewed

as the poorest average level of quality which shall be permitted in the product. Since the SQL is measured in percent defective, a low percentage of defective items is equivalent to high quality, and vise versa.

b. Defects, Classification, and Classes:

(1) Classification of Defects - A classification of defects is an enumeration of possible deficiencies in an item classified according to their importance.

(2) Defect Class - For the purpose of storage inspection and quality control, a "Defect" is any deviation of an item from serviceability requirements, i.e., impairment of function or intended use. Defects may be classified as critical, major, or minor.

(a) Critical Defect - A critical defect is one that could result in hazard to life or health, or could create unsafe conditions for individuals using or maintaining the product, or is a defect which will make the product completely inoperative.

(b) Major-Defect - A major defect is one, other than critical, that could prevent an item from functioning as designed, efficiently. In addition, the following types of defects are to be considered as major defects:

1. Preservation or Packaging Defect - Inadequate Preservation or Packaging is a major defect if it has permitted or will permit any degree of corrosion or deterioration of a critical surface, or allow heavy corrosion or deterioration of a noncritical surface. In addition, inadequate packaging is a major defect if it fails to provide necessary protection against physical damage that could prevent an item from functioning at designed efficiency.

2. Packing Defect - Inadequate packing is a major defect if it fails to provide necessary protection against physical damage that could result from hazards to which the item could be subjected during shipment and storage.

3. Marking Defect - Incorrect marking and/or lack of identification marking that could result in loss or damage to the item, is a major defect.

(c) Minor Defect - A minor defect is one that does not materially reduce the useability of the item for its intended purpose or is a departure from established standards, but has no significant bearing on the effectiveness of the item. In addition, the following types of defects are to be considered as minor defects:

1. Preservation or Packaging Defect - Inadequate preservation or packaging is a minor defect if it has permitted the onset of light to medium corrosion or moderate deterioration of noncritical surfaces, providing the presence of such corrosion or deterioration would not adversely affect the operability or effective use of an item. Preservation or packaging that is not in strict conformance with specification requirements, but is deemed sufficient to afford the necessary protection to the item, is a minor defect.

2. Packing Defect - Inadequate packing is a minor defect if it is not in strict accordance with specifications but is sufficient to protect the item against physical damage.

3. Marking Defect - Minor marking defects include improper or missing contractor's name or address, contract number, requisition number, weight, cube, preservation date, or any other markings not indicated in paragraph (b) 3 above, provided they would not result in misshipment or damage to the item.

(3) Application - The deficiencies noted in storage inspection are to be classified as indicated above. The following special interpretation of defect classes is to be observed:

(a) Classification of Defects - Defects should be classified as critical, major or minor even if they are not considered to belong fully in these classes at the time of inspection but can reasonably by expected to be in these classes prior to the next scheduled inspection period.

(b) Defects of a Trivial Nature - Defects of a trivial nature should not be considered as part of the minor class unless some reduction in the useability of the item can be expected prior to the next scheduled inspection. For example, dents and scratches that do not break the paint film are considered trivial deficiencies.

c. Formation of Lots: The selection of representative samples for quality evaluation is based on the homogeneity of the lot. It has also been demonstrated that costs of quality evaluation can be materially reduced through the creation of large size lots. To encompass these principles, the formation of lots will consist of manufacturer's lots, grand lots, or mixed lots.

(1) Manufacturer's Lot - The manufacturer's lot, batch, or control number should be used whenever possible in the selection of samples. This would include lots of sizable quantities in original packs. The use of manufacturer's lots enables inspection and test results to be compared against the original lot acceptance results. This permits a determination of deterioration rates and evaluation of shelf-life figures.

(2) Grand Lot - The grouping together of several lots, either from one manufacturer or within the same period of manufacture, can effect an increase of lot size. However, the following conditions must be met by these lots before materiel can be considered for grouping into a grand lot:

(a) Identical stock number, class, type, and model.

(b) Same manufacturer and packed within the same 12 month period or different manufacturers and packed within the same six month period.

(c) Comparable storage history.

(d) Identical packaging.

(e) No significantly known differences in quality.

The grand lot may be formed when the complete analysis of all available data including the conditions noted above, and the technical judgement of the inspectors indicate the homogeneity of all significant charactistics. The formation of a grand lot at a depot is only a paper transaction, and does not require any restorage or reworking of materiel. Where such grand lots are formed and sampled, reports of results should include a complete description of the grand lot composition in each case. If the samples drawn from the grand lot indicate heterogeneity of the individual lots making up the grand lot, the grand lot should then be terminated and manufacturer's lot sampling substituted.

(3) Mixed Lot - The mixed lot is formed of one or more lots identification by manufacturer or lot number has been lost, and its relationship to other lots cannot be determined. An example of this is a repack of loose issue. Several mixed lots may be grouped into grand lots if inspection tests data indicate that these mixed lots are similar in their significant characteristics.

d. Sampling Plans:

(1) Sampling procedures for quality evaluation should provide the widest range of coverage with a minimum expenditure of effort consistent with the desired level of assurance. The primary purpose of such sampling is to detect deterioration in stocks, not to duplicate the original procurement inspection. Therefore, the sampling plan is based on obtaining a small sample from many lots rather than on relying upon a large sample from a few groups. This approach enables action to be taken on as wide a group as possible. The objective in the selection of samples is to assure that every possible sample of specified size has an equal chance of being selected from the lot. Biased methods must be avoided; e.g., selecting items from the same position in containers, pallets, or stocks; taking items all from one location, or selecting items that are noticeably defective. The use of a table of random numbers as contained in Section 16 of the Department of Defense and Logistics Handbook, Inspection H-105, entitled Administration of Sampling Procedures for Acceptance Inspection will ensure random selection of samples. The Sampling Plan as given in the item Serviceability Standard will normally be used for inspection; however, in its absence the following criteria will apply.

(2) Sampling for examination and testing of supplies normally will be performed on the basis of one of the established sampling levels. The sample size and SQL will be obtained from appropriate Sampling Tables as shown in MIL-STD-105. The rejection number shown in the Sampling Plan constitutes a "Warning Signal". It is an indication that certain depot care and maintenance improvements may be in order, and where possible, necessary corrective action should be initiated immediately. When the rejection number is reached or exceeded, the depot will submit either:

(a) A recommendation to the DSC regarding the need for performance of a one hundred percent examination of the lot, or

(b) A recommendation for an alternative course of action with justification and supporting information. A one hundred percent examination will not be performed on any item of supply without approval of the DSC. Such recommendations will be submitted on DD Form 1225.

e. Testing of Samples: DD Form 1222, Request for and Results of Tests, will be utilized when laboratory testing is required. DD Form 1222 will be attached to DD Form 1225, Storage Quality Control Report, as an enclosure, whenever serviceability standards require that both inspection and tests be performed on a specific item of supply. The DD Form 1222 (appendix C-84) will be submitted separately when no requirements other than for laboratory testing are established. An original and three copies will be prepared and forwarded with the samples to the DSC Laboratory Division. Results of such tests, with the DSC recommendations, will be returned to the initiating storage activity.

f. Storage Serviceability Standards:

(1) Each DSC is responsible for establishment of storage serviceability standards which can be uniformly applied to all their stocks regardless of the Military Service to which supplies will ultimately be issued.

(2) Storage serviceability standards will be issued by groups of supply items whenever feasible. For items with unusual or distinctive features, separate standards will be prepared. Storage serviceability standards will contain but are not limited to the following information:

(a) Item identification by nomenclature, specification number, and NSN designation.

(b) Lists of quality characteristics that are subject to deterioration or depreciation in storage including shelf-life information.

(c) Lists of defects for defect classifications which apply.

(d) Instructions for visual dimensional examinations and for laboratory testing.

(e) Serviceability quality levels to be utilized in conjunction with lists of defects classifications.

(f) Normal sampling procedures.

(g) Fixed (or variable) intervals of scheduled inspections and tests.

(h) Special inspection and test information pertaining to the item or group of items covered by the storage serviceability standards. It is expected that storage installations will conduct tests that are within their capability. Information regarding additional laboratory facilities that are available to supplement local depot facilities will be incorporated in the appropriate serviceability standards.

(i) Normal storage environment.

(j) Normal preservation and packing for extended storage.

(k) Minor preservation and repair procedures that should be initiated simultaneously with the accomplishment of the scheduled inspection.

(l) Recommended lot information.

SECTION II - RECORD DATA ESTABLISHED AND MAINTAINED

370201 - COMPUTER RECORD DATA

a. Storage Surveillance Inspection Data for each NSN will be maintained in the Computer Item Locator Record as described in detail in chapter 66, Stock Locator System, and related appendices.

b. The following summary depicts these data elements and gives a brief description where appropriate:

DATA ELEMENT	DESCRIPTION
National Stock Number	Self-explanatory.
Item Description	Self-explanatory.
Unit of Issue	Self-explanatory.
Location(s)	Self-explanatory.
Condition Code	A 1-position alpha code classifying materiel in terms of readiness for issue (appendix A-16).
Commodity Manager Code	A 1-position alpha or numeric code indicating the responsible DSC/ICP (appendix A-44).
Date of Pack/Expiration	A 4-position numeric entry giving month and year of pack (0875 = Aug 1975). For Type I shelf-life items, this will be the date of expiration. For all others it will be date of pack.
Type Pack	A 1-position numeric code to designate the physical state of outer packing (appendix A-4).
Lot of Contract Number	Self-explanatory (maximum of 5 positions, alpha and numeric).
Inspection Date (Next)	A 4-position numeric entry giving month and year of next inspection date (0875 - Aug 1975).

DATA ELEMENT	DESCRIPTION
Shelf-Life Code	A 1-position alpha or numeric code indicating the storage life of an item (appendix A-47).

c. Data elements indicated above will be estabished for each item in stock and will be maintained in the computer stock locator system IAW Chapter 66. After such data are initially established, each item (NSN) received will be at time of receipt, have the same elements of data established and submitted to ODS to maintain record current.

370202 - MANUAL RECORD DATA

a. Manual record data maintained for surveillance inspection will consist of the following:

(1) DD Form 1225, Storage Quality Control Report (appendix C-5) will be prepared and submitted in three copies to the applicable DSC when surveillance inspection results in materiel being reclassified to Condition Code F, G, or L. The DD Form 1225 for adjustment actions will contain the same document number originally used in the Materiel Adjustment Card Transceived to the DSC. (See appendices F-91 and E-091 P.) When a change in condition is to be supported by a DD Form 1225, distribution activities will enter Mangagement Code Z in pos. 72 of the transceived Materiel Adjustment Card. (See appendix E-116 P.)

(2) DD Form 1222, Request for and Results of Tests (appendix C-84). This form will be prepared and submitted in four copies, together with a sample, when laboratory testing is required. Distribution will be made in accordance with applicable DSC serviceability standard instructions. (See appendix E-033 P.)

b. Discrepancies noted during a surveillance inspection will be reported to the appropriate DSC within 10 working days following the inspection, other than as directed in paragraph 311203e.

c. A followup will be submitted to the appropriate DC when a reply has not been received within 45 days after submission of the DD Forms 1225/1222. If a reply is not received within 30 days of the followup, a second followup should be submitted to the DSC for Command attention. Once a reply has been received from the DSC acknowledging receipt of the DD Forms 1225/1222, no further followup is mandatory; however, further followup action may be taken at the discretion of the Depot Commander.

d. Authorized persons at a DSC may telephone instructions to a depot to reclassify material to Condition Codes A, B or C. Depots will annotate their copies of the DD Form 1225 with the specific instructions, including justification and the name and organization of the person giving the instruction.

e. Upon receipt of final action from the DSC, the suspended stock will be processed within seven working days.

f. Manual record outlined above will be initiated, as required, in accordance with the provisions of this procedure. Files will be retired on an annual basis and/or when their intended purpose has been accomplished.

SECTION III - SOURCE DATA AND INPUT DOCUMENTS

370301 - COMPUTER FURNISHED DATA

Source data furnished by the computer operation for conduct of the Storage Surveillance Inspection Program consists of the following:

a. Appendix F-20, Part 1 and Part 2, Inspection Schedules - Shelf-Life Items and Nonshelf-Life Items.

(1) These listings provide a schedule by commodity and warehouse of shelf-life items due for storage surveillance inspections during a given month. Frequency of report - first day of each month.

(2) This listing also provides the means of followup on stock numbers and/or locations where the Inspection Test Cards, appendix B-116, have not been submitted to update the Item Locator File.

b. Appendix F-22, Classification Suspense Report.

This listing (report) provides a means of followup where action has been suspended on stock numbers that have been changed to Condition Code D, E, F, G, J, K or L. Frequency of report is biweekly and all records will continue to appear on the report until the problem is resolved.

c. Appendix B-116, Surveillance Inspection/Operational Test Notice Card (Output), DIC ZCO/ZC9.

(1) Short Title - Inspection Test Card.

(2) An Inspection Test Card is produced for each corresponding item and/or location on the inspection schedules as established in appendix F-20. Data elements shown are the same as on the inspection schedules. Inspection Test Cards identified with DIC ZCO will be mechanically prepared for all items/locations on the F-20 schedule. DIC AC9 Inspection Test Cards are produced to accomplish downgrading of Type I (non-extendable) shelf-life items only.

(3) The Inspection Test Cards are utilized to reflect the results of the completed warehouse inspections and will be used to update the Computer Locator File. The ZCO card may also be utilized for unscheduled inspections such as those due to locations with a Shelf-Life Code of other than 0 having a next Inspection Date of zeros or blanks, or those inspections generated by cancellation of the DIC ZC9 in accordance with appendix E-116 P.

370302 - COMPUTER INPUT DOCUMENTS

Appendix B-116, Surveillance Inspection/Operational Test Notice Card (Reentry-Input), DIC ZCO/ZC9.

a. Short Title - Inspection Test Card.

b. See paragraph 370301c above.

c. The Inspection Test Card will be utilized to reflect the results of completed warehouse inspections and then submitted to update the Item Locator Record accordingly.

d. The DIC ZCO Inspection Test Card provides space for entries to update all the required elements that could change as a result of the warehouse inspections and for additional entries required when an adjustment must be transceived to the DSC. See appendix E-116 P.

e. The DIC ZC9 Inspection Test Card, while offering limited update capabilities, provides a simple format to reflect actions relative to the processing of Condition Code adjustments of nonextendable (Type I) shelf-life materiel. Based upon the recorded expiration date for the item, the computer will automatically calculate the next date of inspection (see chapter 11) and reflect these data on the DIC ZC9 Inspection Test Card. These cards will be provided monthly concurrent with the DIC ZCO documents and the F-20 inspection schedule. All Materiel Adjustment Documents, DIC DAC, transceived to the DSC will bear similar document numbers (constructed in accordance with (appendix D-39) to provide standard identification of inspections relative to those automatic Condition Code downgrade actions.

SECTION IV - SHELF-LIFE ITEMS

370401 - SCHEDULES FOR INSPECTION

a. Inspection schedules for shelf-life items are established by appendices F-20, part 1 and D-2. This listing provides a schedule by commodity and warehouse in location sequence of shelf-life items due and past due for storage inspection during a given month and those locations with a shelf-life code of other than 0 and with zero or blank next Inspection Date field. These types of inspections will be identified by 9999 in the corresponding fields of the F-20 report and the corresponding ZCO card. The schedules will be received in six copies on the first day of each month. They will be used for reviewing, planning, scheduling, and controlling surveillance inspection during the month. (See appendix E-009 P.) An Inspection Test Card (appendix B-116) will be received for each NSN and location schedule. These Inspection Test Cards (DLA Form 540, appendix C-54) will be held by the Stock Readiness Branch and will be utilized to reflect the results of completed Stock Readiness Branch inspections and for submission to Data Systems to update the Computer Locator File. (See appendix E-116 P.) Local Purchase (subsistence Y-coded) Items on a monthly basis will be produced on part 3 of the F-20 report to identify the Local Purchase Items requiring surveillance inspection.

b. Data elements contained on the Inspection Schedules and Inspection Test Cards are as follows:

(1) NSN

(2) Item Description

(3) UI

(4) Location(s)

(5) Condition Code (appendix A-16)

(6) Commodity Manager Code (appendix A-44)

(7) Date of Pack/Expiration

(8) Type of Pack (appendix A-4)

(9) Lot or Contract Number

(10) Inspection Date (next)

(11) Shelf-Life Code (appendix A-47)

370402 - INSPECTION PROCEDURES

a. Shelf-life items schedules will be received on the first day of each month for all items due inspection during that month together with corresponding Inspection Test Cards.

b. The schedules and test cards will be forwarded to the Stock Readiness Branch for conduct of physical inspection.

c. The Directorate Stock Readiness Branch will conduct the physical surveillance inspection in accordance with the schedules received, the DSC serviceability standards, and any special instructions on hand for the item(s) involved.

d. As a result of the surveillance inspection, the Stock Readiness Branch will take one or more of the following actions as applicable:

(1) Materiel found to be serviceable - No adjustments required - Annotate copy of schedule that item is serviceable and enter on DIC ZCO card new (next) inspection date or review assigned next inspection date for correctness in the case of Type I shelf-life items.

(2) Laboratory testing required - Annotate copy of schedule that laboratory testing is required. Initiate DD Form 1222, Request for and Results of Tests (appendix C-84), and submit with samples to the appropriate DSC laboratory. (See appendix E-033 P.) Retain suspense copy of the DD Form 1222.

(3) Materiel found to be unserviceable and/or reidentification or Condition Code Change required - Annotate copy of schedule accordingly. Initiate draft copy of DD Form 1225, Storage Quality Control Report, in accordance with appendix C-5. Hold draft copy for completion and distribution in accordance with appendix E-091 P.

NOTE: For application of Shelf-Life Codes and use of Condition Codes on shelf-life items, see chapter 11.

e. Based upon data in annotated schedules, suspense copies of DD Forms 1222 and draft copies of DD Forms 1225, the Stock Readiness Branch will take the following action:

370403 - ADJUSTMENTS

a. Update Computer Item Locator File:

(1) Enter required changes from inspection data received above on the corresponding DLA Form 540, Inspection Test Cards, DIC ZCO/ZC9, IAW appendix B-116. This date will consist of changes, except where otherwise indicated, to the following elements as applicable: (See appendices B-116/E-116 P.)

(a) Condition Code (new, as applicable). Automatically assigned on DIC ZC9.

(b) Inspection Date (next in all cases except when item is placed in classification suspense or when Condition Code is changed to H for property disposal). Automatically assigned on DIC ZC9.

(c) Shelf-Life Code (new, as applicable - DIC ZXO only).

(d) Quantity of item if there is a Condition Code change. Mandatory entry for DIC ZC9.

(e) New Location (pos. 25-33) and alpha X (pos. 55) if there is a Condition Code change to a partial quantity presently on the Locator File.

(f) Enter a Management Code in pos. 66, if applicable, as follows:

1. Z if the Materiel Adjustment Document required on Condition Code changes is to be supported by a manual DD Form 1225. Management Code entry Z on an Inspection Test Card, DIC ZC9, is not necessary as all document numbers assigned automatically will appear on the F-91 report IAW appendix E-091 P.

2. M if Condition Code of the materiel has been changed to H (for property disposal).

3. Blank if neither Z not M is required.

(2) Forward annotated Inspection Test Cards, DIC ZCO/ZC9, to ODS for processing. NOTE: Cards changing the Condition Code of shelf-life items will be forwarded within the last 15 days of the inspection month.

(3) Process violations created by improper reentry data on the Inspection Test Card IAW appendices F-85 and E-116 V.

b. ODS will process Inspection Test Cards, DLA Form 540, IAW appendix D-39 to include:

(1) Updating of the Locator Basic and Subrecord File.

(2) Preparation and forwarding of Violation Printout, as outlined in appendix F-85.

(3) Transceiving of DAC adjustments to the DSC on all Condition Code changes.

(4) Preparation and forwarding of DD Form 1225 Control Listing, as outlined in appendix F-91 when Management Code M or Z appears on the input ZCO, Inspection Test Card.

(5) Preparation and forwarding of a duplicate ZCO, Inspection Test Card, reflecting the new Condition Code when items are placed in the Classification Suspense File. (See appendix D-39). Reentry of this duplicate ZCO card will clear the suspense when the true condition of the item is determined (see appendix D-63).

c. Adjustment Document Numbers:

(1) DAC, adjustment action document numbers resulting from inspection will be automatically assigned by the computer (see appendix D-39).

(2) The document number assigned when items are placed in the Classification Suspense File will be perpetuated by the computer and assigned to subsequent adjustment actions when the items are removed from Classification Suspense. An alpha suffix will be assigned for each partial adjustment action.

(3) A block of document numbers for each DSC will be assigned to Data Systems for computer use IAW Table 30, appendix B-66. NOTE: Document numbers assigned to DIC ZC9 Condition Code downgrades will be established IAW instructions in appendix D-39 and will not be issued from Table 30. Once established, this block of numbers remains constant in the computer for assignment to mechanically generated Materiel Adjustment Cards. When document number range has been exhausted for the day, the computer will return the ZCO card to internal input file for next day processing.

370404 - RECORDS AND REPORTS

a. Inspection Schedules. The annotated copy of the inspection schedule will be retained by the Stock Readiness Branch as a supporting record to verify accomplishment of shelf-life inspection for a period of two years. The location survey schedule will be retained for a period of two years to verify accomplishment of nonshelf-life items inspections.

b. DD Form 1222. Suspense copy will be retained by the Stock Readiness Branch as a control copy until results of such tests are received and the Computer Item Locator File has been updated accordingly. Completed DD Form 1222 will be attached to and retained with corresponding DD Form 1225, until the basic document is disposed of under current records disposition procedures. See appendices C-84 and E-033 P.

c. DD Form 1225.

(1) This report will be prepared and submitted in three copies to the applicable DSC, by mail, when surveillance inspection results in materiel being reclassified to Condition Code F, G, or L. The transceiving of other changes by a DD Form 1487, Materiel Adjustment Document, will suffice unless otherwise specifically requested by the DSC. When materiel condition transfers are to be supported by a Storage Quality Control Report, Management Code Z will be entered in position 72 of the DD Form 1487 transceived to the DSC.

(2) Suspense copies of the DD Form 1225 will be retained in file until the next scheduled inspection of the item concerned is completed and then will be disposed of IAW current records disposition procedures. See appendices B-116, C-54, E-091 P, and F-91.

d. Late or delinquent inspection actions will be reflected on the appendix F-20, Inspection Schedule of Shelf-Life Items, and identified as to the type of Inspection Test Card (DIC ZC0/ZC9) required to complete the surveillance action IAW appendix E-019 P.

e. Classification Supspense Report (appendix F-22). This is a computer output report to be used as a means of management review and followup for those items coded as Condition Codes J, K, and L. Followup action will be taken as prescribed in paragraph 370202c.

SECTION V - NONSHELF-LIFE ITEMS

370501 - INSPECTION PROCEDURES

a. Nonshelf-life items are routinely examined as part of the Location Survey Process described in chapter 62. When this process indicates that inspection by a qualified inspector is required for condition determination, this will be indicated by the appropriate Discrepancy Code entered in Location Survey Card, which will result in production of the F-151, Report of Location Survey Management Actions, indicating the need for inspection.

b. Inspection schedules for nonshelf-life items containing a next inspection date are established by appendices F-20, part 2 and D-2. This listing identifies the nonshelf-life items requiring periodic inspections and provides a schedule by Commodity Manager and Warehouse In Location sequence. The need for inspections will be performed as outlined for shelf-life items in section IV.

370502 - ADJUSTMENTS

Any adjustment for nonshelf-life items which the process described in paragraph 370501 reveals the necessity for, will be performed as outlined for shelf-life items in paragraph 370403.

SECTION VI - SURVEILLANCE WORKLOAD PLANNING AND FORECASTING

370601 - WORKLOAD PLANNING

The computer listings (reports) as established by the F appendices will be utilized for reviewing, planning, scheduling, and controlling surveillance inspection and operational testing on a monthly basis. These reports and an explanation of each are contained in paragraph 370301.

CHAPTER 71

MOWASP CENTRAL DATA BANK

TABLE OF CONTENTS

		PAGE
SECTION I	GENERAL

371301	Central Data Bank Data Elements	III-1-71-2
371302	Input-Output Transactions	III-1-71-3
371303	Miscellaneous	III-1-71-5

CHAPTER 71

MOWASP CENTRAL DATA BANK

SECTION I - GENERAL

371101 - PURPOSE, SCOPE AND RESPONSIBILITIES

This chapter prescribes policies, responsibilities, and procedures for maintenance of the MOWASP Central Data Bank and the methods of adding, changing, deleting, and inquiring items contained in the file.

a. DLA depots are responsible for providing NSN data elements to the Central Data Bank within FSCs assigned.

b. Defense Supply Centers are responsible for furnishing Storage Item Changes to the Data Bank at least 30 days prior to the effective date.

c. The Central Data Bank Manager is responsible for:

(1) Recording and maintaining item data for each DLA managed item of supply stocked at a defense depot.

(2) Delegating data development and data maintenance responsibility to the Prime Depot through FSC assignment.

(3) Maintaining existing item records, adding new items when needed and resolving data conflicts.

(4) Establishing and maintaining a Storage Item Change Card master suspense file in conjunction with the Central Data Bank.

371102 - POLICY

a. Once established in the MOWASP Central Data Bank, an item will not be deleted unless the NIIN is determined to be invalid, becomes a deleted item and all users withdraw, or is transferred to a non DLA manager. Replaced items will be retained for one year last inquiry and all users withdraw.

b. Full item data will be furnished for Inquiry Response, Depot Maintenance, and Data Deficiency Notice (CBC) Transactions.

c. Changes affecting NSN or mandatory data fields from any authorized source, except Storage Item Changes, are automatically provided to the registered users. Each defense depot that stores an item will be recorded as a user. SIC changes provided by the DSCs will be passed to the user depot 15 days prior to the effective date of the change and will be concurrently updated at the depots and Central Data Bank on the effective date.

d. The Central Data Bank will be updated at least twice weekly and on the first of each month.

SECTION II - BACKGROUND

371201 - BACKGROUND

The Central Data Bank has been established in DLA to provide a central library of DLA National Stock Numbers and their related basic data elements. This bank is available for automatic inquiry and replies that update the defense depots locator files. It is available to other defense activities upon application to the Central Data Bank manager. Prime DLA depots research and provide missing data elements upon demand from the Data Bank. Automatic updates are provided by the Prime Depot to the Data Bank when depot locator files are updated.

SECTION III - FILES - INPUT-OUTPUT DOCUMENTATION

371301 - CENTRAL DATA BANK DATA ELEMENTS

The following data elements and control fields are maintained in the Central Data Bank:

*National Stock Number (13)
*Unit of Issue (2)
Item Name (9)
*National Motor Freight Classification (6)
*Freight Rating (Less Truckload)(1)
Hazardous Storage Compatibility Code (2)
MTMC Confirmation (1)
*Physical Security Code (1)
National Motor Freight Classification Suffix (1)
Deleted Item/Replace Code (1)
Demilitarization Code (1)
*Water Commodity Code (5)
*Air Commodity Code (2)
*Air Cargo Dimension Code (1)
*Unit of Issue Weight (6)
*Unit of Issue Cube (6)
*Shelf-Life Code (1)
Prime Depot Designator (1)
*Inventory Category Code (1)
Medical Exception Indicator (1)
*Special Requirement Code (1)
Item Manager Code (1)
Inquiry Count (2)
Last Inquiry Date (5)
Blank Field Count (2)
Status Code (1)
Last Update Date (5)
Registered User Indicators (7)

NOTE 1: All data elements indicated by * are mandatory and the lack of any of these data elements will generate a Central Data Bank Inquiry to the Prime Depot, requesting the missing data.

NOTE 2: Item Manager and Prime Depot Codes are established through a Data Bank Table cross-referencing FSC to DSC and defense depot except for Medical Items managed by Medical which are outside the FSCs assigned to Medical. These individual NSNs are flagged in the Data Bank as exceptions. Depots are assigned the responsibility for research of data elements through assignment of Federal Classes of Supply (FSC) as outlined in appendix A-67.

NOTE 3: The Inventory Category Code (ICC) is considered a mandatory data element; however, if it is missing, the Data Bank will automatically create an ICC of 0 for that record and the 0 will be maintained until changed by the Item Manager or Prime Depot. This data element will never be missing from the Central Data Bank and no Central Data Bank Inquiry will be generated by an ICC.

371302 - INPUT-OUTPUT TRANSACTIONS

a. MOWASP DATA BANK CHANGE NOTICE

This notice (DIC CBC, appendix B-137) is automatically prepared to provide data from the Central Data Bank to requester or user; it is also used to request Prime Depot to furnish missing data in the bank. Action Codes shown in appendix A-42 will reflect action required.

b. MOWASP DATA BANK INQUIRY NOTICE

This notice (DIC CBE, appendix B-138) is automatically prepared by the MOWASP system to inquire the Central Data Bank for missing data elements. Action Codes shown in appendix A-42 will reflect the action required. When a CBE action is rejected the RICs are reversed and the Violation Reason Code will appear in pos. 21-22. Card may be prepared by other DLA and DoD users authorized to send inquiries to the Data Bank.

c. MOWASP DATA BANK DELETION NOTICE

This notice (DIC CBD with Action Code G, appendix B-139) is automatically prepared by the MOWASP System when a basic record is dropped from the locator file to notify the Central Data Bank to delete the reporting depot as a user of the NSN. This action may also cause the NSN record to be dropped from the Central Data Bank if all user registrations have been removed and the item has been flagged as "deleted". "Replace" items will be carried in the Data Bank for one year after all users withdraw.

d. MOWASP DATA BANK TRANSACTION NOTICE

This notice (DIC CBB, appendix B-136) is automatically prepared by the MOWASP System (with or without a demand from the Data Bank) to provide initial adds or changes to data elements for an NSN for which the depot has prime maintenance responsibility. Action Codes in appendix A-42 are utilized to reflect action required.

e. PRIME DEPOT DATA BANK CHANGE

This notice (DIC CCC, appendix B-113) is automatically prepared by the MOWASP System to provide data to the Prime Depot from a user depot to reflect changes made to the Locator File at the user depot. Card will reflect on the Entry/Exit Exception List Report (F-113) at the Prime Depot for updating of the Data Bank. When the Prime Depot does not agree with the changed data element and does not take action to update his locator file (which would automatically update the Central Data Bank), it is mandatory that the CCC Card be returned to the initiating depot with a statement justifying the negative action by mail. This action will be taken as soon as possible and should not exceed five working days at the Prime Depot.

f. DAAS INQUIRY NOTICE

This notice (DIC QUE, appendix B-140) is automatically prepared by the Central Data Bank and routed via AUTODIN to the Defense Automatic Addressing System (DAAS) to validate the NIIN and identify the managing Defense Supply Center or the service manager when an inquiry is received for an item that is not in the Central Data Bank. If the Federal Supply Class (FSC) that is furnished is included in the DLA class table (appendix A-67) the RIC of the Item Data Bank, SAB, is entered so the QUR will be returned to the Central Data Bank. A basic record is created in the data bank and coded to indicate that the item has been submitted to DAAS for validation. If the FSC is not in appendix A-67, The RIC of the submitter from the CBE is entered in the QUE as the QUR response will be returned directly to the inquirer. QUR responses that fail validation or are recorded as being managed by other than DLA cause the basic record to be dropped from the Central Data Bank and a replica of the rejected CBE inquiry to be generated back to the requester with a QA Violation Reason Code in positions 21-22 and the Non-DLA sources of supply in positions 23-68. Defense depots may prepare QUE inquiries directly to DAAS if desired.

g. DAAS INQUIRY REPLY NOTICE

This notice (DIC QUR, appendix B-141) is generated by the DAAS in response to a QUE inquiry. A QUR transaction that confirms DLA management and validates the FSC assignment will cause the basic record to be coded as valid and a data request, CBC with Action Code D, to be generated to the Prime Depot. When a QUR is entered into the depot system for processing, it is converted to a CBE with Violation Reason Code QA and output on the Violation Report F-85.

h. CENTRAL DATA BANK MASTER RECORD

This report (appendix F-76) contains records that require research of missing data elements. It is produced as required upon the Prime Depots written request to the Manager of the Central Data Bank.

371303 - MISCELLANEOUS

a. FREIGHT CLASSIFICATION GUIDE NOTICE

This notice is provided automatically by DLSC to the Central Data Bank to update the following elements:

National Motor Freight Classification (NMFC)
Freight Rating (Less Truckload)
Water Commodity Code
Air Cargo Dimension Code
Air Commodity Code

b. STORAGE ITEM CHANGE NOTICES

This notice (DIC CMC, CMD, CML, CMM, CMN, and CMR, appendix B-23) is provided by the managing DSC to the Central Data Bank where it is placed in a master SIC Suspense File until 15 days prior to the effective date of change. SIC Action may change or add the NSN, Unit of Issue, Physical Security Code, Shelf-Life Code, Item Manager or Delete Indicator. The SIC transactions are provided to registered user depots. The depot locator and data bank files are updated concurrently on the effective date.

c. DATA BANK REJECT TRANSACTIONS

Current MOWASP data bank update procedures provide for rejection of CBB/A (add new item to the data bank) transactions when the NIIN in the transaction is already in the bank and associated with an FSC other than the one in the CBB/A. A reject reason code is centered in positions 21-22 and the document is routed back to the submitter. When the FSC in the data bank is managed by the submitting DSC, the Reject Reason Code PU applies. When the FSC in the data bank is managed by a different DSC, code MK is entered in positions 21-22. CMN transactions (add new item) received from the DSCs are converted to CBB/A transactions (appendix B-136) for processing through the Data Bank update run; therefore, rejected CMN transactions from the DSCs are returned as rejected CBB/A transactions.

d. INVENTORY CATEGORY NOTICE

(1) This notice (DIC CK6, appendix B-130) will be provided the Central Data Bank by the managing DSCs as of 1 July each year to update the Data Bank with the current inventory category codes. After a mechanical match is completed, the changed category codes will be provided the user depots.

(2) Inventory Category Codes (appendix A-54) are assigned to DLA managed items only. Locally developed codes will be applied to Non-DLA managed items. All update of Inventory Category Codes for DLA managed items must be accomplished by processing Central Data Bank Inquiry, DIC CBE, with applicable Action Code (appendix A-42).

CHAPTER 72

RECONCILIATION OF DEPOT AND ICP BALANCE AND TRANSACTION RECORDS

CHAPTER 72

RECONCILIATION OF DEPOT AND ICP BALANCE AND TRANSACTION RECORDS

SECTION I - GENERAL

372101 - PURPOSE

This chapter prescribes policies, responsibilities, and procedures for reconciliation of depot and ICP balance/transaction records at distribution activities.

372102 - SCOPE

This chapter is applicable to the DS/T and data processing elements of defense depots.

372103 - BACKGROUND

a. The objective of maintaining balance/transaction records at distribution depots is to validate the accuracy of depot/DSC systems, identify deficiencies and initiate corrective measures to obtain desired accuracy and confidence that records and assets agree.

b. The depot balance/transaction system highlights system deficiencies and enables distribution depots to identify factual inventory requirements, conduct meaningful report of survey analysis and reduce denials.

372104 - POLICY

a. The distribution depot will maintain a balance for stock numbers located at their depot and a record of each transaction effecting that balance. Transactions initiated or received will automatically be processed to the transaction record. DSC actions that adjust depot balances (DICs D8_ and D9_) will be transceived to depots the same day they process the adjustment action. D8A or D9A adjustments as a result of a Type of Physical Inventory E or F will be processed to the depot transaction record as a memo entry and will not adjust the balance. All adjustments from Type of Physical Inventory Codes other than E or F will make the proper adjustment.

b. Monthly, the DSCs will provide closing balances, transactions and violation records they have processed during the period for use by depots in balance/transaction reconciliation. From this process each difference between the two records is identified on F-146 report. These differences are researched to determine cause and action necessary to obtain balance/asset accuracy as outlined by appendix E-184 P.

c. Daily, locator updates which will affect the DB&TR balance records will be processed to the Depot Balance/Transaction Register (DB&TR) subsystem. A reconciliation will be accomplished. Disagreements between the depot locator and DE&TR will result in the automatic creation of a DIC ZJA card. Last locator deletes may result in MRO denials. When the last location for a NSN

best copy available

and condition is deleted and there is a positive DB&TR balance, MROs in the bank matching the NSN and condition of the last delete will be denied. Following manual research process as outlined in appendix E-024 P, the ZBJ card may be input to correct the records.

372105 - RESPONSIBILITIES

DS/T will:

a. Develop and establish training programs in order to ensure the proper training of inventory personnel.

b. Establish necessary procedures to ensure continued controlled processing of depot balance/transaction system and reconciliation of unmatched depot/ICP balance/transactions.

c. Maintain the depot balance/transaction system and initiate corrective actions in a timely manner on deficiencies identified by the system.

d. Coordinate corrective action of discrepancies identified on monthly reconciliation with DSCs. Initiate inventories if corrective action cannot be taken to bring balances into agreement.

e. Prepare and submit required reports to HQ DLA.

SECTION II - BALANCE/TRANSACTION RECONCILIATION

372201 - DEPOT BALANCE/TRANSACTION PROCESS

The initial distribution depot balances will be established by utilizing DSC's national inventory record on-hand balances. Depots will process transactions initiated or received automatically against on-hand balances established from DSC NIR balance. Depot balances will be maintained by depots in order that monthly reconciliation can be accomplished.

372202 - DEPOT/DSC MONTHLY RECONCILIATION

a. DSCs will provide a monthly DSC/Depot Reconciliation Tape, appendix B-159, Monthly Transaction File Tape, appendix B-110, and Monthly Violation Control File Tape, appendix B-111.

b. The cutoff dates for these tapes at DSCs will be at the close of business each month and will be provided to distribution depots approximately the 10th of the month following the monthend cutoff.

c. The depot cutoff balance and transaction date is established by reviewing DSC's transactions and determining last date of activity. This date is then used for cutoff period.

d. Infloat transactions received by depots after cutoff date, or assumed not received by DSC's in time to process before cutoff date, are considered in reconciliation.

e. If monthly reconciliation indicates depot/DSC balances do not agree, a match of transaction is made in order that reason for out of balance can be identified.

f. Depots will be provided monthly reconciliation unmatched balance transaction report F-146, which identifies the quantitative balance difference and whether the error is depot or DSC initiated. Depot errors are corrected locally whereas DSCs are provided detailed information on errors and action to obtain balance asset accuracy as outlined by appendix E-185 P.

372203 - RECONCILIATION OF DEPOT/DSC DICOMSS RECEIPT, MRO TRANSACTIONS

On a daily basis DICOMSS receipts which have processed at the depot will be matched with their resulting DICOMSS MROs and/or DIC D8N and D9N (see NOTE). If the balance for the record has not gone to zero for that NSN, condition and cycle code in four days, an F-145, part 6, will be produced for research to determine why a discrepancy exists. The production of the F-145, part 6, will aid in the control of residual DICOMSS stock.

NOTE: DICs D8N/D9N are generated as a result of receiving and processing DICOMSS Residual Materiel Card (DIC CRS) and/or a Reply to Cancellation Request Answer Card (DIC AG6, Status Code BQ). In all cases, the resulting D9N (from) will decrease the on-hand balance for the current cycle code and the D8N (to) will increase the on-hand balance in Cycle Code I by the quantity in the transaction.

372204 - RECONCILIATION OF LOCATOR RECORDS WITH NON-DLA ICP RECORDS

a. DS/T will prepare Locator Reconciliation Request Card(s) (DIC ZC5), utilizing format outlined in appendix B-83 to initiate reconciliation. This card will be input to the computer for generating Locator Reconciliation Cards, DIC CKA, appendix B-27, for GSA ICPs and/or Location Audit Reconciliation Request Card DZH, appendix B-12, for Service ICPs and processing IAW appendix D-11.

b. After GSA effects comparison of Locator Reconciliation Cards (CKAs) to balance records, the depot will receive Locator Reconciliation Exception Cards for processing IAW appendix D-13, where NSN or UI discrepancies exist. These cards will contain DIC CKB, CKC or CKD as appropriate. (See appendix B-28). Where balance discrepancies exist, special inventory requests will be received with DIC DJA (see appendix B-26) and containing Management Code A indicating that no locator card was furnished during reconciliation or Management Code B indicating that a locator card was furnished, but there is no recorded balance. GSA forwards the Locator Reconciliation Exception Cards to distribution activities by transceiver.

c. Locator Reconciliation Exception Cards, DICs CKB, CKC, and CKD (appendix B-28), received by the depot will mechanically produce a locator Reconciliation Exception Card listing (appendix F-124) furnishing information to DS/T to be used for remarking of stocks or other corrective action. CKBs and CKCs will be cause for remarking of stock. CKDs will require physical search of warehouse location to determine NSN.

d. DS/T will determine, in coordination with GSA, when reconciliation is completed and will prepare a Location Reconciliation Completion Card, DIC ZBZ, appendix B-83, for computer input. This input will be processed IAW appendix D-101, which will create a Locator Reconciliation Summary Report, appendix F-6, and kill suspense of CKAs retained in the computer.

e. After Service ICPs effect comparison of Location Audit Reconciliation Request Cards (DIC DZH) to balance records, the distribution depot will receive Transaction Reject Cards (DIC DZG) and/or Storage Item Correction Cards (DIC DZB). Images of these documents will printout on the Entry/Exit Exception Listing (appendix F-113) for manual review and processing IAW appendix E-143 P.

CHAPTER 74

MANAGEMENT INFORMATION AND REPORTS

SECTION I - GENERAL

374101 - PURPOSE

This chapter provides basic guidelines for the Management Information System (MIS) reports, the adjustment procedure for computer accumulated statistics, and the method for development of local management statistical data.

374102 - SCOPE

Guidelines herein concern statistical data developed for on or off post reports of storage activities located in defense depots or Defense Supply Centers (DSCs). Reports covered herein are identified in paragraph 374103.

374103 - REFERENCES

a. Management Information System Glossary, DLAH 7730.2 dated January 1982.

(1) Part I - RCS DLA(M)26(C)MIN.

(2) Part II - RCS DLA(M)232(O)MIN.

b. Situation Report During Emergency Operation Periods, RCS DLA(AR)377(L)MIN, prescribed by DLAR 3135.2

c. DLAR 4140.44, Distribution Depot Operations and Performance Reporting.

374104 - BACKGROUND

The Management data file is a file composed of computer accumulated statistics required for local or off post management review or reports.

(1) Local management reports, listings, or statistics are contained in various outputs prescribed in other functional chapters.

(2) Appendix F-9, Management Information System Feeder Data, provides statistics gathered as a result of accomplished computer programs described in other chapters or as a result of entries on file by input of appendix B-135, Management Information System Card, DIC ZUM.

(3) Until such time as total off post reports can be prepared as a result of normal file maintenance actions for given functions or reports, manual records will supplement the data reflected of appendix F-9.

(4) Space reporting procedures are provided in chapter 63.

374105 - RESPONSIBILITIES

a. The Directorate of Storage and Transportation will utilize management data developed by the computer and/or supplemented by manual records to satisfy operational management requirements within the Directorate and provide specified MIS data to the Office of Comptroller as required by HQ DLA or the DSCs.

b. The Office of the Comptroller will maintain reports control for off post reports and will finalize statistical data to conform with MIS requirements, reference paragraph 374103.

c. The Office of Data Systems will provide, as scheduled, reports of those functions mechanized under individual chapter guidelines and MIS requirements. Listings for management workload controls or processes will be provided as scheduled for the applicable operations.

SECTION II - MANAGEMENT (MIS) REPORTS

374201 - COLLECTION OF STATISTICAL DATA

Until such time as MIS reports are completely mechanized, data will be accumulated during the report period as follows:

a. Manual controls, with appropriate statistical extractions, will be accomplished by the Directorate responsible for the accomplishment of the MIS element. Data gathering controls will be established for data elements required by the reports referenced in paragraph 374103 above, but not included in computer output.

b. Computer statistical accumulation will be accomplished for those elements reflected in appendix A-83 and are to be applied to MIS element reporting as described in appendices E-036 P, and E-114 P.

(1) Normal accumulation is performed within the computer in conjunction with functional computer runs processed as described in appropriate chapters.

(2) Adjustments to this data may be made within the computer by processing Management Information System Card, DIC ZUM, as described in appendix B-135 and the procedure for processing is described in appendix E-135 P.

(3) Data for special reports may be accumulated through preparation and entry of the Management Information System Card, DIC ZUM, appendix B-135.

c. Computer rejections reflected on appendix F-85, made as a result of attempting to process invalid appendix B-135 cards, may be corrected as described by appendix E-135 V.

374202 - COMPLETION OF MIS REPORTS

a. Appendix F-9 is produced daily, showing statistics accumulated to date within the report period(s). This report, in conjunction with manually developed statistics, will be used as the basis for completion of reports. MIS data are coded, keypunched, and transceived to HQ DLA in accordance with the Office categories of elements included in the F-9 Report. These are:

(1) Part 1 - Feeder elements for the Distribution Depot Operations and Performance Report.

(2) Part 2 - Feeder elements for the Management Data Report.

b. Appendix B-95 cards are produced at monthend for F-9 Data Elements and automatically transceived to HQ DLA.

c. A narrative analysis of the RCS DLA(M)232(O)MIN report will be submitted separately to HQ DLA and the DSCs. In order to ensure that information is readily available to HQ DLA relative to significant trends or variations in statistical data and special conditions or problems bearing on data submitted, each reporting depot will submit a narrative analysis covering each report period. This should provide a brief discussion of those elements of statistical data which require further explanation for complete understanding and review by HQ DLA. Except as may be required for clarity or emphasis, the narrative analysis should not repeat statistical data already submitted in punched card format. Particular emphasis should be placed on existing or potential problems and on those statistics bearing on depot supply effectiveness.

d. Recurring report, Inventory Control Effectiveness, RCS DD-M(Q)935, prescribed by DLAM 4140.2 is prepared in accordance with chapter 7, reference appendix C-67.

374203 - REFERENCES

a. Appendix A-82, Violation Reason Codes.

b. Appendix A-83, MIS Element Numbers.

c. Appendix B-95, Management Information System Report Card.

d. Appendix B-123, MRO History Manual Control Card.

e. Appendix B-135, Management Information System Card.

f. Appendix D-1, MRO History Manual control Card.

g. Appendix D-80, Management Information System Card.

h. Appendix D-102, Management Information System Report Data.

i. Appendix E-036 P, Management Data Report, RCS DLA(M)232(O)MIN.

j. Appendix E-114 P, Management Data Report, RCS DLA(M)26(C)MIN.

k. Appendix E-135 P, Management Information System Card, ZUM, B-135.

l. Appendix E-135 V, Management Information System Card Violations, ZUM, B-135.

m. Appendix F-9, Management Information System Feeder Data.

SECTION III - LOCAL MANAGEMENT REPORTS

374301 - GENERAL

Management of a storage activity includes a requirement for an immediate organizational knowledge of workload inprocess as well as trends developing which may affect operations within the near future. Based upon this knowledge planning, coordination, and control can be effectively performed. Insofar as possible, mechanized aid will be provided to operational elements performing storage activities. Appendix B-135 entries may be used for local command studies.

374302 - STATUS LISTINGS

Computer listings, described and processed in accordance with other chapter procedures, provide status and planning data to management personnel.

374303 - DIRECT COMMISSARY SUPPORT SYSTEM (DICOMSS)

Unique DICOMSS MIS reports and listings are delineated in chapter 20, section VII.

SECTION IV - MANAGEMENT INFORMATION RETRIEVAL SYSTEMS

374401 - GENERAL

DLA Management Information Retrieval Systems (MIRS) are comprised of a series of prewritten computer programs which can be readily used to obtain specific data from computerized files. These techiques are convenient for one-time data retrievals but they are costly vis-a-vis computer run time. Careful judgement must be exercised to ensure a MIRS is not being used when a SAIS/UAIS is more appropriate.

374402 - OBJECTIVES

a. Provide the user with a tool to enable the retrieval of selected information from computer files in a simple, inexpensive, and expeditious manner.

b. Eliminate the need for the design and development of a new computer program each time selected information must be retrieved from computerized files.

c. Provide an easily understood, universally used, and nontechnical method of data retrieval for the user.

d. Provide a simple and standard method for performing mathematical computations, for requesting routine statistics and for generating desired reports from machine readable data.

374403 - TECHNIQUES

a. The Automated Uniform Data Inquiry Technique (AUDIT) integrates the information provided by users via control cards into a series of prewritten computer programs. The AUDIT Retrieval System can be used to retrieve and manipulate data arranged on magnetic tape or disk. Principal features of AUDIT are: file search and data retrieval, selection of samples and sampling size, execution of mathematical computations, statistical summarization and reporting, and report printing.

b. The Standard Information Retrieval Capability for Users System (SIRCUS) is a programing language rather than a control card oriented system. This allows tremendous flexibility and capability in producing the desired results. SIRCUS has incorporated some features of COBOL, FORTRAN IV and PL/I programing languages. SIRCUS capabilities include: arraying and indexing, columnar data positioning, storing alpha or numeric data in separate accumulators, multiple report generation, and sorting. SIRCUS may also access multiple files and, in some cases, merge data from one file to another.

374404 - RETRIEVAL REQUEST PROCEDURES

The Office of Data Systems at each PLFA has been entrusted with the responsibility of determining the best way to satisfy a data retrieval request, i.e., use of AUDIT, SIRCUS or the development of a one-time computer program. Local procedures will be established to communicate the originator's requirement to ODS. Requests for recurrent retrievals/reports and ADP system modifications/improvements will continue to be processed as outlined in DLAR 4730.3. Unless locally delegated to the contrary, ODS will determine the feasibility of using a MIRS to satisfy the request, program or prepare control cards, insure other program priorities are not impaired, and report MIRS operating deficiencies to DSAC.

CHAPTER 80

FREIGHT CLASSIFICATION/DESCRIPTION DATA

SECTION I - GENERAL

380101 - PURPOSE

This chapter outlines responsibilities and procedures for the development, maintenance, and promulgation of freight classification/description/specific item data for use by defense depots and collocated storage activities at DSCs.

3801052 - SCOPE

Data developed under criteria provided in this chapter are to be used in conjunction with processes prescribed in other chapters related to MRO processing. Freight classification/description data, as used herein, apply to DIDS Segment G data elements maintained in the MOWASP Data Bank and Defense Depot/Storage activity Locator Records, data provided defense depot/storage activities by the DLA Freight Description Manager (Defense Depot Ogden, Utah), and to freight description data developed locally. These data elements will be discussed in detail later in this chapter.

380103 - BACKGROUND

A specific, appropriate description is required to assure compliance with mode and tariff requirements, to assure accurate assessment of transportation charges, and to assure compliance with guidelines promulgated in the Code of Federal Regulations and other regulations governing the transportation of hazardous materiels.

SECTION II - PROCEDURES

380201 - FREIGHT DESCRIPTION DATA (DEPOT LOCATOR RECORD)

The responsibility for the development of freight description - National Stock Number (NSN) relationships is assigned to the Military Traffic Management Command (MTMC). MTMC-developed freight description data is associated with the appropriate NSN and transmitted through the Defense Integrated Data System (DIDS) to the MOWASP Central Data Bank, and from that point to defense depot/storage activity users. All transmissions are automatic with the data input through the DIDS overriding/displacing data already in the depot locator record without prior manual review. The following data elements, associated with a specific NSN, are transmitted via the DIDS to the MOWASP Central Data Bank and then via that Bank to registered users:

(1) National Motor Freight Classification Code (6).

(2) LTL Motor Rating Code (1).

(3) Water Commodity Code (3).

(4) Type Cargo Code (1).

(5) Exception Handling Code (1).

(6) Air Dimension Code (1).

(7) Air Commodity Code (1).

380202 - FREIGHT DESCRIPTION FILE (FDF)

The above NSN-related data developed by MTMC and made known through the DIDS provides the required NSN-NMFC/MILSTAMP data relationship; it does not, however, provide the narrative freight classification description or specific item hazardous data required for the proper preparation of Bills of Lading (B/L). To preclude the requirement for development of this additional descriptive data at each defense depot/storage activity, DDOU has been designated as the DLA Freight Description Manager (FDM) with the responsibility of developing an appropriate FDF to include a narrative freight description, specific item hazardous data, and other pertinent freight classification data for each NMFC reference in DLA Depot Locator Records. The data elements defined in appendices B-205 and E-229 P have been developed, maintained and provided to DLA depot/storage activities having on-line FDFs (MOFAST) by DDOU in connection with each NMFC/NIIN reference. All NMFC/NIIN add, change and delete transactions will be accomplished by the FDM as supplements to the NMFC or changes to HMIS are received or in response to a request from a user. NMFC/NIIN add, change and delete transaction requests from a user to the FDM are to be accomplished only by locally authorized Freight Classification Specialists.

a. NMFC/LTL Record Sequence Number. The Record Sequence Number is used when it is necessary to accommodate NMFCs with more than one description per LTL rating or when the NMFC LTL rating is contingent on container weight per cubic foot. The selection of the correct description/rating is dependent on specific characteristics of the materiel to be shipped, the type of pack, and cargo configuration. Record Sequence Numbers will be assigned IAW record sequence instructions contained in appendix E-229 P. It is essential that the NMFC Suffix Code referenced in the depot locator record continue to be developed in the same sequential pattern as the sub-code reference in the NMFC publication to assure a proper FDF match when required.

b. National Item Identification Number (NIIN). The NIIN is used to reference specific NSNs to detailed descriptions when such detail is required to supplement the standard NMFC description (to include, but not be limited to hazardous item description).

c. NIIN Variable Sequence Number. The NIIN Variable Sequence Number is a supplementary two position code that provides MOFAST depots a means to establish and maintain more than one description per NIIN. All descriptions are maintained in an on-line environment providing user facility to select or establish the description applicable to local requirements. An additional DD 1348-1 will be produced with all available NIIN Mode Descriptions printed for the MRO NIIN when the Transaction Type Cargo Code or Hazardous Compatibility Code that has been locally established on MOWASP Table 4.

d. Use Flag. The NIIN Use Flag update is intended to provide a facility to move the NIIN Use Flag from one variable description to another in response to depletion of one's description application in favor of another.

e. Uniform Freight Classification (UFC) 6-Position Reference and 2-Position Suffix Code. Provided it will be in sequence with appropriate descriptions Code is in the current Uniform Freight Classification publication (No UFC reference is maintained in the Depot Locator Record).

f. NIIN Scan. When this field is coded, the program will seek a specific NIIN description. This data element will be provided by the FDM if the NSN involved is maintained in the DDOU Locator Record; however, basically the development, maintenance and entry of this data is a local depot/storage activity responsibility.

g. Less Truck Load Code. See appendix A-49.

h. Density Amount. For use with density flagged items.

i. Value Clause Amount. For use in connection with value flagged items.

380203 - REVISING/MAINTAINING FREIGHT DESCRIPTION DATA

a. Procedures for supplementing/revising MTMC developed DIDS data should be established IAW the following criteria:

(1) When any of the data elements indicated in paragraph 380201 (1) through (7) are missing from the depot/storage activity Locator Record, the defense depot/storage activity having primary responsibility for the NSN involved (appendix A-67) will be responsible for submitting the required data element(s) to the MOWASP Central Data Bank, IAW chapter 71 of this manual. When the requirement for the missing data element(s) is first encountered by a user (as opposed to the prime) depot, the user depot will independently develop the required data and submit it to the prime depot for validation. When missing data elements have been developed, the following subsequent actions will be initiated:

(a) Input data element(s) into locator files (DIC ZBC, appendix B-73).

(b) User (as opposed to prime) depots submit data to the prime depot for validation/revision and subsequent input into the MOWASP Central Data Bank (DIC ZBC/CCC, appendix B-113).

(c) Prime depots submit developed data (including data received from user depots) to the MOWASP Central Data Bank (DIC ZBC/CBB, appendix B-136).

(2) Defense depot/storage activities will not delete or revise freight classification/description data received into their Locator Records through the MOWASP Central Data Bank; questions relative to the accuracy of such data will be directed to the DSCs. If the DSCs determines/agrees that a question of accuracy exists, it will submit the data in question - with appropriate support detail - to MTMC-INNC for review, and if MTMC concurs, revision to the DIDS Segment G Record. A copy of such submission (including supporting detail) will be provided DLA-OT. When obvious errors in MTMC developed data are noted, MTMC-INNC will be contacted by telephone, and if MTMC concurs that an error has been made, local records will be revised and the revision confirmed to MTMCINNC by letter (with a copy to DLA-OT).

(3) Depot/storage activities are responsible for assuring that proper NMFC Suffix Codes are indicated in their respective Locator Records (appendix B-73). The Suffix Code field should always be filled; "X" will be indicated when no Suffix Code applies.

b. In connection with the MOFAST Freight Description File developed by the DLA-FDM, depot/storage activities will direct any questions relative to the content of this file to the FDM (DDOU-DT).

380204 - LOCATOR RECORD/FREIGHT DESCRIPTION FILE (FDF) RELATIONSHIP

The NMFC reference/Suffix Code in the Locator Record will match the NMFC reference Suffix Code in the NMFC Publication. In an on-line (MOFAST) environment including special NIIN descriptions, density, valuation, and certification, data will be automatically generated for B/L print. In a MOWASP environment the locally developed freight description will print on the SPW. It is imperative that the Suffix Code sequence locally input into the Locator Record is the same sequence pattern as the sub-code reference in the NMFC publication.

380205 - CREATION OF AND ADDITIONS/DELETIONS/INQUIRIES TO THE FREIGHT DESCRIPTION FILE

As outlined above in paragraph 380202, the on-line FDF is centrally developed and maintained by the DLA Freight Description Manager (DDOU), with the exception of locally maintained NMFC-Tariff Exception Descriptions. User installation developed additions and changes to NMFC and Specific NIIN data are transceived via AUTODIN to the Freight Description Manager for edit, who in turn broadcasts such data to all user FDFs when such data are deemed valid. All inquiries, additions, changes, and deletes to the FDF are accomplished in an on-line environment IAW appendices B-205 and E-229 P.

380206 - INPUT OF NMFC SUFFIX CODES TO LOCATOR RECORD

The local depot/storage activity will assure that the correct NMFC Suffix Code is entered into their respective Locator Records IAW paragraph 370203a(3) of this chapter and appendix B-73. Other revisions to freight description data in the locator file will be IAW paragraph 380203 criteria, and will be effected through the MOWASP Central Data Bank in formats prescribed by appendix B-113.

CHAPTER 82

SHIPPING PROCEDURES

SECTION I - GENERAL

382101 - PURPOSE

This chapter prescribes certain standard procedures for freight shipping operations at defense depots and collocated storage activities at DSCs. Because shipping operations supported by MOFAST programs vary significantly from those operating in a pure MOWASP environment, procedures outlined below will be specifically identified as applying to either a MOWASP or a MOFAST depot operation or to both.

382102 - SCOPE

Procedures outlined in this chapter apply to depot/storage point freight shipping operations, and will be used in conjunction with other shipping/transportation related procedures prescribed in various chapters throughout this manual. The procedures outlined herein are considered basic to a depot/storage point shipping operation, but they are not intended to be inclusive. This chapter will not address parcel post or small package carrier shipping procedures.

382103 - REFERENCES

a. DoD 4500.32-R, Military Standard Transportation and Movement Procedures (MILSTAMP).

b. DLAR 4500.3, Military Traffic Management Regulation.

382104 - RESPONSIBILITIES

Responsibility for implementing the procedures outlined herein is dependent upon the organizational structure of the depot/storage site effecting the implementation. When the organization combines the transportation and shipping functions in a single organizational element (i.e., Transportation and Shipping Division), that organizational element will be responsible for implementing all the procedures in this chapter. When, however, the transportation and shipping functions are fragmented into two or more organizational elements, the Director of Storage and Transportation will be responsible for assigning implementation responsibility to the appropriate organization.

SECTION II - PROCEDURES

382201 - OFFER PROCEDURES

a. General

After materiels are picked, packed, assembled in shipment unit configuration and made available to the transportation element, the Shipment Unit (SU)

is formally "offered" to transportation. At this time the depot/storage point processing function is completed and the materiels are available to the transportation element for outloading on carrier vehicles.

b. MOWASP Procedures

In a MOWASP environment the offer process will be accomplished IAW appendix E-101 P. The "Date to Transportation" indicated in the ZBP card will be the date that the SU was physically available for transportation processing.

c. MOFAST Procedures

(1) In a MOFAST environment, the offer process is effected on line via CRT. SUs may be offered at the MOFAST sorter location (appendix E-219 P) or at a non-sorter CRT station (E-221 P). As a part of the MOFAST sorter offer process, packages are mechanically sorted into SU configuration on individual, SU-dedicated sorter rack lines. Data in individual packages are entered by the sorter CRT operator as the package moves past the enter station on the sorter conveyor. After the data are entered, the package moves to the appropriate dedicated SU sorter rack line. When data on the final package are entered at the sorter CRT station, the SU is recorded as offered to the transportation function, and the depot processing function is complete. The completed SU may be released fron the sorter rack line for transport to an assembly area at any time after all packages in the SU line have been processed through the sorter CRT station. At non-sorter CRT locations, all packages comprising a SU must be accumulated before the offer process can be initiated; all packages/pieces in one SU should be processed for offer before processing of packages assigned to another SU can begin.

(2) In some instances, particularly when the MOWASP no-go parcel post option is exercised, it is desirable to consolidate small, individual SUs into a single overpack container. This is permissable under DoD MILSTRIP/MILSTAMP procedures and can be accomplished in MOFAST (appendix E-222 P). The principal requisites of the consolidated pack process are that the status on each individual SU can be reported under the MILSTRIP assigned SU number, and that each SU be associated, for movement purposes, under one master non-MILSTRIP SU number that is, in turn, associated with the single overpack container. (This is accomplished manually in non-MOFAST environment and in that environment it does not involve the offer process.) Appendix E-222 P provides the MOFAST formats necessary to effect these associations.

(3) In MOFAST the offer procedure initiates the printing of a MOFAST Route Slip (appendix F-180) and, if appropriate printing devices are associated with the CRT offer station, the required shipping labels. The Route slip contains essentially all pertinent SU data. In addition, it may indicate the terminal assembly area (Spur Number) to which the SU should be routed and the GBL number to which the SU is assigned; however, the automatic assignment of these two elements may be suppressed. The omission of a "spur number" in the MOFAST Terminal Routing and Carrier Assignment Table (appendix B-184) will suppress the assignment of a terminal assembly area; the use of an XX MOFAST Processing Code (appendix A-100) will suppress the GBL assignment. The suppression of the automatic assignment of these elements will remain a depot

option; however, under normal circumstances the automatic assembly area/GBL assignment feature of MOFAST should be exercised. The Route slip will be affixed to the SU until the SU is positioned in a specific freight terminal assembly location.

382202 - SHIPMENT PLANNING PROCEDURES

a. Both DLAR 4500.3 and chapter 60 of this manual address some of the basic precepts of the shipment planning function. This section will outline in general terms the methods and techniques of this function in a mechanized depot environment.

b. MOWASP Procedures

(1) The basic shipment planning tool in a non-MOFAST depot is the Shipment Planning Worksheet or SPW (appendix F-79). The SPW is produced during each MRO cycle for all freight shipment units and at the depot's option for multiline parcel post shipments. The SPW contains data required for preshipment planning. The depot transportation element is provided an advance copy of the SPW (i.e., a copy prior to picking action). The advance copy of the SPW, used in conjunction with the Transportation Unit Summary Listing (appendix F-39), will:

(a) Facilitate movement planning of materiels having transit privileges.

(b) Support the submission of routing requests to the appropriate Military Traffic Management Command Area Office.

(c) Aid in forecasting of traffic volumes to specific geographic areas/destinations. In addition to the advance SPW copy, the transportation element will be provided an annotated copy of the SPW that reflects the actual content of the SU when it is offered to transportation and available for shipment.

(2) In connection with IPG I and II SUs, air clearance/challenge actions will be initiated (air clearance IAW DoD 4500.32-R; air challenge in connection with DLA sponsored traffic when the weight of the SU exceeds 100 lbs) unless the freight destination is less than 300 miles from the depot, in case surface transport will automatically be used. In this latter instance an immediate effort will be made to associate the SU with like destination SUs being processed for shipment that day. In any case, this IPG I/II traffic will be planned for movement by surface transport no later than the day following the day it was received in the freight terminal. IPG III SUs will be held in the freight terminal and accorded freight consolidation (normally through the association of SPWs having common Destination Cross-Reference (DCR) Codes until such time as shipment to the geographical area involved is scheduled, or shipment must be effected to satisfy UMMIPS timeframes, whichever is earlier. For the purpose of freight consolidation, IPG I and II SUs diverted to surface transport as a result of challenge action will be accorded the same freight consolidation opportunities as IPG III SUs.

(3) In addition to the above, the shipment planning function will:

(a) Determine and assure the satisfaction of shipment special handling requirements.

(b) Assure that all required shipment data, such as freight classification references, weights, cubes, etc., are indicated on the SPW.

(c) Assure that the shipment is planned for the lowest cost mode/carrier commensurate with priority/delivery requirements. Other traffic management responsibilities may be assigned to the depot shipment planning function, or one or more of the responsibilities outlined may be assigned to other transportation elements within the depot. Such assignments will be at the option of local depot management.

c. MOFAST Procedures

(1) In a MOFAST environment, the same shipment planning criteria as outlined above exist; however, the processing techniques are more automated. Normally MOFAST processing does not produce an SPW; however, the program can be modified, if desired, to accommodate special situation SPW requirements when such requirements can be associated with specific storage locations within the depot. In lieu of the SPW, the Transportation Unit Summary Listing (appendix F-39), and/or advance copies of the MROs (DD Form 1348-1) themselves and various CRT inquiries provide data for transit determinations, MTMC routing requests, and workload planning if desired. Air clearance/challenge criteria are the same as addressed in connection with MOWASP procedures. Air clearance action is initiated automatically. If not challanged, ATCMDS are connected after SU offer to transportation in accordance with appendix E-231 P. Air challenge can be effected at any time that it can be ascertained that the 100 lb. weight criterion has been exceeded.

(2) The MOFAST program effects freight consolidation automatically by assigning compatible, equal Destination SUs to the same GBL, unless this process is blocked by the assignment of a MOFAST Processing Code other than SA (appendix A-100) to the SU. In addition, MOFAST automatically routes compatible common Destination SUs to the same assembly area in the freight terminal when the "Spur Number" in the MOFAST Terminal Routing and Carrier Assignment Process (appendix B-184) is properly determined and entered. When it has been determined that the assignment of additional SUs to a GBL should be stopped (normally because the GBL must be prepared and the cargo shipped to satisfy UMMIPS Time Segment requirements), the GBL build will be discontinued through CRT entries prescribed in appendix E-238 P, part 1. The GBL build should be stopped sufficiently in advance of the loading time to permit all SUs in process in the shipping terminal to reach the staging/loading area prior to scheduled loading. At the time of the GBL cut-off a new Spur Number should be assigned and affected Geographical Area Code (appendix B-184) to preclude SUs assigned to a new GBL/carrier from being erroneously intermingled with the previous GBL load.

382203 - TERMINAL PROCEDURES

a. General

After SUs are offered to transportation there is a requirement to process the physical cargo (as opposed to cargo documentation) to the point of outloading on carrier vehicles. This section will address these processing procedures and, to some limited extent, the documentation cargo relationships that exist during this processing.

b. Drayage vs Direct Carrier Pickup

It is not feasible from a workload view, or desirable from an economic view to process all outgoing cargo through the freight terminal. At some level of weight it becomes more practical to have the cargo prepared for shipment and picked up at the warehouse of origin by the commercial carrier than to have it drayed to the freight terminal for processing. The point, in weight, where drayage gives way to carrier pickup is dependent upon a number of factors that will vary from depot to depot and therefore it has been established as a depot option established in MOWASP table and control table 4, appendix B-66, Shipment Unit and Transportation Unit assembly areas. Some of the factors to be considered are:

(1) Carrier charges, (if any) for multiple pickup stops within a single installation.

(2) The distances between various warehouses and the freight terminal.

(3) Cargo staging area available in the warehouses.

(4) Accessibility of warehouse to the mode of transport selected.

(5) Level of workload the freight terminal can economically process.

(6) Capability/availability of depot cargo movement equipment.

Except in very unusual situations, the drayage vs carrier pickup weight point should fall between 5,000 lbs. and 8,000 lbs., and drayage above 8,000 lbs. will, in most instances, prove to be inefficient or uneconomical operations.

c. Assembly/Staging Area:

(1) Cargo assembling areas in the freight terminal are developed from two criteria:

(a) Geographical area or freight destination of the cargo.

(b) Movement priority of the materiels.

High priority materials (IPG I and II) should be located separately from routine (IPG III) shipments, even when destined to the same points/area (except IPG II cargo scheduled for surface transport due to proximity of the

destination or nature of the material will be assembled with IPG III materials that are scheduled for movement NLT the day following the day materials were offered to the transportation element; and that when an IPG I/II SU is diverted to surface transport as a result of challenge action, that SU can be integrated with IPG III cargo for normal IPG III freight consolidation and shipment). At activities with MOFAST systems, SUs requiring special processing, including IPG Is and IPG IIs preplanned for air shipment, are automatically routed to a special processing assembly area to await the results of challenge actions. Compatible IPG I and II cargo having a common destination will be consolidated into the same Transportation Unit (TU); however, all IPG I/II materials, other than those diverted to surface transport as a result of challenge action, will be scheduled for movement NLT the day following the day they were offered to transportation. Routine (IPG III) cargo will be located in a separate area from high priority cargo, and will be further segregated by geographical area or freight destination. When a high volume of cargo is routinely generated for a specific freight destination, a separate geographical area, and consequently a unique terminal freight assembly area should be developed for that destination.

(2) At a non-MOFAST depot, freight assembly locations will be predetermined and relatively static; freight terminal employees will determine the assembly location from hard copy lists or from geographical area signs prominently displayed at the various assembly locations. The specific location of the cargo within the assembly area location will be annotated on the SU documentation (SPW/DD Form 1348-1) and the documentation will be forwarded to the appropriate transportation element for GBL preparation. On the day prior to the day shipment to a geographical area/destination is to be effected, all GBLs and other required documentation will be completed. The complete GBL, together with the SU documentation will be returned to the terminal, and all cargo indicated on the GBL(s) will be moved from the assembly area to a staging area for subsequent loading in carrier's equipment. In some instances cargo will be loaded in carrier's equipment directly from an assembly area; however, this is normally a slower method of loading and it could delay carrier loading beyond the allowable "free" time period and result in detention charges. Caution should be exercised to avoid a detention situation. The carrier agent's signature will be secured on the Property Shipped copy of the B/L after loading.

(3) At MOFAST depots the freight assembly area will be indicated on the MOFAST Route Slip (appendix F-180). After cargo is positioned in the freight assembly area, the specific location of the cargo within the assembly area location will be indicated on the route slip. If the outloading cut is to be determined on the terminal floor and billing accomplished after loading, the route slip should be kept with the material until loading. If the cut is to be determined by Shipment Planning or billing accomplished before loading, the route slip (with associated DD Form 1348-1s attached) is forwarded after annotation to a designated transportation element where it will be filed in a suspense file in the following sequence:

Geographical Area
Destination
GBL Assigned
No GBL Assigned

Within the GBL/no-GBL groups, a separation of high priority (IPG I and II) and routine (IPG III) SUs should be maintained. All groups should be appropriately labeled. IPG I/II SUs that have been diverted to surface transport as a result of challenge action will be annotated accordingly and will be intermingled in the Route Slip File with IPG III SUs. When it is determined that a geographical area, destination, or GBL is to be outloaded, the following actions will be initiated:

(a) If GBL assigned SUs are involved, action will be taken to close out GBL build and assign a new Spur Number to the geographical area to be outloaded (appendix E-238 P, part 1).

(b) Route slips for SUs to be loaded will be pulled and given to freight terminal personnel for cargo staging at outloading point.

(c) Freight terminal personnel will be advised that for the next workday all cargo marked for the Spur Number(s) of the closed GBL/Destination/ geographical area should be redirected to the appropriate staging area.

(d) As material is staged, any revisions required to SU date should be indicated on the route slip.

(e) Subsequent to the action indicated above, cargo will be loaded on carrier's equipment. The carrier agent's signature may be secured on the route slip for each SU loaded if the depot deems it appropriate or if the carrier requests it as a double check. Any revisions required to SU data should be annotated on the route slip. When all SUs for the GBL are loaded, the route slips will be immediately hand carried to the billing section. The paperwork will be annotated to indicate the carrier, vehicle number, vehicle type and size, the date loading was completed, and when applicable, the seal number applied to the vehicle. If MTMC routing (DLAR 4500.3) was provided, the applicable routing/rate data should be noted on the route slip by shipment planners.

(f) The carrier agent's signature must be secured on the Property Shipped copy of the GBL.

(4) As indicated above, the preferred method of outloading cargo at a MOFAST depot is to load carrier equipment from the route slip and prepare the GBL subsequent to loading. This sequence is preferred because once the GBL is printed the data thereon become a part of the computer MRO history file; therefore, if a change in GBL/SY data is required after the GBL is printed - a not uncommon requirement if the GBL preparation precedes outloading - the history record must be revised accordingly. This revision action is a complex and time consuming function. It is recognized, however, that in some instances the time required to prepare the MOFAST GBL may be excessive (due to slow computer response time, abnormally large GBLs, inexperienced personnel, etc.)

and carrier detention charges might develop as a result of the delay. In these instances, as an alternative procedure, GBLs may be prepared prior to outloading, but subsequent to cargo staging.

382204 - LOCAL PROCEDURES

Procedures outlined above are, of necessity, very general. Each depot/storage activity must develop detailed and comprehensive Standard Operating Procedures to support their individual unique operations.

BILL OF LADING

SECTION I - GENERAL

383101 - PURPOSE AND SCOPE

This chapter prescribes standard procedures for the preparation of Bills of Lading (B/Ls) at defense depots and collocated storage activities at DSCs. Both manual and automated B/Ls preparation will be addressed in this chapter, but primarily the guidance will focus on the automated B/L.

383102 - REFERENCE

DLAR 4500.3, Military Traffic Management Regulation.

383103 - BACKGROUND

a. There are two methods of Bill of Lading (B/L) preparation in being at DLA depots/storage activities: manual and automated. At non-MOFAST activities the manual method is used exclusively; at depots/storage activities with MOFAST operations, both manual and automatic B/Ls are prepared.

b. Basically, there are three types of manual B/Ls prepared at DLA activities: the standard GBL, which consists of a cover sheet (SF 1103) and continuation sheet (SF 1109); the Government Transit B/L (SF 1131); and the Commercial Bill of Lading, which may also be supported by continuation sheets. Of these, only the standard GBL and its continuation sheet can be computer prepared; however, a computer prepared standard GBL continuation sheet (SF 1109) can be used to support Commercial B/Ls. Guidance for the detailed preparation of manual B/Ls is contained in DLAR 4500.3.

c. Automated B/L preparation depends on the maintenance of various on-line computer files that contain address, mode and freight data appropriate for printing on GBLs. In addition, the computer equipment/programs supporting the automated B/L must have the generative capability of associating MRO data with transportation data and through this association develop appropriate transportation documentation and automatically effect various transportation determinations. The on-line data files must be maintained in a complete and current status to preclude errors in B/L preparation and to minimize the requirement for data verification/review during Transportation Unit (TU) formation and B/L development.

d. Shipping procedures that are requisite to automated B/L preparation are addressed in chapter 82, and the transportation data files required to support these procedures are outlined in chapter 84.

SECTION II - PROCEDURES

383201 - MANUAL BILL OF LADING PREPARATION

a. Since manually prepared B/Ls can easily be corrected after preparation and before closeout, manual B/Ls may be prepared prior to the loading or staging of cargo. (Often cargo is loaded on the vehicle from the B/L.) After it has been determined by the transportation element that all SUs for a TU have been assembled, the Shipment Planning Worksheets (SPW) representing the Shipment Units (SU) will be reviewed by Transportation Specialists to assure all required billing data are indicated, and appropriate route/rate data will be indicated on the documentation. B/L preparation can then commence. It is possible, and sometimes desirable, to commence B/L preparation prior to the completion of the TU build. This can be accomplished by typing the required SU data on the B/L as the SPWs are accumulated. B/Ls will be prepared IAW guidance provided in DLAR 4500.3, Chapter 214. A mechanical register (appendix F-125) is produced as a result of B/L closeout actions (appendix B-128). (If a CBL is being closed, a C will be indicated in position 48 of the ZEN card). B/L distribution/retention is in accordance with the provisions of DLAR 4500.3, chapter 214.

b. The balance of this chapter will address automated B/L preparation procedures.

383202 - UPDATE OF CODES

When it is determined that the cargo accumulations for a TU (GBL), Destination, or geographical area is complete and all effected SUs are to be closed out, the route slips associated with the closed out SUs will be reviewed by transportation personnel to determine code updating required. All SU status codes (appendix A-102) must be updated to M or N, and processing codes (appendix A-100) must be updated if appropriate. If mode changes occur, the mode codes (appendix A-17) must also be revised accordingly. Code update will be accomplished IAW appendix E-223 P procedures.

383203 - COMPLETION OF TU LOADING/STAGING

When freight terminal personnel have determined that a complete TU has been loaded/staged, all route slips associated with that TU will be hand carried to the billing section. (Local procedures determine at which point the B/L will be prepared: after loading on carrier's vehicle, or after staging for load, but prior to loading.) Terminal personnel will indicate the following data on cover documentation in connection with each TU; vehicle number, vehicle type/size, date loading was completed, seal numbers (if the TU requires Military Traffic Management Command (MTMC) routing (DLAR 4500.3), routing/rate data must be provided by the Transportation Specialist who, if the TU is for a less-than-load shipment, review by a Transportation Specialist will not be required unless mandatory data elements (i.e.; freight address, narrative freight descriptions, estimated freight charge, Transportation Account Code in connection with export traffic; initial carrier designation), are not indicated on the B/L record display viewed on the CRT during assembly processing. On MTMC routed shipments the Transportation Specialist will <u>always</u> provide the

following data for GBL completion; traffic control number, rate authority, route, estimated charge, and type rate code. In addition, when the shipment is MTMC routed, the data annotated on the TU cover documentation by freight terminal personnel (i.e., trailer number, etc.) must be indicated on the GBL in the appropriate locations.

383204 - UPDATE THE AUTOMATED GBL/CBL REGISTER

a. GBL numbers are established in the GBL Register computer program and are automatically assigned to eligible SUs in accordance with the assigned MOFAST Status Code (appendix A-102). CBLs are automatically assigned a number from locally developed CBL numbers entered in the register in accordance with appendix E-225 P procedures.

b. Appendix E-225 P procedures should be used to update the automated register. Specific B/L register update functions include:

(1) Assignment of an SU to a new, previously, unassigned B/L.

(2) Assignment of an SU to an existing B/L.

(3) Cancellation of an SU from a B/L.

(4) Cancellation of all SUs associated with a consolidated pack shipment from a B/L (the program permits cancellation of all SUs in a consolidated pack through a single CRT entry).

(5) Cancel an entire B/L.

383205 - VERIFICATION/PROCESSING OF AUTOMATED B/L

a. After a TU has been loaded (or staged) and the paperwork properly annotated (chapter 82), the paperwork (basically route slips with a cover sheet containing carrier vehicle data) will be hand carried to the billing section for B/L verification.

b. The first verification action will be to assure that all SUs in the TU have been assigned to the same B/L. This is done as follows:

(1) Check the Route Slip (appendix F-180) itself and note the B/L number assigned, if any (4th line, extreme right).

(2) If it is determined from the route slip or the SU inquiry action that the SU is assigned to a B/L other than that being processed, or that the SU has not yet been assigned to any B/L, appropriate corrective CRT entries should be initiated (appendix E-225 P).

c. Once the TU (B/L) record has been verified as to content, the billing clerk (CRT operator) will determine from the short B/L header record whether the TU requires routing, if this has not been accomplished by shipment planners (DLAR 4500.3). If it does, all paperwork will be forwarded to a designated Transportation Specialist for development of rate, route, and other volume load

data required before GBL processing. On non-MTMC routed traffic, and on MTMC routed traffic on which the Transportation Specialist has developed the required data and returned the paperwork to the biller (CRT operator), GBL processing can commence.

d. The B/L is assembled through procedures outlined in appendix E-238 P, part K. This program accesses data from the various MOWASP/MOFAST computer records and interprets and relates the data in such a way as to determine and effect the proper entries for B/L preparation. If all computer files are properly maintained, all data elements required for preparation of non-MTMC routed TUs will normally be available in the computer at the time of B/L assembly, and consequently the billing clerk (CRT operator) will not be required to add any data. On MTMC routed traffic - basically volume shipments of 10,000 lbs or more - various data elements (paragraph 383203) must always be input by CRT to complete B/L preparation. The billing operator will review the B/L display, both cover and continuation sheets, to assure that all data required by DLAR 4500.3, chapter 214, are entered. If required data elements are missing, a Transportation Specialist must be consulted.

e. The B/L assembly process (appendix E-238 P, part K) provides an option for compilation of SU data for the automated preparation of continuation sheets for CBLs. This processing option is an integral part of the appendix E-224 P, part A, B/L print process: the computer recognizes the CBL status of the TU by the B/L number and reacts by not printing a cover sheet. Cover sheets for CBLs must be prepared manually.

383206 - B/L PRINT PROCESS

a. The detailed instructions/procedures necessary to print automated B/Ls, after the B/L assembly processing is complete are contained in appendix E-224 P, part A. The GBL is printed on two separate forms; SF 1103 is used for the cover sheet, and SF 1109 for the continuation sheets. This latter form is also used for CBL continuation sheets.

b. When desired, GBL cover sheets and/or B/L continuation sheets can be reprinted through processes outlined in appendix E-224 P, part A. However, when a GBL cover sheet is reprinted it will be automatically assigned a new GBL number. The update of the B/L register (appendix E-225 P) is automatic, and the old GBL number is retired to microfiche records without additional CRT entries; however, the continuation sheets associated with the reprinted cover sheet must also be reprinted since they will reference the canceled GBL number.

c. The carrier agent's signature will be secured on the "Property Shipped" copy of the B/L. This signed B/L copy will be retained in accordance with established record maintenance requirements, as it is the only acceptable evidence that the shipment was received in good order by the carrier.

383207 - TRANSPORTATION CONTROL AND MOVEMENT DOCUMENTS (TCMD) AND INTRANSIT DATA CARD (IDC) PREPARATION

a. TCMD formats are prepared, in part automatically and, in part through the CRT input of detail data. Appendix E-228 P outlined procedures for securing a TCMD for either LOGAIR or GBL support (these TCMD formats are slightly different) and for developing and securing the required TCMD trailer cards. The formats are automatically transceived to the designated clearance authority, or automatically punched, in card format, to accompany the shipment. This process will also provide a print image of a LOGAIR TCMD for automatic print (on a remote printer) of a manifest to support Government truck transport of LOGAIR shipments to the LOGAIR terminal. TCMDs may be printed/transceived after the B/L is finalized, or after SUs are assigned to LOGAIR mode.

b. IDCs (TK4 cards) can be prepared and automatically punched through initiation of procedures outlined in appendix E-227 P. The IDCs will accompany the shipment in accordance with procedures outlined in DoD 4500.32-R (MILSTAMP).

383208 - ASSIGNMENT OF MOFAST SUs TO MANUAL B/Ls

An open MOFAST SU may be assigned to a manually prepared B/L by using procedures outlined in appendix E-235 P. These procedures are also used to confirm SUs assigned to a manual B/L, or to confirm SUs shipped as a part of a previously processed TU (automated or manual B/L), but inadvertently omitted from the B/L record.

383209 - B/L MICROFICHE HISTORY PROCESS

a. If necessary, B/L microfiche computer history records may be revised on-line at least 10 days after the B/L has been printed. Revisions must be coordinated with the commercial carriers in accordance with established procedures before the on-line revisions can take place. Revisions, after the record has been moved to hard copy microfiche, must be accomplished by DD Form 1352, GBL Correction Notice, as referenced in DLAR 4500.3. The microfiche update procedure is described in appendices B-195 and E-195 P. Revisions will be in GBL format and will change the previous GBL record. Shipment Units on the original GBL record may be deleted; however, care must be taken to properly account for Shipment Unit data deleted through established procedures to ensure that proper shipping data has been or will be entered into the Shipment Unit record. Revision to the GBL microfiche record will be made only by authorized personnel in a security environment.

b. At the end of the on-line revision period, a weekly microfiche hard copy record will be prepared for permanent local history.

383210 - MTMC GBL RECORD

MTMC has authorized the GBL record to be placed on computer tape and sent weekly (after 10 day on-line period for correction) for their use in statistical data, litigation and the Freight Information System (FINS) developed and managed by MTMC. It is anticipated that the GBL record will

replace the memo hard copy of the GBL presently sent to MTMC, except for the DD Form 1352, GBL Correction Notice, prepared after the on-line GBL microfiche correction period. The GBL tape record process is an internal computer process with no operator intervention required except for the updates during the 10 day on-line period referenced in paragraph 383209. Data Systems is responsible for movement of the MTMC GBL tape data to MTMC. Preparation of this MTMC GBL tape is a local depot option exercised after coordination with MTMC.

383211 - LOCAL PROCEDURES

Detailed local Standard Operating Procedures should be developed by each DLA depot/storage activity to reflect unique operating requirements.

CHAPTER 84

TRANSPORTATION INTELLIGENCE

CHAPTER 84

TRANSPORTATION INTELLIGENCE

SECTION I - GENERAL

384101 - PURPOSE AND SCOPE

The purpose of this chapter is to identify and briefly outline the various transportation information files available to defense depots and collocated storage activities at DSCs. This chapter will not attempt to address all sources of transportation intelligence, much of which is contained in individual Service regulations and commercial publications; rather, the scope of this chapter will be limited to those sources of transportation intelligence used by depot/storage activities on a continuous basis to support shipping operations.

384102 - REFERENCES

a. DLAR 4500.3, Military Traffic Management Regulation.

b. DLAH 4510.1/2/3/4, Terminal Facility Guides.

c. DoD 4000.25-D, DoD Activity Address Directory.

384103 - BACKGROUND

a. The defense depot/storage activity shipping function has always been supported by transportation intelligence data files/guides that are external to the Material Release Order (MRO) processing operations. These data relate to the commodities shipped, the freight destination location, and to the transport modes/carriers providing service to the shipping activity. The increasing mechanization of the depot/storage activity function has resulted in the computerization of many (but not all) of the existing manual files, and the creation of additional on-line transportation data files to support these more sophisticated operations. The implementation of the MOFAST system exemplifies this increasing sophistication and the commensurate requirement for additional on-line transportation data file support.

b. Transportation intelligence files/guides addressed in this chapter will range from highly computerized on-line files to manual loose leaf guides. Data elements discussed will include; Freight Address Data, Standard Point Locator Codes (SPLC), Freight Rate Data Files, Standard Carrier Alpha Codes (SCAC), Transit Credit/Control Records, and Terminal Facility Guide information.

c. Freight classification and MILSTAMP data elements, which represent major transportation intelligence requirements, are not addressed in this chapter. Because of the importance of these data to the transportation function, and the complexity of the files involved, a separate chapter (chapter 80) of this manual has been dedicated to that area.

SECTION II - PROCEDURES

384201 - FREIGHT ADDRESS DATA

a. Basic DoD activity address data is received automatically through the Defense Automatic Addressing System (DAAS) as outlined in DoD 4000.25-D. The basic data are composed of a parcel post mailing address (Type 1) and a freight label "Ship to" address (Type 2). In addition to the electronic transmission of these data through DAAS, a microfiche copy of the complete DoD Activity Address Directory (DoDAAD) is provided all major DoD shipping activities.

b. In addition to the Type 1/Type 2 address received through DAAS (or determined from the DoDAAD record), additional address data must be developed and entered into the local address file by the shipping activity. All depots/storage activities must develop and enter into this file the following address data elements for all active addresses; Geographical Area Code (the entering of this code activates the address), Parcel Post Zone Code, a Standard Point Locator Code (appendix A-99), a State Code (appendix A-80) for domestic consignees, and APOE, WPOE, APOD and WPOD codes for overseas consignees. Other codes/indicators provided in appendix B-126 should be entered into the file when the conditions/situations they address can be related to individual DoDAACs. Appendix B-126 procedures should be used in effecting all the above data entries.

c. The above described address file data will not, however, support the preparation of bills of lading required in connection with freight shipments. The freight addresses required for inclusion on bills of lading are "mode oriented" addresses; that is, a different address may apply for each of the various modes of transportation used (i.e., truck, rail, air freight, water, bus express, freight forwarder). The appropriate mode freight addresses for most CONUS military activities and principle DoD contractors are provided in the Terminal Facility Guides (TFG) (DLAH 4510.1/2/3/4) published by MTMC and provided to all defense depots/storage activities. Freight addresses for consignees not reflected in the TFG must be ascertained from contact with the requisitioning Military Service, contract administrating office (when appropriate), or the consignee, before B/Ls can be prepared.

d. In a non-MOFAST operation the shipping activity must manually determine the freight shipping address prior to preparing the B/L. Only the freight label address (Type 2) is indicated on the Shipment Planning Worksheet (SPW), and that address may not serve for B/L preparation purposes.

e. In a MOFAST environment, special addresses must be developed to support the automated B/L preparation program. The MOFAST addresses include four additional addresses to support mechanized B/L preparation; Rail Destination Address (Type A), Truck Destination Address (Type B), Air Freight Destination Address (Type C), and the GBL Mailing Address (Type G). In addition to these addresses, if there are special delivery instructions in connection with the Type A, B, or C addresses, these instructions can be entered in the file for automatic print on the B/L. With the inclusion of this additional address data, most B/L addresses can be automatically developed and printed on the B/L

during the B/L automated processing. However, if the mode of transport is other than truck, rail, or air freight, manual B/L address research and entry will still be required. The MOFAST addresses will be created/maintained in accordance with procedures outlined in appendix E-129.

f. In developing the MOFAST addresses it is not necessary to develop and enter separate Type A, B, C, and G addresses for each DoDAAC; to conserve file space and reduce file maintenance effort the following procedures should be followed:

(1) For each active address in the local Activity Address File indicate the appropriate 6-position Destination Cross-Reference AAC for that address in the DCR address field.

(2) Develop a Type A, B, C, and G address for each Destination AAC indicated. When this method is used, the MOFAST program will automatically seek the appropriate Type A, B, C, or G address in the address record created for the Destination AAC referenced in the DCR address field.

384202 - DESTINATION CROSS-REFERENCE CODES (DCR)

a. As indicated above, the DCR is a part of the address file and is, in fact, used as a "vehicle" for associating freight shipping addresses with specific DoDAACs in the MOFAST file. In the MOFAST program the DCR plays another important role; it provides the basis for assigning common destination Shipment Units (SU) to the same B/L (chapter 82). The method of developing the DCR to be indicated in the address file, and subsequently used for SU association into common Transportation Units (TU), is outlined in appendix A-99.

b. The basic requirement of the DLA DCR is that it be unique to a specific freight shipping destination; that is, that a different DCR be provided for each freight destination consignee. The DCR developed for this purpose is <u>not</u> mode oriented - only <u>one</u> DCR will be developed for a specific shipping destination.

c. To assure uniformity in DLA DCR assignments and to reduce the administrative cost associated with maintaining DCR data, DGSC has been designated as the DLA DCR Manager. As the DLA focal point for DLA DCR development and management, DGSC's responsibilities will include, but will not be limited to, the following:

(1) Development of a central file that relates all DoDAACs that represent active addresses for defense depots/storage activities to an appropriate 6-position alphanumeric Destination AAC..

(2) Development of an appropriate address record for each DCR that reflects Type A, B, C, and G addresses.

(3) Maintenance of both the DoDAAC-DCR relationship file and the DCR address record. DoD Activity Address changes promulgated through the DAAS and changes to Terminal Facility Guides (TFG) distributed by the MTMC, will be reviewed by DGSC and the DCR records revised as appropriate.

(4) Distribution of the DGSC developed DoDAAC-DCR file and the address records (and revisions, additions, and deletions to these records) to all defense depots/storage activities, by electronic means.

(5) Development of additional innovative uses for the DCR and recommending the modification of the DCR's configuration to accommodate these uses, if necessary. (HQ DLA concurrence will be required prior to DCR configuration modification.)

d. All DLA PLFAs will secure DCR detail data from DGSC. DGSC will respond to queries in regard to specific DoDAAC-DCR relationships and will provide Destination Type A, B, C, and G addresses upon request. (Queries relative to DCR detail should be directed to DGSC-TT.)

384203 - MOFAST RATE BASE FILE

a. The purpose of this file, which is really a freight rate file, is to automatically develop an estimated freight charge for each non-MOFAST routed Transportation Unit (TU) for print on the MOFAST automated GBL. (DLAR 4500.3, paragraph 214036b (10), requires that estimated freight charges for a GBL supported shipment be indicated in the Description of Articles block of that GBL.) At non-MOFAST depots, estimated freight charges are developed by freight rate specialists for each GBL as a part of the GBL processing function, but at MOFAST depots this procedure will not serve since the off-line development of freight charges and the required CRT input of these data to the GBL record would significantly delay automated GBL preparation. The Rate Base File is designed to support only MOFAST operations; non-MOFAST depots/storage points do not utilize this record.

b. It is neither necessary nor feasible to attempt to develop exact freight charges for non-routed MTMC traffic, and it should be recognized that the MOFAST Rate Base File is not designed to produce completely accurate freight charges. The MOFAST Rate Base File is complex in its detailed construction and contains a large number of data elements (appendix B-185), but its functions are relatively simple. The basic and salient features of this file are briefly outlined as follows:

(1) The file contains a "Rate Base" (freight rate reference number) for each SPLC in the active address file. Each SPLC in the active file must be associated with a Rate Base, or GBLs, so that SPLC will not print until the estimated charge is manually input by CRT.

(2) The appropriate class 100 class rate is input for each Rate Base in the file. When more than one class 100 rate applies to the same Rate Base, based on varying weight quantities, all class 100 rates are shown and each is associated with its indicated weight level; except no rates will be indicated that apply exclusively to weights in excess of 10,000 lbs. When class rates apply, the highest rated item in each container in the TU is automatically determined; then the weight of that container, the class 100 rate at the appropriate weight level and the appropriate LTL rating (determined from the LTL Rating Code in the Locator Record, with the rating percentage determined

from appendix A-49) are multiplied to determine the estimated freight cost associated with that container. This process is repeated for each container, and the sum of all these products is the estimated freight charge.

(3) When less than 10,000 lb FAK rates apply, these will be entered in the file. When more then one FAK rate applies, based on varying weight quantities, all FAK rates will be entered and associated with the appropriate indicated weight level; except no rates will be indicated that apply exclusively to weights in excess of 10,000 lbs. In the GBL rating process the program determines if any "contraband" items (items not eligible for FAK rates) are in the TU; if the TU does contain contraband items, the program further determines whether the FAK rate is "alternating" (has an alternate application with class rates) or non-alternating. If the FAK rates are non-alternating and the TU contains contraband items, the entire TU is rated at the class rates. If the FAK is an alternating rate, only the contraband items are rated with class rates and the balance of the TU is rated FAK. If there are no contraband items in the TU, the entire TU is rated FAK. (The program does not compare FAK rates with class rates; if FAK rates are in the file and no contraband items are in the TU, FAK rates will always be used for the entire TU.) Rates applying the several different modes (i.e., LTL motor; air freight; etc.) may be input to a single SPLC. The program will select the rate appropriate to the mode for the mode/carrier indicted.

c. The MOFAST Rate Base File plays no part in mode/carrier selection. Such selection should precede the rating process through the designation of a cost favorable carrier in connection with the MOFAST Terminal Routing and Carrier Assignment Process (appendices B-184 and E-238 P, part 1) to secure automatic print of the carrier's name on the automated GBL. A cost favorable carrier must be determined prior to loading the freight rates in the file, since the rates loaded must be applicable via the carrier indicated.

d. The development/maintenance of the MOFAST Rate Base File will be in accordance with procedures outlined in appendix E-236 P.

384204 - MOFAST CARRIER FILE

a. To facilitate the automatic print of carrier names on the automated GBL, a mechanized file associating a 4-position alphanumeric code with an in-the-clear carrier name is maintained in MOFAST operation. These carrier codes, officially designated as Standard Carrier Alpha Codes (SCAC), are developed by the carrier industry and provided to DoD shipping activities by MTMC. The MOFAST Carrier File will be developed/maintained in accordance with procedures outlined in appendix B-183 and E-230 P.

b. Non-MOFAST depots/storage activities will use the hard copy or microfiche SCAC listings provided by MTMC to determine appropriate code-carrier relationships, as required.

384205 - TRANSIT ACCOUNT RECORDS

a. A Transit Control Guide (DD Form 1090), reflecting a monthly summary of transit transactions, will be maintained by each defense depot/storage activity enjoying transit privileges and having active transit accounts.

b. The above indicated transit records will be maintained in accordance with procedures outlined in DLAR 4500.3, chapter 210.

384206 - LOCAL TRANSPORTATION DATA FILES

Nothing in this chapter shall preclude the establishment of additional local transportation data files that expand upon data file requirements reflected herein; however, any diminution of data requirements outlined in this chapter, or any revision of the file configurations outlined herein, must be approved by HQ DLA.

Violation Reason Codes	A-82
Water Port Designator Codes	A-29

APPENDIX A-1

DOCUMENT IDENTIFIER CODES
(Columns 1, 2 and 3)

1. The DIC provides a means of identifying a given product (i.e., requisition, referral action, status card, followup, or cancellation) to the supply distribution system to which it pertains. It further identifies such data as to its intended purpose and usage. This code enables personnel to recognize the data and thence to perform the operation dictated. When used in conjunction with electronic computers, it enables the equipment to select the appropriate programs and mechanically assimilate and/or react to the data.

2. The DIC is a mandatory entry on all requisitions and related products entering any supply distribution systems under MILSTRIP. Further, each product necessary to perform various inventory functions is identified by an appropriate code.

3. The primary controlling factor in the DIC is vested in the first position of the code. Control of assignments of these first characters is a responsibility of the DoD. Alphabetic characters A, C and D are assigned to the DLA supply distribution system. In addition, alphabetic character Z is provided as a variable code usable in the accounting system but under restrictive conditions explained in paragraph 4a(5).

4. The following instructions apply to DICs:

a. First Position (Column 1)

(1) Alphabetic A is provided to identify transactions relating to Requisitioning/Issue System(s) irrespective of Service or systems within Service. These codes are listed in paragraph 6.

(2) Alphabetic U in lieu of A in pos. 1 identifies mobilization exercise requisitioning/issue transactions which will not automatically be processed as real documents. Whether such transactions are created for simulation purposes only or require action by elements of supply distribution system(s) will be explicated by the Service/Agency activities responsible for conducting the particular exercise. The following code blocks are reserved in the MILS systems for mobilization exercise purposes:

MILS STANDARD SYSTEM	EXERCISE CODE BLOCK
MILSTRIP A - series	U - series
MILSTRAP D - series	E - series
MILSTAMP T - series	V - series
MILSBILLS F - series	H - series

(3) Alphabetic C is provided to identify transactions relating to the DLA inventory accounting system, which are not covered by MILSTRIP.

(4) Alphabetic D is provided to identify actions as forming a part of the inventory accounting system, the effect that a transaction has upon inventory control records (as well as the type of document), and the specific relation of various inventory transactions to appropriation fund and stock fund financial statements.

(5) Alphabetic P is provided to identify transactions relating to MILSCAP.

(6) To facilitate assignment of codes that are necessary to DSC operations, when they cannot be identified directly to the preceding subparagraphs, or when they are not universal in scope and application, alphabetic Code Z is provided. Codes in this category are uncontrolled insofar as the DoD is concerned. Products containing codes within this structure, however, may never appear on any documents passed beyond the confines of the DSC.

(7) Numeric 9 is provided to identify all Z transactions which are created internally by the MOWASP system at the depot. These transactions are used internally by the computer at the depot and never appear on any product or document leaving the depot.

b. Second Position (Column 2)

(1) Column 2 will contain numerics when the products in which entered are intended to positively result in distribution decisions, or otherwise alter accountable on hand balances within the distribution system. For example, all requisitions, referral actions, and inventory accounting transactions contain second position numerics.

(2) Column 2 will always contain alphabetics when the products in which entered are informative and do not necessarily result in distribution decisions or alteration of accountable on hand balances.

c. Third Position (Column 3) when used with alphabetic A in the first position

(1) Column 3, when used in conjunction with numerics in column 2, modifies the products in which contained. When column 3 is any numeric, it signifies that the shipment of materiel is intended for an overseas consignee. Conversely, when column 3 is any alphabetic, it signifies shipment to a domestic recipient. The actual character (regardless of whether numeric or alphabetic) indicates the content of the stock or part number field.

(2) Column 3, when used in conjunction with alphabetics in column 2, will likewise modify column 2 by providing reference to the identity of the initiator of products submitted or reference to the intended recipients of products created within the distribution system.

d. Third Position (Column 3) when used with alphabetic C or D in the first position:

(1) Column 3, when used in conjunction with numerics in column 2, identifies for supply and financial management purposes the specific type of gain or loss transaction affecting accountable on hand balance(s).

(2) Column 3, when used in conjunction with alphabetics in column 2, identifies transactions which do not alter accountable records but which may affect subsidiary records.

5. DICs, other than listed in paragraphs 6 and 7, are reserved for future use and are not to be used unless authorized by DLA.

6. DICs in the A series follow:

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
A 0 1	Requisition	For overseas shipment/with NSN/NATO Stock Number.
A 0 2	Requisition	For overseas shipments/with Part Number.
A 0 4	Requisition	For overseas shipment/with other.**
A 0 5*	Requisition	For overseas shipment/with exception data.
A 0 7	Requisition	For overseas shipment/Overseas Dependent School System Requirement.
A 0 A	Requisition	For domestic shipment/with NSN/NATO Stock Number.
A 0 B	Requisition	For domestic shipment/with Part Number.
A 0 D	Requisition	For domestic shipment/with other.**
A 0 E*	Requisition	For domestic shipment/with exception data.
A 2 1	Redistribution Order	For overseas shipment/with NSN/NATO Stock Number.
A 2 2	Redistribution Order	For overseas shipment/with Part Number.
A 2 4	Redistribution Order	For overseas shipment/with other.**
A 2 5*	Redistribution Order	For overseas shipment/with exception data.
A 2 7	Redistribution Order	For overseas shipment/Overseas Dependent School System Requirement.
A 2 A	Redistribution Order	For domestic shipment/with NSN/NATO Stock Number.
A 2 B	Redistribution Order	For domestic shipment/with Part Number.
A 2 D	Redistribution Order	For domestic shipment/with other.**
A 2 E*	Redistribution Order	For domestic shipment/with exception data.
A 3 1	Passing Order	For overseas shipment/with NSN/NATO Stock Number.
A 3 2	Passing Order	For overseas shipment/with Part Number.
A 3 4	Passing Order	For overseas shipment/with other.**
A 3 5*	Passing Order	For overseas shipment/with exception data.
A 3 7	Passing Order	For overseas shipment/Overseas Dependent School System Requirement.
A 3 A	Passing Order	For domestic shipment/with NSN/NATO Stock Number.
A 3 B	Passing Order	For domestic shipment/with Part Number.
A 3 D	Passing Order	For domestic shipment/with other.**

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
A 3 E*	Passing Order	For domestic shipment/with exception data.
A 4 1	Referral Order	For overseas shipment/with NSN/NATO Stock Number.
A 4 2	Referral Order	For overseas shipment/with Part Number.
A 4 4	Referral Order	For overseas shipment/with other.**
A 4 5*	Referral Order	For overseas shipment/with exception data.
A 4 7	Referral Order	For overseas shipment/Overseas Dependent School System Requirement.
A 4 A	Referral Order	For domestic shipment/with NSN/NATO Stock Number.
A 4 B	Referral Order	For domestic shipment/with Part Number.
A 4 D	Referral Order	For domestic shipment/with other.**
A 4 E*	Referral Order	For domestic shipment/with exception data.
A 5 1	Materiel Release Order	For overseas shipment/with NSN/NATO Stock Number.
A 5 2	Materiel Release Order	For overseas shipment/with Part Number.
A 5 4	Materiel Release Order	For overseas shipment/with other.**
A 5 5*	Materiel Release Order	For overseas shipment/with exception data.
A 5 7	Materiel Release Order	For overseas shipment/Overseas Dependent School System Requirement.
A 5 A	Materiel Release Order	For domestic shipment/with NSN/NATO Stock Number.
A 5 B	Materiel Release Order	For domestic shipment/with Part Number.
A 5 D	Materiel Release Order	For domestic shipment/with other.**
A 5 E*	Materiel Release Order	For domestic shipment/with exception data.
A 5 J	Disposal Release Order	For shipment to Property Disposal Activity.
A 6 1	Materiel Release Denial	For overseas shipment/with NSN/NATO Stock Number.
A 6 2	Materiel Release Denial	For overseas shipment/with Part Number.
A 6 4	Materiel Release Denial	For overseas shipment/with other.**
A 6 5*	Materiel Release Denial	For overseas shipment/with exception data.
A 6 7	Materiel Release Denial	For overseas shipment/Overseas Dependent School System Requirement.
A 6 A	Materiel Release Denial	For domestic shipment/with NSN/NATO Stock Number.
A 6 B	Materiel Release Denial	For domestic shipment/with Part Number.
A 6 D	Materiel Release Denial	For domestic shipment/with other.**
A 6 E*	Materiel Release Denial	For domestic shipment/with exception data.
A 6 J	Disposal Release Denial	For shipment to Property Disposal Activity.
A B 1	Direct Delivery - Supply Status	To requisitioner (pos. 30-35). For intra-Service/Agency use only.
A B 2	Direct Delivery - Supply Status	For supplementary address (pos. 45-50). For intra-Service/Agency use only.
A B 3	Direct Delivery - Supply Status	To pos. 54. For intra-Service/Agency use only.
A C 1	Cancellation	By Requisitioner (pos. 30-35).

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
A C 2	Cancellation	By Supplementary Addressee (pos. 45-50.)
A C 3	Cancellation	By pos. 54.
A C 4	Cancellation	By pos. 55. (For intra-Service use only.)
A C 5	Cancellation	By pos. 56. (For intra-Service use only.)
A C 6	Cancellation	From ICP to storage.
A C 7	Cancellation	From ICP to storage (Mass Cancellation).
A C J	Disposal Release Cancellation	From ICP to Storage.
A C P	Cancellation	From ICP to Procurement Activity. Cancellation for indicated quantity of the item listed on the Procurement Instrument or Procurement Document designated by the number in pos. 62-74.
A D 1	FMS Notice of Availability (Initial Key Document)	To designated Country Representative/ Freight Forwarded (CR/FF). Will accompany the FMS NOA Initial Detail Documents.
A D 2	FMS Notice of Availability (Initial Detail Document)	To designated CR/FF. Will accompany the FMS NOA Initial Key Document.
A D 3	FMS Notice of Availability (Delay Key Document)	To designated CR/FF. Will accompany the FMS NOA Delay Detail Document.
A D 4	FMS Notice of Availability (Delay Detail Document)	To designated CR/FF. Will accompany the FMS NOA Delay Key Document.
A D 5	FMS Notice of Availability (Reply Document)	To the activity of originating the NOA.
A D R	FMS Notice of Availability (Export Release Required)	To designated CR/FF. Will accompany the FMS NOA Initial Detail Documents.
A E 1	Supply Status	To Requisitioner (pos. 30-35).
A E 2	Supply Status	To Supplementary Addressee (pos. 45-50).
A E 3	Supply Status	To pos. 54.
A E 4	Supply Status	To pos. 55. (For intra-Service use only.)
A E 5	Supply Status	To pos. 56. (For intra-Service use only.)
A E 6	Supply Status	To ICP from Storage. Use for informative and non-positive status in reply to a DIC AF6 followup or an MRO when the DIC AR_ and A6_ series documents do not apply.
A E 8	Supply Status	To the Defense Automatic Addressing System (DAAS) from GSA Central Router for distribution, by DAAS, of supply status AE1, 2 and/or 3 IAW MILSTRIP status distribution rules.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
A E 9	Supply Status by DAAS	From the Defense Automatic Addressing System (DAAS). a. To activities identified by M&S Code (pos. 7), and/or Distribution Code (pos. 54) to devise of the rerouting or change to a MILSTRIP requisition document as reflected by the Supply Code (pos. 65-66). b. To activity in pos. 30-35 when the M&S Code is 0, and pos. 54 is blank or invalid to advise of rerouting or change to a MILSTRIP requisition document as reflected by the Supply Status Code (pos. 65-66). c. To activities in pos. 30-35, 45-50, and 54 to advise of rejection of a MILSTRIP requisition document as reflected by Supply Status Code. (pos. 65-66). d. To "From" Routing Identifier Code (pos. 74-76) to advise of the rerouting of an A3_ (Passing Order), or A4_ (Referral Order).
A E A	Supply Status	For Service prepared FMS and Grant Aid Requisitions/with NSN/NATO Stock Number.
A E B	Supply Status	For Service prepared FMS and Grant Aid requisitions/with Part Number.
A E D	Supply Status	For Service prepared FMS and Grant Aid requisitions/with other.**
A E E	Supply Status	For Service prepared FMS and Grant Aid requisitions/with exception data.
A E J	Disposal Supply Status	From Storage to ICP.
A F 1	Followup	By Requisitioner (pos. 30-35).
A F 2	Followup	By Supplementary Addressee (pos. 45-50).
A F 3	Followup	By pos. 54.
A F 4	Followup	By pos. 55. (For intra-Service use only.)
A F 5	Followup	By pos. 56. (For intra-Service use only.)
A F 6	Followup	By ICP to storage. When used with a BE Status Code, force closes depot inprocess records.
A F C	Followup (Request for Improved ESD)	Furnished by requisitioning activities as requests to supply sources to initiate actions which will improve estimated availability dates provided in supply status transactions.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
A F J	Disposal Release Followup	From ICP to Storage.
A F T	Followup (Request for Shipment Tracing - Registered, Insured and Certified Parcel Post	From consignee (based on signal code) to supply source and ILCO to supply source unless supply source is small business firm or civilian contractor not required to process followups received from military sources. In this case, from consignee to Inventory Control Point (ICP) and ILCO to ICP.
A F X	Disposal Shipment Confirmation Followup	Initial followup from DPDS to pos. 30-35, then from ICP to Storage.
A F Z	Disposal Shipment Confirmation Followup	Second Followup from DPDS to pos. 30-35, when ASZ is not received in response to first followup, then from ICP to storage.
A G 6	Reply to Cancellation Request	To ICP from storage.
A G J	Reply to Disposal Release Cancellation	From Storage to ICP.
A K 1	Followup on Cancellation Request	By Requisitioner (pos. 30-35). (Process as Cancellation if original cancellation not received.)
A K 2	Followup on Cancellation Request	By Supplementary Addressee (pos. 45-50). Process as Cancellation if original Cancellation not received.)
A K 3	Followup on Cancellation Request	By pos. 54. (Process as Cancellation if original Cancellation not received.)
A K 4	Followup on Cancellation Request	By pos. 55. (For intra-Service use only.) Process as Cancellation if original Cancellation not received.)
A K 5	Followup on Cancellation Request	By pos. 56. (For intra-Service use only.) (Process as Cancellation if original Cancellation not received.)
A K 6	Followup on Cancellation Request	From ICP to Storage. (Process as Cancellation if original Cancellation not received.)
A K J	Disposal Release Cancellation Followup	From ICP to Storage.
A M 1	Document Modifier	For overseas shipment/with NSN/NATO Stock Number. (Process as Requisition if original document not received.)
A M 2	Document Modifier	For overseas shipment/with Part Number. (Process as Requisition if original document not received.)
A M 4	Document Modifier	For overseas shipment/with other.** (Process as Requisition if original document not received.)

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
A M 5*	Document Modifier	For overseas shipment/with exception data. (Process as Requisition if original document not received.)
A M A	Document Modifier	For domestic shipment/with NSN/NATO Stock Number. (Process as Requisition if original document not received.)
A M B	Document Modifier	For domestic shipment/with Part Number. (Process as Requisition if original document not received.)
A M D	Document Modifier	For domestic shipment/with other.** (Process as Requisition if original document not received.)
A M E*	Document Modifier	For domestic shipment/with exception data. (Process as Requisition if original document not received.)
A N 1	Materiel Obligation Validation Request	For Requisitioner (pos. 30-35).
A N 2	Materiel Obligation Validation Request	To Supplementary Address (pos. 45-50).
A N 3	Materiel Obligation Validation request	To pos. 54.
A N 4	Materiel Obligation Validation Request	To pos. 55. (For intra-Service use only.)
A N 5	Materiel Obligation Validation Request	To pos. 56. (For intra-Service use only.)
A N 9	Materiel Obligation Validation Control Card	Header card used when forwarding request cards by AUTODIN or mail.
A N Z	Material Obligation Validation Request Followup Control Card	Header card used when following up on request cards previously forwarded (DIC AN9) by AUTODIN or mail.
A P 1	Materiel Obligation Validation Response	From Requisitioner (pos. 30-35).
A P 2	Materiel Obligation Validation Response	From Supplementary Addressee (pos. 45-50).
A P 3	Materiel Obligation Validation Response	From pos. 54.
A P 4	Materiel Obligation Validation Response	From pos. 55. (For intra-Service use only.)
A P 5	Materiel Obligation Validation Response	From pos. 56. (For intra-Service use only.)
A P 9	Receipt Confirmation for Materiel Obligation Validation Requests	Return card for acknowledgement of receipt of cards transmitted either by AUTODIN or or mail.
A P X	Notice of Nonreceipt of Total Batch of Materiel Obligation Validation Cards	Notification of the supply source that the total number of cards indicated in the control card were not received.
A R O	Materiel Release Confirmation	To ICP from storage.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
A R 9	Materiel Release Confirmation Reply to MRO Modifier	Reply to MRO or DD Form 1348-1 modifier document when shipment against original MRO or DD Form 1348-1 has been accomplished.
A R A	Materiel Release Confirmation	For release of quantity greater than requested (due to unit pack).
A R B	Materiel Release Confirmation	For release of quantity less than requested due to unit pack).
A R J	Disposal Release Confirmation	From Storage to ICP.
A R K	Disposal Release Confirmation	From Storage to ICP for release of Quantity greater than Requested.
A R L	Disposal Release Confirmation	From Storage to ICP for release of quantity less than requested.
A S 1	Shipment Status	To Requisitioner (pos. 30-35).
A S 2	Shipment Status	To Supplementary Address (pos. 45-50).
A S 3	Shipment Status	To pos. 54.
A S 4	Shipment Status	To pos. 55. (For intra-Service use only.)
A S 5	Shipment Status	To pos. 56. (For intra-Service use only.)
A S 8	Shipment Status	To DAAS from Service/Agency for distribution by DAAS of shipment status AS-IAW MILSTRIP distribution rules.
A S Z	Disposal Shipment Confirmation	From Shipping Activity to DPDS in response to either an AFX or AFZ Followup.
A T 1	Followup	For overseas shipment/with NSN/NATO Stock Number. (Process as Requisition if original Requisition not received.)
A T 2	Followup	For overseas shipment/with part number. (Process as Requisition if original Requisition not received).
A T 4	Followup	For overseas shipment/with other.** (Process as Requisition if original Requisition not received.)
A T 5	Followup	For overseas shipment/with exception data. (Process as Requisition if original Requisition not received.)
A T A	Followup	For domestic shipment/with NSN/NATO Stock Number. (Process as Requisition if original Requisition not received.)
A T B	Followup	For domestic shipment/with part number. (Process as Requisition if original Requisition not received.)
A T D	Followup	For domestic shipment/with other.** (Process as Requisition if original Requisition not received.)
A T E	Followup	For domestic shipment/with exception data. (Process as Requisition if original Requisition not received.)

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
A U 1	Reply to Cancellation Request-Shipment Status	To Requisitioner (pos. 30-35).
A U 2	Reply to Cancellation Request-Shipment Status	To Supplementary Address (pos. 45-50).
A U 3	Reply to Cancellation Request-Shipment Status	To pos. 54.
A U 4	Reply to Cancellation Request-Shipment Status	To pos. 55. (For intra-Service use only.)
A U 5	Reply to Cancellation Request-Shipment Status	To pos. 56. (For intra-Service use only.)
A U 7	Reply to Cancellation Request-Shipment Status	To RIC From (For intra-Service use only.)
A U 0	Reply to Cancellation Request-Materiel Release Confirmation	To ICP. Release of quantity same as requested.
A U A	Reply to Cancellation Request-Materiel Release Confirmation	To ICP. Release of quantity greater than requested (due to unit pack).
A U B	Reply to Cancellation Request-Materiel Release Confirmation	To ICP. Release of quantity less than requested (due to unit pack or partial denial).

*Processing activity will, by screening of documents, ascertain whether requisition or passing action contains an NSN/NATO Stock Number or other (Part Number). If data can be acted upon without need for further passing actions, digit in pos. 3 will be changed to correspond with correct NSN/NATO Stock Number or Part Number.

**For use when requisition or related document contains other than an NSN/NATO Stock Number or Part Number.

7. DICs for the C series follow. Use of these codes will be in conformance with instructions contained in procedural chapters in this manual. Codes in the C series will not be used by distribution activities, other than the DSCs except when specifically provided for and directed in the procedural chapters of the manual.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
C 5 A	IPE MRO	IPE MRO for CONUS shipment.
C 5 E	IPE MRO (Exception)	IPE MRO for CONUS shipment, with Exception Data.
C 5 1	IPE MRO	IPE MRO for overseas shipment.
C 5 5	IPE MRO (Exception)	IPE MRO for overseas shipment, with Exception Data.
C 7 _	Backorder Release	The third position will correspond to the D7 series (for internal DSC use only).
C 7 7	Qualified Item Card	For transmittal to SSD/DSSP qualified to stock the item.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
C B A	MOWASP Program Object Deck	To transmit MOWASP Program object decks via AUTODIN.
C B B	Central Data File Inquiry Update Reply Card	To add to Central Data File.
C B C	Central Data File Inquiry Update Reply Card	To change Central Data File.
C B D	Central Data File Inquiry Update Reply Card	To delete Central Data File.
C B L	Freight Description NIIN Data Entry Format	Transfer of data between FDM and depots.
C B M	Freight Description NMFC Data Entry Format	Transfer of data between FDM and depots.
C C C	Prime Depot Data Bank Change Notice	To provide data to the prime depot from a user depot.
C D 1	Customer Complaint Data Card (CD1)	Defines DIC CD1 card format. Generated when DSC/ICP enters a customer complaint to the system. Reference appendix B-161.
C D 2	Customer Complaint Investigation Results Card (CD2)	Defines DIC CD2 card format. Functions as a response to DSC/ICP generated CD1 request for data/materiel investigation or research. Reference appendix B-162.
C D 3	Customer Complaint Disposition and Closeout Card (CD3)	Defines DIC CD3 card format. Generated by ICP/DSC in response to CD2 transaction. Provides user depot with disposition instructions of discrepant materiel. Reference appendix B-163.
C D 4	Depot Complaint Acknowledgement and Closeout Card (CD4)	Defines DIC CD4 card format. Generated solely by the DSC/ICP and functions independently of the CD1, CD2 and CD3 format. Reference appendix B-292.
C E J	MRO Daily Report Card	Used to provide daily DLA depot MRO counts to each DSC.
C E 1	Informative	DSC transmittal of informative MILSTRIP supply status data to HQ DLA.
C G P	Activity Address Central Data Change	Used for AUTODIN transmission only, will be changed back to ZGP, reference appendix B-126.
C G R	Activity Address Central Data Delete	Used for AUTODIN transmission only, will be changed back to ZGR, reference appendix B-126.
C J V	Notification of COPAD Vendor Delivery of Materiel	DDMP Transmittal of COPAD Vendor delivery notification to DCSC reference appendix B-294.
C J W	COPAD Order Data Cards	DCSC transmittal of COPAD Control, MRO/SIS and descriptive data to DDMP via AUTODIN. Reference appendix B-295.
C K 4	Special Inventory Reject Card	Duplicate request reject to DSC.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
C K 5	Inventory Notification Card	For use by distribution activity.
C K 6	Informative	Transfer of data between distribution depots.
C K 8	Informative	Report of materiel on hand under deleted number.
C K 9	Inventory Reject Card (DSC to Depot)	Reject to depot because cutoff date is invalid or less than 2 days in advance of DSC processing date.
C K A	Locator Reconciliation Card (DD Form 1487)	Submitted by distribution activities to GSAs for Reconciliation of Locator Records against GSA Inventory Records.
C K B	Locator Reconciliation Exception Card (DD Form 1487)	Initiated by DSC to notify distribution activity of Stock Number change.
C K C	Locator Reconciliation Exception Card (DD Form 1487)	Initiated by DSC to notify distribution activity of UI change.
C K D	Locator Reconciliation Exception Card (DD Form 1487)	Initiated by DSC to notify distribution activity of Unidentifiable NSN.
C K E	Inventory Balance Notification Card	Initiated by DSC to notify distribution activity the Inventory Cutoff Balances.
C K H	Informative	Reply to report of materiel on hand under deleted number.
C K J	Commissary Support Planning Card	Advance shipment planning card transceived from the DSC to the distribution depot.
C K K	Commissary Support Item Identification Card	Item file update cards transceived from the DSC to the distribution depot.
C L A	Fill Supply Request (DD Form 1348)	Add quantity. Quantity to be placed in the FILL.
C L B	Fill Supply Request (DD Form 1348)	Delete quantity. Quantity to be taken out of FILL.
C L C	Fill Supply Request (DD Form 1348)	Increase in quantity. Quantity by which existing FILL quantity is to be increased.
C L D	Fill Supply Request (DD Form 1348)	Decrease in quantity. Quantity by which existing FILL quantity is to be decreased.
C L F	Fill Status Card (DD Form 1348)	Denotes a revision and/or discrepancy on FILL items received.
C M C	Storage Item Change Card*	Indicates a change in data other than the NSN.
C M D	Storage Item Change Card*	Indicates that an NSN has been deleted and not replaced. NSN will be entered in both stock number fields.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
C M L	Storage Item Change Card*	Indicates that the NSN has been changed and logistics transfer (loss) was made from managing activity reflected in pos. 18-19 to managing activity reflected in pos. 20-21. Denotes card prepared by losing DSC activity with the following exception: The gaining DSC uses this DIC only when the logistic transfer is from a non-DLA activity.
C M M	Storage Item Change Card*	Indicates that the unchanged NSN has been logistically transferred from managing activity reflected in pos. 18-19 to managing activity reflected in pos. 20-21. Denotes card prepared by losing DSC activity with the following exception: The gaining DSC uses this DIC only when the logistics transfer is from a non-DLA activity.
C M N	Storage Item Change Card*	Indicates that the new or reinstated NSN has been established in the DSC system.
C M R	Storage Item Change Card*	Indicates that the NSN has been deleted and replaced or changed.
C N 1	Logistics Capability Request Card	Request from Service regarding status of assets.
C N A	Logistics Capability Reply Card	Reply from DSC to Service regarding status of assets.
C N S	Stock Segregation Notice (SSN)	To notify distribution depot to segregate stock and report assets to Service ICP.
C O B	Classification Report	To notify DSC of classification action performed by distribution depot. (Use restricted to specific programs approved by HQ DLA.)
C R O	Confirmation of a Decentralized Issue	Chapter 9, MAP (Grant Aid or FMS).
C S 1	Informative	DSC transmittal of informative MILSTRIP shipment status to HQ DLA.
C V D	Freight Destination Central Data Change	Used for AUTODIN transmission only, will be changed back to ZVD, reference appendix B-176.
C V E	Special Address Central Data Change	Used for AUTODIN transmission only, will be changed back to ZVE, reference appendix B-177.
C V J	Item Management Coding Card	Used for recording Service users under provision of the Recording Users Interest Program.
C W A	Provisioning Support	(See paragraph 8.)
C W S	Weapons Systems Summary Status Report	A monthend, monthly AUTODIN Summary Status Report of selected Weapons Systems to HQ DLA-OPL. Appendix F-112.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
C X 1	Provisioning Support	(See paragraph 8.)
C X 2	Provisioning Support	(See paragraph 8.)
C X 3	Provisioning Support	(See paragraph 8.)
C X 4	Provisioning Support	(See paragraph 8.)
C X A	Provisioning Support	(See paragraph 8.)
C X B	Provisioning Support	(See paragraph 8.)
C X C	Provisioning Support	(See paragraph 8.)
C X F	Provisioning Support	(See paragraph 8.)
C X G	Provisioning Support	(See paragraph 8.)
C X K	Provisioning Support	(See paragraph 8.)
C Z F	Inactive Item Review Card	For followup on referral by DSC and reply to Service activity.
C Z R	Inactive Item Review Card	For referral by DSC and reply by Service activity.
C Z S	Supply Operations Report	For DSC use only as prescribed in separate instructions.
C Z T	Key Essential Item Report	
C Z W	Key Essential Item Report Trailer Card	
C Z Y	IPE Visibility Card	
C 2 A	Unit Assembly End Item Data	To transmit End item data to the assembly activity and to review update or change information to the assembly manager.
C 2 B	Unit Assemblage Control Data	To transmit unit assemblage control data to the assembly activity and to return update or change information to the assembly manager.
C 2 C	Unit Assembly Function Data	To transmit unit assembly function data to the assembly activity and to return update or change information to the assembly manager.
C 2 D	Unit Assembly Component Data	To transmit unit assembly component data to the assembly activity and to return change or update information to the assembly manager.
C 2 E	Unit Assembly Container Data	To transmit unit assembly container data to the assembly activity and to return change or update information to the assembly manager.
C 2 F	Component Packing Confirmation	To notify the assembly manager that packing has been completed at the assembly activity.
C 2 G	Advance Data for Assembly	To provide advance notice of a procurement receipt to the assembly activity.
C 2 H	Advance Data for Assembly	To provide advance notice of an other than procurement receipt to the assembly activity.
C 2 J	Assembly Component Receipt Confirmation	To notify the assembly manager that a component from procurement has been received by the assembly activity.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
C 2 K	Assembly Component Receipt Confirmation	To notify the assembly manager that a component from other than procurement has been received by the assembly activity.

*Produced by the Catalog Subsystem to forward catalog change data to the distribution activities. (See appendix B-23.)

8. The DICs prescribed herein are three character, alphabetic numeric codes which identify SSR transactions and are constructed and defined as follows:

a. The first position (column 1) is a fixed alphabetic character; C if action is to a CIMM; W if action is to a WIMM.

b. The second position (column 2) is a variable alphabetic character (W, X) and identifies various formats, i.e., W = PDSSR, X = LISSR/LIAC.

c. The third position (column 3) is a variable alphabetic or numeric character and identifies the nature of data being transmitted relative to format. Numerics in the third position identify advice format.

d. Use and definitions of the codes are:

(1) W/CWA - Identifies the transmission of provisioning or program data via PDSSR.

(2) The following codes are used on LISSRs:

(a) W/CXA - Identifies an SSR with NSN.

(b) W/CXB - Identifies an SSR with a manufacturer's part number. (Applies to WIMM/SICC transactions only under joint services provisioning.)

(c) W/CXB - Identifies an SSR with a PSCN.

(d) CXF - SICC to CIMM. Identifies an SSR reflecting noun name (pos. 8-42). Must be used when technical data is not provided with CXB SSRs. (Not required for special items nor for PSCN items.)

(e) CXG - Identifies additional reference number to CXA, CXB or CXC SSRs. (Not used in SICC submission to WIMMs.)

(f) CXK - Identifies an additional user on a multi-Service contract wherein the Contracting Service by mutual agreement is the principal and other claimants on the contract are additional users. The principal will submit SSRs for total requirements of all claimants and also prepare additional user cards for each claimant to accomplish IM coding and registration of user interest. (Not used in SICC submission to WIMMs.)

(3) The following Document Identifiers are used to indicate Advice Cards:

(a) CX1 - Used on LIAC - Identifies advice being provided to the SICC regarding a specific SSR (ATCs are used to identify the specific advice provided). A LIAC is required to be sent for each LISSR received.

(b) CX2 - Used on LIAC - Identifies advice being provided by SICC in reply to advice furnished by CIMM/WIMM under CX1. (ATCs are used to identify the specific advice provided.)

(c) CX3 - SICC followup on LISSR for which initial or final advice is overdue.

(d) CX4 - IMM response to CX3 SICC followup.

9. DIC CMA (appendix B-38) is assigned for use by the Services for submission of mobilization requirements data to DSCs IAW DLA-OMR memorandum to the Assistant Secretaries of the Army, Navy, and Air Force, 28 February 63, subject: Mobilization Requirements.

10. The D series of codes are prescribed by DoD MILSTRAP. Usage of these codes within the DLA distribution system will be in conformance with the procedural instructions contained in this manual. D series codes are as follows:

MATERIEL RECEIPT TRANSACTION
(PROCUREMENT INSTRUMENT SOURCE)

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
D 4 M	From - Repair/Testing	Into depot inventory as a result of return of repaired/tested end items previously sent to a commercial/Government facility.
D 4 S	From - Purchase - Commercial	Self-explanatory.
D 4 T	(Not to be assigned)	
D 4 U	From - Purchase - Another DoD Agency	Self-explanatory.
D 4 V	From - Purchase - Non-DoD Federal Agency	Self-explanatory.
D 4 X	From - Purchase - Decapitalized Item	From LIM to GIM as notification of receipt of an item decapitalized. Indicates to GIM (a) financial and due-in records of loser have been updated and (b) that memorandum due-in is to be updated.
D 4 Z	From - Other	Into depot inventory when a specific transaction code is not otherwise provided. (Assignor of this code will maintain intelligence pertaining to its use and, as required, will furnish this data.)

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
	MATERIEL RECEIPT TRANSACTION (OTHER THAN PROCUREMENT INSTRUMENT SOURCE)	
D 6 A	From - Own Military Service/Agency	Returns from users into depot inventory. Excludes receipts of end items from repair activity.
D 6 B	From - Another DoD Agency	Returns from users into depot inventory. Excludes receipts of end items from repair activity.
D 6 C	From - A Non-DoD Federal Agency	Returns from users into depot inventory. Excludes receipts of end items from repair activity.
D 6 D	From - MAP - Grant Aid	Returns from users into depot inventory.
D 6 E	From - MAP - FMS	Returns from users into depot inventory.
D 6 G	From - Destructive Test and/or Evaluation	Returns to depot inventory of unused explosive ordnance materiel originally issued for performance of destructive PROOF Testing and/or Evaluation.
D 6 H	From - Activities as Unused GFM and Repair Parts	Returns to depot inventory as a result of (a) return of unused repair parts or modification parts and, (b) return of GFM not consumed in manufacture of an end item. Excludes return of repaired end items.
D 6 J	From - Property Disposal Officers	Return to depot inventory.
D 6 K	From Other Storage Locations	Relocation between installations under control of same IM without change in item management responsibility. Excludes receipts of repaired end items.
D 6 L	From - Assembly/Disassembly/Conversion/Modification	Into depot inventory as a result of (a) return of assembled end items, (b) return of components from disassembled end items, and (c) return of converted or modified end items. Excludes return of repaired end items.
D 6 M	From - Repair/Testing	Into depot inventory as a result of return of repaired/tested items previously sent to a commercial/Government facility.
D 6 N	From - Loan	Into depot inventory from authorized recipient.
D 6 P	(Not to be Assigned)	
D 6 Q	From - Removal of Installed Military Service Designated Items	Into inventory, specified by Service/DNA/DLA from installation on a principal item/weapon system.
D 6 R	From - Exchanges of Military Service - Designated Items	Into inventory, specified by Service/DNA/DLA when a like item is issued on an exchange basis.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
D 6 S	Materiel Receipt	From requisitioner to DAAS acknowledging Acknowledgement - that materiel has been received and recorded on the inventory records or that materiel has been received at retail level for issues that are not posted to the inventory record.
D 6 T	From - Purchase - Own Military Service/ Agency	Self-explanatory.
D 6 U	From - Purchase - Another DoD Agency	Self-explanatory.
D 6 V	From - Purchase - Non-DoD Federal Agency	Self-explanatory.
D 6 X	Materiel Receipt Other than Procurement Instrument Source (Decapitalization)	From LIM to GIM as notification of receipt of an item decapitalized. Indicates to GIM (a) that due-in and financial records of loser have been updated; and (b) that memorandum due-in is to be updated.
D 6 Z	From - Other	Into depot inventory when a specific transaction code is not otherwise provided. (Assignor of this code will maintain detailed intelligence pertaining to its use and, required, will furnish this data.)

ISSUE TRANSACTION

D 7 _	To - SSD/DSSP Stock	From FMS documented materiel (Option Code Y or Z) holding area at SSD/DSSP. (Third position of DIC, with X over-punch in pos. 25, same as third position of original D7_ document and using Management Code C.)
D 7 A	To - Own Military Service/ Agency	From depot inventory or by direct delivery from vendor. Excludes issues of end items to be repaired.
D 7 B	To - Another DoD Agency	From depot inventory or by direct delivery from vendor. Excludes issues of end items to be repaired.
D 7 C	To - A Non-DoD Federal Agency	From depot inventory or by direct delivery from vendor. Excludes issues of end items to be repaired.
D 7 D	To - MAP - Grant Aid	From depot inventory or by direct delivery from vendor.
D 7 E	To - MAP FMS	From depot inventory or by direct delivery from vendor.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
D 7 G	To - Destructive Test and/or Evaluation	From depot inventory of explosive ordnance materiel for local performance of destructive PROOF Testing and/or Evaluation.
D 7 H	To - Activities as GFM and Repair Parts	From depot inventory or by direct delivery from vendor. Includes issues of (a) repair parts or modification parts or (b) GFM for consumption in manufacture of an end item. Excludes issues of end items for repair.
D 7 J	To - Property Disposal Officers	From depot inventory.
D 7 K	To - Other Storage Locations	Relocation between installations under control of the same IM without change in item management responsibility. Excludes issues of end items to be repaired.
D 7 L	To - Assembly/Disassembly/Conversion/Modification	From depot inventory or by direct delivery from vendor. Includes issues of (a) components for assembly, (b) end items for disassembly, and (c) end item for conversion and modification. Excludes issue of end item to be repaired.
D 7 M	To - Repair/Testing	From depot inventory to commercial/Government activity for the purpose of repair/testing and expected return of the same item.
D 7 N	To - Loan	From depot inventory to authorized recipients.
D 7 P	To - Returned Purchases	From depot inventory to suppliers for credit or reimbursements.
D 7 Q	To - Installation of Military Service - Designated Items	From inventory, specified by Service/DNA/DLA, to installation on a principal item/weapon system.
D 7 R	To - Exchange of Military Service - Designated Items	From inventory, specified by Service/DNA/DLA, when a like item is returned on an exchange basis.
D 7 Z	To - Other	From depot inventory when a specific transaction code is not otherwise provided. (Assignor of this code will maintain detailed intelligence to its use and, as required, will furnish this data.)

INVENTORY ADJUSTMENT TRANSACTION - SINGLE ADJUSTMENT

D 8 A	Increase - Physical Inventory Adjustment	Gain disclosed as a result of physical count of stock.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
D 8 B	Increase - Accounting Errors Adjustment	Gain resulting from clerical or mechanical accounting errors which are not subject to correction by reversal of original transaction.
D 8 C	Increase - Condition Transfer	Self-explanatory.
D 8 D	Increase - Purpose Transfer	Self-explanatory.
D 8 E	Increase - Logistic Transfer	Gain of item management responsibility.
D 8 F	Increase - Capitalization	Gain to a Stock Fund or Stock Fund Division at time of activation or subsequent extension/expansion.
D 8 G	(Not to be Assigned)	
D 8 H	(Not to be Assigned)	
D 8 J	Increase - Reidentification of Stock	Gain resulting from inspection of an item in stock which has been misidentified.
D 8 K	Increase - Catalog Data Change	Gain resulting from stock number and/or UI changes. Excludes change of price only.
D 8 N	Increase - DICOMSS Cycle Code Transfer	Gain to DICOMSS Cycle Code I only. Created mechanically only as a result of processing DICs AG6 with Status Code BQ and/or CRS. (This DIC will be internal to depot DB&TR system only and will not leave the depot.)

INVENTORY ADJUSTMENT TRANSACTION - SINGLE ADJUSTMENT

D 8 Z	Increase - Other Adjustments	Gains for which a specific transaction code is not otherwise provided. (Assignor of code will maintain detailed intelligence pertaining to its use and, as required, will furnish data.)
D 9 A	Decrease - Physical Inventory Adjustment	Loss disclosed as a result of physical count of stock.
D 9 B	Decrease - Accounting Errors Adjustment	Loss resulting from clerical or mechanical accounting errors which are not subject to correction by reversal of original transaction.
D 9 C	Decrease - Condition Transfer	Self-explanatory.
D 9 D	Decrease - Purpose Transfer	Self-explanatory.
D 9 E	Decrease - Logistics Transfer	Loss of item management responsibility.
D 9 F	Decrease - Decapitalization	Loss from a Stock or Stock Fund Division at time of deactivation or contraction.

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
D 9 G	Decrease - Shrinkage, Theft, Contamination	Loss from shrinkage, theft, contamination, and deterioration.
D 9 H	Decrease - Major Disaster	Loss from major fire loss, enemy action, or Act of God.
	INVENTORY ADJUSTMENT TRANSACTION - SINGLE ADJUSTMENT	
D 9 J	Decrease - Reidentification of Stock	Loss resulting from inspection of an item in stock which has been misidentified.
D 9 K	Decrease - Catalog Data Change	Loss resulting from stock number and/or UI changes. Excludes change of unit price only.
D 9 N	Decrease - DICOMSS Cycle Code Transfer	Loss from the current DICOMSS Cycle Code. Created mechanically only as a result of processing DICs AG6 with Status Code BQ and/or CRS. (This DIC will be internal to depot DB&TR system only and will not leave the depot.)
D 9 Z	Decrease - Other Adjustments	Losses for which a specific transaction is not otherwise provided. (Assignor of code will maintain detailed intelligence pertaining to its use and, as required, will furnish this data.)
	INVENTORY ADJUSTMENTS TRANSACTION - DUAL ADJUSTMENT	
D A C	Increase/Decrease - Condition Transfer	Self-explanatory.
D A D	Increase/Decrease - Purpose Transfer	Self-explanatory.
	FINANCIAL ADJUSTMENT TRANSACTION (INCREASES/DECREASES)	
D B _	Gain Transactions	Internally generated record used to pass data from Requirements Subsystem to Financial Subsystem.
D C _	Loss Transactions	Internally generated record used to pass data from Requirements Subsystem to Financial Subsystem.
D D _	Due-In Transaction (Procurement Instrument Source)	(The third digit codes in this series correspond to the third digit codes provided in the D4_ series.)
D E E and D E F	Logistic Transfer/ Decapitalization	(See chapter 8.)

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
D F _	Due-In Transaction (Other than Procurement Instrument Source)	(The third digit codes in this series correspond to the third digit codes provided in the D6_ series.)
D G _	Backorder Transaction	(The third digit codes in this series correspond to the third digit codes provided in he D7_ series.)
D H A	Demand Transaction	Used to report establishment or cancellation of demand transactions between SCAs and ICPs.
D J A	Physical Inventory Request	Received from DSC requesting inventory.
D K A	Physical Inventory Count	Physical Count forwarded from depot to DSC.
D U _	Prepositioned Materiel Receipt (Procurement Instrument Source)	(The third digit codes in this series correspond to the third digit codes provided in the D4_ series.)
D W _	Prepositioned Materiel Receipt (Other than Procurement Instrument Source)	(The third digit codes in this series correspond to the third digit codes provided in the D6_ series.)

FINANCIAL ADJUSTMENT TRANSACTION (INCREASES/DECREASES)

D X A	Materiel Receipt Followup (Procurement Instrument Source)	From DSC to storage activity to followup on expected D4_ results not yet received.
D X B	Materiel Receipt Followup (Other than Procurement Instrument Sources)	From DSC to storage activity to followup on expected D6_ results not yet received.
D X C	Reply to Materiel Receipt Followup (Procurement Instrument Source)	From storage activity to DSC when no matching Procurement Receipt History is available.
D X D	Reply to Materiel Receipt Followup (Other than Procurement Instrument Source)	From storage activity to DSC when no matching other than Procurement Receipt History is available.

D Y A	Special Program Requirements	(See paragraph 12.)
D Y B	Special Program Requirements	(See paragraph 12.)
D Y C	Special Program Requirements	(See paragraph 12.)
D Y G	Special Program Requirements	(See paragraph 12.)
D Y H	Special Program Requirements	(See paragraph 12.)
D Y J	Special Program Requirements	(See paragraph 12.)
D Y K	Special Program Requirements	(See paragraph 12.)
D Y L	Special Program Requirements	(See paragraph 12.)
D Y M	Special Program Requirements	(See paragraph 12.)
D Z A	Asset Status	

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
	FINANCIAL ADJUSTMENT TRANSACTION (INCREASES/DECREASES)	
D Z B	Storage Item Data Correction Card	From ICP/SCA to storage activity to change elements of data pertaining to an NSN.
D Z C	Logistics Reassignment Storage Information	From LIM to LIM storage activity to request transfer of quantities between ownership accounts on the SA records as a resut of an LR.
D Z D	Logistics Reassignment Storage Information Reply	From LIM storage activity to LIM to advise of quality transferred to the GIM as a result of an LR.
D Z E thru D Z F	Reserved	
D Z G	Transaction Reject Card	Used between ICPs, SCAs, and storage activities to reject a transaction which could not be processed due to erroneous or missing data.
D Z H	Location Audit Reconciliation Request Card	From storage activity to managing SCA/ICP for purpose of bringing storage locator records and item records in line.
D Z I thru D Z Z	Reserved	
	ITEM MANAGEMENT CODING TRANSACTIONS	
D V A	Item Management Coding Card	Decision of activity submitting coding card. Refer to DoD 4140.26-M.
D V B	Item Management Coding Results Card	Integrated management has been accepted by the IM indicated in pos. 25-26. A Logistic Reassignment by the Losing Manager is required.
D V C	Item Management Coding Results Card	Integrated management has been accepted by the IM indicated in pos. 25-26. Logistic Reassignment not required.
D V D	Item Management Coding Results Card	Item has been classified for Service management.
D V H	Item Management Coding Results Card	Return coding accepted. Logistics Reassignment will be accomplished.
D V K	Item Management Coding Results Card	Classification suspended pending resolution of potential conflict.
D V R	Item Management Card	IMC Card returned for correction.
D V X	Item Management Card	IMC Card followup. (Duplicates the original IMC Card with DIC DVX in pos. 1-3.)

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION
D V Y	Item Management Coding Followup Card	IMC followup up to Inventory Control Point (ICP).

11. The P series codes are used within the DLA between defense depots and Contract Administration Offices (CAO) of DCAS.

P K 5	Acceptance Alert or Acceptance Followup	From ACO to defense depot.

ITEM MANAGEMENT CODING TRANSACTIONS

P K N	Acceptance Report	From defense depot to CAO (Alert received).
P K P	Acceptance Report	From defense depot to CAO (Alert Not received).

12. The Q series codes are used within DLA between DSCs depots, and the DAAS.

Q U E	Item Source of Supply Interrogation	From Central Data Bank to DAAS.
Q U R	Item Source of Supply Interrogation Response	From DAAS to defense depots or DSCs.

13. The following DICs are prescribed by MISTRAP for SPA transactions. Appendices B-49 and B-50 provide full transaction layouts. For more information on SPRs, see chapter 58.

a. DIC DYA - SPR request. Establishment of new SPR.

b. DIC DYB - SPR with exception data.

c. DIC DYC - SPR cancellation.

d. DIC DYD - SPR modification. This transaction is used to change any or all of the following elements:

(1) Quantity

(2) Supplementary Address

(3) Project Code

(4) Coast Designator

(5) Support Date

(6) RIC (From)

e. DIC DYG - Substitute item acceptance

f. DIC DYH - Substitute item rejection

g. DIC DYJ - Followup

h. DIC DYK - Status - Reply to SPR or modification.

i. DIC DYL - SPR in support of Cooperative Logistic Support Arrangements.

j. DIC DYM - SPR in support of Cooperative Logistic Support Arrangements with exception data.

14. Following documents are utilized by distribution depot to update DoDAAD File and request shipment clearances from Water Terminal Clearance Authority (WTCA).

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION	REFERENCE APPENDIX
S T A	Communications Routing Indicator Card	Used to add AUTODIN Identifier Code to DoDAAD File.	B-85
S T D	Communications Routing Indicator Card	Used to delete AUTODIN Identifier Code to DoDAAD File.	B-85 D-51
T A 1	Activity Address Directory Card (Change)	To add an address line to the DoDAAD File.	B-129 D-96
T A 3	Activity Address Directory Card (Change)	To change an address line in the DoDAAD File.	B-129 D-96
T A 4	Activity Address Directory Card (Delete)	To delete an address line in the DoDAAD File.	B-129 D-96
T M 2	Shipment Diversion Authorization Card	To provide alternate consignee diversion authorization to WTCA.	B-48
T M 3	Shipment Hold Authorization Card	To provide shipment hold authorization to WTCA.	B-50
T M B	Shipment Diversion Confirmation Card	To provide shipping activity with confirmation that diversion can be accomplished.	B-49
T M C	Shipment Hold Acknowledgement Card	To provide shipping activity with knowledge that shipment was held.	B-51
T M K	Shipment Diversion Denial Card	To provide shipping activity with knowledge that diversion will not be accomplished.	B-49
T M L	Shipment Hold Denial Card	To provide shipping activity with knowledge that shipment cannot be held as requested.	B-51

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION	REFERENCE APPENDIX
T M S	Shipment Hold Disposition Card	To provide data to the WTCA in answer to a Disposition Instructions Request.	B-52 E-005 P
T M T	Shipment Disposition Instructions Request Card	Request by WTCA for additional data on shipment hold request.	B-51
T X 1	Transportation Control and Movement Document (TCMD)	To obtain shipment clearance from the WTCA or Air Clearance Authority (ACA).	Manually Prepared

15. The Document Identifier Codes listed below identify input-output transactions involved in the Mechanization of Warehousing and Shipping Procedures (MOWASP) and are provided for internal distribution depot usage only.

Z A B	Activity Address Inquiry Card	List Activity Address data.	B-119 D-97
Z A C	Materiel Adjustment Card	Input-output for preparation of Materiel Adjustment Card, DIC DAC.	B-22 D-63 D-69 D-70
Z A Q	MRO History Manual Control Card	Add DP status to History File to indicate manual processing of subsequent actions.	B-123 D-1
Z A S	Physical Inventory Cancellation	To cancel an Inventory.	B-70 D-6
Z A T	Inventory History	To request printout of Inventory History.	B-96 D-91
Z A V	Inventory Workload	To establish workload in Inventory Workload Bank.	B-67 D-7
Z A W	Inventory Workload Pull Part 2-3-4	To pull work from Inventory Workload Bank.	B-91 D-12
Z A X	Inventory Workload Pull Part I	To pull work from Inventory Workland Bank.	B-90 D-12

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION	REFERENCE APPENDIX
Z B A	Item Locator Subrecord Addition, Deletion, and Change Card	Used to: B-71 (a) Establish locations and data elements in the location subrecord. (b) Delete locations from Location Availabilty Subrecord, where applicable. (c) Establish stock number in the basic record where subdata does not exist. (d) Resequence locations, where applicable.	B-71 D-15
Z B B	Locator Report by Date of Pack Request	Used for requesting a printout (appendix F-119) of locator data within the date of pack parameters prescribed on request card.	B-85 D-3
Z B C	Item Locator Record Card	This card is used to add data in the basic Item Locator Record.	B-73 D-17
Z B D	Item Locator Record Card	This card is used to delete data in the basic Item Locator Record.	B-73 D-17
Z B E	Item Locator Record Card (Freight Classification Data)	This card is used to establish or delete data elements of the basic locator record where the data to be added or deleted pertains to all stock numbers with the same data elements.	B-75 D-19

 NEXT PRINTED PAGE IS PAGE 29

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION	REFERENCE APPENDIX
Z B G	Locator Audit Request Card	Input card to request computer prepared locator Audit Card for Complete or Sample Location Surveys.	B-77 D-21
Z B H	Location Audit Card	Output Card from processing of Location Audit Card (ZBG D-21).	B-78 D-22
Z B J	Item Locator Record Inquiry Card	This card is used with item locator action codes (appendix A-42) to obtain data from the item Locator Record and its Subrecord.	B-79 D-23
Z B L	Workload Request Card	This card is used to request work in addition to that scheduled for release and to accomplish changes to transportation release eligible shipment units in the MRO Consolidation File.	B-98 D-27
Z B M	MRO Control and Status Request Card	This card is used to: (a) Report condition of picking, packing and assembly action of individual items (MROs). (b) Release items to transportation. (c) Report shipment of Parcel Post items. (d) Report actions such as Warehouse refusals, and denials. (e) Request shipment status on an individual MRO or a complete shipment unit.	B-99 D-28
Z B P	Shipment Unit Completion Card	This card is used to report completion of of picking, packing and assembly operations on an entire shipment unit.	B-101 D-30

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION	REFERENCE APPENDIX
Z B R	Location Availability Update Card	This card is used to establish data in the Location Availability Record.	B-103 D-32
Z B Y	Location Reconciliation Request, Inquiry or Completion Card	Inquiry to obtain printout (appendix F-6) of number of CKAs forwarded to the DSC and summary of DJA (with Management Codes A & B) and CKB, CKC and CKDs received from the DSC.	B-83 D-101
Z B Z	Location Reconciliation Request Inquiry or Completion Card	This card closes the CKA suspense file and prints appendix F-6, Locator Reconciliation Exception Summary.	B-83 D-101
Z B 0	Inquiry into Prepositioned Materiel Receipt File	This card is for inquiry into PMRC Files for writeout of PMRC.	B-61 D-46
Z B 1	Inquiry into Completed Receipts File	For inquiry into completed Receipts File for writeout of completed Receipts.	B-61 D-46
Z B 6	Receipt and Locator Inquiry Card	Used for Inquiry to PMR Locator Files.	B-102 D-24
Z C R	Update Receipt Suspense	To update open receipt records in the IDC File.	B-93 D-8
Z C T	MRO Register/History Inquiry Card	This card causes a print out of all MRO Register/Histroy data as to receipt and processing status of MROs.	B-115 D-100
Z C 0	Surveillance Inspection/Operational Test Notice Card	This card is used to update the Locator File with the results of the completed inspections.	B-116 D-39
Z C 5	Location Reconciliation Request, Inquiry or Completion Card	This card is used to produce CKA to non-DLA managers for each NSN/Condition of the class (if entered in pos. 8-11 or all items of the specific manager if blank pos. 8-11).	B-83 D-11

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION	REFERENCE APPENDIX
Z C 9	Surveillance Inspection/ Operational Test Notice Card	This card is used to update the locator file with the results of a completed inspection for non-extendable (Type 1) shelf-life items.	B-116 D-39
Z E N	Government Bill of Lading Closeout Card	This card is used to activate closeout documentation for shipment units.	B-128 D-31
Z E P	Inventory Category Card	This card is used to add change Inventory Category Codes.	B-130 D-9
Z E U	Inventory Analysis Request Card	This card is used to request a locator Inventory Analysis Report.	B-132 D-34
Z E V	Location Audit Number Control Card	This card is used to prepare Research Cards for any locator audit cards not completed and returned.	B-105 D-35
Z E W	Completed Receipt Change Card	This card is used to correct elements of data recorded on the Completed Receipts File or to delete the receipt record completely.	B-106 D-61
Z F 6	Service and Distribution AUTODIN Routing Indicator Card	Used to update AUTODIN Code cross-reference.	B-65 D-59
Z F 7	Routing Identifier/ AUTODIN Routing Indicator Code	Used to update AUTODIN Code cross-reference.	B-86 D-62
Z G N	Location Availability Update Card	This card is used to delete data in the Location Availability File.	B-103 D-32
Z G P	Activity Address Local Data Changes/AUTODIN Routing Card	This card is used to add or change locally developed data to the Activity Address File.	B-126 D-99
Z G R	Activity Address Local Data Changes/AUTODIN Routing Card	This card is used to delete locally developed data in the Activity Address File.	B-126 D-99

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION	REFERENCE APPENDIX
Z H W	Classification Suspense Delete Card	To clear transactions suspended in the Suspense File when an MRO caused materiel in Condition J, K, or L to be be shipped (reshipped) to a vendor or another depot.	B-74 D-40
Z J A	Physical Inventory Request	Output daily as a result of making locator/DB&TR updates which mismatch. May be manually prepared.	B-26 D-175
Z K A	Physical Inventory Count (Depot) Card	Used as depot input-output in the physical inventory process for recording counts and production of a summarized Physical Inventory Count Card, DIC DKA.	B-25 D-7 D-8 D-10 D-12
Z N Z	Activity Address Individual Line Change	Used to update an individual Line of an established address.	B-160 D-96
Z U A	Customer Complaint Data Entry	Used to update Customer Complaint data on the Four-Phase system.	B-9
Z U E	MRO/DRO Inventory Transaction Card	Produced with DD Form 1348-1 for items under Inventory for reconciliation of Count Cards.	D-98
Z U F	Inventory Document Control File Receipt Transaction	Used within the computer to pass data between programs.	--
Z U G	MRO Status Detail Request Card	To request output of appendices F-78 and/or F-87.	B-58 D-105
Z U K	Inquiry to Locator for Rewarehousing Card	To request output of Rewarehousing Cards.	B-89 D-86
Z U M	Management Information System Card	To change recorded data in MIS Data File.	B-135 D-80
Z U N	Rewarehousing Card	To change the Locator Record as a result of rewarehousing actions.	B-72 D-16
Z U R	Receipt Forecast Request Card	To request Receipt Forecast Reports.	B-84 D-16

DIC	TITLE/TRANSACTION	DEFINITION/EXPLANATION	REFERENCE APPENDIX
Z U T	FSC Change Card	To change only FSC in the Locator File.	B-112 D-42
Z U U	Consist Header Data Card	To input data used in preparing the Brand Name SEAVAN Consist.	B-121 D-120
Z U V	Transportation Planning Pull Card	To produce the Brand Name SEAVAN consist.	B-120 D-120
Z U W	Commissary Support Management Data Card	To establish DICOMSS date in the MOWASP MIS.	B -211
Z U X	Update MRO Suspense	To update open MROs in DIC File.	B-92 D-8

APPENDIX A-2

ROUTING IDENTIFIER CODES

Routing Identifier Codes are contained in MILSTRIP DoD 4140.17-M, Supplement No. 1. Distribution of Supplement No. 1 has been made to each DLA activity in the same number of copies as this volume.

APPENDIX A-3

CUSTOMER COMPLAINT DISCREPANCY CODES

1. Number of characters: Two.

2. Type of Code: Alphanumeric.

3. Explanation: These codes explain the type of discrepancy reported to the Storage Depot.

4. Type of Discrepancy Codes are established as follow:

TYPE DISCREPANCY	CODE	EXPLANATION
DLAR 4140.55 (use codes on SF 364)		
Damage Enroute	C3	Damaged parcel post.
Unserviceable shelf line	C2	Expired shelf-life.
	C1	Condition other than on MRO.
	T1	Technical data markings missing.
	T2	Technical data illegible or mutilated.
	T3	Precautionary operational markings missing.
	T4	Inspection data missing or incomplete.
	T5	Serviceability operating data missing or incomplete.
	D3	Supply document incomplete, improper or without authority.
DLAR 4500.15 (add "X" to code)		
Damage Enroute	XD	Damage.
	XE	Water damage.
	XF	Fire damage.
	XG	Spoilage.

TYPE DISCREPANCY	CODE	EXPLANATION
Improper PPP & Loading	XK	Improper packing, preservation, packaging and loading.
Improper Markings	XM	Improper marking of labeling which adversely affects or could affect transportation.
Shortage	XS	Nonreceipt of other than parcel post.
Overage	XO	Overage.
Misdirected Shipment	XN	Misconsigned shipment.
	T6	Warranty data missing.
Wrong Item	W1	Incorrect item received.
	W2	Unacceptable substituted.
Improper PPP & Loading	P1	Improper preservation.
	P2	Improper packing.
	P4	Improper unitization.
Improper Markings	P3	Improper markings.
Shortage		
All	S3	Nonreceipt of parcel post shipments.
	XS	Nonreceipt of other.
Partial	S1	Quantity less than on receipt document.
	S2	Quantity less than that requested (other than unit of issue pack).
Overage	O1	Quantity in excess of that on MRO.
	O2	Quantity in excess of that requested (other than unit of issue pack).
Duplicate Shipment	O3	Quantity duplicates shipment.
Misdirected Shipment	M1	Addressed to wrong activity.
Document Missing	D1	Supply document not received.
	D2	Supply document illegible or mutilated.

APPENDIX A-4

TYPE OF PACK CODES

1. Number of characters: One.

2. Type of code: Numeric.

3. Field Position 21

4. Explanation: Indicates in the requisition MRO the degree of protection to be provided Subsistence items by the packing or outside shipping container. Actual "type of pack" requested should be based on the degree of protection required.

5. The following codes are assigned:

CODE	EXPLANATION
1	Protection required under known favorable conditions during shipment, handling and storage as in CONUS. Domestic fiberboard shipping containers are utilized and unitized in pallet loads bonded with strapping or shrink film.
2	Protection required under more severe conditions during shipment, handling and storage as may be encountered in the support of overseas customers. Weather resistant fiberboard shipping containers are utilized. Unitization is the same as for Type Pack 1. All overseas shipments do not require Type Pack 2. This type of pack is used primarily for: a. Components of the B Ration, stored in CONUS against mobilization requirements intended for ultimate resupply of PWRS stored in overseas areas. b. Items used for resupply of Navy vessels at sea.
3	Overpack Code 1.
4	Protection required under conditions of open storage for an unknown duration in geographical areas where excessive rainfall, high humidity, and adverse environmental conditions may be encountered, such as SEA. V2s fiberboard shipping containers are utilized. Unitization consists of 40" x 48" standard, double wing, 4-way entry, wood pallet, with 4" flanged, V2s fiberboard cap, and strapped.

APPENDIX A-5

SERVICE ASSIGNMENT CODES

1. Number of characters: One.

2. Type of code: Alpha

3. Explanation: Accommodate Service identity.

4. The following codes are assigned:

CODE	COLUMNAR USE 4	30	45	67	74	SERVICE/AGENCY	REMARKS
A	A	A	A	A	A	Army	
B	B			B	B	Army	
B		B	B			Army	FMS and MAP Grant Aid use only.

APPENDIX A-6

CUSTOMER COMPLAINT TYPE OF DOCUMENT CODES

1. Number of Characters: One.

2. Type of Code: Alpha-numeric.

3. The Type of Document Code identifies the type of document used by the customer to register a customer complaint with the ICP/DSC.

0 - Category I Quality Deficiency Report (QDR)
1 - SF 368, Category II QDR
2 - Phone/message/letter (not a Category I QDR)
3 - SF 361, Discrepancy in Shipment Report (DISREP)
4 - DLA quality audit generated
5 - DD Form 1225, Storage Quality Control Report
6 - SF 364, Report of Discrepancy (ROD), direct vendor delivery to customer
7 - SF 364, ROD, depot delivery to customer
8 - SF 364, ROD, depot customer return
9 - SF 364, ROD, depot contract receipt
A - DD Form 1608, Unsatisfactory Materiel Report (Subsistence)
B - SF 380, Report and Processing Medical Material Components, Type I (DD Form 1899)
C - SF 380, Report and Processing Medical Material Complaints, Type II
D - SF 380, Report and Processing Medical Material Complaints, Type III
E - DD Form 1938, GIDEP Alert
F - DD Form 1938, GIDEP Safe Alert

best copy available

APPENDIX A-7

SUFFIX CODES
(ISSUE TRANSACTIONS)

1. Number of characters: One.

2. Type of code: Alpha or numeric.

3. Suffix Codes are entered by elements of the distribution system to relate and identify "partial actions" taken on the original requisition without duplicating or causing loss of identity of the original document number. Processing elements of distribution systems will enter Suffix Codes in pos. 44 of documents involving partial quantities, such as:

   a. Referral actions for a partial quantity.

   b. Passing actions for a partial quantity.

   c. Release of a partial quantity.

   d. Rejection of a partial quantity.

   e. Backorder of a partial quantity.

   f. Backorder release of a partial quantity.

   g. Procurement of a partial quantity for direct delivery by a vendor.

   h. Any other application applicable to a partial quantity.

4. Suffix Codes do not relate to separate transportation units involved in the shipment of materiel. Neither do they identify final shipments nor differentiate between partial and final shipments.

5. Processing elements of distribution system will not enter Suffix Codes under the following conditions (pos. 44 will be left blank):

   a. Referral actions for a total quantity.

   b. Passing action for a total quantity.

   c. Release of a total quantity.

   d. Rejection of a total quantity.

   e. Backorder of a total quantity.

   f. Backorder release of a total quantity.

g. Procurement of a total quantity for direct delivery by a vendor.

h. Any other action applicable to a total quantity.

6. In assigning Suffix Codes, processing elements will ensure that the same code is not duplicated for the same document number. As a preventive measure, alpha characters will be reserved for computer assigned Suffix Codes and numeric characters will be reserved for manually assigned Suffix Codes.

7. When assigned, Suffix Codes will be sequentially advanced. A special pattern is established for SSD/DSSP activities except that the following will never be used:

ALPHA	NUMERIC
I, N, O, P, R, S, Y and Z	1 and 0

8. Storage activities responsible for processing documents containing suffix codes will always perpetuate the suffix codes onto related documents which they generate.

9. See appendix A-46 for receipt and adjustment transaction suffix codes.

APPENDIX A-8

SIGNAL CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: The purpose of the Signal Code in A series documents is two-fold in that it designates the fields containing the intended consignee (ship to) and the activity to receive and effect payment of bills, when applicable. In the case of tne Materiel Returns Program (FT series), the Signal Code designates the fields containing the intended consignor (ship from) and the activity to receive and process credits, when applicable. All requisitions/ excess reports will contain the appropriate Signal Code.

4. The following codes are assigned:

a. The coding structure and its meaning for A series documents

(1) When the materiel is to be shipped to the activity indicated in pos. 30-35, the Signal Code will be as follows:

(a) Code A - Bill to the activity in pos. 30-35.

(b) Code B - Bill to the activity in pos. 45-50.

(c) Code C - Bill to the activity in pos. 52.

(d) Code D - No billing required - Free issue. (Not to be used by DoD activities when submitting requisitions on GSA.)

(e) Code W - (For intra-Service use only.)

(2) When the materiel is to be shipped to the activity indicated in pos. 45-50, the Signal Code will be as follows:

(a) Code J - Bill to the activity in pos. 30-35.

(b) Code K - Bill to the activity in pos. 45-50.

(c) Code L - Bill to the activity in pos. 52.

(d) Code M - No billing required - Free issue. (Not to be used by DoD activities when submitting requisitions on GSA.)

(e) Code X - (For intra-Service use only.)

b. The coding structure and its meaning for FT_ series documents

(1) When the materiel is to be shipped from the activity indicated in pos. 30-35, the Signal Code will be as follows:

(a) Code A - Credit to the activity in pos. 30-35.

(b) Code B - Credit to the activity in pos. 45-50.

(c) Code C - Credit to the activity in pos. 52.

(d) Code D - No credit required.

(e) Code W - (For intra-Service use only.)

(2) When the materiel is to be shipped from the activity indicated in pos. 45-50, the Signal Code will be as follows:

(a) Code J - Credit to the activity in pos. 30-35.

(b) Code K - Credit to the activity in pos. 45-50.

(c) Code L - Credit to the activity in pos. 52.

(d) Code M - No credit required.

(e) Code X - (For intra-Service use only.)

APPENDIX A-9

FUND CODES

Fund Codes are contained in DoD 4000.25-7-M, Military Standard Billing System (MILSBILLS) and Supplement Number 1.

APPENDIX A-10

DISTRIBUTION CODES

1. Number of characters: Three.

2. Type of code: alpha or numeric.

3. Explanation:

a. The Distribution Field is a two-part field, of which the first part, pos. 54 is significant and will require decision when the entry is alphabetic or numeric 1, 4, 6 or 9. When an alphabetic or numeric 1, 4, 6 or 9 entry is contained in pos. 54, the activity designated by the entry will be furnished 100 percent supply and shipment status on all priorities in addition to status furnished IAW the entry in pos. 7. Instances wherein FMS transactions contain a numeric 0 in pos. 7, the activities designated in pos. 54 are responsible for furnishing status to country representatives or freight forwarders. The second part of the field (pos. 55 and 56) is discretionary for other types of internal control.

b. A numeric entry with the exception of 1, 4, 6 or 9 in pos. 54 will be nonsignificant to the system but will always be perpetuated on other documents. The alpha or numeric 1, 4, 6 or 9 entry is significant and will indicate the activity that is to receive additional status and will always be perpetuated on other documents. The alpha character will designate the activity of the Service (pos. 30).

c. Entries in pos. 55 and 56 may be alphas or numerics and will not require decisions, but will always be perpetuated on other documents.

d. The Military Service/Agency coordinators established for Service/Agency assignment of Distribution Codes are:

Army	Commander U.S. Army Maintenance Management Center ATTN: DRXMD-SS Lexington, KY 40511
Navy	Commander Naval Supply Systems Command Department of the Navy ATTN: SUP 0423 Washington, DC 20376
Air Force	Deputy Chief of Staff, Systems and Logistics U.S. Air Force Headquarters United States Air Force ATTN: AF/LGYPS Washington, DC 20330

Marine Corps	Commandant of the Marine Corps Headquarters United States Marine Corps ATTN: LPS-4 Washington, DC 20380
Coast Guard	Commandant U.S. Coast Guard ATTN: G-FLP-1/71 400th Street, SW Washington, DC 20590
Defense Nuclear Agency	Director Defense Nuclear Agency ATTN: LGSS Washington, DC 20305
General Services Administration	General Services Administration Federal Supply Service ATTN: FFC Washington, DC 20406
Defense Logistics Agency	Director Defense Logistics Agency ATTN: DLA-OSC Cameron Station Alexandria, VA 22314
Other DoD Activities	Director Defense Logistics Agency ATTN: DLA-LM Cameron Station Alexandria, VA 22314

4. The following codes are assigned:

APPENDIX A-11

PROJECT CODES

1. Number of characters: Three.

2. Type of code: Alphanumeric.

3. Source: MILSTRIP

4. Field Positions: 57-59

5. Explanation:

a. Project codes are used for the purpose of distinguishing requisitions and related documentation and shipments, as well as for the accumulation of intra-Service performance and cost data related to exercises, maneuvers and other distinct programs, projects and operations. The project code will be entered in positions 57-59. If no project code is applicable, positions 57-59 will be left blank.

b. Project codes are categorized into four groups and the authority to assign project codes varies by category. The following subparagraphs provide the definitions of each category of project codes and identify the Services/Agencies which are authorized to assign each category of project code.

(1) Category A - For use when no meaning of the code will be perpetuated outside the originating Service/Agency. The code will be perpetuated in all related documentation and will appear as a part of the shipping container markings. Project codes in category A may be assigned by those Services/Agencies identified in appendix B-2 by a distinct Service/Agency code, FEDSTRIP Civil Agency code, and by those Agencies using the multiused Service/Agency Code H.

(2) Category B - For use when recognition and exceptional processing actions have been prearranged between party Services/Agencies. Category B project codes will be announced only to participating Services/Agencies, in the format provided below. Assignment authority is the same as for category A. DLSSO-M will be included as an information addressee for review of compliance with established DoD policy.

(3) Category C - (3/alpha/alpha.) Assigned by the DoD MILSTRIP System Administrator for common purpose use by all or specified Services/Agencies. Dissemination of category C project codes will be by approved interim and/or formal MILSTRIP changes preceded by letter or message to the designated category C project code contact points.

(a) Assignment of category C project codes may be requested by OSD/JCS or by Services/Agencies. Service/Agency requests will be forwarded to the DoD MILSTRIP System Administrator by the designated Service/Agency category C project code contact points. Such requests will:

1. Include a statement of the intended use.

2. Indicate the Services/Agencies which will be involved (including designation of applicable Service/Agency codes).

3. Provide the effective date and termination date of the code.

(b) The following special assignments are in effect:

1. Project Codes JZC, JZM and JZO are designated category C and are authorized exceptions to the normal category C 3/alpha/alpha structure.

2. Project codes in the 3E_ series are reserved for assignment for mobilization exercises.

3. Project codes in the 3R_ series are reserved for assignment for Rapid Deployment Force (RDF) support.

(4) Category D - Office of the Secretary of Defense (OSD)/Joint Chiefs of Staff (JCS) project codes. Requisitions and materiel releases with category D project codes will be ranked above all other requisitions with the same priority designators for processing purposes. All category D project codes are in the 9_ series. The following definitions of specific series apply:

9/numeric/numeric - Reserved for assignment by OSD. Specific use of the code is to be determined by OSD. Such codes will be monitored by OASD(MRA&L) in coordination with the MILSTRIP System Administrator.

9/numeric/alpha - Identifies allocation at the level of the Joint Chiefs of Staff of significant materiel or equipment items that are on-hand or are becoming available for issue when resources are not sufficient to meet all requirements.

9/alpha/numeric - Identifies the establishment and subsequent release, at the level of the Joint Chiefs of Staff, of emergency, reserve or specified purpose stocks which are on-hand or are becoming available.

9/alpha/alpha - Identifies support provided to a program, project, force, activity or for other designated purposes.

(a) Initial dissemination of category D project codes will be accomplished in three phases, as follows:

1. OSD/JCS letter or message to Military Service/Agency Headquarters and to the DoD MILSTRIP System Administrator.

2. DoD MILSTRIP System Administrator letter or message to the designated Service/Agency category D Project Code Contact Points.

3. Category D Project Code Contact Point letter or message to all involved Service/Agency activities. Following the initial dissemination of category D project code assignments through the letter/message technique

described above, all category D codes will be published as part of the appendix unless prohibited by security classification or by code termination dates which occur prior to the next scheduled formal change.

(b) Assignment Constraints - JCS project codes will be assigned only to projects or programs clearly of direct interest to the Joint Chiefs of Staff acting on behalf of the Secretary of Defense. Authorization for use of a JCS project code will be for a specified period of time, and the Force/Activity Designator(s) to be used in conjunction with this code normally will be designated in the authorization.

(c) Assignment Requests - Requests for assignment of JCS project codes will be submitted, as appropriate, to the Joint Materiel Priorities and Allocations Board, an agency of the Joint Chiefs of staff, through the:

1. OSD

2. JCS

3. Military Service HQ

4. Unified or Specified Command Headquarters

c. Project Codes may be assigned by the Military Services, including the U.S. Coast Guard, DoD Agencies, Joint Chief of Staff, General Services Administration for civil agencies, and the MILSTRIP System Administrator for the purpose of identifying requisitions and related documentation, shipments, and the accumulation of intra-Service performance and cost data related to:

(1) Special projects.

(2) Programs.

(3) Certain operations.

(4) Exercises and maneuvers.

d. Project Codes, other than OSD/JCS assigned codes, do not provide nor imply any priority or precedence for requisition processing or supply decisions. Project Codes are not related to priority in any respect and these codes when used, do not alter or override the priority assigned a requisition or shipment. Requisitions containing Project Codes and shipments related thereto will be processed strictly IAW the assigned Priority Designator as prescribed in the Uniform Materiel Movement and Issue Priority System, and inferred/requested preferential treatment to the contrary will be disregarded.

e. Recognition of Project Codes by suppliers in another Service/Agency and the resultant special handling afforded requisitions and shipments will be limited to:

(1) Shipment Consolidation - Shipment consolidation for project materiel is limited to shipment units having the same Project Code. Project Code shipments will not be consolidated with non-Project Code shipments.

(2) Container Marking - Projects in category B or C, for which an unclassified project name or identifier has been published, will require both the Project Code and name or identifier to be marked on the exterior of shipment containers.

(3) Shipment Release/Movement Control - At the time of a project announcement for contingencies and similar rapid response situations, the initiating Service/Agency will provide the instructions as to procedures to be followed on requisitions which must arrive at destinations within specified time periods.

(4) Special Status Reports - When requisition status reporting is required to designate status of a project, it will be satisfied by the requisitioning Service. Special status reports when required will be obtained from an eligible recipient of status as identified in requisitions. Special status reports will not be required from inter-Service or inter-Agency suppliers.

f. Category B Project Codes submitted to other Services/Agencies will be submitted by narrative message or letter, depending upon the urgency of dissemination, in the sequence provided in subparagraph h. Action by the Services/Agencies will be on the basis of the message or letter dispatched by the assigning Service/Agency. The message or letter will be forwarded to the following agency focal point:

LETTER	MESSAGE
Director, Defense Logistics Agency ATTN: DLA-OSM/ESOC Cameron Station Alexandria, VA 22314	DLA/DLA-OSM/ESOC/Alexandria, VA

g. Project Codes are assigned as indicated below:

SERVICE/AGENCY	ASSIGNED GROUPING OF CODES
OSD/JCS	All codes in the 9_ series. (1) The code series 9-numeric-numeric is reserved for assignment by and will be monitored by OASD(I&L) in coordination with the MILSTRIP System Administrator. Dissemination may be by message or letter originated by either OASD(I&L) or by the System Administrator. Publication will be in the MILSTRIP manual.

SERVICE/AGENCY

ASSIGNED GROUPING OF CODES

(2) General criteria for JCS project code assignment are established, as follows:

(a) Allocation at the level of the Joint Chiefs of Staff of significant materiel or equipment items that are on-hand or are becoming available for issue when resources are not sufficient to meet all requirements, distinguished by JCS project code series 9-numeric-alpha.

(b) Establishment and subsequent release, at the level of the Joint Chiefs of Staff, of emergency, reserve or specified purpose stocks which are on-hand or are becoming available, distinguished by JCS project code series 9-alpha-numeric.

(c) Directing support for a program, project, force, activity, or other designated purpose, distinguished by JCS project code series 9-alpha-alpha.

(d) JCS project codes will be assigned only to projects or programs clearly of direct interest to the Joint Chiefs of Staff or to the Joint Chiefs of Staff acting in behalf of the Secretary of Defense. Authorization for use of a JCS project code will be for a specified period of time, and the force/activity designator(s) to be used in conjunction with this code normally will be designated in the authorization.

(e) Requests for assignment of JCS project codes will be submitted, as appropriate, to the Joint Materiel Priorities and Allocations Board, an Agency of the Joint Chiefs of Staff, through the:

SERVICE/AGENCY	ASSIGNED GROUPING OF CODES
	1. OSD 2. OJCS 3. Military Service Headquarters 4. Unified or specified command headquarters. (f) Assignment will be coordinated with the MILSTRIP System Administrator prior to dissemination. Dissemination may be by message or letter originated either by OJCS or by the System Administrator. Publication will be in the MILSTRIP manual.
Military Services/Agencies	Any project code alpha, numeric, or alphanumeric except those reserved for OSD/JCS. The Service/Agency code in pos. 30 will identify the assigning Service in instances of otherwise duplicate codes.

h. Codes assigned by the Services/Agencies will be announced as discussed in subparagraph f, in the following sequence: (Note: None or N/A will be entered if any data element is blank.)

TITLE	EXPLANATION
Service Code	Code which will appear in pos. 30 of MILSTRIP documentation.
Project Code	Code assigned by the Service/Agency under the provisions of DoD 4140.17-M.
Unclassified Name of Identifier	The name assigned the project, if any, in addition to the code for easy identification.
Service Monitor/Coordinator	Identity of the activity within the Service/Agency which is monitoring or coordinating the project. (DoDAAD code if applicable.)
Announcement Date	Date when supply sources will commence required action relative to the code.

TITLE	EXPLANATION
Termination Date	Specific date when the code will be discontinued in use. The term "continuing" or "indefinite" is not permitted. If the termination date is not known at the time of project code announcement, a date one year after the Announcement Date (Data Element 5) will be entered. The Service/Agency may extend this date any time within the one year period if appropriate. When the termination date is reached, requisitioners will cancel unfilled requisitions by document number in accordance with MILSTRIP cancellation procedures. Unfilled requisitions which are not canceled will be processed as Category A projects. Project Codes for OSD/JCS projects will be automatically deleted from this appendix unless extended. When appropriate, Services/ Agencies will cancel/extend Project Codes and requisitions prior to the published termination date.
Reference and Remarks	Documents establishing/specifying special controls for the project. The Service/Agency establishing the project is responsible for ensuring that suppliers are provided copies of these documents, if not available on an inter-Service basis. If a joint regulation is cited, all Service/Agency numbers will be included in the Project Code announcement. An assembly point for shipments may be designated in this column by use of the DoDAAD Code for the assembly point. The DoDAAC of the assembly point will be entered in requisitions by requisitioners as the "ship to" address. Shipping activities are not required to use the project code announcement to determine the "ship to" address unless inter-Service agreements are negotiated for special routing of shipments. Only one assembly point per Project Code may be assigned. The purpose of the project may be announced at the discretion of the assigning Service/Agency.

i. OSD/JCS Project Codes:

SERVICE CODE	CODE	NAME IDENTIFIER	MONITOR COORDINATOR	ANNOUNCEMENT	TERMINATION	REFERENCE
Any Service Code as authorized by JCS/DoD	9DD		JCS-J4	11 Oct 73	30 Jun 77	JCS Msg 202206Z Apr 76
	9JJ	Nickel Spout	JCS/J4 DSAA, Mr. Kain OX 7-4882	30 Sep 74	30 Jun 77	JCS Msg 202206Z Apr 76
	9PP	Operation Night Peace	Exec Agent DA (DALO-SMSD)	1 Nov 75	31 Oct 76	U.S. Assistance to the U.N. Peacekeeping and observe Force

j. Intra- and inter-Service Project Codes (Project Code category C)

PROJECT CODE	USE
JZC	Used by overseas Service activities to designate part numbered or decentralized requisitions (nonstocked) in support of overseas located Commercial Construction Equipment (CCE).
JZM	Used by overseas Service activities to designate part numbered or decentralized (nonstocked) NSN requisitions in support of overseas located Materiels Handling Equipment (MHE).
JZO	Used by overseas Service activities to designate part numbered or decentralized (nonstocked) NSN requisitions in support of overseas located commercially designed wheeled vehicles.

PROJECT CODE	USE
3AA	Used by Service activities to identify requisitions submitted to obtain nonreimbursable issues to satisfy Prepositioned War Reserve Materiel stock deficiencies. Project Code may be entered in either funded or unfunded requisitions. (See DLAR 4740.43, AR 725-11, AFR 67-20, NAVSUPINST 4080.21A, MCO 4080.3.)

APPENDIX A-12

ADVICE AND STATUS CODES

1. Number of characters: Two.

2. Type of code: Alphanumeric.

3. These codes are dual-use and their application and coding structures are dependent upon the directional flow of the documents.

4. Advice Codes (part 2 this appendix) flow from requisition originators to initial processing points and are thereafter perpetuated into passing actions and Release/Receipt documents. The purpose of Advice Codes is to provide coded instructions to DSCs when such data are considered essential to supply action and entry in narrative form is not feasible.

5. Status Codes (part 3 this appendix) may be alpha/alpha and alpha/numeric and flow from DSCs to requisitioners, consignee, or service designated control office, or from a Defense Automatic Addressing System (DAAS) facility to a DAAS subscriber, or from storage activities to DSC/ICP to inform of the status of MROs.

6. The attached chart (part 1 this appendix) depicts the method of assigning these codes as well as a listing of codes.

*PART 1 - CATEGORY ASSIGNMENT OF ADVICE AND STATUS CODES

ADVICE CODES - NUMERIC/ALPHABETIC

For DSCs, interservice, and General Services Administration transactions

CODE	EXPLANATION
2 A	through Z (Except 0 and I)
2 1	through 9
3 1	through 9
3 A	through Z (Except 0 and I)
	*For intra-Army usage
1 A	through Z (Except 0 and I)
	*For intra-Air Force usage
6 A	through Z (Except 0 and I)
	*For intra-Navy usage
5 A	through Z (Except 0 and I)
	*For intra-Marine Corps usage
4 A	through Z (Except 0 and I)
	*For intra-GSA usage
7 A	through Z (Except 0 and I)
	*For intra-DLA usage
8 A	through Z (Except 0 and I)
	Reserved
9 A	through Z - Not to be used
0 A	through Z - Not to be used

STATUS CODES - ALPHABETIC/ALPHABETIC AND ALPHABETIC/NUMERIC

For DSCs, interservice, and General Services Administration transactions

CODE	EXPLANATION
B A	through Z (Except 0 and I)
B 1	through 9
C A	through Z (Except 0 and I)
C 1	through 9
	*For intra-Army usage
A A	through Z (Except 0 and I)
A 1	through 9
	*For intra-Air Force usage
F A	through Z (Except 0 and I)
F 1	through 9
	*For intra-Navy usage
N A	through Z (Except 0 and I)
N 1	through 9
	*For intra-Marine Corps usage
M A	through Z (Except 0 and I)
M 1	through 9
	*For intra-GSA usage
G A	through Z (Except 0 and I)
G 1	through 9
	*For intra-DLA usage
H A	through Z (Except 0 and I)
H 1	through 9
	Reserved
	All other alphabetics
	(0 and I not to be used)

*The codes assigned for DSCs, interservice, and GSA transactions use will also be recognized and used for intraservice transactions and will not be duplicated within the service assignment latitude.

PART 2 - ADVICE CODES - NUMERIC/ALPHABETIC
(From requisitioner to DSC)

CODE	EXPLANATION
2 A	Item not locally obtainable through manufacture, fabrication, or procurement.
2 B	Requested item only will suffice. Do not substitute/interchange. Also applies to "obsolete/inactivated" items previously rejected with Status Code CJ or CY.
2 C	a. Do not backorder. Reject any unfilled quantity not available to meet SDD/RDD. Suitable substitute acceptable. b. When entered in Branch Name Resale Subsistence Item requisitions for overseas, will be interpreted to authorize rejection of unfilled quantities not due to arrive in the overseas command by the RDD plus 30 days. Rejection status will be furnished the customer when it is determined by the supply source that unfilled requisitioned quantities cannot be shipped in time to arrive at the overseas destination by RDD plus 30 days. This may occur as a result of vendors failure to ship required quantities to the CONUS transshipment depots by contract delivery date plus 15 days or, upon receipt at the CONUS transshipment depot, it is determined that the shipment could not reach the overseas destination by the RDD plus 30 days.
2 D	Furnish exact quantity requested (i.e., do not adjust to unit pack quantity).
2 E	Free issue. Stock lists or other publications offer this materiel without reimbursement. (To be used with Signal Code D or M on inter-Service requisitions.)
2 F	Item known to be coded "obsolete" but still required for immediate consumption. Service coordinated/approved substitute is acceptable. If unable to procure, reject with Status Code CJ.
2 G	Multiple use: (1) Ship new stocks or stocks having new appearance; (2) Strategic mission requires latest model and configuration (electronic tubes); (3) Strategic mission requires newest stock only (photographic file or aerial requirements for ammunition devices or cartridges); (4) Anticipated usage required latest expiration dates only (biologicals).
2 H	Special textile requirement for use in Airborne Operations where personal safety is involved.
2 J	Do not substitute or backorder any unfilled quantities.

CODE	EXPLANATION
2 K	Item being requisitioned from CONUS pursuant to balance of payments program. (Used only by overseas requisitioners).
2 L	Quantity reflected in quantity field exceeds normal demands; however this is a confirmed valid requirement.
2 N	Item required in one continuous length as expressed in pos. 25-29 and UI in pos. 23-24. "No other configuration is acceptable and/or multiples of the unit pack are not acceptable".
2 P	Item required in one continuous length as expressed in field positions 25-29 and the Unit of Issue in field positions 23-24. If requirements exceeds the unit pack length, multiples of the unit pack are acceptable.
2 T	Deliver to the ultimate consignee by the PDD or RDD entered hereon or cancel requirement.
2 W	This requisition is submitted for free issue of assets above the Approved Force Acquisition Objective on Fill or Kill basis. (Applicable to MAP/MASF requisitions only.)
21	Combination of Advice Codes 2L and 2T.
22	Combination of Advice Codes 2C and 2L.
23	Combination of Advice Codes 2L and 2G.
24	Combination of Advice Codes 2B and 2G.
25	Combination of Advice Codes 2A and 2F.
26	Combination of Advice Codes 2B and 2L.
27	Combination of Advice Codes 2D and 2L.
28	Combination of Advice Codes 2N and 2L.
29	Combination of Advice Codes 2D and 2G.
3 A	This requisition is for assets located in the DRMO activities, as advertised by DPDs for which the requisitioner desires to inspect materiel prior to shipment. Fill or Kill. Use of this code is limited to requisitions with J, K, L, or N in pos. 40.
3 B	Item being requisitioned has been designated as commercial type item. Unable to obtain item from commercial sources. Request supply of requisitioned quantity be accomplished against the FMS case reflected in pos. 48-50.

CODE	EXPLANATION
3 C	The item required is in FSC 5510 (Lumber and Related Basic Wood Materials) and the end-use application is for high appearance, cabinetry, furniture. Lumber grades associated with this application are B and better, C and better, D and better.
3 D	The item required is in FSC 5510 (Lumber and Related Basic Wood Materials) and the end-use application is for structural light framing. Lumber grades associated with this application are #1, #2, and #3, and Select Structural.
3 E	The item required is in FSC 5510 (Lumber and Related Basic Wood Materials) and the end-use application is for light framing. Lumber grades associated with this application are Construction, Standard, Economy, and Utility.
3 F	The item required is in FSC 5510 (Lumber and Related Basic Wood Materials) and the end-use application is for crating, boxing, dunnage, blocking, or bracing. Lumber grades associated with this application are #2, #3, Standard, Economy Common, and Utility.
3 G	The item required is in FSC 5510 (Lumber and Related Basic Wood Materials) and the end-use application is for beams, stringers and timbers. Lumber grades associated with this application are #1, #2, and Select Structural.
3 H	The item required is in FSC 5530 (Plywood and Veneer) and the end-use application is for appearance of both sides relative to cabinets, signs, and built-ins. The plywood grade associated with this application is A-A Interior.
3 J	The item required is in FSC 5530 (Plywood and Veneer) and the end-use application is for appearance of one side relative to cabinets, signs, partitions and fences. The plywood grades associated with this application are A-B Interior and Exterior.
3 K	The item required is in FSC 5530 (Plywood and Veneer) and the end-use application is for appearance of one side relative to exterior structures, gable ends and bulletins. The plywood grades associated with this application are A-C Exterior.
3 L	The item required is in FSC 5530 (Plywood and Veneer) and in end-use application only one side will show relative to wall paneling, ceiling, displays, and partitions. The plywood grades associated with this application are A-D Interior.
3 M	The item required is in FSC 5530 (Plywood and Veneer) and the end-use application is relative to concrete forms, good face for paintability, counter, and table tops. The plywood grades associated with this application are B-B and B-C Exterior, B-D Interior, and B-B HDQ.

CODE	EXPLANATION
3 N	The item required is in FSC 5530 (Plywood and Veneer) and the end-use application is relative to outside construction, pallets, crates, subflooring, siding, roof decking, wall and floor sheathing, target ranges, and containers. The plywood grades associated with this application are C-C Exterior, D-D Interior, and CDX.
3 P	Item required is in FSC 5510 or 5530 and because of the single purpose use of the item, identification of the end-use application is not necessary. Examples within FSC 5510 are all hardwood items, poles, pilings, crossarms, ties, decking, ship lumber, molding, stripping, stepping, scaffold plank, vehicle lumber, wedges, posts, stakes, plugs, laths, dowels, and logs. Examples within FSC 5530 are all treated, fire retardant, boat and ship construction, hardwood, aircraft flatpanel and veneer items.

(Excess Transaction Advice Codes)

3 T	Document has been edited by DAAS. Records indicate that NSN is correct and that the activity identified in pos. 4-6 is the managing ICP/IMM.
31	Combination of Advice Codes 2J and 2G.
32	Combination of Advice Codes 2C and 2T.
33	Combination of Advice Codes 2L and 2J.

DRMS Intransit Control Advice Codes

CODE	EXPLANATION
34	Requested item only will suffice. Do not substitute/interchange. Item required in on continuous length as expressed in pos. 25-29 and unit of issue in pos. 23-24. No other configuration is acceptable and/or multiples of the unit pack are not acceptable. (Combination of advice codes 2B and 2N.)
35	There is a quantity variance between the DRMS receipt quantity and the AS3. (For use in DI Code AFX and AFZ documents by DRMS only.)
36	A DRMO receipt exists for which a matching AS3 has not been received. (For use in DI Code AFX and AFZ documents by DRMS only.)
37	An AS3 has been received for which a matching DRMO receipt has not been received. (For use in DI Code AFX and AFZ documents by DRMS only.)

CODE	EXPLANATION
39	Requested item only will suffice. Do not substitute/interchange. Item required in one continuous length as expressed in pos. 25-29 and the unit of issue in pos. 23-24. If requirement exceeds the unit pack length, multiples of the unit pack are acceptable. (Combination of advice codes 2B and 2P.)

PART 3 - STATUS CODES - ALPHABETIC/ALPHABETIC AND ALPHABETIC/NUMERIC
(From DSC to Authorized Activity)

1. Supply status (except rejection: status, Code C) predicts shipment on time as specified by the PDD or the RDD unless specific supply status is received advising of an anticipated delay or an estimated availability date. Latest status can be determined by "transaction dates" entered in pos. 70-73.

CODE	EXPLANATION
B A	Item being processed for release and shipment. The Estimated Shipping Date is contained in field positions 70-73 when provided in response to a followup.
B B	Item backordered against a due-in to stock. The estimated shipping date for release of materiel to the customer is contained in pos. 70-73.
B C	Item on original requisition containing this document number has been backordered. Long delay is anticipated and estimated shipping date is in pos. 70-73. Item identified in the stock number field (or Remarks field if stock number field cannot accommodate the item number), which is not an automatic/coordinate substitute, can be furnished. The price of the substitute item is in pos. 74-80. If desired, submit a cancellation for the original requisition and submit a new requisition (see note) for the offered substitute.
B D	Requisition is delayed due to need to verify requirements relative to authorized application, item identification, technical data, or when the intent to procure for direct delivery is known. When the intent is to place the requirement on direct delivery, the estimated shipping date will be entered in pos. 70-73. Upon completion of review or procurement, additional status will be provided to indicate action taken.
B E	Depot/storage activity has a record of the MRO but no supporting transaction/record of the action taken. (Depot/storage activity response to ICP request for MRO status, for use with DI Code AE6 only).
B F	No record of your document for which your DI Code AF followup or cancellation request was submitted. For requisitioners, if appropriate deobligate funds and if item is still required, submit a new requisition. (See note). Used as well by shipping activities in response to DI codes AFX/AFZ followup from DPDS to indicate that no shipment had actually been made or that no record of shipment could be located.

CODE	EXPLANATION
B G	One or more of the following fields have been changed: a. Stock Number (as the result of a formal catalog change). (1) Requisitioned NSN has been replaced by or consolidated with NSN in stock number field. (2) NSN is assigned to part number that was requisitioned. (3) FSC has changed but NIIN remains the same as originally requisitioned. Review NSN (FSC and NIIN) to ensure that reguisition under process is for desired item. If NSN is not for desired item submit cancellation request to source of supply. b. Unit of Issue (as the result of a formal catalog change). c. Requisitioned part number has been identified to/replaced by the part number reflected in the stock number field. Examine quantity and unit price as a result of the above changes. Revise appropriate records accordingly. Additional status will be provided by the supply source to indicate further action on this requisition.
B H	Service/coordinated/approved substituted/interchangeable item, identified in stock number field will be supplied. Examine unit of issue, quantity and unit price fields for possible changes. Revise appropriate records accordingly. Additional status will be provided.
B J	Quantity changed to conform to unit pack, adjust the due in records accordingly. Unit of issue is not changed.
B K	Requisition data elements have been modified as requested. Examine data fields in this status document for current requisition data.
B L	Notice of Availability was forwarded to the country representative or freight forwarder on date entered in pos. 70-73.
B M	Your document forwarded to activity indicated in pos. 67-69. Forward all future transactions for this document number to that activity.
B N	Requisition being processed as free issue. Signal and fund code fields corrected as noted. Adjust local fund obligation records.

CODE	EXPLANATION
B P	Item is on backorder or procurement for direct delivery. Shipping action will be delayed. Revised estimated shipping date is in pos. 70-73.
B Q	Canceled. Results from receipt of cancellation request from requisitioner, consignee, manager, or other authorized activity. Also applies to cancellations resulting from deletion of an activity from the DoDAAD. Deobligate funds, if applicable.
B R	Canceled. Requisitioning activity authorized cancellation in response to materiel obligation validation request furnished by processing point.
B S	Canceled. Requisitioning activity failed to respond to materiel obligation validation request from processing point.
B U	Item being supplied against your Foreign Military Sales Case Designator reflected in pos. 48-50; or your Grant Aid Program and Record Control Number reflected in pos. 46-50. This document represents a duplicate of the requisition prepared by the U.S. Military Service.
B V	Item procured and on contract for direct shipment to consignee. The contract shipping date is entered in pos. 70-73. Cancellation, if requested, may result in billing for contract termination and/or transportation costs, if applicable.
B W	Your FMS/Grant Aid requisition containing this document number has been received by the ILCO and submitted to the supply system. A current ESD is not presently available but will be provided by subsequent status transactions. (May be used by ILCOs in acknowledging requisition receipt or in reply to followup when ESDs are not available.)
B X	Reserved for Air Force/DEPRA interface.
B Y	Depot/storage has previously denied the MRO by DI Code A6_. (Depot/storage activity response to ICP request for MRO status, for use with DI Code AE6 only.)
B Z	(Deleted. See BM.)
B 3	The RAD contained in the original requisition is unrealistic. The date in pos. 70-73 is the date when the materiel will be available.
B 2	Status of supply or procurement action precludes requested modification.

CODE	EXPLANATION
B 4	Canceled. Results from receipt of cancellation request from requisitioner, consignee, manager or other authorized activity. Do not deobligate funds. Billing for materiel or contract termination charges will be made.
B 5	The activity identified by the code in pos. 4-6 is in receipt of your followup request. Action to determine current status and/or improve the ESD is being attempted. Further status will be furnished.
B 6	The materiel applicable to the requisition requested for cancellation has been diverted to an alternate consignee.
B 7	Unit price change. The latest unit price for the item identified by the stock or part number in pos. 8-22 is reflected in pos. 74-80.
B 8	Quantity requested for cancellation or diversion not accomplished.
B 9	The activity identified by the code in pos. 4-6 is in receipt of your cancellation request. Action to cancel the demand or to divert the applicable shipment is being attempted. Do not deobligate funds or delete due-in. Advice of final action will be furnished in subsequent status transactions.
D 7	Requisition modifier rejected because of errors in one or more data elements.

2. Rejection Codes. All interservice rejections will contain C in pos. 65 followed by an alphabetic or numeric character in pos. 66 which will be furnished the appropriate "reason for rejection." Items rejected, if still required, will be rerequisitioned utilizing new document numbers with the requisitioner ensuring that he has considered the reason for the previous rejection and corrected or adequately elaborated on the new requisition, in order to preclude similar rejection.

CODE	EXPLANATION
C A	Rejected. (1) Explanation for rejection is stated in the Remarks field (continued on reverse side of card as necessary). In this case, the status card will be mailed. This code will not be used when other status codes have been established to convey a specific condition. (2) When due to security reasons, or space limitation, explanation for rejection will be furnished by separate media referring to pertinent document numbers and National Stock Number or FSCM and part number. In this case, the Remarks block will be left blank and CA status cards may be transmitted electrically.

CODE	EXPLANATION
C B	Rejected. Initial requisition requested rejection of that quantity not available for immediate release or not available by the SDD or RDD. Quantity field indicates quantity not filled.
C C	Rejected. Nonconsumable item. Your Service is not a registered user. Submit your requisition to your Service ICP for registration action.
C D	Rejected. Unable to process because of errors in the quantity, date, and/or serial number fields. a. If received in response to a requisition and the materiel is still required, submit a new requisition (see note) with correct data field entries. b. If received in response to a cancellation request and materiel is not required, submit a new cancellation request with a valid quantity entry.
C E	Rejected. Unit of issue in original requisition, which is reflected in pos. 23-24 of this status document, does not agree with ICP unit of issue and cannot be converted. If still required, submit a new requisition (see note) with correct unit of issue and quantity.
C F	(Deleted).
C G	Rejected. Unable to identify requested items. Submit a new requisition (see note) and furnish correct NSN or Part Number. If correct NSN or part number is unknown or if Part Number is correct, submit a new requisition (see note) on DD Form 1348-6 furnishing as much data as is available. SF 344 may be submitted by authorized activities (see appendix A).
C H	Rejected. Requisition submitted to incorrect single manager/technical service/distribution depot and correct source cannot be determined. Research for correct source and submit a new requisition (see note).

CODE	EXPLANATION
C J	Rejected. a. Item coded (or being coded) Obsolete or Inactivated item in stock number field if different from item requisitioned, can be furnished as a substitute. Unit price of the substitute item is in pos. 74-80. b. If offered substitute is desired, submit a new requisition (see note) with substitute item stock number. c. If only original item is desired submit a new requisition (see note) for procurement on DD Form 1348-6. SF 344 may be submitted by authorized activities (see appendix A). Cite Advice Code 2B. Furnish technical data, e.g., end item usage, component, make, model, series, serial number, drawing, piece and/or part number, manual reference, applicable publication.
C K	Rejected. Unable to procure. No substitute/interchangeable item is available. Returned for supply by local issue of next higher assembly, kit, or components. Suggest fabrication or cannibalization. If not available, submit a new requisition (see note) for next higher assembly, kit, or components.
C L	(Deleted. Use CK.)
C M	Rejected. Fund obligation not cited and/or item is not or no longer free issue. Submit a new funded requisition (see note).
C N	Rejected. Nonconsumable item. Your Service does not receive requisition support on this item or your requirement is a nonrecurring demand which cannot be satisfied. Support will be provided upon submission of a MIPR by your Service ICP.
C P	Rejected. Source of supply is local manufacture, fabrication, procurement, or direct ordering from Federal Supply Schedule. If not available locally, or activity lacks procurement authority, submit a new requisition (see note) with Advice Code 2A.
C Q	(Deleted. Use CR.)
C R	Rejected. a. Item requested is command or service regulated or controlled. Submit a new requisition (see note) through appropriate channels.

CODE	EXPLANATION
	b. Requisition is for controlled substance/item and "Ship To" address is not authorized recipient as designated by parent Service/Agency headquarters.
C S	Rejected. Quantity requisitioned is suspect of error or indicates excessive quantity. Partial quantity being supplied. Quantity field in this transaction reflects quantity rejected. If requirement still exists, submit a new requisition for the required quantity using Advice Code 2L.
C T	Rejected. Item/NSN cited in the requisition needs further identification. Submit new requisition using DD Form 1348-6 and citing all prescribed data available on the requisitioned item, i.e., FSCM, part number, model, series, serial number, publication reference, item usage.
C U	(Deleted. Use CK.)
C V	Rejected. Item prematurely requisitioned. The effective date for requisitioning is contained in pos. 70-73.
C W	Rejected. Item not available or is a nonmailable item whose transportation costs are uneconomical. Local procurement is authorized for this requisition only. If item cannot be locally procured submit a new requisition (see note) using Advice Code 2A.
C X	Rejected. Unable to identify the or "Bill To" and/or "Ship To" address as designated by the signal code, or the signal code is invalid. If still required, submit a new requisition (see note) with valid data field entries.
C Y	(Deleted. Use CJ.)
C Z	Rejected. Subsistence item not available for resale. Reserved for troop issue only.
C 1	(Deleted. Use CA if ever required.)
C 2	Rejected. International Logistics Program funds are not available to process this requisition. (This code will be used between ILCO and requisitioners only.)
C 3	Rejected. Applies to subsistence only. Vendor cannot make delivery during shipping period.
C 4	Rejected. Applies only to subsistence. Item is seasonal and not available for delivery during current shipping period.

CODE	EXPLANATION
C 5	Rejected. Requisitioner, upon inspection of materiel located in the DPDO activity, rejected acceptance due to condition of materiel/unacceptable substitute and/or materiel incorrectly identified. This status code is generated by the DPDO and furnished to the appropriate status recipients.
C 6	Rejected. Requisition is for commercial type item which is not authorized for supply under the Foreign Military Sales program. If unable to obtain desired item from commercial sources, submit a new requisition (see note) containing Advice Code 3B.
C 7	Rejected. Document identifier code indicates this is a remarks/exception data document. Supply source has no record of receipt of remarks/exception data. If still required, submit a new requisition. (See note)
C 8	Rejected. Vendor will not accept order for quantity less than the quantity indicated in pos. 76-80. If requirement still exists, submit a new requisition (see note) for a quantity that is not less than that reflected in pos. 76-80.
C 9	Rejected. Applies only to subsistence. Quantity in pos. 25-29 canceled due to nonavailability during shipping period. If required in subsequent shipping period submit a new requisition.

NOTE: Submit a new requisition using a new document number with a current date.

PART 4 - ADVICE CODES - NUMERIC/ALPHABETIC
(Intra-DLA Usage)

CODE	EXPLANATION
8 A	Bailment. Ship via truck. Commercial Bill of Lading collect. Date indicated in pos. 62-64 is the date materiel must be available for movement to contractors.
8 B	Bailment. Contractor will pick up in his own vehicle. Date indicated in pos. 62-64 is the date materiel must be available for pickup by contractor. (If contractor fails to pick up within 5 days from the RDD, phone appropriate DSC and follow the instructions of the DSC.)
8 C	Item being supplied consignee for scheduled repair under Project Order Number contained in pos. 54-56 of the MRO.
8 D	Item being requisitioned to increase Service assets positioned in DLA Distribution Depot under DSC custodial accountability.
8 E	Service-owned item being returned to DLA ownership to decrease Service assets positioned in DLA Distribution Depot under DSC custodial accountability.
8 F	Service-owned assets transferred to DLA-ownership when an emergency demand exists and DLA stocks are depleted.
8 G	Service-owned item under DSC custodial accountability being "redistributed" between DLA Distribution Depots by record change only.
8 H	Service-owned item under DSC custodial accountability being transferred in place to Service accountability.
8 J	Service-owned item under DSC custodial accountability being shipped to DPDO.
8 K	Local Purchase Buy created against not-in-stock item. Perishable subsistence only.
8 L	Service-owned item under DSC custodial accountability being shipped to assembly.
8 P	Reserved for subsistence.

PART 5 - STATUS CODES - ALPHABETIC/ALPHABETIC and ALPHABETIC/NUMERIC
(Intra-DLA Usage)

CODE	EXPLANATION
H G	Rejected. Item not authorized for commingled storage at the specified DLA Distribution Depot.
H H	Rejected. DLA Stock position at the gaining storage location precludes "redistribution" action by record change only.
H J	Rejected. Item not recorded available under Service ownership in prescribed location/condition.

PART 6 - STATUS CODES - ALPHABETIC/ALPHABETIC

In addition to the status Codes appearing in part 3, the following codes will be entered in the supply section of the Requisition Control and Status File and will appear on appendix F-114 under the conditions stated.

CODE	EXPLANATION
B T	Where a response to a mechanical inquiry to the Item Intelligence File (IIF) indicates multiple NSNs.
D D	When a Direct Delivery has been confirmed.
S S	When an MRO has been confirmed.
Z B	When a Manager Review Reentry Card, appendix B-127, has been output.
Z C	When manual/mechanical action has been taken to procure for Direct Delivery and Award information has not yet been posted to the Due-in File. Upon award the ZC will convert to BV Status.
Z D	When an Interrogation to DAAS has been initiated to ascertain the correct Source of Supply and/or the correct NSN.
Z J	This code indicates a non-NSN requisition that was mechanically forwarded to Procurement for purchase action has subsequently been identified to an NSN and the Procurement action has been canceled and the requisition is being recycled into the next multidaily run for appropriate supply action.
Z M	This code indicates that a requisition has been received for a Command Controlled Regulated item and is under review by the command for approval. If no approval is received within 30 days of this status the Z will be changed to B to reflect BM.

APPENDIX A-13

MANAGEMENT CODES

1. Number of characters: One.

2. Type of code: Alphanumeric.

3. Explanation

a. Management Codes provide additional information about a requisition, issue, receipt, adjustment, or other action that is not otherwise provided.

b. The codes authorized for use by DSCs and between distribution depots and DSCs are listed below. Use of these codes by distribution activities will be in conformance with specific procedural instructions.

4. RECEIPT TRANSACTION (D4_, D6_, DD_, DF_, DU_ and DW_ Document Identifiers).

CODE	DEFINITION
A	Shipment authorized/accountability established. (Indicates DICOMSS materiel in DU_ series from DPSC.)
B	Procurement materiel retained at "no charge".
C	Reserved.
D	Inspection and acceptance at destination (DU_ series).
E	Inspection and acceptance at origin (DU_ series).
F	Inspection at origin and acceptance at destination (DU_ series).
G	Shipment disapproved/accountability rejected.
H	Loss or gain of perishable subsistence (variable weight items) resulting from rounding receipt quantities to compute average weight per piece.
I	Not to be assigned.
J	Materiel condemned upon receipt. Quantity indicated destroyed. Certificate of destruction on file.
K	Unassigned.
L	Materiel lost during receipts processing. Extensive research has been conducted.
M	Materiel condemned upon receipt. Quantity indicated shipped direct to property disposal activity.
N	Return of undelivered (frustrated) cargo (with accompanying shipper documentation).
O	Not to be assigned.
P	Materiel received without documentation. Support documentation and document number created storaged activity.
Q	Multiple use: a. Return of materiel improperly identified at time of shipment from depot. b. Return of Government-owned containers.
R	Materiel Receipt Discrepancy; Discrepancy Report submission required. Applicable only for DIC D4_, D6_.

CODE	DEFINITION
S	Vendor Misdirected Shipment; Discrepancy report required. Materiel meets acceptance criteria in the contract.
T	Materiel condemned, shelf-life has expired and cannot/will not be extended. Quantity indicated shipped direct to property disposal activity or other authorized/required disposal action has been taken.
U	Quantity Received Exceeds Allowable Contract Quantity Variance; Discrepancy report required. Materiel otherwise meets acceptance criteria in the contract.
W thru X	Reserved for future assignment DoD.
Y	Materiel lost intransit. DSC has evidence of shipment but depot has no evidence/record of receipt. Unsuccessful tracer action previously initiated.
Z	Exception data entered in remarks or follows by separate correspondence.
0 thru 9	Reserved for future assignement by DoD.

5. ISSUE TRANSACTION (D7_, A_, AE6/AEJ, and C5_ Document Identifiers).

CODE	DEFINITION
A	Resale item, preinventory.
B	Adjustment. Quantity field indicates quantity overshipped due to item packaging charateristics (DIC D7_ only).
C	Canceled. Includes undelivered FMS documented material returned to stock and DROs against commingled stocks only (DIC D7_ and AE6/AEJ with Status Code BY, and DIC A6.
D	Adjustment. Quantity field indicates quantity undershipped due to item packaging characteristics (DIC D7_ only).
E	Materiel condemned (shelf-life item), shelf-life has expired and cannot/will not be extended quantity indicated destroyed. Certificate of distruction on file.
F	Issue newest stock only (DIC A5_ only).
G	Issue stock having at least 1 year shelf-life remaining (DIC A5_ only).
H	Resale item, post inventory.
I	Not to be assigned.
J,K, and L	Unassigned.
M	Not to be used in DLA Distribution System.
N	Nonrecurring demand (DIC D7_ and DIC A4_ (see appendix A-6).
O	No demand (DIC D7_ and DIC A4_) (see appendix A-6).
P	Nonrecurring demand for special program requirements (DIC D7_ and DIC A4_) (see appendix A-6).
Q	Reserved for future assignment by DoD.
R or	Recurring demand (DIC D7_ and DIC A4_) (see appendix A-6).
R	Preinventory document (DIC A5_ and DIC C5_).
S	Commissary resale demand.

CODE	DEFINITION
T	Materiel condemned, shelf-life has expired and cannot/will not be extended. Quantity indicated shipped direct to property disposal activity or other authorized/required disposal action has been taken.
U	Post Inventory document (DIC A5_ and DIC C5_).
V thru Y	Reserved for future assignment by DoD.
Z	Exception data entered in remarks or follows by separate correspondence (all DICs).
0	Reserved for future assignment by DoD.
1	Denied. Stock exhausted for stock number and condition code requested. Unsuccessful search of stored materiel has been made. Materiel may be on hand and recorded for a condition code other than the requested code (DICs A6_, AE6/AEJ, and D7_).
2	Denied. Materiel in physical location found to be in other than recorded condition. Materiel adjustment transaction will be provided to the managing DSC. This code is used to indicate to physical materiel has, for example, deteriorated, been damaged, for found to be incomplete and requires the assigning of a new condition code (DIC A6_, AE6/AEJ, and D7_).
3	Denied. Materiel not available having the required shelf-life as specified on the release document. Materiel adjustment transaction is not pertinent (DICs A6_, AE6/AEJ, and D7_).
4	Denied. Materiel not available in the type pack specified on the release order (Subsistence only); or specified lot number cannot be released (Ammunition only) (DICs A6_, AE6/AEJ, and D7_).
5	Denied. Materiel in physical location found to be misidentified. Reidentification of assets in process and storage location will advise results by DD Form 1225. Assets not available in the physical location to supply requests stock number (DIC A6_, AE6/AEJ, and D7_).
6	Denied. No record of NSN at storage activity. This denial results from review of the storage records and the storage activity has not conducted a physical search for the item. (DIC A6_ from NCAD or DICs D7_ and A6_ from other than a DLA defense depot.)
7	Denied. Zero balance in an issuable condition indicated on storage activity custodial/memorandum record and no record location exists. This denial results from review of the storage records and the storage activity has not conducted a physical search for the item. (DIC A6_ from NCAD or DICs D7_ or A6_ from other than a DLA defense depot.)
8	Narcotic materiel not available to supply exact quantity requested in support of MAP-FMS transactions (DLA only).
9	Denied. To DSC from storage. Item was ordered in one continuous length (Advice Code 2N) but is not so available. If shorter lengths will suffice, customer should be advised to cancel original document and submit new request; or the SSD quantity on hand is equal to, or less than, the FILL Reservation Level (applicable to MRO denials containing Priority 09-15 only).

6. ADJUSTMENT TRANSACTIONS (D8_, D9, and DA_ Document Identifiers).

CODE	DEFINITION
A	Unassigned.
B	Adjustment associated with receipt overages (receipts from procurement) authorized to be retained at NO CHARGE by vendor.
C	Catalog Change.
D	Unassigned.
E	Materiel condemned (shelf-life item), shelf-life has expired and cannot/will not be extended. Quantity indicated destroyed. Certificate of destruction on file.
F and G	Unassigned.
H	Loss or gain of perishable subsistence (variable weight items resulting from rounding receipt quantities to compute average weight per piece.
I	Not to be assigned.
J	Materiel condemned. Quantity indicated destroyed. Certificate of destruction on file.
K thru L	Unassigned.
M	Materiel condemned. Quantity indicated shipped direct to property disposal activity.
N	(Reserved for future assignment by DoD.)
O	Not to be assigned.
P	Loss resulting from location audit reconciliation for adjustment under $800.00 without a formal special inventory.
Q	Loss resulting from automatic (without research required) adjustment due to receipt of a materiel release denial on materiel valued at less than $800.00.
R	Gain resulting from creation of computer record balance in order to process out-of-sequence high priority issues. This posting to an insufficient balance may be used when negative balances are not permitted.
S	Loss resulting from automatic adjustment due to receipt of materiel release denial of stocks issued as a result of computer record balance gained through use of Management Code R above.
T	Materiel condemned, shelf-life has expired and connot/will not be extended. Quantity indicated shipped direct to property disposal activity or otherwise authorized/required disposal action has been taken.
U thru Y	(Reserved for future assignment by DoD.)
Z	Exception data entered in remarks or follows by separate correspondence.
0 and 9	(Reserved for future assignment by DoD.)

7. PHYSICAL INVENTORY REQUEST/COUNTS (DJ_ and DK_ Document Identifiers).

CODE	DEFINITION
A	Inventory of item. No locator reconciliation card furnished during reconciliation.

CODE	DEFINITION
B	Inventory of item. Locator reconciliation card furnished. No recorded balance at DSC.
C	Inventory of non-DLA item. (This code is for internal depot use only and will not appear on any transaction leaving the depot.)
D	Inventory of items deleted from the system by Storage Item Change Cards.
E thru H	Unassigned.
I	Not to be assigned.
J	Unassigned.
K	Condition Code Mismatch.
L	Unassigned
M	Recount requested (DJA)/Recount effected (DKA).
N	Quantity reflects a balance from a non-commingled location (DKA).
O	Not to be assigned.
P thru X	Reserved for future assignment by DoD.
Y	Quantity reflects a balance from a commingled location.
Z	Exception data entered in remarks or follows by separate correspondence.
0 thru 9	Reserved for future assignment by DoD.

8. INFORMATION/INVENTORY TRANSACTIONS (CK_ Document Identifiers)

CODE	DEFINITION
A	Deport initiated inventory resulting from Locator Reconciliation - DSC record, no Depot location.
B	Depot initiated inventory resulting from Locator Reconciliation - Depot location, no DSC balance.
C	Reserved for future use.
D	Depot initiated complete inventory resulting from sample failures.
E	Reserved for future use.
F	Inventory canceled - inventory completed within last 90 days or presently scheduled for a different cutoff date.
G	Inventory canceled - Disposal Release Order received prior to completion of scheduled inventory.
H	Inventory canceled - Storage item change received which affected the NSN, UI, or Commodity Manager prior to completion of count.
I	Not to be assigned.
J	Inventory canceled - Initiated by depot for various reasons (i.e., weather conditions materiel not ready for count, and resources not available).
K thru V	Unassigned.
W thru Y	Establish/release edition restrictions.
Z	Exception data entered in remarks or follows by separate correspondence.
0 thru 9	Unassigned.

NOTE: On DIC CK6 transactions generated as a result of the annual update of INVENTORY Category Codes, the Inventory Codes H, E, L, T, U will appear in the Management Code field. Refer to appendix A-43. Similarly, on DIC CK6 transactions used to establish/release a freeze, the applicable freeze code will appear in the Management Code field.

9. DUE-IN TRANSACTIONS (DF_ Document Identifiers).

CODE	DEFINITION
A	Shipment authorized/accountability established.
G	Shipment disapproved/accountability rejected.

10. INVENTORY TRANSACTIONS (ZAS, ZAV, ZAW, ZAX, ZC6, and ZKA Document Identifiers).

CODE	DEFINITION
A	Depot initiated inventory resulting from locator reconciliation - DSC record, no depot location.
B	Deport initiated inventory resulting from locator reconciliation - depot location, no DSC balance.
C	Unassigned.
D	Depot initiated complete resulting from sample failure.
E	Extension of inventory beyond Automatic Cancellation Date.
F	Inventory canceled - Inventory completed within last 90 days or presently scheduled for a different cutoff date.
G	Inventory canceled - DRO received prior to completion of scheduled inventory ZAS.
H	Inventory canceled - Storage item change received which effects the NSN, UI, or Commodity Manager prior to completion of count.
I	Not to be assigned.
J	Inventory canceled - Initiated by depot for various reasons (i.e., weather conditions, materiel not ready for count, and resources not available).
K thru Z	Unassigned.

APPENDIX A-14

OWNERSHIP CODES

1. Number of characters: One.

2. Type of code: Numeric.

3. Explanation: These codes provide a means of segmenting inventory balances, accounted for in inventory control records of a Military Service/DLA, but which are owned by others. Further segmentation of these stocks by Purpose Code is neither prescribed nor intended.

4. Codes are assigned as follows:

CODE	TITLE	DEFINITION
1	ARMY	Stocks on the records of a DLA inventory manager which are owned by the Army.
2	DEFENSE SUPPLY AGENCY	Not used in the DLA Distribution System.
3	OTHERS	Stock on the records on a DLA inventory manager which are owned by an agency outside of DoD.
4	MARINE CORPS	Stocks on the records of a DLA inventory manager which are owned by the Marine Corps.
5	NAVY	Stocks on the records of a DLA inventory manager which are owned by the Navy.
6	AIR FORCE	Stocks on the records of a DLA inventory manager which are owned by the Air Force.
7	OTHER DoD	Stocks on the records of a DLA inventory manager which are owned by a DoD agency other than a Military Service or DLA.
8	MAP	Stocks on the records of a DLA inventory manager which are owned by the Military Assistance Program.
9	OTHER ITEM MANAGER	Stocks on the records of an inventory manager which are owned by another item manager within DLA.
0	(RESERVED FOR FUTURE ASSIGNMENT BY DoD)	

APPENDIX A-15

PURPOSE CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: These codes provide the owner of materiel with a means of identifying the purpose or reason for which an inventory balance is reserved.

4. The following codes are assigned:

CODE	TITLE AND DEFINITION	APPLICATION/USE INSTRUCTIONS
A	General Issue - Stocks held which are available for general issue and which are not earmarked or reserved for other specific purposes.	
B	General War Reserve - Stocks held for general war reserve materiel objectives.	Not used in the DLA Distribution System. (General War Reserve stocks will be carried under Purpose Code A.)
C	Specific War Reserve.	Not used in the DLA Distribution System.
D	Prepositioned War Reserve Materiel Stocks (PWRMS) - Stocks held to meet materiel objectives.	Only those items acquired and placed in stock for a specific strategic plan prepositioned war reserve which dictates that assets be positioned prior to hostilities at or near the point of planned use or issue to user, are reflected under this purpose, within DLA ownership, this purpose/reservation is limited to medical and subsistence items. (This Purpose Code reservation may be reflected as a control level under Purpose Code A if and when used by DLA.)
E	Reserved for Specific Plans or Projects - Stocks held to support requirements generated by a specific plan, project, or operation other than general, specific or PWRMS objectives.	Includes items held for research and development plans or operational project; support stocks held for airborne alert; and new end items held awaiting the introduction date or held pending

CODE	TITLE AND DEFINITION	APPLICATION/USE INSTRUCTIONS
		an adequate buildup of spares, repair parts, test equipments to support and maintain the end item during its initial period of service.
F	Reserved for Production and Maintenance - Stocks held to support Service/DNA/DLA - accomplished repair, alteration, modification, conversion, or assembly programs.	Materiel issued from this reservation on a reimbursement or nonreimbursement basis will be dropped from the inventory control record at time of issue.
G	Reserved for Provisioning - Stocks held to support provisioning of end items.	
H	Reserved for Government Furnished Materiel (GFM) - Stocks held for issue as GFM to support contractually - accomplished repair or production programs.	Materiel issued as GFM is dropped from stock at time of issue; since materiel is picked up and accounted for by the contract administrator.
J	Reserved for Military Assistance Program (MAP) - Stocks allocated and earmarked for MAP/NATO Countries Grant Aid.	Not used in the DLA distribution system.
K	Reserved for Loan - Stocks held for issue on a loan basis.	Not used in the DLA distribution system.
L	Suspended (On Loan) - Stocks issued on loan basis.	Status of loans is reflected again the location from which the materiel is issued.
M	Potential DoD Excess - Stocks that have been determined to be in excess of authorized retention levels and are held pending completion of DoD utilization screening.	
N	Reserved for Foreign Military Sales (FMS) - Stocks allocated and earmarked for FMS.	Limited to those items for which a commitment to supply from stock has been made in response to a FMS request for price and availability information.
P	Reserved for Cooperative Logistics Support Arrangements.	Not used in the DLA distribution system.

CODE	TITLE AND DEFINITION	APPLICATION/USE INSTRUCTIONS
Q	JCS Allocated Stocks - Stocks allocated and earmarked for certain JCS requirements.	Not applicable to DLA items.
R	Not Assigned.	Reserved for future assignment by DoD.
S	Brand Name Subsistence Stocks - Stocks in a warehouse held for DICOMSS customers.	These assets will not be used in determining any forecast requirements in replenishing a warehouse.
T	Not Assigned.	
U	Perishable Brand Name Resale Subsistence Stocks - Stocks with less than 15 days remaining until date of expiration.	Used in conjunction with Supply Condition Code C to designate stocks to be issued on an expedited basis at a reduced price.
V thru Z	Not Assigned	Codes reserved for Services/DNA/DLA segmentation of above assigned codes. These codes will not be used unless authorized by DLA.

APPENDIX A-16

CONDITION CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: These codes classify materiel in terms of readiness for issue and use or to identify action underway to change the status of materiel. When materiel is determined to be in excess of approved stock levels and/or no longer serviceable, Condition Codes A through H will be utilized to reflect materiel condition prior to turn in to the Defense Property Disposal Office (DPDO). Condition Codes J through P will not be used for materiel turn-ins to the DPDO.

4. Codes are assigned as follows:

CODE	TITLE AND DEFINITION	APPLICATION/USE INSTRUCTIONS
A	Serviceable (issuable without qualification). New, used, repaired, or reconditioned materiel which is servicable and issuable to all customers without limitation or restriction. Includes materiel with more than 6 months shelf-life remaining. (See note 1.)	Includes items that are always inspected, assembled, calibrated tested, and/or adjusted prior to issue; "overage stock" which, if by extending the expiration date is serviceable with no restriction on issue. Note: For C&T, identifies only new and unused stocks.
B	Serviceable (issuable with qualification). New, used, repaired, or reconditioned materiel which is serviceable and issuable for its intended purpose but which is restricted from issue to specific units, activities, or geographical areas by reason of its limited usefulness or short service life expectancy. Includes materiel with 3 to 6 months shelf-life remaining. (See note 1.)	Includes items subject to deterioration or spoilage which are unsuitable for extended future storage or for general, unrestricted issue (e.g., recapped tires repaired or reconditioned clothing, rubber products, overage subsistence).
C	Serviceable (priority issue). Items which are serviceable and issuable to selected customers, but which must be issued before	

CODE	TITLE AND DEFINITION	APPLICATION/USE INSTRUCTIONS
	Condition Code A and B materiel to avoid loss as a usable asset. Includes materiel with less than 3 months shelf-life remaining. (See note 1.)	
D	Serviceable (test/modification). Serviceable materiel which requires test, alteration, modification, technical data marking, conversion, or disassembly.	Includes materiel held for modification or correction of design deficiencies not caused by a procurement action. (This does not include items which must be inspected or tested immediately prior to issue.)
E	Unserviceable (limited restoration). Materiel which involves only limited expense or effort to restore to serviceable condition and which is accomplished in the storage activity where the stock is located.	Includes materiel which may be serviceable for its intended use in all respects but is restricted from issue due to Preservation, Packing, or Marking deficiencies; and materiel requiring minor modification, repair, or adjustment not constituting repair, rebuild, or overhaul at a maintenance facility.
F	Unserviceable (reparable). Economically reparable materiel which requires repair, overhaul, or reconditioning (includes reparable items which are radioactively contaminated).	Includes overage stock only if by maintenance action the items can be restored to a serviceable condition; and outdated blood if blood is to be reprocessed.
G	Unserviceable (incomplete). Materiel requiring additional parts or components to complete the end item prior to issue.	Includes incomplete sets, chests, kits, and unfinished materiel requiring milling or finishing. Materiel normally stocked in an unassembled state is not classified under this condition, nor is this condition used for groupings of components normally stocked as individual items.

CODE	TITLE AND DEFINITION	APPLICATION/USE INSTRUCTIONS
H	Unserviceable (condemned). Materiel which has been determined to be unserviceable and does not meet repair criteria (includes condemned items which are radioactively contaminated).	Includes items which exceed the repair limitation or which, by virtue of their composition, are not capable of being restored to an issuable condition by repair, reprocessing, or other means.
I	Not assigned.	
J	Suspended (in stock). Materiel in stock which has been suspended from issue pending condition classification or analysis, where the true condition is not known.	Includes stocks awaiting laboratory testing; materiel suspended from issue because of deterioration or damage not the result of a deficiency in a procurement action; and receipts resulting from redistribution orders only.
K	Suspended (returns). Materiel returned from customers or users and awaiting condition classification.	
L	Suspended (litigation). Stocks held pending litigation or negotiation with contractors or common carrier.	Includes contractor-supplied materiel undergoing laboratory tests or legal action; any accepted materiel found to have concealed shortages or damages, or latent defects, contractor-risk shipments, and overages in excess of quantity provided in contract.
M	Suspended (in work). Materiel identified on inventory control record but which has been turned over to a maintenance facility or contractor for processing.	Not used in the DLA Distribution System.
N	Suspended (Ammunition suitable for emergency combat use only).	Ammunition stocks suspended for issue except for emergency combat use.
O	Not assigned.	(Not to be assigned.)

CODE	TITLE AND DEFINITION	APPLICATION/USE INSTRUCTIONS
P	Unserviceable (reclamation). Materiel determined to be unserviceable, uneconomically reparable as a result of physical inspection, tear down or engineering decision. Item contains serviceable components or assemblies to be reclaimed.	Not applicable to intra-DLA transactions. Distribution depots will, within their assigned mission, recognize and process transactions received from service IMs.
Q	Suspended (Quality Deficient Exhibits) (See note 2).	Quality deficient exhibits returned by customers/users as directed by the IMM due to technical deficiencies reported by Quality Deficiency Report. Exhibit requires technical or engineering analysis to determine cause of failure to perform in accordance with specifications. This code is for intra-Air Force use only.
R	Suspended (Reclaimed Items, Awaiting Condition Determination) (See note 2).	Materiel reclaimed by ICPs/IMMs from activities that do not have the capability to determine materiel condition (e.g., skills, manpower or test equipment). Actual condition (serviceable or unserviceable repairable) will be determined at the repair facility and reported to the ICP/IMM prior to issue or repair.
S	Unserviceable (Scrap) (See note 2).	Materiel that has no value except for its basic materiel content. No stock will be recorded as on-hand in Supply Condition Code S. This code is used only on transactions involving shipments to DPDOs.

CODE	TITLE AND DEFINITION	APPLICATION/USE INSTRUCTIONS
		Materiel will not be transferred to Supply Condition Code S prior to turn-in to DPDOs if materiel is recorded in Supply Condition Code A through H at the time materiel is determined excess. Materiel identified by NSN will not be identified by this Supply Condition Code.
T thru Z	Not assigned.	Reserved for future assignment by DoD.

NOTE 1: Refer to DoD Instruction 4140.27 for serviceability timeframes associated with shelf-life items.

NOTE 2: DLA does not accept assets for these codes.

APPENDIX A-17

MODE OF SHIPMENT CODES

1. Number of characters: One.

2. Type of code: Alphanumeric.

3. Field Position: DD Form 1348; Block 8, pos. 38, TCMD; pos. 27.

4. Explanation: This code is a one-digit alphanumeric character which identifies the initial method of movement from the shipping activity.

5. The following codes are assigned:

PRIMARY CODES

CODE	EXPLANATION
A	Motor, Truckload.
B	Motor, Less Truckload.
C	Van (unpacked, uncrated, personal, and/or Government property).
D	Driveaway, Truckaway, Towaway.
E	Busline.
F	Military Airlift Command (Channel and Special Assignment Airlift Mission).
G	Surface, parcel post.
H	Air, parcel post/First Class Mail.
I	Government Truck, including common service except as qualifying for local delivery.
J	Air-Small Package Carrier.
K	Rail, Carload.*
L	Rail, Less Carload.*
M	Surface-Freight Forwarder.
N	LOGAIR. (Use whenever this mode is used for any portion of the movement.)
O	Organic Military Air (including Aircraft of Foreign Governments).
P	Through Bill of Lading. (TGBL)
Q	Commercial Air Freight - Includes regular, and expedited service (provided by major air lines), also includes charters and air taxi.
R	Reserved for Future Use.
S	Scheduled Truck Service (applies to Contract Carriage, guaranteed traffic routings and/or scheduled service).
T	Air Freight Forwarder.
U	QUICKTRANS. (Use whenever this mode is used for any portion of the movement.)
V	SEAVAN Service.
4	Armed Forces Courier Service (ARFCOS).
5	Surface - Small Package carrier.

*Includes Trailer/Container-on-Flat-Car (excluding SEAVAN)

CODE	EXPLANATION
6	Military Ordinary Mail (MOM).
7	Weapons System Pouch Service/Express Mail.
8	Pipeline.
9	Local Delivery. (Use only when delivery is made direct to consignee, to an APOE or to a POE. Do not use in connection with deliveries to LOGAIR/QUICKTRANS terminals to include local pickup and PDO).
W	Water, River, Lake, Coastal (Commercial).
X	Bearer, Walk-Thru (customer pickup of material).
Y	Military - Intratheater Air Lift Service.
Z	MSC (Controlled/Contract/Arranged Space).
2	Government Watercraft, Barge/Lighter,
3	Roll On/Roll Off Service.

APPENDIX A-18

TYPE OF PHYSICAL INVENTORY/TRANSACTION HISTORY CODES

1. Number of characters: One.

2. Type of code: Alphanumeric.

3. These codes identify the type of inventory being conducted/requested or requests for transmission of Custodial Balances/Transaction History.

4. Codes are assigned as follows:

CODE	DEFINITION
A	Scheduled Inventory (wall-to-wall) - Inventory to be conducted on a group of items within a specified period of time according to established plan.
B	Reserved for future assignment by DoD.
C	Special Inventory (all condition codes) Results from ICP/Depot Reconciliation.
D	Special Inventory, Specified Condition Code.
E	Spot Inventory Due to Denial (all condition codes) - Initiated by the SCA/ICP as a result of denials.
F	Spot Inventory Due to Denial (specified condition code) - Initiated by the SCA/ICP as a result of denials.
G thru V	Reserved for future assignment by DoD.
W	Automatic submission of Transaction History from Storage Activity to ICP.
X	Storage Activity Transaction History requested by ICP; or Transaction History response from Storage Activity to ICP.
Y	Custodial Balance and Transaction History requested by ICP; or Transaction History and Custodial Balance response from Storage Activity to ICP.
Z	Custodial Balance only requested by ICP; or Custodial Balance only response from Storage Activity to ICP.
0 thru 9	Reserved for future assignment by DoD.

APPENDIX A-19

COUNTRY/ACTIVITY CODES

1. Number of characters: Two.

2. Type of code: Alpha/alpha or alphanumeric.

3. Field Positions: 31-32.

4. Explanation: The country and activity codes listed in this appendix are used throughout DoD to identify the country, international organization, or account which is: the recipient of materiel or services sold, leased, loaned, transferred, exchanged or furnished under the Foreign Military Sales (FMS) systems; and the recipient of materiel or services furnished under the Military Assistance Program (MAP) Grant Aid. Inclusion of a country or activity in this appendix does not, of itself, indicate that the country or activity is now or ever has been or will be a recipient of FMS or MAP Grant Aid.

5. The following codes are assigned:

a. Countries in alphabetical sequence

NAME	CODE
Afghanistan	AF
Algeria	AG
Andorra	AN
Argentina	AR
Australia	AT
Austria	AU
Bahamas	BF
Bahrain	BA

APPENDIX A-20

FEDSTRIP CIVIL AGENCY CODES

1. Number of characters: Two.

2. Type of code: Numeric.

3. Explanation: These codes identify civilian agencies in MILSTRIP documents.

4. The following codes are assigned:

a. Listed alphabetically

AGENCY IDENTIFICATION	CODE
Action	44
Administrative Conference of the United States	28
Advisory Commission on Intergovernmental Relations	55
Agency for International Development	72
American Battle Monuments Commission	74
Architect of the Capital	01
Atlantic-Pacific Interoceanic Canal Study Commission	41
Canal Zone Government	39
Civil Aeronautics Board	70
Civil Defense Preparedness Agency	43
Civil Service Commission, United States	24
Commemorative Commissions	76
Commission on Fine Arts	37
Commission on Civil Rights	52
Congress	00
Corps of Engineers, Civil	96
Defense Nuclear Agency	89
Department of Agriculture	12
Department of the Air Force	57
Department of the Army	21
Department of Commerce	13
Department of Defense	97
Department of Health, Education, and Welfare	75
Department of Housing and Urban Development	86
Department of the Interior	14
Department of Justice	15
Department of Labor	16
Department of Navy	17
Department of State	19
Department of Transportation	69
Department of Treasury	20
District of Columbia	99
Environmental Protection Agency	68
Equal Employment Opportunity Commission	45

AGENCY IDENTIFICATION

	CODE
Executive Office of the President	11
Export-Import Bank of Washington	83
Farm Credit Administration	78
Federal Coal Mine Safety Board of Review	54
Federal Communications Commission	27
Federal Deposit Insurance Corporation	51
Federal Home Loan Bank Board	82
Federal Maritime Commission	65
Federal Mediation and Conciliation Service	93
Federal Power Commission	26
Federal Radiation Council	58
Federal Reserve System	28
Federal Trade Commission	29
Foreign Claims Settlement Commission of the U.S.	79
General Accounting Office	05
General Service Administration	47

APPENDIX A-21

TYPE OF HOLD CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Field Positions: 51

4. Explanation: These codes identify in the Shipment Status and Materiel Release Confirmation documents specific reasons for holding cargo at the shipping activity after it has been picked, packed, marked, and otherwise made ready for shipment. Codes preceded by an asterisk (*) are for local use in MOFAST and will not be accepted in MOWASP processing. Codes are cross-referenced to MOFAST Processing Codes.

5. Source: DoD 4140.17-M, MILSTRIP, Appendix B-17.

6. The following codes are assigned:

CODE	DEFINITION
A	Shipment unit held for consolidation.
B	Awaiting carrier equipment.
C	Awaiting export/domestic traffic release.
D	Delay due to diversion to surface resulting from challenge by air clearance activity.
E	Delay resulting from challenge by air clearance activity for which no diversion to surface occurs and materiel was shipped by air.
F	Embargo.
G	Strike, riots, civil commotion.
H	Acts of God.
*I	Care and preservation.
J	Shipment delayed to process customer cancellation request(s).
*K	Diversion to surface movement due to characteristics of materiel that preclude air shipment, e.g., size, weight, or hazard classification.
*L	Delay requested and/or concurred in by consignee.

CODE	DEFINITION
M	Delay to comply with valid delivery dates at CONUS destinations/out loading terminals.
N	Delay due to diversion to air (requisition priority upgraded).
O	Unassigned.
*P	Denial actions.
*Q	Unit pack consolidation packing.
*R	Hazardous material not compatible with load.
*S	Document deficiencies.
*T	Unassigned.
*U	Data clarification.
*V	MHE/manpower limitations.
*W	PDT is later than MDT.
*X	Use in conjunction with DP action to identify lines purged due to lost documentation.
*Y	Unassigned.
Z	Hold actions of less than 24 hours from date materiel is available for shipment.

APPENDIX A-22

MAP CUSTOMER WITHIN COUNTRY CODES

MAP Customer Within Country Codes are contained in MILSTRIP, DoD 4140.17-M, Supplement No. 2. Distribution of Supplement No. 2 has been made to each DLA Activity in the same number of copies as this volume.

APPENDIX A-23

FOREIGN MILITARY SALES (FMS) DELIVERY TERM CODES

1. Number of characters: One.

2. Type of code: Alphanumeric.

3. Field Positions: 34

4. Explanation: Indicates the point within the air or surface transportation cycle where responsibility for movement passes from the U.S./DoD to the purchasing nation. The code should not be construed to imply transfer of title for materiel (which always passes at origin) since it indicates only the point to which the U.S./DoD will perform a reimbursable transportation service as an agent of the recipient foreign country. This code is not applicable to the movement of DLA-managed items (Stock Fund) which are always shipped prepaid to inland CONUS point of discharge.

5. The following codes are assigned:

CODE	EXPLANATION
2	FOB Destination - Inland Origin to Inland Destination within CONUS or Inland Origin to Inland Destination within the same overseas geographical area. U.S./DoD is responsible for inland transportation to named inland point. Recipient country is responsible for unloading at name point and subsequent arrangements and costs.
3	*FAS (Free Along Side) Vessel CONUS Port of Exit - U.S./DoD is responsible for transportation to a point alongside vessel. Recipient country is responsible for loading aboard the vessel and subsequent arrangements and costs.
4	FOB Origin - Recipient country is responsible for cost of CONUS inland transportation and subsequent arrangements for onward movement.
5	FOB Port of Exit - U.S./DoD is responsible for inland transportation to the CONUS port of exit. Recipient country is responsible for unloading from inland carrier at port of exit and subsequent arrangements and costs.
6	*FOB Overseas Port of Discharge - U.S./DoD is responsible for transportation from CONUS point of origin to and including ocean transportation to the overseas port of discharge. Recipient country is responsible for vessel discharge, port handling, and subsequent arrangement and costs.

CODE	EXPLANATION
7	FOB Destination (named inland point in recipient country) - U.S./DoD is responsible for transportation from CONUS point of origin to and including overseas inland carrier delivery to named inland point. Recipient country is responsible for unloading at named point and subsequent arrangements and costs.
8	FOB Vessel - CONUS Port of Exit - U.S./DoD is responsible for transportation from CONUS point of origin to and including unloading, handling, and stowage aboard vessel at port of exit. Recipient country is responsible for ocean transportation and subsequent arrangements and costs.
9	*FOB Port of Discharge (landed) - U.S./DoD is responsible for transportation from CONUS point of origin to and including vessel discharge and port handling at overseas port of discharge. Recipient country is responsible for loading aboard inland overseas carrier equipment and for subsequent arrangements and costs.

*These codes are provided for use on existing cases which designate such delivery terms. Upon completion of these cases or upon renegotiation of such cases to conform to DoDI 2110.12, these codes will be reviewed for possible elimination.

CODE	EXPLANATION
A	U.S./DoD is responsible for transportation from a designated overseas port of embarkation (POE) to a CONUS destination, and the return to a designated overseas port of debarkation (POD). Customer country if responsible for overseas inland transportation of materiel to/from the overseas POE/POD and overseas port handling.
B	U.S./DoD is responsible for transportation from a designated overseas port of embarkation (POE) to a CONUS destination, return to a CONUS port of embarkation and CONUS port handling. Customer country is responsible for overseas inland transportation to the overseas POE, overseas port loading, and overocean transportation from the CONUS POE to ultimate destination.
C	U.S./DoD is responsible for CONUS port unloading of country arranged carrier, transportation to and from a designated CONUS destination and CONUS port loading of country arranged carrier. Customer country is responsible for movement of materiel to and from the CONUS POD/POE.
D	U.S./DoD is responsible for CONUS port unloading of country arranged carrier transportation to a CONUS destination and return to an overseas designated POD. Customer country is responsible

CODE	EXPLANATION
	for overocean transportation to a CONUS POD, overseas port unloading and overseas inland transportation to ultimate destination of returned materiel.
E	Customer country is responsible for all transportation from overseas point of origin to CONUS activity and return to an overseas destination.
F	U.S./DoD is responsible for transportation from an overseas inland location to an overseas port of embarkation (POE), overseas port handling, overseas transportation to a CONUS port of debarkation (POD), CONUS port handling, inland transportation to a designated CONUS destination, and return to an overseas destination.
G	U.S./DoD is responsible for overseas port handling through an overseas port of embarkation (POE), overseas transportation to a CONUS port of debarkation (POD), CONUS port handling, inland transportation to a CONUS destination, and return to an overseas port of debarkation and overseas port handling. Customer country is responsible for overseas inland transportation to and from the overseas port.
H	Customer country is responsible for all transportation from overseas point of origin to CONUS activity. U.S./DoD is responsible for return transportation from CONUS activity to CONUS POE. Customer country is responsible for return CONUS port handling and all transportation to overseas destination. Remarks: This code is required for return, repair and reshipment or return and exchange of classified materials.
J	Customer country is responsible for all transportation from overseas point of origin to CONUS activity. U.S./DoD is responsible for all transportation from CONUS activity to overseas destination. Remarks: This code is required for return, repair and reshipment or return and exchange of classified cryptographic materials.

The above Alpha codes are established to permit the movement of material to U.S. Facilities for repair and return (Maintenance Cases) to FMS customers by the DTS.

APPENDIX A-24

FMS AND MAP GRANT AID TYPE OF ASSISTANCE/FINANCING CODES

1. Number of characters: One.

2. Type of code: Alpha or Numeric.

3. Field Positions: 35

4. These codes provide additional information concerning type of transaction applicable to FMS and MAP Grant Aid Shipments.

a. The following codes are used in the MILSTRIP System to distinguish between various types of MAP Grant Aid transactions. The code is used to distinguish the various types of Grant Aid, as well as to identify certain Grant Aid requirements programed under special financing (e.g., Codes C and H) or supply (e.g., Codes K, L, and N) arrangements. Codes used to identify the various types of Grant Aid are as follows:

CODE	TYPE OF ASSISTANCE
1	Grant Aid rendered under the authority of the Foreign Assistance Act of 1961, as amended for which the United States receives no reimbursement.
2	Grant Aid rendered under special Presidential Determination.
9	Grant Aid Military Assistance Exchange Programs (Public Law 87-195, as amended (for use in Weapons Production Programs, and so on). (Army only.)
C	Presidential determination to order defense articles from stock and performance of defense services to satisfy Grant Aid requirements with reimbursement from subsequent military assistance appropriations. (Section 506 FAA of 1961, as amended.)
D	Military Assistance Service Funded. Grant Aid programs transferred to the Department of Defense Budget, which were not controlled and implemented through the MAP documentation and ADP system.
H	Grant Aid share of cost sharing agreements.
K	Grant Aid of MAP owned assets obtained through barter arrangements with Federal Republic of Germany (used in conjunction with Source of Supply Code B only).
L	Grant Aid provided through the NATO Hawk Production and Logistics Organization (NHPLO) for maintenance support of Hawk Missile System (use in conjunction with Source of Supply Code N only.

CODE	TYPE OF ASSISTANCE
N	Grant Aid of articles or services available as a result of liquidation of MAP's investment in the spare parts stocks of the NATO Maintenace Supply Organization (NAMSO).
P	Grant Aid programs which have been transferred to the Department of Defense budget, but which are controlled and implemented through the MAP documentation and ADP systems.
R	Grant Aid of U.S. recovered materiel resulting from liquidation of NAMSA excess stockage.

TYPE OF ASSISTANCE CODES USED IN OTHER THAN GRANT AID TRANSACTIONS

CODE	TYPE OF ASSISTANCE
A	Foreign Civilian Aid - Civilian information and education (SEE). (Army only.)
B	Funds to be provided by Agency for International Development (AID). (Army only.)
F	Traning provided as a part of an FMS case. This data is maintained in the DLA Grant Aid data base purely as a service to assist the Military Departments in accounting for students/spaces provided under FMS. Not used in MILSTRIP.

b. The following codes are used in the MILSTRIP system to distinguish between various types of FMS transactions. In FMS, the code is used to identify the types of financing applied to cover each sales case. Codes used to identify various types of FMS financing are as follows:

CODE	TYPE OF FINANCING
3	Cash Sales from Stock. Country cash received in advance or upon constructive delivery of defense articles or the rendering of defense services. Billings are rendered upon dependable undertaking concept. (Section 21, FMSA.)
4	Procurement for Cash Sales. U.S. is provided with a dependable undertaking to pay for defense articles or defense services in full amount and to make funds available as required to meet contract payments. (Section 22, FMSA.)
5	120-Day Payment for Sales of Items from Stock or Procurement. This type of assistance code can only be authorized by the Director, DLA. Purchaser agrees to make payment for materiel or services within 120 days after delivery of such materiel or performance of such services. (Section 21 and 22, FMSA, and Section 524, FAA of 1961, as amended.)

CODE	TYPE OF FINANCING
U	International Cooperative Logistics Program. FMSO Number 1 - Stock level cases under Supply Support Arrangements. (Section 21, FMSA.)
V	International Cooperative Logistics Program. FMSO Number 2 - Requisition cases under Supply Support Arrangements. (Section 21, FMSA.)
Z	Credit Sales and Guaranties. DoD direct credit and credit guaranty sales of defense articles (from stock or from procurement) or defense services. (Section 23 and 24, FMSA and Section 524, FAA of 1961, as amended.)

NOTE: Cross-reference from the former codes to the revised codes:

REVISED CODE (EFF 1 Apr 76)	REPLACES FORMER CODE(S)
3	3, W
4	4,7
5	5,F
U	U
V	V
Z	6,8,G M,C,Q, Z,E,X, Y,J

APPENDIX A-25

FMS OPTION/FREIGHT FORWARDER CODES

FMS Option/Freight Forwarder Codes are contained in MILSTRIP DoD 4140.17-M, Supplement No. 2. Distribution of Supplement No. 2 has been made to each DLA Activity in the same number of copies as this volume.

APPENDIX A-26

RECEIPTS AND SURVEILLANCE DISCREPANCY CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: Receipt and Surveillance Discrepancy Codes are used to record deficiencies identified in incoming receipts or in locations as a result of location surveys.

4. The following codes are assigned:

CODE	ACTION	APPLICATION	DEFINITION
A	Disposal Action Taken	P	N/A.
		R/R	Unservicable and not economically repairable.
B	Unidentifiable	P	N/A.
		R/R	Misidentified and/or not identifiable to a valid stock number.
C	Wrong Item Supplied	P*	The item supplied does not meet specifications.
		R/R	N/A.
D	Wrong Item Purchased	P*	The item supplied meets contract requirements.
		R/R	N/A.
E	Outdated Shelf-Life	P*	Cure or batch date exceeds one year prior to receipt or one-fourth of its total shelf-life.
		R/R	Materiel is beyond expiration date.
		S	Materiel in storage is beyond its expiration date.

CODE	ACTION	APPLICATION	DEFINITION
F	Damage or Rejected to Carrier	P*	Rejected damage to carrier (or suspended carrier/parcel post damage).
		R/R	Rejected damage to carrier (or suspended carrier/parcel post damage).
		S	Materiel or containers damaged or deteriorating.
G	Shortage	P*	Quantity received is short of document quantity.
		R/R	Quantity received is short of document quantity.
H	Overage	P*	Quantity received is over quantity on document.
		R/R	Quantity received is over quantity on document.
I	Infestation	P	Materiel or vehicle shows signs of pest infestation.
		R/R	Materiel or vehicle shows signs of pest infestation.
		S	Materiel in storage or warehouse shows signs of pest infestation.
J	Misdirected Shipment	P*	Billed to receiving defense depot but not due in to receiving defense depot.
		R/R	Missent to receiving defense depot.
K	Condition Error	P	N/A.
		R/R	Item received in a condition other than indicated as shipped.
		S	Item in storage in a condition other than indicated on locator record.

CODE	ACTION	APPLICATION	DEFINITION
L	Unassembled Item	P*	Contract requires assembled unit but received not assembled and/or missing component(s).
		R/R	Catalog specification requires assembled item but received not assembled and/or missing component(s).
M	Document/Stock Number Error	P*	Document has incorrect Stock Number or Contract Number.
		R/R	N/A.
N	Unit of Issue Problem	P*	Shipper supplied UI contrary to contract.
		R/R	Shipper Shipped UI contrary to current UI.
		S	UI incorrect or mixed in location.
P	Prescribed Packing and Marking	P*	Shipper did not meet PP&M requirement of contract.
		R/R	Shipper did not ship item packaged and marked correctly, e.g., leaking.
		S	Item in location requires packing marking.
Q	Receipt w/o Proper Documents	P*	Shipper did not include any documentation.
		R/R	Shipper did not include proper documents, not legible, or not properly attached.
R	Not Identified	P*	Materiel and documents do not identify item to stock number.
		R/R	Materiel not identified and documents are missing.
		S	Materiel in storage unidentified or misidentified.

CODE	ACTION	APPLICATION	DEFINITION
S	Contractors Risks	P*	Shipper shipped at own risk pending test results.
		R/R	N/A.
T	Reidentified	P	N/A.
		R/R	A portion or all of receipt was misidentified and has been reidentified.
U	Dollar Value Error	P	N/A.
		R/R	Materiel shipped in violation of DLAR 7000.4 (Military Service Concurrence).
V	Test Required	P	N/A.
		R/R	Quality of materiel is in question and requires test.
		S	Materiel in storage requires test.
W	Inspected - No Discrepancy	P	Inspected by a qualified inspector or qualified verifier using catalogs, contract, or microfilm reader and conforms to requirements.
		R/R	Inspected by a qualified inspector or qualified verifier using catalogs, contract, or microfilm reader and conforms to requirements.
X	Not Inspected	P	Package markings agree with appendix F-200 documents and need no special inspection requirement - accepted.
		R/R	Package markings agree with appendix F-200 document and need no special inspection requirements - accepted.

CODE	ACTION	APPLICATION	DEFINITION
Y	Unauthorized/ Unprogramed Receipt	P	Materiel received without a PMRC being available.
		R/R	Materiel received without a PMRC being available.
Z	Inspection Required	S	Materiel in location requires inspection by a qualified inspector.

LEGEND:

P - Procurement
R/R - Returns or Redistribution
S - Discovered during Location Survey Process

*Designated codes will mechanically generate Acceptance Report Shipment Acceptance Discrepancy Explanation Code for receipts received and suspended in a non-issuable status, i.e., Condition Code L.

5. Reference: Appendix A-74, Shipment Acceptance Discrepancy Explanation.

APPENDIX A-27

RECEIPT INSPECTION CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: These codes identify the inspection point for receipts.

4. The following codes are assigned:

CODE	DEFINITIONS
S	Used only on procurement and is used when materiel was inspected at origin or a certificate of conformance is attached.
D	Used only on procurement and is used when the contract specifies inspection will be at destination.
X	Used on all documents of Returns and Redistribution to indicate that inspection point is not applicable.

APPENDIX A-28

CONTROLLED INVENTORY ITEM CODES

1. Number of characters: One.

2. Type of code: Alphabetic/Numeric.

3. These codes indicating the security classification and/or security risk or pilferage controls for storage and transportation of DoD assets. Explanation of each code are as follows:

a. CLASSIFIED ITEMS CODE: A code indicating the materiel requires protection in the interest of national security in accordance with the provisions of DoD 5200.1-R, Information Security Program.

CODE	EXPLANATION
A	*Confidential - Formerly Restricted Data
B	*Confidential - Restricted Data
C	*Confidential
D	*Confidential - Cryptologic
E	*Secret - Cryptologic
F	*Top Secret - Cryptologic
G	*Secret - Formerly Restricted Data
H	*Secret - Restricted Data
K	*Top Secret - Formerly Restricted Data
L	*Top Secret - Restricted Data
O	*Item contains naval nuclear propulsion information; disposal and access limitations are identified in NAVSEAINST C5511.32. Store and handle in a manner which will preclude unauthorized access to this material.
S	*Secret
T	*Top Secret
U	Unclassified
7	*Item displays sensitive information. Prior to disposal, all name plates, label plates, meter face plates, tags, stickers, documents or markings which relate items to weapons system/end item application must be removed and destroyed.

b. SENSITIVE ITEMS CODE. Material which requires a high degree of protection and control due to statutory requirements or regulations, such as narcotics and drug abuse items; precious metals; items which are of high value, highly technical or of a hazardous nature; and small arms, ammunition, explosives and demolition material.

CODE	EXPLANATION
1	*Highest Sensitivity (Category I) - Nonnuclear missiles and rockets in a ready-to-fire configuration (e.g., Hamlet, Redeye, Stinger, Dragon, LAW, Viper) and explosive rounds for nonnuclear missiles and rockets. This category also applies in situations where the launcher (tube) and the explosive rounds, though not in a ready-to-fire configuration, are jointly stored or transported.
2	*High Sensitivity (Category II) - Arms, Ammunition, and Explosives.
3	*Moderate Sensitivity (Category III) - Arms, Ammunition, and Explosives.
4	*Low Sensitivity (Category IV) - Arms, Ammunition, and Explosives.
5	*Highest Sensitivity (Category I) - Arms, Ammunition, and Explosives with a physical security classification of Secret.
6	*Highest Sensitivity (Category I) - Arms, Ammunition, and Explosives with a physical security classification of Confidential.
8	*High Sensitivity (Category II) - Arms, Ammunition, and Explosives with a physical security classification of Confidential.

NOTE: Items coded 5, 6, or 8 will be stored and transported in accordance with the provisions of DoD 5100.76-M or DoD 5200.1-R, Information Security Program, whichever is more stringent.

c. PILFERAGE CODE: A code indicating the material has a ready resale value or civilian application for personal possession and, therefore, is especially subject to theft.

CODE	EXPLANATION
J	Pilferage - Pilferage controls may be designated by the coding activity to items coded U (Unclassified) by recording the item to J.

d. CONTROLLED INVENTORY ITEM CODES:

Coding activities may further categorize pilferage items by using the following codes:

CODE	EXPLANATION
I	Aircraft engine equipment and parts.
M	Handtools and shop equipment.
N	Firearms.
P	Ammunition and explosives.

CODE	EXPLANATION
Q	A drug or other controlled substance designated as a schedule III, IV, or V item, in accordance with the Controlled Substance Act of 1970. Other sensitive items requiring limited access storage.
R	Precious metals, a drug, or other controlled substance designated as a Schedule I or II item, in accordance with the Controlled Substance Act of 1970. Other selected sensitive items requiring storage in a vault or safe.
V	Individual clothing and equipment.
W	Office machines.
X	Photographic equipment and supplies.
Y	Communication/electronic equipment and parts.
Z	Vehicular equipment and parts.

* Not authorized for use by DLA.

APPENDIX A-29

WATER PORT DESIGNATOR CODES

1. POE codes are contained in MILSTAMP, DoD 4500.32-R, appendix B-13B. The code is used to identify CONUS water ports used in the transportation of DoD materiel. It further identifies the Water Terminal Clearance Authority (DoD 4500.32-R, appendix D-1) responsible for the major ocean traffic area served by the port.

2. The following instructions apply to Water Port of Embarkation codes when used with appendices B-48 through B-52:

a. First Position (Position 17) identifies a major geographic area.

AREA CODE	AREA	GEOGRAPHICAL DESCRIPTION
1	United States, east coast	Includes all ocean ports of Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, District of Columbia, Virginia, North Carolina, South Carolina, Georgia, the east coast of Florida (including Key West), port of Montreal, Canada, and all ports on Lake Erie, Lake Ontario and Lake Michigan.
2	United States, gulf coast	Includes all ocean ports of the west coast of Florida (excluding Key West), Alabama, Mississippi, Louisiana and Texas.
3	United States, California coast	Includes all ocean ports of California.
4	United States, northwest coast	Includes all ocean ports of Oregon, Washington and those of British Columbia below 50 north latitude.

b. The second position (Position 18) identifies a subarea.

c. The third position (Position 19) identifies the specific port, port area, or island.

3. Geographic Areas of Responsibility assigned to the Water Terminal Clearance Authorities are as follows:

a. Commander, Eastern Area, Military Traffic Management Command

Geographic Area of Responsibility: All water shipments through CONUS ports with POE beginning with 1 and 2.

Communications Addresses:

MAIL:	Commander, Eastern Area, Military Traffic Management Command ATTN: MTE-SYQ First Avenue & 58th Street Brooklyn, New York 11250
AUTOVON:	740 plus extension 2676 or 2174
TELEPHONE:	Area Code 212, 439-5400, Ext. 2676 or 2174
AUTODIN:	RUEOBMD
TWX:	CMDR EAMTMC, BKLYN, N. Y.

b. Commander, Western Area, Military Traffic Management Command

Geographic Area of Responsibility: All water shipments through CONUS ports with Port Designator Code beginning with 3 or 4.

Communication Addresses:

MAIL:	Commander, Western Area, Military Traffic Management Command ATTN: MTW-TEX-BB (For Breakbulk commodities including MILVANS) ATTN: MTW-TEX-CR (For SEAVAN containers only) Oakland, California 94626
AUTOVON:	For breakbulk commodities including MILVANS: 864-2196 For SEAVAN containers only: 864-3451
TELEPHONE:	For breakbulk commodities including MILVANS: AC 415, 466-2196
AUTODIN:	RUWMBSU
TWX:	CMDR WAMTMC, OAKLAND, CALIF.

APPENDIX A-30

DICOMSS CYCLE CODES

1. Number of characters: One.

2. Type of Code: Alphanumeric.

3. Explanation: These codes are assigned to the various monthly/biweekly Commissary requisition cycles. They are applied in MOWASP in appendices B-7, Materiel Release Order; B-18, Prepositioned Materiel Receipt Card; B-16, Commissary Support Planning Card; B-20, Materiel Receipt Card; B-22, Materiel Adjustment Document; and B-108, Receipt Confirmation Card. These codes are used to correlate various supply transactions and a particular requisitioning cycle in the F-92 report.

4. The following codes are assigned:

A - 1st cycle January
B - 2nd cycle January
C - 1st cycle February
D - 2nd cycle February
E - 1st cycle March
F - 2nd cycle March
G - 1st cycle April
H - 2nd cycle April
I - Frustrated Cargo/Residual Materiel
J - 1st cycle May
K - 2nd cycle May
L - 1st cycle June
M - 2nd cycle June
N - 1st cycle July
P - 2nd cycle July
Q - 1st cycle August
R - 2nd cycle August
S - 1st cycle September
T - 2nd cycle September
U - 1st cycle October
V - 2nd cycle October
W - 1st cycle November
W - 2nd cycle November
Y - 1st cycle December
Z - 2nd cycle December
6 - Duplicate Purchase

5. Reference: Chapter 20.

APPENDIX A-32

TYPE OF DISCREPANCY CODES

1. Number of characters: Two.

2. Type of code: Alpha/numeric.

3. Explanation: This code identifies the reason that depot and center transactions did not match. Code is entered in appendix C-33, Depot Balance and/or Transaction Discrepancy Report.

4. The following codes are assigned:

CODE	DEFINITIONS
A-1	MRO dropped by DSC - not received at depot.
A-2	Receipt not posted by DSC.
A-3	MRO not dropped by center.
A-4	Exception MRO not dropped by center.
A-5	Canceled MRO not reinstated by DSC.
A-6	Duplicate MRO not reinstated by DSC.
A-7	Reactivated MRO not dropped by DSC.
A-8	No printout.
A-9	Receipt duplicated by DSC.
A-10	Miscellaneous.

APPENDIX A-33

HAZARDOUS STORAGE COMPATIBILITY CODES

1. Number of Characters: Two.

2. Type of Code: Alpha/numeric.

3. Hazardous Storage Compatibility Codes identify specific detailed data for all hazardous NSNs. These codes are used in the locator basic record to be used during the Receiving, Storage and Shipping process.

4. The following codes are assigned:

CODE	DEFINITION	ABBREVIATED DEFINITION
A1	Radioactive Materiel, regulated.	RADIOACTIVE REGULATED
B1	Corrosive, organic base.	CORROSIVE ORG BASE
B2	Corrosive, inorganic base.	CORROSIVE INORG BASE
C1	Corrosive, organic acid.	CORROSIVE ORG ACID
C2	Corrosive, inorganic acid.	CORROSIVE INORG ACID
E1	Explosive, Class A.	EXPLOSIVE CLASS A
E2	Explosive, Class B.	EXPLOSIVE CLASS B
E3	Explosive, Class C.	EXPLOSIVE CLASS C
F1	Flammable/Combustible Liquid, Class Ia.	FLAM/COMB LIQUID IA
F2	Flammable/Combustible Liquid, Class Ib.	FLAM/COMB LIQUID IB
F3	Flammable/Combustible Liquid, Class Ic.	FLAM/COMB LIQUID IC
F4	Flammable/Combustible Liquid, Class II.	FLAM/COMB LIQUID II
F5	Flammable/Combustible Liquid, Class IIIa.	FLAM/COMB LQD IIIA
F6	Flammable/Combustible Liquid, Class IIIb.	FLAM/COMB LQD IIIB
G1	Compressed Gas, flammable, toxic/poison A.	FLAM GAS TOXICPOISON
G2	Compressed Gas, flammable, nontoxic.	FLAM GAS NON TOXIC
G3	Compressed Gas, nonflammable, toxic/poison A.	NONFLAMGAS TOXPOISON

CODE	DEFINITION	ABBREVIATED DEFINITION
G4	Compressed Gas, nonflammable, nontoxic.	NONFLAM GAS NONTOXIC
G5	Chlorine.	CHLORINE
G6	Oxygen/Oxidizer.	OXYGEN/OXIDIZER
G7	Acetylene.	ACETYLENE
J1	Irritant.	IRRITANT
L1	Low Hazard.	LOW HAZARD
M1	Magnetic Materiel.	MAGNETIC MATERIEL
N1	Nonhazardous.	NON HAZARDOUS
P1	Toxic Chemical, pesticide, herbicide.	TOXIC CHEM HERBICIDE
P2	Toxic Chemical, pesticide, nonherbicide.	TOXIC CHEM PESTICIDE
R1	Reactive Chemical, oxidizer.	REACTIVECHEM OXIDIZR
R2	Reactive Chemical, reducer.	REACTIVECHEM REDUCER
R3	Water Reactive Chemical.	WATER REACTIVE CHEM
R4	Pyrophoric Reactive Chemical.	PYROPHORIC REACTCHEM
S1	Multiple Hazardous Chemical.	MULTIPLE HAZARDOUS
T1	Toxic Chemical, carcinogen.	TOXIC CARCINOGEN
T2	Toxic Chemical, bioaccumulative.	TOXIC BIOACCUMULATIV
T3	Acute Toxic Chemical.	ACUTE TOXIC CHEMICAL
T4	Chronic Toxic Chemical.	CHRONIC TOXIC CHEM
T5	Toxic Chemical, etiologic agent.	TOXIC ETIOLOGIC AGNT
X1	Variable Hazardous.	VARIABLE HAZARDOUS

APPENDIX A-34

TYPE OF CARGO CODES

1. Number of characters: One.

2. Type of code: Alphabetic.

3. Explanation: These codes are the fourth positions of the Water Commodity Codes and are contained in the MILSTAMP Manual, DoD 4500.32-R. Codes are utilized during shipment documentation and consolidation processes to control shipment unit build and to print in-the-clear messages on the DD Form 1348-1. Selected like codes assigned to different stock numbers are not to be computer consolidated into the same shipment unit as specified below. Unlike codes will not be placed in the same shipment unit.

4. The following codes are assigned with definitions and specified messages to be printed in-the-clear on DD Form 1348-1, as well as the Standard Form (SF) number(s) of the special label required, if applicable.

CODE	DEFINITION/MESSAGE/STANDARD FORM
A*	Radioactive Substances, UN Class 7/RADIOACTIVE MATL LBL/SF 413, 414, or 415.
B*	Mixed Hazardous Materiel/MIXED HAZARDOUS MATL/NA.
C*	Etiologic Agent, UNCLASS 6/ETIOLOGICAL LBL/SF 420.
D*	Contaminated Cargo/CONTAMINATED CARGO/NA.
E*	Empty Hazardous Materiel Containers/HZRDOUSCONT-EMPTYLBL/SF 417.
F*	Explosives Class C, UN Class 1/EXPLOSIVES CL C LBL/SF 402.
G*	Nonflammable Compressed Gas, UN Class 2/NONFLAMMABLE GAS LBL/SF 403.
H	Subject to Damage from Heat/SUBJ TO DAMAGE-HEAT/NA.
I*	Explosives Class A, UN Class 1/EXPLOSIVES CL A LBL/SF 400.
J*	Explosives Class B, UN Class 1/EXPLOSIVES CL B LBL/SF 401.
K*	Spontaneously Combustible Substances, UN Class 4/SPONTCOMB-FLMSOL LBL/SFs 418 and 406.
L*	Water Reactive Substances, UN Class 4/FLAMSOL-DNGR-WET LBL/SFs 406 and 419.

CODE	DEFINITION/MESSAGE/STANDARD FORM
M*	Magnetic Materiel/MAGNETIC MATERIEL/NA. (Note: When air shipment is made, Optional Form 75, 76, 78, or 79, or the appropriate IATA label applies.)
N*	Dangerous Materiels in Limited Quantities/Limited HZRDOUS-NOLBLREQ.
O*	Flammable Compressed Gas, UN Class 2/FLAMMABLE GAS LABEL/SF 404.
P*	Poison Class B, UN Class 6/POISON CL B-POISNLBL/SF 410.
Q	Subject to Damage from Freezing/SUBJ TO DAMAGE-FRZNG/NA.
R*	Flammable Liquids, UN Class 3/FLAMMABLE LIQUID LBL/SF 405.
S*	Poison Class A, UN Class 2 or 6/POISNCLA-POISNGASLBL/SF 409.
T*	Poison Class C, UN Class 6/POISNCLC-IRRITANTLBL/SF 411 or 412.
U*	Combustible Liquids/COMBUST LIQ-NO LBL/NA.
V*	Miscellaneous Hazardous Materiel, UN Class 9/MISC HZRDOUS-NO LBL/NA.
W*	Corrosive Materiel, UN Class 8/CORROSIVE LABEL/SF 416.
X*	Flammable Solids, UN Class 4/FLAMMABLE SOLID LBL/SF 406.
Y*	Oxidizing Materiel, UN Class 5/OXIDZ OR ORGPROX LBL/SF 407 or 408.
Z	No Special Type of Cargo Code Applicable/NO SPECIAL CODE APPL/NA.
1	Aircraft Engine Internal Combustion Engines and Fuel Control Devices/No Label/NA.
2	Type Cargo Code not Applicable (for Air Force Internal Use)/No Label/NA.
3	Electronic Sensitive Device ELEC SENS DEV LBL REQ (Note: Subject to damage caused by static electricity or electro-static discharge. See appendix A, section I MILSTAMP, DoD 4500.32-R for further definition of Electronic Sensitive Device.

*Items assigned these codes will not be consolidated with items having like codes into the same shipping unit (single line shipment units).

NOTE: Manual interpretation and review may indicate like items may be consolidated into a transportation unit when the item covered by a separate requisition can be grouped under a single label (or no label) and can be described by the same true shipping name as prescribed in appropriate regulatory authority.

APPENDIX A-35

DEMILITARIZATION (DEMIL) CODES (MUNITIONS LIST ITEMS (MLI) AND NON-MLI)

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: These codes provide the demil requirements to be accomplished prior to release of materiel to the public sector through a property disposal activity. DEMIL Codes are entered on the Disposal Release Orders (DROs) by the managing DCS/ICP and perpetuated on DD Form 1348-1 provided to the property disposal activity; demil will be accomplished/directed by the Property Disposal Office. Distributions depots will assure the entry of a valid DEMIL Code on locally generated DROs.

4. The following codes are assigned:

CODE	EXPLANATION
A	Non-MLI - DEMIL not required.
B	MLI - DEMIL not required.
C	Remove and/or Demilitarize installed key point(s) as prescribed in DoD 4160.21-M-1, or lethal parts, components, and accessories.
D and L	Demilitarize by mutilation (make unfit for intended purpose) by melting, cutting, and tearing, scratching, crushing, breaking, punching, neutralizing and so on. (As an alternate, burial or deep water dumping may be used when authorized.)
E	Demilitarize by burning, shredding, or pulping.
F	DEMIL instructions to be furnished by Item Manager.
G	DEMIL required - item to be Demilitarized prior to physical transfer to DPDO. This code is normally limited to ammunition, explosives, and other dangerous articles.
H, J, K, M	DEMIL not required in U.S., Puerto Rico, and Virgin Islands. DEMIL required overseas only.
X	Indicates DEMIL requirement or munitions list applicability not determined by ICP. Distribution depots will acquire a valid code by contacting the managing DSC.

APPENDIX A-36

FAST PAY INDICATOR

1. Number of Characters: One.

2. Type of Code: Alpha.

3. Explanation: This is a one-position code which indicates whether or not a procurement receipt is within the criteria of fast pay, and/or is classified as an unpriced purchase order and/or a Certificate of Conformance applies.

4. Source: Provided by the Defense Supply Centers in Contract Data Cards (appendix B-31) transmitted via AUTODIN. The code is printed on each Contract Data Sheet (appendix F-201) under the heading FPI, when applicable.

5. The following codes are assigned:

CODE	DEFINITION
A	Contractual Document is Certificate of Conformance.
B	Contractual Document is Certificate of Conformance and an Unpriced Purchase Order.
N	Contractual Document is neither Fast Pay nor an Unpriced Purchase Order and a Certificate of Conformance clause does not apply.
P	Contractual Document is Unpriced Purchase Order and not Fast Pay.
Y	Contractual Document is Fast Pay.
Z	Contractual Document is Unpriced Purchase Order and Fast Pay.

APPENDIX A-37

TYPE OF MEDIA CODE

1. Number of characters: One.

2. Type of code: Alpha.

3. Identifies the type of media for transmittal of Inventory Control Point (ICP) requested transaction history.

CODE	DEFINITION
A	Transaction images to be transmitted by AUTODIN.
C	Transaction images to be transmitted in punched card format.
L	Listing of transaction history to be mailed.
T	Transaction images to be transmitted by magnetic tape.

APPENDIX A-38

ERROR CLASSIFICATION CODES

1. Number of characters: Three.

2. Type of code: Alpha/numeric.

3. Explanation:

a. The physical inventory program Error Classification Codes provide a standard means for classifying the causes of actual/potential adjustments for subsequent analysis, evaluation and corrective action.

b. The Error Classification Code is not a required entry but is assigned for internal use in preparing reports and for providing evaluation data to higher authority in standard Error Classification categories.

c. The following rationale applies to the Error Classification Code structure:

(1) First Position - The first character is the operation code which will be numeric or alphabetic and will identify the operation during which the error occurred and not the operation in which the error was detected. Code assignment for the first character is controlled by DoD and may not be assigned by the Services/Agencies.

(2) Second Position - The second character is the type of error code which will be alphabetic or numeric and will identify the type of error which occurred. Code assignment for the second character is controlled by DoD and may not be assigned by the Services/Agencies.

(3) Third Position - The third position may be assigned by each Service/Agency to internally amplify the Error Classification. Numeric and alphabetic code assignments in this position will be controlled by each individual Service/Agency for their internal use.

d. The following operation codes are assigned as the first character in the Error Classification Code:

CODE	OPERATION
0	Not assigned; reserved for future assignment by DoD.
1	Receiving
2	Issue

CODE	OPERATION
3	Physical Inventory
4	Cataloging Changes
5	Logistic Reassignments
6	Warehousing/Rewarehousing
7	Location Survey
8	Other
9	Not assigned; reserved for future assignment by DoD.
A-Z	Not assigned; reserved for future assignment by DoD.

e. The following type of error codes are assigned as the second character in the Error Classification Code and will be used only in conjunction with the operation code designated:

CODE	LEGEND	DEFINITION	APPLICABLE OPERATION CODES 1	2	3	4	5	6	7	8
A	System/Program Error	Accountable/custodial record was not correctly updated by a valid transaction because system failed or program contained a logic error.								X
B	Document Not Posted	Physical processing was completed but transaction update of the accountable/custodial record was not effected.	X	X	X		X		X	
C	Source Document Error	Error in the source document NSN, quantity, unit of issue, condition, type of pack, lot number, ownership/purpose, and/or location (Routing Identifier Code) caused erroneous update of acccountable/custodial record.	X	X	X		X	X	X	

CODE	LEGEND	DEFINITION	APPLICABLE OPERATION CODES 1	2	3	4	5	6	7	8
D	Data Entry Error	Input transaction did not match source document NSN, quantity, unit of issue, condition, type of pack, lot number, ownership/purpose, and/or location (Routing Identifier Code) and caused erroneous update of the accountable/custodial record.	X	X	X	X	X	X	X	
E	Rejected Document Not Posted	Transaction was rejected during processing and was not reinput to update the accountable/custodial record.	X	X	X	X	X	X	X	
F	Duplicate Document Posted	Same transaction updated the accountable/custodial record more than once.	X	X	X		X			
G	Reversal Document Not Posted	Accountable/custodial record was updated by a transaction processed to completion, and required transaction reversal was not processed.	X	X	X		X			
H	Erroneous Reversal Posted	Prior action to reverse a transaction which updated the accountable/custodial record was taken in error.	X	X	X		X			
I	Not Assigned									
J	Misidentified/ Mixed Materiel	Assets in storage location were identified by incorrect/multiple stock number, unit of issue, supply condition, shelf-life, type of pack, lot number or ownership/purpose.	X					X	X	

CODE	LEGEND	DEFINITION	APPLICABLE OPERATION CODES 1	2	3	4	5	6	7	8
K	Duplicate Physical Processing	Transaction updated the accountable/custodial record once but materiel physically processed more than once.		X						
L	Wrong Materiel Selected	Materiel selected did not match transaction which updated the accountable/custodial record (i.e., wrong stock number, quantity, unit of issue, condition, type of pack, lot, ownership/purpose, and/or location was physically selected).		X						
M	Materiel Selected From Wrong Location	Storage location from which materiel was selected did not match storage location cited in the transaction.		X				X		
N	Physical Processing Not Complete	Transaction updated the accountable/custodial record but physical processing of materiel was not completed.		X		X		X		
O	Not Assigned									
P	Erroneous Denial	Denial processed in error, materiel found after denial was submitted.		X						
Q	Materiel Not Stored/Stored Incorrectly	Materiel was not stored in finite location or placed in finite location when processing the storage transaction.	X					X		

CODE	LEGEND	DEFINITION	APPLICABLE OPERATION CODES 1	2	3	4	5	6	7	8
R	Infloat Document Control Error	Erroneous data posted to the accountable/custodial record because infloat documents were not considered or were not available.	X		X			X		
S	Erroneous Count	Materiel incorrectly counted.	X	X	X			X		
T	Erroneous Adjustment Posted	Prior action to adjust the accountable/custodial record was taken in error.			X					
U	Catalog Change Not Posted	Transaction resulted in erroneous update of the accountable/custodial record because accountable/custodial record was not updated by cataloging data change transaction.				X				
V	Erroneous Cataloging Change Posted	Erroneous data posted to accountable/custodial record due to error in catalog change transaction, (e.g., wrong unit of issue to or from, etc.).				X				
W	Bin Tag/Locator Label Error	Bin tag/locator label missing, incomplete or reflected erroneous data for assets in storage location.				X		X	X	
X	Theft	Inventory adjustment attributed to probable theft.							X	
Y	No Conclusive Findings	Cause for the inventory discrepancy could not be determined.							X	
Z	Not Assigned	Reserved for future assignment by DoD.								
0-9	Not Assigned	Reserved for future assignment by DoD.								

APPENDIX A-40

ITEM DATA CORRECTION CODES

1. Number of characters: One.

2. Type of code: Numeric.

3. Indicates in the Storage Items Data Correction card the nature of the change, actions to be taken, and affected data fields.

CODE	TITLE	DEFINITION
1	Consolidation of Stock Numbers	Indicates the item represented by the stock number in positions 8-24 is to be consolidated with the item represented by the stock number in positions 27-43. Both items will be issued under the stock number in positions 27-43.
2	Change of National Stock Number (NSN)	Indicates the NSN for the item in positions 8-24 has been changed to the NSN for the item in positions 27-43.
3	Change of Shelf-Life Code	Indicates the Shelf-Life Code has been changed for the item represented by the NSN in positions 8-24. The new Shelf-Life Code is shown in position 51.
4	Change of Physical Security/Pilferable Code	Indicates the Physical Security/Pilferable Code has been changed for the item represented by the NSN in positions 8-24. The new Physical Security/Pilferable Code is shown in position 52.
5	Change of Unit of Issue	Indicates the Unit of Issue has been changed for the item represented by the NSN in positions 8-24. Unit of Issue will be changed in accordance with the conversion factor reflected in positions 46-50.
6	Multiple Changes	Indicates multiple changes for the item representative by the NSN in positions 27-43.
7	Change of Demilitarization Code	Indicates the DEMIL Code has been changed for NSN in positions 8-24. New DEMIL Code is shown in position 53.

CODE	TITLE	DEFINITION
8	National Stock Number Deleted without Replacement	Indicates NSN in positions 8-24 has been deleted and not replaced.
9	National Stock Number Changed with Logistic Transfer (Loss)	Indicates NSN in positions 8-24 has been changed to NSN in positions 27-43 with Logistic Transfer (Loss). The Gaining Item Manager (GIM) is indicated in positions 56-58.
0	Not assigned.	
A-H	Not assigned.	Reserved for Intra-Service/Agency assignment and use.
I	Not assigned.	Not to be assigned.
J-N	Not assigned.	Reserved for future assignment by DoD.
O	Not assigned.	Not to be assigned.
P-X	Not assigned.	Reserved for future assignment by DoD.
Y	Manager	Indicates that the correct manager is in positions 56-58.
Z	New or Reinstated National Stock Number	Indicates NSN in positions 8-24 is new or reinstated.

APPENDIX A-42

ACTION CODES

1. Number of Characters: One or two.

2. Type of code: Alpha/numeric.

3. Action Codes identify the specific action to be taken in MOWASP against a table, file, or record when used with a specific DIC.

CODE	ACTIONS	DIC	DEFINITION/EXPLANATION	REFERENCE
1	Add Activity Address		Establishes the Activity Address of the Director of Depot Operations (table 04).	B-66 D D-29 D
1	Add Routing Identifier Code (To)		Establishes the Depot RIC to (table 04).	B-66 D D-29 D
1	Add Maximum Weight and Cube		Establishes the maximum weight cube data per each DD Form 1348-1 (table 04).	B-66 D D-29 D
1	Add HI PRI Time Increments		Establish HI PRI pick, and pack assembly increments (table 04).	B-66 D D-29 D
1	Add PDO Activity Address Code		Establish PDO Activity Address Code (table 04).	B-66 D D-29 D
1	Add Documentation Options		Establish appropriate documentation options contained in (table 04).	B-66 D D-29 D
1	Establish Batch Control		To establish methods of controlling batch sizes of SU line items in Location Group Code X (table 04).	B-66 D D-29 D

CODE	ACTIONS	DIC	DEFINITION/EXPLANATION	REFERENCE
1	Assembly Area		Establish SU and TU assembly areas (table 04).	B-66 D D-29 D
1	MMHS Weight/Cube		To establish maximum weight/cube for MMHS (table 04).	B-66 D D-29 D
1	Inventory Consoli-dation		Establish option for consolidation of MROs for items under inven-tory (table 04).	B-66 D D-29 D
1	Establish Batch Controls		To establish methods of controlling batch sizes of SU line items in nu-meric Location Group Codes (table 04).	B-66 D D-29 D
1	Exclude MROs from MOFAST Processes		Add, change, or delete options for excluding MROs by IPG, Location Group Code and Geographical Area Code from MOFAST (table 04).	B-66 D D-29 D
1	LOGAIR/QUICK TRANS and Freight Forwarder Preference		Establishes LOGAIR and QUICKTRANS Terminals servicing the depot. Also establishes FMS Freight forwarder location codes in order of preference (table 04).	B-66 D D-29 D
1	Establish DICOMSS Compatibil-ity Code		Establishes relationships between several Compatibil-ity Codes (appendix A-68).	B-66 D D-29 D
1	Establish Special Requirement Code		Establishes relationships between several Special Requirement Codes (appendix A-81).	B-66 D D-29 D

CODE	ACTIONS	DIC	DEFINITION/EXPLANATION	REFERENCE
1	Establish DICOMSS Cycle Extent Code		Establish the number of cycles to be included in the cycle extent.	B-66 D D-29 D
1	Establish Mechanized Warehouse Automatic Clear		Establishes the number of days after the DRD required to ship Parcel Post IPG III shipments from mechanized warehouse areas.	B-66 D D-29 D
1	Establish Other Warehouse Automatic Clear		Establishes number of days after the DRD required to ship Parcel Post IPG III shipments from other than mechanized warehouses areas.	B-66 D D-29 D
1	Establish Print Suppression Flag		Creates a flag to suppress print of various transactions on the F-84.	B-66 D D-29 D
1	Establish Return Address Print		If required, prints the return address on DD Form 1348-1.	B-66 D D-29 D
1	Establish MRO Extended Banking		Allows extended banking of MROs if option is exercised.	B-66 D D-29 D
1	Establish SEAVAN Indicator		Allows depots to enter automated SEAVAN Shipment Planning System.	B-66 D D-29 D
1	Establish Planned LI Chute Capacity		Establishes the planned quantity of line items to be assigned to each packing chute for the first routine batch each day.	B-66 D D-29 D

CODE	ACTIONS	DIC	DEFINITION/EXPLANATION	REFERENCE
1	Establish Maximum LI Chute Capacity		Establishes the maximum number of line items to be accumulated in each packing chute.	B-66 D D-29 D
1	Establish Weight/Cube for Receipts Forecast		Establishes the minimum weight and cube considered for receipts forecast.	B-66 D D-29 D
1	Establish Weekend MRO Controls		Add, Change, or delete weekend controls for hi-pri MRO quantity. (table 04).	B-66 D D-29 D
2	Add Mechanized Area Workload Batch Options		Establishes the options to batch workload in mechanized areas.	B-66 D D-29 D
2	Add SU and TU Assembly		Establishes SU and TU assembly areas by weight and cube limits.	B-66 D D-29 D
2	Add Receipts Forecast Minimum Weight		Establish the minimum weight considered for receipts forecast.	B-66 D D-29 D
2	Add Maximum Weight and MMHS		Establishes the maximum weight and cube to be picked from bulk MMHS.	B-66 D D-29 D
23	Add/Change Service Code and IPG Indicator		Adds or changes service code and IPG indicator for applying one freight-all freight and invokes inclusion of option to include export shipments in One Freight/All Freight (table 13).	B-66 M D-29 M

CODE	ACTIONS	DIC	DEFINITION/EXPLANATION	REFERENCE
24	Delete Service		Deletes service code indicator for applying one freight-all freight processing (table 13).	B-66 M D-29 M
25	Establish Geo. Area		Establishes a geographic area code as exempt from one freight-all freight processing (table 13).	B-66 M D-29 M
26	Delete Geo. Area		Deletes a geographic area code from being exempt from one freight-all freight processing (table 13).	B-66 M D-29 M
27	Establish Min. Wt.		Establishes one freight-all freight general minimum weight (table 13).	B-66 M D-29 M
28	Establish Volume DCR/ Consignees and Min. Wts		Establishes DCRs or consignees to be exceptions to general minimum weight and to establish specific minimum weights (table 13).	B-66 M D-29 M
29	Delete Volume DCR/ Consignee		Deletes an DCR or consignee as being exempt from the general minimum (table 13).	B-66 M
BN	NSN	ZUJ	Inquiry NSN from bin replenishment data collection system.	B-103

APPENDIX A-43

TYPE OF ADDRESS CODES

1. Number of characters: One.

2. Type of Code: Alpha, numeric, or blank.

3. Explanation: The type of address code is used to establish and/or inquire in the activity address file. This code is used in B-119, B-126, B-127, B-129, B-176 and B-177.

4. The following codes are assigned:

CODE	DEFINITION
1	Consignee address for mail (parcel post) or CONUS freight.
2	Overseas consignee and POE/POD freight addresses or CONUS consignee freight addresses when different from code 1.
3	FMS notice of availability address or Grant Aid Document Distribution address.
5	FMS Document Distribution address for parcel post shipments.
6	FMS Document Distribution address for freight shipments.
7	FMS Bill To Address when the TAC 1 and 2 addresses are not authorized to make payment for collect Commercial Bills of Lading or other types of collection delivery shipments.
8	Project In-the-clear Instructions/Name.
9	FMS and Grant Aid cross-reference address for deleted MAPAC.
A	Government Bill of Lading Destination address for rail shipments if different than codes G, 1 or 2.
B	Government Bill of Lading Destination address for Motor Freight shipments if different from codes G, 1 or 2.
C	Government Bill of Lading Destination address for Commercial Air Freight shipments if different from codes G, 1 or 2.
G	Government Bill of Lading Ship to address if different than codes 1 or 2.
M	FMS and Grant Aid in Country Mark for address.

APPENDIX A-44

COMMODITY MANAGER CODES

1. Number of Characters: One.

2. Type of Code: Alpha/numeric.

3. Explanation: This code is entered in the Locator Record to identify the activity maintaining accountability of the item in storage. It enables the:

a. Selection of data for preparation of reports to higher authority.

b. Production of Locator Reconciliation Cards, adjustments, and reports for submission to the Manager.

4. The following codes are assigned:

CODE	DEFINITION
C	DCSC Construction
E	DESC Electronics
G	DGSC General
I	DISC Industrial
M	DPSC Medical
P	DPSC Perishable Subsistence
R	DIPEC Industrial Plant Equipment
S	DPSC Subsistence
T	DPSC Clothing and Textiles
2	Navy
3	Air Force
4	Marine Corps
5	Army
6	GSA

In addition, defense depots may locally assign codes to indicate specific Agency, Service, or Service Inventory Control Point maintaining accountability for items in storage. Any alpha or numeric code may be used except those shown above.

APPENDIX A-45

TYPE OF STORAGE CODES

1. Number of Characters: Three.

2. Type of Code: Alphanumeric.

3. The type of Storage Code is utilized in the Item Locator Record and Locator Availability Record to identify the physical aspects or characteristics of each physical storage location. The code is composed of three digits - the second and third digits verify or further describe the first digit to arrive at any required combination.

4. Description of each of the three digits is as follows:

a. Type of Facility - This code describes the basic type of building or open storage area.

b. Facility Characteristics - This code identifies the characteristics of the building or sections thereof.

c. Type of Storage - This code identifies bulk locations, rack locations, and bin locations.

5. Input is made with Document Identifier Codes ZBA or ZBR.

6. Codes are established as follows:

a. Type of Facility

CODE	TYPE OF FACILITY
A	Warehouse, heated ground level
B	Warehouse, heated dock level
C	Warehouse, unheated ground level
D	Warehouse, unheated dock level
E	Shed
F	Magazine, Igloo
G	Magazine, above ground
H	Open, improved
I	Open, unimproved
J	Other

b. Facility Characteristics

CODE	TYPE OF FACILITY
1	General purpose
2	Controlled humidity
3	Flammable
4	Security
5	Chill
6	Freeze
7	Heavy Duty

c. Type of Storage

CODE	TYPE OF STORAGE
A	Bulk Storage
B	Rack Storage
C	Vault Storage
D	Bin Storage .5 to 1.0 Cu. Ft.
E	Bin Storage 1.1 to 1.5 Cu. Ft.
B	Bin Storage 1.6 to 2.0 Cu. Ft.
G	Bin Storage 2.1 to 2.5 Cu. Ft.
H	Bin Storage 2.6 to 3.0 Cu. Ft.
I	12 Cu. Ft.
	*Area Code O Bulk Storage - MMHS DDMP only. Otherwise, Bin Storage.
J	Bin Storage 3.1 to 5.0 Cu. Ft.
K	Bin Storage 5.1 to 6.0 Cu. Ft.
L	Bin Storage 6.1 to 8.0 Cu. Ft
M	Rotary 1.3 Cu. Ft.
N	Drawer .001 to .05 Cu. Ft.

CODE	TYPE OF STORAGE
O	13.5 Cu. Ft.
	*Area Code O Bulk Storage - MMHS DDMP only. Otherwise, Bin Storage.
P	Drawer .051 to .099 Cu. Ft.
Q	Flow Rack 1.61 Cu. Ft.
R	Flow Rack 3.59 Cu. Ft.
S	Bin Storage .1 to .25 Cu. Ft.
T	Bin Storage .26 to .49 Cu. Ft.
U	18 Cu. Ft.
	*Area Code O Bulk Storage - MMHS DDMP only. Otherwise, Bin Storage.
V	30 Cu. Ft.
	*Area Code O Bulk Storage - MMHS DDMP only. Otherwise, Bin Storage.
W	42 Cu. Ft.
	*Area Code O Bulk Storage - MMHS DDMP only. Otherwise, Bin Storage.
X	53 Cu. Ft.
	*Area Code O Bulk Storage - MMHS DDMP only. Otherwise, Bin Storage.
Y	63 Cu. Ft.
	*Area Code O Bulk Storage - MMHS DDMP only. Otherwise, Bin Storage.
Z	Pallet Bin
	*Area Code O Bulk Storage - MMHS DDMP only. Otherwise, Bin Storage.

*1st Position Physical Location Code (appendix A-59).

APPENDIX A-46

RECEIPT AND ADJUSTMENT SUFFIX CODES

1. Number of characters: One.

2. Type of Code: Alpha.

3. Explanation:

a. These codes are entered by elements of the distribution depot when two or more documents are required to report a specific transaction. These codes identify "partial quantities" or "different condition codes", without duplicating or causing loss of identity of the original document number. The appropriate code is entered in pos. 44, when required, on the following documents:

(1) Local Prepositioned Materiel Receipt Card (DICs DU_, DW_).

(2) Materiel Receipt Card (DICs D4_, D6_).

(3) Materiel Adjustment Card (DIC DAC).

(4) Deleted Item Report Card (DIC DK8).

b. Field position 44 is left blank when the total quantity can be reflected on one document and different condition codes do not apply.

4. Distribution depots assign alpha codes A through Z when required and will ensure that the same code is not duplicated for the same document number.

5. See appendix A-7 for Issue Transaction Suffix Codes.

APPENDIX A-47

SHELF-LIFE CODES

1. Number of characters: One.

2. Type of code: Alpha/numeric.

3. Explanation: These codes indicate that an item of supply possesses deteriorative or unstable characteristics to the degree that a limited storage time period must be assigned to assure issue of satisfactory materiel. Each code indicates both shelf-life in months and whether the shelf-life is nonextendable (Type I) or extendable (Type II).

4. Codes are assigned as follows:

SHELF-LIFE PERIOD	CODE TYPE I	CODE TYPE II
Nondeteriorative	0	0
1 month	A	
2 months	B	
3 months	C	1
4 months	D	
5 months	E	
6 months	F	2
9 months	G	3
12 months	H	4
15 months	J	
18 months	K	5
21 months	L	
24 months	M	6
27 months	N	
30 months	P	
36 months	Q	7
48 months	R	8
60 months	S	9
Military essential and medical items with shelf-life greater than 60 months. For info only. Not treated as a shelf-life item in requirements computation.	X	X

APPENDIX A-48

UNIT OF ISSUE CODES (ABBREVIATIONS)

1. Number of characters: Two.

2. Type of code: Alpha.

3. The UI Code is a 2-digit alphabetic code which is utilized in the receipt and issue processed and the Item Locator Record for various purposes.

4. Description Sequence:

APPENDIX A-49

FREIGHT RATING LTL AND LCL CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. These codes are utilized in the Item Locator Record to determine freight charges for less than truck load and less than carload shipments. The codes represent a percentage of the base rate (100 percent) for a specific NMFC or UFC to determine transportation charges for a given unit of weight.

4. Codes are established as follows:

CODE	PERCENTAGE	CODE	PERCENTAGE
A	400.0	N	80.0
B	300.0	P	77.5
C	250.0	Q	70.0
D	200.0	R	65.0
E	175.0	S	60.0
F	150.0	T	55.0
G	125.0	U	50.0
H	110.0	V	Below 50.0
J	100.0	*W	Rating/Variable
K	92.5	X	500.0
L	90.0		
M	85.0		

*Code to be used for any rate not shown or a stock number which has variable rates due to various method of pack (NMFC or UFC Suffix) in storage.

APPENDIX A-50

SEQUENCE OPTIONS FOR DD FORM 1348-1
(DoD SINGLE LINE ITEM RELEASE/RECEIPT DOCUMENT)

1. Number of characters: One.

2. Type of code: Numeric.

3. Field Position: 9

4. Explanation: These codes are locally assigned and entered in the Table and Control File to provide the Directorate of Storage and Transportation the option of selecting the order in which the DD Form 1348-1 are sequenced for a particular Stock Location Group Code (appendix A-50).

5. The following codes are assigned:

OPTION CODE	DD FORM 1348-1 SEQUENCE
1	Warehouse Location
2	First one, two, or three positions of Prime Warehouse Location. (This is same as Warehouse Selection Option Code.) Full 7 digits of Shipment Unit Number Last 8, 7, or 6 positions of Prime Warehouse Location
3	For multiline shipment units sequence DD Forms 1348-1 by: Shipment Unit Number - Major Warehouse Location Code - Minor For single line shipment units sequence DD Forms 1348-1 by: Warehouse Location
4	Sequence option which provides for sorting DD Forms 1348-1 into location sequence within high and low parameters based on a maximum vertical level indicator.

6. References:

a. Chapter 67, Section V.

b. Appendix B-66, Part D, Table 04.

APPENDIX A-51

STORAGE IN-TRANSIT PRIVILEGE CODES

1. Number of characters: One.

2. Type of code: Numeric.

3. This code is utilized in the Item Locator Record to indicate that storage in-transit privileges are in effect for the specified NMFC, UFC, and associated stock numbers. This code is utilized in:

a. MRO Processing to identify items in shipping units for which storage in-transit privileges may be utilized.

b. Enable annual computation of tonnage subject to in-transit privileges.

4. The establishment of this code normally will generate through receipt of materiel via freight.

5. The assignment of this code is contingent upon section 22, local carrier quotations applicable to each individual installation. This code is applicable to the UFC or NMFC as well as to any substitute UFC or NMFC established or allowed in each quotation.

6. The following codes are assigned:

CODE	DEFINITION
1	In-transit privilege NMFC
2	In-transit privilege UFC
3	In-transit privilege NMFC or UFC

APPENDIX A-52

POPULARITY GROUP CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. This code is a single digit alpha code which is utilized in the Item Location Record to identify stock numbers by rate of activity or turnover, i.e., Materiel Release Orders received for processing. These codes are developed and assigned in the computer from frequency count.

4. Popularity Group Codes are established as follows, monthly average based upon a frequency count during a six month's average history:

CODE	FREQUENCY COUNT	CATEGORY
A	51 or Over	High
B	11 to 50	Medium
C	1 to 10	Low
D	0	No Activity
E	--	New Procurement

APPENDIX A-53

REMOVE TAG CODES
(DELETED ITEM CODES)

1. Number of Characters: One.

2. Type of Code: Numeric.

3. This code is maintained in the depot Locator record. It identifies the status of deleted items and corresponding reinstatement actions.

4. The following codes are assigned:

CODE	DEFINITION
Blank	Active item.
0	Active item.
1	The record has been modified one or more times since last Emergency Item Locator Record Listing (F-51).
4	The item has been indicated as a catalog deletion through an entry in a ZBC (local action). The record will be deleted 365 days after the last trailer is deleted.
5	Previous Code 4 - Disposal Release Order (DRO) in process.
6	The item was deleted by a catalog change but has since been reinstated.
7	The item has been deleted by catalog change; the record is to be deleted 365 days after the last trailer is deleted.
8	The stock number on this item has been changed. The new NIIN is contained in the nomenclature field of this record. The record will be deleted 365 days after the last trailer is deleted.
9	Previous Code 7 - Item scheduled for deletion. DRO is in-process.

NOTE: When PDO action is complete, Codes 5 and 9 will return to Codes 4 and 7 respectively until the item drops from the locator record.

APPENDIX A-54

INVENTORY CATEGORY CODES

1. Number of characters: One.

2. Type of code: Alpha/numeric.

3. Explanation: This code is utilized to identify items which may be inventories in the same lot or those which require a complete inventory and are not selected for Sample Inventories.

4. The following codes for DLA managed items are assigned:

CODE	DEFINITION
H*	High dollar value items. Any item having three annual demands or more and an annual demand value of $4500.00 or more.
E*	Critical and pilferable items. This includes security classified items, assemblages, serially-numbered items, and unclassified, but pilferable items.
T*	Items with 40 or more annual demands and an annual dollar demand value of $1399.99, or less.
L*	Items with three or more annual demands and a demand value between $1400.00 of $4499.99.
U*	Sensitive items. This includes narcotics, precious metals and drug abuse items, and medicinal spirits.
O*	All other items not included in one of the above groups.
*	Assigned to the item by managing DSC.

In addition, defense depots may locally assign codes to indicate a specific category of items that are to be assigned the same Lot Number. Any alpha or numeric code may be used except those shown above, codes already assigned as Commodity Manager Codes (appendix A-44) and alpha O. Locally assigned codes will only be assigned to non-DLA managed items.

APPENDIX A-55

INVENTORY IN-PROCESS CODES

1. Number of characters: One.

2. Type of code: Alpha/numeric.

3. The Inventory In-Process Code is utilized in the Item Locator Record to indicate item is under inventory.

4. The Inventory In-Process Code is entered in the Item Locator as a flag on the record of the item which is scheduled for or already undergoing inventory. The flag is used to control in-float MROs during inventory. It is also used in conjunction with the inventory cutoff date to indicate those receipts which must be placarded as the NSN is under inventory.

5. When a Type A Remote Inquiry or a PMR and Locator Inquiry (ZB6) is processed for an item undergoing inventory, the Inventory In-Process Code will appear on the Stock Locator and Receipt Document.

6. Upon completion of the inventory and transmission of Inventory Count Cards to the Commodity Manager, the Inventory In-Process Code will be removed from the Locator Record.

7. Codes are assigned as follows:

INVENTORY IN-PROCESS CODE	TYPE OF INVENTORY CODE
1 =	A - Complete
3 =	C - Special (all conditions)
5 =	E - Spot inventory (all conditions)

NOTE: Inventory In-Process Codes for a specific condition will be the alpha condition code undergoing inventory.

APPENDIX A-56

STOCK LOCATION GROUP CODES
(WAREHOUSE AREA CODES)

1. Number of characters: One.

2. Type of Code: Alpha/numeric.

3. Purpose: These codes are locally assigned and entered into the Stock Location Group Table (Table Number 04) to define the basic work areas for the consolidation of Shipment Units and processing of related documentation. It relates the first, first and second, or first, second, and third positions of the Physical Location Codes (appendix A-59) which may be consolidated into a single Shipment Unit. Code X and numeric location group codes will be assigned uniformly throughout DLA to identify mechanized complexes. Code X or numeric codes will not be assigned to Warehouse Area Codes XXX when loading the Stock Location Group Code Table.

APPENDIX A-57

INVALID/VALID CUSTOMER COMPLAINT CODES

1. Number of characters: One.

2. Type of Code: Alpha.

3. Explanation: If during the investigation of a customer complaint it was determined an error was not made by the reporting depot, then this code will be entered to the record reflecting the results of the investigation.

4. Invalid Customer Complaint Codes are assigned as follows:

CODE	EXPLANATION
A	Not shipped by this depot.
B	Two MROs received and processed.
C	NSN Change authorized by center.
D	Nonpotency dated item.
E	Materiel is serviceable as procured.
F	Center procurement error.
G	Markings are IAW current regulations.
H	Price adjustment requested.
I	Signature for materiel on file.
J	Shortage shipped separate shipment.
K	Duplicate of previous complaint.
L	Partial cancellation processed.
M	Cancellation processed.
N	Warehouse denial processed.
O	Overshipment processed.
P	Undershipment processed.
Q	Rough Handling by Carrier.

CODE	EXPLANATION
R	Shipped condition code directed by MRO.
S	Shipped quantity directed by MRO.
T	Shipped NSN directed by MRO.
Z	Other.

5. Valid Customer Complaint Code is assigned as follows:

CODE	EXPLANATION
VV	Depot Accepts Responsibility of the Customer Complaint.

APPENDIX A-58

TYPE OF LOCATION CODES

1. Number of characters: One.

2. Type of code: Alpha/numeric.

3. The Type of Location Code:

a. Is usually computer-assigned based on data in the input which establishes a Locator Subrecord. The third digit of the Type of Storage Code (appendix A-45) indicates that a bin or bulk location is to be assigned.

b. May be manually assigned when management personnel determines that stock in particular location should be utilized prior to other similar stock.

c. Is entered in each Item Locator Subrecord to indicate order of selection and printing on each MRO of the appropriate bin and/or bulk location from which stock is to be picked. For all Subrecords either the Date of Pack, if available, will be included or, if not available, the Date of Establishment of the record will be inserted. Item Subrecords bearing the same Type of Location Code will be sequenced by the date with oldest date being utilized ahead of others.

4. The following codes are assigned:

CODE	DEFINITION
A	Manually assigned code to indicate bin locations of stock to be used prior to stock in any Code B locations.
B	Computer assigned code to indicate bin locations of stock.
K	Manually assigned code to indicate bulk locations of stock to be used prior to stock in any Code L locations.
L	Computer assigned code to indicate bulk locations of stock. Will not be assigned to area code O bulk storage - MMHS.
1	Computer assigned code for bin locations reserved for Due-Ins based on Prepositioned Materiel Receipt Card. This code enables the computer to bypass these locations in processing MROs and in selecting samples for inventory and in location reconciliation.
2	Computer assigned code for bulk locations reserved in mechanized materiel handling area.

APPENDIX A-59

PHYSICAL LOCATION CODES

1. Number of characters: Nine or twelve.

2. Type of code: Alpha/numeric.

3. These codes are utilized in the Item Locator Record, Locator Availability Record, and in the storage area to physically identify individual storage location.

4. Codes are assigned as follows:

CODE	DEFINITION
Area 1st Position Alpha	The first digit is alpha and may represent a group of structure such as a floor. Alpha O is reserved for single building or warehouse, a shed, or a part of a structure such as a floor. Alpha O is reserved for use in bulk mechanized complex at DDMP.
Station 2nd & 3rd Positions Numeric	The second and third digits are numeric and are used to identify a station within an area. These digits may be used to identify stock picking stations, stations for receipt of materiel for stowing, picking, stations, floors of a building, sections of a warehouse, a building within an area. Collection or assembly stations or drop-off stations in mechanized warehouse system may also be identified.
Aisle or Row 4th and 5th Numeric	The fourth and fifth digits are numeric and are used to identify aisles or rows within a station. An individual numbering system is utilized within each station.
Segment If nine characters: Position 6 and 7. If twelve characters: Position 6, 7 and 8.	This field identifies the segments within an aisle or row. A segment may be a short lot, stack, rack, bin, or a portion of a rack or bin. Segments are numbered serially within a row with the odd numbers on the left and the even numbers on the right. Assignment is based on direction of flow as shown in examples. Under this method, picking instruments are computer sequenced by segments within an aisle or row enabling picking on both sides of an aisle or row during a single traverse.

best copy available

CODE	DEFINITION
Level If nine characters: Position 8, alpha*. If twelve characters: Position 9 and 10 numeric.	This field represents the level within segments.
Compartment If nine characters: Position 9, alpha/numeric 6. If twelve characters: Position 11 and 12 numeric.	The last field represents the compartment within the segment level.

*Not applicable in bulk storage situations. See paragraph 6 below.

5. Criteria for the sequential assignment of an aisle or row and segment designators is critical inasmuch as it determines the amount of physical movement required in receipt, stowing, and stock picking operations. The assignment of locations must provide for the orderly picking of stock without returning to an area previously traversed.

6. In bulk storage situations, locally significant alpha codes may be applied in position 8 or 9 of the Physical Location Code to identify the month and year of the date of packs for shelf-life items or DICOMSS Cycle Code. When the level and compartment, date of packs, or Cycle Codes are not applicable, fill with the letters AA.

7. Examples are shown on the following pages.

APPENDIX A-60

SHIPMENT UNIT LINE ITEM STATUS CODES

1. Number of characters: One.

2. Type of code: Numeric.

3. These codes are computer assigned and depict the current processing status of the line item in the Shipment Unit File.

4. The following codes are assigned:

CODE	STATUS
0	DD Form 1348-1 prepared, no action reported.
1	Offered to Transportation.
3	Part of line item has been reported as shipped.
4	Shipment has been reported to the DSC as completed (ARO).
9	Quantity has been canceled or denied.

5. References:

a. Chapter 60.

b. Appendix F-40, Shipment Unit Line Item Inquiry Answer.

APPENDIX A-61

DEPMEDS COMPATIBILITY GROUP CODES

1. Number of characters: One.

2. Type of Code: Alphabetic.

3. Explanation: This code is computed based on an analysis of the Physical Security Code, the Hazardous Storage Compatibility Code, the Special Requirement Code and the Type of Cargo Code. The purpose of this code is to identify materiel having similar special handling requirements so that they can be grouped together for review.

4. The following codes and corresponding group names are assigned. The group names will be printed as titles on output products:

CODE	NAME
A	Classified Materiel
B	Controlled Substance
C	Pilferable
D	Flammable/Combustible
E	Corrosive Acid
F	Corrosive
G	Reactive Chemical
H	Toxic Chemical
I	Etiologic Agent
J	Radioactive
K	Explosive
L	Pesticide/Herbicide
M	Compressed Gas
N	Multiple Hazardous
O	Irritant
P	Subject to Damage by Freezing
Q	Subject to Damage from Heat
R	Refrigeration Required
S	Poison
T	Magnetic
U	Miscellaneous Hazard
V	Temperature Controlled - 50-86 C
W	Temperature Controlled - below zero C
X	Temperature Controlled - 2-8 C
Z	General Cargo

5. Logic for determination of the Compatibility Group Code is contained in appendix D-214.

APPENDIX A-62

LOCATION SURVEY CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: These codes are utilized in the Location Survey Request Cards, appendices B-77 and B-78, to specify type of survey.

4. The following codes are assigned:

CODE	DEFINITION
C	Complete Location Survey. A location survey card will be furnished for each location within the established parameter.
L	Complete Location Survey. A location survey listing, appendix F-152, will be furnished for parameters requested.
S	Sample Location Survey for sample size indicated. Cards provided.
P	Sample Location Survey for sample size indicated. Listing furnished.

APPENDIX A-63

MAJOR SORT GROUPING (DD FORM 1348-1) CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: This code identifies major groupings of DD Forms 1348-1. All codes, except the optional codes of D, E, H, J, I, R, S and T, are assigned by the computer. It will appear on the DD Form 1348-1 in the extreme right-hand margin, on the same line as the first line of the Parcel Post address.

4. The following codes are assigned:

a. IPG I and II MROs

CODE	DESCRIPTION
A	Walk-thru MROs.
B	No Location MROs.
C	No Address MROs, includes Grant Aid and FMS.
E	IPG I & II MROs with N-E in pos. 62 (NMCS) (ANMCS).
F	MROs with A, S or X in pos. 62 (Extended RDDs).
G	Special Projects.
H	RDD 999.
K	FMS MROs.
L	Normal MROs, includes Grant Aid (See *).
*R	Grant Aid MROs (Optional - Table 04).
*S	Hazardous Materiel MROs (Optional - Table 04).
**T	FMS Duplicates (Optional - Table 04).
U	Locally Generated DRO's from Receiving or Storage.
V	DEPMEDS Major Assembly Issues for Completed Sets.

b. IPG III MROs

CODE	DESCRIPTION
A	Exception MROs/DROs and DROs that do not contain a DEMIL Code.
B	No Location MROs/DROs.
C	No Address MROs, includes Grant Aid and FMS.
D	Multiple sets of DD Forms 1348-1.
G	Special Projects.
*I	MROs Released from Inventory (Optional - Table 04).
J	MROs under inventory.
K	FMS MROs.
L	Normal MROs, includes Grant Aid (See *).
M	Normal DROs.
N	DICOMSS MROs.
P	IPE MROs.
Q	Stock Segregation Notices.
*R	Grant Aid MROs (Optional - Table 04).
*S	Hazardous Materiel MROs (Optional - Table 04).
**T	FMS Duplicate (Optional - Table 04).
U	Locally Generated DRO's from Receiving or Storage.
V	DEPMEDS Major Assembly Issues for Completed Sets.

*If the option is envoked, these sort groups encompass the Inventory, Grant Aid and Hazardous MROs previously included in Sort Group Code L.

**If the option is envoked, this sort group encompasses the FMS Duplicate DD Form 1348-1 previously included in Sort Group Code K.

APPENDIX A-64

DELAYED SHIPMENT REASON CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Field Position: 19.

4. Purpose: This code is locally assigned and entered in the MPO Control/ Status Request Card (appendix B-99) and the Shipment Unit Completion Card (appendix B-101) to indicate the reason for which a shipment unit or line item is being delayed in storage.

5. The assignment of Delayed Shipment Reason Code U in pos. 19, (appendix B-99) will allow a line to be extracted and still allow all remaining lines in the shipment unit to be offered with input of (appendix B-101, DIC ZBP).

6. Type of Hold Codes and applicable definitions (appendix A-21) may not be duplicated.

7. The following codes are assigned:

CODE	REASON
U (DLA Assigned)	Offer all lines in shipment unit even though 1 or more lines have been extracted. Extracted lines remain open in shipment unit file until subsequent ZBM/ZEN is processed.

8. Reference: Chapter 60.

APPENDIX A-65

SPECIAL INSTRUCTIONS INDICATOR CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: The Special Instructions Indicator (SII) is used in the Military Assistance Program Address Directory (MAPAD) when an address requires additional information for proper use (i.e., exceptions). When applicable the special instructions will be included in the introduction to the appropriate Country Address Listing, DoD 5105.38-D, MAPAD.

CODE	SPECIAL INSTRUCTIONS
A	Shipping depot will ship materiel and send related documentation to the nearest freight forwarder.
B	Use of international parcel post of international air mail not desired for materiel shipments. All shipments will be made via Military Airlift Command.
C	Address is classified; refer to country introduction instructions.
D	Documentation will be transmitted by air mail or by electrical transmissions.
E	Shipments over 20,000 pounds obtain routing instructions from TAC 3 address. Shipments less than 20,000 pounds require manual review for determination of routing instructions.
S	Special instructions involve use of clear text statement or multiple instructions. Refer to country introductory remarks.

APPENDIX A-66

SEQUENCE OPTION FOR DLA FORM 674 AND DD FORM 1387

1. Number of characters: One.

2. Type of code: Numeric.

3. Explanation: These codes are locally assigned and entered in the table and Control File to provide the DS&T the option of selecting the order in which the Shipment Planning Worksheet, DLA Form 674 and the Freight Stencil for DD Form 1387 are sequenced for a particular Stock Location Group Code (Warehouse Area) appendix A-56. Option 5 provides for straight shipment unit sequence without regard to Stock Location Group Code.

4. The following codes are assigned:

OPTION CODE	DLA FORM 674 AND DD FORM 1387 SEQUENCE
1	Physical Location Code.
2	Shipment Unit Number (within SLGC).
3	a. For multiline shipment units sequence by Batch and Control Number.
	b. For single line shipment units sequence by Physical Location Code.
4	a. For multiline shipment units sequence by Batch and Control Number.
	b. Single line sequence in Shipment Unit Number.
5	Shipment Unit Number (not by SLGC).

APPENDIX A-67

FSC ASSIGNMENT OF DATA BANK MAINTENANCE

The following classes are assigned to designated prime depots for maintenance of data in the MOWASP Central Data Bank:

CLASS	DSC	PDD
1005	C	C
1010	C	C
1015	C	C
1020	C	C
1025	C	C
1030	C	C
1040	G	R
1055	G	R
1080	G	R
1090	G	R
1095	C	C

NOTE 1: *These classes are not assigned to DLA. However, DLA manages one or more items in each class on an exception basis. Only those items managed by a DSC are carried in the MOWASP Data Bank. When S9M conflicts in any of these classes with S9C or S9G, then medical is coded as the exception manager as in any other DLA assigned class.

NOTE 2: A - DDMP
B - DDTC
C - DCSC
E - DESC
M - DDMT
R - DGSC
U - DDOU

NOTE 3: *The PDD Code is the second position of the depot RIC and DSC Code is the third position of the RIC. The RIC of the Central Data Bank is SAB.

APPENDIX A-68

TRANSPORTATION COMPATIBILITY CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: Transportation Compatibility Codes are used to identify materiel that can be shipped in one container for commissary items.

4. The following codes are assigned:

CODE	DEFINITION
A	Indicates item subject to contamination. Examples: Flour in bags, bakery products in cartons, edible commodities subject to infiltration.
B	Indicates item possessing the potential to contaminate Code A items. Example: Odors from cleaners containing ammonia.
C	General Cargo. Examples: Canned goods and household items.
*E	Subject to Damage by Freeze, contamination.
*F	Subject to Damage by Freeze, noncontamination.
G	Green Label.
H	Hazardous Items. No label required.
R	Red Label.
W	White Label.
Y	Yellow Label.

*Reference appendix B-66, part D, table 04 and appendix D-29, part D. Line items already in Commissary Workload Bank will not be effected by consolidation of codes E/B and F/C.

5. Reference: Chapter 20.

APPENDIX A-69

TRANSPORTATION DENSITY CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: Transportation Density Codes provide information concerning weight/cube density applicable to commissary items. Code X supports the MOFAST GBL preparation process.

4. The following codes are assigned:

CODE	DEFINITIONS
A	Indicates item having a weight/cube density of 00.00 to 15.00 pounds per cubic foot.
B	Indicates item having a weight/cube density of 15.01 to 35.00 pounds per cubic foot.
C	Indicates item having a weight/cube density of 35.01 or over pounds per cubic foot.
X	Identifies NMFCs which have a density application in the MOFAST system. The MOFAST process will compute the weight/cube density and select the proper freight description for use upon the Government Bill of Lading.

5. Reference: Chapter 20 for commissary items.

APPENDIX A-70

ITEM STATUS CODES

1. Number of characters: One.

2. Type of code: Numeric.

3. Explanation: These codes will be received from the Central Data Bank to reflect the status of the record and to identify those records that have missing data. Item Status Code will be reflected on replies from inquiries to the bank.

4. The following codes are assigned:

CODE	EXPLANATION
0	Record created by the DSC. Not yet validated or updated by the prime depot.
1	Record created as a result of an inquiry for data. Prime depot has been notified.
2	Record created or updated by prime depot but data still missing.
3	Recor created as a result of an inquiry for data. DAAS has been requested to furnish source of supply data in order to determine if the item is managed by DLA.
9	Record created or updated by prime depot and all mandatory fields contain data.

APPENDIX A-72

TYPE OF PACKAGE CODES

1. Number of characters: Two.

2. Type of code: Alphanumeric.

3. These codes are used:

a. To identify type of packages in a Shipment Unit.

b. Will be entered, when applicable, enclosed in parenthesis, in item 7 of SF 363 and/or item 9 of SF 361.

4. Codes are assigned as follows:

CODE	DEFINITION
BD	Bundle
BE	Bale
BG	Bag, burlap or cloth
BL	Barrel
BS	Basket
BX	Box
CA	Cabinet
CB	Carboy
CC	Household goods containers, wood, (Fed Spec. PPP-B-580)
CL	Coil
CM	Container, MAC ISO lightweight, 8x8x20 ft. air container
CN	Can
CO	Container, other than CC, CM, CU, CW, MW or MX
CR	Crate
CS	Case
CT	Carton
CU	Container, Navy cargo, transporter
CW	Container, Commercial highway lift (PTTC)
CY	Cylinder
DB	Dufflebag
DR	Drum
EC	Engine container
ED	Engine cradle or dolly
FK	Footlocker
HA	Hamper
KE	Keg
LS	Loose (not packaged)
MW	Multi Wall Container (formerly) referred to as triple wall or tri-wall secured or attached to pallet
MX	Mixed (more than one type of shipping container)
PC	Piece
PL	Pail
PT	Palletized Unit Load other than code MW

CODE	DEFINITION
RL	Reel
RO	Roll
RT	Roll-on/roll-off trailer
SA	Sack, paper
SB	Skid Box
SD	Skid
SH	Sheet
SL	Spool
SW	Suitcase
TB	Tub
TK	Trunk
TU	Tube
UX	Unitized (cargo on roll-on/roll-off vehicles is considered roll-on/roll off)
VC	Van Chassis
VE	Vehicle
VO	Vehicle in operating condition
VS	SEAVAN tote
WR	Wrapped
X_	Container. CONEX to be assigned as follows based on CONEX Numbers

CODE	CONTAINER SERIAL NOS.
X0	00001 to 99999
X1	100000 to 199999
X2	200000 to 299999
X3	300000 to 399999
X4	400000 to 499999
X5	500000 to 599999
X6	600000 to 699999
X7	700000 to 799999
X8	800000 to 899999
X9	900000 to 999999

Z_	Commercial SEAVAN
ZA	Loaded to Capacity by Ocean Carrier
ZB	Loaded to Capacity by Military Terminal
ZC	Loaded to Capacity by Military Shipping Activity
ZD	Loaded to Capacity by Commercial Supplier
Z3	Loaded to Less than Capacity by Military Activity
Z4	Loaded to Less than Capacity by Commercial Supplier
ZL	Loaded to Less than Capacity by Military Shipping Activity, Loading Completed by Commercial Supplier
ZM	Loaded to Less than Capacity by Commercial Supplier Loading completed by Military Terminal
ZT	Loaded to Less than Capacity by Military Shipping Activity, Loading Completed by Ocean Carrier.
ZU	Loaded to Less than Capacity by Commercial Supplier, Loading Completed by Ocean Carrier
ZZ	Empty Military (MILVAN) SEAVAN

APPENDIX A-73

TRANSACTION STATUS INDICATOR

1. Number of characters: One.

2. Type of code: Alpha.

3. Field Position: 80

4. Explanation: Identifies an acceptance alert, followup, or report transaction as to whether it is a corrected version of a previous transaction, or is a type of reply.

5. The following codes are assigned:

CODE	DEFINITION
A	Reply to a previous request.
C	Corrected transaction.
D	Interim reply.
E	Request for corrected transaction.

6. References

a. Appendix B-133, DIC PK5.

b. Appendix B-134, DIC PKN/PKP or ZKN/ZKP.

c. Appendix E-094 P, Manual Processing of Acceptance Reports.

APPENDIX A-74

SHIPMENT ACCEPTANCE DISCREPANCY EXPLANATION

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: The reason for the variance between the quantity documented as shipped and the quantity accepted.

4. The following codes are manually selected and mechanically assigned by the suspended Report Process.

CODE	DEFINITION
D	Documentation. Incomplete, improper, or without authority and which precludes acceptance.
E	Documentation. Shipment Number incomplete or missing but does not preclude acceptance.
M	Misdirected. Materiel addressed to wrong activity.
N	Nonconforming. Items do not conform to the contract specifications.
O	Overage. Quantity received in excess of quantity on shipping document.
S	Shortage. Quantity received less than quantity on shipping document.
T	Inadequate Technical Data. Missing, mutilated, or incomplete (includes warranty data).
U	Undelivered.
W	Wrong Item. Incorrect item received.
X	Damaged. Received in damaged condition.

5. Reference:

a. Appendix A-26, Receipt and Surveillance Discrepancy Codes.

b. Appendix B-134, Acceptance Report.

c. Appendix B-108, Processing Receipt Confirmation Cards.

APPENDIX A-75

SPECIAL CONTRACT PROVISIONS

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: The identification of certain contract provisions which require specialized attention. Selected clauses included in contracts which require special attention and handling.

4. The following codes are assigned:

CODE	DEFINITION
A	Liquidated damages.
B	Advance payments authorized.
C	Progress payments authorized.
D	Remittance address different from bid/offer address.
E	Administration of Government property anticipated.
F	First article/preproduction sample/laboratory test approval required.
G	Flight operations involved (aircraft acceptance).
H	Dangerous/hazardous materiel involved (safety clauses).
J	Anticipatory Government furnished facilities cost approval required.
K	Bond bailment (DPSC clothing contracts only).
L	Delivery schedules on maintenance contract requiring future definitization.
M	Formalized delivery schedules on maintenance contract unnecessary.
P	Delivery schedule required based upon delegation assignment and upon approval of first article.
Q	Contract schedule subline items not separately priced - withholding of billing and payment clause included.

5. Reference: Appendix B-133.

APPENDIX A-76

DATING TECHNIQUES

1. Number of characters: Five or seven.

2. Type of code: Alpha/numeric.

3. Explanation: To identify the type of date/time period configurations used in the MILSCAP processes.

4. The following codes are assigned:

a. Seven-digit date. "Date" is a notation which specifies a given day of the Gregorian year. This notation provides for the identification of the year, the month, and the day, in that sequence.

CODE	DEFINITION
Positions 1 and 2	A period of either 365 or 366 days of a century as defined by the Gregorian calendar (00 to 99).
Positions 3, 4, 5	One of the 12 parts into which a year is divided as defined by the Gregorian calendar, i.e.:

Jan-January	Jul-July
Feb-February	Aug-August
Mar-March	Sep-September
Apr-April	Oct-October
May-May	Nov-November
Jun-June	Dec-December

Positions 6 and 7	One of the 24-hour periods of a month as defined by the Gregorian calendar (01 to 31).

b. Five-digit year-month.

CODE	DEFINITION
Positions 1 and 2	Numeric year (01 through 99).
Positions 3, 4, 5	Alphabetic month abbreviation (as detailed above).

c. Five-digit month-day.

CODE	DEFINITION
Positions 1, 2, 3	Alphabetic month abbreviation (as detailed above).
Positions 3 and 4	Numeric day of month (01 through 31).

5. References

a. Appendix B-133.

b. Appendix B-134.

APPENDIX A-77

FUNCTIONAL ROUTING CODES

1. Number of characters: Two.

2. Type of code: Alpha and/or numeric.

3. Sources of code:

a. Table 01, appendix B-66, part A, for documents received from an outside source, and for local documentation for which no Functional Routing Code (FRC) keypunch column space is provided. Table limit is 148.

b. Local documentation for which card entry of FRC is provided in appendix B series formats.

4. Purpose: FRCs are locally assigned and used in conjunction with DICs to identify the action organizational element or individual. Table 01, DIC to FRC Table, of appendix B-66 is the medium for mechanical identification to single activities responsible for violation processing. When FRCs are not established in table 01, computer processes will perpetuate the FRC of the originator from each input card for subsequent printout. FRC AA is assigned to indicate no FRC available in table 01.

5. The MSO is responsible for assignment of FRCs and maintenance of table 01.

6. FRC ZZ is reserved for use by the DLA Auditor.

APPENDIX A-78

AREA SHIPPING CYCLE TABLE ROTATION CYCLE CODES

1. Number of characters: Three.

2. Type of code: Alpha.

3. These codes are used to identify the shipping rotation cycle for a geographical shipping area or subarea. The days of the week are used as the code to identify the day(s) of the week that MROs, for specific geographic shipping areas, are to be released for shipment processing.

4. Codes are assigned as follows:

CODE	EXPLANATION
MON	Monday
TUE	Tuesday
WED	Wednesday
THR	Thursday
FRI	Friday
SAT	Saturday
SUN	Sunday

APPENDIX A-79

EXPORT DESTINATION CODES

1. Number of characters: One.

2. Type of code: Alpha or numeric.

3. Explanation: These codes identify the major and subgroup areas for export consignees. The subgroup area codes correspond to the first position of the MILSTAMP Water POD Codes.

4. The following codes are assigned:

SUB	MAJOR	DESTINATION
A	2	North Atlantic
B	3	Canal Zone and Panama
C	3	Carribean
D	3	Middle America - West
E	3	South America - West
F	3	South America - East
G	3	Azores
H	4	British Isles
J	4	Northern Europe
K	6	West Mediterranean
L	6	East Mediterranean
M	6	West Africa
N	6	South and East Africa
P	6	Persian Gulf - Red Sea
Q	6	Burma - India
R	8	China Sea
S	8	Phillipines
T	7	Central Pacific Islands
U	7	Korea, Japan, Ryuku, and Bonin Islands
V	8	Australia, New Zealand and Coral Sea
W	8	South Pacific Islands
X	5	Hawaii
Y	1	North Pacific and Northwest Arctic
Z	8	Antartica

APPENDIX A-80

STATE CODES

1. Number of characters: Two.

2. Type of code: Alpha.

3. Explanation: This code identifies the first level geopolitical entity division of the United States of America.

4. The following codes are assigned:

STATE	CODE	STATE	CODE
Alabama	AL	Missouri	MO
Alaska	AK	Montana	MT
Arizona	AZ	Nebraska	NE
Arkansas	AR	Nevada	NV
California	CA	New Hampshire	NH
Colorado	CO	New Jersey	NJ
Connecticut	CT	New Mexico	NM
Delaware	DE	New York	NY
District of Columbia	DC	North Carolina	NC
Florida	FL	North Dakota	ND
Georgia	GA	Ohio	OH
Hawaii	HI	Oklahoma	OK
Idaho	ID	Oregon	OR
Illinois	IL	Pennsylvania	PA
Indiana	IN	Rhode Island	RI
Iowa	IA	South Carolina	SC
Kansas	KS	South Dakota	SD
Kentucky	KY	Tennessee	TN
Louisiana	LA	Texas	TX
Maine	ME	Utah	UT
Maryland	MD	Vermont	VT
Massachusetts	MA	Virginia	VA
Michigan	MI	Washington	WA
Minnesota	MN	West Virginia	WV
Mississippi	MS	Wisconsin	WI
		Wyoming	WY

APPENDIX A-81

SPECIAL REQUIREMENT CODES

1. Number of characters: One.

2. Type of code: Alpha/numeric.

3. Explanation: These codes are used in the locator basic record to indicate special characteristics of an item to be used during the receiving, storage, and shipping actions. Items with codes marked with an asterisk will not be consolidated into the same shipment unit with items having like or unlike codes; other items may be consolidated with items having like codes.

4. The following codes are assigned:

CODE	DEFINITION
A*	Radioactive.
B	No-Go Parcel Post.
C	Glycerin.
D	Unassigned.
E	Sensitive Electronics.
F	Unassigned.
G	Unassigned.
H	Subject to damage from heat, over 40 degrees C (104 degrees F).
I	Unassigned.
J	Characteristics require freight movement.
K	55 gallon drums.
L	Compressed gas cylinders.
M	Precious metals.
N	Unassigned.
O	Unassigned.
P	Unassigned.
Q	Subject to damage from freezing.

CODE	DEFINITION
R	Unassigned.
S	Security cage.
T	JAN Class S Material.
U	Hazardous/Refrigerated items eligble for UPS Surface Shipment.
V	Inspect before shipment.
W	Consumable alcoholic items.
X	Unassigned.
Y	Unassigned.
Z	No code applicable.
0	Narcotics.
1	Unassigned.
2	Fragile label.
3	Refrigeration, 2 to 8 degrees C (36 degrees to 46 degrees F) may be out of refrigeration for specified periods of time during shipment.
4	Refrigerated/flammable.
5	Constant Refrigerated - 2 degrees to 8 degrees C, (36 degrees to 46 degrees F) water ice required during shipment.
6	Freeze - below 0 degrees C (32 degrees F).
7	Unassigned.
8	Unassigned.
9	Temperature controlled (50 degrees to 86 degrees F). Storage only.

*Do not consolidate items having these codes with items having like or unlike codes.

CODE	VIOLATION/REASON	APPLICABLE DOCUMENT IDENTIFIERS
AS	Quantity Invalid or Blank	A5_, A2_, DU_, DW_, DZC, DZD, D8_, D9_, CR5, A5J, CKE, ZAC, ZAD, ZBF, ZBM, ZC0, ZC6, ZEN, CJW, AF6, ZC9, ZEW, ZHW, ZDA, ZUM, ZV_, ZW_, ZX_, AFJ, DAC, AC6, ZY_, ZZ_, ZZJ, ZZR, ZZ9, PK5, ZKN, AK6, DKA, ZKP, CC_, C2D, C2G, C2H, Z2D, Z2G, ACJ, AG7, Z2H

YK	Survey Lot Number Not on Record	ZBH, ZEV
YM	ZC0 Card with a Partial Quantity and no X in pos. 55	ZC0, ZC9
ZI	Government Bill of Lading Office Code Invalid	ZGP, ZYP
ZJ	Activity Address Record contains Destination Cross-Reference	ZVD, ZVE, CVD
ZL	Open Balance Minus Quantity Offered/Shipped Minus Quantity Undershipped does not Equal Zero	ZBM
ZN	Invalid Mode Restriction Code	ZGP, ZYP
ZU	Invalid DICOMSS Bank Code	ZGP, ZYP
ZV	TCN Partial Number Invalid	ZEN
ZY	Quantity Adjustment Greater Than Quantity Shipped on Overshipment	ZBM
ZZ	Quantity Offered/Shipped Minus Quantity Overshipped does not Equal Open Balance	ZBM
Z7	Invalid DICOMSS Type of Item Code	CKJ, CKK, ZUW
Z8	Shipment Unit Code Invalid	ZUU, ZUV
Z9	Action Code Incompatible with Data Fields	ZEN, ZUV, ZAC, CKJ, DAC

CODE	VIOLATION/REASON	APPLICABLE DOCUMENT IDENTIFIERS
01	*Type Record Invalid for History	*VRCs 01 through 08 are generated by internal computer operations, there is no input. Program will be corrected by Data Systems Personnel.
02	*Unmatched Type B Record - Updates Shipment Unit Control Fields	
03	*Unmatched Type C Record - Closes a History Record	
04	*Cancellation Equal to Cumulative Register on Short History Shipment Unit Number Assigned - Document not in Bank	
05	Unmatched Type J Record - Updates Shipment Fields	
06	Unmatched Type L/M Record - Type L Updates Cancellation/Denial Field. Type M Cancels and Answers Cancellation Requests	
07	Adjustment or Denial Record Being Processed Against a Closed MRO or MRO is in DP Status	ZAV, ZAX
08	Unmatched Type K Record - Summarized Shipment Information	
11	Invalid Year and/or Invalid Data in Numeric Field	ZBA, CRS, ZAX
12	Invalid MIS Manager Code	ZUM
13	Invalid PDT or Julian Date Other Than 1 through 336	ZBM, ZBP, ZAC, DAC
17	Change or Delete - Record Not on File	ZVH
18	An Add - Already on File	ZUQ
19	Bad Sequence Code	ZBB
2G	Demil Code Blank or Invalid	A5J

CODE	VIOLATION/REASON	APPLICABLE DOCUMENT IDENTIFIERS
2K	Discrepancy/Management Code Invalid	ZBH
2L	Area Control Branch Invalid	ZBG
2M		ZBG, ZEV
2N	Sample Survey Interval Code Not Entered	ZBG
2P	Inventory Count Number Invalid	ZKA, ZUP, DKA
3G	Small Parcel Carrier Code Invalid	ZGP, ZYP
3H	SPLC in A, B, C, Type Address Blank or Invalid	ZVD, CVD
3J	Project Code not on Project Table Indicating Special Address	TA1, TA3
3N	Consist Headers Data Card/Transportation Planning Pull Card Incompatible	ZUU, ZUV
3O	Maximum Number of Location (30) for NIIN Established on Locator for Commissary Item	ZBA
3P	Maximum Number of PMR Subrecords (10) Established for NIIN on PMR	D4_
3T	Pull Criteria Unmatched to Commissary MRO Bank	ZUV
3U	Insufficient Cube in Commissary MRO Bank	ZUV
3V	Cancellation Request for Commissary Item	ACG, AK6
3W	RDD Invalid	A5_ (except A5J), ZUW, ZZ_, ZZ9, CJW
3Z	BBP not on File	TA1,TA3
4B	Type of Address Code not on File	MA4, TA4, ZAG, ZVD, ZVE, ZNZ, ZAB, MA1, MA2, MA3, CVD, ZVD
4C	ACC Record Contains DCR Master	ZGP, ZYP
4K	Cycle Code Invalid	ZUW, ZV_, ZX_, DUS, CRS, ZAD, D8_, D9_

CODE	VIOLATION/REASON	APPLICABLE DOCUMENT IDENTIFIERS
4L	Cycle Date Invalid	ZUW
4M	No Later Than Delivery Date Invalid	ZUW
4N	Number of Line Items Due-In Invalid	ZUW
4O	Tons Due-In Invalid	ZUW
4P	MROs Due-Out Invalid	ZUW
6C	DICOMSS Support Site Code Invalid	CKK, CKJ
8L	Invalid Data	ZGP, ZGR, ZYP
8Y	Data Not Numeric	ZVK
8V	Invalid Discrepancy/Work Required Code	ZV_, ZW_, ZX_, ZY_, ZKP, ZKN

APPENDIX A-83

MANAGEMENT INFORMATION SYSTEM ELEMENT NUMBERS

1. Data element numbers provide input control (appendix B-135) for placement of feeder data on appendix F-9 (Management Information System Feeder Data).

2. Each data element is assigned a code number comprised of up to six alphanumeric characters. Two categories of elements, detailed in subsequent paragraphs, are included in the F-9 report. These are:

a. PART 1: Feeder elements for the Distribution Depot Operations and Performance Report - RCS DLA(M)232(O)MIN.

b. PART 2: Feeder elements for the Management Data Report - RCS DLA(M)26(C) MIN.

3. PART 1 - Feeder Elements for the RCS DLA(M)232(O)MIN:

a. Code numbers assigned for these elements in the F-9 report are the same as the numbers used in the RCS 232 Report Glossary. Each basic element is assigned an identifying number, with data field numbers being formed by adding two numeric characters to the basic element number. Thus, while each basic element bears a distinctive number, data fields bear the same number (01 through 18) in every basic element with data fields 19-21 as the breakout by IPG. Following is an example:

Element Title:	MRO Line Items Shipped	Element Title:	MRO Line Items Shipped
Element Number:	0130	Element Number:	0130

Data Field Numbers:

0130 01 - DCSC
0130 02 - DESC
0130 03 - DGSC
0130 04 - DISC
0130 05 - DPSC (C&T)
0130 06 - DPSC (MED)
0130 07 - DPSC (SUB)
0130 08 - DIPEC
0130 09 - TOTAL DLA (01-08 INCL)
0130 10 - DICOMSS

Data Field Numbers:

0130 11 - GSA
0130 12 - ARMY
0130 13 - NAVY
0130 14 - USAF
0130 15 - USMC
0130 16 - OTHER
0130 17 - SUB TOTAL (10-16 INCL)
0130 18 - TOTAL ALL (09+17)

b. PART 1 basic elements are numbered and defined as follows, Data elements marked with an asterisk (*) are displayed on the F9 report only, will not be reported to HQ DLA via AUTODIN and the B/95 MIS cards.

ELEMENT NO.	TITLE	DEFINITION
0010	Line Items Received for Stock	Aggregate number of D4_ and D6_ completed receipt transactions with Action Codes LA, LK, SA, and SK are processed to DSCs/ ICPs during report period.
0011	Bin Line Items Received for Stock.	Aggregate number of D4_ and D6_ completed receipt transactions, with Action Codes LA or SA, are processed to DSCs/ICPs during report period.
0012	Bulk Line Items Received for Stock	Aggregate number of D4_ and D6_ completed receipt transactions, with Action Codes LK or SK, are processed to DSCs/ICPs during report period.
0020	Line Items Received for Stock from Procurement and Redistribution	Aggregate number of D4_ and D6K completed receipt transactions processed to DSCs/ICPs during report period.
0030*	Line Items Received for Stock from Customer Returns/Other	Aggregate number of D6_ (less D6K) completed receipt transactions processed to DSCs/ICPs during reporting period.
0031	Line Items Received for Stock from Customer Returns	Aggregate number of D6A through D6E completed receipt transactions processed to DSCs/ICPs during report period.
0032	Line Items Received for Stock from Other	Aggregate number of other than D4_, D6A through D6E and D6K completed receipt transactions processed to DSCs/ICPs during report period.
0040	Line Items Received for Stock, Processed on Time	Count of all D4_ and D6K completed receipt transactions processed within seven calendar days. Count all other than D4_ and D6K completed receipt transactions processed within ten calendar days.
0050*	Line Items Received for Stock, Percent Processed on Time	Element 0040 divided by Element 0010. (HQ DLA Computation)

ELEMENT NO.	TITLE	DEFINITION
0060	Line Items Received for Stock from Procurement and Redistribution, Processed on Time	Count of all D4_ and D6K completed receipt transactions processed within seven calendar days.
0070*	Line Item Received for Stock from Procurement and Redistribution, Percent Processed on Time	Element 0060 divided by Element 0020. (HQ DLA Computation)
0080	Line Items Received for Stock from Customer Returns/Other, Processed on Time	Count of all D6_ (less D6K) completed receipt transactions processed within ten calendar days.
0090*	Line Items Received from Customer Returns/Other, Percent Processed on Time	Element 0080 divided by Element 0030. (HQ DLA Computation)
0110	MRO Line Items Received	Count of Each MRO (A5_) except A5J added to the MRO History File during the reporting period.
0120	MRO Line Items Returned Unprocessed	Count of each MRO (A5_) except A5J line item canceled by DSCs/ICPs or returned without processing at direction of DSCs and MROs rejected with Status Code CB.
0130	MRO Line Items Shipped	Count of each MRO (A5_) except A5J closed in the MRO History File for which any portion of the ordered quantity was shipped.
0131	Bin Line Items Shipped via Parcel Carrier	Count of each MRO (A5_), except A5J, with type of location codes A or B and mode of shipment codes G, H, J, 5, 6, or 7, is closed in the MRO History File for which any portion of the ordered quantity was shipped.
0132	Bin Line Items Shipped via other than Parcel Carrier	Count of each MRO (A5_), except A5J, with type of location code A or B and mode of shipment codes other than G, H, J, 5, 6, or 7 is closed in the MRO History File for which any portion of the ordered quantity was shipped.

ELEMENT NO.	TITLE	DEFINITION
0140*	MRO Line Items Offered on Time	Count of all MRO (A5_) except A5J line items that have been offered to transportation, on or before the MDT. If MRO was shipped parcel post, use date offered, if entered; otherwise, use date shipped. MROs with extended RDD (identified by an A, S or X in pos. 62) are counted only if they are offered on time.
0148*	MRO Line Items Shipped, Excludes MROs with Extended RDD	Count of each MRO (A5_) except MROs with extended RDD (identified by an A, S, or X in pos. 62) and A5J closed in the MRO History File for which any portion of the ordered quantity was shipped.
0149*	MRO Line Items Offered on Time, Excludes MROs with Extended RDD	Count of all MRO (A5_) except MROs with extended RDD (identified by an A, S, or X in pos. 62) and A5J line items that have offered to transportation on or before the MDT. If the MRO was shipped parcel post, use date offered, if entered; otherwise, use date shipped.
0150*	Percent MRO Line Items Offered on Time	Element 0149 divided by Element 0148.
0160	Line Items Shipped by Parcel Post	Count of all MRO (A5_) except A5J line items shipped by Mode of Shipment Codes G, H, 6 and 7.
0170	MRO Line Items on Hand ERP	Count of all MRO (A5_) except A5J in History File not completely closed.
0180*	MRO Line Items Offered Late 1-3 Days	Count of all MRO (A5_) except A5J line items wich were offered to transportation one to three days after the MDT.
0190*	MRO Line Items Offered Late 4-10 Days	Count of all MRO (A5_) except A5J line items which were offered to transportation 4 to 10 days after the MDT.

ELEMENT NO.	TITLE	DEFINITION
0200*	MRO Line Items Offered Late Over 10 Days	Count of all MRO (A5_) except A5J line items which were offered to transportation over 10 days past the MDT.
0210	Materiel Denials - Total and Partial Quantities	Count of one for each MRO refusal action reaching the History File with Management Code 1 through 6.
0215	Materiel Denials - Total Quantity Only	Count of one for each MRO refusal action reaching the History File with Management Code 1 through 6 on which the total quantity requested was denied.
0220*	Materiel Denials, Percent	Element 0210 divided by the total of Element 0130 plus Element 0215. (HQ DLA Computation)
0230	DRO Line Items Received	Count of all DRO (A5J or other authorized disposal directive) received during period.
0240	DRO Line Items Shipped	Count of all DRO (A5J or other authorized disposal directive) is closed in the MRO History File, with any portion of the ordered quantity having been shipped.
0250	DRO Line Items on Hand ERP	Count of all DRO (A5J or other authorized disposal directive) open in History File at end of period.
0252	DRO Denials, Total and Partial Quantities	Count of one for each DRO refusal action reaching the History File with Management Codes 1 through 6.
0254	DRO Denials, Total Quantity Only	Count of one for each DRO refusal action reaching the History File with Management Codes 1 through 6 on which the total quantity requested was denied.
0258*	DRO Denials, Percent	Element 0252 divided by the total of Element 0240 plus Element 0254. (HQ DLA Computation)

ELEMENT NO.	TITLE	DEFINITION
0260	Short Tons Received	Aggregate tons (2000 lb) count of all receipt confirmation transactions (ZX_, ZY_, ZV_, ZW) processed to completed receipts file during period (to one decimal).
0270	Short Tons Shipped	Aggregate tons (2000 lbs) count of all MRO and DRO actions close out in the History File as result of processing ZBM/ZBP cards.
0280	Short Tons Shipped by Parcel Post	Aggregate tons (2000 lbs) of all MRO (A5_) except A5J line items closed out in History File as result of processing ZBM/ZBP cards with Mode Codes G, H, 6, or 7.
0290	Short Tons Shipped by Freight	Aggregate tons (2000 lbs) of all MRO (A5_) and DRO (A5J) line items closed out in History File as result of processing ZBM/ZBP cards with all Mode Codes <u>except</u> G, H, 6, or 7.
0300	Short Tons On Hand ERP	Element 0260 added to Element 0300 (previous reporting period) minus Element 0270 (to one decimal).
0320	Line Items Inspected - New Procurement	Count all D4_ completed receipt transactions with Action Codes LA, LK, SA and SK, and with all Receipt Surveillance Discrepancy Codes except "X".
0321	Bin Line Items New Procurement Inspected	Count all D4_ completed receipt transactions with Action Codes LA or SA and all Receipt Surveillance Discrepancy Codes except "X".
0322	Bulk Line Items New Procurement Inspected	Count all D4_ completed receipt transactions with Action Codes LK or SK and all Receipt Surveillance Discrepancy Codes except "X".

ELEMENT NO.	TITLE	DEFINITION
0370	Short Tons Rewarehoused	Aggregate tons (2000 lbs) from all ZUN Rewarehousing Documents processed during period except those with Action Code FU (Label) Request) and FT (Bin Replenishment).
0440	Line Items Inventoried	Count of line items (NSNs) inventoried and flagged as completed.
0500	Bin Line Items Issued	Count of each MRO (A5_) except A5J, with type of Location A or B confirmed in the MRO History File with a date offered to Transportation (DTT).
0510	Bin Replenishment Actions Accomplished	Count of each ZUN transaction with Action Code FT processed.
0520	Bin Receipt Line Items Stowed	Count of each ZZS record with Action Codes LA or SA except Condition Code "H" items that are Management Code "J" or "M" and all Management Code "L" items processed to the locator file.

c. Not all data field breakouts are applicable or required for F-9 display or RCS reporting.

(1) The following basic elements require all data fields - 01 through 18 with each DLA commodity and total broken out by data fields 19-21 (IPG). These data elements will be displayed on F-9 report and RCS reporting to HQ DLA.

0110
0130
0131
0132
0170

(2) The following basic elements require data fields 01 through 18, with breakout by IPG (data fields 19-21) not applicable. These data elements will be displayed on F-9 report and RCS reporting to HQ DLA.

0010
0011
0012
0020
0031
0032

0040
0060
0080
0120
0160
0210
0215
0230
0240
0250
0252
0254
0260
0270
0280
0290
0300
0320
0321
0322
0370
0440
0500
0510
0520

(3) The following basic elements require data fields 01 through 18 with each DLA commodity and total broken out by IPG (Data fields 19-21). These data elements will be displayed on F-9 report, but will not be reported to HQ DLA.

0140
0180
0190
0200

(4) The following basic elements are computed at HQ DLA from other data required to be submitted, data appearing on F-9 report is for local management information:

0030
0050
0070
0090
0150
0220

0258

(5) The following basic elements are computed by the system and are established as having a whole percent and two decimal positions:

0050
0070
0090
0150
0220

0258

(6) The following RCS DLA(M)232(O)MIN data elements are adjustable by a (DIC) ZUM input in accordance with appendix B-135 format:

0010
0011
0012
0020
0030
0031
0032
0110
0120
0130
0131
0132
0140
0160
0180
0190
0200
0230
0240
0260
0270
0280
0290
0300
0320
0321
0322
0370
0440
0500

d. The following data elements are not required for F-9 display but are applicable for RCS DLA(M)232(O)MIN reporting to HQ DLA via appendix B-95, format 2.

(1) Line items received for stock processed within a specified time (procurement and redistribution - all commodities).

2001	1 calendar day
2002	2 calendar days
2003	3 calendar days
2004	4 calendar days
2005	5 calendar days
2006	6 calendar days
2007	7 calendar days
2008	8 calendar days
2009	9 calendar days
2010	10 calendar days
2011	11 or more calendar days

(2) Line items received for stock, processed within a specified time (returns/other - all commodities).

3001	1 calendar day
3002	2 calendar days
3003	3 calendar days
3004	4 calendar days
3005	5 calendar days
3006	6 calendar days
3007	7 calendar days
3008	8 calendar days
3009	9 calendar days
3010	10 calendar days
3011	11 or more calendar days

4. PART 2 - Feeder Elements for the RCS DLA(M)26(C)MIN Report:

a. Code numbers assigned for these elements in the F-9 report are the same as the numbers used in the RCS DLA(M)26(C)MIN Report Glossary. There are no data fields since only a single total figure is required under each element.

b. PART 2 elements are numbered and defined as follows:

ELEMENT NO	TITLE	DEFINITION
148A	Stock Locations Surveyed (Includes IPE)	Count of each ZBH record created or added for location surveys completed during the period.
203F	Traffic Services Freight B/L Processed, Outbound	Number of outbound B/Ls processed during the period. Count is taken each time a unique bill number is established on the MOWASP GBL Register.

ELEMENT NO	TITLE	DEFINITION
203G*	Freight Shipment Units Processed	Number of MOFAST freight shipment units (all modes except G, H, 6, 7 or 9) confirmed during the report period. Count should be augmented freight shipment units not initially documented for processing under the MOFAST system (i.e., DROs, DICOMSS).
203I	Traffic Services TCMDs Processed	Number of prime transportation control and movement documents created by the MOWASP/MOFAST System. Count includes advanced TCMDs. Count should be augmented with a manual count of TCMDs punched external to the MOWASP/ MOFAST System.
236X4	Line Items Shipped by Freight	Number of DLA and non-DLA MRO Line Items, (A5_), except A5J, closed in the History File, with mode of Shipment Codes other than G, H, J, 5, 6 and 7.
236X7	MRO Line Items Shipped by Small Package Carrier	Number of DLA and non-DLA MROs (A5_), except A5J closed in the History File with mode of Shipment Codes 5 and J.
257*	Short Tons Selected for Bulk Issue	Aggregate tons (2000 lbs) accumulated on ZBM/ZBP closeout actions on which the prime location designated was other than a bin location. Add count of bin replenishment tonnage by ZUM card adjustment.
258A*	Line Items Selected for Bin Issue	Count of line items on ZBM/ZBP closeout actions on which the prime location designated was a bin location. "No location" documents should be included in this category.
440	MRO Line Items on Hand in Computer	Number of MRO (A5_) except A5J line items in the computer bank not yet released to storage.

ELEMENT NO	TITLE	DEFINITION
441	MRO Line Items on Hand in Storage Processing	Number of MRO (A5_) except A5J line items released for processing, but on which offer to transportation or shipment has not yet occurred.
442	MRO Line Items on Hand - Offered but Not Shipped	Number of MRO (A5_) except A5J line items which have been offered to transportation but which have not yet been released to a carrier.
442B	MRO Line Items Forced Closed	Number of MRO (A5_) except A5J lines closed by the Depot, action codes GX and GC only, after research determined that no record exists of the shipping document (DD Form 1348-1) or any other record to verify action was taken to ship, deny, or cancel the MRO.

c. The following RCS DLA(M)26(O)MIN data elements are adjustable by a (DIC) ZUM input in accordance with appendix B-135 format:

203G
203I
236X4
236X7
257
258A

5. In addition to the F-9 report, additional MIS elements for local management review and other purposes are provided in the F-14 and F-15 reports which list MOWASP transactions received and forwarded by depots. Elements in these reports are constructed and titled as follows:

a. Each element in this category is constructed as follows:

First Position _____ Element Identification Code

Second through Sixth Position _____ Serial Number

b. Each element in this category is a count of each of the documents identified below by document identifier code. The information will print on appendix F-14 (Y series element numbers) and appendix F-15 (Z series element numbers).

c. The Management Information System Card, appendix B-135, cannot be used to adjust these quantities. Manual criteria will be utilized for local management review.

APPENDIX A-84

COUNT CARD BATCH CODES

1. Number of Characters: One.

2. Type of code: Numeric.

3. These codes are assigned to identify type of locations to be counted and the priority in which inventory counts will be made. Use of table/matrix and batching codes is a depot option.

4. The following codes are assigned:

CODE	DEFINITION
1	No location count cards, these are internally entered into the Inventory Count adjustment programs by the computer.
2	Count cards for conditions other A, B, C, or F.
3	All count cards for NSNs with locations outside the Mechanized Area (Stock Location Group Code X) which have MROs suspended because of Inventory. Also included are those count cards for NSNs with locations outside the Mechanized Area which have matching NSN count cards within the Mechanized Area.
4	All count cards in the Mechanized Area identified in Matrix Table X including those with MRO suspended in the Workload Bank.
5	All other count cards.
6	All second or third counts.

5. Batches 1 and 4 are sorted in location sequence and Batches 3 and 5 are in location sequence in accordance with matrix tables, as displayed on appendix B-66, part J. Batches 2 and 6 are sorted in NSN sequence.

APPENDIX A-85

INVENTORY DOCUMENT CONTROL - STATUS CODES

1. Number of characters: One.

2. Type of code: Numeric.

3. Explanation: These codes are used in the DLA Mechanized Inventory Document Control File to identify status of open Receipt and Issue Documents.

4. The following codes are assigned:

RECEIPT TRANSACTIONS

CODE	DEFINITION
1*	Preflag receipt held by Receiving Division until completion of inventory.
2	Preinventory receipt placarded by Receiving Division.
4*	Placarded receipt stowed before physical count is accomplished identity of placarded receipts cannot be retained. Previously Code 2 or blank.
7	Preflag receipt stowed before physical count was accomplished.

*These codes are manually input only. The others are mechanically entered as a result of receiving actions.

ISSUE TRANSACTIONS

1	Quantity on preflag or preinventory documents will not be selected for shipment before completion of the inventory.
2	Current status of an identified open MRO cannot be determined.
3	Stock selection has been completed prior to first count.
4	Stock selection has been completed after first count.
5	Stock selection has been completed after second count.
6	Stock selection has been completed after third count.
7	MRO has been lost, and no determination can be made to indicate whether quantity was picked before or after inventory count.

APPENDIX A-86

TELEPROCESSING OPTION CODES

The following option codes have been assigned for releasing or generating 2nd/3rd counts through Teleprocessing System:

OPTION CODE	DEFINITION
1	Release Count 1, no history required.
A	Release Count 1, print F-98 report.
2	Release Count 2, no history required.
B	Release Count 2, print F-98 report.
3	Release Count 3, no history required.
C	Release Count 3, print F-98 report.
4	Generate 2nd or 3rd count in batch processing. Generate F-7.
5	Generate 2nd or 3rd count in batch processing. No F-7 required.
6	Generate 2nd or 3rd count on remote printer. No F-7 required.

APPENDIX A-87

TYPE RECORD CODES

The following Type Record Codes have been assigned for DLA mechanized inventory procedures.

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: These codes identify the status of preflag and preinventory MRO receipts and adjustments on the Inventory Document Control File.

4. Codes are assigned as follows:

a. MRO Transactions

CODE	DEFINITION
A	Preinventory/Flagged MRO open.
B	MRO suspended in MOWASP bank.
C	Preinventory/Flagged MRO status completed.
E	MRO completed after cutoff date.

b. Receipt Transactions

CODE	DEFINITION
A	Receipt Placarded.
B	Receipt not Placarded.
D	MRC/ZZS completed.

APPENDIX A-88

IDC ADJUSTMENT CODES

The following IDC Adjustment Codes have been assigned for DLA mechanized inventory procedures.

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: These codes identify required adjustment actions to inventory count cards processed to IDC File. These are recorded in IDC File and Inventory History.

CODE	DEFINITION
C	Credit
D	Debit
N	No Action
Y	Deleted Action
E	Receipt action only, MRC confirmed (adjust count or no adjustment action required).

APPENDIX A-89

INVENTORY TYPE STORAGE CODES

1. The following Inventory Workload Bank Type Storage Codes are mechanically assigned by the computer based on the MOWASP Type Storage Code. These codes are utilized by the computer to assign man-hour standards to work in the Inventory Workload Bank.

a. Number of characters: One.

b. Type of code: Alpha.

2. Codes are established as follows:

a. First position of MOWASP Type of Storage Code is A-B-C-D, and third position is A-B-C; then Inventory Type Storage Code A is assigned.

b. First position of MOWASP Type of Storage Code is A-B-C-D, and third position is other than A-B-C; then Inventory Type Storage Code B is assigned.

c. First position of MOWASP Type of Storage Code is E, and third position is A-B-C; then Inventory Type Storage Code C is assigned.

d. First position of MOWASP Type of Storage Code is H or I, and third position is A-B-C; then Inventory Type Storage Code D is assigned.

e. All other locations will be assigned Code X.

APPENDIX A-90

SEAVAN SECTION TRANSACTION CODES

1. Number of Characters: Two.

2. Type of code: Alpha.

3. Explanation: These codes are assigned to CRT data input options. They specify a particular function to be exercised by operational personnel.

4. The following codes are assigned:

CODE	DEFINITION
AD	To obtain CRT display for SU offer and MRO adjustments.
DA	Change a SEAVAN MRO denial, cancellation or SU offer.
DB	Specifies an overshipment due to item packaging.
DC	Signifies the complete or partial cancellation of an MRO.
DD	Specifies an undershipment due to item packaging characteristics.
DE	Undershipment, denial. Materiel is not available in the type pack specified by the MRO (subsistence only).
DF	Accomplish entry of a date available (date offer) to transportation.
DG	Undershipment, denial. Materiel in location was misidentified.
DH	Confirm MROs shipped other than SEAVAN mode.
DJ	Undershipment, denial. Materiel is not available with the required shelf-life as specified by the MRO.
DK	Undershipment, denial. Materiel in storage is not in the condition as specified by the MRO.
DL	No shipment, denial. Medical controlled substance that requires an Export Permit and is not available to ship in the exact quantity requested in support of an FMS transaction.
DM	Undershipment, denial. Item is not available in one continuous length.

CODE	DEFINITION
DP	Remove a line item from In-Process file. Subsequent actions must be prepared manually.
DQ	Reject an MRO because the RDD cannot be met.
DR	Not assigned.
DS	Request for MRO(s) from SEAVAN Workload Bank when additional weight or cube is needed to complete the loading of a van.
DT	Undershipment, denial. Stock for the NSN and condition as specified is not available in storage.
DU	Force close a MRO that has been partially canceled.
DV	Request that final SEAVAN documentation be prepared, i.e., Consist (F-62). Prepares ZBM to MOWASP. Close an open MRO.
DW	Force close an MRO.
DX	Flag an MRO with a value less than $200 which has been released for processing but not shipped. This action prevents notification to the DSC that cancellation action will not occur.
DY	Remove a SU from the configured load. Designates it to be placed on another in-process load or temporarily suspended.
DZ	Display updates the SEAVAN Load Master File with header data required to complete the Consist (F-62).
EP	To obtain CRT display for Equipment Pool file maintenance.
IP	MTMC Release Data for in-process load.
MG	To obtain CRT display for MRO inquiry or update.
MH	To obtain CRT display for inquiring in-process file by load, shipment unit, or line item number.
MI	To obtain CRT display for inquiring Management Information.
MR	Add, change, delete or inquire the data contained in the MTMC Release File.
PR	To obtain CRT display for Load Adjustment transactions.
RL	To obtain CRT display to accomplish load review and TCMD/Consist print.

CODE	DEFINITION
SP	To obtain CRT display for MRO Special Processing.
TC	To obtain CRT display for file maintenance of SEAVAN Table and Control File.
VD	Add or change data contained in the SEAVAN Equipment Pool.
VE	Delete data from the SEAVAN Equipment Pool.
VF	Inquiry into the SEAVAN Equipment Pool.
VG	Not assigned.
VH	SEAVAN MRO update by document number.
VJ	SEAVAN MRO inquiry by document number.
VK	Add or change SEAVAN Table and Control File Data.
VL	Delete data elements from the SEAVAN Table and Control File.
VM	Not assigned.
VQ	Not assigned.
VS	Not assigned.
VT	Not assigned.
VU	Remove a line item from a configured SU/Load and single line.
VV	Partial a line item.
VW	Return a shipment unit to the SEAVAN Workload Bank.
WR	To obtain CRT display for processing Workload Release Requests by Destination or Document Number.

APPENDIX A-91

SEAVAN STATUS CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: These status codes are to identify the progress of in-process SEAVAN MROs, Shipment Units, and Loads within the SEAVAN system. These codes are computer assigned to applicable records as valid update actions occur within the in-process file.

4. The following codes are used:

CODE	DEFINITION
Blank	MRO is undocumented.
A	In-Process; no update action recorded.
P	SU has been offered to Transportation. Awaiting SEAVAN confirmation process.
R	Load Review complete, awaiting TCMD/Consist print. (Load Record only.)
S	MRO is suspended because of missing shipment planning data. Shipment planning will not occur until data is provided.
T	MRO is undocumented and missing freight address.
Y	Complete cancellation or denial.
Z	Confirmed for shipment or force closed.
*	MRO Weight/Cube exceeds maximum weight/cube parameters.

APPENDIX A-92

PERSONNEL CODES

1. Number of Characters: Five

2. Type of Code: Alphanumeric

3. Personnel codes are developed and controlled by the local depot. The codes may identify individuals, work groups, etc., at the local depot's discretion. In-the-clear identification of person or work group to personnel code relationships are maintained offline.

4. The codes are used by the customer complaint process, appendix E-006 P, when it is desired to maintain visibility of the person or work group whose discrepant actions caused a customer complaint to be filed against the depot.

APPENDIX A-93

TRANSPORTATION APPROPRIATION CODES

1. Number of characters: Two.

2. Type of code: Alpha/numeric.

3. Explanation: These codes identify the transportation appropriation provided by the ICP responsible for the materiel being shipped.

4. Codes are constructed as follows:

a. For DLA, the first digit will be the alpha Commodity Code shown in the third position of the RIC for the responsible Defense Supply Manager. The second digit will be one of the following numeric codes except for DIPEC:

CODE	DEFINITION
1	First Destination Shipment
2	Second Destination Shipment
3	Inter-Depot Transfer
4	DLA-Owned Stocks (DGSC and GSA items combined on same Bill of Lading)

b. For other than DLA, both positions will be numeric codes which are to be locally assigned as required. The first position will not be zero.

5. Fund Codes to be utilized for DSC

CODE	TYPE OF SHIPMENT	TRANSPORTATION FUND CITATION
C1	DCSC - 1st Destination	97X4961.5107 01 22.1 S33181
C2	DCSC - 2nd Destination	97X4961.5107 01 22.2 S33181
C3	DCSC - Inter-Depot Transfer	97X4961.5107 01 22.3 S33181
E1	DESC - 1st Destination	97X4961.5109 01 22.1 S33184
E2	DESC - 2nd Destination	97X4961.5109 01 22.2 S33184
E3	DESC - Inter-Depot Transfer	97X4961.5109 01 22.3 S33184
G1	DGSC - 1st Destination	97X4961.5104 01 22.1 S44073
G2	DGSC - 2nd Destination	97X4961.5104 01 22.2 S44073
G3	DGSC - Inter-Depot Transfer	97X4961.5104 01 22.3 S44073
G4	DGSC - DLA-Owned Mixed Stocks	97X4961.5104 01 22.2 S44073
I1	DISC - 1st Destination	97X4961.5105 01 22.1 S36054
I2	DISC - 2nd Destination	97X4961.5105 01 22.2 S36054
I3	DISC - Inter-Depot Transfer	97X4961.5105 01 22.3 S36054
M1	DPSC (Medical) - 1st Destination	97X4961.5102 01 22.1 S36030
M2	DPSC (Medical) - 2nd Destination	97X4961.5102 01 22.2 S36030
M3	DPSC (Medical) - Inter-Depot Transfer	97X4961.5102 01 22.3 S36030
S1	DPSC (Subsistence) - 1st Destination	97X4961.5103 01 22.1 S36030
S2	DPSC (Subsistence) - 2nd Destination	97X4361.5103 01 22.2 S36030

CODE	TYPE OF SHIPMENT	TRANSPORTATION FUND CITATION
S3	DPSC (Subsistence) - Inter-Depot Transfer	97X4961.5103 01 22.3 S36030
T1	DPSC (C&T) - 1st Destination	97X4961.5101 01 22.1 S36030
T2	DPSC (C&T) - 2nd Destination	97X4961.5101 01 22.2 S36030
T3	DPSC (C&T) - Inter-Depot Transfer	97X4961.5101 01 22.3 S36030

6. Transportation Fund Codes for IPE shipments directed by DIPEC from DLA depots will be reflected on the DD Form 1348-1 in pos. 25-26.

a. Codes for industrial activity/contractor shipments chargeable to DLA are as follows:

CODE	EFFECTIVE 1 October 1980	TRANSPORTATION FUND CITATION
RA		Army 9720100.5143.01 P385.21 22.9 S40110
RN		Navy 9720100.5143.01 P385.22 22.9 S40110
RF		AF 9720100.5143.01 P385.23 22.9 S40110
RM		MC 9720100.5143.01 P385.24 22.9 S40110
RD		DLA 9720100.5143.01 P385.25 22.9 S40110

b. When funds to be used on DIPEC directed shipments are other than those listed above, the criteria will be furnished as exception data. The code will be:

CODE	TRANSPORTATION FUND CITATION
RX	Citation will be furnished as exception data
RY	Ship Commercial Bill of Lading Collect
RZ	Customer pickup

7. Transportation fund appropriations for automated GBL processes (MOFAST) will be maintained in an appropriation table updatable by CRT input. The appropriations will be loaded with a corresponding 2-digit reference code and accessed by billing programs with the same code key. These reference codes are not updatable in this process, only the citation. The codes are as follows:

CODE	TYPE OF SHIPMENT	APPROPRIATION
C2	DLA (Construction) Normal Stock	(To be determined and updated by Transportation functions via CRT when appropriate)
C3	DLA (Construction) Inter-Agency Movement	
E2	DLA (Electronics) Normal Stock	
E3	DLA (Electronics) Inter-Agency Movement	
G2	DLA (General) Normal Stock	
G3	DLA (General) Inter-Agency Movement	
I2	DLA (Industrial) Normal Stock	
I3	DLA (Industrial) Inter-Agency Movement	

CODE	TYPE OF SHIPMENT	APPROPRIATION
M2	DLA (Medical) Normal Stock	
M3	DLA (Medical) Inter-Agency Movement	
RA	DIPEC to Army	
RD	DIPEC to DLA	
RF	DIPEC to Air Force	
RM	DIPEC to Marines	
RN	DIPEC to Navy	
S2	DLA (Subsistence) Normal Stock	
S3	DLA (Subsistence) Inter-Agency Movement	
T2	DLA (Textiles) Normal Stock	
T3	DLA (Textiles) Inter-Agency Movement	
02	Tobyhanna A.D., Controlled Funds	
03	Air Force	
04	Army Grant Aid	
05	Air Force, National Guard	
06	Air Force Grant Aid	
07	FMS Trust Fund	
08	Navy, Marine Grant Aid	
09	Marine	
10	Marine Reserve	
11	Army USFPO, Troop Support	
12	Army USFPO, General Materiel & Parts	
13	Army USFPO, Electronics	
14	Army USFPO, Aviation Systems	
15	Army USFPO, Missile	
16	GSA Commingled Shipment	
17	GSA Asset Relocation	

APPENDIX A-94

AIR CHALLENGE EXEMPT CODES

1. Number of characters: One.

2. Type of code: Numeric.

3. Explanation: These codes are assigned by the prime depot to identify selected items which have been exempted from air challenge by the Airlift Clearance Authorities (ACAs). Selected items are temperature controlled/short shelf-life items which would deteriorate in the time required for surface shipment overseas. The Air Challenge Exempt Code is used in place of the first position of the MILSTAMP Air Commodity Code (ACC) (DoD 4500.32-R, appendix B-3) in MOWASP internal processing of applicable items.

4. The following codes are assigned:

CODE	DEFINITION
1	Medical Materiel - Air Challenge Exempt (corresponds to ACC M).
2	Chemical Materiel - Air Challenge Exempt (corresponds to ACC C).
3	Photographic Materiel - Air Challenge Exempt (corresponds to ACC P).

best copy available

APPENDIX A-95

CUSTOMER COMPLAINT DISPOSITION CODES

1. Number of Characters: Two.

2. Type of Code: Alpha-numeric.

3. A code transeived from the ICP/DSC to the user depot via Document Identifier Codes CD3 and CD4. The code summarizes the Center's instructions for disposition of a discrepant item.

AB - Return to Depot.
AD - Disposal requested/authorized.
CC - Correction made by Government with reimbursement from contractor under a Recovery program.
CG - Correction made by Government without reimbursement.
CH - Change condition code and resubmit.
CL - Claim less than minimum allowance - administrative allowance.
DA - Damage attributed to DLA - Disposed previously.
DC - CD1 submitted in error. Delete entire record.
DD - Damage attributed to DLA - Dispose.
DF - Damage attributed to DLA - Repair order to follow.
DR - Damage attributed to DLA - Depot repair authorized.
FA - Materiel damaged in transit, carrier responsibility.
FB - Materiel damaged in transit, carrier responsibility, Depot repair.
IC - Invalid complaint.
ID - Insufficient data for investigation or report. Further data needed.
IM - Item(s) unsuitable, return to Depot.
IR - Item(s) redirected by Government with recovery from contractor.
IS - Item(s) redirected by Government without recovery from contractor.
IT - Item(s) replaced or repaired by contractor under a recovery program.
IU - Item(s) retained with consideration from contractor.
IV - Item(s) retained without consideration from contractor.
IW - Item(s) retained without cost.
IX - Item(s) returned to contractor for redirection.
IY - Item(s) unsuitable, destroy.
IZ - Item(s) unsuitable, dispose.
MC - Missing components furnished.
MD - Multiple disposition - Off-line instructions to follow.
NM - Not managed by Center, referred to proper Item Manager.
OA - Documentation furnished.
OB - Overage/shortage within contract variation clause.
OC - Contractor abandoned property, dispose.
OF - Contract shortage - Contractor to replace.
OG - Information only, no action necessary.
OH - Substitute acceptable.
OI - Contractor abandoned property, return to stock.
OM - Overage/shortage not due to packaging/duplicate shipment.
OS - Contract overage - Off-line instructions to follow.
OT - Other/does not apply.

RA - Return to storage activity.
RB - Return to Depot - Transship to contractor.
RC - Return to contractor.
RD - Return to contractor without replacement.
RE - Rights have expired and recovery not made, inventory loss.
RF - Retain for future supply decision.
RG - Replacement (repair/refund) by contractor as "goodwill" gesture.
RH - Use as is.
RM - Remark and return to stock.
RO - Inspect and return to stock.
RP - Repackage and return to stock.
RQ - Request for information.
RR - Refund for item(s) obtained under a recovery program.
RS - Return to stock as is.
RW - Authorization to rework.
SD - Safety hazard, destroy.
SH - Safety hazard, dispose.
SM - Shipment status to customer.
SN - Not traceable.
SP - Shipment lost or insufficient, proof of shipment obtained from Contractor.
SQ - Decentralized issue.
SS - Contract shortage - Additional stock not expected.
TA - Tracer action via SF 361.
TC - Test confirms report.
TE - Classified, sensitive or technical material, release to carrier for repair or salvage prohibited.
TG - Technical evaluation of damaged items provided, directing disposal or delivery to carrier for salvage.
TL - Time limit expired.
TN - Test does not confirm report.
WI - Consumer to submit FTE.

APPENDIX A-96

INVESTIGATION RESULTS CODES

1. Number of Characters: One.

2. Type of Code: Alpha.

3. This code is input via program $$UWTM01 (appendix E-092) to convey local depot customer complaint investigation results data to the center via the CD2 card format. See appendix A-128 for the definition of the Depot Action Codes referenced below.

4. The following codes are assigned:

A - Shipment information reflected in pos. 17-72. For use with Depot Action Code B.
B - Shipment information/confirmation cannot be verified. For use with Depot Action Code B.
C - Tracer action successful. For use with Depot Action Code C.
D - Tracer action unsuccessful. For use with Depot Action Code C.
E - Shipping documentation furnished. For use with Depot Action Code D.
F - Shipping documentation not available. For use with Depot Action Code D.
G - Component item(s) shipped. For use with Depot Action Code E.
H - Component item(s) not available. For use with Depot Action Code E.
J - Item undergoing test. Results to be provided off-line. For use with Depot Action Code E.
K - Assets on-hand for specified contract. Depot complaint and DAC will be provided. For use with Depot Action Code F.
L - No assets for specified contract. For use with Depot Action Code F.
Z - Off-line data to follow. For use with Depot Action Codes B through F.
X - Required off-line data not received at the depot to complete action. For use with Depot Action Code E.

APPENDIX A-97

GEOGRAPHICAL AREA AND SUBAREA CODES

1. Number of characters

a. Geographical - one (alpha).

b. Subarea - three (alphanumeric).

2. Type of code: Alpha/numeric.

3. Geographical Area Codes are locally assigned for use as an aid in scheduling shipments to a given area. Codes are maintained in the DoDAAD File by entry of appendix B-126. When the codes are entered into the record, the Activity Address is placed in the active DoDAAD File which is used for cyclic processing of MROs.

a. A geographical shipping area represents a station or group of stations in the same general area to which consolidated rail or truck shipments can be made to obtain the most economical freight rates.

b. Geographical shipping area will be determined based on the following:

(1) Geographical segregations that are common to the depot distribution system.

(2) Identification of consignee stations associated with a geographical area.

4. Subarea Codes are locally assigned to subdivide the Geographical Area Codes. These codes are maintained IAW appendix B-126.

APPENDIX A-98

NOTICE OF AVAILABILITY (NOA) STATUS CODES

1. Number of characters: One.

2. Type of Code: Alpha/numeric.

3. Explanation: A NOA Status Code is initially assigned during the offer process to each shipment unit record on which a mechanized NOA is generated. The Status Code reflects the progression of the SU/LI throughout the NOA processing cycle.

4. The following codes are assigned:

CODE	EXPLANATION
0	Original (AD1-AD2 or DD Form 1348-5)
1	First followup (AD3-AD4 or DD Form 1348-5)
2	Second followup (to Requisition Control Office)
C	Cancel
E	Export Release (ADR)
F	Export Release First Followup
G	Export Release Second Followup
S	Shipment Release

5. Reference:

Appendix D-132, NOA Process.

APPENDIX A-97

GEOGRAPHICAL AREA AND SUBAREA CODES

1. Number of characters

a. Geographical - one (alpha/numeric).

b. Subarea - three (alphanumeric).

2. Type of code: Alpha/numeric.

3. Geographical Area Codes are locally assigned for use as an aid in scheduling shipments to a given area. Codes are maintained in the DoDAAD File by entry of appendix B-126. When the codes are entered into the record, the Activity Address is placed in the active DoDAAD File which is used for cyclic processing of MROs.

a. A geographical shipping area represents a station or group of stations in the same general area to which consolidated rail or truck shipments can be made to obtain the most economical freight rates.

b. Geographical shipping area will be determined based on the following:

(1) Geographical segregations that are common to the depot distribution system.

(2) Identification of consignee stations associated with a geographical area.

4. Subarea Codes are locally assigned to subdivide the Geographical Area Codes. These codes are maintained IAW appendix B-126.

APPENDIX A-99

DESTINATION CROSS-REFERENCE (DCR) CODES AND STANDARD POINT LOCATION CODES (SPLC)

1. Number of Characters

a. DCR - 6 alpha/numeric.

b. DPLC - 6 numeric.

2. Source of Codes

a. DCR - Developed by DGSC.

b. SPLC - National Motor Freight Traffic Association, Inc., (NMFTA) Continental Directory.

3. Purpose

a. Destination Cross-Reference: The DCR code identifies a homogenous group of consignees which are located at a single destination and is used for the following purposes:

(1) The DCR on transportation records readily identifies government shipping destinations for use in transportation planning and analysis.

(2) The DCR in the MOWASP record identifies consignees with common GBL destination addresses and shipment planning data for consolidation of shipment units into freight transportation units.

b. Standard Point Location Code: The SPLC identifies destinations as defined by the commercial carrier industry and is used for the following purposes:

(1) The SPLC as annotated on the GBL supports GSA audits in accordance with the DLAR 4500.3.

(2) The SPLC recorded in the Address File is used to match the SPLC in the MOFAST Rate Base File and supports the automated rating of shipments (MOFAST only).

4. Explanation

a. Destination Cross-Reference is maintained in the Address File for each Activity Address Code. It is used to indicate the Activity Address record which has been designated "master" for a homogenous group of consignees located at a single destination. The master destination AAC record is the record which contains the Government Bill of Lading address and the shipment planning record for the group of consignees. Configuration of the DCR value is the responsibility of DGSC.

b. The SPLC assigned by the NMFTA is a 6-position numeric code provided by by the DAAS via TA1/TA3 transactions (reference appendix B-129) configured as follows:

Position 1 and 2	Specific state, area within a state, Mexico, Canada.
Position 3 and 4	County, area within a county.
Position 5 and 6	City, town, or location within county such as a military or industrial installation.

APPENDIX A-100

MOFAST PROCESSING CODES

1. Number of characters: Two.

2. Type of code: Alpha.

3. Explanation: Processing codes are assigned to shipment unit records to identify the type of processing actions required. These codes are initially assigned to each shipment unit when the MOFAST In-Process File is loaded. The system provides the capability to change the processing code while a shipment unit is being processed. This action becomes necessary when a mode change occurs (e.g., freight to parcel post and so on) or an unplanned special processing action becomes necessary.

4. The following codes are assigned:

CODE	EXPLANATION
AA	Air Offer, CONUS.
AB	Air Offer, CONUS, Special Requirements.
AC	Air Offer, EXPORT.
AD	Air Offer, EXPORT, Special Requirements.
AL	LOGAIR/QUICKTRANS Process.
BA	FMS (Foreign Military Sales).
BB	FMS, Air Offer.
BC	FMS, Air Offer, Special Requirements.
BD	FMS, Release Shipment.
BE	FMS, Release Shipment, Special Requirements, Intransit.
BF	FMS, Release Shipment, Intransit.
CA	Release Shipment.
CB	Release Shipment, Intransit.
CC	Release Shipment, Intransit, Special Requirements.
CP	Consolidated Packing.
EA	SEAVAN/MILVAN Shipment.
FA	Special Processing.
FB	Commercial Bill of Lading Process/Government Truck Process.
PP	Parcel Post.
SA	Shipment Units - Not requiring any special processing.
XA	Exception Processing - Identifies the need for an exception address.
XX	Exception Processing Requested - Used to prevent the assignment of the shipment unit to a GBL.

APPENDIX A-101

MOWASP/MOFAST CRT PROGRAM CALL NUMBERS AND PROCEDURE CROSS-REFERENCE

1. Number of characters: Eight.

2. Type of code: Alphanumeric.

3. Purpose: To provide a list of all MOWASP/MOFAST CRT program call numbers, their related procedural appendix, and the procedure title or purpose.

4. The following call numbers are assigned:

CALL NO	APPENDIX	PURPOSE
$$UWFB01	E-216 P	Area Control Branch Processing
$$UWFB70	E-111 P	On-Line Update of Bin/Bulk and Location Data
$$UWFC01	E-217 P	Parcel Post Processing
$$UWFE01	E-219 P Part A	Initial Sorter Input
$$UWFE10	E-219 P Part B	Exception Input - Sorter
$$UWFE30	E-219 P Part C	Sorter Inquire/Release System
$$UWFE45	E-219 P Part D	Sorter Rack Statue - Priority Inquiry
$$UWFE60	E-219 P Part E	Sorter Length - Status Inquiry
$$UWFF01	E-221 P Part A	Non-Sorter Initial Input
$$UWFF05	E-107 P	Combining SUs in a Single Container
$$UWFF25	E-221 P Part B	Non-Sorter Exception Input
$$UWFF55	E-222 P	Consolidated Pack Processing
$$UWFF75	E-224 P Part G	Consolidated Pack Inquiry/Maintenance
$$UWFF80	E-080 P	MOFAST Partial or Offer Process for DEPMEDS
$$UWFG10	E-224 P Part D	GBL In-process Inquiry

APPENDIX A-102

MOFAST STATUS CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: A MOFAST status code is initially assigned to each shipment unit record and is modified as a shipment unit progresses through the system. The status code reflects progression so that the status can be interrogated at any point in time while a shipment unit proceeds through the system.

4. The following codes are assigned:

CODE	EXPLANATION
A	In-Process - No Update Action.
B	Area Control Branch - Exception Entry.
C	On Sorter - Incomplete.
D	On Sorter - Awaiting Exception/Line Item Input.
E	On Sorter - Reject Condition Exists.
F	On Sorter - Complete.
G	Other Input - Awaiting Exception/Line Item Input.
H	Other Input - Awaiting Final Container.
I	SU Subs Other Than Consolidated Pack.
J	Awaiting Consolidation Packing.
K	Special Processing Required.
L	Awaiting Consolidation Packing Exception Input.
M	Awaiting GBL Preparation.
N	Awaiting Commercial Billing Process.
O	Not Used.
P	Awaiting SEAVAN Process.
Q	Awaiting Government Truck Manifest
R-X	Available for Use.
Y	Complete Cancellation or Denial.
Z	Process Complete.

5. References

Status codes are referenced in the majority of MOFAST System appendices.

APPENDIX A-103

MOFAST FINAL CONTAINER CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: This code identifies the last container in a shipment unit and whether or not entry of exception data is required.

4. The following codes are assigned:

CODE	EXPLANATION
Blank	Data entry for other than the final container of a SU or SU Line Item (LI).
E	Final container of a SU which requires entry of exception data to identify missing LIs, quantity changes, and/or assign LIs to containers.
C	Final container of a single line SU or a multiline SU in a single container. C indicates no exception (all lines and full quantities shipped).

5. References

a. Appendix B-197.

b. Appendix B-202.

c. Appendix D-140.

d. Appendix D-146.

e. Appendix E-219 P.

f. Appendix E-220 P.

g. Appendix E-221 P.

APPENDIX A-104

MOFAST QUANTITY ACTION CODES

1. Number of characters: Two.

2. Type of code: Alpha.

3. Explanation: Quantity Action Codes are used in CRT input formats to report differences between the quantity ordered and the quantity shipped on the MRO (DD Form 1348-1). The codes entered are also the action codes used in preparation of DIC ZBM formats for MOWASP updates. The low order position of the code is posted to the MOFAST in-process file MRO record.

4. The following codes are assigned:

CODE	EXPLANATION
DB	Overshipment - Due to Packaging Characteristics.
DC	Cancellation - Which reconstitutes the shipment unit.
DD	Undershipment - Due to unit packaging characteristics.
DE	Undershipment - Denied not available in the type pack specified on the release order (subsistence only).
DG	Undershipment - Denied - Due to reidentification or reclassification of assets in process.
DJ	Undershipment - Denied - Due to shelf-life limitations.
DK	Undershipment - Denied - Due to materiel condition change.
DL	Denial - Medical controlled substance that requires "Export Permit", not available to ship exact quantitiy requested in support of FMS transaction.
DM	Denial - Item not available in one continuous length.
DP	Remove a line item from a SU and place in history.
DQ	Reject a SU because RDD cannot be met.
DT	Undershipment - Denied - Due to warehouse refusal.
P	Identifies a partial shipment of an ordered quantity.

APPENDIX A-105

MOFAST GBL/PARCEL POST IDENTIFICATION CODES

1. Number of characters: One.

2. Type of code: Alpha.

3. Explanation: This code is used to identify the type of number entered in the GBL/Parcel Post Registration Number field of the ZEN card. This code is also used in CRT entries to identify type of parcel post shipments.

CODE	EXPLANATION
B	GBL Number/Commercial Bill Number
C	Certified Mail
R	Registered Parcel Post
I	Insured Parcel Post

5. References

a. Appendix B-206.

b. Appendix D-165.

c. Appendix E-217 P.

APPENDIX A-106

MOFAST CARRIER CODES

1. Number of characters: Four.

2. Type of code: Alpha/numeric.

3. Explanation: Carrier Codes provide the necessary key to obtain in-the-clear carrier identification for use in the Mechanized GBL Assembly process.

4. Carrier Codes will be assigned by each user depot to represent local service. Codes will be based upon the master carrier list furnished by MTMC.

5. References:

   a. Appendix B-183.

   b. Appendix E-230 P.

APPENDIX A-108

MOFAST GEOGRAPHIC AREA CODES

1. Number of characters:

a. Major geographic area - One (alpha).

b. Geographic subarea:

(1) First and second positions alpha/numeric.

(2) Third position constant X.

2. Type of code: Alpha/numeric.

3. Explanation:

a. Geographic Area Codes are locally assigned for use as an aid in scheduling and assembling shipments and also supporting Government Bill of Lading processes. Codes are maintained in the DoDAAD file by entry of appendix B-126 format.

b. Geographic Area Codes are incorporated into the MOFAST Shipment Unit In-Process file during shipping documentation processes. Codes in the shipment unit record are matched to freight terminal routing and carrier assignment tables. Also, Geographic Area Codes provide the capability for stopping the accumulation of shipping units to GBLs for a specific distribution area.

4. The following codes are assigned:

a. Each depot can assign one-digit or multiple-digit Geographic Area Codes as they require. It is important to note that Geographic Area Codes loaded in the DoDAAD master must be compatible with Geographic Area Codes used in MOFAST terminal routing tables.

b. One exception to the above is Code EHBX which is used exclusively to identify consignees which are not to be assigned to Government Bills of Lading.

5. References:

a. Appendix B-184.

b. Appendix B-186.

APPENDIX A-109

MOFAST ESTIMATED TIME OF ARRIVAL CODES

1. Number of characters: One.

2. Type of code: Alpha/numeric.

3. Explanation: Used to identify the number of days intransit from the consignor to the final CONUS destination. The code is loaded into the Transit Time Table (appendix B-66, table 11) to be perpetuated in MOFAST Shipping Unit records.

4. The following codes are assigned:

ESTIMATED NO. DAYS INTRANSIT	CODE
Same day delivery	0
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	A
11	B
12	C
13	D
14	E
15	F
16	G
17	H
18	J
19	K
20	L
21	M
22	N
23	P
24	Q
25	R
26	S
27	T
28	U
29	V
30-35	W
36-40	X
41-50	Y
Over 50	Z

5. References:

a. Appendix D-150.

b. Appendix D-158.

c. Appendix E-228 P.

d. DoD 4500.32-R, MILSTAMP appendix B-10.

APPENDIX A-110

ADMINISTERING LOCATION CODES

1. Number of Characters: Three.

2. Type of Code: Alpha/numeric.

3. Explanation: This code identifies whether a contract is being administered by a DSC, DCASR or a Contract Administration Service other than DCASR. The code will also identify the DCASR or CAS office which has the administration responsibility.

4. Elements/Construction of Code:

a. CAS Administered Awards

The code assigned to the CAS component in DoD 4105.59 H, DoD Directory of Contract Administration Service Components will be used. If the assigned code is less than three positions, the entry will be right-justified and zero filled to the left. When the alphabetic suffix A is assigned in DoD 4105.59 H the first position of the Administering Location Code will be changed as follows:

Assigned First Position (DoD 4105.59 H)	Indicate Suffix A by Change First Position To:	Example CAS Code = Adm Loc Code
0	5	005A = 505
1	6	120A = 620
2	7	206A = 706
3	8	318A = 818
4	9	465A = 965

b. DSC Administered Awards

First position of the code entry will always be L.

APPENDIX A-111

VARIABLE PRICE REDUCTION CODES

1. Number of Characters: 1

2. Type Code: Numeric

3. The Variable Price Reduction (VPR) code is provided by DPSC in pos. 80 of non-perishable brand name item MROs. This code is used in conjunction with DPSCs unique unit price configuration (two "dollar" positions and four "cent" positions) in MRO positions 74 through 79. The code identifies unit price status, as follows:

CODE	EXPLANATION
0	No change to supply bulletin price.
1	VPR offered in time to appear on order.
2	Price from Mod. after order released.
3	VPR input at time the vendor requests booking.
4	VPR input after vendor requests booking.
5	VPR input at time of receipt by depot.

APPENDIX A-112

PURCHASE UNIT OF ISSUE

1. Number of Characters: Two.

2. Type of Code: Alpha.

3. Explanation: This code is comparable to the Unit of Issue of appendix A-48, and represents the unit of measure by which materiel is being purchased under a contract. This code may or may not equate to the Stock Unit of Issue under which the item is stored and issued.

APPENDIX A-113

QUANTITY VARIANCE CODE

1. Number of Characters: Three.

2. Type of Code: Alphanumeric.

3. Explanation: This code indicates the amount of variance in quantity which is acceptable over or under the quantity ordered during inspection of procurement receipts. The Code B00 will indicate that any quantity variance is unacceptable; the quantity accepted will equal the contract quantity. Quantity variance information provided in this code will be printed in-the-clear on Contract Data Sheet output.

4. Elements/Construction of Code

a. First Position

Code	Explanation
P	Plus
M	Minus
B	Both

b. Second and Third Positions

Code	Explanation	Code	Explanation
0A	1/8 of 1%	02	2%
0B	1/4 of 1%	2A	2 1/8%
0C	3/8 of 1%	2B	2 1/4%
0D	1/2 of 1%	2C	2 3/8%
0E	5/8 of 1%	2D	2 1/2%
0F	3/4 of 1%	2E	2 5/8%
0G	7/8 of 1%	2F	2 3/4%
01	1%	2G	2 7/8%
1A	1 1/8%	03	3%
1B	1 1/4%	3A	3 1/8%
1C	1 3/8%	3B	3 1/4%
1D	1 1/2%	3C	3 3/8%
1E	1 5/8%	3D	3 1/2%
1F	1 3/4%	3E	3 5/8%
1G	1 7/8%	3F	3 3/4%
3G	3 7/8%	07	7%
04	4%	7A	7 1/8%
4A	4 1/8%	7B	7 1/4%
4B	4 1/4%	7C	7 3/8%
4C	4 3/8%	7D	7 1/2%
4D	4 1/2%	7E	7 5/8%

Code	Explanation	Code	Explanation
4E	4 5/8%	7F	7 3/4%
4F	4 3/4%	7G	7 7/8%
4G	4 7/8%	08	8%
05	5%	8A	8 1/8%
5A	5 1/8%	8B	8 1/4%
5B	5 1/4%	8C	8 3/8%
5C	5 3/8%	8D	8 1/2%
5D	5 1/2%	8E	8 5/8%
5E	5 5/8%	8F	8 3/4%
5F	5 3/4%	8G	8 7/8%
5G	5 7/8%	09	9%
06	6%	9A	9 1/8%
6A	6 1/8%	9B	9 1/4%
6B	6 1/4%	9C	9 3/8%
6C	6 3/8%	9D	9 1/2%
6D	6 1/2%	9E	9 5/8%
6E	6 5/8%	9F	9 9 3/4%
6F	6 3/4%	9G	9 9 7/8%
6G	6 7/8%	10	10%

APPENDIX A-114

UNIT OF ISSUE CONVERSION FACTOR

1. Number of Characters: Three.

2. Type of Code: Numeric.

3. Explanation: This data element consists of four whole numbers and five decimal positions with decimal point assumed between the fifth and sixth positions. The entry is to be used to convert the Stock Unit of Issue to the Purchase Unit of Issue Quantity when these units of measure differ. The Stock Unit of Issue Quantity is divided by the conversion factor to obtain the Purchase Unit of Issue Quantity.

APPENDIX A-115

WOPACS DATA SELECTION CODES AND CRITERIA

1. Number of Characters: Selection - Two, Criteria - Three.

2. Type of Code: Selection - Numeric, Criteria - Alpha.

3. Purpose

a. Selection - To identify the type of data to be selected from the Unit of Schedule Master File which is indicated by the File Segment Code for the same line sequence number.

b. Criteria - A further identification of variable data.

4. The following codes are assigned:

a. File Segment Code DC01

DATA SELECTION CODES FIELD POSITIONS 33-34			DATA SELECTION CRITERIA FIELD POSITIONS 35-70
01	Type work unit.		Enter either A for line items or B for shipment units.
02	To be dropped cycle.	(7)	Enter estimated release date or PDT desired expressed as relationship to workday, i.e., +1+2, etc. See Note.
03	Dropped current cycle.	(7)	Enter PDT dates desired expressed as relationship to workday, i.e., +3+2+1+0-1-2-3. See Note.
04	Indicates MRO.	(12)	Enter DIC(s) desired, i.e., A51A55A5AA5E, etc.
05	Indicates DRO and IPE MRO.	(4)	Enter DIC(s) desired, i.e., A5JC51, etc.
06	Indicates IPG.	(3)	Enter IPG(s) desired, i.e., 12, etc.
07	Area (Location/Location Group Codes).	(11)	If Data Selection Code 02 is completed, enter one position alphabetic Stock Location Group Codes, i.e., ABCG, etc. If Data Section Code 03 is completed, enter three position alphanumeric Location Codes, i.e., A01A02, C11H24, etc. Enter *** to facilitate a forecast of No Location work units.

DATA SELECTION CODES FIELD POSITIONS 33-34		DATA SELECTION CRITERIA FIELD POSITIONS 35-70
08 Indicates shipment unit meeting weight and cube criteria.		Enter W when required. This data selection element, when used, relates to PDT dates entered for Data Selection Code 02.

b. File Segment Code DH01

DATA SELECTION CODES FIELD POSITIONS 33-34		DATA SELECTION CRITERIA FIELD POSITIONS 35-70
01 Type work unit.		Enter either A for line items or B for shipment units.
02 Shipment units/line items dropped previous cycle meeting weight and cube criteria.	(7)	Enter PDT dates desired expressed as as relationship to workday, i.e., +3+2, etc. See Note.
03 Line items dropped previous cycle.	(7)	Enter PDT dates desired expressed as relationship to workday, i.e., +3+2, etc. See Note.
04 Indicates MRO.	(12)	Enter DIC(s) desired, i.e., A51A55A5AA5E, etc.
05 Indicates DRO and IPE MRO.	(4)	Enter DIC(s) desired, i.e., A5JC51, etc.
06 Indicates IPG.	(3)	Enter IPG(s) desired, i.e., 12, etc.
07 Area (Location/Location Group Codes).	(11)	If Data Selection Code 02 is completed, enter one position alphabetic Stock Location Group Codes, i.e., ABCG, etc. If Data Selection Code 03 is completed, enter three position alphanumeric Location Codes, i.e., A01A02C11H24, etc.
03 Indicates shipment units/ line items meeting weight and cube criteria.		Enter W when required.

NOTE: When Data Selection Codes 02 and 03 are both required, use separate input cards with unique Line Sequence Numbers.

c. File Segment Code SH00

DATA SELECTION CODES FIELD POSITIONS 33-34			DATA SELECTION CRITERIA FIELD POSITIONS 35-70
01	Type work unit.		Enter A.
02	Work units received.		Enter Forecast, Scheduled, or Actual as desired.
03	Work units accomplished.		Enter Forecast, Scheduled, or Actual as desired.
04	Carryover.		Enter Forecast, Scheduled, or Actual as desired.
04	Carryover.		Enter Forecast, Scheduled, or Actual as desired.
05	Type computation.		Enter Total or Average as desired.
06	Indicates day of week.	(7)	Enter day(s) desired in relationship to workday, i.e., -3-2-1+0+1+2, etc., or enter 99 when all days of workweek are desired.
07	Indicates weekly time period.	(8)	Enter week(s) desired in relationship to workweek, i.e., +0-1-2-3-4, etc.

d. File Segment Code SN00

DATA SELECTION CODES FIELD POSITIONS 33-34			DATA SELECTION CRITERIA FIELD POSITIONS 35-70
01	Type work unit.		Enter A.
06	Indicates day.	(7)	Enter day desired expressed in relationship to the workday. Usually this will be the workday, i.e., +0.

NOTE: DIC YLH for File Segment Code SN00 is only required when it is intended to use a Norm for forecasting.

5. Data Selection Criteria will be entered, commencing with position 35 without using commas, spaces or any other field separators. A plus sign (+) will be punched (12-6-8) and a minus sign (-) will be punched (11 zone).

6. Changing Data Selection Criteria in the Unit of Schedule Master File will be accomplished by entering the complete criteria for the specific Data Selection Code being added or changed.

7. The numbers shown in brackets ( ) indicate the maximum units of Data Selection Criteria allowed for each Line Sequence Number.

8. Reference

Appendix B-236, WOPACS Unit of Schedule Master Input Document, Part 2.

APPENDIX A-116

WOPACS JOB ORDER IN TROUBLE (JOINT) CAUSE CODES

1. Number of Characters: One.

2. Type of Code: Alpha.

3. Purpose: To indicate the reason the particular Job Order appears on the JOINT listing.

4. The following codes are assigned:

CAUSE CODE	DEFINITION
A	Percent of Manhours Used to Date exceeds percent of Work Units Actual To Date by more than indicated Percent of Deviation.
B	Percent of Manhours Used To Date is less than percent of Work Units Actual To Date by more than indicated Percent of Deviation.
C	Projected Completion Date is earlier than Planned Ending Date by more than indicated Percent of Deviation.
D	Projected Completion Date is later than Planned Ending Date by more than indicated Percent of Deviation.
E	Effectiveness for Scheduling exceeds Actual Performance Effectiveness by more than indicated Percent of Deviation.
F	Effectiveness for Scheduling is less than Actual Performance Effectiveness by more than indicated Percent of Deviation.
G	Work Units Actual To Date exceeds Planned Total Work Units.
Z	A manual request for a Job Order to appear on the Job Orders In Trouble Report by input of Job Order In Trouble Request, Document Identifier YL4.

5. References:

a. Appendix B-248, WOPACS Job Order In Trouble Request.

b. Appendix F-295, WOPACS Job Orders In Trouble (JOINT).

APPENDIX A-117

WOPACS NORMS/FACTOR CODES

1. Number of Characters: One.

2. Type of Code: Numeric.

3. Purpose: To identify the particular portion of the Norms/Factor Master File to be established/updated.

4. The following codes are assigned:

CODE	FILE SEGMENT AFFECTED
1	Norms.
2	Master Factor.
3	File Factor (DC01, DH01, SH00 or SN00).
4	Acceptable Carryover.
5	Lower Forecast Limit.
6	Upper Forecast Limit.

5. References:

a. Appendix B-230, WOPACS Norms/Factor Master File Input Document Update by Day of Week or Julian Day.

b. Appendix B-231, WOPACS Norms/Factor Master File Input Document Update for Month of Year.

APPENDIX A-118

WOPACS ACTION CODES

1. Number of Characters: One.

2. Type of Code: Numeric.

3. Purpose: To identify the specific method of workload reporting or adjustment to be made.

4. The following codes are assigned:

CODE	EXPLANATION
1	Reporting carryover and accomplished workload.
2	Reporting workload received and accomplished.
3	Adjusting Unit of Schedule actual carryover.
4	Adjusting Unit of Schedule actually accomplished.
5	Adjusting Unit of Schedule actually received.
9	Adjusting Job Order Units or Hours.

5. References

a. Appendix B-233, WOPACS History Adjustment and Reporting Card.

b. Appendix F-315, Unit of Schedule History File Update (Actual).

APPENDIX A-119

WOPACS CATEGORY OF EFFORT CODES

1. Number of Characters: Two.

2. Type of Code: Numeric.

3. Purpose: To identify the priority in which work should be scheduled and accomplished.

4. The following codes are assigned:

CODE	EXPLANATION
00	Reserved for leave.
01-10	Reserved for prime mission workload.
11-98	Reserved for secondary workload.
99	Reserved for display only and not used for resourcing. (Refer to Planning Schedule, part 3.)

NOTE: Codes 01-99 are assigned at the decision of the depots.

5. References

a. Appendix B-234, WOPACS Unit of Schedule Master Input Document.

b. Appendix B-243, WOPACS Job Order Master Input Document.

c. Appendix B-249, WOPACS US/JO Level Decision Update Input Document.

d. Appendix F-287, Detail Accomplishment, Part 1.

e. Appendix F-293, Job Order Master File Register.

f. Appendix F-294, Unit of Schedule Master File Register.

g. Appendix F-295, Job Order in Trouble (JOINT).

h. Appendix F-300, Planning Schedule, Part 1.

i. Appendix F-301, Planning Schedule, Part 2.

j. Appendix F-302, Planning Schedule, Part 3.

k. Appendix F-303, Planning Schedule, Part 4.

l. Appendix F-305, Production Schedule, Part 1.

m. Appendix F-306, Production Schedule, Part 2.

n. Appendix F-311, Summary of Accomplishment at Borrow/Loan Level.

APPENDIX A-120

WOPACS SKILL CODES

1. Number of Characters: One.

2. Type of Code: Alpha.

3. Purpose: To identify the skill level necessary to accomplish Unit of Schedule and Job Order tasks.

4. The following codes are assigned:

CODE	DEFINITION
A	Laborer
B	Packer
C	Packer/Leader
D	Forklift Operator
E	Supply Clerk
F	Warehouseman
G	Warehouseman/FLD
H	Trailer Operator
I	Quality Inspection Specialist
J	Boxmaker/Woodworker
K	Inspector
L	Inventory Counter (Supply Clerk)
M	Rigger/Groundsman
N	Crane Operator
P	Materiel Classifier
Q	Clerk
R	Blocker and Bracer
S	Sewing
T	Equipment Repairman
W	Contractor

5. References

a. Appendix B-235, WOPACS Unit of Schedule Master Input Document Cycle and Skill Codes.

b. Appendix B-244, WOPACS Job Order Master Input Document Cycle and Skill Codes.

c. Appendix F-300, Planning Schedule, Part 1.

d. Appendix F-305, Production Schedule, Part 1.

APPENDIX A-125

AUTOMATIC DATA PROCESSING EQUIPMENT (ADPE) IDENTIFICATION CODES

1. Number of Characters: One.

2. Type of Code: Numeric.

3. Field Position: 63

4. Explanation: Identifies DoD ADPE/ADP components in the supply system. Will aid Defense Property Disposal Offices (DPDOs) to identify these items at the time they are transferred to disposal.

5. The following codes are assigned:

CODE	EXPLANATION
0	Represents items with no ADP Components. NOTE: Codes 1 through 6 are only to be used when the item is ADPE in its entirety and is limited to the type meeting only one of the definitions for Codes 1 through 6. See Code 9.
1	Analog CPUs, ADP Central Processing Units for Computers Analog. Represents only CPUs that accept as input the electrical equivalent of physical conditions such as flow, temperature, pressure, angular position or voltage and perform computations by manipulating these electrical equivalents to produce results for further use. NOTE: An analog is a representation of one form of a physical condition existing in another form (e.g., the level of mercury in a tube represents temperature in a thermometer; the angular position of a needle represents speed on a speedometer). Excludes CPUs that have both analog and digital capability. See Code 3.
2	Digital CPUs, ADP Central Processing Units for Computers. Represents only CPUs that accept information represented by digital impulses. Specifically, a device capable of performing sequences of arithmetic and logic operations (a program) not only on data but also on the program which is contained in its internal memory (storage) without intervention of an operator. NOTE: Digital refers to the representation of discrete numbers, symbols and alphabetic characters by a predetermined, coded combination of electrical impulses. Excludes CPUs that have both analog and digital capability. See Code 3.
3	Hybrid CPUs, ADP Central Processing Units for Computers. Represents only CPUs that have a combination of analog and digital capability as defined in Codes 1 and 2 respectively and which have conversion capability required for intercommunication.

CODE	EXPLANATION
4	ADP Input-Output and Storage Devices Used to Control and Transfer Information to and from a CPU. The input device is used for transferring data and instructions into a CPU. The output device is used to transfer results to processing by the CPU onto printed forms, punched cards, and/or magnetic media. Input-output devices combine the above functions in the same device. This class also includes data transmission terminals, batch terminals and display terminals which are specially designed or modified to be used in conjunction with digital, analog or hybrid CPUs. It includes modems when they are integral to the terminal. It also includes storage devices in which data can be inserted, retained and retrieved for later use.
5	ADP Accessorial Equipment. Represents accessorial equipment which is considered to be a component, device or unit that is related directly to and essential in the operation of ADPE. Included in this class are complete units and components of related general purpose accessorial equipment which are used as part of a system such as weapon system, control system, missile system, communication system or navigational system. It also encompasses various units or devices and associated control units that are used in combination or conjunction with the ADPE configuration but are not part of the configuration itself.
6	Punched Card Equipment. Represents collating machines, keypunch machines; tabulating machines; verifier; reproducer; summary punch; sorter; interpreter. NOTE: Card actuated machine when cable connected to a central processing unit are excluded.
7	ADP Supplies and Support Equipment. Represents consumable supplies, such as paper, tabulating machine, continuous flatfold; paper, tabulating machine, sheet; seal bands, tape, ADP; canisters, tape, ADP; carrying cases, tape, ADP. Also included are support equipments such as magnetic tape testing, certifying and cleaning equipment; disk pack testing, certifying and cleaning equipment; tape equipment, winders, splicers and card reconditioners.
8	ADP Components. Represents ADP component assemblies that are parts of analog, digital or hybrid data processing devices.
9	To be assigned to an item containing embedded ADPE that meets one or more of the definitions for Codes 1 through 6.

APPENDIX A-126

DISPOSAL AUTHORITY CODES

1. Number of Characters: One.

2. Type of Code: Alpha.

3. Field Position: 64.

4. Explanation: Entered on disposal related documentation to indicate that the item(s) being transferred to a Defense Reutilization and Marketing Office (DRMO) are authorized to be transferred to disposal because of instructions of the IMM/ICP relayed through the Materiel Returns Program on other proper authority.

5. The following codes are assigned:

CODE	EXPLANATION
M	Items on this transaction are IMM/ICP stocks and are being transferred to disposal by authority of the responsible inventory manager.
N	Items on this transaction are not reportable by virtue of an exclusion to the Materiel Returns Program (MRP) of MILSTRIP or other specific criteria such as extended dollar value or condition limitations on excess reporting and are duly authorized to be transferred to disposal.
R	Items on this transaction have been reported to the IMM/ICP in accordance with MILSTRIP MRP procedures and have been directed to disposal by the inventory manager. Excess transaction status codes SF, SL, SN, TC, TD or TK was provided by the IMM/ICP on DI Code FTR.

APPENDIX A-127

PRECIOUS METALS IDENTIFICATION CODES

1. Number of Characters: One.

2. Type of Code: Alphanumeric.

3. Field Position: 62

4. Explanation: Identifies Defense materiel items that contain precious metals and the content value of the metal. Will aid Defense Property Disposal Offices (DPDOs) efforts to identify precious metal bearing items at the time such materiel is turned in.

5. The following codes are assigned:

CODE	TYPE OF PRECIOUS METAL	CONTENT VALUE
A	No known Precious Metal	None
B	Item is known to contain precious metal(s) but the amount(s) are unknown	
C	Presence or absence of precious metals varies between items of production for the same item of supply	
D	Silver	Equals 15 grams or more
E	Silver	Less than 15 grams
F	Gold	Equals 10 grams or more
G	Gold	Less than 10 grams
H	Platinum	Equals 10 grams or more
I	Platinum	Less than 10 grams
J	Palladium	Equals 5 grams or more
K	Palladium	Less than 5 grams
L	Iridium	Equals 20 grams or more
M	Iridium	Less than 20 grams
N	Rhodium	Equals 15 grams or more
O	Rhodium	Less than 15 grams

CODE	TYPE OF PRECIOUS METAL	CONTENT VALUE
P	Osmium	Equals 10 grams or more
Q	Osmium	Less than 10 grams
R	Ruthenium	Equals 10 grams or more
S	Ruthenium	Less than 10 grams
T	Silver-Gold	Combination equals 15 grams or more
U	Silver-Gold	Combination contains less than 15 grams
V	Silver-Platinum Family (See Note)	Combination equals 15 grams or more
W	Silver-Platinum Family (See Note)	Combination contains less than 15 grams
X	Silver-Gold-Platinum Family (See Note)	Combination equals 15 grams or more
Y	Silver-Gold-Platinum Family (See Note)	Combination contains less than 15 grams
Z	Gold-Platinum Family (See Note)	Combination equals 10 grams or more
2	Gold-Platinum Family (See Note)	Combination contains less than 10 grams
3	Determination of Precious Metal Content is uneconomical	

NOTE: Platinum Family includes Platinum, Palladium, Iridium, Rhodium, Osmium, Ruthenium.

APPENDIX A-128

CUSTOMER COMPLAINT DEPOT ACTION CODES

1. Number of Characters: One.

2. Type of Codes: Alpha-numeric.

3. The Depot Action Code is a code used by the Center to convey the type of investigative/research actions required of the depot necessary to resolve the customer complaint identified in the CD1 transaction.

A - Information only. No depot action required.
B - Furnish shipping data.
C - Tracer action.
D - Furnish supply documentation.
E - Off-line instructions will follow.
F - Furnish asset availability.

4. The following provides a cross-reference showing which Investigation Results Codes (appendix A-96) are appropriate for use with the above Depot Action Codes:

DEPOT ACTION CODE	APPLICABLE INVESTIGATION RESULTS CODE(S)
A	No code required. Information only.
B	A, B or Z.
C	C, D or Z.
D	E, F or Z.
E	G, H, J, X or Z.
F	K, L or Z.

APPENDIX A-129

INTERIM REPLY CODES

1. Number of Characters: One.

2. Type of Code: Alpha-numeric.

3. The Interim Reply Code is a code transmitted to the depot from the Center which cites a reason for extending the complaint suspense date.

4. Interim Reply Codes are as follows:

A - Complaint assigned to DCAS for investigation.
B - Complaint assigned to Contract Administration Services for investigation.
C - Complaint undergoing engineering review.
D - Complaint undergoing testing and evaluation.
E - Complaint resolution deferred pending receipt of exhibit.
F - Complaint resolution deferred pending receipt of contract number.
G - Complaint resolution deferred pending receipt of Bill of Lading Number.
H - Complaint resolution deferred pending receipt of Transportation Control Number.
I - Complaint resolution deferred pending receipt of Requisition Number.
J - Complaint resolution deferred pending coordination with shipping activity/vendor.
K - Complaint resolution deferred pending warranty action against contractor.
L - Complaint currently under investigation.
M - Complaint assigned to FDA for investigation.

APPENDIX B-1

CARRIER PERFORMANCE MRO DEPOT TIME ANALYSIS UPDATE CARD

1. This card image entry is performed by the shipping activity through program $$UWFH30 (appendix E-234P, part A) to:

a. Correct erroneous Intransit Data Card (IDC) data appearing on the Carrier Performance Intransit Analysis Reports (appendix F-220).

b. Correct invalid IDC data appearing on the Materiel Release Order (MRO) Depot Processing Time Analysis Reports (appendix F-61).

c. Reenter corrected data for IDCs that have violated.

2. Corrections may only be made for erroneous data relative to the current month. Cards must be input prior to the next scheduled monthly run of DASC MILSTEP Intransit Data tapes for the F-220 Reports.

3. Data elements in the following formats represent modified MILSTEP IDC formats which should only be used in conjunction with corrections/updates to the Carrier Performance Intransit Analysis Reports.

4. The following are fields in the card image:

a. DIC TK4, Commercial Carriage to CONUS or POE Consignee. This format will add, change or delete Carrier Performance Report.

b. DIC TK4, Intransit Record, for the F-61 Report will require entry of the entire record except for Field Position 80, which is not required. Mode of Shipment Codes V, W, X, Z, 2, 3 and 9 are invalid for the F-61 Report and will be validated.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter TK4.
Identification Code	4	Enter one of the following: 1 - Reject from F-61, Part 1. 2 - Reject from F-220, Part 6.
Carrier	5-8	Enter Standard Carrier Alpha Code (SCAC), left-justify.
Blank	9-14	Leave blank.
Date Received	15-17	Enter Julian date materiel received.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	18-26	Leave blank.
Mode of Shipment Code	27	Enter Mode of Shipment Code.
Blank	28-36	Leave blank.
C/GBL Number	37-44	Enter Commercial/Government Bill of Lading number.
Blank	45-46	Leave blank.
Consignee	47-52	Enter the DoD Activity Address Code for the ship to consignee. Other than a six position DoDAAC must be right-justified.
TP	53	Enter the Transportation Priority Group Code.
Blank	54-59	Leave blank.
Date Shipped	60-62	Enter Julian Date materiel shipped.
Blank	63-79	Leave blank.
Action Code*	80	Enter the desired Action Code as indicated by the following: A = Add IDC record to the carrier performance. C = Update transit time (date shipped and date received) in the IDC record. D = Delete the IDC record. Blank = Establish an IDC record. (DASC Tape source - programming application only.)

*When utilizing a C Action Code only field positions 1-3, 4, 15-17, 37-44, 60-62 and 80 are required entries. When utilizing a D Action Code only field positions 1-3, 4, 37-44 and 80 are required.

5. VALIDATION

Input violations will appear on the F-61, part 1, Invalid TK4 List and the F-220, part 6, IDC Reject Listing. The punch card image will appear on the report with asterisks underscoring each field that requires correction.

TK4 Validation

FIELD POSITIONS	VALIDATION	MESSAGE
4	Must be numeric 1 or 2; no blanks.	FORMAT ERROR
5-8	Alpha/numeric, no blanks.	FORMAT ERROR
27	For Identification Code 1 in field position 4, must be alpha/numeric; no blanks or V, W, X, Y, Z, 2, 3 and 9.	FORMAT ERROR
27*	For Identification Code 2 in field position 4, must be alpha/numeric, not blank, I or N.	FORMAT ERROR
37-44	Alpha/numeric, no blanks.	FORMAT ERROR
47-52	Alpha/numeric, pos. 47-49 or 47-48 may be blank.	FORMAT ERROR
60-62	Numeric, no blanks.	FORMAT ERROR
80	For Identification Code 1 in field position 4, must be blank.	FORMAT ERROR
80*	For Identification Code 2 in field position 4, must be alpha A, C, D or blank.	FORMAT ERROR

*A blank field is for internal programming use. Do not use to add, change or delete DIC TK4 data.

APPENDIX B-2

CARRIER PERFORMANCE REPORT REQUEST CARD

1. This card image entry is performed by the shipping activity through program $$UWFH30 (appendix E-234 P, part A) to request preparation of all or selected portions of the carrier Performance Intransit Analysis Report (appendix F-220).

2. The following are fields in the transaction:

LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZVW.
Action Code	4	Enter A to prepare entire report; 1 to prepare Part 1; 2 to prepare Part 2; 3 to prepare Part 3; 4 to prepare Part 4; 5 to prepare Part 5.
Carrier Code	5-8	Enter SCAC for desired carrier or leave blank.
Functional Routing Code	9-10	Enter FRC.
Blank	11-79	Leave blank.
Field Count Indicator	80	Enter X.

NOTE: Field positions 5-8 are used in conjunction with Action Code 2 only when it is desired to limit part 2 of the report to data relative to a particular carrier(s). One card will be required for each carrier desired on part 2 of the report.

3. VALIDATION

Violations will appear on the F-220, part 6, IDC Reject Listing.

FIELD POSITIONS	VALIDATION	MESSAGE
4	Alpha/numeric A, 1, 2, 3, 4 or 5; not blank.	INVALID REQUEST
5-8	Alpha/numeric, left-justified.	INVALID REQUEST

NOTE: Field positions 5-8 only validated when field position 4 equals 2.

APPENDIX B-3

RECEIPT DETAIL CARD

1. This card format is used to provide receipt detail for MROs on all Army Project Code XDC/NSC shipments. Cards are prepared after shipping action has occurred.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DWA.
Routing Identifier Code	4-6	Enter the RIC of shipping depot.
Shipment Indicator	7	Partial/final shipment indicator. Enter F when pos. 44 of MRO is blank. Enter P when pos. 44 of MRO contains a suffix code.
National Stock Number	8-20	Enter NSN of the item shipped.
Blank	21	Leave blank.
Type of Pack Code	22	Enter type of pack code, if available.
Unit of Issue	23-24	Enter the UI for the item shipped.
Quantity Shipped	25-29	Enter the quantity of item shipped as shown on the MRC.
Document Number	30-43	Enter the document number as shown on the MRO.
Suffix Code	44	Enter suffix code if shown on the MRO; otherwise, leave blank.
Supplementary Address	45-50	Enter the coded address as shown on the MRO.
Mode of Shipment Code	51	Enter the appropriate code as shown on the MRC.
Fund Code	52-53	Enter the fund code from the MRO.
Routing Identifier Code	54-56	Enter the RIC applicable to the DSC/ICP originating the MRO.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Project Code	57-59	Enter the code as shown on the MRO.
Priority Designator	60-61	Enter the code as shown on the MRO.
TCN, GBL, or Other Shipment Unit Number	62-76	Enter the TCN, GBL, or other SU number as shown on MRC.
Blank	77-80	Leave blank.

3. VALIDATION

Computer prepared output transactions.

APPENDIX B-4

DOCUMENT MODIFIER CARD

1. This card format is used to provide distribution activities with instructions for the revision of a Materiel Release Order. Document Modifier Cards are received from the DSC/ICP when the customer has submitted a revision of the original Media and Status Supplementary Address, Signal Code, Fund Code, Distribution Code, Project Code, Priority Code, Required Delivery Date, Advice Code.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter AM_.
Routing Identifier Code (TO)	4-6	Enter the appropriate RIC applicable to the distribution depot to which the MRO was directed.
Media and Status Code	7	May be modified from code on original MRO.
National Stock Number	8-20	Enter NSN requested.
Other Fields	21-22	The data in the original MRO.
Unit of Issue	23-24	Enter the UI applicable to the FSN.
Quantity	25-29	Enter the quantity of the item requested.
Document Number	30-43	Enter the document number as on original MRO.
Suffix Code	44	Enter code from original MRO or leave blank.
Supplementary Address	45-50	May be modified from code on original MRO.
Signal Code	51	May be modified from code on original MRO.
Fund Code	52-53	May be modified from code on original MRO.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Distribution Code	54-56	May be modified from code on original MRO.
Project Code	57-59	May be modified from code on original MRO.
Priority Designator	60-61	May be modified from designator on original MRO.
Required Delivery Date	62-64	May be modified from date on original MRO.
Advice Code	65-66	May be modified from code on original MRO.
Routing Identifier Code (FROM)	67-69	Enter the RIC applicable to the DSC submitting the modifier.
Other Fields	70-80	The data in the original MRO (pos. 70-80) will be included on the modifier document.

3. VALIDATION

a. The following reject will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
67-69	Alphanumeric, must be in Table and Control File.	AB

b. The following fields will be validated and if in error a DIC AE6 with status code of D7 will be provided.

FIELD POSITION	VALIDATION
45-50	Alpha/numeric/blanks. Field cannot be all blank or contain a Y in position 45 when position 51 contains J, K, L, M or X.
51	Alpha A, B, C, D, W, J, K, L, M or X only.
62-64	Only validated when positions 65-68 contain 2T, then must be all numeric.

APPENDIX B-5

SHIPMENT TRACER REQUEST CARD

1. This card is prepared by consignees and requests supply sources to perform shipment tracing transactions for Registered, Insured and Certified Parcel Post shipments.

2. The card is initiated when the material has not been received and the date of shipment cited in the shipment status documents indicates that normal transit time has expired.

3. Results of tracer actions are provided to the consignees by off-line narrative messages.

4. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter AFT.
Routing Identifier Code (To)	4-6	Enter routing identifier to, consignor.
Duplicate of DI Code AS/AU Document Received	7-80	Reference appendices B-24 and B-80 respectively.

5. VALIDATION

FIELD POSITION	VALIDATION
68	Alpha R, I or C; if other, transactions will be disregarded.

APPENDIX B-6

LOGISTICAL REASSIGNMENT STORAGE INFORMATION REPLY CARD

1. DIC DZC is prepared by the DSC/ICP and transmitted to distribution depots as notification that stored materiel has changed ownership. The card directs the depot to transfer specified quantities of the materiel from the old owner to the new owner. In DLA, the entire quantity on-hand will be transferred to the new owner.

2. DIC DZD is prepared by the distribution depot as a reply to the DIC DZC information card within five workdays. This card will contain the quantity transferred to the gaining inventory manager.

3. The following fields are in the transaction:

a. DIC DZC

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DZC if information card and prepared by DSC/ICP.
Routing Identifier (To)	4-6	Enter RIC of activity to which document is being forwarded.
Blank	7	Leave blank.
National Stock Number	8-20	Enter the NSN of the item being transferred.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter the U/I of the item being transferred.
Transfer Quantity	25-29	Enter the quantity being transferred to GIM; otherwise, enter zeros.
Document Number	30-43	Perpetuate from the DEE/DEF transaction.
Suffix	44	Enter consecutive alpha code A through Z as necessary if separate cards are required because quantity exceeds 99,999 or because different conditions of materiel are received; otherwise, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Gaining Activity	45-47	Enter the RIC of the GIM.
Multi-Use	48-56	Enter data prescribed by the Service/Agency.
Project Code	57-59	Enter appropriate code if stocks are segregated and maintained by codes reflected in project code field; otherwise, leave blank.
Blank	60	Leave blank.
Effective Transfer Date	61-64	Enter the Julian date on which LR is effective.
Blank	65-66	Leave blank.
Routing Identifier (From)	67-69	Enter RIC of activity preparing document.
Ownership/Purpose	70	Enter the ownership/purpose code if prescribed by Service/Agency; otherwise, leave blank.
Condition	71	Enter condition code of balance affected.
Management	72	Enter management code as prescribed by Service/Agency; otherwise, leave blank.
Multi-Use	73-75	Enter data prescribed by Service/Agency.
Retention Quantity	76-80	Enter the quantity being retained by the LIM.
b. DIC DZD		
Document Identifier Code	1-3	Enter DZD if reply card and prepared by distribution depot.
Routing Identifier (To)	4-6	Enter routing identifier from pos. 67-69 of DIC DZC to which reply is being made.
Blank	7	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
National Stock Number	8-22	Perpetuate from DIC DZC
Unit of Issue	23-24	Perpetuate from DIC DZC.
Transfer Quantity	25-29	Enter quantity which was available for transfer subject to the retention quantity contained in pos. 76-80 of DIC DZC.
Document Number	30-43	Perpetuate from DIC DZC.
Suffix Code	44	Perpetuate from DIC DZC.
Gaining Activity	45-47	Perpetuate from DIC DZC.
Multi-Use	48-56	Enter data as prescribed by Service/Agency.
Project Code	57-59	Perpetuate from DIC DZC.
Blank	60	Leave blank.
Effective Transfer Date	61-64	Perpetuate from DIC DZC.
Blank	65-66	Leave blank.
Routing Identifier (From)	67-69	Enter RIC of storage activity from which reply is being made.
Ownership/Purpose	70	Perpetuate from DIC DZC.
Condition	71	Perpetuate from DIC DZC.
Management	72	Perpetuate from DIC DZC.
Multi-Use	73-75	Enter data as prescribed by Service/Agency.
Retention Quantity	76-80	Enter quantity which was retained for the LIM.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
8-20	Numeric other than all zeros. Pos. 14 may contain alpha A, B, J, L or S.	AY
23-24	Alpha filled.	AN
25-29	Numeric filled.	AS
30-43	Alphanumeric filled.	AI
44	Alpha or blank.	AZ
61-64	Numeric filled.	KZ
71	Alpha A through P except I and O.	AF
76-80	Numeric filled or blank. If DZD, must be zero filled.	AS

APPENDIX B-7

MATERIEL RELEASE ORDER (MRO) CARD

1. This card format is used to provide distribution activities with instructions for preparation and shipping of materiel to customers. To reenter an A5_ document and bypass the duplicate check, pos. 1-2 will be changed to ZZ, balance of card will remain the same. Enter DIC ZZ9 to delete a MRO which has violated from computer processing.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter A5_ (except A5J), ZZ_ or ZZ9.
Routing Identifier Code (To)	4-6	Enter the appropriate RIC applicable to the distribution depot to which the MRO is directed.
Media and Status Code	7	Enter the code as shown on the requisition.
National Stock Number	8-20	Enter NSN requested.
Submission Time	21-22	Enter submission time.
Unit of Issue	23-24	Enter the UI applicable to the stock or part number.
Quantity	25-29	Enter the quantity of the item requested.
Document Number	30-43	Enter the document number as shown on the requisition.
Suffix Code	44	a. Enter the suffix code when the requisition quantity is divided into separate supply actions. b. When the requisitioned quantity is not divided, this field will be left blank.
Supplementary Address	45-50	Enter the code as shown on the requisition.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Signal Code	51	Enter the code as shown on the requisition.
Fund Code	52-53	Enter the fund code as shown on the requisition.
Distribution Code	54-56	Enter the code as shown on the requisition.
Build Directive Number (4th pos.)	(56)	Enter on DEPMEDS major assemblages (see note).
Project Code	57-59	Enter the code as shown on the requisition.
Build Directive Number (1st 3 pos.)	(57-59)	Enter on DEPMEDS major assemblages (see note).
Priority Designator	60-61	Enter the code as shown on the requisition.
Required Delivery Date	62-64	Enter the date as shown on the requisition. When the field is blank on the requisition, leave blank.
Assemblage Identification Number	(62-63)	Blank upon receipt. Entered by supply depot when completed and is selected for shipment.
Advice Code	65-66	Enter the code as shown on the requisition.
Routing Identifier Code (From)	67-69	Enter the code applicable to the DSC originating the MRO.
Purpose Code	70	Enter Purpose Code.
Condition Code	71	Enter Condition Code.
Management Code	72	Enter Management Code (will indicate management data).
Type Pack Code	73	Enter type pack code, if applicable.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
DICOMSS Cycle Code	(73)	Enter appropriate code from appendix A-30.
Unit Price	74-80	Enter the unit price applicable to the stock or part number shown in pos. 8-20.

3. VALIDATION

Violation rejects will be listed on appendix F-85 when other than as noted below.

FIELD POSITION	VALIDATION	VIOLATION CODE
1-3	DIC A55/A5E must have overpunch 8 or 9 in pos. 3 or reject onto F-113.	--
4-6	Rerouted if not depot's RIC TO.	--
8-20	Numeric and not all zeros, or numeric with pos. 14 alpha A, B, J, L or S only. If DEPMEDS major assembly must haul matching stock number in DEPMEDS records (see note).	AY XF
21-22	Numeric, system will compute if not valid numeric.	--
23-24	Alphas only.	AN
25-29	Numeric, not all zeros. If DEPMEDS major assembly, quantity must be 1 (see note).	AS XH
30-43	Alpha/numeric pos. 30-35, numeric pos. 36-39, alpha/numeric pos. 40, alpha/numeric pos. 41-43. No blanks. If DEPMEDS major assembly must have matching document number in DEPMEDS records (see note).	AI XF
45-50	Alpha/numeric/blanks. Field cannot be all blank or contain a Y in pos. 45 when pos. 51 contains J, K, L, M or X.	BJ
51	Alpha A, B, C, D, W, J, K, L, M or X only.	AU
56-59	If DEPMEDS major assembly must have matching BDN in DEPMEDS records (see note).	XG
60-61	Numeric 01 through 15 only. System will assign 15 if not a valid entry.	--

FIELD POSITION	VALIDATION	VIOLATION CODE
62-64	Only validated when pos. 65-66 contains 2T, then must be all numeric.	3W
67-69	Alphanumeric. Must be in the table and control file.	AB
70	Alpha, numeric, or blank.	AQ
71	Alpha A, B, C, D, E, F, G, H, J, K, L or M only.	AF
72	Alpha or blank when pos. 67-68 other than S9. Alpha A, F, G, H, S or blank when pos. 67-68 is S9. Alpha Z when pos. 1-3 is A55/A5E.	AW
74-80	Numeric other than all zeros. Alpha F/V valid in pos. 80 when alpha in pos. 14.	AM

NOTE: DEPMEDS MROs are identified by the recorded location in the Locator Record (999999999). If an assembly is not recorded as packed in the DEPMEDS records, the MRO will be rejected with a Violation Code of R8.

APPENDIX B-8

MATERIEL RELEASE DENIAL/ADJUSTMENT CARD

1. The Materiel Release Denial/Adjustment Card is used to advise DSC/ICP of quantities denied or adjusted for Materiel Release Orders (MROs).

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DIC A6_ (except A6J).
Routing Identifier Code	4-6	Enter the RIC of the DSC that originated the MRO (i.e., pos. 67-69 of MRO).
Media and Status Code	7	Enter data as shown on the MRO.
National Stock Number	8-20	Enter data as shown on the MRO.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter data as shown on the MRO.
Quantity	25-29	Enter the quantity denied/adjusted.
Document Number	30-43	Enter data as shown on the MRO.
Suffix Code	44	Enter data as shown on the MRO.
Supplementary Address	45-50	Enter data as shown on the MRO.
Signal	51	Enter data as shown on the MRO.
Fund Code	52-53	Enter data as shown on the MRO.
Distribution Code	54-56	Enter data as shown on the MRO.
Project Code	57-59	Enter data as shown on the MRO.
Priority Designator	60-61	Enter data as shown on the MRO.
Required Delivery Date	62-64	Enter date as shown on the MRO.
Advice Code	65-66	Same as on MRO.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Routing Identifier Code	67-69	Enter the RIC identifying the distribution depot preparing the denial/adjustment.
Purpose Code	70	Enter the code as indicated in the MRO.
Condition Code	71	Enter the code as indicated on the MRO.
Management Code	72	Enter the appropriate management code (appendix A-13).
Type Pack Code	73	Enter the code as indicated in the MRO.
DICOMSS Cycle Code	(73)	Enter the code as indicated in the MRO.
Blank	74-80	Leave blank.

3. VALIDATION

Computer output transaction.

APPENDIX B-9

CUSTOMER COMPLAINT DATA ENTRY

1. This procedure describes the action required to record customer complaint data input through the CRT terminal. Data is received by SF 361, SF 364, SF 368, letter message or telephone.

2. REFERENCES

a. Appendix A-3.

b. Appendix A-6.

c. Appendix A-57.

d. Appendix E-006P.

3. DATA ELEMENTS

FIELD LEGEND	NO. OF POS.	TYPE	EXPLANATION/INSTRUCTIONS
Action*	1	A	A = Add, I = Inquire, C = Change, D = Delete or R = Option Reports.
Document Suffix Number*	15	A/N	Enter Document Number.
Data Entered	7	A/N	Date record established. Automatically assigned by the computer.
Date Last Change	7	A/N	Date record was last updated.
Report Date	6	A/N	Date record appeared on a monthly report.
Status	2	A/N	Entered when complaint is determined valid or invalid (appendix A-57).
Stock Number	13	A/N	Enter Stock Number. Record as shipped.
NIIN In Error	9	A/N	NIIN shipped in error.

FIELD LEGEND	NO. OF POS.	TYPE	EXPLANATION/INSTRUCTIONS
Control Number	3	N	Assigned to each complaint for local control of hard copy documentation.
Dollar Value	6	N	Total dollar value of the discrepancy.
Sensitive	1	A/N	Basic Locator Record data.
Discrepancy*	2	A/N	(Appendix A-3.)
Type Form*	1	A/N	(Appendix A-6.)
Availability	1	A	Availability of a DD Form 1348-1 (Y = yes or N = no).
Domestic Designator	1	A/N	Service Code (appendix A-5).
Overseas Designator	1	A/N	Service Code (appendix A-5).
Hazardous Materiel	1	A/N	Y = yes or N = no.
Parcel Post	1	A	Enter P is Parcel Post Shipment. Blank if other.
Location	3	A/N	First three digits of location or NLO if unknown.
Functional Routing Code	2	A/N	If entered, an MRO History will be provided. Otherwise blank.
Commodity Manager*	1	A	(Appendix A-44.)
Date of DD Form 1348-1	4	N	Document date on DD Form 1348-1 Block O.
Person-CD	5	N	Enter the personnel code of the person responsible for the discrepancy.

*Mandatory Entries.

APPENDIX B-10

TRANSACTION REJECT CARD

1. This card is used between Inventory Control Points and storage activities to reject a transaction which could not be processed due to erroneous or missing data. It identifies to the originator of a transaction the reason for rejection and indicates return of the transaction for correction and resubmission.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTION
Document Identifier Code	1-3	Enter DZG.
Routing Identifier Code (To)	4-6	Enter RIC identifying the activity to which the card is being submitted.
Other Fields	7-53	Perpetuate data from the incoming transaction being rejected.
Correct Managers Routing Identifier Code	54-56	Enter RIC of correct manager, if known, when Code AB is indicated in pos. 79-80; otherwise, leave blank.
Rejected Document Identification	57-59	Enter DIC from pos. 1-3 of the incoming identification transaction being rejected.
Other Fields	60-66	Perpetuate data from the incoming transaction being rejected.
Routing Identifier Code (From)	67-69	Enter RIC of activity rejecting the document.
Other Fields	70-78	Perpetuate data from the incoming transaction being rejected.
Reject Advice Code	79-80	Enter appropriate code from appendix A-41.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
54-56	If filled, must be S9C, E, G, I, M, T or S; may be blank.	AB
79-80	Alpha filled or blank.	RJ

4. These reject documents will print on the appendix F-113 daily as received and will be reviewed for reprocessing IAW procedures outlined in appendix E-143 P.

APPENDIX B-11

STORAGE ITEM DATA CORRECTION CARD

1. This card is prepared by Inventory Control Points and forwarded to storage activities indicating necessary changes to elements of data pertaining to a NSN.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DZB.
Routing Identifier Code (To)	4-6	Enter RIC identifying the storage activity to which the card is being forwarded.
Item Data Correction/Change Code	7	Enter appropriate code from appendix A-40 to indicate the data field(s) affected by the change.
National Stock Number	8-24	Enter data as follows:
	(8-20)	Indicate NSN reported in the storage activity transaction or affected by catalog stock list change.
	(21-24)	Enter Production Equipment Code (PEC), DoD Ammunition Code (DoDAC) or locally assigned numbers as appropriate; otherwise, leave blank.
Unit of Issue	25-26	Perpetuate UI reported in the storage activity transactions.
National Stock Number	27-43	Enter data as follows:
	(27-39)	Enter new NSN when stock number is being changed; otherwise, leave blank.
	(40-43)	Enter Production Equipment Code (PEC), DoD Ammunition Code (DoDAC) or locally assigned numbers as appropriate; otherwise, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Unit of Issue	44-45	Enter new UI when UI is being changed; otherwise, leave blank.
Unit of Issue Conversion Factor	46-50	Use only when UI is being changed; otherwise, leave blank.
Decimal Locator	(46)	The following table identifies the position of the decimal in the Multiplication Factor: 0 - whole number (no decimal) 1 - decimal before position 50 2 - decimal before position 49 3 - decimal before position 48 4 - decimal before position 47
Multiplication Factor	(47-50)	Enter factor by which the old quantity must be multiplied to convert to the new UI.
Shelf-Life Code	51	Enter new Shelf-Life Code if the Shelf-Life Code is being changed; otherwise, leave blank.
Physical Security/Pilferable Code	52	Enter new Physical Security Pilferable Code if the code is being changed; otherwise, leave blank.
Demilitarization Code	53	Enter the new Demilitarization Code if code is being changed; otherwise, leave blank.
Special Action/Information Code for Identifying (1) Repairability (2) Reclamation (3) Recoverability and so forth	54-55	Reserved for future DoD standardization. Present use to accommodate individual Service/Agency assigned codes.
Managing Activity	56-58	Enter the RIC of the manager.
Date of Preparation	59-62	Enter the Julian date of preparation of this document.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Multiuse	63-66	For Intra-Service/Agency application, enter data prescribed by the Service or Agency. For Inter-Service/Agency application, leave blank.
Routing Identifier Code (From)	67-69	Enter the code identifying the activity preparing document.
Date	70-73	Enter the effective date of the catalog/stock list change when applicable; otherwise, leave blank.
Multiuse	74-80	For Intra-Service/Agency application, enter data prescribed by the Service or Agency. For Inter-Service/Agency application, leave blank.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Numeric 2, 3, 4, 5, 6, 7, 9 and alpha Y; must be filled.	8Y
8-20	Numeric filled other than all zeros, except pos. 14 may contain A, B, J, L or S for DICOMSS.	AY
25-26	Alpha filled or blank.	AN
27-39	Numeric other than all zeros, except pos. 33 may contain A, B, J, L or S for DICOMSS or blank.	AY
44-45	Alpha filled, may be blank.	AN
46-50	Numeric filled, may be blank. If filled, first position must be 0 through 4.	8Y
51	Alpha/numeric, may be blank.	HB
52	Alpha filled, may be blank.	MW
53	Alpha filled, may be blank.	XO
59-62	Numeric other than all zeros.	8Y

FIELD POSITION	VALIDATION	VIOLATION CODE
67-69	Alpha/numeric filled.	AB
70-73	Numeric filled other than all zeros, not less than current date; may be blank.	KZ

APPENDIX B-12

LOCATION AUDIT RECONCILICATION REQUEST CARD

1. This card is prepared by the distribution depot and transmitted to the appropriate Inventory Control Point to reconcile accountable records. This card is prepared for each stock number, by condition, in the Item Locator File.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DZH.
Routing Identifier Code (To)	4-6	Enter RIC identifying the ICP to which the card is being forwarded.
Blank	7	Leave blank.
Stock Number	8-22	Enter the stock number of the item being requested for reconciliation.
Unit of Issue	23-24	Enter UI of the item.
Quantity	25-34	Enter the quantity preceding significant digits with zeros; otherwise, leave blank.
Multi-use	35	For Intra-Agency transactions, enter the data prescribed by the Service/Agency use. Leave blank.
Cutoff Date	36-39	Enter the mutually agreed-upon cutoff date for location audit reconciliation. The last digit of the calendar year is entered in pos. 36 and the numerical day of the calendar year is entered in pos. 37-39, e.g., 2032 is 1 Feb 72.
Shelf-Life Code	40	Enter code applicable to the item.
Physical Security/ Pilferable Code	41	Enter the Physical Security/ Pilferable Code applicable to the item.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Manager/Owner Identifier	42	Enter Code 1 if activity in pos. 4-6 is the integrated materiel manager and Code 2 if activity is an owner but not the integrated materiel manager.
Blank	43	Leave blank.
Transaction Reconciliation Lot/ Segment Number	44-46	Enter the lot/segment number of the transactions being reconciled; otherwise, leave blank.
Blank	47-59	Leave blank.
Consecutive Transaction Number	60-66	Enter consecutive number beginning with 0000001 in the first card to identify each card in the reconciliation.
Routing Identifier Code (From)	67-69	Enter RIC identifying the storage activity preparing the card.
Ownership/Purpose Code	70	Enter ownership or purpose code if assets are segregated physically or on the storage activity record; otherwise leave blank.
Condition Code	71	Enter code of the item being reconciled.
Inventory Category Code	72	Enter ICC if prescribed by the Military Service/Agency managing the item; otherwise leave blank.
Blank	73-75	Leave blank.
Multi-use	76-80	For Intra-Service/Agency use enter data prescribed by the Service/Agency. For Inter-Service/Agency use, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Date of Pack/Expiration	(76-78)	For Subsistence Items only: Enter the date the manufacturer packed the product or the expiration date assigned by the manufacturer. The date will be reflected by entering the last numeric digit of the calendar year. An alpha A through L for the month; with the third position always being a numeric 0 for date packed and numeric 1 through 4 (represents week) for the expiration date.
Subsistence Type of Pack Code	(79)	For Subsistence Items only: Enter the applicable subsistence type of pack code.
Blank	(80)	Leave blank.

3. Recipients of DZH requests will effect comparison with the accountable records. When discrepancies exist, a Transaction Reject Card (DZG), or a Storage Item Correction Card (DZB) will be returned to the distribution depot indicated in pos. 67-69 for research and reprocessing in accordance with appendix E-143 P.

APPENDIX B-13

HAZARDOUS MATERIEL PACKAGING AND TRANSPORTATION FILE

1. PURPOSE

The input-output formats contained in this appendix will reflect the data elements required to establish and maintain the Hazardous Materiel Packaging and Transportation File.

2. REFERENCES

Appendix E-004 P

3. DATA ELEMENTS

FIELD LEGEND	NUMBER POSITIONS	TYPE	SOURCE/EXPLANATION
Section Code	1	A	H = Heading Information D = DOT Mode I = IMO Mode A = IATA Mode 4 = 4145-3 Mode U = UPS Mode O = Maintenance and Printing OSHA Label F = FSCM Name and Address R = Optional Reports
Action Code	1	A	I = Inquiry M = Modify D = Delete A = Add L = Add Like Data
NIIN/Part No.	15	A/N	A nine position NIIN number or the part number.
FSCM Code	5	A/N	Federal Supply Code for Manufacturers in FSCM Cataloging Handbook H-8.
Variation Code	2	N	A locally assigned number if a manufacturer (FSCM) has changed the properties of an item but not the stock number.
Date of Last Change	5	N	The last date any action was taken against a record.

FIELD LEGEND	NUMBER POSITIONS	TYPE	SOURCE/EXPLANATION
Net Qty Per Pkg	25	A/N	Weight of volume of the actual hazardous materiel.
Neutralizing Mat.	14	A/N	The agent used on corrosive materials in case of spills. Found in attachment #5 of DLAM 4145.3.
Boiling Point	11	A/N	The temperature at which liquids boil at a pressure of 760 millimeters of mercury (mmHg).
Multi-FSCM Code	2	N	An indicator that there is more than one record for a stock no. If the indicator is 00, there is only one record.
Flash Point	11	A/N	The temperature in degrees F and C at which a liquid will give off enough flammable vapor to ignite when a flame or spark is applied.
Method	4	A	The abbreviation for the method of determining the flash point.
Reportable Qty	15	A/N	These elements as defined by 49 CFR 171.8 indicating the quantity in pounds and kilograms per package specified in column 2 of the HMT in 49 CFR for any material identified by the letter E in column 1.
Stock Class	4	N	The Federal Stock Class associated with the NIIN. (The first 4 positions of the stock number.) Blank if the key is a part number.
Exemption Date	5	N	The Julian date a DOT exemption number expires.
Exemption Number	10	A/N	If a material is DOT exempted, the exemption number that authorized the exemption.
HCC	3	A/N	The hazardous compatability code assigned to an NSN that categorizes it for storage purposes.

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
Form-Flag Data	7	A/N	Radioactive material is in one of two forms, N=Normal, S=Special. If the form is "Normal", enter the form of the material, i.e., liquid, gas, solid, etc.
Transport Index	4	A/N	The reading taken with a geiger counter, three feet from the exterior of the container.
Radionuclide	25	A/N	The radioactive element name and radionuclide described in 49 CFR, 173.390.
Radioactivity	12	A/N	The amount of radioactive material measured in curies of fractions thereof, i.e., millicuries, microcuries.
Waste	51	A/N	The proper shipping name of the hazardous waste.
DOT Name	100	A/N	The proper shipping name prescribed for the material as described in 49 CFR 172.101 column 2.
DOT Container Specification Name	20	A/N	This element provides the DOT containers specification number(s) and description(s) specified in the Packaging Reference.
DOT Name Supplement	125	A/N	This data element is to be used for accommodating the words in italics from a proper shipping name. These words in italics are not part of the shipping name but may be used to provide additional information. 49 CFR 172.101, subparagraph (c)(2).
DOT Class	25	A/N	The hazard class of the material as described in 49 CFR 172.101, column 3.
Haz Item ID	6	A/N	The UN or NA identification number assigned to all hazardous materiel as annotated in 49 CFR 172.101.

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
UI Container	14	A/N	This data element describes the type of container for a particular NSN, (i.e., drum, glass bottle, polyethylene bottle, cylinder, metal can).
DOT Label	25	A/N	The label required, if not exempt, as described in 49 CFR 172.101 column 4.
Hazard Flag	1	A	A flag to identify the type of annotation to be printed in the HM column of the shipping papers. A = X E = RQ
Limited Quantity	2	A	This data element identifies whether or not a material qualifies for packaging under a limited quantity exemption. Enter a Y, N or blank in the first position. If a "Y" is entered, "Limited Quantity" will print on the shipping papers. Enter a Y or N in the second position. If a "Y" is entered, "No Label Required" will print on the shipping papers.
Net Explosive Weight	20	A/N	The Weight or volume of the actual hazardous materiel only.
Regulation Reference To Packaging	200	A/N	The complete packing reference including part, section, paragraph and subparagraph.
Additional Data	300	A/N	Any additional data that may be necessary.
IMO Name	100	A/N	The proper shipping name from 49 CFR 172.101 or from the General Index in Volume IV of the Dangerous Goods Code of the Intergovernment Maritime Organization.
IMO Name Supplement	125	A/N	This data element is to be used for accommodating the noncapitalized words from the proper shipping name and may be used as additional information.

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
UN Hazard Class	40	A/N	The numeric identification and the in-the-clear description of the primary hazard presented by a material. The UN Hazard Class is assigned to each specific shipping name as referenced in the General Index of the IMDG Code.
Haz Item ID	6	A/N	The UN identification number assigned to all hazardous materiel as annotated in the International Maritime Dangerous Goods code.
IMO Label	50	A/N	The corresponding hazard label that identifies the associated UN Hazard Class for a specific material.
Hazard Flag	1	A	A flag to identify the type of annotation to be printed in the HM Column of the shipping papers. A = X E = RQ
IMDG Code Page Number	7	A/N	The identification of the specific page in the IMDG Codes upon which the requirements for the proper packaging and storage are provided.
Subsidiary Risk Label	25	A/N	The label(s) required to identify secondary risks. These labels are in addition to those specified by the UN Hazard Class Code.
Packaging Group	200	A/N	This data element identifies the degree of danger a hazardous materiel present during transportation and includes a maximum of five narrative descriptions associated with the cited packaging group number.
IATA Name	100	A/N	The proper shipping name from section IV of the International Air Transport Association Regulation.
IATA Name Supplement	125	A/N	This data element is to accommodate the portion of the proper shipping name which does not appear in bold character but may be used in addition to the proper shipping name.

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
IATA Class	40	A/N	The numeric identification and the in-the-clear description of the primary hazard presented by a material. The UN Hazard Class is assigned to each specific shipping name as referenced in column C of Table 4.2 in the IATA Dangerous Goods Regulation.
Passenger Limit	10	A/N	The maximum net quantity per package allowed for transportation on a passenger aircraft as specified in column H of Table 4.2 in the IATA Dangerous Goods Regulation.
Haz Item ID	6	A/N	The serial number assigned to the article for substance under the United Nations Classification System. If the substance has not been assigned a number in the UN Classification System, a temporary number prefaced with ID in the 800 series has been assigned by the IATA.
Cargo Limit	10	A/N	The maximum net quantity per package allowed for transportation on a cargo aircraft as specified in column J of Table 4.2 in the IATA Dangerous Goods Regulation.
IATA Label	50	A/N	The hazard label required to be applied to the package, as specified in column E of Table 4.2 in the IATA Dangerous Goods Regulation.
Hazard Flag	1	A	A flag to identify the type of annotation to be printed in the HM column of the shipping papers. A = X E = RQ
Packing Group	3	N	The degree of danger a hazardous materiel presents during transportation, as specified in column F of the IATA Dangerous Goods Regulation.

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
Packing Ref Cargo	200	A/N	The packaging instruction number specified in column I of Table 4.2 in the IATA Dangerous Goods Regulation and includes a maximum five narrative descriptions associated with cited packaging group numbers.
Packing Ref Passenger	200	A/N	The packaging instruction number specified in column G of Table 4.2 in the IATA Dangerous Goods Regulation and includes a maximum of five narrative descriptions associated with cited packaging group numbers.
Subsidiary Risk	3	A/N	The numeric identification of the subsidiary risk presented by a material as referenced in column D of Table 4.2 in the IATA Dangerous Goods Regulation.
Subsidiary Risk Label(s)	50	A/N	Any subsidiary risk label(s) required to be applied, as specified in column E of Table 4.2 in the IATA Dangerous Goods Regulation.
Strength of Field	80	A/N	The mandatory performance criteria for magnetized material packages as stated in packaging instruction 902 of the IATA Dangerous Goods Regulation.
4145.3 Name	100	A/N	The name of hazardous materiels shown in Roman type/capital letters in column 1 of Table 4-1 in DLAM 4145.3 (AFR 71-4).
PAX/Cargo	1	A	Identifies a hazardous materiel which must be transported on a cargo only aircraft or on a cargo aircraft which allows DoD duty passengers.
Overpack	1	A	This data element identified by Y, the hazardous materiels which require overpacking or repacking.
4145.3 Name Supplement	125	A/N	Used for accommodating the words in italics from a proper shipping name. These words in italics are not part of the shipping name but may be used to provide additional information.

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
4145.3 Class	40	A/N	The hazard class for each substance (shipping name) specified in column 2 of Table 4-1 in DLAM 4145.3 (AFR 71-4).
Internal PSI	12	A/N	The internal PSI value for each particular NSN, as received from the manufacturer.
Haz Item ID	6	A/N	The identification number shown in column 3 of Table 4-1 in DLAM 4145.3 (AFR 71-4).
Load/Storage Group	19	A/N	Identifies load and storage group data identified in column 6 of Table 4-1 and Table A-1 of the appendix.
Hazard Flag	1	A	A flag to identify the type of annotation to be printed in the HM column of the shipping papers. A = X E = RQ
Max Net Qty	10	A/N	The DOT container specification number(s) and description(s) specified in the Packing Reference.
Reg Ref Packing	200	A/N	Identifies the packaging reference section, specified in column 5 of Table 4-1 in DLAM 4145.3 (AFR 71-4).
Strength of Field	80	A/N	This element contains the mandatory performance criteria for magnetized material packages as stated in packaging instruction 11-10 in DLAM 4145.3 (AFR 71-4).
Secondary Closure	16	A/N	Identified by YES, the hazardous materiels which require a secondary closure and reference will be made to the appropriate subparagraph within paragraph 1-2 in DLAM 4145.3 (AFR 71-4).

FIELD LEGEND	NUMBER POSITIONS	TYPE	SOURCE/EXPLANATION
Supplemental Data	300	A/N	This data element provides handling information for the classes identified in instruction 8 of the General Instructions for Completing DD Form 1387-2 in DLAM 4145.3 (AFR 71-4).
DOT UPS Name	100	A/N	The name of hazardous materiels as they appear in column 2 of the Hazardous Materiels Table (HMT) in the United Parcel Service Guide for Shipping Hazardous Materiels (UPS Guide).
Hazard Class	40	A/N	The specific danger presented by a material as specified in column 3 of the HMT in the UPS Guide.
Haz Item ID	6	A/N	The identification number shown in column 4 of the HMT in the UPS Guide. This number aids in identifying the material throughout the use of the DOT Emergency Response Handbook, in the event of an emergency.
Label, LTD-QTY of Exempt	50	A/N	Information concerning the type of DOT Diamond Label(s) which must appear on the package. It also indicates if this chemical may be eligible for exemption (LTD-QTY) or must be shipped using an Exemption Number. This information is provided in column 5 of the HMT in the UPS Guide.
Package Number	25	A/N	Package suggestions for the listed items and is found in column 6 of the HMT in the UPS Guide. (Specifications for the package numbers are found in the green pages of the UPS Guide.)
Maximum Unit Qty	25	A/N	A maximum allowable volume or weight of hazardous materiel permitted in one inside container. Where no quantity is listed, unit quantity and package weight limitations are as outlined on the green page of the package number selected. This information is provided in column 7 of the HMT in the UPS Guide.

FIELD LEGEND	NUMBER POSITIONS	TYPE	SOURCE/EXPLANATION
Additional Data	300	A/N	Provides additional information concerning shipping paper requirements, additional packaging requirements, and any unique information that may apply to the shipment.
Trade Name	50	A/N	This is the name or number that the manufacturer uses to designate their product.
Item Name	50	A/N	This is the cataloging name as recorded in the Federal Cataloging System.
Common Name	50	A/N	This data element provides a common name to a hazardous chemical that is a single substance or an item that is a mixture of tested hazardous chemical ingredients.
Chemical Name	70	A/N	This is the chemical name of the item and applies only to products consisting of a single element or compound.
Hazard Chemical Ingredient	500	A/N	This data element applies to a hazardous chemical that is a mixture of hazardous chemical ingredients and has been tested by the manufacturer as a whole to determine the hazards contributed by each ingredient. This data element includes both the common and chemical names of each ingredient that contributes a known hazard.
Manufacturer	50	A/N	This is the name of the manufacturer of the product.
Manufacturers Address	50	A/N	This is the address of the manufacturer of the product.
Manufacturers Telephone	10	N	This is a number to be called in emergency situations.
Hazardous Warning Statement	150	A/N	This data element provides the warning required for personal protection against the hazard(s) imposed by the chemical item.

APPENDIX B-14

MATERIEL RELEASE CONFIRMATION CARD

1. This card format is used to provide DSC/ICP:

a. Confirmation of the completed shipment action on MROs (appendix B-7).

b. Response to an MRO Followup Request (appendix B-60) and Replay to Cancellation Request (appendix B-17) when shipment has been completed.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DIC ARO/AUO for release of quantity requested. Enter DIC ARA/AUA for release of quantity greater than requested. Enter DIC ARB/AUB for release of quantity less than requested.
Routing Identifier Code	4-6	Enter the appropriate RIC of the DSC to be furnished the status.
Media and Status Code	7	Enter the code as shown on applicable MRO/Cancellation request.
National Stock Number	8-20	Enter NSN of the item supplied.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter UI for the item supplied.
Quantity	25-29	Enter the quantity of item supplied.
Document Number	30-43	Enter the document number as shown on the MRO/Cancellation request.
Suffix Code	44	Enter, if applicable.
Supplementary Address	45-50	Enter the coded address as shown on the MRO/Cancellation request.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Hold Code	51	Enter the type of hold code, when applicable to shipment offered to Transportation or shipped. Leave blank in response to followup when item has not been selected for shipment.
Fund Code	52-53	Enter the fund code shown on MRO/Cancellation request.
Port of Embarkation	54-56	Enter for: a. CONUS - date available for shipment. b. Overseas - POE. Leave blank on parcel post. For shipment to a SEAVAN Cargo Assembly Point, enter the code identifying the SEAVAN Cargo Assembly Point. c. FMS transaction. Leave blank on parcel post. If pos. 46-47 of FMS MRO is XX enter POE; otherwise, leave blank for other modes of shipment. d. Grant Aid Transaction - Enter POE.
Date Shipped	57-59	Enter date delivered to carrier.
Estimated Shipping Date	(57-59)	Enter estimated shipping date, when used in response to followup and shipment has not occurred.
Priority Designator	60-61	Enter the code as shown on the MRO/Cancellation request.
TCN, GBL or other Shipment Number	62-76	a. Enter the TCN (see note 1) for inland shipments to the POE, LOGAIR, QUICKTRANS, and unregistered parcel post; enter the consignor, letter U, and the daily pickup record number of the small package carrier (if no GBL

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		or CBL number is used) for shipments to CONUS, Alaska and Hawaii consignees (see note 2).
		b. For FMS transactions, which are made on a commercial bill of lading and subparagraph a above does not apply, enter the FMS Notice Number shown in pos. 62-76 of Notice of Availability (appendix B-53).
		c. For SEAVAN shipments the TCN assigned to the SEAVAN load will be entered.
Blank	(62-80)	Leave blank in response to followup when shipment has not occurred (i.e., when pos. 57-59 contains an ESD).
Mode of Shipment Code	77	Enter the appropriate code identifying the mode of shipment (appendix A-17).
Date Available for Shipment	78-80	Date available for shipment. Leave blank in response to followup when shipment has not occurred (i.e., when pos. 57-59 contains an ESD).

NOTE 1: Enter lead document number in pos. 62-76. Entries will be as follows: Requisitioner (less service code), date of requisition, serial number of requisition, suffix from requisition (if blank insert X), and only 1-digit partial shipment indicator.

NOTE 2: The registration/insured number field (pos. 69-76) will be completely punched, right to left. If there are less than 8 digits, the number of significant digits will be preceded by zeros.

3. VALIDATION

Computer processed output transaction.

APPENDIX B-15

COMMISSARY SUPPORT ITEM IDENTIFICATION CARD

1. This card is prepared by the DSC to advise the storage activity of those data elements pertinent to commissary support items. These card formats will be transmitted via AUTODIN.

2. The following are the data fields contained in the transaction:

CARD 1

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CKK.
Routing Identifier Code	4-6	Enter the appropriate RIC applicable to the defense depot to which transaction is directed.
Blank	7	Leave blank.
Stock Number	8-20	Enter stock number of the DICOMSS item.
Case Pack	21-24	Enter case pack of the item.
Case Weight (4 whole numbers)	25-30	Enter case weight of the item.
Case Cube (3 whole numbers)	31-36	Enter case cube of the item.
Physical Security Code	37	Enter Physical Security Code or leave blank.
Water Commodity Code	38-42	Enter MILSTAMP Water Commodity Code, or leave blank for Troop Issue Item.
Transportation Compatibility	43	Enter appropriate code from appendix A-68.
Unit of Issue	44-45	Enter Unit of Issue, or leave blank for Troop Issue Items.
Blank	46-47	Leave blank.
Demilitarization Code	48	Enter appropriate code from appendix A-35.
Shelf-Life Code	49	Enter Shelf-Life Code or leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	50	Leave blank.
DICOMSS Type of Item Code	51	Enter appropriate code from appendix A-31.
Blank	52-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter the code applicable to the DSC (S9S) originating the transaction.
Blank	70-78	Leave blank.
Action Code	79-80	Enter 1A - add; 1B change; 1C - delete.

NOTE: DICOMSS weight and cube data for Brand Name and Local Purchase Items will always be reported by the case.

CARD 2

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CKK.
Routing Identifier Code	4-6	Enter the appropriate RIC applicable to the defense depot to which transaction is directed.
Blank	7	Leave blank.
Stock Number	8-20	Enter stock number of the DICOMSS item.
Nomenclature	21-66	Enter item description (up to 46 positions).
Routing Identifier Code	67-69	Enter the code applicable to the DSC (S9S) originating the transaction.
Nomenclature	70-73	Enter remainder of item description from pos. 21-66 (up to 4 positions).
Blank	74-78	Leave blank.
Action Code	79-80	Enter 2A - add; 2B - change.

3. VALIDATION

Violation rejects will be listed on appendix F-85.

a. Card 1

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	Alpha/numeric, may not be blank.	AC
8-20	All numeric when pos. 51 is L or T, pos. 14 must be A, B, J, L, or S when pos. 51 is B.	AY
21-24	All numeric when pos. 51 is B or L, must be all blank when pos. 51 is T.	Z7
25-30	All numeric when pos. 51 is B or L, must be all blank when pos. 51 is T.	IE
31-36	All numeric when pos. 51 is B or L, must be all blank when pos. 51 is T.	IF
37	Alpha A, B, C, G, H, J, K, L, M, Q, R, S, T, U, X or blank.	MW
38-42	Alpha/numeric when pos. 51 is B or L, must be all blank when pos. 51 is T.	IC
43	Alpha A, B, C, E, F, G, H, R, W, or Y, may not be all blank.	Z7
44-45	Alpha when pos. 51 is B or L, must be blank when pos. 51 is T.	AN
48	Alpha A through M less I.	XO
49	Alpha A-H, J-N, P-S, X, numeric 0-9 or blank.	HB
51	Alpha B, L, or T only.	Z7
67-69	Alpha/numeric, may not be blank.	AB
79-80	Must contain 1A, 1B or 1C.	CF

NOTE: With Action Code 1C, enter pos. 1-6, 8-20, 67-69 and 79-80 only.

b. Card 2

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	Alpha/numeric, may not be blank.	AC
8-20	All numeric/all numeric, other than pos. 14 may be A, B, J, L, or S.	AY
67-69	Alpha/numeric, may not be blank.	AB
79-80	Must contain 2A or 2B.	CF

NOTE: Enter nomenclature (pos. 21-66 and 70-73) if available; otherwise, leave blank.

APPENDIX B-16

COMMISSARY SUPPORT PLANNING CARD

1. This card is provided by the DSC to the defense depot to permit identification of van requirements for a particular requisition/shipment cycle of commissary support items. This card format will be transmitted via AUTODIN.

2. A separate card will be provided for each compatibility code with consignee and will be documented on the F-73 Report.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CKJ.
Routing Identifier Code	4-6	Enter the appropriate RIC applicable to the defense depot to which transaction is directed.
Consignee	7-12	Enter DoDAAD Code of Commissary.
Transportation Compatibility Code	13	Enter appropriate code from appendix A-68.
Total Lines	14-19	Enter total number of requisitions for each compatibility code within consignee.
Total Pieces	20-25	Enter total number of pieces (cases) for each compatibility code within consignee.
Total Weight	26-32	Enter total weight (pounds) in whole numbers for each compatibility code within consignee.
Total Cube	33-39	Enter total cube (cubic feet) in whole numbers for each compatibility code within consignee.
Total Tons	40-46	Enter total tons, last position is tenths of tons, for each compatibility code within consignee.
Required Delivery Date	47-49	Enter RDD of Requisition Cycle.
DICOMSS Cycle Code	50	Enter appropriate code from appendix A-30.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Type of Item Code	51	Enter appropriate code from appendix A-31.
Plus/Minus Indicator	52	Enter M for minus quantities or leave blank.
Blank	53-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter the code applicable to the DSC (S9S) originating the transaction.
Blank	70-80	Leave blank.

4. VALIDATION

Violation rejects will be listed in appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	Alpha/numeric, may not be blank.	AC
14-19	Must be numeric, may be all zeros.	Z9
20-25	Must be numeric, may be all zeros.	Z9
26-32	Must be numeric, may be all zeros.	Z9
33-39	Must be numeric, may be all zeros.	Z9
40-46	Must be numeric, may be all zeros.	Z9
51	Alpha B, L or T only.	Z7
52	Must be M or blank.	Z7
67-69	Alpha/numeric, may not be blank.	AB

APPENDIX B-17

MRO CANCELLATION/FOLLOWUP ON CANCELLATION REQUEST

1. This card, prepared on DD Form 1348m, is submitted by DSCs to cancel Materiel Release Orders, or as a followup on a Cancellation Request. Process covered by D-43.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Type of Request is indicated by DIC: AC6 indicates cancellation. AK6 indicates followup on cancellation.
Routing Identifier Code (To)	4-6	Reflects the RIC of the distribution depot to which the MRO has been forwarded.
Media and Status Code	7	Reflects the code as shown on the MRO.
National Stock Number	8-20	Reflects the NSN as shown on the MRO.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Reflects the UI as shown on the MRO.
Quantity	25-29	Reflects the quantity for which cancellation is requested.
Document Number	30-43	Reflects the document number for which cancellation is requested.
Suffix or Demand Code	44	Reflects the suffix code, if applicable.
New Consignee DoDAAD Code	45-50	Reflects the DoDAAD Code of the new consignee to which shipments are to be diverted. Otherwise, leave blank. (See Note.)

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Other Fields	51-66	The data in the MRO (pos. 51-66) will be included on the cancellation/followup.
Routing Identifier Code (From)	67-69	Reflects appropriate RIC (From)
Blank	70-72	Leave blank.
Type of Pack Code/DICOMSS Cycle Code	73	Reflects the code as shown on MRO leave blank.
Blank	74-80	Leave blank.

NOTE: Storage facilities requiring diversion instructions in the instances when pos. 45-50 are blank will request diversion instructions from the activity designated by the RIC in pos. 67-69.

4. VALIDATION

Violation rejects will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
25-29	Numeric, not all zeros.	AS
67-69	Alpha/numeric and must be in the Table and Control File.	AB

APPENDIX B-18

PREPOSITIONED MATERIEL RECEIPT CARD (PROCUREMENT INSTRUMENT SOURCE)

1. This card, prepared on DD Form 1486, is originated by the DSC. It is forwarded to the distribution depot where it provides a notification of materiel due-in and is used to prepare the Materiel Receipt Card when the materiel is received. This format is also used by depot personnel in the preparation of Local Prepositioned Materiel Receipt File Update or Change actions. The processing of this card is covered by D-45.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter appropriate DU_.
Routing Identifier Code (To)	4-6	Enter RIC of DSC to which receipt is to be reported.
Blank	7	Leave blank.
Stock Number	8-20	Enter the Stock Number of the materiel to be received.
Blank	21	Leave blank.
Type of Pack Code	22	Enter type of pack code, if applicable. May not be blank if pos. 6 equals S or U.
DICOMSS Cycle Code	(22)	Enter appropriate code from appendix A-30.
Unit of Issue	23-24	Enter the UI abbreviation of the item to be received.
Quantity	25-29	Enter the quantity of the item to be received preceding significant digits with zeros.
Procurement Instrument Identification Number	30-42	Enter applicable Procurement Instrument/Identification Number.
Blank	43	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Suffix Code	44	Enter consecutive alpha A through Z as necessary if separate Prepositioned Materiel Receipt Cards are required because quantity exceeds 99,999.
Blank	45-59	Leave blank on DICOMSS item.
Item Number	(45-50)	Identify the contract/exhibit line item number or subline item number as follows:
Contract/Exhibit Line Item Number	(45-48)	CONTRACT LINE NUMBER: Enter the contract line item number, beginning in pos. 48 and preceding significant digits with zeros. EXHIBIT LINE ITEM NUMBER: Enter the alphabetic exhibit identifier in pos. 45. Enter the exhibit line number in pos. 46 through 48, beginning with pos. 48 and preceding significant digits with zeros.
Contract/Exhibit Subline Item Number	(49-50)	Enter the contract or exhibit subline item number beginning in pos. 50, if applicable; otherwise, leave blank.
Blank	(51-53)	Leave blank.
Distribution Code	(54-56)	Enter directive/project number, if applicable; otherwise, leave blank.
Project Code	(57-59)	Enter MILSTRIP project code, if applicable; otherwise, leave blank.
Blank	60-66	Leave blank, if other than DICOMSS.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
DICOMSS Unit Price	(60-66)	Enter unit price; two whole numbers, and five decimal or cents figures (i.e., 0105500). Last position will be zero fill. Decimal will be assumed.
Routing Identifier Code (From)	67-69	On initial PMRCs and local update documents, enter the appropriate code which identifies the distribution depot at which the materiel is to be received. On PMRC rejects, perpetuate data elements as received.
Ownership/Purpose Code	70	Enter ownership/purpose code of item to be received.
Condition Code	71	Enter condition code of item to be received.
Management Code	72	On initial PMRCs and local update actions, enter appropriate management code: A - DICOMSS Item E - Inspection and acceptance at origin D - Inspection and acceptance at destination F - Inspection at origin, acceptance at destination
Date	73-75	Enter last digit of calendar year and two-digit month to signify estimated delivery date, e.g., 406 means 1964, month of June.
Blank	76	Leave blank.
Supplementary PIIN	77-80	Enter Supplementary PIIN (SPIIN) if applicable. SPIIN is required if A, D or G is present in the 9th position (pos. 38) of the PIIN.
Blank	(77-80)	Leave blank on DICOMSS Item.

NOTE: When cancellation of Prepositioned Materiel Receipt Card is required, an identical card with an X overpunch in pos. 25 will be forwarded to the recipient of the original card, by the DSC. When cancellation of a PMRC is to be effected locally, DU_ with an X overpunch in pos. 25 will be used. Validation of PMRC cancellations will be limited to the NSN, quantity, and estimated delivery date.

3. VALIDATION

Violations will appear on the appendix F-85 report.

FIELD POSITION	VALIDATION	VIOLATION CODE
3	Alpha M, S, T, U, V or Z.	AA
4-6	Alpha/numeric and compatible with pos. 67-69 or correctable using the following table:	AC

pos. 67-69 then 4-6 is:

S_C	S9C
S_E	S9E
S_C	S9C
S_E	S9E
S_G	S9G
S_I	S9I
S_1	S9M
S_M	S9M
S_S	S9S
S_T	S9T

8-20	Numeric other than all zeros, except pos. 14 may contain A, B, J, L, or S for DICOMSS.	AY
22	Blank, 1, 2, 4; if DICOMSS, alpha A through Z except O, 6, or blank. May not be blank if pos. 6 is equal to S/U. See note.	CK/4K
23-24	Alpha.	AN
25-29	Numeric other than all zeros. Field position 25 may contain X overpunch.	AS
30-43	Alpha/numeric (no imbedded blanks or special characters).	AI
45-50	Alpha/numeric, pos. 45-48, numeric greater than zero, pos. 49-50 alpha/numeric. If DICOMSS (A in pos. 72) may be blank.	JI

FIELD POSITION	VALIDATION	VIOLATION CODE
67-69	Alpha/numeric.	AB
71	Alpha A, B, C, D, E, F or G.	AF
73-75	Numeric.	HP
77-80	Alpha/numeric or blank. May not be blank if A, D or G is present in the 9th position (pos. 38) of the PIIN.	EX

NOTE: DICOMSS PMRC'S (A in cc 72) for Navy Locations. May reflect valid Numeric Type Pack Code in lieu of cycle Code Identification.

APPENDIX B-19

PREPOSITIONED MATERIEL RECEIPT CARD (OTHER THAN PROCUREMENT INSTRUMENT SOURCE)

1. The Prepositioned Materiel Receipt Card (PMRC) (DD Form 1486) is originated by the DSC. It is forwarded to the distribution depot where it provides a notification of materiel due-in and is used to prepare the Materiel Receipt Card when the materiel is received. This format is also used by depots for local Prepositioned Materiel Receipt File update or change actions.

2. The following entries will be made when preparing the PMRC for materiel due-in from other than procurement sources or the local Prepositioned Materiel Receipt File update actions.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter a DIC from the DW_ series.
Routing Identifier Code (To)	4-6	On Initial PMRCs and local update documents, enter the appropriate RIC which identifies the DSC to which the receipt will be reported.
Blank	7	Leave blank.
National Stock Number	8-20	Enter NSN of the item to be received.
Blank	21	Leave blank.
Type of Pack Code	22	Enter type of pack code, if applicable.
Unit of Issue	23-24	Enter the UI abbreviation of the item to be received.
Quantity	25-29	Enter the quantity to be received preceding significant digits with zeros.
Document Number	30-43	Enter the document number constructed in accordance with appendix C-2.
Blank	44	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Supplementary Address	45-50	Enter supplementary address; otherwise, leave blank.
Signal Code	51	Enter signal code; otherwise, leave blank.
Fund Code	52-53	Enter fund code; otherwise, leave blank.
Distribution Code	54-56	Enter directive/project order number, if applicable; otherwise, leave blank.
Project Code	57-59	Enter MILSTRIP project code, if applicable; otherwise, leave blank.
Blank	60-66	Leave blank.
Routing Identifier Code (From)	67-69	On initial PMRCs and local update documents, enter RIC identifying distribution depot which is to receive item. On PMRC rejects, perpetuate data element as received.
Ownership/Purpose Code	70	Enter O/PC of item to be received.
Condition Code	71	Enter condition code of item to be received.
Blank	72	Leave blank.
Date	73-75	Enter last digit of calendar year and two-digit month signifying estimated delivery date e.g., 406 means 1984, month of June.
Blank	76-78	Leave blank.
Reverse Billing Code	79-80	Enter RB when materiel is receipt from cancellation diversion.

NOTE: When cancellation of Prepositioned Materiel Receipt Card is desired, an identical card with an X overpunch in pos. 25 will be forwarded to the recipient of the original card, by the DSC. When cancellation of a PMRC is to be effected locally, DW_ with an X overpunch in pos. 25 will be used.

4. VALIDATION

Violations will appear on appendix F-085 report.

FIELD POSITION	VALIDATION	REJECT CODE
3	Alpha A through Z, except F, I, O, W, and Y.	AA
4-6	Alpha/Numeric are compatible with pos. 67-69 or correctable using the following table: pos. 67-69 then 4-6 is: S-C S9C S-E S9E S-G S9G S-I S9I S-1 S9M S-M S9M S-S S9S S-T S9T	AC
8-20	Numeric.	AY
22	Blank, 1, 2 or 4.	CK
23-24	Alpha.	AN
25-29	Numeric other than all zeros. Field Position 25 may contain X overpunch.	AS
30-43	Alpha/Numeric (no imbedded blanks or special characters).	AI
45-50	Alpha/Numeric or all blanks.	BJ
67-69	Alpha/Numeric.	AB
71	Alpha A, B, C, D, E, F, G or DIC DWK may contain J.	AF
73-75	Numeric.	HP
77-80	All blanks; or blank, blank RB.	EX

APPENDIX B-20

MATERIEL RECEIPT CARD
(PROCUREMENT INSTRUMENT SOURCE)

1. This card, prepared on DD Form 1486, Materiel Receipt Document, is originated by the distribution depot and is the document by which the receipt of materiel is reported to the cognizant DSC.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter the appropriate D4_ series. When PMRC is available, perpetuate third position from the PMRC.
Routing Identifier Code (To)	4-6	Enter (or perpetuate) the RIC which identified the DSC which will process the MRC.
Blank	7	Leave blank.
National Stock Number	8-20	Enter (or perpetuate) the NSN of the materiel received.
Blank	21	Leave blank.
Type of Pack Code	22	Enter type of pack code, if available.
DICOMSS Cycle Code	(22)	Enter appropriate code from appendix A-30.
Unit of Issue	23-24	Enter (or perpetuate) the catalog UI of the item received.
Quantity	25-29	Enter the quantity of the item received preceding significant digits with zeros.
Procurement Instrument or Contract Number	30-42	Enter (or perpetuate) contract or procurement instrument number.
Blank	43	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Suffix Code	44	Enter consecutive alpha A through Z as necessary if separate MRCs are required because quantity exceeds 99,999 or because different conditions of materiel are received; otherwise, leave blank.
Item Number	45-50	Identify the contract/exhibit line item number or subline number as follows:
Contract/Exhibit Line Item Number	(45-48)	CONTRACT LINE NUMBER: Enter the contract line item number, beginning in pos. 48 and preceding significant digits with zeros. EXHIBIT LINE ITEM NUMBER: Enter the alphabetic exhibit identifier in pos. 45. Enter the exhibit line number in pos. 46-48, beginning with pos. and preceding significant digits with zeros.
Contract/Exhibit Subline Item Number	(49-50)	Enter the contract or exhibit subline item number beginning in pos. 50, if applicable; otherwise,zero fill.
Blank	51-53	Leave blank.
Distribution Code	54-56	Enter directive/project number, if applicable; otherwise, leave blank.
Project Code	57-59	Enter (or perpetuate) MILSTRIP project code; otherwise, leave blank.
Teleprocessing Control Number	60-66	Enter the TP Control Number in pos. 61-66 with zero in pos. 60 for Commodity Managers C, E, G, I and M.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Shipment Number or	(60-66)	Enter Vendor Shipment Number or GFM Number shown on shipping document, preceding significant digits with zeros. If Commodity Manager is other than C, E, G, I or M, this field may be blank.
DICOMSS Unit Price	(60-66)	Enter DICOMSS Unit Price, two whole positions and five decimal/cents positions: The last position will be zero fill applicable only for DICOMSS receipts.
Routing Identifier Code (From)	67-69	Enter the appropriate RIC which identifies the distribution depot at which the materiel was received.
Ownership/Purpose Code	70	Enter (or perpetuate) code in PMR C; otherwise, leave blank.
Condition Code	71	Enter (or perpetuate) condition code of item received.
Management Code	72	Enter management code, if applicable; otherwise, leave blank.
Date	73-75	Enter Julian date when materiel is received at unloading dock.
Blank	76	Leave blank.
Supplementary PIIN	77-80	Enter Supplementary PIIN, if applicable.

3. VALIDATION

Computer prepared output transaction.

4. Materiel Receipt Card (MRC) - Depot to DPSC (frustrated stocks) DICOMSS.

The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter D4S.
Routing Identifier Code (To)	4-6	Enter S9S.
Blank	7	Leave blank.
Stock Number	8-20	Enter NSN or Brand Name stock number.
Blank	21	Leave blank.
Type of Pack Code	22	Enter type of pack code, if available.
Unit of Issue	23-24	Enter UI of item frustrated.
Quantity	25-29	Enter quantity of frustrated item on hand.
PIIN	30-42	
	(30-35)	Enter DLAH.
	(36-37)	Enter last 2 positions of fiscal year.
	(38)	Enter constant Z.
	(39-42)	Enter serial number starting with 0001.
Blank	43	Leave blank.
Suffix Code	44	Enter suffix code.
Item Number	45-50	Enter contract line item number.
Blank	51-56	Leave blank.
Project Code	57-59	Enter project code or leave blank.
DICOMM Unit Price	60-66	Enter DICOMSS Unit Price, last position will be zero fill or leave blank.
Routing Identifier Code (From)	67-69	Enter SAS/SBS as appropriate.
Ownership/Purpose Code	70	Enter constant A.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Condition Code	71	Enter appropriate code.
Management Code	72	Enter management code, if applicable; otherwise, leave blank.
Date	73-75	Enter current date as the acceptance date.
Blank	76	Leave blank.
Supplementary PIIN	77-80	Enter Call/Order Number for L Code requirements, contracts, if available.

NOTE: A manually prepared output to the DSC.

APPENDIX B-21

MATERIEL RECEIPT CARD
(OTHER THAN PROCUREMENT INSTRUMENT SOURCE)

1. This card is prepared on DD Form 1486, Materiel Receipt Document, by the distribution depot to report the receipt of materiel to the cognizant DSC.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter the appropriate D6_ series; when available, perpetuate third position.
Routing Identifier Code (To)	4-6	Enter (or perpetuate) the RIC of the DSC to which the card is being forwarded.
Blank	7	Leave blank.
National Stock Number	8-20	Enter (or perpetuate) NSN of item received.
Blank	21	Leave blank.
Type of Pack Code	22	Enter type of pack code, if applicable.
Unit of Issue	23-24	Enter (or perpetuate) the catalog UI of the item received.
Quantity	25-29	Enter quantity received, preceding significant digits with zeros.
Document Number	30-43	Enter (or perpetuate) controlling document number (see appendix C-2).
Suffix Code	44	Enter consecutive alpha A through Z, as necessary, if different conditions of materiel are received; otherwise, leave blank.
Supplementary Address	45-50	Enter (or perpetuate) supplementary address; otherwise, leave blank.
Signal Code	51	Enter (or perpetuate) signal code; otherwise, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Fund Code	52-53	Enter (or perpetuate) fund code; otherwise, leave blank.
Distribution Code	54-56	Enter directive/project number, if applicable; otherwise, leave blank.
Project Code	57-59	Enter (or perpetuate) MILSTRIP Project Code; otherwise, leave blank.
Teleprocessing Control Number	60-66	Enter the TP control number in pos. 61-66 with zero in pos. 60 for Commodity Managers C, E, G, I, M and T. Otherwise, leave blank.
Routing Identifier Code (From)	67-69	Enter (or perpetuate) the RIC identifying the distribution depot at which item is received.
Ownership/Purpose Code	70	Perpetuate O/PC shown in PMRC; otherwise, leave blank.
Condition Code	71	Enter actual condition code of the item received.
Management Code	72	Enter management code; otherwise; leave blank.
Date	73-75	Enter Julian date materiel is received at unloading dock.
Blank	76-80	Leave blank.
Blank	(76-77)	Leave blank.
Reverse Billing Code	(79-80)	Enter RB when materiel is receipt from cancellation diversion.

NOTE: Based on inspection, separate Materiel Receipt Cards, indicating the actual condition of the materiel received, will be prepared by the distribution depot.

3. VALIDATION

Computer prepared output transaction.

APPENDIX B-22

MATERIEL ADJUSTMENT DOCUMENT

1. This document is prepared on DD Form 1487 for Condition Code adjustments. When Condition Code D, E, F, G, J, K or L materiel is reported to DSCs, as a result of an input ZAC or a receipt transaction, a partially completed Materiel Adjustment Card is produced for use in reclassification.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS	INTERPRETER PRINT SPACES UPPER	LOWER
Document Identifier Code transmission to	1-3	Enter DAC (for the DSC/ICP).	1-3	
		Enter ZAC (for output and reinput in control of suspended materiel).		
Routing Identifier DSC/depot to take (To)	4-6	Enter RIC of the action.	4-6	
Blank	7	Leave blank.		
National Stock Number	8-20	Enter the NSN of the item being adjusted.	8-20	
Blank	21	Leave blank.		
Type of Pack Code	22	Enter type of pack code when appropriate.	22	
DICOMSS Cycle Code	(22)	Enter appropriate code from appendix A-30.		
Unit of Issue	23-24	Enter UI in current published catalogs.		
Reversal	25	Leave blank (Block H).		
Quantity	25-29	Enter quantity to be adjusted. (See note 1.)		

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS	INTERPRETER PRINT SPACES UPPER LOWER
Document Number (See note 5.)	30-43	For reclassification of previously suspended receipts, enter the document number under which the materiel originally was received. For other adjustments, enter:	30-43
	(30)	Service Assignment Code S.	
	(31-35)	DSC Activity Address Code.	
	(36-39)	Julian date.	
	(40-43)	Serial Number.	
Suffix Code	44	Enter Suffix (when quantity exceeds 99,999). For reclassification of previously suspended receipts, enter Suffix Code under which the materiel was originally received.	44
Contract Line Item Number	45-50	Enter CLIN. Can be blank if required to adjust a station return for which a CLIN is not provided.	45-50
Signal Code	51	Leave blank.	
Fund Code	52-53	Enter appropriate code for Inter-Service/Agency use. For Inter-Service/Agency use, leave blank.	
Distribution Code	54-56	Enter appropriate MILSTRIP distribution code if stocks are segregated and maintained by codes reflected in the distribution field; otherwise, leave blank.	
Supplementary PIIN	(51-54)	Enter Supplementary PIIN, DIC ZAC only. (See note 5.)	

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS	INTERPRETER PRINT SPACES UPPER	LOWER
Blank	(55-56)	Leave blank, DIC ZAC.		
Project Code	57-59	Enter project code, if applicable.	37-39	
Blank	60-65	Leave blank.		
Warehouse Location	60-71	Enter Warehouse Location Code when Action Code, pos. 79-80, is RB (DIC ZAC only).		
Condition Code	(66)	Enter the To Condition Code. (See note 2.)	46	
Routing Identifier (From)	(67-69)	Enter RIC of the distribution depot/DSC (if pos. 1-3 is DAC).	47-49	
Condition Code	(71)	Enter Condition Code From.		
Management Code	72	Enter Management Code. (See note 4.)	52	
Date	73-75	Entered by computer if left blank on DIC ZAC (see note 3).	53-55	
Condition Code	76	Single adjustment: Enter From Condition Code.	56	
Supplementary PIIN	77-80	Enter Supp PIIN, DIC DAC only.		
Blank	(77-78)	Leave blank, DIC ZAC only.		
Action Code	(79-80)	Enter applicable Action Code (appendix A-42), DIC ZAC only.		

NOTE 1: This field will be left blank when initially prepared by computer (DIC ZAC). Upon completion of reclassification of previously suspended receipts, enter quantity to be adjusted.

NOTE 2: This field will be left blank when initially prepared by computer (DIC ZAC). Upon completion of reclassification of previously suspended receipts, enter the To Condition Code. If DAC pos. 1-3, Condition Code must be L.

NOTE 3: When DAC is output to DSC, pos. 73-75 will be left blank and the current date is entered by computer.

NOTE 4: The Management Code field will be left blank when initially prepared by computer (DIC ZAC), or Management Code will be blank or B if DIC DAC.

NOTE 5: When DAC is being prepared for latent defects discovery, supplementary PIIN will be output in pos. 77-80, when available. Supplementary PIIN is input in pos. 51-54 of ZAC to establish suspense. When pos. 38 of ZAC is A or D, pos. 45-50 (CLIN) and 51-54 (Supplementary PIIN) must contain valid data; when pos. 38 is other than A or D, require CLIN in pos. 45-50.

3. Validation

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	Routing Identifier Code (To) alphanumeric.	AC
8-20	National Stock Number all numeric other than all zeros (no blanks).	AY
(12) 22	Alpha A, B, J, L, and S valid, DICOMSS depots only. Type of Pack Code 1, 2, 4, or blank. If identified as DICOMSS and manager is other than S or U Type Pack Code will be blank.	CK
(22)	DICOMSS Cycle Code alpha, numeric 6, or blank.	4K
23-24	UI - Alpha/alpha (blank if Action Code is RB).	AN
25-29	Quantity - Numeric other than all zeros. Blank if Action Code is RC or RB.	AS
30-43	Document Number - At least one pos. contains something other than blank.	AI
44	Suffix Code - Alpha.	AI
51-54	Supplementary PIIN - When pos. 38 is A, D or G must be alpha, numeric or alphanumeric filled, no blanks.	EX
60-71	Must contain valid Warehouse Location Code when is RB (DIC ZAC only).	AP/Z9
66	Condition Code To - A through N except I.	AF
67-69	RIC (From) - Alphanumeric.	AB

FIELD POSITION	VALIDATION	VIOLATION CODE
71	Condition Code (From) - A through N except I (DAC only).	
72	Management Code - When Condition Code To (pos. 66) is H, Management Code must be M, J, T or E.	AW
73-75	Must be blank or numeric, if numeric it must be greater than zero, less than 367, (DIC ZAC only).	13/Z9
76	Condition Code (From) - A through N except I. Enter condition code of established record if Action Code is RB or RC.	AF
77-80	Supplementary PIIN (DIC DAC only) - When pos. 38 is an A or D, must be alpha, numeric, or alphanumeric filled, no blanks.	EX
(79-80)	Action Code - RA when Condition Code To (pos. 66) is D, E, F, G, L or J. Blank when Condition Code to (pos. 66) and Condition Code from (pos. 71) is other than J, K or L. Action Code - RK when Condition Code from (pos. 71) is D, E, F, G, J, K or L and the Classification Suspense File is not to be updated. (Blank Action Code and RK Action Code will not update the Classification Suspense Record). Action Code - RL when Condition Code To (pos. 66) is D, E, F, G, J, K or L.	CF

APPENDIX B-23

STORAGE ITEM CHANGE CARD

1. This card is used by the DSC to notify the MOWASP Data Bank (MDB) of changes to the Federal Catalog which may effect items in stock at the depot. The Storage Item Change Card will be transmitted to the MDB 45 days in advance of the Catalog Publication Date for all NSN changes. This card is also used to notify attrition sites of selected changes that effect DLA-owned assets stored at the attrition sites. Storage Item Change Cards will not be furnished to SSDs/DSSPs, Navy or Marine Corps attrition sites, nor to Army or Air Force attrition sites when that Service is a recorded user of the NSN.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter the applicable DIC: CMC - To indicate a change in data other than the NSN. CMD - To indicate that the NSN has been deleted and not replaced. The NSN will be entered both in pos. 5-17 and pos. 22-34. CML - To indicate a NSN change and a Logistic Transfer (loss) was made from managing activity in pos. 18-19 to managing activity in pos. 20-21. This DIC is used by the losing activity. CMM - To indicate that the unchanged NSN has been logistically transferred from the managing activity reflected in pos. 18-19 to the managing activity reflected in pos. 20-21. This DIC is used by the losing activity.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		CMN - To indicate that a new or reinstated NSN has been established in the DSC system. The managing activity reflected in pos. 18-19 and the managing activity reflected in pos. 20-21 will be the same. DIC CMN will not be passed from MOWASP Data Bank to defense depots. Data is entered on record and held for future reply to depot inquiry.
		CMR - To indicate that the NSN in pos. 5-17 has been deleted or replaced with or changed to the NSN in pos. 22-34. (Phrase Code A, C, or D will be used.)
Phrase Code	4	Phrase Codes (from Federal Manual for Supply Cataloging, M1-71 amplify the DIC and are as follows:
		A - Consolidate the NSN in pos. 5-17 with NSN in pos. 22-34. The items of supply are identical or completely interchangeable and will be issued under the NSN in pos. 22-34.
		C - NSN in pos. 5-17 had been assigned in error to more than one item of supply and has been changed to the NSN in pos. 22-34.
		D - The FSC for the item in pos. 5-17 has been changed to the FSC for the item in pos. 22-34.
National Stock Number	5-17	Enter NSN upon which action is being taken as indicated by pos. 1-3 and pos. 4.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Managing Activity (Current, losing or withdrawing interest)	18-19	Enter the activity code of supply manager from the Federal Manual for Supply Cataloging, M1-6, appendix A.
Managing Activity (Current or gaining)	20-21	Enter gaining managing activity or if there is no change to the managing activity, entry is same as pos. 18-19.
National Stock Number	22-34	Enter NSN as required by pos. 1-3 and pos. 4 above.
Shelf-Life Code	35	Enter applicable code from appendix A-47.
Physical Security Code	36	Enter applicable code from appendix A-28.
Unit of Issue	37-38	Enter current or new UI for NSN in pos. 22-34.
Conversion Factor	39-43	The factor by which old qty must be multiplied to convert to new UI. When used to convert weight and cube, one of the pos. must contain a numeric other than zero, Federal Manual for Supply Cataloging M1-7, appendix E.
	(39)	Enter the decimal locator as follows: 0 - To indicate a whole number (no decimal) 1 - To indicate a decimal before pos. 43 2 - To indicate a decimal before pos. 42 3 - To indicate a decimal before pos. 41 4 - To indicate a decimal before pos. 40
	(40-43)	Enter the multiplication/division factor to be used in conjunction with pos. 39.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	44-52	Leave blank.
Demilitarization Code	53-54	Enter Demil Code.
	(53)	Reserved for expansion of Demil Code. Leave blank.
	(54)	Enter Demil Code, appendix A-35.
Repairability Code	55	Enter R to indicate the item may be repaired; otherwise, leave blank.
Blank	56	Leave blank.
Effective Date	57-60	Enter the Julian date on which this change is to be effective.
Blank	61	Leave blank.
Date of Preparation	62-65	Enter the Julian date on which this card is prepared.
Blank	66	Leave blank.
Routing Identifier Code (From)	67-69	Enter RIC of DSC preparing this card.
Blank	70	Leave blank.
Routing Identifier Code (To)	71-73	Enter RIC SAB for transmittal to MOWASP Data Bank or enter RIC of applicable attrition site storing DLA-owned assets.
Blank	74-80	Leave blank.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
5-17	Stock Number - Numeric filled other than all zeros.	AY
18-19	Manager Code (Losing) - Alpha/numeric filled, no blanks.	HO
20-21	Manager Code (Gaining) - Alpha/numeric filled, no blanks.	HO

FIELD POSITION	VALIDATION	VIOLATION CODE
22-34	Stock Number - Numeric filled other than all zeros for DIC CMR, otherwise may be all blank or numeric filled other than all zeros.	AY
35	Shelf-Life Code - May be blank, numeric, or alpha A through S (except I and O) or X, reference appendix A-47.	HB
36	Physical Security Code - May be alpha U, A, B, C, G, H, J, K, L, M, Q, R, S, T or blank.	MW
37-38	Unit of Issue - Must be alpha/alpha or blank. Must be other than blank if pos. 40-43 contains other than blanks.	AN
39	Decimal Locator - Must be blank or numeric 0, 1, 2, 3 or 4.	MX
40-43	Conversion Factor - Blank or all numeric other than all zeros.	VU
57-60	Effective Date - Must be numeric, equal to or greater than current date (see note).	KZ

NOTE: The only violation that should occur at the depot will be those instances where effective date is less than current date. To process these violations, the effective date must be changed to be greater than current date and the transaction reentered.

APPENDIX B-24

SHIPMENT STATUS CARD

1. This card format is used to provide shipment status for Materiel Release Orders and Disposal Release Orders received (appendices B-7 and B-32). Cards are prepared after shipping action has occurred.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter the AS8 Code applicable to shipment status. Reply to cancellation request. Enter AU7 in answer to AC7 of MRO closed in history less than 45 days.
Routing Identifier Code (To)	4-6	Enter the RIC of the supply source from which the MRO/DRO/Cancellation request was received.
Media and Status Code	7	Enter the code as shown on applicable MRO/DRO/Cancellation request.
National Stock Number	8-20	Enter the NSN of the item supplied.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter the UI for the item supplied.
Quantity	25-29	Enter the quantity of item supplied.
Document Number	30-43	Enter the document number as shown on the MRO/DRO/Cancellation request.
Suffix Code	44	Enter suffix code, if applicable.
Supplementary Address	45-50	Enter the coded address as shown on the MRO. DoDAAC of predesignated DPDO to be entered by the shipping activity for shipments to DPDO.
Hold Code	51	Enter the type of hold code, when applicable.
Fund Code	52-53	Enter the fund code from MRO/DRO/Cancellation request.
Distribution Code	54-56	Enter the code as shown on the MRO/DRO/Cancellation request.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Date Shipped	57-59	Enter date delivered to carrier.
Priority Designator	60-61	Enter code as shown on the release order.
TCN, GBL, or other Shipment Unit Number	62-76	a. Enter the TCN (see note 1) for inland shipment to the POE, LOGAIR, QUICKTRANS, and unregistered parcel post; enter the consignor, Code B, and GBL number for all inland shipments whose final destination is within the CONUS; enter the consignor, Code R and registration number on registered parcel post; enter consignor, letter I, and insured number on insured parcel post (see note 2). b. Enter the consignor, letter U, and the daily pickup record number of the small package carrier (if no GBL or CBL number is used) for shipments to CONUS, Alaska and Hawaii consignees. c. For FMS transactions, which are made on a commercial bill of lading and subparagraph a above does not apply, enter the FMS Notice Number shown in pos. 62-76 of the Notice of Availability (appendix B-53). d. For SEAVAN shipments the TCN assigned to the SEAVAN load will be entered.
Mode of Shipment Code	77	Enter the appropriate code identifying the mode of shipment (see appendix A-17).
POE	78-80	a. CONUS. Leave blank. b. Overseas. (1) For shipments moving to overseas destinations via Defense Transportation System (DTS) (LOGAIR, QUICKTRANS, MTMC, MSC, MAC); and GBL/CBL, parcel post (execpt AAPO/

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		FPO) and small package carrier shipments entering the DTS at the POE - enter the POE or Seavan consolidation and containerization point (CCP). See DoD 4500.32-R, appendix B. (2) Leave blank for parcel post movement through an APO or FPO. (3) Enter the POE for FMS or Grant Aid transactions moving via DTS. If not moving via the DTS, leave blank.

NOTE 1: Enter lead document number in pos. 62-76. Entries will be as follows: Requisitioner (less Service Code), date of requisition, serial number of requisition, suffix from requisition, and only one-digit partial shipment indicator.

NOTE 2: The registration/insured number field (pos. 69-76) will be completely punched right to left. If there are less than eight digits in the number, the significant digits will be preceded by zeros.

NOTE 3: To assign POE for MOWASP do as follows:

a. If PP Zone of MRO other than 9, leave POE blank.

b. If PP Zone of MRO equal 9 and Mode of Shipment other than G, H, 6, 7, 5 or J use POE from MOFAST S/U record in 78-80.

3. VALIDATION

Computer prepared output transaction.

APPENDIX B-25

PHYSICAL INVENTORY COUNT TRANSACTION

1. This transaction is used to forward the summarized count to the DSC/ICP.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DKA.
Routing Identifier Code (To)	4-6	Enter RIC identifying activity to which card is being forwarded.
Type of Physical Inventory/ Transaction History Code	7	Enter (or perpetuate) the Type of of Physical Inventory/Transaction History Code.
National Stock Number	8-20	Enter NSN of item counted.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter U/I of stock number counted.
Quantity	25-34	Enter the quantity counted preceding significant digits with zeros; leave blank if total count is zero.
Count Date	35-38	Enter the numerical date on which the count is accepted (YDDD).
Blank	39-59	Leave blank.
Count Number	60	Enter numeric digit to indicate the number of counts taken.
Physical Inventory Cutoff Date	61-64	Enter (or perpetuate) the date established for striking the accountable record balance (YDDD).
Blank	65-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter the RIC identifying the storage activity from which the transaction is being forwarded.
Blank	70	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Condition Code	71	Enter (or perpetuate) supply condition code of the item counted.
Management Code	72	Enter inventory management code; otherwise, leave blank.
Multi-use	73-75	For intra-Service/Agency use, enter data prescribed by Service/Agency. For inter-Service/Agency use, leave blank.
Error Classification Code	(73-75)	
	(73-74)	Enter appropriate DoD assigned Error Classification Code; otherwise, leave blank.
	(75)	Enter intra-Service/Agency assigned code amplifying the DoD Error Classification Code; otherwise, leave blank.
Blank	76-78	Leave blank.
Subsistence Type of Pack Code	79	For Subsistence Item only: Enter the applicable Subsistence Type of Pack Code (see MILSTRIP, Appendix B-23).
Blank	80	Leave blank.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Alpha A, C, D, E or F.	EK
8-20	Numeric filled.	AY
23-24	Alpha filled.	AN
25-34	Numeric filled leading zeros or blank.	AS
35-38	Numeric filled.	IM
60	Numeric 1, 2, 3.	2P

FIELD POSITION	VALIDATION	VIOLATION CODE
61-64	Numeric filled, less than current date.	BQ
71	Alpha filled, except H or K.	AF
72	Alpha or blank.	AW
79	Numeric filled if subsistence item.	CK

best copy available

APPENDIX B-26

PHYSICAL INVENTORY REQUEST CARD

1. This card is prepared by DSC and transmitted to distribution depots as the result of a denial, to schedule inventories quarterly and to request a Special or Spot inventory. Depots may inventory an individual stock number by using DIC ZJA with Type of Physical Inventory Code C.

2. This card is also used by non-DLA ICPs to initiate an inventory. The request may be received via a letter through the mail or transmitted electronically. Those cards which are transmitted will be loaded to the Inventory Workload Bank automatically. Those received through the mail will be manually input at the distribution depot.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DJA for DSC initiated inventories. The depot will enter DJA to initiate an inventory for non-DLA items. Enter ZJA for depot initiated inventories.
Routing Identifier Code (To)	4-6	Enter RIC identifying storage activity to which card is being forwarded. Leave blank if pos. 1-3 is ZJA.
Type of Physical Inventory/ Transaction History Code	7	Enter the appropriate type of Physical Inventory/Transaction History Code.
National Stock Number	8-20	Enter NSN of item to be counted.
Blank	21-22	Leave blank.
Unit of Issue (UI)	23-24	Enter UI of item to be counted.
Blank	25-34	Leave blank.
Physical Inventory Infloat Control Data	35-38	Enter the numerical date established for initiating controls or all in-process transactions or materiels which could effect the outcome of the inventory. This date must precede the Physical Inventory

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		Cutoff Date entered in pos. 61-64 by at least five days. This field may be blank if pos. 1-3 is ZJA.
Blank	39-46	Leave blank.
Priority Code	47-52	Enter applicable priority code. Leave blank if pos. 1-3 is ZJA.
Blank	53-60	Leave blank.
Physical Inventory Cutoff Date	61-64	Enter the date established for striking the accountable record balance. Enter zeros when action is result of Reconciliation programs (YDDD).
Blank	65-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter the RIC Code identifying the activity from which the transaction is being forwarded.
Ownership/Purpose Code	70	Leave blank.
Condition Code	71	Enter the applicable supply condition code of the item to be counted when Type of Physical Inventory/Transaction History Code D or F is entered in pos. 7; otherwise, leave blank.
Management Code	72	Enter Mgt. Code C for inventory of non-DLA Stock. Enter the following if Special Inventory Request is result of locator reconciliation audit:

CODE	DEFINITION
A	For those items with balances and for which no Locator Reconciliation Cards were received.
B	For those items for which Locator Reconciliation Cards were received but have no recorded balance.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	73-78	Leave blank.
Subsistence Type of Pack Code	79	For Subsistence Items only: Enter the applicable Subsistence Type of Pack Code.
Blank	80	Leave blank.

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	RIC of this depot or blank if pos. 1-3 is ZJA.	AC
7	Alpha A, C, D, E or F; if pos. 1-3 is ZJA, alpha A is only allowed for Mgr. S.	EK
8-20	Numeric filled other than all zeros, except pos. 14 may contain A, B, J, L or S for DICOMSS.	AY
23-24	Alpha filled.	AN
35-38	If filled, numeric and must precede date in pos. 61-64 by 5 days; blank if pos. 1-3 is ZJA.	BQ
47-52	Numeric filled if pos. 7 of DJA is A; otherwise, leave blank.	DH
61-64	Zero filled if pos. 7 of DJA is A; otherwise, numeric filled at least 5 days greater than current date or blank.	BQ
67-69	Alpha/numeric filled.	AB
71	Alpha filled when pos. 7 is D or F; otherwise, blank.	AF
72	Alpha filled or blank.	AW

APPENDIX B-27

DICOMSS RESIDUAL MATERIEL CARD

1. This card will be prepared by DPSC and forwarded to all DICOMSS depots to indicate residual receipt quantities remaining after all MROs have been generated for the stock item. This data is output on appendix F-92, part 4. Manual processing procedures are contained in appendix E-214 P.

2. This card will also be manually prepared at the depot as a reversal transaction when the full quantity on the DPSC CRS transaction is not available for transfer to residual.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CRS.
Routing Identifier Code	4-6	Enter RIC of applicable DICOMSS depot. If this is a depot prepared transaction enter S9S.
Blank	7	Leave blank.
National Stock Number	8-20	Enter the NSN of the material declared to be residual stock.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter appropriate UI.
Quantity	25-29	Enter the quantity of the item to be declared residual.
Quantity	(25-29)	If this is a reversal transaction enter the quantity difference between the original CRS quantity and the quantity available for transfer to residual. Note: If reversal of original CRS quantity, enter an X overpunch in pos. 25.
Procurement Instrument Identification Number	30-42	Enter the PIIN which will be composed of the constant DLA13H in pos. 30-35 and the order number in pos. 36-42.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	43-59	Leave blank.
Vendor Unit Price	60-66	Enter vendor unit price. Significant figures will be preceded by zeros.
Routing Identifier Code	67-69	Enter RIC S9S. If this is a depot prepared transaction enter the RIC of application DICOMSS depot.
Ownership/Purpose Code	70	Enter ownership or purpose code.
Condition Code	71	Enter condition of item IAW appendix A-16.
Blank	72	Leave blank.
Date	73-75	Enter Julian date.
Cycle Code	76	Enter applicable DICOMSS cycle code IAW appendix A-30.
Supplementary PIIN	77-80	Enter call/order number as appropriate.

3. VALIDATION

Violations will appear on the F-85 report.

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	Alpha/numeric, S9S if X overpunch in pos. 25.	AB
8-20	Numeric, other than all zeros. Field position 14 may contain A, B, J, L or S.	AY
23-24	Alpha.	AN
25	Alpha/numeric.	AS
26-29	Numeric other than all zeros.	AS
30-42		
(30-35)	DLA13H Constant.	AI
(36-42)	Alpha/numeric.	AI

FIELD POSITION	VALIDATION	VIOLATION CODE
60-66	Numeric other than all zeros.	AM
67-69	Alpha/numeric, S9S if no X overpunch in pos. 25.	AB
71	Alpha A through N, except I.	AF
73-75	Numeric.	11
76	Alpha A through Z less O. May not be blank.	4K
77-80	Alpha/numeric or blank.	

APPENDIX B-28

INVENTORY NOTIFICATION EXCEPTION CARD

1. This card is originated by the DSC for transmission to distribution depots. It is created as a result of matching distribution depot Inventory Notification Cards (appendix B-29) with the NIR. DICs CKB, CKC and CKD identify specified differences between DSC records and depot locator files. This card is used by the distribution depot to reconcile discrepancies, cancel inventories, and to remark stocks.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CKB for items which have been reidentified to another NSN by a catalog change. Enter CKC for items for which UI does not correspond with DSCs records. Enter CKD for items when NSN is not currently managed by the DSC or NSN has been deleted/ superseded.
Routing Identifier Code (To)	4-6	Enter RIC of distribution activity performing the location survey.
Blank	7	Leave blank.
National Stock Number or Part Number	8-20	Perpetuate NSN from pos. 8-20 of input card or enter new NSN, as appropriate.
Blank	21	Leave blank.
Type of Pack Code	22	Enter code (subsistence items only).
Unit of Issue	23-24	Enter current UI for NSN in pos. 8-20.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
RIC of Current Inventory Manager	25-27	Enter RIC of current IM as reflected in NIR or DLA Class Table; otherwise, leave blank. When more than one manager is identified in computer files, leave blank.
Multimanager Indicator	28	Enter numeric code 1 to identify items having more than one IM; enter 2 when the managing activity cannot be identified by DSC; otherwise, leave blank.
Blank	29-35	Leave blank.
Date	36-39	Enter Julian date card was prepared.
Blank	40	Leave blank.
National Stock Number (Former)	41-53	If NSN has been superseded, enter former NSN. Obtain from pos. 8-20 of input card; otherwise, leave blank.
Blank	54-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter RIC of DSC preparing this card.
Blank	70-80	Leave blank.

3. VALIDATION

Validation of input from a DLA manager is not required. Validation is made of non-DLA input. Violation rejects will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
8-20	Numeric	AY
23-24	Alpha	AN

APPENDIX B-29

PHYSICAL INVENTORY NOTIFICATION

1. This transaction is computer prepared by the distribution activity and forwarded to DSCs as notification of items selected for inventory.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DJB.
Routing Identifier Code (To)	4-6	Enter the RIC identifying the activity to which the notification is be forwarded.
Type of Physical Inventory/ Transaction History Code	7	Enter the appropriate type of Physical Inventory/Transaction History Code for the requested inventory per appendix A-18 except E or F.
National Stock Number	8-20	Enter NSN of item to be counted.
Blank	21	Leave blank.
Unit of Issue (UI)	23-24	Enter UI of items to be counted.
Blank	25-34	Leave blank.
Physical Inventory Infloat Control Date	35-38	Enter the numerical date established for initiating controls on all in-process transactions and materiels which could affect the outcome of the inventory. This date must precede the Physical Inventory Cutoff Date entered in pos. 61-64 by at least five days.
Blank	39-60	Leave blank.
Physical Inventory Cutoff Date	61-64	Enter the date established for striking the accountable record balance.
Blank	65-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter the RIC identifying the storage activity from which the transaction is being forwarded.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	70	Leave blank.
Condition Code	71	Enter the applicable supply condition code of the item to counted when used with Type of Physical Inventory/Transaction History Code D; otherwise, leave blank.
Management Code	72	Enter the appropriate Management Code; otherwise, leave blank.
Blank	73-78	Leave blank.
Subsistence Type of Pack Code	79	For Subsistence Items only: Enter the applicable Subsistence Type of Pack Code (see MILSTRIP, appendix B-23).
Blank	80	Leave blank.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	Alpha/numeric filled.	AC
7	Alpha filled.	EK
8-20	Numeric filled.	AY
35-38	All numeric; must precede date entered in pos. 61-64 by at least 5 days.	BQ
61-64	All numeric.	BQ
67-69	Alpha/numeric filled.	AB
71	Alpha or blank.	AF

APPENDIX B-30

DEPOT INVENTORY COUNT TRANSACTION

1. This transaction is the document by which the physical count of materiel is performed by the Inventory Function of a distribution depot.

2. Each count transaction will be serially numbered by the computer, and a Count Transaction Summary Listing (appendix F-11) will be provided for internal control purposes.

3. The physical count must be updated through program $$UWMI35.

4. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZKA.
Routing Identifier Code (To)	4-6	Enter RIC identifying activity to which card is being forwarded.
Type of Physical Inventory/ Transaction History Code	7	Enter (or perpetuate) code.
National Stock Number	8-20	Enter NSN of item counted.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter U/I of stock number counted.
Warehouse Location	32-43	Enter warehouse location in which materiel is stored.
Count Card Control Number	44-49	Enter the serial number assigned to each card.
Check Digit	50	Enter count card control number check digit.
Nomenclature	51-59	Enter item nomenclature.
Count Number	60	Enter numeric digit to indicate the number of counts taken.
Physical Inventory Cutoff Date	61-64	Enter (or perpetuate) the date established for striking the accountable record balance.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Batch Number	65	Enter batch number (appendix A-84). Leave blank if no Matrix Table is available.
Blank	66	Leave blank.
Routing Identifier Code (From)	67-69	Enter RIC identifying the storage activity from which the transaction is being forwarded.
Blank	70	Leave blank.
Condition Code	71	Enter condition code of the item counted.
Management Code	72	Enter inventory management code; otherwise, leave blank.
Blank	73-78	Leave blank.
Subsistence Type of Pack Code	79	For Subsistence Items only: Enter the applicable Subsistence Type of Pack Code.
Blank	80	Leave blank.

4. VALIDATION NOT REQUIRED

This is an output transaction only. Data is reentered through program $$UWMI35 (reference appendix E-190).

APPENDIX B-31

PROCUREMENT CONTRACT DATA CARDS

1. These cards transmitted by the DSC will provide Receipt Contract Data to the distribution depots. Four formats, identified by separate DICs, pos. 1 through pos. 4, are provided to establish a complete Contract Data Record, delete a record, or change selected record elements. The cards may also be prepared at the depot level to add or delete contract data as required by local management.

2. The card formats are outlined below, sequenced by format number.

a. Format 1

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CC1.
Routing Identifier Code To	4-6	Enter the code of the depot to which materiel under this CLIN is to be shipped.
Abbreviated PIIN	7-12	Enter the last six positions of the basic Procurement Instrument Identification Number (first 13 positions of total PIIN) of the contract.
Supplemental PIIN	13-16	If the second position of the abbreviated PIIN (pos. 8) is A, D, or G, enter the Call Number; otherwise, leave blank.
Contract Line Item Number	17-22	Enter applicable line item and sub-line item number from the Contract Record.
National Stock Number	23-37	Enter the applicable NSN from the Contract Record.
PIIN (high order positions)	38-44	Enter the first seven positions of the basic Procurement Instrument Identification Number (first 13 positions of the total PIIN) of the Contract.
Fast Pay Indicator	45	Enter code identifying if fast pay criteria are applicable.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Contract Stock Quantity	46-54	Enter quantity to be delivered to the Depot under this line item. Right-justify; zero fill to the left.
Purchase Unit of Issue	55-56	Enter the unit of measure by which the item is being purchased.
CLIN Unit Price	57-66	Enter the purchase unit price of the item, dollar and cents; right-justify and zero fill.
Quantity Variance	67-69	Enter the three positions identifying the allowable quantity variance. (See appendix A-113.)
Contract Delivery Date	70-74	Enter the contract delivery date, year and Julian day.
Payment Office	75-76	Enter data.
Administering Location Code	77-79	Enter three position code identifying where contract is being administered.
Action Code	80	Enter appropriate Action Code as follows: a. If output cards are being prepared for a newly established Contract Line Item not previously forwarded to the depot, enter 2. Assure that all available data fields contain entries and that Format 2, 3 and 4 cards are also prepared when necessary. b. If Contract Line Item is being deleted for the recipient depot for whatever reason, enter 1. Pos. 23-79 may be left blank. No additional cards are required.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		c. If one or more data elements of a previous submission are being changed, enter 3 in format 1. All data elements (changed and unchanged) in pos. 23 through 79 must be entered. Prepare additional formats 2, 3 or 4 as necessary to describe the change.
		d. If the Contract Data Line is being deleted by the depot, enter 4. Contract Line deletes by the depot are mandatory to control Contract Line records involving Condition Code L or non-issuable receipts; reference part 1, chapter 3, paragraph 303601, of this manual.
b. Format 2		
Document Identifier Code	1-3	Enter CC2.
----	4-22	Same as Format 1 pos. 4-22.
Automated Contract Indicator	23	Enter indication of whether or not contract is being prepared automatically by the SAMMS system as follows: If contract is automated, enter A; otherwise, enter N.
Blank	24	Leave blank.
Vendor	25-29	Enter FSCM of the supplier to which the contract is awarded.
Unit of Issue Conversion Factor	30-38	Enter the nine position numeric factor used to convert quantity from Purchase Unit to Unit of Issue. Consists of four whole numbers and five decimal positions.
MIL STD 726 Reference	39-61	Enter the 23 positions of the MIL STD 726 coding of the selected Packaging Data Field in the PTDF, omitting all imbedded blanks.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Quantity Unit Pack	62-71	Enter first 10 positions of Packaging Data Field D.
Blank	72-80	Leave blank.

c. Format 3

Document Identifier Code	1-3	Enter CC3.
-----	4-22	Same as Format 1, pos. 4-22.
Packaging Print Routine Code	23	Enter data.
Packaging Data Field 2 (subfield 2)	24-59	Selected from the Packaging Data Field in the PTDF.
Packaging Data Field 1 (subfield 1)	60-79	Selected from the Packaging Data Field in the PTDF, omitting all embedded blanks.
Blank	80	Leave blank.

d. Format 4 - This card will be prepared only when the Purchase Part Number and/or Purchase FSCM is available.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CC4.
-----	4-22	Same as Format 1, pos. 4-22.
Blank	23	Leave blank.
Purchase Federal Supply Code for Manufacturers	24-28	Enter the Purchased FSCM as recorded on the Active Contract File.
Purchase Part Number	29-68	Enter the 40 positions of the Purchase Part Number referenced on the Active Contract File. If less than 40 positions, left-justify and leave the unused field positions blank.
Blank	69-80	Leave blank.

3. VALIDATION

Violations will appear on the appendix F-85 report. Errors will be referred to the submitting DSC for resolution.

a. Formats 1-5 DIC(s) pos. 1, pos. 2, pos. 3 and pos. 4

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
4-6	Alpha/numeric, pos. 6 must equal C, E, G, I, S, T or M.	AC
7-12	Alpha/numeric, no imbedded blanks or special characters. If pos. 8 equals A, D or G, pos. 13-16 must be valid fill.	AI
13-16	Alpha/numeric, other than all zeros. Must be blank if pos. 8 is other than A, D or G.	EX
17-22	Alpha/numeric, pos. 17-20 must be numeric, other than all zeros; pos. 21-22 may be alpha or numeric fill.	JI

b. Format 1 only (DIC pos. 1)

23-37	Numeric other than all zeros.	AY
46-54	Numeric other than all zeros. Blank fill valid if Action Code equals 1 or 4, pos. 80.	AS
57-66	Numeric other than all zeros. May be blank if Action Code equals 1 or 4, pos. 80.	AM
70-74	Numeric fill, no imbedded blanks. Pos. 59-61 must be greater than zeros and equal to or less than 366.	HP
80	Numeric 1, 2, 3 or 4.	CF

APPENDIX B-32

DISPOSAL RELEASE ORDER CARD

1. The DRO, prepared on DD Form 1348m, DoD Single Line Requisition System Document (Mechanical), is originated by the DSC. The DRO is the document by which the DSC directs the transfer of DoD excess materiel from a distribution depot to the nearest property disposal activity.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter A5J.
Routing Identifier Code (To)	4-6	Enter the RIC of the distribution depot which is to effect transfer.
Media and Status Code	7	Enter M&S Code 0 or leave blank.
Stock Number	8-20	Enter the NSN of the item to be transferred to the PDO.
Type of Pack Code	21	For subsistence items enter applicable code.
Locally Generated Automatic DRO Indicator	22	This field will contain X automatically put in by Receipt/Storage programs which generated the DRO.
Unit of Issue	23-24	Enter the catalog UI abbreviation.
Quantity	25-29	Enter the quantity to be transferred based on the inventory control record balance, preceding significant digits with zero(s).
Document Number	30-43	Enter the Document Number assigned to the Disposal Directive.
Suffix Code	44	Leave blank.
Supplementary Address	45-50	Enter the Activity Address Code of the Property Disposal Activity which is to receive the materiel.
Signal Code	51	Enter applicable code if required; otherwise, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Fund Code	52-53	Enter Fund Code to be credited with proceeds from sale by DRMO. If no credit desired, leave blank.
Distribution Code	54	Enter 9.
Retention Quantity	55-61	Quantity to be retained in stock by activity in pos. 4-6. When the quantity to be retained exceeds the Retention Quantity Field, the transaction will be processed off-line.
Precious Metals Identification Code	62	Enter applicable code (appendix A-127).
ADPE Identification Code	63	Enter applicable code (appendix 125).
Disposal Authority Code	64	Enter M, N, or R (appendix 126).
Demilitarization Code	65	Code assigned by the ICP/IMM as required by DoD 4160.21-M-1, Defense Demilitarization Manual.
Reclamation Code	66	Enter Y if reclamation is required prior to release to DRMO. Enter N if reclamation is not required.
Routing Identifier Code	67-69	Enter RIC of ICP/IMM originating the DRO.
Ownership/Purpose Code	70	Enter appropriate code.
Materiel Condition Code	71	Enter the Condition Code of the materiel to be transferred.
Management Code	72	Enter management code if applicable; otherwise, leave blank.
Screening Code	73	Leave blank.
Unit Price	74-80	Enter the unit price for the NSN shown in pos. 8-20. If locally generated enter zeros.

3. VALIDATION

Violations will appear on the appendix F-085 report.

FIELD POSITION	VALIDATION	REJECT CODE
4	Must be S.	AC
5	Must match Table 04 for Depot ID.	AC
6	Alpha/numeric.	AC
7	No edit.	
8-20	Numeric and not all zeros. No validation if RIC From is S9R.	AY
21	Blank or numeric 1, 2 or 4; if not 1-4, make blank.	
23-24	Alpha.	AN
25-29	Numeric, not all 0.	AS
30-43	Alpha/numeric and no blanks.	AI
(30-35)	Alpha/numeric.	
(36-39)	Numeric.	
(40)	Alpha/numeric.	
(41-43)	Numeric.	
51	Alpha A, B, C, D, W, J, K, L, M or X. If pos. 45-50 is blank, assign M.	AU
54	Must be 9. If blank or other than 9, change to 9.	
55-61	Numeric or all blank unless field position 22 is X (locally generated DRO) then may be 888 followed by blanks. 888 will be printed in location field of DD Form 1348-1.	AS
65	Alpha A, B, C, D, E, F, G, H, J, K, L, M, X, or blank. If blank, DEMIL Code will be obtained from locator.	2G
67-69	Alpha/numeric - must be in T/C file.	AB
70	Alpha/numeric.	AQ

FIELD POSITION	VALIDATION	REJECT CODE
71	Valid alpha codes as shown on appendix A-16.	AF
72	Alpha/numeric, or blank.	AW
74-80	Numeric, not all zeros (see note).	AM

NOTE: If locally generated consider valid when zero filled.

APPENDIX B-33

DELETED ITEM REPORT AND REPLY CARD

1. This card, prepared on the DD Form 1487, DoD Materiel Adjustment Document, is originated by the distribution depot. It is used to advise the DSC that stock of an item deleted from the Federal Supply Catalog is on hand in storage.

2. This card, also prepared on DD Form 1487, is originated by the DSC. With the exception of DIC and the Management Code, if one is applicable, entries on the reply card perpetuate entries on the report card. The card is used to advise the distribution depot that action is underway to reinstate the item in the Federal Supply Catalog.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CK8 on report card initiated by the distribution depot. Enter CKH on reply card prepared by the DSC.
Routing Identifier Code (To)	4-6	Enter (or perpetuate) the RIC of the cognizant DSC.
Blank	7	Leave blank.
National Stock Number	8-20	*Enter (or perpetuate) the NSN of the deleted item.
Blank	21	Leave blank.
Type of Pack Code	22	Enter Type of Pack Code, if applicable.
Unit of Issue	23-24	Enter (or perpetuate) the catalog UI abbreviation.
Quantity	25-29	Enter (or perpetuate) the count quantity: a. Completely punch this field preceding significant digits with zero(s). b. If the quantity exceeds 99,999, prepare additional report cards as required.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Number	30-43	Enter (or perpetuate) the document number constructed in accordance with appendix C-2.
Suffix Code	44	Enter (or perpetuate) consecutive alpha suffix code beginning with A in the initial card when the quantity exceeds 99,999; otherwise, leave blank.
Blank	45-47	Leave blank.
Effective Date of Catalog Change	48-51	Enter (or perpetuate) the effective date of the pertinent catalog change.
Blank	52-61	Leave blank.
Day	62-64	Enter (or perpetuate) the numerical day of count.
Blank	65-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter (or perpetuate) the RIC of the activity storing the item.
Blank	70	Leave blank.
Condition Code	71	Enter (or perpetuate) the condition code.
Management Code	72	Enter the management code, if appropriate; otherwise, leave blank.
Blank	73-80	Leave blank.

APPENDIX B-34

CRQ MATERIEL RELEASE ORDER (MRO) CARD

1. This card format is used to provide distribution activities with instructions for preparation and shipping of materiel to customers.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CRQ.
Routing Identifier Code (TO)	4-6	Enter the appropriate RIC applicable to the distribution depot to which the MRO is directed.
Media and Status Code	7	Enter the code as shown on the requisition.
National Stock Number/PN	8-22	Enter NSN requested.
Unit of Issue	23-24	Enter the UI applicable to the stock or part number.
Quantity	25-29	Enter the quantity of the item requested.
Document Number	30-43	Enter the document number as shown on the requisition.
Suffix Code	44	a. Enter the suffix code when the requisition quantity is divided into separate supply actions. b. When the requistioned quantity is not divided, this field will be left blank.
Supplementary Address	45-50	Enter the code as shown on the requisition.
Signal Code	51	Enter the code as shown on the requisition.
Fund Code	52-53	Enter the fund code as shown on the requisition.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Distribution Code	54-56	Enter the code as shown on the requisition.
Project Code	57-59	Enter the code as shown on the requisition.
Priority Designator	60-61	Enter the code as shown on the requisition.
Required Delivery Date	62-64	Enter the date as shown on the requisition. When the field is blank on the requisition, leave blank.
Advice Code	65-66	Enter the code as shown on the requisition.
Routing Identifier Code (From)	67-69	Enter the code applicable to the DSC originating the MRO.
Purpose Code	70	Enter Purpose Code.
Condition Code	71	Enter Condition Code.
Management Code	72	Enter Management Code (will indicate management data).
Type Pack Code	73	Enter type pack code, if applicable.
DICOMSS Cycle Code	(73)	Enter appropriate code from appendix A-30.
Unit Price	74-80	Enter the unit price applicable to the stock or part number shown in pos. 8-20.

3. VALIDATION

FIELD POSITION	VALIDATION
25-29	Numeric, not all zeros.
30-43	Alpha/numeric pos. 30-35, numeric pos. 36-39, alpha/numeric pos. 40-43.
44	Alpha/numeric or blank.
74-80	Numeric other than all zeros.

APPENDIX B-35

PREPOSITIONED MATERIEL RECEIPT CARD (RECOUPMENT FROM PDO)

1. The PMRC prepared on DD Form 1486 (DoD Materiel Receipt Document), is originated by the DSC and forwarded to the distribution depot where it is used to prepare the MRC on receipt of materiel from the PDO.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DWJ.
Routing Identifier Code (To)	4-6	Enter the RIC of the DSC to which the receipt will be reported.
Status Code	7	Leave blank.
National Stock Number	8-20	Enter the NSN of the item to be received.
Blank	21	Leave blank.
Type of Pack Code	22	Enter the applicable type of pack code (see appendix A-4).
Unit of Issue	23-24	Enter the applicable UI abbreviation (see appendix A-48).
Quantity	25-29	Enter quantity to be received from the PDO (precede significant digits with zeros).
Document Number	30-43	Enter document number assigned to the requisition used to order materiel returned to the distribution system.
Suffix Code	44	Leave blank.
Supplementary Address	45-50	Code of the depot to receive materiel.
Signal Code	51	Enter an M.
Fund Code	52-53	Leave blank.
Distribution Code	54-56	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Project Code	57-59	Enter the applicable project code (see appendix A-11).
Multiuse	60-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter RIC of depot to receive materiel.
Ownership/Purpose Codes	70	Enter code of item to be received.
Condition Code	71	Enter the applicable condition code (see appendix A-14).
Management Code	72	Enter the applicable management code (see appendix A-13).
Date	73-75	Last digit of calendar year and two-digit month to signify estimated delivery date, e.g., 606 means 1966, month of June.
Multiuse	76-80	Leave blank.

NOTE: When PMRC is being canceled, an identical card with an X overpunch in pos. 25 is forwarded to the recipient of the original card.

3. VALIDATION

Violation rejects will be listed on appendix F-85 report.

FIELD POSITION	VALIDATION	REJECT CODE
3	Alpha A through Z, except F, G, I, O, W, X and Y.	AA
4-6	Alphanumeric and compatible with pos. 67-69 or correctable using the following table:	AC

If pos. 67-69 is:	then 4-6 should be:
S_C	S9C
S_E	S9E
S_G	S9G
S_I	S9I
S_M	S9M
S_S	S9S
S_T	S9T

FIELD POSITION	VALIDATION	REJECT CODE
8-20	Numeric	AY
22	Blank, 1, 2 or 4.	CK
23-24	Alpha.	AN
25-29	Numeric other than all zeros; pos. 25 may contain X overpunch.	AS
30-43	Alpha/numeric (no imbedded blanks or special characters).	AI
67-69	Alpha/numeric.	AB
71	Alpha A, B, C, D, E, F, G or DIC DWK may contain J.	AF
73-75	Numeric.	HP
77-80	All blanks, or blank, blank, RB.	EX

APPENDIX B-36

MATERIEL RECEIPT CARD
(RECOUPMENT FROM PDO)

1. This card, prepared on DD Form 1486, DoD Materiel Receipt Document, is originated by the distribution depot and is the document by which the receipt of materiel from Property Disposal Officer is reported to the cognizant DSC.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter D6J.
Routing Identifier Code (To)	4-6	Enter (or perpetuate) the RIC identifying the DSC to which the card is being forwarded.
Status Code	7	Enter Receipt Status Code 7.
National Stock Number	8-20	Enter (or perpetuate) the NSN of the item received.
Blank	21	Leave blank.
Type of Pack Code	22	Enter applicable type of pack code (see appendix A-4).
Unit of Issue	23-24	Enter (or perpetuate) applicable UI abbreviation of the item required.
Quantity	25-29	Enter the quantity accepted from the PDO (precede significant digits with zeros).
Document Number	30-43	Enter (or perpetuate) the document number assigned to the requisition used to order materiel returned to the distribution system.
Suffix Code	44	Leave blank.
Supplementary Address	45-50	Enter (or perpetuate) appropriate address.
Signal Code	51	Enter (or perpetuate) M.
Fund Code	52-53	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Distribution Code	54-56	Leave blank.
Project Code	57-59	Enter (or perpetuate) applicable code, see appendix A-11; otherwise, leave blank.
Multiuse	60-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter (or perpetuate) RIC of activity which received materiel.
Ownership/Purpose Code	70	Perpetuate code shown in PMRC; otherwise, leave blank.
Condition Code	71	Enter applicable condition code (see appendix A-16).
Management Code	72	Enter applicable management code (see appendix A-13).
Date	73-75	Enter numerical day materiel received at unloading dock.
Multiuse	76-80	Leave blank.

NOTE: When reversal or cancellation of the original receipt transaction is required, enter an X overpunch in pos. 25. (DSC use only.)

APPENDIX B-37

DISPOSAL SHIPMENT CONFIRMATION FOLLOWUP CARD

1. This card is used by the Defense Reutilization and Marketing Service (DRMS) to obtain verification of the quantity shipped from the shipping activity.

2. The following are the fields in the transaction when shipment status has been received by DRMS on shipments to Defense Reutilization and Marketing Offices.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter AFX for initial followup. Enter AFZ when response to initial followup has not been received.
Routing Identifier Code	4-6	See paragraph 4 instructions below.
All Other Fields	7-61	Duplicate entries from Shipment Status Card (DI Code AS3).
Blank	62-64	Leave blank.
Advice Code	65-66	Enter Advice Code from appendix A-12 indicating the reason for followup.
Blank	67-80	Leave blank.

3. The following entries will apply when shipment status has not been received from a shipping activity by DRMS on shipments to Defense Reutilization and Marketing Offices.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter AFX for initial followup. Enter AFZ when response to initial followup has not been received.
Routing Identifier Code	4-6	See paragraph 4 instructions below.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Media Status	7	Leave blank.
National Stock Number	8-22	Enter stock number/data as shown in the DRMO Receipt of Usable Property card.
Unit of Issue	23-24	Enter unit of issue a shown in the DRMO Receipt of Usable Property card.
Quantity	25-29	Enter quantity as shown in the DRMO Receipt of Usable Property card.
Document Number	30-43	Enter document number as shown in the DRMO Receipt of Usable Property card.
Suffix Code	44	Enter suffix code as shown in the DRMO Receipt of Usable Property card or leave blank when none is entered by DRMO.
Supplementary Address	45-50	Enter DoDAAC of receiving DRMO.
Signal Code	51	Leave blank.
Fund Code	52-53	Leave blank.
Distribution Code	54	Enter 9.
All Other Fields	55-64	Leave blank.
Advice Code	65-66	Enter Advice Code from appendix A-12 indicating the reason for the followup.
All Other Fields	67-80	Leave blank.

. AFX/AFZ Routing Instructions

a. DRMS will generate AFX/AFZ with pos. 4-6 always blank.

b. DAAS will route AFX/AFZ to pos. 4-6 or to pos. 30-35 if pos. 4-6 are blank.

c. ICP/IMMS receiving AFX/AFZ (based on the entry in pos. 30-35) will process one of the following:

(1) Enter the shipping activity RIC in pos. 4-6 of the AFX/AFZs and route them the shipping activity via DAAS for the shipping activity to answer directly to DRMS using ASZs.

(2) Perform research with shipping activity in order to provide either an ICP/IMM or storage activity ASZ answer to DRMS.

APPENDIX B-38

DISPOSAL SHIPMENT CONFIRMATION CARD

1. This card is used to provide verification of quantity shipped from the shipping activity to the Defense Reutilization and Marketing Service in response to an AFX or AFZ, Disposal Shipment Confirmation Followup.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ASZ.
Routing Identifier Code	4-6	Code of the supply source from which the MRO or DRO was received.
Media and Status	7	Data as shown in the AFX/AFZ.
Stock/Part Number	8-22	Data as shown in the AFX/AFZ.
Unit of Issue	23-24	Data as shown in the AFX/AFZ.
Quantity	25-29	Quantity receipted for by DRMO.
Document Number	30-43	Data as shown in the AFX/AFZ.
Suffix	44	Data as shown in the AFX/AFZ.
Supplementary Address	45-50	Data as shown in the AFX/AFZ.
Signal Code	51	Leave blank.
Fund Code	52-53	Leave blank.
Distribution Code	54	Enter 9.
All Other Fields	55-64	Leave blank.
Advice Code	65-66	Data as shown in AFX or AFZ.
All Other Fields	67-80	Leave blank.

3. FOUR-PHASE INITIALIZATION

Key in WSDDE40 and depress ENTER key.

4. DATA ELEMENTS

FIELD LEGEND	NO. OF CHAR.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Routing Identifier Code	3	A/N	a. Enter the supply source from which DRO was received. b. Alpha in pos. 4, alpha/numeric in pos. 5-6. c. ROUTING IDENTIFIER CODE INVALID.
Media/Status	1	A/N	a. Enter data as shown on AFX/AFZ. b. No edit. c. MEDIA & STATUS CODE INVALID.
Stock/Part Number	13	A/N	a. Enter data as shown on AFX/AFZ. b. Numeric but not all zeros, or numeric with pos. 14 alpha A, B, J, L or S only. c. STOCK/PART NUMBER INVALID.
Unit of Issue	2	A	a. Enter data as shown on AFX/AFZ. b. Alpha. c. UNIT OF ISSUE INVALID.
Quantity	5	N	a. Enter quantity receipted for by DRMO. b. Numeric. c. QUANTITY INVALID.
Document Number	14	A/N	a. Enter data as shown on AFX/AFZ. b. Alpha/numeric pos. 30-35, numeric pos. 36-39, alpha/numeric pos. 40-43. No blanks. c. DOCUMENT NUMBER INVALID.
Suffix	1	A/N	a. Enter data as shown on AFX/AFZ. b. Alpha/numeric or blank. c. SUFFIX INVALID.
Supplementary Address	6	A/N	a. Enter data as shown on AFX/AFZ. b. Alpha/numeric or blank. c. SUPPLEMENTARY ADDRESS INVALID.
Advice Code	2	N	a. Enter data as shown on AFX/AFZ. b. Numeric. c. ADVICE CODE INVALID.

APPENDIX B-39

ACCEPTANCE ALERT (A/A) REMOTE INQUIRY, TYPE F

1. This inquiry, input via a remote terminal keyboard, will provide immediate access to the available Acceptance Alert data.

2. The following entries will be input through a remote terminal (CRT) in accordance with appendix E-194 P.

FIELD LEGEND	NO. OF CHAR.	EXPLANATION/INSTRUCTIONS
Identifier Code	1	Enter "F" IAW appendix E-194 P.
Procurement Instrument Identification Number (PIIN)	13	Enter PIIN. See Note.
Supplementary Procurement Instrument Identification Number (SPIIN)	4	Enter SPIIN if the 9th position of the PIIN is A, D or G; otherwise leave blank.
Contract Line Item Number (CLIN)	6	Enter CLIN if desired; otherwise, leave blank.

a. Violations will be displayed at the source or terminal from which the inquiry originated. Fields in error will be specifically identified.

DISPLAY POSITION	VALIDATION	VIOLATION REASON CODE
PIIN	Alpha/numeric, no imbedded blanks, 9th position of entry must be alpha.	AI
SPIIN	Blank or alpha/numeric with no blanks. If the 9th position of the PIIN is A, D or G, SPIIN may not be blank.	EX
CLIN	Blank or four position number, two positions alpha/numeric. Last two positions may be blank.	JI

b. Depress ENTER key after errors are corrected to reenter display data.

NOTE: When A/A data related to a PIIN is desired, regardless of the SPIIN, refer to the batch inquiry process as outlined in appendix E-061 P.

APPENDIX B-40

ACCEPTANCE REPORT (A/R) REMOTE INQUIRY, TYPE G

1. This inquiry, input via a remote terminal keyboard, will provide immediate access to Acceptance Report data.

2. The following entries will be input through a remote terminal (CRT) in accordance with appendix E-194 P.

FIELD LEGEND	NO. OF CHAR.	EXPLANATION/INSTRUCTIONS
Identifier Code	1	Enter "G" IAW appendix E-194 P.
Procurement Instrument Identification Number (PIIN)	13	Enter the PIIN for the A/R(s) to be inquired. See Note.
Supplementary Procurement Instrument Identification Number (SPIIN)	4	Enter the SPIIN if the 9th position of the PIIN is A, D or G; otherwise, leave blank.
Contract Line Item Number (CLIN)	6	Enter CLIN if possible; otherwise leave blank.

a. Violations will be displayed at the source or terminal from which the inquiry originated. Fields in error will be specifically identified.

DISPLAY POSITION	VALIDATION	VIOLATION REASON CODE
PIIN	Alpha/numeric, no imbedded blanks, 9th position of entry must be alpha.	AI
SPIIN	Blank or alpha/numeric with no imbedded blanks. If the 9th position of the PIIN is A, D or G, SPIIN may not be blank.	EX
CLIN	Blank or alpha/numeric. Last two positions of entry may be blank.	JI

b. Depress ENTER key after errors are corrected to reenter display data.

NOTE: When A/R data for a PIIN unrelated to the SPIIN is desired, refer to the batch inquiry process as outlined in appendix E-061 P.

APPENDIX B-43

TYPE D REMOTE SUSPENDED RECEIPT RECORD DELETION

1. The Type D deletion is entered through a remote keyboard or by means of a card input through a remote card reader, to reverse a previous Type A (appendix B-41) or ZB6 (appendix B-102) inquiry and delete the corresponding record on the Suspended Receipt File. The deletion is normally required when the prior Type A or ZB6 entry was in error. This type of deletion may be used before the received materiel has been turned over to Storage Division. However, after the materiel has left Receiving Division with the Receipt Control Document, the Suspended Receipt File Maintenance Card (appendix B-145) should be used to correct errors whenever possible to avoid rejection of Stow Notice input from Storage Division against deleted records. Detail procedures for preparing the remote inquiry unit and positioning the necessary switches and keys is provided in appendix E-182 P.

2. If a Type D input matches to a record in the Suspended Receipt File which already contains stow information, the stow notice location data will be printed at the remote terminal.

3. The following entries apply:

FIELD LEGEND	NO. OF CHAR.	EXPLANATION/INSTRUCTIONS
Identifier Code	1	Enter D.
TP Control Number	6	Enter the TP Control Number assigned to the receipt record to be deleted as indicated on the Receipt Control Document.

4. VALIDATION

a. Violations will be indicated by printing of an error message at the remote terminal from which input originated.

b. Content Validation

DISPLAY POSITION	VALIDATION	VIOLATION REASON CODE
TP Number	Must be all numeric, other than all zeros.	D9

c. Depress ENTER key after errors have been corrected to reenter display data.

APPENDIX B-44

TYPE N REMOTE SUSPENDED RECEIPT FILE INQUIRY - BY NIIN

1. The Type N inquiry may be entered through a remote keyboard or by means of a card input through a remote card reader. The response to a Type N inquiry will be printed at the remote terminal from which the inquiry originated and will consist of the TP control numbers of all suspended receipt records with a NIIN matching that of the inquiry. It will not be possible to access a record by NIIN on the day the record is established as a result of processing a Type A inquiry. Procedures for processing inquiries appear in appendix E-165 P.

2. The following entries apply:

FIELD LEGEND	NO. OF CHAR.	EXPLANATION/INSTRUCTIONS
Identifier Code	1	Enter N.
NIIN	9	Enter NIIN being inquired.

3. VALIDATION

a. Violations will be indicated by printing of a Violation Reason Code at the terminal from which the inquiry originated.

b. Content Validation

FIELD POSITION	VALIDATION	ERROR MESSAGE
2-10	Must be all numeric, except for position 4 which may be alpha A, B, J, L or S.	AY

APPENDIX B-45

TYPE Q REMOTE SUSPENDED RECEIPT FILE INQUIRY - BY TP CONTROL NUMBER

1. The Type Q inquiry may be entered through a remote keyboard or by means of a card input through a remote card reader. The response to a Type Q inquiry will be printed on the remote terminal from which the inquiry originated. Procedures for procedures for processing inquiries appear in appendix E-165 P.

2. The following entries apply:

FIELD LEGEND	NO. OF CHAR.	EXPLANATION/INSTRUCTIONS
Identifier Code	1	Enter Q.
TP Control Number	6	Enter TP Control Number of record being inquired.

3. VALIDATION

a. Violations will be indicated by printing of a Violation Reason Code at the terminal from which the inquiry originated.

b. Content Validation

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
TP Number	Must be all numeric, other than all zeros.	D9

APPENDIX B-47

INVENTORY REJECT CARD

1. This card indicates to the DSC that:

a. A Physical Inventory Request Card (DJA) is being rejected because the stock number is presently scheduled for inventory.

b. The stock number is being deleted from the inventory currently scheduled for which a CK5 card has been furnished to the center.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CK4.
Routing Identifier Code (To)	4-6	Enter RIC of DSC to which the card is being forwarded.
Type of Inventory Code	7	Enter type of physical inventory code of the rejected/canceled inventory.
National Stock Number	8-20	Enter NSN.
Blank	21	Leave blank.
Type of Pack Code	22	Enter code (subsistence items only).
Unit of Issue	23-24	Enter UI.
Blank	25-61	Leave blank.
Cutoff Date	62-64	Enter inventory cutoff date of inventory presently in process or being canceled.
Blank	65-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter RIC of activity from which card is being forwarded.
Blank	70	Leave blank.
Condition Code	71	Enter code for Types D and F inventories.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Management Code	72	Enter code, paragraph 8, appendix A-13.
Request Day	73-75	Enter numerical day on which card is prepared.
Blank	76-80	Leave blank.

3. VALIDATION

No validation

APPENDIX B-48

SHIPMENT DIVERSION AUTHORIZATION CARD

1. This card is used by the shipping activity for the purpose of directing shipment units to alternate consignees as a result of processing a diversion directed by a supply cancellation from the DSC/ICP.

2. The POE Code will be used to determine the WTCA to which these documents will be forwarded.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter TM2.
Shipping Activity	4-9	Enter Activity Address Code.
Date Shipped	10-12	Enter Julian date of shipment.
Blank	13-16	Leave blank.
POE	17-19	Enter POE Code.
Blank	20-23	Leave blank.
DSC/ICP	24-29	Enter Activity Address Code of DSC/ICP authorizing diversion.
TCN	30-46	Enter Transportation Control number of shipment unit.
Blank	47-67	Leave blank.
Transportation Account Code	68-71	Enter code to be used in funding reshipment.
New Consignee	72-77	Enter Activity Address Code of alternate consignee.
Blank	78-80	Leave blank.

4. Manually prepared output transaction not validated by the MOWASP system. See appendix E-005 P for procedure for processing.

APPENDIX B-49

SHIPMENT DIVERSION CONFIRMATION/DETAIL CARD

1. This card is received by the shipping activity indicating that diversion will or will not be accomplished as a result of processing a Diversion Authorization Card by the WTCA.

2. The following fields are in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter: TMB - Confirmed. TMK - Denied.
Shipping Activity	4-9	Reflects Activity Address Code.
Date Shipped	10-12	Reflects Julian date of shipment.
Blank	13-16	Leave blank.
POE	17-19	Reflects POE code.
Estimated Date of Shipment (TMB)	20-22	Indicates the estimated date of shipment from POE to the alternate consignee.
Mode of Shipment (TMB)	23	Indicates Mode of Shipment code to be used.
Date of Lift (TMK)	(20-22)	Indicates action at POE: Date - Cargo lifted. XXX - Cargo loaded/uneconomical diversion.
Mode of Shipment (TMK)	(23)	Indicates mode of shipment used with entry in pos. 20-22.
DSC/ICP	24-29	Reflects Activity Address Code of DSC/ICP authorizing diversion.
TCN	30-46	Reflects the Transportation Control Number of Shipment Unit.
Blank (TMB)	47-67	Leave blank.
Voyage Number (TMK)	(47-51)	Indicates voyage number used with mode in pos. 23.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank (TMK)	(52-67)	Reflects code to be used in funding reshipment.
New Consignee	72-77	Reflects Activity Address Code alternate consignee.
Blank	78-80	Leave blank.

3. Transaction is received from the Water Terminal Clearance Authority, input is not valid to the MOWASP mechanical system, and is rejected on appendix F-113, Entry/Exit Exception List (Code C) with a matching punched card document. See appendix E-005 P for procedure for processing.

APPENDIX B-50

SHIPMENT HOLD AUTHORIZATION CARD

1. This card is used by the shipping activity for the purpose of directing shipment units to alternate consignees as a result of processing a hold directed by a supply cancellation from the DSC/ICP.

2. The POE Code will be used to determine the WTCA to which these documents will be forwarded.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter TM3.
Shipping Activity	4-9	Enter Activity Address Code.
Date Shipped	10-12	Enter Julian date of shipment.
Blank	13-16	Leave blank.
POE	17-19	Enter POE Code.
Blank	20-23	Leave blank.
DSC/ICP	24-29	Enter Activity Address Code of DSC/ICP authorizing hold.
TCN	30-46	Enter Transportation Control Number of shipment unit.
Blank	47-61	Leave blank.
Shipping Activity	62-67	Enter Activity Address Code of activity to provide disposition instructions.
Blank	68-80	Leave blank.

4. Manually prepared output transaction not validated by the MOWASP system. See appendix E-005 P for procedure for processing.

APPENDIX B-51

SHIPMENT HOLD ACKNOWLEDGEMENT/DENIAL/DISPOSITION INSTRUCTION REQUEST CARD

1. This card is received by the shipping activity indicating that:

   a. Shipment is being held.

   b. Shipment cannot be held.

   c. Additional data is required.

2. The following fields are in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter: TMC - Held TML - Denied TMT - Disposition required
Shipping Activity	4-9	Reflects data of TM3.
Date Shipped	10-12	Reflects data of TM3.
Blank	13-16	Leave blank.
POE	17-19	Reflects data of TM3.
Blank (TMC/TMT)	20-23	Leave blank.
Date of Lift (TML)	(20-22)	Indicates action at POE: Date - Cargo lifted XXX - Cargo loaded/uneconomical diversion
Mode of Shipment (TML)	(23)	Indicates mode of shipment used with entry in pos. 20-22.
DSC/ICP	24-29	Reflects data of TM3.
TCN	30-46	Reflects data of TM3.
Blank (TMC/TMT)	47-61	Leave blank.
Voyage Number (TML)	(47-51)	Indicates voyage number used with mode in pos. 23.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank (TML)	(52-61)	Leave blank.
Shipping Activity	62-67	Reflects data in TM3.
Blank	68-80	Leave blank.

3. Transaction is received from the Water Terminal Clearance Authority, input is not valid to the MOWASP mechanical system, and is rejected on appendix F-113, Entry/Exit Exception List (Code C) with a matching field position document. See appendix E-005 P for procedure for processing.

APPENDIX B-52

SHIPMENT HOLD DISPOSITION INSTRUCTIONS CARD

1. This card is used by the shipping activity for the purpose of providing instructions to the WTCA in answer to a Disposition Instruction Request (DIC TMT).

2. The POE Code will be used to determine the WTCA to which these documents will be forwarded.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter TMS.
Shipping Activity	4-9	Enter data as shown on TM3/TMT.
Date Shipped	10-12	Enter data as shown on TM3/TMT.
Blank	13-16	Leave blank.
POE	17-19	Enter data as shown on TM3/TMT.
Blank	20-23	Leave blank.
DSC/ICP	24-29	Enter data as shown on TM3/TMT.
TCN	30-46	Enter data as shown on TM3/TMT.
Blank	47-61	Leave blank.
Shipping Activity	62-67	Enter data as shown on TM3/TMT.
Transportation Account Code	68-71	Enter code to be used in funding reshipment.
New Consignee	72-77	Enter Activity Address Code of alternate consignee.
Blank	78-80	Leave blank.

4. Manually prepared output transaction not validated by the MOWASP system. See appendix E-005 P for procedure for processing.

APPENDIX B-53

FMS NOTICE OF AVAILABILITY (NOA) KEY DOCUMENT

1. The mechanized Notice of Availability (NOA) is provided to customers capable of receiving mechanized data for Foreign Military Sales (FMS) shipments when FMS Offer/Release Option Code Y or Z is entered in pos. 46 of requisitions. The FMS NOA Key Document will accompany the FMS NOA Detail Documents (appendix B-54).

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	a. Enter DIC AD1 for the Initial Key Notice of Availability Document when an export release is not required. b. Enter DIC ADR for the initial Key Notice of Availability Document when an Export release is required. c. Enter DIC AD3 for the Delay Key Notice of Availability Document.
Routing Identifier Code	4-6	Enter RIC of the activity transmitting the NOA.
Number of Lines	7-10	Enter the number of line included in the shipment unit as represented by the shipment unit as represented by NOA Detail Documents transmitted with the NOA Key Document.
Commodity/Cargo Exception/ Special Handling Codes	11-17	Positions 11-15 will always contain the appropriate Water Commodity and Cargo Exception Code to be used to describe the predominant commodity within the shipment unit for ocean manifesting. (See MILSTAMP, appendix B-4.)

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		Positions 16-17 will always contain the appropriate Air Commodity and Special Handling Code to be used for all shipments via air. Identifies materiel for manifesting and customs requirements and denotes cargo requiring special handling or reporting. (See MILSTAMP, appendix B-3.)
Air Dimension Code	18	Identifies dimensional characteristics of air shipments by relating the dimensions of the largest piece to the minimum size cargo door opening of an aircraft. (See MILSTAMP, appendix B-5.)
Country Code	19-20	Enter Country Code.
Blank	21-22	Leave blank.
Mode of Shipment Code	23	Identifies the intended mode to be used from shipping activity to designated consignee.
Type Pack Code	24-25	Identifies the type of pack used for the shipment unit. (See MILSTAMP, appendix B-7.)
Pieces	26-29	Enter total pieces in shipment unit.
Weight	30-35	Enter total weight of shipment unit. This entry will be rounded to the next whole number.
Cube	36-39	Enter total cubic feet of shipment unit. This entry will be rounded to the next whole number.
Blank	40-44	Leave blank.
MILSTRIP Supplementary Address	45-50	Same as the issue/release documemt (MRO, DD Form 1348-1).
Blank	51-52	Leave blank.
Transportation Priority	53	See MILSTAMP chapter 3.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	54-56	Leave blank.
Project Code	57-59	Same as the issue/release document (MRO, DD Form 1348-1).
Blank	60	Leave blank.
FMS Notice Number	61-77	Identifies the number assigned to the shipment unit which controls that unit from shipper to consignee.
Date of Offer	78-80	a. Enter the Julian date the initial Notice of Availability is transmitted. b. When new NOAs are prepared, because the original NOA contained items which were rejected, the date of offer will be the transmission date of the new NOA.

3. These mechanically prepared output transactions are not validated by the MOWASP System. See appendix E-053 P for processing procedures.

APPENDIX B-54

FMS NOTICE OF AVAILABILITY (NOA) DETAIL DOCUMENT ENTRIES

1. The mechanized Notice of Availability (NOA) will include an FMS NOA Detail Document for each line item in the shipment unit. The FMS NOA Detail Document will be prepared from the issue/release documents (MRO, DD Form 1348-1, and so on) contained in the shipment unit and will accompany the FMS NOA Key Document (appendix B-53).

2. The mechanized FMS Notice of Availability (NOA) is required for countries designated in table 05 (appendix B-66, part E) when the FMS Offer/Release Option Code, requisition pos. 46, is either Y or Z, except when the shipment is shipped via parcel post. Explosive, dangerous, or classified materiel will always require an NOA, regardless of mode of shipment or FMS Offer/Release Option Code.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	a. Enter DIC AD2 for the Initial Detail Notice of Availability Document. b. Enter DIC AD4 for the Delay Detail Notice of Availability Document.
Routing Identifier Code	4-6	Enter RIC of the activity transmitting Notice of Availability.
Media and Status Code	7	Same as the issue/release document (MRO, DD Form 1348-1, and so on).
Stock Number or Part Number	8-22	Enter stock or part number of the item supplied.
Unit of Issue	23-24	Same as the issue/release document (MRO, DD Form 1348-1, and so on).
Quantity	25-29	Same as the issue/release document (MRO, DD Form 1348-1, and so on).
Document Number	30-43	Same as the issue/release document (MRO, DD Form 1348-1, and so on).

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Suffix	44	Same as the issue/release document (MRO, DD Form 1348-1, and so on).
Supplementary Address	45-50	Same as the issue/release document (MRO, DD Form 1348-1, and so on).
Blank	51-53	Leave blank.
RDD/RAD	54-56	Same as issue/release document (MRO, DD Form 1348-1, and so on).
Project Code	57-59	Same as issue/release document (MRO, DD Form 1348-1, and so on).
Blank	60	Leave blank.
FMS Notice Number	61-77	Same as positions 61-77 of Initial FMS NOA Key Document.
Date of Offer	78-80	a. For AD2 and AD4 documents enter the Julian date the initial Notice of Availability is transmitted. b. When new NOAs are prepared because the original NOA contained items which were rejected, the date of offer will be the transmission date of the new NOA.

3. These mechanically prepared output transactions are not validated by the MOWASP System. See appendix E-054 P for processing procedures.

APPENDIX B-55

ENTRY DOCUMENT CONTROL TABLE UPDATE CARD

1. This card is applicable to chapter 65 and is used to update the Entry Document Control Table.

2. The following are the entries of the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZVB.
Blank	4	Leave blank.
Action Code	5	Enter A for add or change; enter D for delete.
Blank	6	Leave blank.
Document Identifier Code	7-9	Enter DIC to be added, changed or deleted from table.
Blank	10	Leave blank.
Working Data Set	11-12	Enter last two positions (numeric) of WDS designator, to which DIC in pos. 7-9 will be assigned.
Blank	13	Leave blank.
RIC Check Code	14	Enter RIC check code as follows: "A" entry system to check RIC in pos. 71-72. "B" entry system to check RIC in pos. 67-68. "C" entry system to check RIC in pos. 4-5. "D" entry system to check RIC in pos. 4-6.
Blank	15	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Overpunch Code	16	Enter overpunch code as follows:
		"5" change third position of DIC to a 5.
		"E" change third position of DIC to an E.
		"9" change third position of DIC to a 5.
		"I" change third position of DIC to an E.
Blank	17	Leave blank.
Special Routine Code	18	Enter special routine code as follows:
		"A" for MRO documents.
		"B" for CB_ and QUR documents.
		"C" for CCC and CCD documents.
		"D" for CM_ documents.
		"E" for C5J documents.
		"F" for DJA documents.
		"G" for MILSCAP documents.
		"H" for ZBJ documents.
		"I" for ZZZ documents.
		"J" for MILSTRIP Status documents.
		"K" for A55, A5E, C55 and C5E documents.
Blank	19	Leave blank.
MIS Counter	20-22	Enter three digit MIS counter identification from Y elements of appendix A-83.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	23	Leave blank.
System Counter	24-26	Enter three digit system counter identification when counts are to be accumulated by DIC for I/O Report.
Blank	27	Leave blank. DICOMSS Code 28 Enter routine for routing Direct Commissary Support documents as follows: "A" for CKK documents. "B" for CKJ documents. "C" for ZBJ documents. "D" for ZBA, ZBC, and ZBD documents. "E" for DU_ documents. "F" for A5_, AC6, AK6, AF6, CD_, and ZZ_ documents. "G" for ZOA, ZOD, and 9BA documents.
Blank	29-80	Leave blank.

NOTE: The entry of an X in any DCT field signals the Entry to omit the check of that particular area.

APPENDIX B-56

EXIT DOCUMENT CONTROL TABLE UPDATE CARD

1. This card is applicable to chapter 65 and is used to update the Exit Document Control Table.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZVC.
Blank	4	Leave blank.
Action Code	5	Enter A for add or change, enter D for delete.
Blank	6	Leave blank.
Document Identifer Code	7-9	Enter DIC to be added, changed or deleted from table.
Blank	10	Leave blank.
Address Code	11	Enter address check code as follows: "1" Exit system to route to RIC in pos. 4-6. "2" Exit system to route to Servvice-Distribution in pos. 30 and 54. "3" Exit system to route to RIC in pos. 67-69. "4" Exit system to route to RIC in pos. 71-73. "6" Exit system to route to Supplemental Address in pos. 45-50. "7" Exit system to route to Activity Address in pos. 30-35.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	12	Leave blank.
DAAS Code	13	Enter DAAS Code as follows:
		"A" Send these documents to the DAAS for routing.
		"C" Non-DAAD document.
Blank	14	Leave blank.
Content Indicator Code	15-17	Enter Communications Content Indicator Code (CIC) for DIC.
Blank	18	Leave blank.
Special Routine Code	19	Enter Special Handling Routine Codes as follows:
		"L" for DIC QUE at DDMP.
		"P" for CBB, CBC, CBD or CBE documents.
		"Q" for DM_ documents:
		"R" for CNA documents.
		"T" for FTE, FTR, FTS and FTZ documents.
		"V" for AS1 and AS2 documents.
		"Z" for specified document to Reject Code C on F-113.
Blank	20	Leave blank.
MIS Counter	21-22	Enter two digit MIS counter identification from Z elements of appendix A-83.
Blank	23	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
MINIMIZE Type Code	24	Enter MINIMIZE Type Code as follows: "M" during MINIMIZE this document will always be withheld from AUTODIN when destined for an affected station. "X" during MINIMIZE these documents will never be withheld from AUTODIN.
Blank	25-80	Leave blank.

NOTE: The entry of an X in any DCT field signals the Exit to omit the check of that particular area.

APPENDIX B-57

FMS NOTICE OF AVAILABILITY (NOA) REPLY DOCUMENT

1. The mechanized Notice of Availability (NOA) Reply Document will always be used when replying to a mechanized NOA. When shipment release is to be made to the addresses identified by coded entries in the requisition/materiel release order and the Military Assistance Program Address Directory (MAPAD), the AD5 will contain Shipment Release Code R in pos. 60. When shipment release is to be made to an address which is not coded or contained in the MAPAD, the AD5 will contain Shipment Release Code E in pos. 60.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DIC AD5.
Routing Identifier Code	4-6	Enter the RIC as on the FMS NOA Key Document.
Number of Line Items	7-10	Enter from FMS NOA Key Document.
Commodity/Cargo Exception/ Special Handling Codes	11-17	Enter from FMS NOA Key Document.
Air Dimension Code	18	Enter from FMS NOA Key Document.
Country Code	19-20	Enter Country Code.
Blank	21-22	Leave blank.
Mode of Shipment Code	23	Enter from FMS NOA Key Document.
Type Pack Code	24-25	Enter from FMS NOA Key Document.
Pieces	26-29	Enter from FMS NOA Key Document.
Weight	30-35	Enter from FMS NOA Key Document.
Cube	36-39	Enter from FMS NOA Key Document.
Customer Transportation Order Number	40-44	When customer (CR/FF) assigns a number for internal control of shipments, the number will be entered in these positions.
MILSTRIP Supplementary Address	45-50	Enter from FMS NOA Key Document.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	51-52	Leave blank.
Transportation Priority	53	Enter from FMS NOA Key Document.
Blank	54-56	Leave blank.
Project Code	57-59	Enter from FMS NOA Key Document.
Shipment Release Code	60	Enter codes as follows: a. Enter Code R when shipment to be released to appropriate ship to address contained in MAPAD as identified by address codes in the FMS requisition/MRO. b. Enter Code E when release instructions are being mailed under separate cover on the date of this reply.
FMS Notice Number	61-77	Enter from FMS NOA Key Document.
Date of Reply	78-80	Enter Julian date reply to Notice of Availability is transmitted.

APPENDIX B-58

MRO STATUS DETAIL REQUEST CARD

1. This card is input by Shipping Documentation or MSO personnel, DS/T, to request the production of detail F-78, F-87 and/or F-191 reports. Only one detail card can be input for each report, and prior coordination with ODS is required. DS/T may request through the ODS that the entire range of MRO status detail be output in the F-78 or F-87 reports; however, the ODS will not process a request for both complete and specific (ZUG) detail on the same report; if both requests are received, the complete detail report will be run.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZUG.
Report Indicator	4	a. Enter 1 for F-78 warehouse PDT control detail. (Parts 1 and 2). b. Enter 2 for F-87 Transportation DTT Control Detail. c. Enter 3 for F-191 delayed DTT entry detail.
Blank	5-6	Leave blank.
Stock Location Group Codes	7-31	Enter 0 in pos. 7 if all areas required, or up to 25 areas. Leave unused position blank.
IPG I Request	32	Enter 1 if desired, 0 if not.
IPG II Request	33	Enter 1 if desired, 0 if not.
IPG III Request	34	Enter 1 if desired, 0 if not.
Delayed Shipment Reason Code	35-47	Enter 0 in pos. 35 if all reason codes and blank codes are required, or up to 12 codes. Leave unused position blank. (appendix A-64.)
Type of Hold Codes	48-55	Enter 0 in pos. 48 if all hold codes and blank codes are required, or up to 7 appendix A-21 codes. Leave unused position blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Age Category	56-59	Enter lower parameter (01-10) in pos. 56-57 and higher (01-10) in pos. 58-59. If only one required repeat pos. 56-57 entry in pos. 58-59. If pos. 4 is a 2, parameters must be greater than 03; that is, 04-10.
Blank	60-76	Leave blank.
Functional Routing Code	77-78	Enter FRC.
Blank	79-80	Leave blank.

3. VALIDATION

Violation rejects will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
4	Must be numeric 1, 2 or 3, may not be blank.	LD
7	Must contain numeric 0 or an alpha, may not be blank. Must be 0 when pos. 4 is a 2.	DA
32-34	May contain 0, must contain numeric 1 in one of these 3 positions.	DH
35	Alpha/numeric, no blank. Must be 0 when pos. 4 is a 2.	KK
48	Alpha/numeric, no blank.	LA
56-57	Numeric 0 to 10. Must be 04 to 10 when pos. 4 is a 2.	JA
58-59	Numeric 01 to 10, must be equal or higher than pos. 56-57.	JA

APPENDIX B-59

MATERIEL RECEIPT FOLLOWUP AND REPLY CARDS

1. Followup cards DXA, Materiel Receipt Followup Card (Procurement Instrument Source) and DXB, Materiel Receipt Followup Card (Other Than Procurement Instrument) are originated by the DSC and transmitted to the distribution depots to followup on shipments which have not been recorded as a receipt within the suspense period established by the DSC. If the followup is matched to a record in the Completed Receipt File, a Materiel Receipt Card (D4_ Procurement Instrument Source) or D6_ (Other Than Procurement Instrument Source) will be sent to the DSC. If the followup is not matched to a record in the Completed Receipt File and no matching receipt transaction is in progress, a DXC, Materiel Receipt Reply (No Available Matching Procurement Instrument Source Record) or DXD, Materiel Receipt Reply (No Available Matching Other Than Procurement Instrument Source Record), will be sent to the DSC.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DXA or DXB on followup actions prepared by the DSC. D4_ and D6_ will be entered on matched followup replies being returned to the DSC. DXC or DXD will be entered on unmatched followup replies sent to the DSC.
Routing Identifier (To)	4-6	Enter the RIC identifying the DSC to which the receipt will be reported.
Blank	7	Leave blank.
National Stock Number	8-20	Enter (or perpetuate) NSN of the item to be received.
Blank	21	Leave blank.
Type of Pack Code	22	Enter type of pack or DICOMSS cycle code, if appropriate; otherwise, leave blank.
Unit of Issue	23-24	Enter (or perpetuate) the unit of issue of the item to be received.
Quantity	25-29	Enter (or perpetuate) the quantity to be received (or received) preceding significant digits with zeros.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Procurement Instrument	30-42	For DXA or DXC enter (or perpetuate) the applicable Procurement Instrument Identification Number.
Blank	43	Leave blank.
Document Number	(30-43)	For DXB or DXD enter (or perpetuate) the controlling MILSTRIP type document number.
Suffix	44	When all data elements (other than quantity) are identical and the quantity due-in exceeds 99,999, enter (or perpetuate) the consecutive suffix code beginning with letter A in the initial card; otherwise, leave blank.
Item Number	45-50	For DXA or DXC enter (or perpetuate) the contract line/subline item number.
Supplementary Address	(45-50)	For DXB or DXD enter (or perpetuate) the supplementary address if available; otherwise, leave blank.
Blank	51-56	For DXA or DXC leave blank.
Signal	(51)	For DXB or DXD enter (or perpetuate) the signal code if applicable; otherwise, leave blank.
Fund code	(52-53)	For DXB or DXD enter (or perpetuate) the fund code; otherwise, leave blank.
Distribution Code	(54-56)	For DXB or DXD enter (or perpetuate) the distribution code if applicable; otherwise, leave blank.
Project Code	57-59	Enter (or perpetuate) project code; otherwise, leave blank.
Blank	60-66	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Routing Identifier (From)	67-69	Enter (or perpetuate) RIC identifying storage activity which is to receive item.
Ownership/Purpose Code	70	Enter (or perpetuate) ownership/purpose code of item to be received.
Condition Code	71	Enter (or perpetuate) condition code of item to be received.
Management Code	72	For DXA or DXB enter (or perpetuate) management code from PMRC. If none, leave blank. For DXC or DXD perpetuate appropriate management code; otherwise, leave blank.
Date	73-75	For DXA, DXB, DXC, DXD enter (or perpetuate) last digit of calendar year and two digit month signifying Estimated Delivery Date, e.g., 706 for 1977 month of June. For DXC/DXD with no matching PMR record, enter 998 in the PMR field. Enter 997 if matching suspended receipt record is found for DIC DXC only.
Blank	76	For DXA or DXC leave blank.
Call/Order Serial Number	77-80	For DXA or DXC enter applicable call/order serial number; otherwise, leave blank.
Blank	(76-80)	For DXB or DXD leave blank.

3. VALIDATION

Violations will appear on the appendix F-85 report.

FIELD POSITION	VALIDATION	REJECT CODE
8-20	Numeric except pos. 14 may be alpha A, B, J, L or S for DICOMSS items.	AY
30-43	Alpha/numeric	AI

FIELD POSITION	VALIDATION	REJECT CODE
67-69	Alpha/numeric	AB
73-75	Numeric	HP

APPENDIX B-60

MRO FOLLOWUP CARD

1. This card is received from DSC/ICP requesting reply as to status of MRO. Replies are furnished to the DSC/ICP in one of the following formats:

a. Appendix B-14 (DIC AR_) - Ship Status.

b. Appendix B-81 (DIC AG6, AGJ) - MRO/DRO Cancellation Request Answer.

c. Appendix B-94 (DIC AE6) - Supply Status.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DIC AF6.
Routing Identifier Code	4-6	Enter RIC of applicable distribution depot which is to furnish the status.
Media and Status Code	7	Perpetuate from MRO.
National Stock Number	8-20	Enter NSN.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter UI of materiel requested.
Quantity	25-29	Enter quantity of materiel requested.
Document Number	30-43	Enter document number as shown on MRO.
Suffix Code	44	Perpetuate from MRO.
Supplementary Address	45-50	Perpetuate from MRO.
Signal Code	51	Perpetuate from MRO.
Fund Code	52-53	Perpetuate from MRO.
Distribution Code	54-56	Perpetuate from MRO.
Project Code	57-59	Perpetuate from MRO.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Priority Designator	60-61	Perpetuate from MRO.
Required Delivery Date	62-64	Perpetuate from MRO.
Advice Code/Status Code	65-66	Perpetuate from MRO or a BE Status Code may be used when the center is initiating a force closure action at the storage depot.
Routing Identifier Code	67-69	Enter RIC applicable to the DSC/ICP to receive reply.
Purpose Code	70	Perpetuate from MRO.
Condition Code	71	Perpetuate from MRO.
Management Code	72	Perpetuate from MRO.
Type Pack Code/DICOMSS Cycle Code	73	Enter appropriate code or leave blank.
Unit Price	74-80	Perpetuate from MRO.

3. VALIDATION

Validation rejects will be listed on appendix F-85. Reenter when correct quantity has been determined.

FIELD POSITION	VALIDATION	VIOLATION CODE
25-29	Must be all numeric except DIPEC.	AS

APPENDIX B-61

GENERAL PURPOSE RECEIPT INQUIRY

1. This card is prepared by receipts processing or planning personnel of the distribution depot whenever it is determined that a printout of the Prepositioned Materiel Receipt Card Files or Completed Receipts Files is required.

a. The report will be in the format of appendix F-1 if Document Identifier Code (DIC) ZB0 is entered, and appendix F-29 if Document Identifier Code ZB1 is entered.

b. In Addition to PMRC and Completed Receipts data, information relative to Acceptance Alerts (A/A) and Acceptance Reports (A/R) is available. A DIC ZB0 with NSN and Procurement Item Instrument Number (PIIN) will also produce the appendix F-204, Acceptance Action Inquiry Report, with A/A data. A DIC ZB1 with NSN and PIIN entries will produce the F-204 with A/R information. This report will provide information for the manual preparation of A/Rs when required.

2. The following are fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZB0 for NSN or NSN and document number/PIIN inquiry into PMR Files; ZB1 for NSN, document number, or NSN and document number/PIIN inquiry into Completed Receipts Files.
Supplementary Procurement	4-7	Enter applicable SPIIN. Enter with Item Instrument Number Action Code FN, NSN and PIIN. SPIIN is an optional; entry to be used only when inquiry response is to be defined by PIIN, NSN and SPIIN.
National Stock Number	8-20	Enter applicable NSN when inquiry is by NSN; otherwise, leave blank. Must be filled if used with Action Codes FN and FP. Mandatory entry for A/A or A/R data. See note.
Blank	21-29	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Number or Procurement Item Instrument Number	30-43	Enter applicable document number when inquiry is by document number only (Action Code FM) or by NSN and document number/PIIN (Action Code FN); otherwise, leave blank. Mandatory PIIN entry if A/A or A/R data is required. See note.
Blank	44-75	Leave blank.
A/A or A/R Flag	76	Enter X if Acceptance Alert or Acceptance Report information is required; see note. If left blank, appendix F-204 will not be provided. F-01 or F-29 output will remain unaffected.
Functional Routing Code	77-78	Enter the designator code indicating the specific individual or office requesting the printout.
Action Code	79-80	Enter applicable Action Code from appendix A-42.

NOTE: Inquiries with DIC ZB0 and containing both NSN and PIIN will generate the appendix F-01 report and F-204 Acceptance Action Inquiry report. Only Acceptance Alert information will be reflected however, inquiry action under DIC ZB1 control will generate the F-29 report and all available (matching) Acceptance Reporting data via the F-204 format. The A/A or A/R Flag X indicator is other than X, convert to X and continue processing.

3. VALIDATION

Violations will appear on the appendix F-085 report.

FIELD POSITION	VALIDATION	VIOLATION CODE
4-7	Alpha/numeric or blank, used only with Action Code FN.	EX
8-20	Numeric or pos. 14 may be A, B, J, L, or S, may be blank if Action Code is FM.	AY
30-43	Alpha/numeric, may be blank if Action Code is FP.	AI

FIELD POSITION	VALIDATION	VIOLATION CODE
79-80	FM, FN or FP. If not FM, FN or FP, convert to FP and continue processing. If DIC is ZB0 and entry is FM, reject.	CF

APPENDIX B-62

BALANCE/TRANSACTION MATERIEL ADJUSTMENT DOCUMENT

1. This input is prepared by distribution activities to post Inventory Adjustments as a result of accounting errors and miscellaneous increases/decreases. It is also prepared to reenter data that was violated by Balance/Transaction Validation System.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Transaction Document Identifier Code	1-3	Enter a ZAD for distribution activity adjustments.
Routing Identifier Code	4-6	a. Enter RIC S9_ in pos. 4-5, for DIC ZAD in pos. 1-3, enter applicable manager code in pos. 6. b. Enter RIC from document to be reentered or from violated Report F-147.
Blank	7	Leave blank.
National Stock Number	8-20	Enter NSN.
Cycle Update Code	21	Enter code as follows: a. Leave blank if adjustment desired prior to next DB/TR reconciliation. b. Enter 1 if adjustment desired for month following next DB/TR reconciliation. c. Enter 2 if adjustment desired for second month following next DB/TR reconciliation.
Type Pack Code/DICOMSS Cycle Code	22	Enter/perpetuate Type of Pack Code/DICOMSS Cycle Code, if applicable. For DIC CRS only, enter DICOMSS Cycle Code From.
Original Document	23-25	Enter DIC from original transaction being adjusted or from violation Report F-147.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		The original DIC in pos. 23-25 will be used to adjust record.
Unit of Issue	26-27	Enter/perpetuate the UI code.
Quantity	28-32	Enter quantity to be reentered or adjusted. NOTE: When reversal or cancellation of the original transaction is required, enter an X overpunch in pos. 32.
Document Number	33-46	Enter/perpetuate the document number for DICs A2_, A5_, D6_, D8_ and D9_.
Procurement Instrument or Control Number	33-46	Enter/perpetuate the procurement instrument or contract number of DIC D4 (leave pos. 46 blank).
Suffix Code	47	Enter/perpetuate the suffix code if applicable; otherwise, leave blank.
Item Number	48-53	Identify the contract/exhibit line item number or subline number for DIC D4_ as follows:
Contract/Exhibit Line Item Number	(48-51)	Contract Line Number: Enter/perpetuate the alpha exhibit identifier in pos. 48. Enter/perpetuate the exhibit line number in pos. 49-51 beginning with pos. 51 and preceding significant digits with zeros.
Contract/Exhibit Subline Item Number	(52-53)	Enter/perpetuate the contract or exhibit subline item number beginning in pos. 50, if applicable; otherwise, zero fill.
Supplementary Address	48-53	Enter/perpetuate supplementary address if applicable; otherwise, leave blank for DIC A6_.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Contract Line Item Number	48-53	For adjustments of previously suspended receipt, enter/perpetuate contract under which the materiel was originally received if applicable; otherwise, leave blank for DICs D8_ and D9_.
Blank	48-53	Blank for DIC A2_, A5_.
Blank	54-56	Leave blank.
Project Code	57-59	Enter/perpetuate project code if applicable; otherwise, leave blank for DICs A2_, A5_ (except A5J), D4_, D6_, D8_ and D9_.
Blank	57-59	Leave blank for DIC A5J.
Priority Designator	60-61	Enter/perpetuate the priority code for DIC A2_, A5_ (except A5J).
Blank	60-61	Leave blank for DICs A5J, D8_ and D9_.
Shipment Number	60-66	Enter/perpetuate vendor shipment number, preceding significant digits with zeros if applicable; otherwise, leave blank for DICs D4_ and D6_.
Blank	62-66	Leave blank for DICs A2_, A5_, D8_ and D9_.
Condition Code (To)	(66)	Enter Condition Code to for DIC DAC only.
Blank	67-69	Leave blank.
Ownership/Purpose Code	70	Enter/perpetuate the ownership/purpose code, if applicable; otherwise, leave blank.
Condition Code	71	Enter/perpetuate the condition code. For DIC DAC only, enter Condition Code From.

best copy available

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Management Code	72	Enter/perpetuate the management code, if applicable; otherwise, leave blank.
Date	73-75	Enter/perpetuate Julian date when materiel is received at unloading dock for DICs D4_ and D6_.
Blank	(73-75)	Leave blank for DICs A2_, A5_, D8_ and D9_.
DICOMSS Cycle Code (To)	76	Enter DICOMSS Cycle Code I for DIC CRS only.
Supplementary PIIN	77-80	Enter/perpetuate supplementary PIIN, if applicable; otherwise, leave blank for DIC D4_.
Blank	(77-80)	Leave blank for DICs A2_, A5_, D6_, D8_ and D9_.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
1-3	Must be ZAD, D8_, D9_.	AA
4-6	Alphanumeric filled.	AC
8-20	Numeric other than zeros, except pos. 14 may contain alpha A, B, J, L or S. (no blanks)	AY
22	Alpha/numeric filled or blank.	CK/4K
23-24	Must be A2_, A5_, D4_, D6_, D8_, D9_, DK_, DA_, CO_, CK_.	AA
25	Alpha/numeric filled If pos. 23-24 DK must be A If pos. 23-24 DA must be C If pos. 23-24 CO must be B If pos. 23-24 CK must be E	AA
26-27	Alpha filled.	AN
28-31	Numeric filled/leading zeros.	AS

FIELD POSITION	VALIDATION	VIOLATION CODE
33-46	Alphanumeric filled.	AI
47	Alpha or blank.	AZ
48-51	Numeric filled (DIC D4_).	JI
52-53	Alphanumeric or zero filled (DIC D4_).	JI
60-66	Numeric filled or blank (DICs D4_ and D6_).	JI
66	When DIC, pos. 23-25, is DAC, must be filled with Alpha A through N except I.	AF
71	Alpha A through N except I.	AF
73-75	Numeric filled or blank.	JM
NOTE:	X overpunch (reversal) in pos. 32 acceptable.	

APPENDIX B-63

DSC SINGLE INVENTORY ADJUSTMENT

1. This record is prepared by DSCs to adjust NIR balances. The record is transceived to distribution depots the same day it is processed at the DSC. The depot mechanized inventory system and the DB&TR system also create inventory adjustments. The DSC and depot DB&TR created inventory adjustments are used at the depot in the DB&TR system to adjust on-hand balances in the same manner as the DSCs.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter a D8_/D9_ series for single adjustments.
Routing Identifier Code	4-6	RIC of the distribution depot.
Blank	7	Leave blank.
National Stock Number	8-20	Enter the NSN of the item being adjusted.
Blank	21	Leave blank.
Type Pack Code/DICOMSS Cycle Code	22	Enter code.
Unit of Issue	23-24	Enter UI.
Quantity	25-29	Enter quantity to be adjusted. NOTE: When a reversal of a previously processed materiel adjustment record is desired, and identical record with an X overpunch in pos. 29 is entered.
Document Number	30-43	Enter document number of adjusted record.
Suffix Code	44	Enter appropriate code (when quantity involved exceeds 99,999). For reclassification of previously suspended receipts, use the suffix code under which materiel was originally received.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Contract Line Number Address	45-50	For adjustments of previously suspended receipt. Enter contract or supplemental address under which the materiel was originally received.
Original Document Identifier Code	51-53	Enter code of recorded adjustment transaction action.
Blank	54-56	Leave blank.
Project Code	57-59	Enter code.
Multi-use	60-62	For intra-Service/Agency use, enter data prescribed by Service/Agency. For inter-Service/Agency use, leave blank.
Multi-use	63-65	For intra-Service/Agency use, with DICs other than D8A/D9A, enter data prescribed by the Service/Agency. For inter-Service/Agency use, except for DICs D8A/D9A, leave blank.
Error Classification Code	(63-65)	
	(63-64)	For DICs D8A/D9A, enter appropriate DoD assigned Error Classification Code; otherwise, leave blank.
	(65)	For DICs D8A/D9A, enter Service/Agency assigned code amplifying the DoD Error Classification Code, otherwise, leave blank.
Multi-use	66	For intra-Service/Agency use, enter data prescribed by Service/Agency. For inter-Service/Agency use, leave blank.
Routing Identifier Code	67-69	Enter RIC of the distribution activity where materiel being adjusted is located.
Ownership/Purpose Code	70	Enter O/PC of balance being affected.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Condition Code	71	Enter code of balance being affected.
Management Code	72	Enter code.
Date Prepared	73-75	Enter Julian date adjustment prepared.
Blank	76	Leave blank.
Call Order Number	77-80	For adjustments of previously suspended receipts. Enter contract under which materiel was originally received.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
1-2	Must be DICs D8_ and D9_.	AA
3	Alpha filled.	AA
4-6	Alpha/numeric filled.	AC
8-20	Numeric other than all zeros. Field position 14 may contain alpha A, B, J, L or S.	AY
22	Alpha/numeric filled or blank. If identified as DICOMSS and manager is other than S or U, Type of Pack Code will be blank.	CK/4K
23-24	Alpha filled.	AN
25-28	Numeric filled.	AS
29	Alpha/numeric filled.	AS
30-43	Alpha/numeric filled.	AI
44	Alpha or blank.	AZ
51	Alpha/numeric filled.	AA

FIELD POSITION	VALIDATION	VIOLATION CODE
71	Alpha filled.	AF
73-75	Numeric filled or blank.	JM

NOTE: X overpunch (reversal) in pos. 29 acceptable.

APPENDIX B-64

DSC NIR CLOSING BALANCE TAPE FORMAT

1. This appendix portrays the format of NIR balance record tape provided by DSCs for the purpose of depot and DSC balance/transaction reconciliation.

2. Standard header and trailer records are used. Name in header is _____ HBAL.

3. All quantities are right-justified with leading zeros.

4. Unit price and on hand balance fields are packed.

5. Record formats and data elements for NIR balance record content are as follows:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Commodity Category	1	Enter Commodity Category.
National Stock Number	2-14	Enter NSN.
Blank	15-16	Leave blank.
Routing Identifier Code	17-19	Enter RIC of distribution depot.
Ownership/Purpose Code	20	Enter code.
Condition Code	21	Enter code.
Type of Pack Code	22	Enter code.
Unit of Issue	23-24	Enter UI.
Unit Price	25-29	Enter unit price (packed field).
Inventory Catagory Code	30	Enter ICC.
On-Hand Balance	31-35	Enter On-Hand Balance (packed field).

APPENDIX B-65

SERVICE AND DISTRIBUTION/AUTODIN ROUTING INDICATOR CARD

1. This card is prepared on a general purpose card upon receipt of changes, deletions, or additions to the Service and Distribution Codes and their associated Routing Indicator Codes.

2. This card is processed IAW appendix D-59 and serves to update the AUTODIN Routing File.

3. The following are fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZF6.
Blank	4-6	Leave blank.
Type of Action Code	7	Enter 1 to add or change; enter 2 to effect a deletion.
Service Code	8	Enter applicable Service Code from appendix A-5.
Distribution Code	9	Enter applicable Distribution Code from appendix A-10.
Blank	10	Leave blank.
AUTODIN Routing Indicator Code	11-17	Enter applicable AUTODIN Routing Indicator Code from the ACP 117 CAN-US Allied Routing Indicator Book (pos. 11 must be R, pos. 12 may be H or U).
Activity Address Code	18-23	Enter DoDAAD code to receive data via mail under operation MINIMIZE.
Blank	24-80	Leave blank.

4. VALIDATION

Violation rejects will be listed on appendix F-113.

FIELD POSITION	VALIDATION	VIOLATION MESSAGE
7	Numeric 1 or 2 only	INVALID FORMAT
8	Alpha	INVALID FORMAT
9	Alpha/numeric	INVALID FORMAT
11-17	Alpha/numeric, no blanks	INVALID FORMAT

APPENDIX B-66

RIC FROM TABLE AND DIC/FRC TABLE
PART A
TABLE 01

1. PURPOSE

a. RIC From Table. This table provides a display of sources from which the depot will accept MROs and other authorized input. Table limit - 104.

b. DIC/FRC Table. This table is used in the mechanical assignment of Functional Routing Codes to be applied to specific Document Identifier Codes if the FRC is missing. Table limit - 148 entries.

2. REFERENCE

Appendix D-29, Part A.

3. CRT INITIALIZATION

a. Key in $$UWSR01. Depress the Enter key.

b. The first display will show the RIC From Table. If the DIC/FRC Table is required, depress the Enter key without making any entries to the RIC From Table.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal.

a. RIC From Table

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Routing Identifier Code (From)	3	A/N	a. Enter the RIC of a source from which the depot will accept MROs. b. Alpha/numeric, no blanks. c. RIC IS INVALID.
Manager Code	1	A/N	a. Enter the Service Commodity Manager Code (appendix A-44) relative to the RIC. b. Alpha/numeric, no blank. c. MGR IS INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	2	A	a. Enter D to delete, A to add. b. Must be alpha D or A only. c. ACTION CODE INV.
b. DIC/FRC Table			
Document Identifier Code	3	A/N	a. Enter first, first and second or first, second, and third positions of the DIC. Note: The first DIC entered must be XXX for default purposes. b. Alpha only in first position; alpha/numeric in second and third positions. c. DIC INV.
Functional Routing Code	2	A/N	a. Enter FRC. b. Alpha/numeric, no blanks. c. FRC INV.
Action Code	2	A	a. Enter D to delete, A to add. b. Must be alpha D or A only. c. ACTION CD INV.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
THIS TABLE IS FULL	Probable Cause: Computer file limits have been filled to capacity. The RIC From Table has a maximum capacity of 104 entries. The DIC/FRC Table has a maximum of 148 entries. Action: Based upon priorities, a delete (D) action must be input to reduce the file and follow with an add (A) action to add the desired record.
THIS RECORD IS ALREADY ON THE TABLE	Probable Cause: A record already exists for the pertinent control field. Action: Proceed to the next transaction.

ERROR MESSAGE	CAUSE/ACTION
THIS RECORD IS NOT ON THIS TABLE	Probable Cause: A delete action was entered against a record that is not on file. Action: Review transaction for possible error input. Reenter valid data.

6. PRINT DISPLAY

If a facsimile of the display is desired, press the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

SPECIAL PROJECT TABLE
PART B
TABLE 02

1. PURPOSE

This table is used to update project codes from the Special Project Table. The file is maintained to produce the capability of identifying output DD Forms 1348-1 and SPW, DLA Form 674, with special Shipping Address, Insured Parcel Post or NO-GO Parcel Post indicators, and a special control listing indicator.

2. REFERENCES

a. Appendix C-11, DD Form 1348-1.

b. Appendix C-19, DLA Form 674.

c. Appendix D-29, Part B.

3. CRT INITIALIZATION

Key in $$UWSR02

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	3	A	a. Enter I inquiry, D delete, A add. b. Must be alpha I, D, B. c. ACTION CODE INVALID.
Project Code	3	A/N	a. Enter applicable Project Code. b. Alphanumeric, mandatory entry. c. PROJECT CODE INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Service/Agency Code	1	A/N	a. Enter code of Service/Agency assigning project. b. Alpha/numeric, or blank only if the first position of the Project Code is 9. c. SERVICE/AGENCY CODE INVALID.
Parcel Post Indicator	1	N	a. Enter 0 - If not applicable; 1 - NO-GO Parcel Post; 2 - Registered. b. Numeric 0, 1 or 2. c. PARCEL POST CODE INVALID.
Special Address/Listing	1	N	a. Enter 1 if Special Shipping Address required, 2 if Control Listing required or 3 if both special Address and Control Listing required. Enter 0 or blank if not applicable. b. Numeric 0, 1, 2, 3 or blank. c. SPECIAL ADD/LIST CODE INVALID.
SEAVAN Eligibility Mode Code	1	A	a. Enter Y if project can be shipped by SEAVAN. Enter N or leave blank if not. b. Alpha Y, N or blank. c. SEAVAN CODE INVALID.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL	Probable Cause: Computer file limit has been filled to capacity. Maximum number of entries - 1666. Action: Based upon priorities, a delete (D) action must be input to reduce the file and follow with an add (A) action to add the desired record.

ERROR MESSAGE	CAUSE/ACTION
THIS RECORD ALREADY ON FILE	Probable Cause: A record already exists for the pertinent control field. Action: Unnecessary to reenter data. Proceed to the next transaction.
THIS RECORD IS NOT ON THE TABLE	Probable Cause: Project Code and/or Service/Agency Code not valid data. Action: Review transaction for possible error input. Reenter valid data.

6. PRINT DISPLAY

If a facsimile of the display is desired, press the PRINT key and copy of the panel will be printed.

APPENDIX B-66

INVENTORY CONTROL TABLE
PART C
TABLE 03

1. PURPOSE

This table serves two purposes:

a. Assignment of a document number to a mechanically-generated adjustment card and to automatically assign document numbers to Disposal Release Orders mechanically generated at the depot. Table Limit - 40 entries.

b. Establishment of the number of days prior to effective date that the Storage Item Change Listing (appendix F-82) and the Storage Location Identification Label (appendix C-104) output will be prepared.

2. REFERENCES

a. Appendix C-104.

b. Appendix D-29, Part C.

c. Appendix F-82.

3. CRT INITIALIZATION

Key in $$UWSR03. Depress Enter key.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal:

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
CMDN Pre-Document Interval	1	N	a. Enter the number of days prior to the effective date the appendices F-82 and C-104 are prepared. b. Numeric 1 through 9, no blanks. c. PRE-DOC INVALID.
Commodity Manager Code	1	A/N	a. Enter appropriate code. See note 1. b. Alpha/numeric, no blanks. c. COM MGR INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Routing Identifier Code (To)	3	A/N	a. Enter RIC of DSC or IM. b. Alpha/numeric, no blanks. c. RIC TO INVALID.
Routing Identifier Code (From)	3	A/N	a. Enter RIC of preparing depot. b. Alpha/numeric, no blanks. c. RIC FRM INVALID.
Activity Address A,Cs Code	6	A/N	a. Enter DSCs AAC. See note 2. b. Alpha/numeric, no blanks. c. ADDRESS INVALID.
Functional Routing Code	2	A/N	a. Enter FRC. b. Alpha/numeric, no blanks. c. FRC INVALID.
Starting Serial Number	4	A/N	a. Enter first serial number from the block provided by DSC. See notes 3 and 4. b. First position is alpha (A through I only)/numeric, remaining positions all numeric, no blanks. c. START-SER-NBR-INVALID.
Ending Serial Number	4	A/N	a. Enter last serial number from the block provided by DSC. See notes 3 and 4. b. First position is alpha (A through I only)/numeric, remaining positions all numeric, no blanks. c. END SER NBR INVALID.
Action Code	2	A	a. Enter D - Delete, A - Add. b. Alpha D/A only. c. ACTION CODE INVALID.

NOTE 1: If the entry is for automatic DROs, select any code for commodity manager that is not being used.

NOTE 2: If the entry is for automatic DROs, enter the Station Address Code of the depot. Example: If DDOU, enter SW3400.

NOTE 3: If alpha <u>and</u> numeric entries are to be made in the first positions of the Beginning Serial Number and Ending Serial Number, i.e., if range is A001 through 9999, the alpha character must be inserted in the first position of

the Beginning Serial Number and the numeric in the first position of the Ending Serial Number to permit proper incrementing of document numbers by the computer.

NOTE 4: If the entry is for automatic DROs, enter 0001 as the Starting Serial Number and 2000 as the Ending Serial Number.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL	Probable Cause: Computer file limit has been filled to capacity. The Inventory Control Table has a maximum capacity of 40 entries. Action: Based upon priorities, a delete (D) action must be input to reduce the file and follow with an add (A) action to add the desired record.
THIS RECORD IS ALREADY ON FILE	Probable Cause: A record already exists for the pertinent control field. Action: Unnecessary to reenter data. Proceed to next transaction.
THIS RECORD IS NOT IN THIS FILE	Probable Cause: No record exists for this record. Action: Assure input is correct. If correction is required make necessary correction and reenter.

6. PRINT DISPLAY

If a facsimile of the display is desired, press the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

TABLE OF CONTROLS, CONSTANTS, OPTIONS AND STOCK LOCATION GROUP TABLE
PART D
TABLE 04

1. PURPOSE

a. Part 1 - Table of Controls, Constants, and Options. This table establishes various controls, constants, and options which are controlled by the following action codes:

(1) Action Code 1 establishes:

(a) Depot Activity Address Codes.

(b) PDO Activity Address Codes.

(c) Depot RIC (To) Identification.

(d) Shipment Unit Control Number.

(e) Maximum Weight and Cube Factors.

(f) MAPAD Freight Forwarder Location Code.

(g) Servicing LOGAIR Terminal.

(h) Servicing QUICKTRANS Terminal.

(i) MRO Processing Volume.

(j) Planned LI Assigned to Packing Chute.

(k) Shipment Planning Worksheet Option.

(l) Warehouse Selection Option for Reports.

(m) ZBM-ZBP Option.

(n) ZEN Option.

(o) DICOMSS Compatibility Code Option.

(p) F-78 Sequence Option.

(q) DICOMMS Cycle Extent Code Option.

(r) Mechanized Warehouse Automatic Clear Option.

(s) Other Warehouse Automatic Clear Option.

(t) Priority Options for Multiline Documentation.

(u) Modified PDT Option.

(v) Print Suppression Flag.

(w) Return Address Option.

(x) Extended MRO Bank Option.

(y) Inventory Consolidation Option.

(z) SEAVAN Indicator Option.

(aa) AWARES Indicator.

(ab) MROs from Inventory Sort Group Option

(ac) Grant Aid Sort Group.

(ad) Hazardous Sort Group Option.

(ae) FMS Duplicate Sort Group Option.

(af) Maximum SU Weight.

(ag) Maximum SU Cube.

(ah) MRO Quantity Override.

(ai) Depot Phone Number.

(aj) DRMO Phone Number.

(ak) Minimum Dollar Cost.

(al) Special Requirement Q.

(am) Special Requirement H.

(an) Hazardous Type Cargo.

(ao) Hazardous Storage Capability.

(2) Action Code 2 establishes:

(a) Mechanized Area Workload Batch Options.

(b) SU and TU Assembly Areas.

(c) Minimum Weight and Cube for Receipts Forecast.

(d) Maximum Weight and Cube for MMHS.

(e) IPG I and II Shipment Unit Consolidation Criteria.

(f) DEPMEDS set assembly paramenter on/off depot.

b. Part 2 Stock Location Group Table. This table provides the capability of grouping the first, first and second, or the first, second and third positions of the Location Code into a single alpha Stock Location Group Code (or Warehouse Area) and establishing sequence of DD Form 1348-1. Table limit = 100 entries.

2. REFERENCE

Appendix D-29, Part D.

3. CRT INITIALIZATION

a. Key in $$UWSR04. Depress ENTER key.

b. Enter desired part number (1 or 2).

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal:

a. Part 1 - Table of Controls, Constants and Options.

(1) Panel 1, Action Code 01.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Depot Activity Address	6	A/N	a. Enter appropriate DoDAAC Code (see note 1). b. Alpha/numeric, no blanks. c. DEPOT ADDRESS INVALID.
PDO Activity Address	6	A/N	a. Enter appropriate DoDAAC Code. b. Alpha/numeric, no blanks. c. DEPOT ADDRESS INVALID.
Depot Identification	1	A	a. Enter the middle character of the Depot RIC (see note 1). b. Alpha, no blanks. c. DEPOT ID INVALID.
SU Control Number	7	N	a. Computer controlled. b. Not applicable. c. Not applicable.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Maximum DD Form 1348-1 Weight Factor	5	N	a. Enter maximum weight allowed. b. Numeric, no blanks. c. MAX WT INVALID.
Maximum DD Form 1348-1 Cube Factor	4	N	a. Enter maximum cube allowed. b. Numeric, no blanks. c. MAX CU INVALID.

NOTE 1: Activity Address must relate to depot ID. If depot ID or activity address is to be changed, they must both be changed simultaneously relating to each other.

If depot ID or Activity Address do not relate, the message DEPOT ID AND ACTIVITY ADDRES MUST RELATE will appear on the screen.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
MAPAD Freight Forwarder Location Code	3	N	a. Enter in the order of depot preference: 1 - East Coast Location. 2 - West Coast Location 3 - Gulf Coast Location. b. Numeric 1, 2 or 3 in any sequence. c. MAPAD INVALID.
Servicing LOGAIR Terminal	3	A	a. Enter the terminal identifier from DoD 4500.32-R, MILSTAMP. b. Alpha or blank. c. LOG TERM INVALID.
Servicing QUICKTRANS Terminal	3	A	a. Enter the terminal identifier from DoD 4500.32-R, MILSTAMP. b. Alpha or blank. c. QUICK TERM INVALID.
MRO Processing Volume	5	N	a. Enter the number of MROs to be documented on Saturdays, Sundays or Holidays, or leave blank. b. Numeric or blank. Zero fill high order positions. If option is used, value must be 00001 or greater. c. MRO VOL INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Planned LI Assigned to Packing Chute	4	N	a. Enter the planned quantity of line items to be assigned to each packing chute for all routine, IPG I and II batches (must be 25 or more). b. Numeric greater than 0024. Leave blank if option is not applied. c. PL CAP INVALID.
Maximum LI Accumulated In Packing Chute	4	N	a. Enter the maximum number of line items to be accumulated in each packing chute (must be equal to or greater than planned line items above). b. Numeric, equal to or greater than planned line items. Leave blank if option is not applied. c. MAX CAP INVALID.
Shipment Planning Worksheet Option	1	N	a. Enter: 0 - Enter no SPE is required for small parcel shipment. 1 - When SPW is required for multiple LI small parcel SUs. 2 - MOFAST Depots requiring SPW for IPG I and II freight SUs. 3 - MOFAST Depots requiring SPW for multiline item small parcel SUs and IPG I and II freight SUs. b. Numeric, 0, 1, 2 or 3 only. c. SPW OPTION INVALID.
Warehouse Selection Option for Reports	1	N	a. Enter 1, 2 or 3 (see note 2). b. Numeric 1, 2 or 3 only. c. WHS OPTION INVALID.
ZBM-ZBP Option	1	N	a. Enter 1, 2, 3, 4, 5, 6, 7 or 8 (see note 3). b. Numeric 1, 2, 3, 4, 5, 6, 7 or 8 only. c. ZB_ OPTION INVALID.

NOTE 2: Provide optional sequencing of shipment documentation as follows:

a. Provides means to select either the first one, first two, or first three positions of the prime location as area/warehouse control on the following outputs:

(1) Summary Analysis of Release Workload, part 1 (appendix F-41).

(2) Summary Analysis of Release Workload, part 2 (appendix F-42).

(3) Workload Forecast (appendix F-38).

(4) DD Form 1348-1, Sort Option #2.

b. The sequencing need not correspond to the Stock Location Group selected to break Shipment Units by warehouse location.

NOTE 3: Provides options for the prepunching of ZBM and cards with MRO documentation as follows:

Possibilities:

a. ZBM for each parcel post line item.

b. ZBM for each freight line item.

c. ZBP for each parcel post shipment unit.

d. ZBP for each freight shipment unit.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
ZEN Option	1	N	a. Enter 1 or 2 (see note 4). b. Numeric 1 or 2 only. c. ZEN OPTION INVALID.
DICOMSS Compatibility Code Option	1	A	a. Enter Y if appendix A-68 Codes E and F are to be considered equal to Codes B and C respectively during warm month. Enter N if option is not exercised. b. Alpha Y or N. c. COMP OPTION INVALID.
F-78 Sequence Option	1	A/N	a. Enter a Y for Warehouse Area Code sequence. b. Enter a N or blank if Warehouse Area Code should not be considered the major sequence. c. SEQUENCE OPTION INVALID.
DICOMSS Cycle Extent Code Option	1	N	a. Enter the number of cycles to be included in the cycle code extent (maximum six). Leave blank if option is not exercised.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
			b. Numeric 1, 2, 3, 4, 5, 6 or blank. c. CYCLE OPTION INVALID.
Mechanized Warehouse Automatic Clear Option	1	N	a. Enter the number of days (1 through 9) after the Document Release Date required to ship IPG III parcel post shipments from mechanized warehouse areas (see note 5). Enter 0 to exempt Depot from automatic clear process. Do not leave blank. b. Numeric 0 through 9, no blanks. c. MECH CLR OPTION INVALID.

NOTE 4: Prepunch ZEN cards for all freight shipments with MRO documentation and provide the following options:

a. Option 1 - ZEN card for each shipment unit.

b. Option 2 - ZEN card for each line item.

NOTE 5: The automatic clear date for IPT Is and IIs will be assigned in accordance with appendix D-98. This date will be used as the shipment date. Actual automatic clearing of inprocess records will take place 2 days later for IPG Is and IIs and 3 days later for IPG IIIs.

Options to be provided:

a. Option 1 - 1, 2, 3, 4.

b. Option 2 - 2, 3.

c. Option 3 - 2, 3, 4.

d. Option 4 - 3, 4.

e. Option 5 - 1.

f. Option 6 - 2.

g. Option 7 - 3.

h. Option 8 - 4.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Other Warehouse Automatic Clear Option	1	N	a. Enter the number of days (1 through 9) after the Document Release Date required to ship IPG III parcel post shipments from other than mechanized warehouse areas. Enter 0 to exempt depot from automatic clear process. Do not leave blank. b. Numeric 0 through 9, no blanks. c. OTHER CLR OPTION INVALID.
Priority Options For Multiline Documentation	1	A	a. Enter A, B, C, D, E or F (see note 6). b. Must be A, B, C, D, E or F only. c. PRIORITY OPTIONS INVALID.

NOTE 6: Provides options for documentation of additional high priority cycles as follows:

a. Possibilities:

(1) Force IPG I multiline MROs to be output as single lines and sort with the same additional priority cycle.

(2) Initiate immediate documentaion of multiline IPG I MROs and separate as individual output of all sort groups, immediately following the single line sort groups.

(3) Document multiline IPG II MROs and sort with the IPG II single lines from the same additional high priority cycle.

(4) Initiate immediate documentation of multiline IPG II MROs and separate as an individual output of all sort groups, immediately following the single line sort groups.

(5) Defer documentation of IPG II multiline MROs and maintain integrity as an individual output of all sort groups for future documentation.

b. Options provided:

Option Code:

A = possibilities 1 and 3
B = possibilities 1 and 4
C = possibilities 1 and 5
D = possibilities 2 and 3
E = possibilities 2 and 4
F = possibilities 2 and 5

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Modified PDT Option	1	A	a. Enter A if option is desired for PDT assignment after a non-workday Enter B if PDT assignment is before the non-workday or blank if option is not desired. b. Alpha A, B or blank. c. MOD PDT OPTION INVALID.
Print Suppression Flag	1	A	a. Enter S to cause the following transactions not to print on the F-84, Activity Address Record Listing; otherwise, leave blank. DIC TA1 adds for FEDSTRIP Addresses (as indicated by numeric in the first position of the AAC). DIC TA4 and MA3 deletions. DIC TA3 and MA2 changes to inactive addresses (as indicated by no DCR Code or no PP Zone Code). b. Alpha S or blank. c. PRINT OPTION INVALID.
Return Address Option	1	A	a. Enter Y if return address is to be printed on DD Form 1348-1 or N if option is not desired. b. Alpha Y or N. c. ADD OPTION INVALID.
Extended MRO Bank Bank Option	1	A	a. Enter Y if option is desired to extend banking or N if option is not exercised. b. Alpha Y or N (mandatory entry). c. BANK OPTION INVALID.
Inventory Consolidation Option	1	A	a. Enter Y if consolidation of MROs under inventory is desired. Enter N if single line shipment units are desired. b. Alpha Y or N. c. INV CON OPTION INVALID
SEAVAN Indicator Option	1	A	a. Enter Y if Automated SEAVAN Shipment Planning is desired. Enter N, if not. b. Alpha Y or N. c. SEAV OPTION INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
AWARES IND	1	A	Enter space if depot is not under AWARES. Enter A to sort and produce DD Form 1348-1 on separate tapes by IPG. Enter B to sort and produce 1348-1 all on one tape.
MROs from Inventory Sort Group Option	1	A	a. Enter Y if option is desired. Enter N, if not. b. Alpha Y or N. c. INV OPTION INVALID.
Grant Aid Sort Group Option	1	A	a. Enter Y if option is desired. Enter N, if not. b. Alpha Y or N. c. GRANT AID OPTION INVALID.
Hazardous Sort Group Option	1	A	a. Enter Y if option is desired. Enter N, if not. b. Alpha Y or N. c. HAZD OPTION INVALID.
FMS Duplicate Sort Group Option	1	A	a. Enter Y if option is desired. Enter N, if not. b. Alpha Y or N. c. FMS OPTION INVALID.
Maximum SU Weight	5	N	a. Enter desired maximum SU weight. Must be within 10,000 to 99,999 lbs. Enter zeros if option not used. b. Numeric. c. SU WT INVALID.
Maximum SU Cube	4	N	a. Enter desired maximum SU cube. Must be equal to or less than 2,500. Enter zeros if option not used. b. Numeric. c. SU CUBE INVALID.
MRO Quantity Override	1	N	a. Enter 1 through 9, or leave blank if option is not desired. b. Numeric or blank. c. MRO QUANTITY INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Depot Phone No	7	N	a. Enter the Telephone Number of the Shipping Depot. b. Numeric. c. Depot Phone No. invalid.
DRMO Phone No	7	N	a. Enter the Telephone of the Predesignated Consignee DRMO. b. Numeric. c. DRMO Phone No. Invalid.
Minimum Dollar Cost	5	N	a. Enter Item Dollar Value for Determination of Shipment to be processed as numbered insured or NO GO Parcel Post if no alternative small parcel modes are available and shipment meets small parcel criteria. b. Numeric. c. Non-numeric Data in Field.
Special Requirement Q	1	A	a. Enter Y if material is subject to damage from heat, over 40 degress C. N if option is not exercised. b. Alpha Y or N. c. SRC Option Q Invalid.
Special Requirement H	1	A	a. Enter Y if material is subject to damage from freezing. N if option is not exercised. b. Alpha Y or N. c. SRC Option H Invalid.
MOFAST Exclusion Data Issue Priority Group	1	N	a. Enter: 1 to exclude IPG I. 2 to exclude IPG II. 3 to exclude IPG I and II 4 to exclude IPG III. 5 to exclude IPG I, II and III. 6 to exclude IPG I, II and III. NOTE: Non-MOFAST depots enter a 6 in field and leave remaining fields (Location Group Code and Geographical Area Code) blank. b. Numeric 1, 2, 3, 4, 5 or 6 (mandatory 6 for non-MOFAST Depots) or blank. c. IPG OPTION INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Location Group Code	36	A/N	a. Enter Location Group Codes to be excluded in alpha/numeric sequence. b. Sequential alpha/numeric with trailing unused fields blank or all blank. c. LGC INVALID.
Geographical Area Code	11	A/N	a. Enter Geographical Area Codes to be excluded in alpha/numeric sequence. b. Sequential alpha with trailing unused fields blank or all blank. c. GAC INVALID.
Hazardous Type Cargo Codes	1	A/N	a. Enter type cargo code as found in appendix A-34. b. Alpha/numeric, may be blank. c. Haz Code Invalid.
Hazardous Storage Compatability Codes	2	A/N	a. Enter type storage material as found in appendix A-33. b. Alpha/numeric entry. c. Haz Storage Invalid.
Mechanized Area Workload Batch Options:			
Location Group Code	1	A/N	a. Enter X for first Location Group Code. Numeric for remaining two codes. b. Alpha X, numeric or blank. c. LGC INVALID.
Batch Number	1	N	a. Enter for each Location Group: 1 for first batch, 2 for second batch. b. Numeric 1 or 2. c. BATCH NO INVALID.
Maximum Shipping Units	3	N	a. Enter maximum number of Shipping Units in Batches 1 and 2. b. Numeric 040 through 999 only, no blanks. c. MAX SU INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Maximum Lines	4	N	a. Enter maximum total lines in Batches 1 and 2. b. Numeric 1000 through 9999 only, no blanks. c. MAX LNS INVALID.
Maximum Multilines	4	N	a. Enter maximum multilines in Batches 1 and 2. b. Numeric, not all zeros or blanks. c. MULTI LNS INVALID.
Multiline Percent	2	N	a. Enter percentage of multilines to total lines in Batches 1 and 2. b. Numeric, not all zeros or blanks. c. MULTI PCT INVALID.
Overflow Lines	4	N	a. Enter the number of lines acceptable over the maximum per Batches 1 and 2 if this represents total workload available. b. Numeric, not all zeros or blanks. c. OVER LNS INVALID.
Batching Parameter Option	1	N	a. Enter: 1 - For all IPG I, II and III MROs. 2 - For IPG II and III MROs. 3 - For IPG III MROs only. b. Numeric 1, 2 or 3 only. c. BATCH OPTION INVALID.
SU and TU General Assembly Areas:			
General Shipment Unit Assembly Area Weight	7	N	a. Enter the number of pounds above which freight shipment units are assigned an assembly area other than the General Assembly Area. Enter leading zeros. b. Numeric other than all zeros. c. SU WT INVALID.
General Shipment Unit Area Cube Limit	7	N	a. Enter the number of cubic feet above which freight shipment units are assigned other than the General Assembly Area. Enter leading zeros. b. Numeric other than all zeros. c. SU CU INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
General Shipment Unit Assembly Area	3	A/N	a. Enter the General Assembly Area (3 position Warehouse Area Code) to be used for all freight shipment units not exceeding the weight and cube limits entered above. b. Alphanumeric, no blanks. c. SU AREA INVALID.
General Transportation Unit Assembly Area Weight Limit	7	N	a. Enter the number of pounds above which Transportation Units are assigned an assembly area other than the General Assembly Area. Enter leading zeros. b. Numeric other than all zeros. c. TU WT INVALID.
General Transportation Unit Assembly Area Cube Limit			a. Enter the number of cubic feet above which Transportation Units are assigned an assembly area other than the General Assembly Area. Enter leading zeros. b. Numeric other than all zeros. c. TU CU INVALID.
General Transportation Unit Assembly Area	3	A/N	a. Enter the General Assembly Area to be assigned to Transportation Units not exceeding the weight and cube limits entered in the General Transportation Unit Assembly Area weight and cube limits above. b. Alphanumeric, no blanks. c. TU AREA INVALID.
Receipts Forecast Minimum Weight	5	N	a. Enter the minimum weight considered for receipts forecast. b. Numeric, no blanks. Must be greater than 00199. c. MIN WT INVALID.
Minimum Cube	4	N	a. Enter the minimum cube considered for Receipts Forecast. b. Numeric, no blanks. Must be greater than 0009. c. MIN CU INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Mechanized Materiel Handling System (MMHS):			
Maximum Weight	3	N	a. Enter the maximum weight to be picked from the bulk MMHS (pounds). b. Numeric. c. MAX WT INVALID.
Maximum Cube	4	N	a. Enter the maximum cube to be picked from the bulk MMHS (cubic feet). b. Numeric. c. MAX CU INVALID.
IPG I and II Shipment Unit Consolidation Criteria	4	N	a. Enter those Service codes by Service for which Air Eligible IPG I and IPG II are desired for consolidation. Material must be destined to one ultimate consignee. On consolidation of IPG I and IPG II the Service code must be equal, i.e., Army IPG I with Service code of A must also have a Service code of A for the IPG II. MOWASP System will reject any Service codes for consolidation that are not equal. SERVICE — CODES Army — A,B,C,W Air Force — D,E,F,J Marines — K,L,M Navy — N,P,Q,R Other — Y b. Alpha. Service Code must match Service code heading. c. SUC CD NOT EQUAL
Set Assembly Time Parameter On Depot Issue	2	N	a. Enter the numbers of days that an assembly PMRC record for an on-depot issue is not cleared it will be considered delinquent. b. Must be 01-99. c. INVALID MUST BE 01-99.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Set Assembly Time Time Parameter Off Depot Issue	2	N	a. Enter the number of days that an assembly PMRC record for an issue coming from depot is not cleared it will be considered delinquent. b. Must be 01-99. c. INVALID MUST BE 01-99.
(2) Part 2 - Stock Location Group Table			
Warehouse Location Designator	3	A/N	a. Enter the Location Designator to be grouped (see note 1). b. Alpha/numeric, no blanks (see note 1). c. LOC INVALID.
Stock Location Group	1	A/N	a. Enter the code under which the warehouse is to be grouped per appendix A-56. b. Alpha/numeric, no blanks. c. LOC GRP INVALID.
Sequence Option DD Form 1348-1	1	N	a. Enter the code corresponding to the option selected from appendix A-50. b. Numeric 1, 2, 3 or 4 only, no blanks. c. SEQ OPTION INVALID.
Sequence Option for DLA Form 674 and DD Form 1387	1	N	a. Enter the code corresponding to the option selected from appendix A-66. b. Numeric 1, 2, 3, 4 or 5 only, no blanks. c. SEQ OPTION INVALID.
Area Control Branch	1	A/N	a. Enter the appropriate Area Control Branch. b. Alpha/numeric or blank. c. ACB INVALID.
Maximum Vertical	1	A	a. Enter the indicator to sort MROs into high and low sequence. b. Alpha or blank. c. LEV IND INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Major Sort Group Option Code	1	A	a. Enter D or blank (appendix A-63). b. Alpha D or blank. c. SORT OPTION INVALID.
Major Sort Group Option Code			a. Enter E or blank (appendix A-63). b. Alpha E or blank. c. SORT OPTION INVALID.
Major Sort Group Option Code	1	A	a. Enter H or blank (appendix A-63). b. Alpha H or blank. c. SORT OPTION INVALID.
Major Sort Group Option Code			a. Enter J or blank (appendix A-63). b. Alpha J or blank. c. SORT OPTION INVALID.
Area Control Branch Sort Group Option	1	A	a. Enter Y (yes) or N (no) to indicate if DD Forms 1348-1 are to be sorted to major groupings within Area Control Branch. b. Alpha Y or N. c. ACB SORT OPTION INVALID.
Action Code	1	A	a. Enter A to add, C to change, D to delete. b. Alpha A, C or D. c. INVALID ACTION.

NOTE 1:

a. On the initial table load it is mandatory that the first input for the table be coded with XXX as the Warehouse Location Designator with a valid character in the Stock Location Group field. This coding is used as the default Stock Location Group Code. If none of the positions of the Warehouse Location Designator being compared are found on the table, the Stock Location Group Code assigned to Warehouse Designator XXX will be selected.

b. This field may be loaded in one of three formats (see figure 1 for sample table load):

(1) AXX (A is any alpha) represents a Warehouse Area grouping and can be used to group several Warehouse Location Designators by Area when all other elements to be loaded to the table are the same except the Station (2nd and 3rd positions) of the Warehouse Location Designator.

(2) ANX (N is any number) represents a grouping by Warehouse Area and the first position of the Station. This format is used when all the other elements

to be loaded to the table are the same within this grouping. This format can be used in conjunction with AXX format to extract a Station Warehouse Area.

(3) ANN represents a grouping by Warehouse Area and a specific station (2nd and 3rd positions) of the Warehouse Location Designator. This format can be Location Designator from either of the above groupings.

NOTE 2: Action Code D will delete an item from the table. Action Code A will add a new item to the table. Action Code EC will allow changes to the Stock Location Group Code or Sequence Option Codes for an item already on the table.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL (Stock Location Group Table)	Probable Cause: Computer file limit has been filled to capacity. The table has a maximum capacity of 157 entries. Action: Based upon priorities, a delete (D) action must be input to reduce the file and follow with an add (A) action to add the desired record.
RECORD ON FILE (Stock Location Group Table)	Probable Cause: A record already exists for the pertinent control field. Action: Unnecessary to reenter data. Proceed to the next transaction.
MRO BATCHING FACTOR INVALID (Table of Controls, Constants and Options)	Probable Cause: a. Twice the total of the maximum multilines in Batch 1 is less than the maximum total lines in Batch 1. b. The total of the overflow lines in Batch 1 is greater than the maximum multilines in Batch 1. c. Twice the total of the maximum multilines in Batch 2 is less than the maximum total lines in Batch 2. d. Total of the overflow lines in Batch 2 is greater than the maximum multilines in Batch 2. Action: a. Review transaction for possible input error. The maximum total lines in Batch 1 cannot be greater than twice the total of the maximum multilines in Batch 1.

ERROR MESSAGE	CAUSE/ACTION
	b. Review transaction for possible input error. The total of the overflow lines in Batch 1 cannot be greater than the maximum multilines in Batch 1.
	c. Review transaction for possible input error. The maximum total lines in Batch 2 cannot be greater than twice the total of the maximum multilines in Batch 2.
	d. Review transaction for possible input error. The total of the overflow lines in Batch 2 cannot be greater than the maximum multilines in Batch 2.

6. PRINT DISPLAY

If a facsimile of the display is desired, depress the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

FMS TRANSCEIVING/COUNTRY TABLE
PART E
TABLE 05

1. PURPOSE

This table is used to indicate countries capable of receiving FMS Notice of Availability (NOA) by AUTODIN and the corresponding communications routing. It is also used to provide the in-the-clear country name.

2. REFERENCES

a. Appendix B-53, FMS Notice of Availability (NOA) Key Document.

b. Appendix B-54, FMS Notice of Availability (NOA) Detail Document Entries.

c. Appendix D-29, Part E, FMS Country Code Table.

d. Appendix D-132, NOA Process.

3. CRT INITIALIZATION

Key in $$UWSR05 and depress the ENTER key.

4. DATA ELEMENTS

a. Table limit - 148 entries.

b. The following fields of data are to be input through the remote (CRT) terminal:

FIELD LEGEND	NO OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	2	A	a. Enter D (delete) or A (add). b. Alpha D/A only. c. ACTION CODE INVALID - REENTER.
Country Code	2	A/N	a. Enter desired country code (appendix A-19). b. Alpha/alpha, alpha/numeric, no blanks. c. COUNTRY CODE INVALID - REENTER.

FIELD LEGEND	NO OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Country Name	30	A	a. Enter clear text country name (appendix A-19). b. Action Code A - Alpha, not all blank; Action Code D - blank. c. COUNTRY NAME INVALID.
Service Code (Occurs up to 5 times within each country code) (see note)	1	A	a. Enter B, P, D, K, T or blank. b. Alpha or blank. If alpha, must have corresponding COMMRI. c. SERVICE CODE INVALID.
Communication Routing Indicator (occurs on a 1 to 1 basis with Service Code) (See note)	7	A/N	a. Enter applicable code (DoD 4140.17 Supplement 2) b. Alpha/numeric or blank. Not blank if Service Code is filled. c. N/A
Agency Name and Office Address (occurs once on the table)	30	A/N	a. Enter the address of the submitting office. b. Alpha/numeric c. AGY-OFC ADRS INVALID.

NOTE: Separate entries are required for each service code and corresponding communication routing.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL	Probable Cause: Entry exceeded table capacity, maximum number of entries is 148. Action: A delete (D) action must be input to reduce the file before an add (A) action can be accomplished.
RECORD ON FILE	Probable Cause: A record already exists for the pertinent control field. Action: Proceed to the next transaction.

ERROR MESSAGE	CAUSE/ACTION
RECORD NOT ON FILE	Probable Cause: A delete (D) action was made with a country code which did not match an existing record. Action: Review transaction for possible error input. Reenter valid data.

6. PRINT DISPLAY

If a facsimile of the display is desired, depress the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

AREA SHIPPING CYCLE TABLE
PART F
TABLE 06

1. PURPOSE

This table is used for the establishment of:

a. The depot option for selecting the number of working days the Document Release Data (DRD) precedes the Planned Date to Transportation (PDT) for Location Group Code X and Location Group Codes other than X.

b. A table containing all of the days of the year (Julian date) including the first 90 days of the following year which are considered to be a PDT for the depot concerned. For this application, a PDT is defined as any day of the year when IPG III MROs will be offered to transportation and may include Saturdays, Sundays and Holidays at the option of the depot.

2. REFERENCES

a. Appendix A-97, Geographical and Subarea Codes.

b. Appendix D-29, Part F.

3. CRT INITIALIZATION

a. Key in $$UWSR06. Depress the ENTER key.

b. The first panel will display the option to update or inquire the Table. Enter U to update or I to inquire. If Inquiry is for other than the first day of the year, also enter the Julian date. Depress the ENTER key.

c. If a U is entered, the next two panels will display the table controls. This control panel is used for the:

(1) Establishment of the year.

(2) Establishment of the number of days the DRD precedes the PDT for Location Group Codes other than X.

(3) Establishment of the number of days the DRD precedes the PDT for Location Group Code X.

(4) Establishment of regular non-workdays.

(5) Establishment of other non-workdays, e.g., holidays.

(6) Establishment of the day or days of the week for which workload for a particular Geographical Area is to be processed.

d. If an I is entered, the first panel displayed will be the first 19 days of the year established. If an I and the Julian date is entered, the first panel will be the one containing the date entered. Depressing the ENTER key will display succeeding days of the year until the last panel is reached.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal:

First Control Panel:

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
New Year Option	1	A	a. Enter Y if a new year is to be established or N if not. Mandatory entry. b. Alpha Y or N. c. YEAR CODE INV.
Year	4	N	a. Enter year to be established, e.g., 1980. This entry will establish the calendar for each day of the year plus the first 90 days of following year. Mandatory entry if Y entered in new year option above. b. Numeric, or blank. c. YEAR INV.
Days DRD to PDT, LGC Other Than X	1	N	a. Enter the number of working days by which the DRD should precede the PDT in Stock Location Group Codes other than X. See note 1. b. Numeric 1 through 5 only. c. DRD DAYS INN
Number of Days from DRD to PDT, LGC X Only	1	N	a. Enter the number of working days by which the DRD should precede the PDT in Stock Location Group Code X only. See note 1. b. Numeric 1 through 5 only. c. AREA X DAYS INV.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Regular Non-Workday Indicator	1	A	a. Establish regular non-workdays by entering N under the appropriate day(s) of the week. These days will be flagged by an asterisk (*). b. Alpha N or blanks. c. NON WK DAYS INV.
Other Non-Workday Option	1	A	a. Enter N if establishment of other non-workdays (e.g., holidays) is desired. Enter W if an established other non-workday is to be changed to a workday. b. Alpha N or W. c. OTHER CD INV.
Other Non-Workdays	5	N	a. If an N is entered in above option, enter Julian date of those days to be considered other non-workdays. Maximum 15 entries, days flagged by an asterisk (*). If these days are already established and require change to a workday, enter W in above option and enter day(s) to be changed. b. Numeric. c. OTHER YYDDD INV.
Day of the Week Indicator	1	A	a. Enter an X under the Geographical Area Code and opposite the day of the week for which workload is to be processed. Enter an R to Remove a Previously established Days Workload. See note 2. b. Alpha X or R c. SHIP DAY INV.

NOTE 1: The number of days by which the DRD precedes the PDT may be changed by Entering the desired number of days and depressing the ENTER key.

NOTE 2: Geographical Area Codes are Locally assigned in accordance with appendix A-97 and are limited to 35 areas (A through Z, 1 through 9).

5. PROCESSING OTHER VIOLATIONS

Not applicable.

6. PRINT DISPLAY

If a facsimile of the display is desired, press the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

TARIFF NUMBER CROSS-REFERENCE TABLE AND DEPOT IDENTIFICATION TABLE
PART G
TABLE 07

1. PURPOSE

a. Tariff Number Cross-Reference Table

(1) This table is used in conjunction with Freight Description File Transactions originating from entry of DICs ZVK and ZVL. Tariff Identification Codes noted in field positions 16-17 (DIC ZVK) or field positions 17-18 (DIC ZVL) which match this table are converted to the in-the-clear tariff number prior to accessing the Freight Description File. Table limit - 50 entries.

(2) Only tariffs which require special commodity descriptions are to be assigned to this table. Depots will develop their own two-position tariff identification code for each tariff added to the file.

b. Depot Identification File

This table establishes a Depot Identification Code for use when processing transactions associated with updating the Freight Description File. It is mandatory that depots enter their applicable codes into this table.

2. REFERENCES

a. Appendix B-149, Freight Description - NMFC Data Entry Format.

b. Appendix B-150, Freight Description - NIIN Data Entry Format.

c. Appendix D-29, Part G.

3. CRT INITIALIZATION

a. Key in $$UWSR07. Depress the ENTER key.

b. Both tables will appear on the same panel.

4. DATA ELEMENTS

a. The following fields of data are to be input through the remote (CRT) terminal:

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Tariff Identification	2	A/N	a. Enter locally developed number. b. Alpha/numeric, no blanks. c. TARIFF IDENT INVALID - REENTER.
Tariff Number	10	A/N	a. Enter the in-the-clear tariff number associated with the Tariff Identification Number. Enter data from left to right. Leave unused positions blank. b. Alpha/numeric, not all blanks. c. TARIFF NO. INVALID - REENTER.
Action Code	2	A	a. Enter D - Delete, A - Add. b. Alpha D/A only. c. ACTION CODE INVALID - REENTER.

b. Depot Identification Table

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Depot Identification Code	1	A	a. Enter A - DDMP B - DDTC C - DCSC E - DESC M - DDMT R - DGSC U - DDOU b. Alpha A, B, C, E, M, R, U. c. DEPOT ID INVALID - REENTER.
Action Code	2	A	a. Enter C. b. Alpha C only. c. ACTION CODE INVALID - REENTER.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL	Probable Cause: Computer file limit has been filled to capacity. The Tariff Number Cross-Reference Table has a maximum capacity of 50 entries. Action: Based upon priorities, a delete (D) action must be input to reduce the file and follow with an add (A) action to add the desired record.

ERROR MESSAGE	CAUSE/ACTION
RECORD ON FILE	Probable Cause: A record already exists for the pertinent control field. Action: Unnecessary to reenter data. Proceed to next transaction.
RECORD NOT ON FILE	Probable Cause: The pertinent data field does not match an existing record. Action: Review transaction for possible error input. Reenter valid data.

6. PRINT DISPLAY

If a facsimile of this display is desired, press the PRINT key and a copy panel will be printed.

APPENDIX B-66

TRANSPORTATION APPROPRIATION TABLE
PART H
TABLE 08

1. PURPOSE

This table is used to maintain transportation appropriation numbers and funds assigned to defense depots for movement of materiel. Table limit - 55 entries.

2. REFERENCE

Appendix D-29, Part H.

3. CRT INITIALIZATION

Key in $$UWSR08. Depress ENTER key.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Transporation Appropriation Code	2	A/N	a. Enter appropriate code (appendix A-93). b. Alpha/numeric, no blanks. c. TRANS APP INVALID - REENTER.
Transportation Fund Citation	53	A/N	a. Enter complete fund citation from appendix A-93. Leave positions blank as spaces appear in appropriation. Leave unused positions blank. b. No validation. c. No error message.
Suballocation Amount	10	A/N	a. Enter suballocated amount in dollars and cents. Prefix zeros as required to fill field. If no funds are specifically suballocated for the appropriation, fill field with alpha Xs. b. Alpha (X only)/numeric. c. SUBAMT INVALID - REENTER.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	2	A	a. Enter: D - Delete A - Add C - Change b. Alpha D/A/C only. c. ACTION INVALID - REENTER.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL	Probable Cause: Computer file limit has been filled to capacity. Maximum capacity is 55 entries. Action: Based upon priorities, a delete (D) action must be input to reduce the file and follow with an add (A) action to add the desired record.
RECORD ON FILE	Probable Cause: A record already exists for the pertinent control field. Action: Unnecessary to reenter data. Proceed to next transaction.
RECORD NOT ON FILE	Probable Cause: The pertinent data field does not match an existing record. Action: Review transaction for possible error input. Reenter valid data.

6. PRINT DISPLAY

If a facsimile of the display is desired, depress the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

DATA BANK FSC TABLE
PART I
TABLE 09

1. PURPOSE

To establish and maintain the Prime Depot for each FSC on the Data Bank. Table limit - 492 entries.

2. REFERENCES

a. Appendix A-69.

b. Appendix D-29, Part I.

3. CRT INITIALIZATION

Key in $$UWSR09. Depress ENTER key.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal:

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Local Depot	1	A	a. Enter: A - DDMP B - DDTC C - DCSC E - DESC M - DDMT R - DGSC U - DDOU b. Alpha A, B, C, E, M, R or U only. c. LOCAL DEP INVALID.
Federal Supply Class	4	N	a. Enter FSC. b. Numeric, no blanks. c. FSC INVALID.
Prime Depot	1	A	a. Enter second character of RIC of Prime Depot. b. Alpha, no blanks. c. PRIME DEPOT INVALID.
Action Code	2	A	a. Enter D - Delete and A - Add.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL	Probable Cause: Computer file limit has been filled to capacity. The Data Bank FSC Table has a maximum capacity of 492 entries. Action: Based upon priorities, a delete (D) action must be input to reduce the file and follow with an add (A) action to add the desired record.

6. PRINT DISPLAY

If a facsimile of the display is desired, depress the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

COUNT CARD MATRIX TABLE
PART J
TABLE 10

1. PURPOSE

This table serves three purposes:

a. Establishment of a Matrix Table for batching and sequencing of count cards.

b. Establishment of Man-Hour Standards for Inventory Type Storage Codes.

c. Establishment of inventory acceptance options from $.00 to $800.00 for all DLA managers, any three non-DLA managers, and all other managers.

2. REFERENCES

a. Appendix A-89.

b. Appendix D-29, Part J.

3. CRT INITIALIZATION

Key in $$UWSR10. Depress the ENTER key. The first panel will display the Matrix Table. Depress the ENTER key again to display the second panel which will contain the man-hour standards and inventory acceptance options.

4. DATA ELEMENTS

a. The following fields of data are to be input through the remote (CRT) terminal for the establishment of a Matrix Table for batching and sequencing count cards.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Table Identification	1	A	a. Enter Matrix Table Identification. X is reserved to identify mechanized complex. Other alphas may be used. Maximum 10. b. Alpha only. c. TABLE ID INV.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Beginning Location	3	A/N	a. Enter beginning 3-digit Location Code for warehouse area (see note). b. First position alpha, last two positions numeric. c. LOC CODE INV.
Ending Location	3	A/N	a. Enter ending 3-digit Location Code immediately following beginning location entry. May be the same as beginning location if only one location desired (see note). b. First position alpha, equal to first position of beginning location. Last two positions, numeric. c. LOC CODE INV.
Action Code			a. Enter D to Delete or A to Add b. Alpha D or A only c. Action Code INV.

NOTE: A maximum of 12 Location Groups may be entered for each table identification. Locations 1 through 6 will be entered on the first line for each table. Locations 7 through 12 will be entered directly below locations 1 through 6.

b. The following fields of data are to be input for the establishment of Man-Hour Standards for Inventory Type Storage Codes:

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Inventory Type Storage Code	1	A	a. Enter Inventory Type Storage Code. Leave blank if updating acceptance option. Code A - Warehouse Bulk/Rack Code B - Warehouse Bin Code C - Shed Bulk/Rack Code D - Open Storage Code X - Other Storage

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
			b. Alpha A, B, C, D and X only. c. STORAGE CD INV.
Man-Hour Standard	2	N	a. Enter appropriate Man-Hour Standards for each Inventory Storage Code. Leave blank if updating acceptance option. b. Numeric filled. c. MANHOURS INV.

c. The following fields of data are to be input for the establishment of Inventory Acceptance Options:

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
DLA Manager Code (7 Occurrences)	1	A	a. Enter code indicating DLA Manager or leave blank. b. Alpha C, E, G, I, M, S or T. May be blank. c. DLA-MGR INV.
Non-DLA Manager Code (3 Occurrences)	1	A/N	a. Enter code indicating Non-DLA Manager or leave blank. b. Alpha/numeric other than C, E, G, I, M, S or T. May be blank. c. NON-DLA INV.
Other Manager Codes	1	A/N	a. Enter dollar sign ($). b. Special character $. c. OTHER MGR INV.
Acceptance Option	3	N	a. Enter Dollar Acceptance Option for each Manager code or leave blank. b. Numeric less than $800.00 or blank. c. ACCEPT OPT INV.
Action Codes	2	A	a. Enter: D - Delete or A to Add. b. Alpha D/A only. c. ACTION CODE INV.

5. PROCESSING OTHER VIOLATIONS

Not applicable

6. PRINT DISPLAY

If a facsimile of the display is desired, depress the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

MOFAST TABLE AND CONTROL
PART K
TABLE 11

1. PURPOSE

a. Part 1 - Transit Time Table. This table supports the MOFAST System In-process file build, subsequent GBL preparation processes and the MILSTEP Intransit Data System (Intransit Data Card) in-process analysis of carrier performance. The table identifies the number of days required for delivery via each mode of transportation from a storage depot to a destination area identified by zones (Table 11, Part 4). Table limit - 576 entries.

b. Part 2 - Air Shipment Exemption Table. This table identifies SPLCs which represent areas that are exempt from air shipment. Shipments to these SPLC areas will, during the MOFAST process, be assigned Process Code SA and subsequently be assigned to a GBL. Table limit - 100 entries.

c. Part 3 - Table of Frozen Port Consignees. This table identifies consignees which have restricted water shipping because of ice bound port facilities. Shipments to these consignees will receive Process Code AC. This shipment unit will not be assigned to a GBL unless special entries are processed to change the planned method of shipment. Table limit - 100 entries.

d. Part 4 - Transit Zone Table. This table identifies SPLC or portions thereof which represent destination areas with common transit times. This table is used to access the appropriate Transit Time Table (part 1) by assignment of a Zone Code to a destination area by Standard Point Location Code (SPLC) or portions thereof. Table limit - 136 entries.

e. Part 5 - Dedicated Truck Table. Table entries represent destinations identified by local depot as eligible for Dedicated Truck Access. Destinations for all In-coming Material Release Orders will be matched against table. Matching Material Release Orders with issue Priority Designator (pos. 60-61) less than 09 will be downgraded to IPG 3 status. Material Release Order will be considered as IPG 3 for balance of process. Table limit - 10 entries.

2. REFERENCE

Appendix D-29, Part K.

3. CRT INITIALIZATION

a. Key in $$UWSR11.

b. Enter desired part number (1, 2, 3 or 4). Depress ENTER key.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal.

a. Part 1, Transit Time Table

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Zone Code	1	A	a. Data position 1 - Enter one digit to identify applicable table. b. Must be alpha. c. ZONE CD INVALID.
Mode Code	1	A/N	a. Enter Mode Code, appendix A-17. b. Must be alpha/numeric. c. CODE CD INVALID.
Transit Time Code	1	A/N	a. Enter Transit Time Code, appendix A-109. b. Must be alpha/numeric. c. TRANS TIME INV.
Action Code	2	A	a. Enter EA (delete), EB (add), EC (change). b. Must be alpha EA/EB/EC c. ACTION CD INV.

b. Part 2, Air Shipment Exemption Table

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Standard Point Location Code Data Position Data Position	6 (1-2) (3-6)	N	a. Data position 1-2 - Enter two-digit SPLC to identify major shipping destination area. Data position 3-6 - Enter last four digits of SPLC to identify a shipping destination. Leave blank if not required. b. Position 1-2 - Numeric, no blanks. Position 3-6 - Numeric or blanks. c. SPLC INVALID - REENTER.
Action Code	2	A	a. Enter EA (delete), EB (add). b. Must be alpha EA/EB only. c. ACTION CD INV.

c. Part 3, Table of Frozen Port Consignees

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Consignee Code	6	A/N	a. Enter pertinent consignee code. b. Alpha/numeric, no blanks. c. CONSIGNEE INV.
Action Code	2	A	a. Enter EA (delete), EB (add). b. Must be alpha EA/EB only. c. ACTION CD INV.

d. Part 4, Transit Zone Table

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Standard Point Location Code	6	N	a. Data position 1-2 - Enter first two digits of SPLC to identify major shipping destination area. Data position 3-4 - Enter next two digits of SPLC to identify county (or its equivalent) as part of the area covered. Data positions 5-6 - Enter last two digits of SPLC to identify shipping destination in which the transit time varies from the general SPLC (first four positions). Leave blank if not applicable. b. Position 1-2 - Numeric, no blanks. Position 3-4 - Numeric, no blanks if specific location requires next two positions. Position 5-6 - Numeric or blank. c. SPLC INVALID.
Data Position	(1-2)		
Data Position	(3-4)		
Data Position	(5-6)		
Zone Code	1	A	a. Enter Zone Code locally developed to identify applicable Transit Table. b. Must be alpha. c. ZONE CODE INV.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	2	A	a. Enter EA (delete), EB (add), EC (change). b. Must be EA/EB/EC only. c. ACTION CD INV.

e. Part 5, Dedicated Truck Table

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Destination Code	6	A/N	a. Destinations Identified as eligible for Dedicated Truck Process. b. Alpha/numeric, no blanks. c. DESTINATION INVALID.
Action Code	1	A	a. Enter A to Add, D to Delete. b. Alpha A and D only. c. ACTION CODE INVALID.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
PART NUMBER INVALID	Probable Cause: A part number other than 1, 2, 3 or 4 was entered. Action: Enter 1 to display part 1, 2 to display part 2, 3 to display part 3, or 4 to display part 4.
TABLE FULL	Probable Cause: Computer file limits have been filled to capacity. Part 1 has a maximum capacity of 576 entries. Part 2 and 3 each have a maximum capacity of 100 entries. Part 4 has a maximum capacity of 136 entries. Action: Based upon priorities, a delete (EA) action must be input to reduce the file and follow with an add (EB) action to add the desired record.
RECORD ON FILE	Probable Cause: A record already exists for the pertinent control field. Action: Unnecessary to reenter data. Proceed to next transaction.

ERROR MESSAGE	CAUSE/ACTION
REC NOT ON FILE	Probable Cause: Part 1 - Zone, Mode or Transit Time Code is not valid or does not match an existing record. Action: Review transaction for possible error input. Reenter valid data.

6. PRINT DISPLAY

If a facsimile of the display is desired, depress the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

MOFAST TABLE AND CONTROL
PART L
TABLE 12

1. PURPOSE

a. Part 1 - MOFAST Volume Destination Table. This table is used to identify shipment units which will be forwarded to volume shipping areas. Shipment unit records having DCRs which match this table will be flagged as a potential volume shipment. These shipment units can then be identified as such during MOFAST inquiry programs. Table Limit - 100 entries.

b. Part 2 - Mechanized Center Workload Report Parameters. This table identifies location group criteria used in formatting the F-177, MOFAST Mechanized Center Released Workload Schedule. Parameters will be used to establish report header categories and accumulate pertinent workload data to be presented in the report. Table Limit - eight parameters for each depot mechanized center. Each parameter will total 7 bytes.

2. REFERENCE

Appendix D-29, Part L.

3. CRT INITIALIZATION

Key in $$UWSR12. Depress ENTER key.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal.

a. Part 1: MOFAST Volume Destination Table

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	2	A	a. Enter D - Delete, A - Add. b. Must be alpha D/A only. c. ACTION CODE INVALID - REENTER.
Destination AAC	6	A/N	a. Enter Destination AAC. b. Must be alpha/numeric. May have three preceding blanks for POEs. c. DESTINATION AAC INVALID - REENTER.

b. Part 2: Mechanized Center Workload Parameters

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	2	A	a. Enter D - Delete, A - Add. b. Must be alpha D/A only. c. ACTION CODE INVALID - REENTER.
Low Location Parameter	3	A/N	a. Enter location group code. b. Alpha/numeric, no blanks. c. STOCK LOCATION GROUP INVALID - REENTER.
High Location Parameter	3	A/N	a. Enter location group code. b. Alpha/numeric, no blanks. c. STOCK LOCATION GROUP CODE INVALID - REENTER.
Warehouse Area	1	A/N	a. Enter mechanized warehouse area code. b. Alpha (X only)/numeric, no blank. c. WAREHOUSE AREA INVALID - REENTER.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
PART NUMBER INVALID	Probable Cause: A part number other than 1 or 2 was entered. Action: Enter 1 to display part 1 or 2 to display part 2.
TABLE FULL	Probable Cause: Computer file limits have been filled to capacity. Part 1 has a maximum capacity of 100 entries. Part 2 has a maximum of 8 entries per mechanized area. Action: Based upon priorities, a delete (D) action must be input to reduce the file and follow with an add (A) action to add the desired record.
RECORD ON FILE	Probable Cause: A record already exists for the pertinent control field. Action: Unnecessary to reenter data. Proceed to the next transaction.

ERROR MESSAGE	CAUSE/ACTION
RECORD NOT ON FILE	Probable Cause: Low Location Parameter, High Location Parameter, Report Category and/or Warehouse Area not valid data. Action: Review transaction for possible error input. Reenter valid data.

6. PRINT DISPLAY

If a facsimile of the display is desired, depress the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

ONE FREIGHT/ALL FREIGHT CONTROLS AND OPTIONS
PART M
TABLE 13

1. PURPOSE

a. Part 1 - Establish or delete controls and options to exempt MROs from One Freight/All Freight eligibility based on service code and IPG. Table limit - 24 entries.

b. Part 2 - Establish or delete controls and options to exempt MROs from One Freight/All Freight Eligibility based on Geographic Area. Table limit - 35 entries.

c. Part 3 - Establishes minimum weight for shipments to be eligible for One Freight/All Freight. Table limit - N/A.

d. Part 4 - Establish or delete exception minimum weights for One Freight/All Freight processing of high volume DCRs or consignees when the consignee is equal to the DCR. Table limit - 25 entries.

2. REFERENCE

Appendix D-29, Part M.

3. CRT INITIALIZATION

Key in $$UWSR13.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal.

a. Service Code and IPG Options

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	1	A	a. Enter A (add/change), D (delete). b. Alpha A or D. c. ACTION CODE INVALID - REENTER.
Service Code	1	A/N	a. Enter Service Code (appendix A-5). b. Alpha/numeric, or blank. c. SERVICE CODE INVALID - REENTER

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
IPG 1 Exempt Indicator	1	A	a. Enter X if IPG 1 for Service Code. b. Alpha X when Service Code entered. c. IPG INDICATOR INVALID - REENTER.
IPG 2 Exempt Indicator	1	A	a. Enter X if IPG 2 for Service Code. b. Alpha X when Service Code entered in a above, or blank. c. IPG INDICATOR INVALID - REENTER.
IPG 3 Exempt Indicator	1	A	a. Enter X if IPG 3 for Service Code. b. Alpha X when Service Code entered in a above, or blank. c. IPG INDICATOR INVALID - REENTER.

b. Geographic Area Options

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	1	A	a. Enter A (add), D (delete). b. Alpha A or D. c. ACTION CODE INVALID - REENTER.
Geographic Area Code	1	A/N	a. Enter X for Geographical Area Code to be designated exempt. b. Must be alpha X. c. GEO AREA INDICATOR INVALID - REENTER.

c. Minimum Weight Option

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	1	A	a. Enter A (Add/Change). b. Alpha A. c. ACTION CODE INVALID - REENTER.
Minimum Weight	5	N	a. Enter desired minimum weight. b. Numeric, no blanks. c. ACTION CODE INVALID - REENTER.

d. DCR and Minimum Weight Options

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	1	A	a. Enter A (add/change), D (delete). b. Alpha A or D. c. ACTION CODE INVALID - REENTER.
DCR or Consignee	6	A/N	a. Enter DCR or Consignee if the consignee is equal to the DCR. b. Alphanumeric, no blanks. c. DCR INVALID - REENTER.
Minimum Weight	5	N	a. Enter minimum weight for DCR. b. Numeric, no blanks. c. WEIGHT INVALID - REENTER.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL	Probable Cause: Computer file limits have been filled to capacity. a. Service Code and IPG Options - Maximum 24 entries. b. Geographic Area Options - Maximum 35 entries. c. DCR and Minimum Weight Options - Maximum 25 entries. Action: Based upon priorities, a delete action must be input to reduce the file and follow with an add action to add the desired record.

ERROR MESSAGE	CAUSE/ACTION
RECORD NOT ON FILE	Probable Cause: An input transaction was made which was other than NOT VALID or did not match an existing record. Action: Review transaction for possible error input. Reenter valid data.

6. PRINT DISPLAY

If a facsimile of the display is desired, depress the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

SHIPMENT PLANNING TABLE
PART N
TABLE 14

1. PURPOSE

a. This table establishes eligibility parameters for MROs to automatically be assigned to the SEAVAN shipment planning process.

b. This is an optional entry at all DLA Depots.

2. REFERENCE

Appendix D-29, Part N.

3. CRT INITIALIZATION

Key in $$UWSR14. Depress ENTER key.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal:

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	2	A	a. Enter D - Delete, A-Add. b. Must be Alpha A/D only. c. ACTION INVALID.
Commodity Manager	1	A/N	a. Enter Commodity Manager to be included in the SEAVAN Process (limit 36 entries). b. Alpha/numeric or blank. c. COM MGR INVALID.
Location Group Code	1	A/N	a. Enter warehouse location group code to be considered for SEAVAN (limit 36 entries). b. Alpha/numeric or blank. c. LOC GRP INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Service Code by	2	A/N	a. Enter service assignment code in first position to designate SEAVAN eligibility for IPG I and II shipments to eligible destinations. Enter applicable IPG option code in second position as follows: (limit 26 entries). 1 - If IPG I MROs are elibible. 2 - If IPG II MROs are elibible. 3 - If IPG I and II MROs are eligible. b. Alpha/numeric (first position). Numeric 1, 2 or 3 (second posi- c. SVC-IPG INVALID.
Weight	3	N	a. Enter minimum MRO weight to be considered for SEAVAN; zero fill high order positions. b. Numeric or blank. c. WEIGHT INVALID.
Cube	3	N	a. Enter minimum MRO cube to be considered for SEAVAN. Zero fill high order positions. b. Numeric or blank. c. CUBE INVALID.

5. PROCESSING OTHER VIOLATIONS

Not applicable.

6. PRINT DISPLAY

If a facsimile of the display is desired, press the PRINT key and and copy of the panel will be printed.

APPENDIX B-66

POD HAZARDOUS POE CROSS-REFERENCE TABLE
PART O
TABLE 15

1. PURPOSE

a. This table is used to identify specific POD/POE relationships for overseas shipment of hazardous materiel which differs from the POE established in the Consignee Address record.

b. This table should be loaded to be:

(1) In agreement with paragraph N-5 of DoD 4500.32-R, Volume I.

(2) Identify alternate POEs for hazardous shipments restricted from consignment through POE 104 (WRAFB CCP).

c. The table is accessed during the POD/POE address selection processes as it applies to overseas shipments of hazardous materiel. The table is accessed by the consignee POD from the MOWASP Address File. If a match is made, the POE from the table will be perpetuated into subsequent MOWASP documentation and processing actions. If a match is not made, the POE from the Consignee Address record will be utilized.

2. REFERENCE

Appendix D-29, Part O.

3. CRT INITIALIZATION

Key in $$UWSR15.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal:

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	2	A	a. Enter D (delete), A (add), C (change). b. Must be alpha D/A/C only. c. ACTION INVALID.
POD	3	A/N	a. Enter POD code. b. Alpha/numeric, no blanks. c. POD INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
POE	3	A/N	a. Enter POE code. b. Alpha/numeric, no blanks. c. POE INVALID.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
RECORD ON FILE	Probable Cause: A record already exists for the POD entered. Action: Review existing record. If correct, proceed to next transaction; if incorrect, reenter correct data using a change (C) action code.
REC NOT ON FILE	Probable Cause: Input is attempting to delete (D) or change (C) a record that is not on file. Action: Reenter data using an add (A) action code.
TABLE FULL	Probable Cause: Computer file limits (maximum 105 entries) have been filled to capacity. Action: Based upon priorities, a delete action must be input to reduce the file and follow with an add action to add the desired record.

6. PRINT DISPLAY

If a facsimile of the display is desired, press the PRINT key and a copy of the panel will be printed.

APPENDIX B-66

MASS CANCELLATION ALERT PARAMETERS
PART P
TABLE 16

1. PURPOSE

To suspend processing MROs which are candidates for mass cancellation actions.

a. Mass cancellation notification is forwarded to shipping activities in possession of applicable MROs via nonmechanical means (i.e., letter, TWX, etc.). Depot personnel are required to identify and flag the MRO candidates for cancellation by input of appropriate parameters to this table. A cancellation notification (DIC AC7) for each MRO will subsequently be transceived by the ICP to effect the cancellation.

b. MRO cancellation candidates may be flagged by a single element (i.e., activity address) or any combination of specified elements. Extreme care should be exercised to assess consequences when using combinations of elements. ANMCS/NMCS/999 and IPG exclusions will be valid only in conjunction with other entered elements.

c. In addition to the MROs in process being flagged for mass cancellation, all qualifying incoming MROs will receive the mass cancellation flag. All MROs will remain flagged until:

(1) An AM_ document modifier with a 555 RDD is received. The cancellation flag will be removed from the specific MRO.

(2) The parameters which orginally caused the cancellation flag are removed from this table.

2. REFERENCES

a. Appendix D-210.

b. Appendix D-211.

3. CRT INITIALIZATION

Key in $$UWSR16 and depress the ENTER key. The option table containing current data will appear on the screen. Additional displays, if more than one screen is necessary to display all data, will appear each time the ENTER key is depressed. The update entry format appears at the bottom of each screen and follows the format of table entries.

4. DATA ELEMENTS

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	1	A	a. Enter D (delete) or A (add). b. Must be alpha D/A, no blanks. c. ACTION CODE INVALID - REENTER.
Line Number	3	N	a. Enter the table line number to be deleted. If the entry is an addition, leave blank. b. Numeric, 1, 2 or 3 positions (less than 101) or blank. c. LINE NO INVALID - REENTER.
Consignee	6	A/N	a. Enter ultimate consignee. b. Must be 6 positions alpha/numeric or may be blank. c. CONSIGNEE CODE INVALID - REENTER.
Country	2	A	a. Enter Country code. b. Must be 2 positions alpha or may be blank. c. COUNTRY CODE - REENTER.
Project	3	A/N	a. Enter special project code. b. Alpha/numeric 3 positions or may be blank. c. PROJECT CODE INVALID - REENTER.
Service	1	A/N	a. Enter service assignment code. b. Alpha/numeric 1 position or may be blank. c. SERVICE CODE INVALID - REENTER.
Stock Number	13	A/N	a. Enter 2 position Federal Stock Group, 4 position Federal Stock Class or 13 position National Stock Number/Part Number. b. Must be 2, 4 or more for alpha/numeric. c. STOCK NUMBER INVALID - REENTER
IPG	3	N	a. Enter 1 in first position for IPG I, 2 in second position for IPG II and/or 3 in third position for IPG III. Leave appropriate positions blank for IPGs to be suspended.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
			b. First position 1 or blank, 2nd position 2 or blank, 3rd position 3 or blank. Maximum of 2 IPGs may be entered. c. IPG INVALID - REENTER.
ANMCS/NMCS Exclusion	1	A	a. Enter X if ANMCS/NMCS/999 MROs are not to be flagged for cancellation. b. Must be alpha X or blank. c. ANMCS/NMCS EXCL INVALID - REENTER.
Cutoff Date, After	4	N	a. Enter suspense cutoff date, after. b. Must be 4 positions numeric or blank. c. INVALID CUTOFF AFTER - REENTER.
Cutoff Date, Before	4	N	a. Enter suspense cutoff date, before. b. Must be 4 positions numeric or blank. c. INVALID CUTOFF BEFORE - REENTER.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL	Probable Cause: Number of table exceeds 90. Action: Review the table for unnecesary/duplicate entries and delete them accordingly with Action Code D.

APPENDIX B-66

SMALL PARCEL CARRIER TABLE
PART Q
TABLE 17

1. PURPOSE

a. Part 1 - Weight and Mode Table. This table is used to identify the mode of shipment code (appendix A-17) and to establish the maximum shipment unit weight for each small parcel carrier identified in the Carrier Selection Table. Table limit is 64 entries.

b. Part 2 - Small Parcel Carrier Selection Table. This table provides the capability to designate the preferred carrier for ANMCS/NMCS/999, IPG I, IPG II and IPG III small parcel shipments. Small parcel carrier codes established in this table must be maintained in the DoDAAD in accordance with appendices B-117 or B-126. Table limit is 32 entries.

2. REFERENCES

a. Chapter 4, Issue Transactions.

b. Chapter 60, Planning and Effecting Shipping Action.

c. Appendix A-17, Mode of Shipment Codes.

d. Appendix B-117, Activity Address File Mass Update.

e. Appendix B-126, Activity Address Local Data Change.

f. Appendix D-29, Part Q, Small Parcel Carrier Table.

g. Appendix D-172, MOWASP Mode of Shipment Selection.

3. CRT INITIALIZATION

a. Key in $$UWSR17.

b. Enter desired Part Number (1 or 2).

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal.

a. Part 1, Weight and Mode Table.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	1	A	a. Enter D to delete, A to add. b. Must be D or A (see note 3). c. INVALID ACTION CODE
Carrier Name	6	A/N	a. Enter locally developed carrier name. Leave unused positions blank (see note 2). b. Alpha/numeric, mandatory entry. c. NO CARRIER NAME ENTERED.
Weight	3	N	a. Enter the maximum SU weight for this carrier. Zero fill unused positions. b. Numeric, mandatory entry. c. WEIGHT INVALID.
Mode Code	1	A/N	a. Enter applicable mode code (appendix A-17). b. Alpha/numeric, mandatory entry for all carriers except USPS. Leave blank if USPS. c. MODE CODE INVALID

b. Part 2, Small Parcel Carrier Selection Table

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	1	A	a. Enter D to delete, A to add, C to change. b. Must be D, A or C. c. INVALID ACTION CODE.
Small Parcel Carrier Code	1	A/N	a. Enter the desired code to be assigned to this carrier configuration (see note 1). b. Alpha/numeric (alpha D and X and numeric 0 and 9 are not available for use). c. CARRIER CODE INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
ANMCS/NMCS/999	6	A/N	a. Enter locally developed name of carrier to be assigned to ANMCS/NMCS/999 shipments. leave unused positions blank. b. Alpha/numeric or blank (see note 2). c. INVALID CARRIER NAME.
IPG-1	6	A/N	a. Enter locally developed name of carrier to be assigned to IPG-1 shipments. Leave unused positions blank. b. Alpha/numeric or blank (see note 2). c. INVALID CARRIER NAME.
IPG-2	6	A/N	a. Enter locally developed name of carrier to be assigned to IPG-2 shipments. Leave unused positions blank. b. Alpha/numeric or blank (see note 2). c. INVALID CARRIER NAME.
IPG-3	6	A/N	a. Enter locally developed name of carrier to be assigned to IPG-3 shipments. Leave unused positions blank. b. Alpha/numeric or blank (see note 2). c. INVALID CARRIER NAME.

NOTE 1: Application of this code is maintained in the DoDAAD in accordance with appendices D-117 or B-126. Updating the Address File with this code will result in the printing of the designated carrier name on all MROs falling within the maximum weight limits established in the Weight and Mode Table (part 1 of this table). Small parcel shipments to uncoded consignees or DCRs will be automatically planned for USPS.

NOTE 2: Carrier name, mode (except USPS) and maximum weight must be established in part 1 of this table prior to being valid in part 2. USPS will be the standard name for the United States Postal Service. All other carrier names may be locally developed. Carrier name fields which are left blank will be interpreted as USPS.

NOTE 3: Delete actions initated in part 1 will cause the removal of the applicable carrier from part 2 as well.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
TABLE FULL	Probable Cause: Computer file limit has been filled to capacity. Table limits are 64 for part 1 and 32 for part 2. Action: Based on priorities, a delete (D) action must be input to reduce the file and follow with an add (A) action to add the desired record.
RECORD ON FILE	Probable Cause: Part 1 - A carrier name already exists for the name entered. Part 2 - Carrier code entered matches an existing record. Action: Part 1 - Unnecessary to reenter data. Part 2 - Assign a different carrier code.
NOT IN PART 1	Probable Cause: The carrier name entered in part 2 has not been established in part 1. Action: Establish the carrier name, mode and weight in part 1.
RECORD NOT ON FILE	Probable Cause: A delete action was entered against a record that is not on file. Action: Review transaction for possible error input. Reenter valid data.
DUPLICATE GROUPING SEE CODE __	Probable Cause: The carrier grouping entered is already established under the carrier code identified in the error message. Action: Review input for possible error. If no error is detected, entry is not required.
INVALID OPTION	Probable Cause: Part number entered is other than 1 or 2. Action: Reenter correct part number.
BAD RETURN FROM UWSR010A __	Probable Cause: Error caused by other than operator input. Action: Record error and notify Data Systems.

ERROR MESSAGE	CAUSE/ACTION
DELETION DENIED-WOULD CAUSE DUPLICATE GROUPING-SEE CODES__	Probable Cause: The delete action being attempted in part 1 will result in a duplicate grouping in part 2. Action: Review the carrier codes identified in the error message and update part 2 in a manner which will result in two distinct carrier groupings prior to attempting a delete in part 1. If one of the carrier codes is deleted in its entirety, action must be taken to enter the remaining carrier code in those address records which contained the deleted code.
USPS ENTRY NOT REQUIRED	Probable Cause: The carrier names being established in part 2 are blank or USPS. Action: All uncoded consignee addresses default to USPS, therefore; USPS entries are not required or accepted.

APPENDIX B-66

DEPOT MRO PROCESSING TIME ANALYSIS
PART S
TABLE 19

1. PURPOSE

a. This table serves four purposes. Part 1 includes:

(1) Establishment of Report options for identifying which parts of the F-61 Report are required or desired. Parts 1, 2 and 3, are mandatory entries. The Report Option occurs thirteen times on the table.

(2) Establishment of Mode of Shipment to Mode Group relationship. A Mode of Shipment Code (appendix A-17) can only be assigned to one Mode Group. Mode of Shipment Codes V, W, X, Y, Z, 2, 3 and 9, are excluded. Mode assignment occurs on the table twenty-six times (once for each Mode of Shipment Code, EXCEPT V, W, X, Y, Z, 2, 3 and 9).

(3) Establishment of Mode Group Nomenclatures for each Mode Group (i.e., Air, Rail, Less than Truckload, Freight Forwarder, Truckload, etc.). Mode Groups are a numeric entry (1-9, inclusive), so they occur nine times on the table.

b. Part 2 includes:

Establishment of Transit Standards for each Geographic Area and Mode Groups. Geographic Area assignment is A-Z and 1-9, inclusive. Geographic Area Standard times occur thirty-five times on the table (once for each Geographic Area code).

2. REFERENCE

Appendix D-33.

3. CRT INITIALIZATION

a. Key in $$UWSR19.

b. Enter desired part number (1 or 2). Depress ENTER key.

4. DATA ELEMENTS, PART 1

a. The following field of data is required via the remote (CRT) terminal for F-61 Report options:

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Report Option	1	A	a. Enter an X for each of the 13 fields displayed if the report part is desired. Parts 1-3 are mandatory entries. b. Must be an X or blank. c. Report Option Invalid.

b. The following field of data is required via CRT for the Mode Group assignment for each of the Mode of Shipment codes A-U and 4-8, as displayed.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Mode Group	1	N	a. Enter one of the locally assigned numeric Mode Groups (1-9) for each Mode of Shipment displayed. No Mode Group is required if the Mode of Shipment is not applicable at the local depot. A Mode Group can be assigned more than one Mode of Shipment, BUT a Mode of Shipment is restricted to one Mode Group. b. Must be numeric (0-9).

c. The following field of data is required via CRT for the establishment of nomenclature to the nine Mode Groups displayed.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Mode Group Nomenclature	20	A/N	a. Enter a nomenclature for each of the nine Mode Groups displayed. The nomenclature will identify the Mode Group (i.e., Air, Rail, LTL, etc.). b. Must be alpha/numeric.
Action Code	1	A	a. Enter C for an add, change delete. b. Must be alpha C only. c. Action code invalid.

5. DATA ELEMENTS, PART 2

The following fields of data are required via the remote (CRT) terminal for the establishment of Geographic Area, Transportation Time, Bank Hold Time, Storage Hold Time, Transportation Processing Time, and Mode Group Intransit Times for each of the Geographic Area Codes (A-Z, 1-9, inclusive) displayed.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Geo. Area Transportation Time (GATT)	2	N	a. Enter the average number of days an MRO is in process from the time it is offered to Transportation until it is received by the consignee. A separate entry is required for each of the Geographic Areas displayed. b. Must be numeric.
Bank Hold Time Standard	2	N	a. Enter the number of days an MRO will be on hold in the bank for each of the Geographic Areas displayed. b. Must be numeric.
Storage Hold Time Standard	2	N	a. Enter the number of days an MRO will be in process in Storage before it is offered to Transportation. A separate entry is required for each of the Geographic Areas displayed. b. Must be numeric.
Transportation Hold Time Standard	2	N	a. Enter the number of days an MRO is in process in Transportation before Shipment is made by the depot. A separate entry is required for each of the Geographic Areas displayed. b. Must be numeric.
Intransit Standard	2	N	a. Enter the number of days an MRO is intransit, from the day shipped by the depot until it is received by the consignee. A separate entry is required for each of the

best copy available

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
			nine Mode Groups and Geographic Areas displayed. b. Must be numeric.
Action Code	1	A	a. Enter C for add, change or delete. b. Must be alpha C only. c. ACTION CODE INVALID.

NOTE: The total processing time for an MRO should not exceed the established Standard processing time of:

AIR	OTHER THAN AIR
IPG I - 4 Days	IPG I - 14 Days
IPG II - 8 Days	IPG II - 15 Days
	IPG III - 21 Days

NOTE: To exit from parts 1 or 2 Menu Back to the $$UWSR19 Menu, after action has been completed, depress ENTER key.

6. PROCESSING OTHER VIOLATIONS.

ERROR MESSAGE	CAUSE/ACTION
PART NUMBER INVALID	Probable cause: A report part number other than 1 or 2 was entered. Action: Enter a 1 to display part 1; enter a 2 to display part 2.

7. PRINT DISPLAY

If a facsimile of the display is desired, press the PRINT key, and a copy panel will be produced.

APPENDIX B-66

ZIP/ZONE CROSS-REFERENCE TABLE
PART T
TABLE 20

1. PURPOSE

This table provides individual depots the capability to establish/maintain their respective ZIP Code to Zone Code relationships. The table is utilized by the Address File Maintenance Process for automatic Zone Code assignment.

2. REFERENCES

a. Appendix D-29, Part T.

b. Appendix D-96.

3. CRT INITIALIZATION

Key in $$UWSR20 and depress the ENTER key. The table containing current data will appear on the screen. Additional displays, if more than one screen is necessary to display all data, will appear each time the ENTER key is depressed. The update entry format appears at the bottom of each screen.

4. DATA ELEMENTS

The following fields of data are to be input through the remote (CRT) terminal.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
ZIP (LOW)	3	N	a. Enter 1st 3 pos. of ZIP Code (see note 1). b. 3 position numeric. Mandatory entry. c. ZIP CODE/INVALID.
ZIP (HIGH)	3	N	a. Enter 1st 3 pos. of ZIP Code (see note 1 and 2). b. 3 pos. Numeric or blank. Entered value must be greater than ZIP (LOW). c. ZIP RANGE INVALID.
ZONE	1	N	a. 1 position numeric (1-9) or blank. b. Mandatory entry when Action Code = A. c. ZONE CODE INVALID.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
ACTION CODE	1	A	a. Enter A - Add, D - Delete. b. Must be A or D only. c. ACTION CODE INVALID.

NOTE 1: ZIP (LOW) and ZIP (HIGH) fields are separated by a hyphen on the display. To update an individual ZIP enter data in the ZIP (LOW) field and skip the ZIP (HIGH) field. To update a range of ZIP Codes enter data in both ZIP (LOW) and ZIP (HIGH) fields.

NOTE 2: If data is inadvertenly entered in the ZIP (HIGH) field, position the cursor to the first position of the ZIP (HIGH) field and depress the END OF FILE (EOF) key to delete the erroneous data.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
ENTRY NOT ON FILE	Probable Cause: Input is attempting to delete a ZIP Code or a range of ZIP Codes that are not on file. Action: Verify input and reenter corrected data.
DUPLICATE ENTRY	Probable Cause: Input is attempting to establish a ZIP Code(s) and Zone Code relationship and one of the following conditions exist: a. The input ZIP has previously been established or, b. The input ZIP range has partially or totally been previously established. Action: A successful delete action must be accomplished for the previously established ZIP Code(s) prior to establishing a new ZIP to ZONE relationship.
BAD RETURN FROM	Probable Cause: Error caused by other than operator input. Action: Record error and notify Data Systems.

APPENDIX B-66

PACKING LOCATION ASSIGNMENT TABLE
PART U
TABLE 21

1. PURPOSE

a. This table is used to assign specific Packing Locations for all Warehouse Locations in which the packing function is accomplished in an area other than the selection. The Packing Location can be affected by whether the MRO/DRO is a Single Line Shipment Unit (S/L) or a Multi-Line Shipment Unit (M/L) shipped by Parcel Post or Freight. Parcel Post Mode assignment of a P is for Mode Codes G, H, 6, or 7. Freight Mode assignment of an F is for all Mode Codes other than G, H, 6, or 7.

b. If the Packing function is accomplished in the same area as the selection, then the location need not be entered in this table.

c. Assignment of a Packing Location is required by the Automated Special Purpose Data (SPD) Counts program, if the correct work centers are to receive credits for packing production accomplished.

2. REFERENCES

a. Appendix D-4, On-Line Materiel Release Order Preparation.

b. Appendix D-98, Shipment Unit and Documentation Process.

c. Appendix D-193, Seavan Shipment Documentation.

3. CRT INITIALIZATION

Key in $$UWSR21. Depress the ENTER key.

4. DATA ELEMENTS

a. Table Limit - 800 entries.

b. The following fields of data are to be input through the Remote (CRT) Terminal.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Action Code	1	A	a. Enter: A - addition, C - change, D - deletion, I - inquiry. b. Must be A, C, D or I. c. ACTION CODE INVALID.

NOTE: If an I is entered in conjunction with the Pick Location and Mode, the screen will display the desired information and eliminate the scrolling of multiple screens.

FIELD LEGEND	NO. OF POS.	TYPE	a. EXPLANATION/INSTRUCTIONS b. VALIDATION c. ERROR MESSAGE
Pick Location	3	A/N	a. Enter the first three positions of the Warehouse Location Code where a shipment is selected/picked. b. First position must be alpha. Second and third positions must be numeric. c. PICK LOCATION INVALID.
Shipment Mode Code	1	A	a. Enter a Mode Code of F (Freight) or P (Parcel Post). Possibility of one entry for each Mode entered. b. Must be an F or a P. c. MODE CODE INVALID.
Pack Location (Single Line)	3	A/N	a. Enter the first three positions of the Warehouse Location Code where the Pack function will take place if it is a Single Line Shipment. b. First position must be alpha. Second and third positions must be numeric. c. PACK LOCATION INVALID.
Pack Location (Multi Line)	3	A/N	a. Enter the first three positions of the Warehouse Location Code where the Pack function will take place if it is a Multi-Line Shipment. b. First position must be alpha. Second and third positions must be numeric. c. PACK LOCATION INVALID.

5. PROCESSING OTHER VIOLATIONS

ERROR MESSAGE	CAUSE/ACTION
ACTION CODE - INVALID	Probable Cause: A code other than A, C, D or I was entered and rejected. Action: Verify input accuracy and reenter.

ERROR MESSAGE	CAUSE/ACTION
PICK LOCATION - INVALID	Probable Cause: If an Add Action, an invalid Location struction; if a Change or Delete Action, there is no such Location in the Receiving Master Record. Action: Verify the Location Code for accuracy and reenter.
MODE CODE - INVALID	Probable Cause: A code other than F (Freight) or P (Parcel Post) was entered and rejected. Action Code: Verify input accuracy and reinput.
PACK LOCATION - INVALID (Single/Multi Line)	Probable Cause: If an Add Action, an invalid structure; if a Change or Delete Action, there is no such Location in the Receiving Master Record. Action: Verify the Location Code for accuracy and reinput.
ENTRY NOT ON FILE	Probable Cause: Input is attempting to delete a record not in the Receiving Master Record. Action: Verify input accuracy and reinput as an Add/Change/Delete, as applicable.
DUPLICATE RECORD	Probable Cause: Either the input is attempting to establish a record already there, or there were two identical transactions in the input, and the second was rejected. Action: Verify the cause by inquiring the record. If a Change or Delete Action was desired, check the Action Code for accuracy.

APPENDIX B-67

ESTABLISHMENT OF THE INVENTORY WORKLOAD BANK (IWB)

1. This card is prepared on a general purpose card or coding sheet to establish workload from the MOWASP Locator Files into the Workload Bank (IWB), for depot initiated inventories in accordance with appendix E-067 P.

2. The following are fields for input:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZAV
Blank	4-5	Leave blank.
Manager	6	Enter Manager Code.
Type Inventory	7	Enter C or D as applicable (appendix A-18).
FSC	8-11	Enter low FSC selected for inventory.
NIIN	12-20	Enter starting NIIN if required; otherwise, leave blank.
Blank	21	Leave blank.
FSC	22-25	Enter high FSC or same as 8-11 if only one FSC to be included.
NIIN	26-34	Enter high NIIN, leave blank if pos. 12-20 is blank.
Blank	35-72	Leave blank.
Inventory Category Code	73	Enter Inventory Category Code (appendix A-54).
Blank	74-76	Leave blank.
Functional Routing Code	77-78	Enter appropriate FRC.
Action Code	79-80	Enter WW to bypass check of date of last inventory; otherwise, leave blank.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
1-3	ZAV	AA
6	Alpha/numeric	HO
7	C or D	EK
8-11	All numeric	XE
12-20	All numeric or blank	07
22-25	All numeric	LK
26-34	All numeric or blank if pos. 12-20 is blank	07
73	Alpha/numeric	LR

APPENDIX B-68

CONTRACT DATA INQUIRY - TYPE C

1. This inquiry will provide a means to access the Contract File for available active procurement document information. The information displayed as outlined in appendix F-205 will include basic contract information and acceptance reporting data.

2. The following data elements are to be input through remote (CRT) terminal. Initialize terminals IAW appendix E-194 P.

FIELD LEGEND	NO. OF CHAR.	EXPLANATION/INSTRUCTIONS
Identifier Code	1	Enter C IAW appendix E-194 P.
Procurement Instrument Identificaion Number (PIIN)*	13	Enter the desired PIIN of the contract record to be reviewed.
Supplementary Procurement Instrument Identification Number (SPIIN)	4	Enter SPIIN when 9th position of PIIN is A, D or G; otherwise, leave blank (optional).
National Item Identification Number (NIIN)	9	Enter NIIN if desired contract information is to be limited to single NSN response.
Contract Line Item Number (CLIN)	6	Enter CLIN if desired contract information is to be limited to a specific CLIN.

*Mandatory Entries

3. VALIDATION

a. Violations will appear on the remote terminal display immediately after entry. The field in error will be specifically identified.

DISPLAY POSITION	VALIDATION	VIOLATION REASON CODE
PIIN	Alpha/numeric, no imbedded blanks.	AI
SPIIN	Blank or alpha/numeric other than all zeros. Mandatory entry if 9th position of PIIN is A, D or G.	EX

DISPLAY POSITION	VALIDATION	VIOLATION REASON CODE
NIIN	Blank or numeric other than all zeros; 3rd position may be A, B, J, L or S.	AY
CLIN	Blank or first 5 positions of Contract Line Item Number numeric other than all zeros, last two positions alpha/numeric.	JI

b. Depress ENTER key after errors are corrected to reenter display data.

APPENDIX B-69

COMPLETED RECEIPT INQUIRY - TYPE E

1. This receipt format will provide real-time inquiry capability into the Completed Receipt File (reference appendix F-205) to extract details of:

a. Document Number/PIIN activity IAW appendix F-205.

b. Specific PIIN/CLIN records IAW appendix F-205.

2. The following entries are to be input through remote terminals (CRT) IAW appendix E-061 P:

FIELD LEGEND	NO. OF CHAR.	EXPLANATION/INSTRUCTIONS
Identifier Code	1	Enter E IAW appendix E-194 P.
Procurement Item Instrument Number or (PIIN/DOC NO) Number*	13-(14)	Enter the PIIN if inquiry is related to a procurement receipt record or enter document number for inquiries related to other than procurement receipt action, if available.
National Item Identification Number (NIIN)*	9	Enter NIIN, if available.
Supplementary PIIN (SPIIN)	4	Enter SPIIN when the 9th position of the PIIN is A, D, or G; otherwise, leave blank.
Contract Line Item Number (CLIN)	6	Enter CLIN when output display is to be tailored for a specific PIIN/NSN/CLIN or PIIN/CLIN record; otherwise, leave blank.

*May enter PIIN/DOC NO or NIIN or preferably both, if available.

a. Violations will be displayed at the remote terminal from which the inquiry originates. The field in error will be specifically identified.

DISPLAY POSITION	VALIDATION	VIOLATION CODE
PIIN/Doc No	Alphanumeric, no imbedded blanks but last position may be blank (other than procurement).	AI

DISPLAY POSITION	VALIDATION	VIOLATION CODE
NIIN	Numeric except 3rd position may be A, B, J, L or S.	AY
SPIIN	Blank or alpha/numeric. Must be valid fill if position 9 or PIIN entry is A, D, or G.	EX
CLIN	Blank or numeric in positions 1 through 4; alpha/numeric in last two positions.	JI

b. Depress ENTER key after errors are corrected to reenter display data.

APPENDIX B-70

INVENTORY CANCELLATION TRANSACTION

1. The Inventory Cancellation Transaction is prepared using program $$UWME10 and utilized to effect cancellation of scheduled physical counts, or to override an automatic cancellation date. Input is restricted to 15 single entries.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZAS.
Blank	4-6	Leave blank.
Commodity Manager Code	7	Enter commodity manager code if cancellation is for all counts for this manager.
National Stock Number	8-20	Enter only when a specified NSN or FSC is to be canceled.
Condition Code	21	Enter condition code when single NSN is canceled.
Inventory Management Code	22	Enter inventory management code to indicate reason for cancellation; enter Code E to override automatic cancellation date (see appendix F-140).
Blank	23-61	Leave blank.
Cutoff Date	62-64	Enter the numerical day established for cutoff day.
Blank	65-73	Leave blank.
Document Identifier Code	74-76	Center DIC which caused cancellation; leave blank for manual input.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Functional Routing Code	77-78	Enter the appropriate FRC.
Blank	79-80	Leave blank.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
8-20	All numeric 8-20 or 8-11 balance blank or all blank.	AY
21	Alpha or blank.	AF
22	Alpha or blank.	AW
32-33	Alpha or blank.	VT
34-37	Numeric or blank.	VT
62-64	All numeric.	BQ

APPENDIX B-71

ITEM LOCATOR SUBRECORD ADDITION, DELETION, AND CHANGE

1. This input is utilized to establish, delete, or change data elements of the subrecord (location) of the Item Location Record or to establish additional data in the subrecord.

2. This transaction may also be input via program $$UWME10.

3. The use of this card:

a. Establishes Locator Subrecords in the Item Location File.

b. Deletes Locator Subrecords from the Item Locator File.

c. Changes data elements in the Item Locator Subrecord by replacing data elements with specific data elements punched in applicable positions. Fields left blank will not be changed.

4. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTION
Document Identifier Code	1-3	Enter ZBA.
Blank	4-7	Leave blank.
National Stock Number	8-20	Enter the applicable NSN.
Blank	21	Leave blank.
Type Pack Code	22	Enter type of pack code of materiel.
Type Location Code	23	Enter type location code, if applicable.
Blank	24-28	Leave blank. (This field reserved for DDTC use only.)
Quantity	(24-28)	Enter quantity (DDTC only).
Type of Storage Code	29-31	Enter type of storage code (appendix A-45). Mandatory entry for added record.
Location Code	32-43	Enter applicable location code.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	44	Leave blank.
Inspection Date	45-48	Enter month and year (0865 for Aug 1965) of next inspection of materiel or zero fill.
Date of Pack/Expiration	49-52	Enter date of pack/expiration, month, and year (0865 for Aug 1965). See note 1.
Multi Purpose	53-62	Used with subsistence and JAN Class s Items.
Lot/Contract Number/CAGE Code	(53-57)	Enter lot/contract number or contractor and Government Entity Code.
Lot/Contract Indicator	(58)	Enter (L) Lot - (C) Contract - (R) Reinspection. See note 2.
	(58-62)	Enter lot date code or leave blank.
Unit Pack Code	63-67	Enter code of materiel.
Blank	68-70	Leave blank. See note 5.
Condition Code	71	Enter code of materiel.
Blank	72-76	Leave blank.
Bin Level	(72-76)	Enter bin level (DDTC only).
Functional Routing Code	77-78	Enter organization preparing unit.
Action Code	79-80	Enter applicable code: FV - Delete, Note 4 FW - Delete, Note 3 FX - Add FY - Delete FZ - Change

5. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
8-20	National Stock Number - all numeric except pos. 12. May be alpha A, B, J, L, S.	AY
22	Type Pack Code - must be numeric 1, 2, 4, or blank. If identified as DICOMSS and manager is other than S or U, type pack code will be blank.	CK
23	Type Location Code - alpha A or K or blank.	HV
24-28	Quantity - numeric when action code is FX or FZ, or blank.	11
29-31	Type Storage Code - alpha/numeric/alpha respectively or blank. No blank when Action Code if FX.	HG
32-43	Location Code - Nine or 12 positions field - If 9: pos. 32 alpha, pos. 33-38 numeric, pos. 39 alpha, pos. 40 alpha/numeric, pos. 41-43 blank. If 12 positions: pos. 32 alpha, pos. 33-43 numeric. Not validated when Action Code is FW.	AP
45-48	Inspection Date - Numeric or zero filled when 79-80 is FX, numeric or blank when 79-80 is FZ, or zero filled.	HW
49-52	Date of Pack/Expiration - Shelf-life coded items require two-digit numeric month, two-digit numeric year and must not exceed 66 months from current month (see note 5). Numeric or blank for non-shelf-life items, if action code is FX or FZ (when applicable).	HH
63-67	Unit Pack - Numeric or blank.	HU
71	A through P except I, M, and O if Action Code is FX. If Action Code is FV, FW, or FY, no validation.	AF
72-76	Bin Level - numeric when Action Code is FX or FZ, or blank.	11
79-80	Action Code - alpha FV, FW, FX, FY or FZ. (See note 7).	

NOTE 1: An expiration date will be entered for all Type I shelf-life items. The date of pack will be entered for all other items.

NOTE 2: Enter R when inspection is required prior to expiration of warranty (i.e., reclamation of subsistence).

NOTE 3: If item is due-in, computer will not reserve location.

NOTE 4: Reserve location (Type Location Code 2) when in mechanized area.

NOTE 5: An additional 6 months is provided on the maximum shelf-life period to accommodate items that are age controlled by quarters of the year (reference MIL STD 1523).

NOTE 6: When a DIC 9BA violates and appears on the F-85 for any reason, pos. 68-70 will contain the DIC of the original transaction which caused the 9BA to be created. Positions 77-78 will contain the FRC of the original transaction. When reinputting the 9BA after it has violated, the first position must be changed to Z. (DIC 9BA takes the same action as a ZBA. It is created internally by the computer as a result of processing certain other DICs).

NOTE 7: If action is FV, FY, or FW and data is entered into fields other than NSN, location and functional routing code, then input will be rejected back to the entry terminal for invalid action code.

APPENDIX B-72

REWAREHOUSING CARD

1. This card is output from the computer as a result of a ZUK inquiry. This card may also be prepared in total by DS/T personnel during rewarehousing to change location and/or type of storage codes in the Item Locator Subrecord or to have the computer prepare specific bin labels. In the event the old location on the card does not match the locator, the card will process and establish the new location on the locator and will also produce a violation on the F-85 listing. (When this occurs, follow procedure outlined in E-072 V).

2. This transaction may also be input via program $$UWME10.

3. This transaction is also used to initiate BIN Replenishment actions. This is accomplished by using Action Code FT in 79-80. When Action Code FT is used, the old location will not be deleted. A normal location delete action must then be processed.

4. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	*Enter ZUN.
Inventory In-Process Code	4	**Enter Inventory Flag from locator.
Physical Security Code	5	**Enter from locator file.
Popularity Group Code	6	**Enter from locator file.
Blank	7	Leave blank.
National Stock Number	8-20	**Enter applicable NSN.
Item Description	21-29	**Enter from locator file.
Condition	30	**Enter Condition Code if other than A.
Type of Storage Code	31-33	**Enter (old) code.
Location	34-45	**Enter Location Code (old).
Unit of Issue	46-47	**Enter UI from Locator File.
Type Storage Code	48-50	*Enter new code.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Location	51-62	*Enter new location.
Pounds Rewarehoused	63-69	*Enter pounds rewarehoused.
Unit Pack	70-74	**Enter Unit Pack from Locator.
Commodity Manager	75	**Enter Commodity Manager.
Type Location Code	76	**Enter code from locator.
Functional Routing Code	77-78	*Enter desired FRC.
Action Code	79-80	*Enter applicable code as follows: GD - Permanent Bin Label. FT - Bin Replenishment Action. FU - Bin label only required. FV - Delete - Reserve location in MMHS. FY - Delete.

5. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
8-20	All numeric other than all zeros (no blank). See Note 1.	AY, EN
34-45	This field can be 9 or 12 positions. If 9: position 34 alpha, 35-40 numeric, 41 alpha, 42 alpha/numeric. If 12: position 34 alpha, 35-45 numeric. See Note 2.	AP, LP
48-50	Alphanumeric (no blanks unless Action Code pos. 79-80 is, FT, FU or GD).	HG
51-62	May be blank if Action Code pos. 79-80 is FU or GD. Same validation as position 34-45.	AP
63-69	All numeric other than all zeros (no blanks unless Action Code pos. 79-80 is, FT, FU or GD).	HX

FIELD POSITION	VALIDATION	VIOLATION CODE
70-74	All numeric or blank.	HU
79-80	Alpha FT, FU, FV, FY or GD (no blanks). (See Note 3).	CF

*Fields are mandatory for reentry.

**Prepunched and Interpreted on output.

NOTE 1: An EN Violation Code indicates that there is no matching NSN on the locator for the NSN in pos. 8-20.

NOTE 2: An LP Violation Code indicates that there is no matching location on the locator for the old location in pos. 34-45 but that the new location (pos. 51-62) has been established on the locator.

NOTE 3: When transaction is entered via CRT, if action code is FU or GD and data are entered into fields other than NSN, old location, functional routing code, and action code, input will be rejected back to the entry terminal for invalid action code (pos. 4-6 and 63-69 must be filled with blanks).

APPENDIX B-73

ITEM LOCATOR RECORD CARD

1. This input card is utilized to establish, change, or delete the data in the basic Item Locator Record.

2. Any data element except NSN or FSC outlined herein may be altered by processing a change transaction which will replace data currently in file.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZBC - Add or Change. Enter ZBD - Delete (see note 1).
Blank	4-7	Leave blank.
National Stock Number	8-20	Enter applicable NSN (mandatory).
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter applicable UI.
Item Description	25-33	Enter applicable item description.
NMFC	34-39	Enter applicable code (see note 4).
Freight Rating (LTL)	40	Enter applicable code (see note 4).
DICOMSS Type Item Code	41	Enter applicable code, appendix A-31 (DICOMSS only). (See note 5).
Transportation Compatibility	42	Enter applicable code, appendix CodeA-68 (DICOMSS only).
Density Flag	43	Enter applicable code, appendix A-69, leave blank when N/A.
Controlled Inventory Item Code	44	Enter applicable code from appendix A-28.
NMFC Suffix Code	45	Enter applicable code (see note 4).
Blank	46	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Freight Rating (LCL)	47	Enter applicable code.
Demilitarization Code	48	Enter DEMIL code, appendix A-35.
Water Commodity Code	49-53	Enter applicable code (see note 4).
Air Commodity Type Code	54-55	Enter applicable code (see note 4).
Air Cargo Dimension Code	56	Enter applicable code (see note 4).
Storage-in-Transit Code	57	Enter applicable code.
Unit Weight	58-63	See note 2a.
Unit Cube	64-69	See note 2b.
Shelf-Life Code	70	Enter applicable code.
Popularity Group Code	71	Enter applicable code.
Inventory Category Code	72	Enter applicable code.
Hazardous Storage Compatibility Code	73-74	Enter HSCC, appendix A-33, or blank.
Special Requirement Code	75	Enter applicable code.
Commodity Manager Code	76	Enter applicable code.
Functional Routing Code	77-78	Enter applicable code.
Blank	79	Leave blank.
Deleted Item Code	80	Insert nine to delete.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
8-20	National Stock Number - All numeric other than all zeros, field position 14 may be alpha A, B, J, L or S if DICOMSS depot.	AY
23-24	Unit of Issue - Alpha/alpha or blank.	AN

FIELD POSITION	VALIDATION	VIOLATION CODE
25-33	Nomenclature - All nines or blank (ZBD only).	F2
34-39	NMFC - Numeric not all zeros or blank.	IG
40	LTL - Alpha A through Z except I and O, or blank.	IA
42	Transportation Compatibility Code - Alpha as in appendix A-68, DICOMSS items only.	BO
44	Controlled Inventory Item Code - Alphanumeric as in A-28 or blank.	MW
45	NMFC Suffix - Numeric or change to existing code not allowed.	LF
47	LCL - Alpha A through Z except I and O or blank.	IB
48	DEMIL - Alpha A through M except I or blank.	XO
49-53	WCOM - Alpha/numeric, not all zeros or blank.	IC
54-55	ACOM - Alpha/numeric, not all zeros or blank.	ID
56	ADIM - Alpha or blank.	JR
57	SIT - Numeric 1, 2, or 3 or blank.	JQ
58-63	UNIT WEIGHT - Numeric other than all zeros (See Note 2a).	IE
64-69	UNIT CUBE - Numeric not all zeros (note 2b).	IF
70	SSLIND - Blank, numeric, or alpha A through S (except I and O) or X, see appendix A-47.	HB
71	POPGRP - Alpha A through J, and L or blank.	OQ
72	INVCAT - Alpha/numeric as in A-54 or blank. (See note 3.)	LR
73-74	HSCC - Alpha/numeric as in A-33 or blank.	IS
75	SPRQMT - Alpha/numeric as in A-81 or blank (If A, pos. 73-74 must be A1 or blank).	LS
80	DLT CODE - Insert 9 for DIC ZBD only, otherwise blank.	D7

NOTE 1: For deletion (ZBD) fill fields to be deleted with 9's with exception of NMFC, LTL, NMFC Suffix, Water Commodity, Air Commodity Type and Air Cargo Demension Codes which cannot be changed or deleted by the DLA Depots. DLA Depots must notify the appropriate DSC for necessary changes to the Freight Classification data elements.

NOTE 2:

a. Unit Weight (pos. 58-63):

(1) This field represents four whole numbers and two decimal places. This field, when used, must be punched in its entirety with numeric data. No actual decimal may be punched in any position since the decimal is assumed to lie between pos. 61 and 62.

(2) Examples: Weight of 26 = 002600; weight of 2/100 pounds pounds = 000002; weight of 3 1/2 pounds = 000350.

b. Unit Cube (pos. 64-69):

(1) This field represents three whole numbers and three decimal places. This field, when entered, must be punched in its entirety with numeric data. No actual decimal may be punched in any position since the decimal is assumed to lie between pos. 66 and 67.

(2) Examples: Cube of 32 cubic feet = 032000; cube of 1/1000 cubic feet = 000001; cube of 8 and 5/100 cubic feet = 008050.

(3) For both weight and cube the low order position will always be a minimum of 1; i.e., weight - 000001, cube - 000001.

NOTE 3: If the NSN in pos. 8-20 is a DLA-managed item, only alphas H, E, L, T, or U or numeric 0 will be accepted.

NOTE 4: Changes to existing Freight Classification data residing in the MOWASP locator record is the responsibility to the DSC. The DSCs will not delete Freight Classification data but will overlay existing data with new data. DLA Depots will enter Freight Classification data only when the matching field in the MOWASP locator record is blank. DICOMSS is excluded (see note 5).

NOTE 5: DICOMSS data is not maintained by the MOWASP Data Bank thus existing Freight Classification data can be overlayed with data entered by the DLA Depot but will require input of a DICOMSS Type Item Code (B, L or T) and Commodity Manager Code S.

APPENDIX B-74

CLASSIFICATION SUSPENSE DELETE

1. This transaction is used by the depot to clear the Classification Suspense File when an MRO has caused the materiel in Condition Code D, E, F, G, J, K or L to be shipped (reshipped) to the vendor or another depot, or the entry was an erroneous ZCO action.

2. This transaction may be input via program $$UWME10.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZHW.
Blank	4-7	Leave blank.
National Stock Number	8-20	Enter applicable NSN as indicated from the MRO, A5_ dropping the materiel.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter applicable UI as indicated from the MRO, A5_ dropping the materiel.
Quantity	25-29	Enter applicable quantity as indicated from the MRO, A5_ dropping the materiel.
Document Number	30-43	For reclassification of previously suspended receipts, enter the document number under which the material was originally received. Enter document number for original D4_ or D6_ transaction reporting receipt of stock in Condition Code K or L (DOC NR on DD Form 1225). Do not enter if materiel was placed into Condition K or L with an Inspection/Surveillance Test Notice Card, DIO ZCO.
Suffix Code	44	Enter suffix code, if applicable.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Location	45-56	Enter location if suspense was established by ZCO action.
Contract Line Item Number	57-62	Enter CLIN.
Blank	63-70	Leave blank.
Condition Code	71	Enter applicable condition code from MRO dropping the materiel.
Blank	72-76	Leave blank.
Functional Routing Code	77-78	Enter the appropriate FRC.
Blank	79-80	Leave blank.

4. VALIDATION

Violations will appear on appendix F-085 report.

FIELD POSITION	VALIDATION	VIOLATION CODE
8-20	Numeric other than zeros, except pos. 14 may contain alpha A, B, J, L or S (no blanks).	AY
25-29	Numeric other than all zeros.	AS
30-43	Pos. 30-43 may be blank if pos. 45-56 is filled; otherwise, at least one field position contains something other than blank.	AI
44	Blank or alpha.	AI
45-56	Nine or 12 position field. If 9: Field position 45 alpha, pos. 46-51 numeric, pos. 52 alpha, pos. 53 alphanumeric. If 12: position 45 alpha and 46-56 numeric. May be blank if pos. 39-43 is filled.	AP
71	Alpha D, E, F, G, J, K or L.	AF

APPENDIX B-75

ITEM LOCATOR RECORD CARD (FREIGHT CLASSIFICATION DATA)

1. This input is utilized to inquire the depot locator for all NSNs with the same NMFC. This inquiry will provide a list of all NSNs and selected Data Elements having the same NMFC.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZBE.
Blank	4-33	Leave blank.
National Motor Freight Classification Code	34-39	Enter current NMFC which is to be inquired.
Blank	40-76	Leave blank.
Functional Routing Code	77-78	Enter FRC of organization preparing input.
Action Code	79-80	Enter ET to inquire locator for all NSNs with the same NMFC.

3. VALIDATION

Violations will appear on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
34-39	Numeric filled.	IG
79-80	Action Code ET.	CF

APPENDIX B-76

SUPPLY STATUS CARD (AE3)

1. This card format is used to provide the Defense Property Disposal Service (DPDS) with a reply to a Disposal Shipment Confirmation Followup Card (DIC AFX or AFZ) when the Distribution Depot has no record of making the shipment. Supply Status Code BF will be entered in pos. 65-66.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter AE3.
Routing Identifier Code (To)	4-6	Enter RIC as shown on the AFX/AFZ followup.
Media and Status Code	7	Enter the code as shown on the AFX/AFZ followup.
National Stock Number	8-22	Enter the NSN to which status is applicable.
Unit of Issue	23-24	Enter the UI as shown on the AFX/AFZ followup.
Quantity	25-29	Enter the quantity as shown on the AFX/AFZ followup.
Document Number	30-43	Enter the document number as shown on the AFX/AFZ followup.
Suffix Code	44	Enter the suffix code as shown on the AFX/AFZ followup.
Supplementary Address	45-50	Enter the code as shown on the AFX/AFZ followup.
Signal Code	51	Leave blank.
Fund Code	52-53	Leave blank.
Distribution Code	54	Enter the code as shown on the AFX/AFZ followup. If not 9, enter 9.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Miscellaneous Data	55-80	Leave blank.

3. VALIDATION

Computer prepared output transaction.

APPENDIX B-77

LOCATION SURVEY REQUEST

1. This input is utilized to request computer prepared Location Survey Cards for location surveys. Parameters are established by locations (warehouse, section or more definitive breakdown, if desired).

2. This transaction is input via program $$UWME10.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZBG.
Blank	4	Leave blank.
Area Control Branch	5	Enter appropriate area control branch identifier.
Type of Survey Code	6	Enter applicable code from appendix A-62.
Blank	7	Leave blank.
Location Parameters	8-31	Enter first warehouse location (low) and last location (high) to be included in the survey. (See note 2.)
Low	(8-19)	
High	(20-31)	
Blank	32-34	Leave blank.
Lot Size or Blank	35-40	Enter number of locations to be included in sample survey. Type of Survey Code, pos. 6, must be S or P.
Sample Interval or Blank	41-45	Intervals at which sample locations are to be pulled - i.e., every 2nd = 00002; every 10th = 00010; every 300th = 00300; and so on. Type of Survey Code, pos. 6, must be S or P.
Blank	46-51	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Date	52-56	Enter Julian date of preparation.
Blank	57-76	Leave blank.
Functional Routing Code	77-78	Enter appropriate FRC.
Blank	79-80	Leave blank.

4. VALIDATION

FIELD LEGEND	VALIDATION	VIOLATION CODE
5	Alpha/numeric.	2L
6	Alpha C, L, P, S.	HE
8-31	Nine or 12 position fields. If 9 - positions 8, 15, 20 and 27 are alpha; positions 9-14 and 21-26 are numeric; positions 16 and 28 are alphanumeric; positions 17-19 and 29-31 must be blank. If 12 positions - positions 8 and 20 are alpha and all remaining field are numeric. No duplications or overlapping parameter entries.	OL
35-40	Blank or all numeric, other than zero fill; pos. 6 must be S or P.	IQ
41-45	Blank or all numeric, other than zero fill; pos. 6 must be S or P.	2N
52-56	Numeric year and Julian date (i.e., 76204), no blanks. Zero fill not valid.	KZ

NOTE 1: No more than 25 surveys can be requested during any 1 day's input. Survey Request Cards exceeding this limit will be violated.

NOTE 2: Any partial or duplicate parameter requests will not be accepted for processing to prevent duplicate survey activity.

APPENDIX B-78

LOCATION SURVEY CARD

1. This card is utilized to conduct location surveys and results from input of Location Survey Request Card, appendix B-77, DIC ZBG or SCAN Format ZBG.

2. It is utilized to compare location data on file with storage locations and their contents.

3. Card is prepared for occupied locations only (excludes reserved unoccupied locations).

4. This transaction may be reentered through program $$UWME10.

5. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS	INTERPRETER PRINT SPACES UPPER
Document Identifier Code	1-3	Enter ZBH.	1-3
Type Survey Code	4	See appendix A-62.	5
Location	5-16	From Locator.	7-18
National Stock Number	17-29	From Locator.	19-32
Type Pack	30	From Locator.	47
Shelf-Life Code	31	From Locator.	54
Type Storage Code	32-34	From Locator.	56-58
Condition Code	35	From Locator.	34
Unit of Issue	36-37	From Locator.	49-50
Blank	38	Leave blank.	
Date Pack/Exp. Date	39-42	From Locator.	36-39
Unit Pack	43-47	From Locator	41-45
National Stock Number (New)	48-60	See paragraph 5.	

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS	INTERPRETER PRINT SPACES UPPER
Inspection Date or Zeros	61-64	From Locator (Shelf-Life Items).	
Discrepancy Code(s)	65-66	Appendix A-26 (see notes 1 and 3).	
Blank	67-69	Leave blank.	
Management Codes		(See notes 2 and 3.)	
Bin Label Required	70	Enter B.	
Stack Label Required	71	Enter L.	
Warehouse Marking Required	72	Enter F.	
Warehouse Conditions	73	Enter W, X, or Y.	
Lot Number	74-78	Assigned by computer consecutive to 99,999.	59-63
Action Code	79-80	See appendix A-42.	

NOTE 1: The Discrepancy Codes Z (Inspection Required), P (Prescribed Packing and Marking), E (Outdated Shelf-Life), F (Damage or Rejected to Carrier), I (Infestation), K (Condition Error), N (Unit of Issue), R (Not Identified) and V (Requires Testing) are entered in block D, pos. 62 or 63, to advise qualified inspection personnel of stock conditions or potential discrepancies which require:

a. Immediate action to preserve item; i.e., rust, corrosion, leakage, container damage, pest infestation, etc.

b. Marking, packing, packaging, identification, testing, or routine care and/or preservation.

c. Review by an inspector to resolve shelf-life/condition code/UI problem.

NOTE 2: Management Codes are used to identify warehousing deficiencies and are provided on appendix F-151 at the completion of each survey lot.

Management Codes to be entered in block F are:

a. 70 - B - Permanent bin label required, appendix C-105. Label will be automatically prepared.

b. 71 - L - Stack label required, appendix C-104. Label will be automatically prepared.

c. 72 - F - Floor or warehouse markings required.

d. 73 - W - Housekeeping conditions need attention.

X - Unsafe Stacking.

Y - Open Containers in Bulk Area.

NOTE 3: Discrepancy Codes and/or Management Codes may be entered without affecting other location data by completing appropriate blocks D, E, F and/or G with no Action Code in block H.

6. To complete DLA Form 542, Location Survey Card, process as follows:

a. To add a new item not on locator record.

(1) Complete blocks A through D, G through K, M and N as required.

(2) Enter Action Code FX, block H.

b. To change data on current record.

(1) Complete only affected blocks where data changes.

(2) Enter Action Code FZ in block H.

c. To delete record, enter appropriate Action Code in block H.

7. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
4	Alpha C, L, P, or S.	HE
5-16	Nine or 12 position field. If 9 positions - 3 pos. 5 alpha, pos. 6-11 numeric, pos. 12 alpha, pos. 13 alpha/numeric, pos. 14-16 blank. If 12 positions - pos. 5 alpha, pos. 6-16 numeric.	AP
17-29	Numeric except 20 may be alpha. (May be blank if pos. 45-57 validly filled.)	AY
30	Numeric 1, 2, 4 or blank. If identified as DICOMSS and manager is other than S or U, type pack code will be blank.	CK

FIELD POSITION	VALIDATION	VIOLATION CODE
31	Blank, numeric, or alpha A through S (except I and O) or X, reference appendix A-47.	HB
32-34	Alpha/numeric or blank (FX Action Code).	HG
35	Alpha or blank (mandatory for FX Action Code).	AF
36-37	Alpha or blank.	AN
39-42	Shelf-life coded items require a two digit numeric month and two digit numeric year but not to exceed 66 months from current month (See note). Numeric or blank for nonshelf-life items, if action code FX or FZ (when applicable).	HH
43-47	Numeric or blank.	HU
48-60	Numeric or blank except pos. 51 may be alpha.	AY
61-64	Alpha/numeric or blank.	HW
65-66	Alpha E, F, I, K, N, P, R, V, Z or blank.	2K
70	Alpha B or blank.	2K
71	Alpha L or blank.	2K
72	Alpha F or blank.	2K
73	Alpha W, X, Y or blank.	2K
74-78	Numeric.	WZ
79-80	Alpha FX, FZ, FY, FW or FV (reference appendix A-42) or blank.	CF

NOTE: An additional 6 months is provided on the maximum shelf-life period to accommodate items that are age controlled by quarters of the year (reference MIL STD 1523).

APPENDIX B-79

ITEM LOCATOR RECORD INQUIRY

1. This input transaction is utilized to inquire the Item Locator Record and Locator Subrecord.

2. Action codes are used in conjunction with DIC ZBJ to produce the report desired (appendices F-25, 26, 27, 31, 36, 37, 55, 105, and 106).

3. Data is entered via program $$UWME10.

4. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZBJ.
Blank	4-5	Leave blank.
Commodity Manager	6	Enter Commodity Manager or leave blank when requesting printout for items with no Commodity Manager.
Blank	7	Leave blank.
Stock Number/Location Parameter	8-22	Enter Stock Number of item to be inquired, mandatory for Action Codes FE, FF, FG, and GA; leave blank with Action Codes FH and GB.
Low FSC Parameter	(8-11)	Enter Low FSC parameter. Mandatory for Action Codes FA, FB, FC, FD, FJ, and FK.
Blank	(12)	Leave blank.
High FSC Parameter	(13-16)	Enter High FSC parameter. Mandatory for Action Codes FA, FB, FC, FD, FJ, and FK.
Low Location Parameter	(17-19)	Enter Low Location Parameter (1st three positions of Warehouse Location), mandatory entry for Action Code FL.
High Location Parameter	(20-22)	Enter High Location Parameter (1st three positions of Warehouse Location), mandatory entry for Action Code FL.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Popularity Group Code	23	Enter Popularity Group Code or leave blank.
Shelf-Life Code	24	Enter Shelf-Life Code (other than 0). Mandatory for Action Code FB. Blank pos. 24 with Action Code FB will result in output listing for blank Shelf-Life Coded items only.
Physical Security Code	25	Enter Physical Security Code (other than U). Mandatory for Action Code FD.
Blank	26-70	Leave blank.
Condition Code	71	Enter Condition Code, mandatory for Action Code FH.
Blank	72-76	Leave blank.
Functional Routing Code	77-78	Enter FRC assigned to organization.
Action Code	79-80	Enter applicable Action Code from appendix A-42.

4. VALIDATION

Violation rejects will appear on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
6	Manager Code invalid.	HO
8-20	May be all blank - Numeric filled in pos. 8-11 and pos. 13-16, except pos. 14 may be numeric or alpha A, B, J, L or S with Action Codes FA, FB, GA and GB.	AY
8-11	Low FSC parameter invalid.	XE
13-16	High FSC parameter invalid.	LK
17-19	Low Location Parameter blank.	XA

FIELD POSITION	VALIDATION	VIOLATION CODE
20-22	High Location Parameter blank.	XB
23	Blank or Valid Alpha Code.	OQ
24	Blank A/N (other than 0) with Action Code FB.	HB
25	Blank, except Alpha (other than U) with Action Code FD.	MW
71	Blank, except Alpha (other than A) with Action Code FH.	AF
79-80	Alpha/Alpha.	CF

5. INPUT CONTROL/LIMITATION

FA F-31 Maximum of 5 per cycle.

FB F-31 Maximum of 5 per cycle.

FC F-37 Maximum of 5 per cycle.

FD F-55 Maximum of 5 per cycle.

FE F-37 No Limit.

FF F-36 No Limit.

FG F-36 No Limit.

FH F-26 Maximum of 5 per cycle.

FJ F-27 Maximum of 5 per cycle.

FK F-25 Maximum of 5 per cycle.

FL F-25, Part 2, Max. of 5 per cycle.

GA F-105 No Limit.

GB F-106 Maximum of one per cycle.

For those action codes exceeding a limit of 5 per process cycle, the excess will be recycled to subsequent runs.

APPENDIX B-80

MEDALOC RECORD INQUIRY

1. PURPOSE

This process operates in an on-line environment to inquire the Line Item (CF) File, Shipment Unit (CP) File, Consolidation (CN) File and the Pallet (PL) File.

2. REFERENCE

Appendix E-057 P

3. DATA ELEMENTS

Data elements required to make an inquiry to the CDF, CDP, CN, or PL files.

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
ACT	2	A	CF = LI Inquiry. CP = SU Inquiry. CN = Consolidation. = Inquiry. PL = Pallet Inquiry.
SU	7, 11 or 13	N	Enter any valid shipment unit number.
TCN	16	AN	Enter any valid transportation control number.
SEQ	5	N	Enter sequence number with SU or TCN for CDF records.

APPENDIX B-81

MRO/DRO CANCELLATION REQUEST ANSWER CARD

1. This card is used to provide DSC/ICP with a reply to a Cancellation Card, appendices B-17 and B-227, when the distribution activity has canceled, has diverted, or has no record of the original MRO/DRO.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter AG6 for MRO or AGJ for DRO.
Routing Identifier Code (To)	4-6	Enter RIC of DSC to be furnished status.
Media and Status Code	7	Perpetuate M&S code from request.
National Stock Number	8-20	Perpetuate NSN from request.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Perpetuate UI from request.
Quantity	25-29	Quantity canceled.
Document Number	30-43	Perpetuate document number from request.
Suffix Code	44	Perpetuate code from request.
New Consignee Address	45-50	Perpetuate new consignee address from request.
Other Fields	51-61	Perpetuate from request, if data is shown on cancellation request.
Required Delivery Date	62-64	Leave blank when MRO was canceled or when pos. 65-66 contains B6 and new consignee, pos. 45-50, is a depot in the DLA Distribution System, enter RIC of that depot.
Precious Metals Identification Code	(62)	For DROs enter applicable code (appendix A-127).
ADPE Identification Code	(63)	For DROs enter applicable code (appendix A-125).

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Disposal Authority Code	(64)	Enter M, N or R Disposal Authority code. (appendix A-126).
Advice/Status Code	65-66	Enter appropriate Status Code as follows: BF - No record of MRO at distribution depot. BQ - Canceled. B6 when diverted. B9 when attempting to divert. CB when rejected for RDD. Or perpetuate Advice Code from request.
Routing Identifier Code (From)	67-69	Enter RIC of distribution activity preparing the reply.
Other Fields	70-80	Perpetuate from request.

APPENDIX B-82

CLASSIFICATION REPORT CARD

1. This card, prepared on DD Form 1486, Materiel Receipt Document, is originated by the distribution depot (DDOU) and is the document by which specified used clothing items received and classified under the Army Bag Item Program are reported to DPSC.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter COB.
Routing Identifier Code (To)	4-6	Enter S9T.
Status Code	7	Enter Receipt Status Code 7 (partial) or 6 (final), as appropriate within shipper's document number.
National Stock Number	8-20	Enter NSN received and classified.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter UI applicable to the NSN.
Quantity	25-29	Enter the quantity, preceding significant digits with zeros.
Document Number	30-43	Enter the document number as follows:
Service Assignment	(30)	Enter S.
Activity Address	(31-35)	Enter W3400.
Date	(36-39)	Enter last digit of calendar year and three-digit Julian day of the year; e.g., 4001 means 1 January 1974.
Serial Number	(40-43)	Enter consecutive four-digit serial number by NSN and condition (and quantity if it exceeds 99,999).
Suffix Code	44	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Supplementary Address Code	45-50	Enter W62PN4 (Fort Ord).
Signal Code	51	Enter B.
Fund Code	52-53	Enter KF.
Blank	54-56	Leave blank.
Project Code	57-59	Enter 1RO.
Blank	60-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter SUT.
Ownership/Purpose Code	70	Enter A.
Condition Code	71	Enter actual condition (after classification) of the materiel, i.e., A, B, E, or H, as appropriate.
Management Code	72	Enter Management Code M or Z as appropriate; otherwise, leave blank. (Note: Code P is not authorized for this transaction.)
Date	73-75	Enter Julian date when materiel received at unloading dock.
Blank	76-80	Leave blank.

APPENDIX B-83

LOCATION RECONCILIATION REQUEST,
INQUIRY OR COMPLETION CARD
(FOR OTHER THAN DLA ACTIVITIES)

1. Reconciliation of depot location records with ICP records is accomplished immediately after a locator survey. The Locator Reconciliation Request Card (DIC ZC5) and Completion Card (DIC ZBZ) are input to the computer for generating actions outlined below:

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter: ZC5 - To produce DZH, appendix B-12, to the Service ICP/GSA for each NSN/Condition of the class (if entered in pos. 8-11 or all items if blank pos. 8-11), for Manager Code in pos. 6. ZBY - Inquiry to obtain a summary of DJA (with Management Codes A and B) and DICs CKB, CKC, and CKD received from the ICP. ZBZ - Completion card to close the suspense file and print appendix F-6.
Blank	4-5	Leave blank.
Commodity Manager Code	6	Enter Commodity Manager Code reflected on the Locator File.
Blank	7	Leave blank.
Federal Supply Class	8-11	If a specific FSC is required enter that FSC. If all FSCs are required, leave blank.
Routing Identifier Code (To)	12-14	Enter RIC of the accountable ICP.
Blank	15-35	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Routing Identifier Code (From)	(15-17)	Enter RIC of the depot (ZC5 only). See note.
Date	36-39	Enter Julian date.
Blank	40-76	Leave blank.
Functional Routing Code	77-78	Enter appropriate FRC.
Action Code	79-80	Enter applicable Action Code (appendix A-42): JG - Produce DZH (Service ICP)

3. LIMITATIONS

a. Input Limitations: Limit of one input (appendix B-83, DIC ZC5) per day. Any additional location reconciliation request cards will remain in computer input until next process.

b. Output Limitations: A location reconciliation by ICP (Commodity Manager) and a location reconciliation by FSC for the same ICP (Commodity Manager) will not be placed in process during the same period of time.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
6	Commodity Manager Alpha/numeric - No blanks.	HO
8-11	FSC field all numeric or blank.	AY
12-14	Routing Identifier (To) Alpha/numeric - No blanks.	AC
15-17	Routing Identifier (From) (ZC5 only). pos. 15 - Alpha S only pos. 16 - Alpha A, B, C, E, M, R, or U only pos. 17 - Numeric 2, 3, 4, or 5 or 6 when 79-80 is JG See note.	AB

FIELD POSITION	VALIDATION	VIOLATION CODE
79-80	Alpha Filled - JG. (Applicable to DIC ZC5 only.)	CF

NOTE: RIC (From) must always be entered in pos. 15-17 when DIC is ZC5. RIC (From) is constructed as follows:

pos. 15 - Enter constant S
pos. 16 - Enter alpha character identifying depot:

A = DDMP
B = DDTC
C = DCSC
E = DESC
M = DDMT
R = DGSC
U = DDOU

pos. 17 - If pos. 79-80 is JG (produce DZH for Service enter the following:

2 - if RIC (To) in pos. 12-14 indicates Navy ICP,
3 - if RIC (To) in pos. 12-14 indicates Air Force ICP,
4 - if RIC (To) in pos. 12-14 indicates Marine Corps ICP,
or
5 - if RIC (To) in pos. 12-14 indicates Army ICP.
6 - if RIC (To) in pos. 12-14 indicates GSA ICP.

APPENDIX B-84

RECEIPT FORECAST REQUEST CARD

1. Requests for Receipt Forecast Reports will be used by any depot personnel requiring information on projected receipts based on the Prepositioned Materiel (PMR) File. Reports prepared in response to the request cards will be printed in the format of appendix F-93 or F-94 depending upon the Action Code used. Request cards will be processed IAW appendix E-084 P.

2. The following entries apply:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZUR.
Estimated Delivery Date	4-7	If Action Code is RE, RF, RG, or RJ, enter EDD for the month desired.
Minimum Cube	8-11	If Action Code is RJ, enter the low cube parameter by which receipts should be selected. All PMR records for which the total cube is equal to or greater than this entry will be selected for the F-94 report.
Document Identifier Parameter	12-13	If Action is RG or RJ, enter DW if only other than procurement receipts are to be selected.
Procurement Instrument Identification Number Parameter	14-17	If Action Code is RH, enter the first four positions of the PIIN or Document Number. Action Code RH will be used when receipts from a single DSC are to be selected. Use of Action Code RH with a non-DSC PIIN will provide forecast data in returns, but because the first six digits of the PIIN identify the Activity Address Numbers, use of the first four digits might not give definitive results. See appendix N, Defense Acquisition Regulation for Activity Address Number assignment.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Low Terminal Digit Parameter	18-19	If Action Code is RF, enter the last two digits of the PIIN representing the low limit of the terminal digit range desired. May be the same as entry in pos. 20-21 if one terminal digit category is required; otherwise, must be less than the entry in pos. 20-21.
High Terminal Digit Parameter	20-21	If Action Code is RF, enter the last two digits of the PIIN representing the high limit of the terminal digit range desired. May be the same as the entry in pos. 18-19 if only one terminal digit category is required; otherwise, must be greater than the entry in pos. 18-19.
Blank	22-76	Leave blank.
Functional Routing Code	77-78	Enter the code identifying the originator of the request card.
Action Code	79-80	Enter appropriate Action code as follows: RE - To obtain part 1 of the F-93 report for a specific EDD. RF - To obtain part 1 of the F-93 report for a specific EDD and terminal digit range. RG - To obtain Part 2 of the F-93 report for a specific EDD and type of receipt (optional). RH - To obtain part 2 of the F-93 report for a specific receipt source and EDD (optional).

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		RJ - To obtain the F-94 report for a specific EDD, minimum cube, and type of receipt (optional).

3. VALIDATION

a. Violations will be printed on the Violation Printout, appendix F-85; errors will be identified by appropriate Violation Reason Codes. Erroneous data will be underlined with asterisks.

b. Content Validation

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
4-7	Numeric positions 6-7 must be greater than zero and less than 13. If Action Code is RH, may be blank.	HP
8-11	If Action Code is RJ, must be numeric.	IY
12-13	DU, DW, or blank.	AA
14-17	If Action Code is RH, must be alphanumeric.	AI
18-19	If Action Code is RF, must be numeric. Reason Code IP will be used if entry is numeric but exceeds entry in pos. 20-21.	AI/IP
20-21	If Action Code is RF, must be numeric.	AI
79-80	RE, RF, RG, RH, or RJ.	CF

APPENDIX B-85

LOCATOR REPORT BY DATE OF PACK

1. This input card is utilized to obtain location records and location subrecords within date of pack parameters.

2. Upon input of this card a F-119 report will be produced showing the location data for those managers (pos. 17-24) in the type of sequence requested (pos. 5) and within the date of pack parameter low to high (pos. 7-10 and 12-15).

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DIC ZBB.
Blank	4	Leave blank.
Type Sequence Code	5	Enter appropriate code: 1 - Manager/Location 2 - Location 3 - Date of Pack/Location 4 - NSN/Location 5 - Date of Pack/NSN
Blank	6	Leave blank.
Date of Pack (Low)	7-10	Enter month and year.
Blank	11	Leave blank.
Date of Pack (High)	12-15	Enter month and year.
Blank	16	Leave blank.
Commodity Manager	17-24	Enter code of specific manager or leave blank for all managers. If specific manager(s) is entered the code(s) must begin in pos. 17. Do not leave spaces between codes.
Blank	25-78	Leave blank.
Functional Routing Code	79-80	Enter FRC assigned to organization.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
5	Numeric 1, 2, 3, 4, and 5.	19
7-10	Two digit numeric month and two digit numeric year.	HH
12-15	Two digit numeric month and two digit numeric year.	HH

APPENDIX B-86

ROUTING IDENTIFIER/AUTODIN ROUTING INDICATOR CARD

1. This card is prepared on a general purpose card upon receipt of changes, additions, or deletions to RICs and their associated Routing Indicator Codes.

2. This card is processed IAW appendix D-52 and serves to update the AUTODIN Routing File.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZF7.
Blank	4-6	Leave blank.
Type of Action Code	7	Enter: 1 to add or change. 2 to effect a deletion.
Routing Identifier Code	8-10	Enter applicable RIC.
AUTODIN Routing Indicator Code	11-17	Enter applicable AUTODIN Routing Indicator from the ACP 117 CAN-US Allied Routing Indicator Book (pos. 11 must be an R, pos. 12 may be H or U).
Activity Address Code	18-23	Enter DoDAAD Code to receive data via mail under operation MINIMIZE.
Blank	24-80	Leave blank.

4. VALIDATION

Violation rejects will be listed on appendix F-113.

FIELD POSITION	VALIDATION	VIOLATION MESSAGE
7	Numeric 1 or 2 only.	INVALID FORMAT
8	Alpha.	INVALID FORMAT
9	Alpha/numeric.	INVALID FORMAT
11-17	Alpha/numeric, no blanks.	INVALID FORMAT

APPENDIX B-87

INPUT MESSAGE INQUIRY CARD

1. This card is used to provide operating personnel (primarily communications) a printout of Received AUTODIN Message History record. This inquiry may not be input directly into computer processing but must be forwarded to the Office of Data Systems with a reason for need of the requested printout.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZZB.
Communication Routing Indicator	4-8	Enter the message originator's Comm Code(AUTODIN) RIC.
Station Serial	9-12	Enter the message originator's station serial number.
Date-Time-Group	13-19	Enter the message originator's DTG.
Blank	20-80	Leave blank.

APPENDIX B-88

OUTPUT MESSAGE INQUIRY CARD

1. This card format is used to provide operating personnel (primarily communication) a printout of a Transmitted AUTODIN Message History record for internal use or for retransmission. This inquiry may not be input directly into computer processing but must be forwarded to the Office of Data Systems (via Communication Operations) with a reason for need (and specific instructions for retransmission) of the requested printout.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier	1-3	Enter DIC ZZC.
Station Serial	4-7	Enter the local activity Station Serial Number.
Date-Time-Group	8-14	Enter the local activity assigned DTG.
Pilot Header Format Control Indicator Code	15-18	*Enter the PHF CIC.
Blank	19	Leave blank.
Operating Signals	20-22	*Enter retransmission Operating Signals, if required.
Blank	23-80	Leave blank.

*PHF Control Indicator Codes and Operating Signals are to be assigned by Communications Operations personnel prior to input to computer when retransmission is required.

APPENDIX B-89

REWAREHOUSING REQUEST

1. This transaction is utilized to inquire the Item Locator Record and Subrecord.

2. Action codes are used to produce a report in the desired sequence and format.

3. This transaction may be input via program $$UWME10.

4. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZUK.
Blank	4-7	Leave blank.
Low FSC Parameter	8-11	Enter Low FSC parameter; otherwise, leave blank.
Blank	12	Leave blank.
High FSC Parameter	13-16	Enter High FSC parameter; otherwise, leave blank.
Blank	17-22	Leave blank.
Popularity Group Code	23	Enter popularity group code, pos. 8-11 and pos. 13-16 must be filled when pos. 23 is used.
Blank	24-25	Leave blank.
Low Location Parameter	26-37	Enter lowest location desired; otherwise, leave blank.
Blank	38-42	Leave blank.
High Location Parameter	43-54	Enter highest location desired; otherwise, leave blank.
Blank	55-70	Leave blank.
Condition Code	71	Enter condition code other than A.
Blank	72-76	Leave blank.
Functional Routing Code	77-78	Enter FRC.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Action Code	79-80	Enter Action Code as follows: FQ - For appendix F-23, location sequence. FR - For appendix F-23, stock number sequence. FS - For appendix F-30, location sequence. FT - For appendix F-30, stock number sequence.

5. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
8-11	Low FSC - Must be all numeric, or blank. Mandatory if pos. 23 is other than blank.	XE
13-16	High FSC - must be all numeric (greater than Low FSC) or blank when Low FSC is blank. Mandatory if pos. 23 is other than blank.	LK
23	Popularity Group Code - Alpha A, B, C, D, E, F, G, H, I, J, L or blank.	OQ
26-37 and 43-54	Positions 26-37 and 43-54 may be nine or twelve positions. If nine postions - 26, 33, 43 and 50 will be alpha; 27-32 and 44-49 will be numeric; 34 and 51 will be alpha/numeric; 35-37 and 52-54 will be blank. If twelve positions - 26 and 43 will be alpha and all remaining field will be numeric. Positions 43-54 must be equal to or greater than positions 26-37.	OI
71	Condition - must be B, C, F, G, J, K, L, M, N or blank.	AF
79-80	Action Codes - Must be alpha, FQ, FR, FS or FT. No blanks.	CF

APPENDIX B-90

ACTIVATION OF WORKLOAD FROM PART 1 INVENTORY WORKLOAD BANK

1. This input is prepared for the following reasons:

a. To activate inventory workload from the Inventory Workload Bank based on data contained in part 1, appendix F-16 listing. Activation may be for a single NSN, a single FSC, or multiple NSNs/FSCs. Activation may also be for 1-5 inventory cutoff days. When this transaction is used for multiple cutoff days, the NSNs must be from a single FSC.

b. To delete record(s) from the Inventory Workload Bank before an inventory date has been established.

c. To inquire the Inventory Workload Bank.

2. The following are fields for input:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZAX.
Blank	4-6	Leave blank.
Type Inventory Code	7	Enter Type Inventory Code only when cancellation of specific FSC or NSNs within a single Type Code; otherwise, leave blank.
Federal Supply Class (Low)	8-11	Enter Low FSC.
National Item Identification Number (NIIN)	12-20	Enter NIIN when pull is by NSN; otherwise, leave blank.
National Stock Number	(8-20)	Enter beginning NSN (from F-16 part 1) if this card is to be used for multiple cutoff days; otherwise, leave blank.
Blank	21	Leave blank.
Federal Supply Class (High)	22-25	Enter High FSC.
National Item Identification Number	26-34	Enter high NIIN when pos. 12-20 is filled number and multiple cutoff days will not be used; otherwise, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Inventory Cutoff Date (1st)	35-38	Enter numeric cutoff date for NSNs to be pulled for this cutoff date. Enter current date if pos. 79-80 is GA or blank. Leave blank if pos. 79-80 is WY.
NSN Size (1st Cutoff Date)	39-41	Enter number of NSNs to be pulled for the first cutoff date, or leave blank if all NSNs within the parameter (pos. 8-20 and pos. 22-34) are to be pulled.
Inventory Cutoff Date (2nd)	42-45	Enter numeric cutoff date for NSNs to be pulled for this date; or leave blank if pos. 39-41 are blank or second cutoff date is not needed.
NSN Size (2nd Cutoff Date)	46-48	Enter number of NSNs to be pulled for second cutoff date, or leave blank if pos. 42-45 are blank.
Inventory Cutoff Date (3rd)	49-52	Enter numeric cutoff date for NSNs to be pulled for this date, or leave blank if third cutoff date is not needed.
NSN Size (3rd Cutoff Date)	53-55	Enter number of NSNs to be pulled for third cutoff date, or leave blank if pos. 49-52 is blank.
Inventory Cutoff Date (4th)	56-59	Enter numeric cutoff date for NSNs to be pulled for this date, or leave blank if fourth cutoff date is not needed.
NSN Size (4th Cutoff Date)	60-62	Enter number of NSNs to be pulled for fourth cutoff date, or leave blank if pos. 56-59 is blank.
Inventory Cutoff Date (5th)	63-66	Enter numeric cutoff date for NSNs to be pulled for this date, or leave blank if fifth cutoff date is not needed.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
NSN Size (5th Cutoff Date)	67-69	Enter number of NSNs to be pulled for fifth cutoff date, or leave blank if pos. 63-66 is blank.
Blank	70	Leave blank.
Condition Code	71	Enter condition code (appendix A-16) only when pull is by specific condition code; otherwise, leave blank.
Inventory Category Code	72	Enter inventory category code (appendix A-54) only when pull is by inventory category code; otherwise, leave blank.
Inventory Management Code	73	Enter inventory management code (appendix A-13, paragraph 11) if applicable; otherwise, leave blank.
Blank	74-75	Leave blank.
Manager Code	76	Enter manager code only when pull is by manager; otherwise, leave blank.
Functional Routing Code	77-78	Enter appropriate FRC.
Action Code	79-80	Enter Action Code as follows: GA - Inquiry to IWB. WY - Delete record from IWB. For any other action, leave blank.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Alpha C, D or blank.	EK
8-11	All numeric;	XE
12-20	All numeric or blank.	07
22-25	All numeric;	LK

FIELD POSITION	VALIDATION	VIOLATION CODE
26-34	All numeric when pos. 12-20 is filled or blank.	07
35-38	All numeric, must be at least 5 days from current date if pos. 79-80 is blank. May be blank if pos. 79-80 is WY.	BQ
39-41	All numeric or blank.	11
42-45	All numeric; must be at least 5 days from current date, or blank.	BQ
46-48	All numeric or blank.	11
49-52	All numeric; must be at least 5 days from current date, or blank.	BQ
53-55	All numeric or blank.	11
56-59	All numeric; must be at least 5 days from current date or blank.	BQ
60-62	All numeric or blank.	11
63-66	All numeric; must be at least 5 days from current date, or blank.	BQ
67-69	All numeric or blank.	11
71	Alpha or blank (appendix A-16).	AF
72	Alpha/numeric or blank.	LR
73	Alpha A, B, C and D or blank.	AW
76	Alpha/numeric or blank.	HO
79-80	Alpha GA, WY or blank.	CF

APPENDIX B-91

ACTIVATION OF WORKLOAD FROM INVENTORY BANK

1. This input is needed to activate workload from the Inventory Workload Bank and schedule for physical count as contained in parts 2, 3, and 4 of the F-16 reports.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZAW.
Workload Bank Storage Code	4	Enter A, B, C, D, and X only when workload is to be activated from part II.
Blank	5-7	Leave blank.
Stock Number Size	8-13	Enter number of NSNs to be activated. If no specific number is required, leave blank.
Single Locations	14-17	Enter number of single locations to be pulled; otherwise, leave blank.
Man-hours	18-24	Enter number of man-hours desired to be pulled; otherwise, leave blank.
Inventory Management Code	25	Enter applicable code only when pull is to be from part 3; otherwise, leave blank.
Total Locations	26-30	Enter total number of location to be pulled, if less than total from entry on part 2, 3, or 4; otherwise, leave blank.
Inventory Category Code	31	Enter ICCs, appendix A-54, if pull is required by category code; otherwise, leave blank.
Blank	32-61	Leave blank.
Cutoff Date	62-64	Enter numeric cutoff date.
Blank	65-76	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Functional Routing Code	77-78	Enter appropriate code.
Blank	79-80	Leave blank.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
4	Alpha A, B, C, D, X, or blank (see note).	HX
8-13	All numeric or blank.	IQ
14-17	All numeric or blank.	W2
18-24	All numeric or blank.	JH
25	Alpha (appendix A-13) or blank (see note).	AW
26-30	All numeric or blank.	W2
31	Alpha/numeric or blank (see note).	IR
62-64	All numeric and at least current date plus five days.	BQ
4, 25, 31	More than one position contain data.	MH

NOTE: Field positions 4, 25, 31. Only one of these positions may contain data.

APPENDIX B-94

SUPPLY STATUS CARD

1. This card format is used to provide the DSC/ICP with a reply to a followup request (appendix B-60), when the distribution depot/distribution activity has not completed shipment, has no record of the transaction, has a record of a previous denial, or has a record but no supporting documentation. When distribution depot has the MRO in-process, BA status is entered; has no record of MRO, BF status is entered; when MRO was previously denied, BY status is entered; when MRO was force closed, BE status is entered, or for FMS MRO when BL status is provided on Freight Shipment.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter AE6.
Routing Identifier Code (To)	4-6	Enter RIC of the DSC receiving the reply.
Media and Status Code	7	Enter the code as shown on the MRO followup.
National Stock Number	8-20	Enter the NSN to which status is applicable.
Submission Time or Blank	21-22	Perpetuate data from followup or original MRO as applicable.
Unit of Issue	23-24	Enter the UI as shown on the MRO followup.
Quantity	25-29	Enter the quantity to which status is applicable.
Document Number	30-43	Enter the document number as shown on the MRO followup.
Suffix Code	44	Enter the suffix code as shown on the MRO followup.
Supplementary Address	45-50	Enter the code as shown on the MRO followup.
Signal Code	51	Enter the code as shown on the MRO followup.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Fund Code	52-53	Enter the code as shown on the MRO followup.
Distribution Code	54-56	Enter the code as shown on the MRO followup.
Project Code	57-59	Enter the code as shown on the MRO followup.
Priority Code	60-61	Enter the code as shown on the MRO followup.
Transaction Date	62-64	Enter the Julian date that corresponds to the date of this reply.
Status Code	65-66	Enter the Status Code to convey the information regarding the status of this transaction.
Routing Identifier Code (From)	67-69	Enter the RIC of the distribution activity furnishing reply to the MRO followup.
Estimated Shipping Date	70-73	When designated by the Status Code BA, enter the year and Julian day that it is estimated the materiel will be shipped. Enter date offered with Status Code BL. See note.
Purpose Code	(70)	When designated by Status Code BY, enter the code as shown on the MRO followup.
Condition Code	(71)	When designated by Status Code BY, enter the code as shown on the MRO followup.
Management Code	(72)	When designated by the Status Code BY, enter the Management Code of the previous denial transaction (and quantity denied in pos. 25-29).
Blank	(73)	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Unit Price	74-80	Enter the data as shown on the MRO followup.

NOTE: Leave pos. 70-73 blank when Status Code BF or BE is in pos. 65-66.

3. VALIDATION

Computer prepared output transaction.

APPENDIX B-95

MANAGEMENT INFORMATION SYSTEM REPORT CARDS

1. These card formats are used to provide HQ DLA via electrical transmission, with selected management data elements in machine sensible form. Activities will capture mechanically all required data at the time such data are originated/recorded. Cutoff date for accumulating data for reporting is close of business on last day of the month. Data will be reported on standard 80 position general purpose ADP cards in the card formats prescribed. Data mechanically reflected in all cards will be automatically validated ensuring that all elements of information in the cards are accurate and complete for processing.

a. The Distribution Depot Operations and Performance Report Card requirements are set forth by Management Information System Glossary, DLAH 7730.2, January 1982, for the mechanization of the RCS DLA(M)232(O)MIN Report under the DLA Management Information System.

b. The Management Data Report Card requirements are set forth by Management Information System Glossary, DLAH 7730.2, January 1982, for the mechanization of the RCS DLA(M)26(C)MIN Report under the Management Information System.

2. The following are the fields in the Distribution Depot Operations and Performance Report transaction:

a. Card Format 1

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Card Identification	1-3	Enter MIS which denotes Card Identification.
Item Number	4-7	Enter applicable 4-digit item number (e.g., 0010 for Line Item Received for Stock).
Card Format	8-9	Enter 01 which denotes Card Format 1.
Report Identification	10	Enter C which denotes Report Identification.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Reporting Activity Code	11-12	Enter following applicable 2-character Reporting Activity Code: CD - which denotes DDCO DH - which denotes DDMT DM - which denotes DDMP DT - which denotes DDTC DU - which denotes DDOU GD - which denotes DDRV SD - which denotes DDTC - Alameda
Report Period Date	13-16	Enter 4-digit Report Period Date for which the data apply. Enter report month numerically in positions (01 to 09 for months January through September, 10 for October, 11 for November and 12 for December) and last 2 digits of calendar year in positions 15-16.
Date Submitted	17-20	Enter 4-digit Julian date that the data was submitted. For example: if submitted on 6 August 1983, enter 2 in field position 17 which would denote the calendar year and 218 in field positions 18-20 which would denote the day of the year; if submitted on 7 January 1982, enter 2 in field position 17 and 007 in field positions 18-20.
Transaction Code	21	Enter I to denote Insertion or R to denote Replacement. See paragraph 2d for instructions regarding I and R.
Blank	22-24	Leave blank.
Data Entry	25-31	Data Field 01. Enter data applicable to materiel for which Defense Construction Supply Center (DCSC) has inventory management responsibility.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
	32-38	Data Field 02. Enter data applicable for which Defense Electronics Supply Center (DESC) has inventory management responsibility.
	39-45	Data Field 03. Enter data applicable to materiel for which Defense General Supply Center (DGSC) has inventory management responsibility.
	46-52	Data Field 04. Enter data applicable to materiel for which Defense Industrial Supply Center (DISC) has inventory management responsibility.
	53-59	Data Field 05. Enter data applicable to Clothing and Textile Items for which Defense Personnel Support Center (DPSC) has inventory management responsibility.
	60-66	Data Field 06. Enter data applicable to Medical Items for which Defense Personnel Support Center (DPSC) has inventory management responsibility.
	67-73	Data Field 07. Enter data applicable to Subsistence Items for which Defense Personnel Support Center (DPSC) has inventory management responsibility.
	74-80	Data Field 08. Enter data applicable to materiel for which Defense Industrial Plant Equipment Center (DIPEC) has inventory management responsibility.

NOTE: The following applies to above Data Fields 01 through 08 (field positions 25 through 80):

(1) Enter quantities or percentages in extreme right hand field positions of the Data Field, leaving left hand positions blank, if the Data Field is not completely filled. Do not zero fill the data field.

(2) Quantities must be reported as whole units.

(3) Percentages must be rounded to two decimal points (e.g., 15.347 would be rounded to 15.35 and entered in position as 1535).

(4) Do not enter periods, punctuation marks or other special characters.

b. Card Format 2

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Card Identification	1-3	Enter MIS which denotes Card Identification.
Item Number	4-7	Enter applicable 4-digit item number, e.g., (0010 for Line Items Received for Stock).
Card Format	8-9	Enter 10 which denotes Card Format 2.
	10-21	Same as for Card Format 1.
Blank	22-24	Leave blank.
Data Entry	25-31	Data Field 10. Enter data applicable to Direct Commissary Support Shipment (DICOMSS).
	32-38	Data Field 11. Enter data applicable to materiel for which General Services Administration (GSA) has inventory management responsibility.
	39-45	Data Field 12. Enter data applicable to materiel for which Department of the Army has inventory management responsibility.
	46-52	Data Field 13. Enter data applicable to materiel for which Department of Navy has inventory management responsibility.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
	53-59	Data Field 14. Enter data applicable to materiel for which the Department of the Air Force has inventory management responsibility.
	60-66	Data Field 15. Enter data applicable to materiel for which the Marine Corps has inventory management responsibility.
	67-73	Data Field 16. Enter data applicable to materiel shipped to other customers not specifically identified in other data fields.
	74-80	Data Field 18. Enter the sum of data submitted in Card Format 1, Data Fields 01-08 and Card Format 2, Data Fields 10-16. For Data Elements 0340, 0341, 0342, 0343, 0380, 0400, 2001 through 2011, and 3001 through 3011, only the grand total is reported.

NOTE: See notes at end of paragraph 2a.

c. Card Format 3

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Card Identification	1-3	Enter MIS which denotes Identification.
Item Number	4-7	Enter applicable 4-digit item number (e.g., 0010 for Line Items Received for stock).
Card Format	8-9	Enter 17 which denotes Card Format 3.
	10-21	Same as for Card Format 1.
Blank	22-32	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Data Entry	33-40	Data Field 19. Enter data reported in Card Format 1 that are applicable to Issue Priority Group I.
	41-48	Data Field 20. Enter data reported in Card Format 1 that are applicable to Issue Priority Group II.
	49-56	Data Field 21. Enter data reported in Card Format 1 that are applicable to Issue Priority Group III.
	57-80	Data Field 22. Enter the sum of Data Fields 19, 20, and 21.

d. Corrections to previous submissions: These will be prepared in the same formats as shown in paragraphs 2a, 2b, and 2c, entering the following appropriate action code in field position 21 to identify the type of correction.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
	I	To insert a complete card or data field(s) omitted from a previous submission.
	R	To replace a complete card or data field(s) from any previously transmitted card. For this action, the information in field positions 1-16 must be identical to the card previously submitted. Field positions 17-20 "Date Transmitted", must reflect the date the R card is submitted. This action is to replace, not adjust, but replace estimated or erroneous data previously submitted. For this type of correction, only submit the replacement figure(s). Therefore be absolutely certain that the replacement data are entered in the proper data field(s) and that all other data fields are completely

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		blank. When the HQ DLA Edit Program recognizes an R in position 21, it will replace the data in the data bank with the data entered in the data fields. Data fields that are completely blank result in no transaction.

NOTE: The "Report Period Date" (field positions 13-16) must reflect the date of the report period of the data affected. The "Date Submitted" (field positions 17-20) must reflect the date they are transmitted.

3. The following are the fields in the Management Data Report transaction:

a. Card Format B

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identification	1-3	Enter MIS.
	4-6	Leave blank.
Report Identification	7	Enter B.
Index Number	8-12	Enter applicable 5-digit index number. The index number is contructed as follows: The five digits (pos. 8-12) are made up of the data element number as shown in the RCS DLA(M)26(C)MIN Glossary. The data element number (pos. 8-12) will be preceded by zeros if less than five digits in length. For example, the index number for data element 1 is: 00001, index number for data element 4B is: 0004B.
Blank	13-27	Leave blank.
Report Period Date	28-31	Enter month numerically in positions 28-29 and last two digits of calendar year in positions 30-31. Where the month

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		is only a unit digit, it will be preceded by a zero (01 to 09 for months January through September).
Blank	32	Leave blank.
Data Entry	33-43	Enter quantity, value, percentage, etc., in extreme right hand field positions, leaving left hand positions blank if the field is not completely filled.

NOTE: The following must be adhered to in reporting in the Data Entry card field.

(1) Do not include punctuation marks or other special characters for data entry (e.g., percent signs, commas, decimal points, and so forth).

(2) Negative or credit figures must have an eleven zone punch in the unit's position (field position 43) of the Data Entry card field. All other entries must be completely numeric.

(3) If an item is applicable and there is nothing to report for the reporting period, enter a numeric zero in the unit's position (field position 43) of this card field (do not report the word "none" and do not leave blank).

(4) When actual data are not available, a best estimate will be furnished. Estimated data will be replaced with actual data when available, but in any event not later than the next reporting period.

(5) Quantities must be reported as whole units.

(6) Monetary amounts must be reported to the nearest dollar.

(7) Percentages must be carried to two decimal points (e.g., 15.344 would be entered as 1534 in field positions 40-43).

(8) Fractions, where specified, must be converted to one decimal point (e.g., 4 1/2 would be entered as 45 in pos. 42-43).

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	44-67	Leave blank.
Reporting Activity Code	68-69	Enter the following applicable 2-character Reporting Activity Code: CD - which denotes DDCO DH - which denotes DDMT DM - which denotes DDMP DT - which denotes DDTC DU - which denotes DDOU GD - which denotes DDRV SD - which denotes DDTC - Alameda
Blank	70	Leave blank.
Date Submitted	71-74	Enter Julian date that transmission is made. For example, if they are transmitted on 10 September 1982, enter 2 in field position 71 which would denote the calendar year and 253 in field positions 72-74 which would denote day of the year.
Blank	75	Leave blank.
	76	Leave blank unless estimated data are submitted. Enter E to denote estimated data. Submit actual data to replace estimated data prior to due date for following month report.
	77-79	Leave blank.
Transaction Code	80	Enter I to denote Insertion. Exception: Enter R to denote Replacement. See paragraph below for instructions regarding I and R.

b. Corrections to previous submissions: These will be prepared in the same format as shown in paragraph 4b, entering the following appropriate action code in field position 80 to identify the type of correction:

PUT IN FIELD POSITION 80	ACTION
I	To insert a complete card that was previously omitted. An I will also be entered in field position 80 for all initial (current month) submissions.
R	To replace a complete card previously submitted. This action is to replace previously submitted estimated or erroneous data.

NOTE: The "Report Period Date" field (field positions 28-31) must reflect the date of the report period of the submission affected. The "Date Submitted" card field (field positions 71-74) must reflect the date corrections are transmitted.

4. VALIDATION

To preclude transmission of invalid cards, all MIS cards will be system generated (mechanicaly prepared) and automatically validated in accordance with the following validation criteria.

a. RCS DLA(M)232(O)MIN Card.

VALIDITY CHECK	FIELD POSITIONS	CRITERIA
Invalid Card Identification	1-3	Must be MIS.
Invalid Item Number	4-7	Must be a valid 4-digit item number. All valid item numbers are identified in appendix A-83.
Invalid Field Number	8-9	Must be 01 for Card Format 1. Must be 10 for Card Format 2. Must be 17 for Card Format 3.
Invalid Report Identification	10	Must be C.
Invalid Reporting Activity Code	11-12	Must be a 2-digit alpha code that has been assigned to and identifies the reporting activity. These are: CD for DDCO DH for DDMT DM for DDMP DT for DDTC DU for DDOU GD for DDRV SD for DDTC - Alameda

VALIDITY CHECK	FIELD POSITIONS	CRITERIA
Invalid Report Period	13-16	Positions 13-14 must be the month for which the data are applicable, e.g., 01 for January, 07 for July, 11 for November. Positions 15-16 must be last two digits of calendar year, e.g., 82 for 1982. All data are normally for current month. If for prior month, an appropriate code (I or R) must be contained in field position 21. Any date in the field that is subsequent (higher number) to the current month is invalid. The edit program must therefore be updated each month to reflect the current (report) month.
Invalid Transmission Date	17-20	Must be the year and Julian day that they are submitted. Position 17 must be last digit of calendar year, e.g., 2 for 1982, 4 for 1984. Positions 18-20 must be the Julian day of the calendar year. Since this date changes daily, the edit program must be updated each time that input is processed.
Invalid Transaction Code	21	
(1) Not blank and contains other than an I or R.		Must be blank or contain an I or R.
(2) Contains an I and there is a matching card from a previous submission.		See paragraph 2d.
(3) Contains an R and there is no matching card from a previous submission.		See paragraph 2d.
Card Format 1 (contains 01 in field positions 8-9)		
(1) Positions 22-24	22-24	Must be blank.

VALIDITY CHECK	FIELD POSITIONS	CRITERIA
(2) Data Entry Fields	25-31 32-38 39-45 46-52 53-59 60-66 67-73 74-80	Entries in these fields must be numerical. There must be no blanks to the right of the first digit of the figure (entry reported in the card fields). There must be no minus quantities. The absence of data in a given field, except for I or R cards, is an indication of "Not applicable".

Card Format 2 (contains 10 in field positions 8-9)

(1) Positions 22-24	22-24	Must be blank.
(2) Data Entry Fields	25-31 32-38 39-45 46-52 53-59 60-66 67-73 74-80	See Card Format 1, CRITERIA, above.

Card Format 3 (contains 17 in field positions 8-9)

(1) Positions 22-32	22-32	Must be blank.
(2) Data Entry Fields	33-40 41-48 49-56 57-80	See Card Format 1, CRITERIA, above.

NOTE: Data submitted in Card Format 2 for Data Field 18, Total of DLA and non-DLA Commodities, must equal the sum of the data submitted in Card Format 1, Data Fields 01 through 08, and in Card Format 2, Data Fields 10 through 16. Exception would be for Items 0340, 0341, 0342, 0343, 0380, 0400, 2001 through 2011, and 3001 through 3011. Only the grand total is reported for these items.

b. RCS DLA(M)26(C)MIN Card

VALIDITY CHECK	FIELD POSITIONS	CRITERIA
Invalid Document Identification	1-3	Positions 1 through 3 must read MIS.
Positions 4-6 not blank	4-6	Positions 4 through 6 must be blank.

VALIDITY CHECK	FIELD POSITIONS	CRITERIA
Invalid Report Identification	7	Position 7 must contain B.
Invalid Index Number	8-12	Positions 8 through 12 must contain a 5 digit index number as prescribed in appendix A-83.
Field Positions 13-20 not blank	13-20	Positions 13 through 20 must be blank.
	21-27	No check is made at HQ DLA on field positions 21 through 27. Some reporting activities are using these positions for various local purposes, e.g., identifying the staff office responsible for the data item; entering the index number in such a manner so as to permit sequencing.
Invalid Report	28-31	Positions 28-29 must reflect the month for Period Date which the data are applicable; e.g., 01 for January, 07 for July, 11 for November. Positions 30-31 must reflect the calendar year, e.g., 82 for 1982. Any date in the field that is subsequent (higher number) to the current month is invalid. The edit program must therefore be updated each month to reflect the current month.
Position 32 not blank	32	Position 32 must be blank.
Data Entry Field	33-43	Entry in positions 33 through 43 must be numerical and the units position or last digit in position 43. There must be no blank positions to the right of the figure (entry) reported.
(1) Datum field has embedded blanks		
(2) Datum field contains alpha character		Minus values are valid for selected data only. Therefore, all entries having a minus value should be double checked to ensure that minus values are appropriate.
(3) Datum field is completely blank		
(4) Datum field has minus value		

VALIDITY CHECK	FIELD POSITIONS	CRITERIA
Blank	44-67	Positions 44 through 67 must be blank.
Invalid Reporting Activity Code	68-69	Positions 68-69 must contain the two digit alpha code assigned to each reporting activity. Valid activity codes are identified in paragraph 4a.
Position 70 not blank	70	Position 70 must be blank.
Invalid Submission Date	71-74	Positions 71 through 74 must reflect the year and Julian day that the cards are submitted. Position 71 identifies the calendar year; e.g., 2 for 1982, 4 for 1984. Positions 72 through 74 identify the Julian day of the calendar year. Since this date changes daily, the edit program must be updated each time that input is processed.
Position 75 not blank	75	Position 75 must be blank.
Position 76 not blank and contains other than E	76	Position 76 must be blank or contain an E.
Position 77 not blank	77	Position 77 must be blank.
	78-79	No check is made at HQ DLA on field positions 78 and 79. These positions may therefore be used by reporting activities for any desired purpose.
Position 80 contains other than I or R	80	Position 80 must contain an I or R.
(1) I in position 80 and a matching record.		If an I, which means insert, is entered in position 80, there must be no matching card from a previous submission.
(2) R in position 80 and no matching record.		If an R, which means replace, is entered in position 80, there must be a matching card from a previous submission.

VALIDITY CHECK	FIELD POSITIONS	CRITERIA
Duplicate Submission		If two or more cards are submitted at the same time with identical information on positions 7 through 12, 28 through 31, 68, 69, 76, and 80, all such cards will be rejected.

APPENDIX B-96

INQUIRY FOR INVENTORY HISTORY PRINTOUT

1. This input will be used to obtain appendix F-98, part 1, Inventory History Printout.

2. The following are fields for input:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code*	1-3	Enter ZAT.
Blank	4-5	Leave blank.
Type of Pack**	6	Enter type of pack when applicable; otherwise, leave blank.
Blank	7	Leave blank.
National Stock Number*	8-20	Enter NSN.
Blank	21-76	Leave blank.
Functional Routing Code	77-78	Enter appropriate FRC.
Blank	79-80	Leave blank.

*Mandatory entries
**Optional, when applicable

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
6	Numeric 1, 2, 3, 4, or blank.	CK
8-20	All numeric filled.	AY

APPENDIX B-97

SUSPENDED RECEIPT RECORD DELETION

1. This input will be used by Receiving Division to delete an entire record from the Suspended Receipt File and corresponds to the remote entry of appendix B-43. Procedures for processing deletions appear in appendix E-182 P.

2. If a deletion input matches a record in the Suspended Receipt File which already contains Stow Information, the Stow Notice data will be indicated on the appendix F-246 report to be provided the day after the deletion is processed.

3. The following entries apply:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZZN.
Teleprocessing Control Number	4-9	Enter the TP Control Number of the receipt record to be deleted.
Blank	10-80	Leave blank.

4. VALIDATION

Violation will appear on the appendix F-85 report.

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
4-9	All numeric other than zeros.	D9

best copy available

APPENDIX P-98

WORKLOAD REQUEST CARD

1. To provide for requesting of workload using CRT input (program UWTF15) or a general purpose card for the following actions:

a. To request workload in addition to the workload scheduled for the current Planned Date to Transportation (PDT). Workload can be pulled by the following elements when used in conjunction with Workload Request Action Codes, appendix A-42. Enter by remote whenever possible.

(1) Line Items.

(2) Geographic Shipping Area.

(3) Warehouse Area.

(4) PDT.

(5) Destination (DCR).

(6) Consignee - under emergency conditions only.

(7) Special Projects with Service Assigning Code.

(8) Inventory Cutoff Date or NSN.

(9) Combinations of (1) through (4).

b. To pull additional workload with DIC A5J, DROs, use DRO Code W in conjunction with Action Code.

2. REFFRENCE:

Appendix E-098 P.

3. Up to 100 cards can be entered at one time for pulling workload items subparagraph a(1) through a(4) and a(9). Up to 15 cards each can be entered at one time for pulling special projects; DCR limit is 100 each; Inventory Cutoff Date pull is limited to 10 cards, and up to 50 cards may be entered to pull by NSN and Inventory Cutoff Date. Up to 35 cards can be input to pull by consignee, and 35 cards for Geographic Area and MRO Weight.

4. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZBL.
Blank	4-7	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
National Stock Number	8-20	Enter NSN only when release of MROs under inventory is required for a single NSN; otherwise, leave blank.
Blank	21-24	Leave blank.
Warehouse Area	25	Enter warehouse areas from which additional workload is to be pulled.
Planned Date to Transportation	26-28	Enter PDT from which additional workload is to be pulled.
Blank	29-45	Leave blank.
Area	46	Enter geographical shipping area from which additional workload is to be pulled. If Workload Request Action Code is CQ, geographical shipping area will be excluded from workload pull requirement. (Blank not a valid exclusion.) Blank is a valid Geographic Area.
Blank	47	Leave blank.
Consignee	48-53	Enter consignee for which workload is to be pulled. (To be used under emergency conditions only.) See note.
Service Assignment Code	54	See appendix A-5.
Project Code	55-57	Enter special project code for which workload is to be pulled.
Destination	58-63	Enter the Destination Cross-Reference for which workload is to be pulled.
Inventory Cutoff Date	64-67	Enter cutoff date when MROs (passed DRD) for this cutoff date are to be released.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Disposal Release Order or Blank	68	Enter W if additional workload requested is to be pulled only from disposal release quantities in the bank.
Line Items/Weight	69-73	Enter number of line items desired in addition to normal release or maximum of MROs to be released. Zero fill to left of significant digit. Enter the MRO weight restriction for Action Code A.
Blank	74-76	Leave blank.
Functional Routing Code	77-78	Enter FRC of originator.
Action Code	79-80	See appendix A-42.

NOTE: Field position 53 will be blank and pos. 52 may be blank for ILP consignee.

5. VALIDATION

Violation rejects will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
8-20	Must be all numeric or blank with Action Code CI. Blank with all other action codes.	Z9
25	Must be an alphanumeric with Action Codes CG, CL, CQ, and CV. Must be blank with all other action codes.	JJ
26-28	Must be all numeric with Action Codes CG, CJ, CQ, CS, and CT. Must be blank with all other action codes.	JK
46	Must be alpha/numeric not including zero with Action Codes CG, CJ, CL, CN and CQ. Must be blank with all other action codes.	JF
48-53	Alphanumeric Action Code CC only. Field will be blank for all other action codes.	RZ
54	Alphanumeric with Action Code CD. Blank with all other action codes.	AK

FIELD POSITION	VALIDATION	VIOLATION CODE
55-57	Alphanumeric with Action Code CD. Blank with all other action codes.	AK
58-63	Alphanumeric filled or blank in pos. 58-60 followed by three alphanumeric with Action Code CE. Blank with all other action codes.	MD
64-67	All numeric with Action Code CI. Blank with all other action codes.	Z9
68	Must be blank or alpha W.	SF
69-73	May be blank with Action Codes CC, CD, CE, CI and CT. Must be all numeric, other than all zeros with all other action codes.	JI/JH/HX
79-80	Alpha and valid code for a DIC ZBL.	CF
- -	Card entries in excess of table limits.	UC

APPENDIX B-99

MRO/DRO CONTROL/STATUS REQUEST CARD

1. This card is utilized for processing transactions for an individual shipment unit line item (MRO) to the Shipment Unit File.

2. Based on options in Table and Control File, transactions will be produced for each Parcel Post Line, each Freight Line, or both, appendix B-66D, not processed by the MOFAST System.

3. This card is utilized in conjunc ion with Action Codes, appendix A-42, to accomplish the following types of transactions:

a. Report shipment of items via parcel post or Local Delivery, excluding completed shipments of registered or insured parcel post.

b. Report completion of picking, packing, and assembly operations and offer materiel to transportation for shipment.

c. Cancellation of quantities.

d. Denials or adjustments to quantity ordered shipped. When partial denials or adjustments occur on registered parcel post, the partial shipment must be offered and adjustment/denial quantity processed with Action Codes DB, DD or DT, as applicable. Prior to entering a denial or adjustment card against an offered quantity, a reversal (Action Code DH) must be processed against the offered quantity.

e. Inquiry to obtain status of a shipment unit line item.

4. The following rules or instructions are applicable to utilization of this card:

a. This card may be utilized to correct data previously reported as offered.

b. This card may be utilized to report denials or cancellations at any stage of processing prior to confirmation or denial to the DSC. Before entering a ZBM denial card on a previously offered line item, a ZBM card reversing the original action must be submitted. A previously offered line item may be canceled by entering a ZBM card with the appropriate action code without reversing a previous action.

c. This card is utilized to report materiel as shipped or offered in those instances where the Shipment Unit Completion Card, appendix B-101, cannot be utilized. MRO Control Status Request Card is used when the quantity shipped is different from the quantity "ordered shipped" on one or more line items in a shipment unit.

d. This card is used to update/add data elements to the Shipment Unit File, i.e., Delay Reason Codes/Transportation Hold Codes, and so forth.

5. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZBM.
Blank	4-7	Leave blank.
Shipment Unit Number	8-14	Enter shipment unit number assigned to the shipment.
Shipment Unit Line Item Number	15-18	Enter the shipment unit line item number of the MRO.
Delayed Shipment Reason Code	19	Enter IAW appendix A-64. (See note 1.)
or		
Type of Hold Code	19	Enter IAW appendix A-21.
Blank	20	Leave blank.
Quantity	21-25	Enter the actual quantity offered or shipped.
Blank	26-27	Leave blank.
Weight or Blank	28-33	Enter total weight of quantity being shipped or offered. (See note 2.)
Number of Pieces	34-37	Number pieces (optional for Parcel Post - if blank, computer assigns 1).
Cube or Blank	38-42	Enter total cube of quantity being offered (to the nearest one tenth). (See note 2.)
Blank	43-46	Leave blank.
Mode of Shipment	47	Enter Mode of Shipment Code G, H, 6, or 7, appendix A-17, when shipment has been made via UPS. Enter I, 4, or 9 for local delivery, and so forth. Enter Y if partial line was shipped

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		registered or insured parcel post, requiring closing action by ZEN card; otherwise, leave blank.
Date Shipped*	48-51	Enter the Julian date materiel is shipped via parcel post or picked up; otherwise, leave blank.
Date Available for Shipment*	52-55	Enter Julian date freight materiel is offered to Transportation, denied, or canceled. Enter shipped date on registered or insured parcel post, being input with Action Code DB, DD or DT for adjustment processing.
Blank	56-60	Leave blank.
Quantity Adjusted, Canceled, or Denied**	61-65	Enter quantity overshipped, undershipped, or canceled.
Blank	66-71	Leave blank.
Parcel Post Clear Date	72-76	Enter revisions to computer determined clear date. (Enter 2-position year in pos. 72-73, Julian date in pos. 74-76.) Zero fill when clear date is to be deleted.
Functional Routing Code	77-78	Enter FRC.
Action Code	79-80	Enter applicable action code (appendix A-42).

*If both fields are blank, computer will enter current date as follows:

a. If pos. 47 is blank, date will be entered in pos. 52-55.

b. If pos. 47 is filled, date will be entered in pos. 48-51.

**If adjusted quantity exceeds 99,999, code line item as DP and process accordingly: i.e., prepare manual confirmations and retain F-107 report for record.

NOTE 1: Delay Reason Code U in pos. 19 will extract Shipment Unit Line Item Number, pos. 15-18. ZBP will offer remaining lines. ZBM with Delay Reason Code U must be processed in the same/earlier cycle as the ZBP for shipment unit.

NOTE 2: If weight and cube are blank on parcel post shipment, computer weight and cube will be recorded for MIS. For freight shipments this field must be filled or a blank will be recorded for MIS.

6. VALIDATION

Violation rejects will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
8-14	Numeric.	IU
15-18	Numeric. May be blank with Action Code DN only.	JE
21-25	Numeric or blank. Must not be all zeros when Action Code DF and pos. 47 is G, H, 6, or 7. Must not be all zeros when Action Code is DD.	AS
26-27	Quantity error and must not be Action Code DD, with pos. 70 numeric.	KQ
28-33	Numeric or blank.	HX
34-37	Numeric or blank.	IX
38-42	Numeric or blank.	IY
47	Alpha A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y or Z/numeric 2, 3, 4, 5, 6, 7, 8 or 9.	JB
61-65	Numeric or blank.	AS
72-76	Parcel Post Clear Date invalid.	I3
79-80	Alpha and valid for a DIC ZBM.	CF

APPENDIX B-100

INVENTORY REJECT TRANSACTION (DSC TO DEPOT)

1. This transaction is applicable to chapter 7 and is mechanically prepared by DSCs and forwarded to DLA depots only to advise that a depot initiated inventory request, DIC DJB, has been rejected during DSC processing because the inventory cutoff date is invalid (blanks/alpha) or less than two days in advance of the DSC processing date. Depots will use this transaction to cancel the inventory.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CK9.
Routing Identifier Code (To)	4-6	Enter RIC of depot.
Type of Inventory Code	7	Enter Type of Physical Inventory Code of the rejected inventory (appendix A-18).
National Stock Number	8-20	Enter NSN.
Blank	21	Leave blank.
Type of Pack Code	22	Enter Type of Pack Code (subsistence items only).
Unit of Issue	23-24	Enter UI.
Blank	25-61	Leave blank.
Cutoff Date	62-64	Perpetuate inventory Cutoff Date from DJB input card.
Blank	65-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter RIC of the activity from which card is being forwarded.
Blank	70	Leave blank.
Condition Code	71	Perpetuate Condition Code from DJB input card or leave blank if DJB Condition Code field is blank.
Management Code	72	Perpetuate Management Code from DJB or leave blank if DJB Management Code field is blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Date	73-75	Enter the numerical day on which this card is prepared.
Blank	76-80	Leave blank.

APPENDIX B-101

SHIPMENT UNIT COMPLETION CARD

1. This card is utilized to report completion of picking, packing, and assembly operations on an entire shipment unit.

2. This card is computer prepared for non-MOFAST items and output at the time of preparation of DD Form 1348-1. Cards are sequenced by shipment unit number, separate grouping for parcel post and freight. See appendix B-66 for Depot Options for the production of ZBP Cards.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZBP.
Blank	4-7	Leave blank.
Shipment Unit Number	8-14	Enter shipment unit number.
Number of Line Items	15-18	Enter the number of lines in the shipment unit.
Delayed Shipment Reason Code	19	Enter in accordance with appendix A-64
or		or
Transportation Hold Code	19	Enter in accordance with appendix A-21.
Blank	20-25	Leave blank.
Blank	26-27	Reserved for future use.
Weight/Blank	28-33	Enter total weight of shipment unit to nearest pound. (See note 1.)
Number of Pieces	34-37	Enter number of pieces.
Cube/Blank	38-42	Enter the total cube of the shipment. Low order position in tenths of a cubic foot although decimal is not punched. (See note 1.)

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
First or Only Package Number	43-46	Reserved for future use.
Mode of Shipment	47	Enter applicable mode of shipment if materiel is shipped by parcel post or Government truck (Modes G, H, I, 6, or 7); otherwise, leave blank.
Date Shipped	48-51	Enter Julian date only if shipped via parcel post or Government truck. (See note 2.)
Date to Transportation	52-55	Enter Julian date freight shipment is offered to Transportation. (See note 2.)
Blank	56-60	Leave blank.
Issue Priority Group	61	Computer entered IPG.
Mode	62	Computer determined propose mode of shipment code: P - Parcel Post-Other F - Freight-Other B - Freight-FMS
Blank	63-71	Leave blank.
Parcel Post Clear Date	72-76	Enter revisions to computer determined clear date. (Enter 2-position year in pos. 72-73, Julian date in pos. 74-76). Zero fill when clear date is to be deleted.
Functional Routing Code	77-78	Enter FRC or leave blank.
Blank	79-80	Leave blank.

NOTE 1: If weight and cube are blank on parcel post shipment, computer weight and cube will be recorded for MIS. For freight shipment this field must be filled or a blank will be recorded for MIS.

NOTE 2: If both fields are blank, computer will enter current date as follows:

a. If pos. 47 is blank, date will be entered in pos. 52-55.

b. If pos. 47 is filled, date will be entered in pos. 48-51.

4. VALIDATION

Violation rejects will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
8-14	Numeric.	IU
28-33	Numeric or blank.	HX
34-37	Numeric or blank.	IX
38-42	Numeric or blank.	IY
72-76	Parcel post clear date Invalid.	13

APPENDIX B-102

RECEIPT AND LOCATOR INQUIRY CARD

1. This card input will be used to inquire the PMRR, Locator and, if applicable, the Contract Data File to process new receipt Activity when inquiry via the remote format (appendix B-41) is not possible. Inputs will be prepared using local coding sheets and replies will be cyclic.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZB6.
National Item Identification Number	4-12	Enter last 9 digits of the NSN.
Condition Code	13	Enter applicable condition code.
Procurement Item Instrument Number or Document Number	14-18	Enter the last five digits of the PIIN or Document Number.
Date Received	19-23	Enter year and Julian date on which materiel was received, i.e., YYDDD (77328).
Contract Line Item Number (optional, used for Procurement items only)	24-29	Enter CLIN if applicable or leave blank.
Supplementary PIIN (optional, used for Procurement items)	30-33	Enter SPIIN or leave blank as applicable.
Date of Pack/Expiration (optional)	34-37	Enter date of Pack/Expiration, if applicable, 2-digit month and 2-digit year.
Type of Pack Code (optional)	38	Enter Type of Pack Code, if applicable.
Blank	39-80	Leave blank.

3. VALIDATION

Violations will appear on the appendix F-85 report.

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
4-12	Numeric, other than all zeros, except that pos. 6 may be Alpha A, B, J, L, or S for DIC 'S.	AY
13	Alpha A through M except I.	AF
14-18	Alpha/numeric (no blanks or special characters).	AI
19-23	Numeric and equal to or less than current Julian date.	JM
24-29	Blank or numeric other than all zeros in pos. 24-27 and alpha/numeric in pos. 28-29.	JI
30-33	If PIIN contains A or D in pos. 14, pos. 30-33 must be alpha/numeric greater than 0000	EX
34-37	Blank or numeric fill. If filled pos. 34-35 must be greater than zero and less than 13.	HH
38	Numeric 1, 2, or 4 or blank.	CK

APPENDIX B-103

BIN ITEM INQUIRY CARD

1. This input card is used to inquire the Bin Automated Replenishment Data Collection System. Inquiry will be permitted one time a week. Inquiries will be limited to 200 NSNs or a maximum of three Popularity Group Codes (PGCs) in any one run.

2. The DIC is ZUJ. Action Code BN will be used to inquire by NSN. Action Code BP is provided for inquiry by PGC.

3. The transaction will contain the following fields:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZUJ.
Blank	4-7	Leave blank.
National Stock Number	8-20	Enter NSN in each card. Mandatory for Action Code BN.
Popularity Group Code	21-23	Enter PGC(s) A through J, or L. Enter from one to three codes; leave unused positions blank. Mandatory for Action Code BP.
Blank	24-76	Leave blank.
Functional Routing Code	77-78	Enter appropriate FRC.
Action Code	79-80	Enter BN for NSN inquiry or BP for PGC inquiry.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
8-20	Action Code BN only. Alpha/numeric (no blanks).	AY
21-23	Action Code BP only. A, B, C, D, E, F, G, H, I, J, or L, or blank in pos. 22-23.	OQ

APPENDIX B-104

KEY ESSENTIAL ITEM/DAMAGE ASSESSMENT CARD

1. These cards, DIC CZW, are received monthly by distribution activities from DLA Administrative Support Center (DLASC) for use by Logistics Readiness Center in bomb damage assessment as prescribed in the DLA War and Emergency Support Plans, Annex N, Section II.

2. Cards are direct computer input and are processed as prescribed in appendix D-92 to produce a separate trailer card for each warehouse location for the applicable NSN. Elements identified by asterisks will be entered and interpreted in the trailer card.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code*	1-3	Enter CZW.
Routing Identifier Code (From)	4-6	Enter RIC S9H.
National Stock Number	7-19	Enter the NSN of the item being reported.
Routing Identifier Code (From)	20-22	Enter RIC of the DSC preparing the report.
Unit of Issue	23-24	Enter the abbreviation for the catalog UI.
Item Description	25-34	Enter the item name of the NSN being reported.
Essentiality of Substitute Code	35	Enter A for automatic sub; B for practical sub; C for extreme emergency sub. Leave blank if standard item.
Blank	36-38	Leave blank.
Quantity On Hand	39-46	Enter quantity on hand at this defense depot or DSC with collocated storage facility (as recorded in the DSC records).
Physical Stock Location	47-58	See note.
Preferred National Stock Number	59-71	Enter Preferred NSN.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	72	Leave blank.
Julian Date	73-76	Enter Julian date this card is prepared (one-digit year, three-digit day).
Survival-Recovery (S-R) Item	77	Enter Code A to indicate an Essential Code item which is also a post attack, survival and recovery item; otherwise, leave blank.
Routing Identifier Code (To)	78-80	Enter RIC of this storage site.

NOTE: To be computer inserted at storage site for use in damage assessment. Additional cards will be prepared for each physical location recorded in the Item Locator File.

4. VALIDATION

Entry validation of storage site only.

APPENDIX B-105

LOCATION SURVEY COMPLETION CARD

1. This card is entered into the computer following completion of locator survey.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZEV.
Blank	4-5	Leave blank.
Location Survey Lot Number	6-10	Location Survey Lot Number.
Blank	11-76	Leave blank.
Functional Routing Code	77-78	Enter appropriate FRC.
Action Code	79-80	Enter appropriate action code. FL - Cancel Survey SC - Normal Close

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
6-10	Numeric, no blanks.	WZ
79-80	Alpha FL or SC.	CF

APPENDIX B-106

COMPLETED RECEIPT CHANGE CARD

1. This format will be prepared and submitted to correct data elements present in a Completed Receipt (MRC) record. When research and sufficient investigation reveals that a procurement or return/redistribution receipt requires corrective action, appropriate receipt personnel will prepare the necessary input. Contract Line Item Number (CLIN) changes, in addition to updating the MRC history, will also update the matching Contract Data record. This dual update function will also occur for PIIN, SPIIN, NSN, Condition Code, Unit of Issue changes, and Quantity corrections.

2. Input to correct or delete a record will be prepared in the following manner:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZEW.
Stock Number	4-16	Enter the stock number shown in the completed Receipt File.
Procurement Instrument Identification Number (PIIN)	17-30	Enter the PIIN/Document Number shown in the Completed Receipt File.
Supplementary Procurement Instrument Identification Number (SPIIN)	31-34	Enter the Supplementary PIIN shown in the Completed Receipt File. Blanks are acceptable.
Contract Line Item Number (CLIN)	35-40	Enter the CLIN shown in the Completed Receipt File.
Condition Code	41	Enter condition code shown in Completed Receipt File.
Date Received	42-46	Enter date materiel was received as shown in the Completed Receipt File (YYDDD).
Teleprocessing Control Number	47-52	Enter TP Control Number as shown in the Completed Receipt File.
New Data	53-67	Leave blank with Action Code HA. With all other action codes, enter the new data element left-justified, i.e., start in pos. 53.
Blank	68-76	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Functional Routing Code	77-78	Enter applicable routing code.
Action Code	79-80	HA - Delete HB - RIC TO HC - Stock Number HD - Type Pack HE - Unit of Issue HF - PIIN/Document Number HG - Line Item HH - Signal Fund HJ - Distribution HK - Project HL - Ownership/Purpose HM - Condition HN - Management HP - SUPP PIIN HQ - Weight HR - Quantity HU - Supplementary Address HW - Shipment Number/Shipment Number Suffix Code

3. VALIDATION

Violation will appear on the appendix F-085 report.

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
4-16	Numeric except pos. 10 may be A, B, J, L, or S for DICOMSS items.	AY
17-30	Alpha/numeric.	AI
31-34	Alpha/numeric, or blank.	EX
41	Alpha (A through M, except I) or blank.	AF
42-46	Numeric, pos. 43-45 must be greater than zero and less than 367.	JM
47-52	Numeric.	D9
53-67	See notes 1, 2 and 3.	

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
79-80	HA, HB, HC, HD, HE, HF, HG, HH, HJ, HK, HL, HM, HN, HP, HQ, HR, HU, HW (see note 1).	CF

NOTE 1: When Action Code is:

HC - NSN must be numeric, other than all zeros. Third position of NSN may be A, B, J, L, or S.	AY
HG - CLIN must be numeric, sub-CLIN alpha/numeric Invalid Action Code entry if pos. 17-30 contain other than PIIN data.	JI
HM - Condition must be alpha A through M, except I.	AF
HQ - Weight must be numeric.	HX
HR - Quantity must be numeric and greater than zero.	AS
HU - Invalid Action Code if pos. 17-30 reflects PIIN data.	CF
HP - Invalid Action Code if pos. 17-30 reflects other than PIIN data.	CF
HY - PIIN/Document Number must be alpha/numeric.	AI
NOTE 2: If the Action Code is HC, HF, HG, HM, HP or HU, then the New Data submitted in pos. 53-67 cannot equal the value for that data element in the Completed Receipts record.	BB

NOTE 3: The Shipment Number Suffix Code is processed as position 8 of the Shipment Number, when submitting Action Code HW. To add or change a Shipment Number Suffix Code, include the code in position 8. If the Shipment Number Suffix Code does not apply or is being deleted, leave position 8 blank. If the Shipment Number changes but the Shipment Number Suffix Code remains the same, the Shipment Number Suffix Code <u>must</u> be submitted in position 8 of the Shipment Number.

NOTE 4: These data element corrections will also be processed to the Contract Data File for appropriate action.

APPENDIX B-107

INQUIRY FOR TRANSACTION RECORD

1. This input is used to inquire the Depot Transaction Record File to obtain the F-145 Depot Balance and Transaction File Printout.

2. Inquiry can be made for a single NSN or for a series of NSNs identified by a low and high FSC parameter.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZAN.
Routing Identifier Code	4-6	Enter RIC of depot and manager.
Blank	7	Leave blank.
Federal Supply Class	8-11	*Enter FSC.
National Item Identification Number	12-20	Enter NIIN when applicable.
Federal Supply Class	21-24	*Enter FSC if applicable.
Blank	25-76	Leave blank.
Functional Routing Code	77-78	Enter appropriate FRC.
Blank	79-80	Leave blank.

Complete positions 8-20 when inquiry is for a single NSN. Complete positions 8-11 and 21-24 when inquiry is for a series of NSNs identified by a low and high FSC.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
1-3	ZAN	AA
4-6	Alphanumeric.	AC
8-11	All numeric.	XE

FIELD POSITION	VALIDATION	VIOLATION CODE
12-20	All numeric (except pos. 14 may contain A, B, J, L or S). Must be blank if pos. 21-24 is filled.	AY
21-24	All numeric. Must be blank if pos. 12-20 is filled.	AY

APPENDIX B-108

RECEIPT CONFIRMATION CARD
(SHORT FORM - PMRR AVAILABLE)

1. The Receipt Confirmation Card (RCC) is originated by the Receiving Division and is the document that, in conjunction with an appropriate Stow Notice (appendix B-46 or B-144), initiates mechanical preparation of the Materiel Receipt Card (MRC - appendix B-20 or B-21) for reporting of materiel to the appropriate DSC.

2. Data used to prepare the MRC will be obtained from the RCC input and the PMR record. The Receipt Control Document will be the source document for preparation of the short form RCC by Receiving Division in accordance with appendix E-108 P.

3. Acceptance Reports, DIC PKN/P, will be automatically output when specific data are entered in this format IAW appendix E-108 P.

a. The following entries apply for card (batch) input:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Docume. . Identifier Code	1-3	Enter ZV_ or ZW_. Enter 3rd position in accordance with appendix A-1 to identify the type of Materiel Receipt transaction.
Teleprocessing Control	4-9	Enter the six-position code assigned by the computer on the Receipt Control Document.
Quantity	10-16	Enter the quantity actually received, preceding significant digits with zeros. Enter Override indicator in pos. 29 if greater than 99,999.
Weight	17-23	Enter the weight (in lbs.), preceding significant digits with zeros. Enter Override indicator in pos. 29 if greater than 99,999.
Warehouse Area	24-26	Enter the 3-position indicator applicable to the warehouse area to which the received materiel is being forwarded for storage.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Discrepancy Code	27-28	Enter the applicable receipt Discrepancy Code and Inspection Performed Code from appendices A-26 and A-27.
Quantity/Weight Override (OVR)	29	Enter alpha X whenever weight or quantity exceeds 99,999 or when quantity input exceed the contract quantity variance. See note 3.
Condition Code	30	Enter the applicable Condition Code from appendix A-16 only if the Condition Code printed on the Receipt Control Document is incorrect; otherwise, leave blank.
Management Code	31	Enter appropriate code from appendix A-13, if applicable; otherwise, leave blank. (See note.)
Contract Line Item Number	32-37	For ZV_ input, enter the line item number in pos. 32-35 (must be greater than zero) and the subline item number in pos. 36-37 must be zero or alpha/numeric only if data printed on the Receipt Control Document are incorrect; otherwise, leave blank.
Supplementary Address	(32-37)	For ZW_ input, enter the supplementary address only if data printed on the Receipt Control Document are incorrect; otherwise, leave blank.
Unit of Issue	38-39	Enter the appropriate code from appendix A-48 only if the code printed on the Receipt Control Document are incorrect; otherwise, leave blank.
Federal Supply Class	40-43	Enter the correct FSC only if the class printed on the Receipt Control Document is incorrect; otherwise, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Shipment Number	44-50	For ZV_/ZWT input, enter the shipment number, if applicable. DIC ZV_ input may not be blank when PMR response Management Code is D or F. If shipment number is not available enter zeros.
Signal Code	(44)	For ZW_ input, enter the appropriate code from appendix A-8, only if applicable.
Fund Code	(45-46)	For ZW_ input, enter the appropriate code from appendix A-9, only if applicable.
Project Code	(47-49)	For ZW_ input, enter the appropriate project code, only if applicable.
Blank	(50)	For ZW_ input, leave blank.
Suffix Code	51	If the quantity in pos. 10-16 is greater than 99,999 enter the alpha code with which the computer should begin suffix assignments. If left blank, the computer will begin with A. The appropriate suffix should also be entered when the RCC input relates to one portion of a recent split to accommodate two or more conditions.
Blank	52-53	Leave blank.
Shipment Number Suffix	54	Enter vendors shipment number suffix, if applicable.
Administering Location Code	55-57	For DIC ZV_ input reflecting Management Codes D or F on the F-200 only. Enter Administering Location Code only if not available on the F-201 or different than that indicated on the F-200, Contract Data Sheet and Receipt Control Document, respectively.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Quantity Shipped	58-65	For DIC ZV_ input reflecting Management Codes D or F on the F-200 only. Enter quantity shipped as shown on the Vendor Document. Precede significant digits with zero fill. May be blank (see note).
Blank	66-80	Leave blank.

NOTE: Automatic Acceptance Reporting should be waived/canceled for those receipt actions which exhibit Management Codes D or F only, and for which a DSC, not a DCASR, is specified on the contract as the payment office. This will be accomplished automatically when the Administering Location Code, extracted from mechanized Contract Data, is alpha, alphanumeric, or numeric greater than 172. When this type code is present on the F-200 and F-201, RCD or CDS, no quantity shipped or Administering Location Code entry is required in the DIC ZV- input. Manual cancellation of the Acceptance Report can be accomplished by entered XXX in pos. 55-57 or the ADM field; Quantity Shipped field, pos. 58-65, may then be blank fill. Refer to appendices E-047 P and E-108 P for additional details.

b. The following entries apply to CRT (remote) input. Initialize in accordance with appendix E-194 P and select appropriate two-position panel ID ZV_ or ZW_. Program will display the required RCC as ZV_ or ZW_ with cursor positioned for next data entry.

DISPLAY LEGEND	NO. OF POS.	EXPLANATION/INSTRUCTIONS
DIC	1	Program will display requested DIC ZV_ or ZW_ in accordance with appendix E-194 P. Initialize procedure to identify type of Materiel Receipt Transaction.
TP NUMBER	6	Enter TP Control Number.
QUANTITY	7	Enter exact quantity received. Unused positions may be left blank. See OVR Legend.
WEIGHT	7	Enter weight received and leave unused positions blank. See OVR Legend.

DISPLAY LEGEND	NO. OF POS.	EXPLANATION/INSTRUCTIONS
WHSE	3	Enter three-position storage area identification to which received materiel is being forwarded.
DISC-CD	2	Enter applicable Receipt Discrepancy Code and Inspection Performed Code, appendices A-26 and A-27.
OVR	1	Enter alpha X whenever the weight or quantity exceeds 99,999 or when the quantity input exceeds the Contract Quantity Variance. See note 3.
COND	1	Enter corrected Condition Code if applicable; otherwise, leave blank.
MGT	1	Enter appropriate Management Code (appendix A-13); otherwise, leave blank. See note 1.
CLIN (ZV_ Display)	6	ZV_ - Enter correct CLIN if CLIN on Receipt Control Document is incorrect.
SUPP ADD (ZW_ Display)	6	ZW_ - Enter Supplementary Address, if applicable.
UI	2	Enter corrected Unit of Issue if U/I of RCD is incorrect; otherwise, leave blank.
FSC	4	Enter Federal Stock Class if RCD FSC is incorrect; otherwise, leave blank.
SHIPMENT NMBR (ZV_ Display)	7	Enter Shipment Number for ZV_ documents if applicable (ZV_ input only). Must not be blank if Management Code of PMR response is D or F. Enter zeros if shipment number is not available.

DISPLAY LEGEND	NO. OF POS.	EXPLANATION/INSTRUCTIONS
SIG-CD (ZW_ Display)	1	Enter Signal Code, appendix A-8, only if applicable (ZW_ input only).
FUND-CD (ZW_ Display)	2	Enter Fund Code, appendix A-9, if applicable (ZW_ input only).
PRJ-CD (ZW_ Display)	3	Enter Project Code, if applicable (ZW_ input only).
SHIPMENT NMBR (ZWT Display)	7	Enter Shipment Number if available and if DOC-ID equals ZWT; otherwise, leave blank.
SFX	1	Enter appropriate Suffix Code (see explanation/instructions for pos. 51).
SS	1	Enter vendor's shipment number suffix, if applicable. Depress Enter key (see note 2).
ADM (ZV_ Display)	3	When RCD, F-200, reflects Management Code D or F, enter Administering Location Code only when not available or correction to that code indicated on the F-201 and F-200 reports, Receipt Control Document and Contract Data Sheet is desired (see note 4).
QTY SHIP (ZV_ Display)	8	Enter quantity shipped as shown on the Vendor Document. May be blank (see note 4).

NOTE 1: May be blank if Condition Code of Type A or ZB6 inquiry equals H, and item is to be routed to PDO. If item is to be destroyed (not forwarded to PDO), enter Management Code J.

NOTE 2: If current format to be used for next RCC, depress enter key; when data are to be entered with simultaneous selection of new format, position cursor to "Enter Panel ID" position and enter format requested (ZV_, ZW_, ZX_, or ZY_). Depress enter key.

NOTE 3: The quantity entered in pos. 10-16 of the card input or the Quantity area of the remote input of all DIC ZV_ inputs may exceed the quantity variance

recorded in the Automated Contract File and still be less than 99,999. In this instance, the DIC ZV_ input will reject due to a missing "Quantity Override Indicator". If the excessive quantity is acceptable, enter the X override indicator and the RCC update will not reject.

NOTE 4: Automatic Acceptance Reporting should be waived/canceled for those receipt actions which exhibit Management Codes D or F only, and for which a DSC, not a DCASR, is specified on the contract as the payment office. This will be accomplished automatically when the Administering Location Code, extracted from mechanized Contract Data, is alpha, alpha/numeric, or numeric greater than 172. When this type code is present on the F-200 and F-201, RCD or CDS, no quantity shipped or Administering Location Code entry is required in the DIC ZV_ input. Manual cancellation of the Acceptance Report can be accomplished by entering XXX in pos. 55-57 or the ADM field; Quantity Shipped field, pos. 58-65, may then be blank fill. Refer to appendices E-047 P and E-108 P for additional details.

c. Content Validation Card Input is as follows:

FIELD POSITION	DISPLAY LEGEND	VALIDATION	VIOLATION CODE
4-9	TP NUMBER	All numeric greater than nine; check will be made for transposed digits; if transposed, will reject.	D9
10-16	QUANTITY	Numeric other than all zeros. Invalid if greater than 99,999 with no OVR indicator.	AS
17-23	WEIGHT	Numeric. Invalid if greater than 99,999 with no OVR indicator.	HX
24-26	WHSE	First position - alpha; positions 2 and 3 - numeric.	JJ
27-28	DISC CD	First position alpha (other than I and O); second position S, D, or X.	8V
29	OVR	Blank or alpha X if pos. 10-11 and/or 17-18 is other than zero fill. Must be X if Automated Contract Quantity (allowable) Variance is to be exceeded; i.e., quantity (10-16) entry exceeds allowable high limit.	UB
30	COND	A through M (except I) or blank. If H, pos. 31 must be J or M.	AF

FIELD POSITION	DISPLAY LEGEND	VALIDATION	VIOLATION CODE
31	MGT	J, L, M, N, P, Q, R, S, U, Z or blank.	AW
32-37	CLIN	If DIC is ZV_, pos. 32-35 must be numeric greater than zero, pos. 36-37 must be alpha/numeric; or may be all blank.	JI
38-39	UI	Alpha or blank.	AN
40-43	FSC	Blank or numeric greater than zero.	AY
44-50	SHIPMENT NMBR	Blank or alpha/numeric (three alpha pos. 44-46, three numeric pos. 47-50) must be filled if PMR Management Code is D or F (zero fill is acceptable).	IU/E5
51	SFX	Alpha or blank.	AZ
55-57	ADM	Applicable for DIC ZV- only. May be blank, numeric 001 through 172, or alpha XXX (see note).	E5
58-65	QTY SHIP	Must be numeric greater than zero when Administering Location Code is 001 through 172. May be blank if Administering Location Code is XXX (see note).	AE/A5

NOTE: SHIPMENT NMBR, pos. 44-50, will require valid fill whenever the Management Code on the Receipt Control Document, F-200, is D or F. ADM, pos. 55-57, entry is required when Automated Contract Data is not available, i.e., the RCD, F-200, ADM entry is blank or the CDS, F-201, is missing. The ADM, pos. 55-57, entry may be blank when the Automatic Contract Data response in the ADM field of the RCD, F-200, is 001 through 172 or alpha, alpha/numeric or numeric greater than 172, i.e., the ADM field is XXX or when the ADM code reflected on the RCD, F-200, is alpha, alpha/numeric or numeric 173 through 999 as illustrated above. QTY SHIP entry is mandatory when the ADM is 001 through 172.

d. Data correction procedures for processing violations are provided in appendix E-108 V.

APPENDIX B-109

RECEIPT CONFIRMATION CARD
(LONG FORM - NO PMRR AVAILABLE)

1. The Receipt Confirmation Card (RCC) is originated by the Receiving Division and is the document that, in conjunction with an appropriate Stow Notice (appendix B-46 or B-144), initiates mechanical preparation of the Materiel Receipt Card (MRC) (appendix B-20 or B-21) for reporting of the materiel to the appropriate DSC.

2. Data used to prepare the MRC will be obtained from the RCC. The Receipt Control Document will be the source document for preparation of the long form RCC by Receiving Division IAW appendix E-108 P.

3. Acceptance Reports, DIC PKN/P, will be automatically prepared and output when specific data are entered in this format IAW appendix E-108 P.

a. The following entries apply for (batch) input:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZX_ or ZY_. Enter 3rd position in accordance with appendix A-1 to identify the type of Materiel Receipt Transaction.
Routing Identifier Code (To)	4-6	Enter the RIC of the DSC to receive the MRC.
Type Pack Code	7	Enter the appropriate Type of Pack Code from appendix A-4 (subsistence) or the appropriate DICOMSS Cycle Code from appendix A-30 only if applicable; otherwise, leave blank. Must be other than blank if third position of RIC is S or U and receipt is not identified as DICOMSS.
Procurement Instrument Identification Number (PIIN)	8-20	For ZX_ input, enter the PIIN receipt.
Blank	21	For ZX_ input, enter the document number.
Document Number	(8-21)	For ZY_ input, enter the document number.
Condition Code	22	Enter the appropriate Condition Code from appendix A-16.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Management Code	23	Enter the appropriate code from appendix A-13, if applicable; otherwise, leave blank. (See note.)
Contract Line Item Number	24-29	For ZX_ input, enter the line item in pos. 24-27 (must be greater than zero) and the subline item number in pos. 28-29 (may be zero or alpha/numeric) when applicable.
Supplementary Address	(24-29)	For ZY_ input, enter the appropriate supplementary address, when applicable.
Unit of Issue	30-31	Enter either the appropriate code from appendix A-48 or, if the correct Unit of Issue is printed on the RCD-1, leave blank.
Federal Supply Class	32-35	Enter either the appropriate FSC or, if the correct FSC is printed on the RCD-1, leave blank.
Supplemental Procurement Instrument Identification Number	36-39	For ZX input, enter the Supplementary PIIN.
Blank	(36-37)	For ZY_ input, leave blank.
Reverse Billing Code	(38-39)	For ZY_ input, enter RB if applicable or leave blank.
Ownership/Purpose Class	40	Enter appropriate code from appendix A-14 or A-15.
Teleprocessing Control Number	41-46	Enter the six-position code assigned on the Receipt Control Document.
Quantity	47-53	Enter the quantity actually received preceding significant digits with zeros. Enter Quantity/Weight Override, pos. 66, if greater than 99,999.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Weight	54-60	Enter the weight (in lbs.) preceding significant digits with zeros Enter Quantity/Weight Override, pos. 66, if greater than 99,999.
Warehouse Area	61-63	Enter the 3-position indicator applicable to the warehouse area to which the received materiel is being forwarded for storage.
Receipt Discrepancy Code	64-65	Enter the applicable Receipt Discrepancy Code and Inspection Performed Code from appendix A-26 and A-27.
Quantity/Weight Override (OVR)	66	Enter X whenever the Received Quantity or the weight exceeds 99,999.
Shipment Number or Unit Price	67-73	For ZX_ ZYT input, enter the shipment number, if applicable. If DIC is ZX_ and the contract specifies destination acceptance, the vendor shipment number must be entered or zero filled whenever the valid vendor shipment number is unavailable. Administering Location Code may not be blank when shipment number is entered.
Signal Code	(67)	For ZY_ input, enter the appropriate code from appendix A-8.
Fund Code	(68-69)	For ZY_ input, enter the appropriate code from appendix A-9.
Project Code	(70-72)	For ZY input, enter the appropriate project code, if applicable.
Blank	(73)	For ZY_ input, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Suffix Code	74	If the quantity in pos. 47-53 is greater than 99,999 enter the alpha code with which the computer should begin suffix assignments. If left blank the computer will begin with A. The appropriate suffix should also be entered when the RCC input relates to one portion of a receipt split to accommodate two or more conditions.
DICOMSS Indicator	75	Enter D for DICOMSS items only; otherwise, leave blank.
Blank	76	Leave blank.
Shipment Number Suffix	77	Enter vendors shipment number suffix if applicable.
Administering Location Code (DIC ZX_ only)	78-80	Enter Administering Location Code (Contract Administration Service Code) whenever the contract specifies destination acceptance. Shipment number field may not be blank when valid Administering Location Code is available.

NOTE: Type A or DIC ZB6 inquiries in Condition Code H will result in automatic assignment, in the Suspended Receipt Record, of Management Code M. If item is to be destroyed, annotate Management Code field with J.

b. The following entries apply for CRT (remote) input. Initialize terminal in accordance with appendix E-194 P. Enter applicable two-position panel ID ZX_ or ZY_. Program will display appropriate RCC format ZX_ or ZY_ with cursor positioned for next data entry.

DISPLAY LEGEND	NO. OF POS.	EXPLANATION/INSTRUCTIONS
DIC	3	Program will enter appropriate DIC ZX_ or ZY_ in accordance with appendix E-194 P initializing procedure to identify type of Materiel Receipt Transaction to be entered.
RIC	3	Enter RIC of applicable DSC to receive the MRO.

DISPLAY LEGEND	NO. OF POS.	EXPLANATION/INSTRUCTIONS
TYPK	1	Enter appropriate Type of Pack Code, appendix A-4 (subsistence) or the appropriate DICOMSS Cycle Code, appendix A-30, as applicable; otherwise, leave blank. May not be blank if 3rd position of RIC equals S/U.
PIIN (ZX_ Display)	13	For ZX_ inputs, enter Procurement Item Instrument Number.
DOC NMBR (ZY_ Display)	14	For ZY_ inputs, enter Document Number.
COND	1	Enter appropriate Condition Code, appendix A-16.
MGT	1	Enter, if applicable, the Management Code, appendix A-13; otherwise, leave blank. See note 2.
CLIN (ZX_ Display)	6	For ZX_ inputs, enter exact Contract Line Item received.
SUPP ADD (ZY_ Display)	6	For ZY_ inputs, enter exact Contract Line Item received.
SUPP ADD (ZY_ Display)	6	For ZY_ inputs, enter, if applicable, the Supplementary Address.
UI	2	If the correct Unit of Issue is not printed on the RCD-1, enter Unit of Issue, appendix A-48.
FSC	4	If the correct FSC is not printed on the RCD-1, enter appropriate FSC.
SPIIN (ZX_ Display)	4	Enter Supplementary PIIN for ZX_ inputs.
REV-BILL (ZY_ Display)	2	Enter RB if reverse billing is applicable on ZY_ inputs. SPIIN or REV-BILL may be blank fill.
OWN/PURP CD	1	Enter appropriate code from appendix A-14 or A-15 or leave blank.

DISPLAY LEGEND	NO. OF POS.	EXPLANATION/INSTRUCTIONS
TP NUMBER	6	Enter Teleprocessing Control Number assigned to the Receipt Control Document.
QUANTITY	7	Enter exact quantity received. Unused positions may be left blank. See OVR Field Legend.
WEIGHT	7	Enter weight received and leave unused positions blank. See OVR Field Legend.
WHSE	3	Enter Warehouse Area to which the received materiel was forwarded for storage action.
DISC-CD	2	Enter appropriate Receipt Discrepancy Code and Inspection Performed Code, appendix A-26/ A-27.
OVR	1	Enter X whenever the received quantity or weight exceeds 99,999.
SHIPMENT NMBR (ZX_ Display)	7	Enter Shipment Number, if applicable. When contract specifies destination acceptance, the Vendor Shipment Number must be entered. If the number is unknown, zero fill is required. May not be blank if ADM field is filled.
SIG-CD (ZY_ Display)	1	Enter Signal Code, appendix A-8 if applicable.
FUND-CD (ZY_ Display)	2	Enter appropriate code from appendix A-9 if applicable.
PRJ-CD (ZY_ Display)	3	Enter Project Code, if applicable.
SHIPMENT NMBR (ZYT Display)	7	Enter, for ZYT input only, the Shipment number, if applicable; otherwise, leave blank.
SFX	1	Enter Suffix Code, when applicable.

DISPLAY LEGEND	NO. OF POS.	EXPLANATION/INSTRUCTIONS
DICOMSS IND	1	Enter D for DICOMSS items only; otherwise, leave blank.
SS	1	Enter vendor's shipment number suffix, if applicable.
ADM (DIC ZX_ only)	3	Enter the Administering Location Code (Contract Administration Service Code) whenever the Contract specifies Destination Acceptance. Shipment Number field may not be blank.

Depress ENTER key (see note 2).

NOTE 1: May be blank if condition code printed on Receipt Control Document equals H. If item is to be destroyed, enter Management Code J.

NOTE 2: If current display format is used for next RCC, depress enter key; when data are to be entered simultaneously with request for new RCC format, enter applicable "Panel ID" V, W, X or Y in space provided. Depress enter key.

3. VALIDATION

a. Violations for batch inputs will appear on appendix F-85 report.

b. Violations for CRT (remote) inputs will display error message opposite appropriate display header (legend).

c. Content validation

FIELD POSITION	DISPLAY LEGEND	VALIDATION	VIOLATION CODE
7	TYPK	Numeric 1, 2, 4, or blank. May not be blank if third position of RIC (IO) equals S/U. If DICOMSS, may be alpha (other than 0) numeric 6 or blank.	CK/4K
4-6	RIC	Routing Identification Code (TO) Invalid. Applicable for S9_ RICs only.	AC
8-21	PIIN/DOC-NMBR	If DIC equals ZX_, pos. 8-20 alpha/numeric, pos. 21 equals blank; if DIC equals ZY_, pos. 8-21 alpha/numeric.	AI

FIELD POSITION	DISPLAY LEGEND	VALIDATION	VIOLATION CODE
22	COND	A through M (except I). If H, pos. 23 must be J or M.	AF
23	MGT	Blank or H, J, L, M, N, P, Q, R, S, U or Z.	AW
24-29	CLIN/SUPP ADD	If DIC is ZX_, pos. 24-27 must be numeric greater than zero, pos. 28-29 alpha/numeric.	JI
30-31	UI	If UI not found on Suspended Receipts File, enter correct UI.	A6
30-31	UI	Alpha.	AN
32-35	FSC	Numeric greater than zero.	AY
32-35	FSC	If FSC not found on Suspended Receipts File, enter correct FSC.	A9
36-39	SPIIN/REV_BILL	If DIC is ZX_, blank or alpha/numeric; if pos. 16 is A, D, or G, must be alpha/numeric filled. If DIC is ZY_, may be blank/blank RB.	EX
41-46	TP NUMBER	All numeric greater than nine; check will be made for transposed digits; if transposed, will reject.	D9
47-53	QUANTITY	Numeric other than all zeros. Will violate if greater than 99,999 with no OVR indicator, reference pos. 66.	AS
54-60	WEIGHT	Numeric. Will violate if greater than 99,999 with no OVR indicator, reference pos. 66.	HX
61-63	WHSE	First position alpha, positions 2 or 3 numeric.	JJ
64-65	DISC-CD	First position alpha (other than I or D), second position S, D or X.	8V

FIELD POSITION	DISPLAY LEGEND	VALIDATION	VIOLATION CODE
66	OVR	Blank or alpha X if pos. 47-48 and/or pos. 54-55 other than zero fill.	UB
67-73	SHIPMENT NMBR	Blank or alpha/numeric (first three positions or pos. 67-69 are alpha, last four positions or pos. 70-73 are numeric, zero fill acceptable). May not be blank if valid ADM entry available.	IU/E5
74	SFX	Blank or alpha.	AZ
75	DICOMSS IND	Blank or alpha D for DICOMSS item. Pos. 7 may not contain an alpha entry unless a D is present in this field.	BK
78-80	ADM	Blank or numeric, 001 through 172 only. May not be blank if valid shipment number available.	

NOTE: If either SHIPMENT NMBR or ADM reflect valid fill, both must contain valid data. Violations will be identified as E5.

d. Data correction procedures for processing violations are provided in appendix E-108 V.

APPENDIX B-110

DSC TAILORED MONTHLY TRANSACTION FORMAT

1. This appendix portrays the format of transaction tape (DIC D4_, D6_, D7_, D8_, D9_) provided by DSCs for the purpose of depot and DSC balance/transaction reconciliation.

2. Standard header and trailer records are used. Name in header is_____TRAN.

3. All quantities are right-justified with leading zeros.

4. Record formats and data elements for transaction record content are as follows:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter D4_, D6_, D7_, D8_, D9_ series as applicable.
Routing Identifier Code	4-6	Enter RIC of distribution depot.
Type Record	7	Enter alpha T.
National Stock Number	8-20	Enter NSN.
Exception Status Code	21	Enter exception status code for DIC D7_; all other DICs leave blank.
Ownership/Purpose Code	22	Enter code.
Condition Code	23	Enter code.
Type of Pack Code	24	Enter code.
Document Number	25-38	Enter document number for DICs D6_, D7_,D8_, D9_.
Procurement Instrument or Contract Number		Enter the procurement instrument or contract number for DIC D4_ (leave pos. 38 blank).
Suffix Code	39	Enter suffix code if applicable; otherwise, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Shipment Number	40-46	Enter vendor shipment number or GFM number shown on shipping document preceding significant digits with zeros; for DIC D4_, except pos. 40, see MFDAC, above.
Manager Forced Directed Action Code	(40)	Enter Manager Forced Directed Action Code 7 for DIC D7_.
Contract Line Number	47-52	Enter contract line number for D4_, D8_, and D9_ adjustments of previously suspended receipt; otherwise, leave blank.
Call Order Number	53-56	Enter call order number for D4_, D8_, and D9_ adjustments of previously suspended receipts; otherwise, leave blank.
Date Received	57-59	Enter Julian date when materiel received DIC D4_, D6_; otherwise, leave blank.
Quantity	60-68	Enter quantity of transaction being processed.
Activity Date	69-73	Enter activity date of transaction.
Original Document Identification Code	74-76	Enter DIC of original transaction.
Unit of Issue	77-78	Enter UI of transaction.
Priority Code	79-80	Enter priority code for DIC D7_; otherwise, leave blank.
Management Code	81	Enter management code if applicable; otherwise, leave blank.

NOTE: When reversal or cancellation of original transaction is required, enter an X overpunch in character position 29.

APPENDIX B-111

DSC VIOLATION CONTROL FILE FORMAT

1. This appendix portrays the format of Violation Control File tape provided by DSCs for the purpose of depot and DSC balance/transaction reconciliation.

2. Standard header and trailer records are used. Name in header is ___VIOL.

3. All quantities are right-justified with leading zeros.

4. Record format and data elements for violated transactions is variable. The violated transaction data will be positions 1 through 80 in applicable Appendix B format. Positions 104-105 violation reason code is utilized for depot balance/transaction reconciliation system. Remaining positions are not utilized.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Variable Data	1-80	Enter data from violated transaction as applicable.
DSC Violated Control Data Section	81-103	Not utilized.
Violation Code	104-105	Enter violation code for transaction being violated.
DSC Violated Control Data Section	106-128	Not utilized.

APPENDIX B-112

FSC CHANGE CARD

1. This card will change the FSC in the Locator Record to the FSC entered in this card.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZUT.
Blank	4-7	Leave blank.
National Stock Number	8-20	Enter new NSN.
Blank	21-76	Leave blank.
Functional Routing Code	77-78	Enter FRC.
Blank	79-80	Leave blank.

APPENDIX B-113

PRIME DEPOT DATA BANK CHANGE NOTICE

1. This card will be mechanically prepared to provide data to the Prime Depot from a user depot to reflect changes made to Locator File at user depot. Card will reflect on the F-113 report at Prime Depot for updating of data bank if necessary.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CCC.
Routing Identifier Code (To)	4-6	Enter RIC of Prime Depot.
Blank	7	Leave blank.
FSC	8-11	Mandatory.
NIIN	12-20	Mandatory.
Blank	21-22	Leave blank.
Unit of Issue	23-24	Enter U/I, appendix A-48.
Item Name	25-33	Enter Item Name.
NMFC	34-39	Enter Applicable Code.
LTL	40	Enter code, appendix A-49.
Hazardous Storage Compatibility Code	41-42	Enter HSCC, appendix A-33, or blank.
Blank	43	Leave blank.
Physical Security	44	Enter code, appendix A-28.
NMFC Suffix Code	45	Enter applicable code.
Blank	46-47	Leave blank.
Demil	48	Enter code, appendix A-35.
Water Commodity	49-53	Enter applicable code.
Air Commodity	54-55	Enter applicable code.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Air Cargo Dimension	56	Enter A or Z.
Blank	57	Leave blank.
Unit of Issue Weight	58-63	See note 1.
Unit of Issue Cube	64-69	See note 2.
Shelf-Life	70	Enter code, appendix A-47.
Prime Depot Code	71	Enter 2nd character of RIC of Prime Depot.
Inventory Category	72	Enter code, appendix A-81. (See note 4.)
Blank	73-74	Leave blank.
Special Requirements	75	Enter code, appendix A-81.
Item Manager	76	Enter Commodity Manager Code, appendix A-44.
Routing Identifier Code (From)	77-79	Enter RIC of activity preparing card.
Deleted Item/Replace Code	80	Enter 0, 8, 9, or blank. (See note 3.)

NOTE 1: Field represents 4 whole numbers and 2 decimal places, fill leading zeros.

NOTE 2: Field represents 3 whole numbers and 3 decimal places, fill leading zeros.

NOTE 3: 0 or blank = Active item
8 = Replacement
9 = Deleted

NOTE 4: If the NSN in pos. 8-20 is a DLA managed item, only alphas H, E, L, T, or U, or numeric 0, will be accepted. Any other entry will violate with VRC LR.

APPENDIX B-114

DEPOT BALANCE/TRANSACTION REGISTER AND LOCATOR DATA CORRECTION CARD

1. This card is used by the Depot Balance and Transaction Register (DB&TR) subsystem to record locator changes. It will be mechanically prepared by the locator update section.

2. The action code will determine the type of locator change which may affect the DB&TR.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZEJ.
Blank	4-7	Leave blank.
National Stock Number (old)	8-20	Enter old NSN.
Blank	21	Leave blank.
Unit of Issue	22-23	Enter unit of issue if changed; otherwise, leave blank.
Blank	24	Leave blank.
Commodity Manager (Old)	25	Enter old/current manager.
Blank	26	Leave blank.
Condition Code	27	Enter condition code.
Blank	28	Leave blank.
Type of Pack Code	29	Enter type of pack or blank.
Blank	30	Leave blank.
Commodity Manager (New)	31	Enter new Commodity Manager Code.
Blank	32	Leave blank.
National Stock Number (New)	33-45	Enter new NSN if NSN has changed; otherwise, leave blank.
Blank	46-76	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Functional Routing Code	77-78	Enter FRC.
Action Code	79-80	Enter Action code for appropriate change as follows: KA - First locator add. KB - Last locator delete. KC - Locator header record change, NSN, Manager, or U/I.

4. VALIDATION

FIELD POSITION	VALIDATION	FRC
8-20	National Stock Number all numeric other than zeros.	AY
79-80	Action Code, alpha KA, KB, or KC.	AF
25	Commodity Manager, alpha C, E, G, I, M, S, or T.	HO
27	Condition Code alpha A through P except I and O.	AF
29	Type of Pack code, numeric 1-4.	CK
31	Commodity Manager, alpha C, E, G, I, M, S, T, or blank.	HO
33-45	National Stock Number, all numeric other than zeros, or blank.	AY
79-80	Action Code, alpha KA, KB, or KC.	AF

APPENDIX B-115

MRO REGISTER/HISTORY INQUIRY CARD

1. This card is used to query the MRO History File to obtain a printout of history by document number.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZCT.
Blank	4-29	Leave blank.
Document Number	30-43	Enter document number from applicable MRO.
Suffix Code	44	Enter suffix code, if applicable.
Blank	45-76	Leave blank.
Functional Routing Code	77-78	Enter FRC to identify initiator.
Blank	79-80	Leave blank.

APPENDIX B-116

SURVEILLANCE INSPECTION/OPERATIONAL TEST NOTICE CARD
(INSPECTION TEST CARD)

1. In accordance with chapter 70, this card will be produced for selected items due for surveillance inspection for the current month. The Inspection Test Cards will be utilized to reflect the results of completed warehouse inspections, and will be used to update the computer locator file.

2. Inspection Test Cards include the same data elements as shown on the corresponding surveillance schedules. When condition changes to D, E, F, G, J, K or L as a result of inspection and is reported to DSC, a B-116 is mechanically prepared and used to control classification action and to clear suspense file when action is completed.

3. Card output identified by DIC ZC9 will be produced specifically for reclassification activity related to Type I (nonextendible) shelf-life items. All data fields required for reentry, except quantity, will be automatically prepunched.

4. This transaction may be reentered through program $$UWME10.

5. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS	INTERPRETER UPPER
Document Identifier Code	1-3	Enter ZCO or ZC9 (Type I Shelf-Life items only).	1-3
Pack/Expiration	4-7	From Locator. (See note 6.)	63-66
Stock Number	8-20	Enter NSN of the scheduled item.	4-16
Type of Pack Code	21	Enter type of pack code, if applicable, ZCO only.	17
Unit of Issue	22-23	Enter UI of item, ZCO only.	52-53
Location/Description	24-35	Item description will print on ZCO/ZC9 output. If new location is assigned, enter the new location on the ZCO/ZC9 input. (See note 2.)	18-29

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS	INTERPRETER UPPER
Location	36-47	Warehouse location of the item.	30-41
Condition Code (New)	48	Enter new condition code, if applicable. Condition code will automatically be entered on ZC9 documents and interpreted in pos. 54.	(54)
Date of Next Inspection	49-52	Enter month and year of next Inspection Date. All zeros may be used for items in Condition Codes D, E, F, G, H, J, K or L. Automatically entered on ZC9 documents and interpreted in pos. 42-45. See note 4.	(42-45)
Shelf-Life Code (New)	53	Enter new shelf-life code, if applicable, ZC0 only.	
Quantity	54-58	Enter quantity on ZC9 and on a ZC0 only if old condition code differs from new condition code. (See note 2.) Enter 00000 if stock is exhausted and location delete action is desired, applicable to ZC9 only. (See note 3.)	42-46
New Location Indicator (Blank or X)	59	Enter alpha X if there is a new location in pos. 24-35 of the ZC0 or ZC9; otherwise, leave blank. (See note 1.)	
Date of Next Inspection (Old)	60-63	Date of next surveillance inspection, from Locator. (See note 6.)	47-50
Shelf-Life (Old)	64	Code for shelf-life from locator.	51

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS	INTERPRETER UPPER
Condition Code (Old)	65	Code for condition of item from locator.	55
Management Code	66	Enter Code Z when DD Form 1225 is being forwarded to the DSC. Enter M or T if materiel is shipped to PDO in Condition Code H. Enter J or E with Condition Code H when material quantity is indicated destroyed and a Certificate of Destruction is on file.	
Lot or Contract Number	67-71	From Locator.	56-60
Lot or Contract Indicator	72	From Locator.	61
Commodity Manager	73	From Locator.	62
Type of Storage Code	74-76	Enter new type storage code when pos. 24-35 contains a location and pos. 59 contains an X for ZCO or ZC9 input.	
Date of Pack/Expiration	77-80	Enter new date of pack or expiration date, when appropriate, ZCO only.	

6. VALIDATION

Violations will appear on appendix F-85.

FIELD POSITIONS	VALIDATION	REJECT CODE
8-20	Numeric.	AY
24-35	If X in pos. 59, then pos. 24 must be alpha, pos. 25-30 numeric, pos. 31 alpha, pos. 33 alpha or numeric 6, DICOMSS depots only. If location code is 12 positions, 24 must be alpha and 25-35 must be numeric. If pos. 59 is blank do not validate.	AP

FIELD POSITIONS	VALIDATION	REJECT CODE
36-47	If a nine position location code field position 36 alpha, pos. 37-42 numeric, pos. 43 alpha, pos. 44 alpha or numeric 6, DICOMSS depots only. If a 12 position code, 36 is alpha and 37-47 is numeric.	AP
48	Alpha A through N, less I, or blank. Must be B, C, or H on ZC9.	AF
49-52	Numeric/blank. Must be greater than current date unless 0000.	HW
53	Blank, numeric, or alpha A through S (except I and O) or X, reference appendix A-47.	HB
54-58	If DIC is ZCO, numeric or blank. If pos. 48 of ZCO is filled and different from old condition, pos. 54-58 must be numeric. If DIC is ZC9, must be numeric, no blank fill, zero fill acceptable (see note 4).	AS
59	Blank or X. If X, then pos. 24-35 must be filled.	YM
60-63	Numeric.	HW
65	Alpha A through N (less I). Must be A, B or C on ZC9.	AF
66	Blank, Z or M. If DIC is ZCO and pos. 48 is H, pos. 66 must be M, J, T or E.	AW
72	Blank, L, C or R.	D6
74-76	Blank or alpha/numeric/alpha when pos. 24-35 contains valid fill and pos. 59 contains X.	HG
77-80	Shelf-life items require two-digit numeric month and two-digit numeric year, but not to exceed 66 months from current month (see note 7). Numeric or blank for nonshelf-life items.	HH

NOTE 1: When new location is entered via a ZCO or ZC9, the old location is not changed mechanically. If the old location is to be deleted, a separate ZBA action is required. See note 3 for ZC9 location deletion.

NOTE 2: When condition code changes are necessary for quantities in excess of 99,999, multiple input ZCO/ZC9 cards will be manually created to reflect the total quantity. If a new location action is necessary, the same location data, date pack, inspection date, and so on, can be annotated in each card. A different location entry is not mandatory requirement for valid entry.

NOTE 3: A location delete will be automatically processed when DIC ZC9 is prepared with zeros in pos. 54-58. This action will also delete the suspense record.

NOTE 4: This date is mechanically prepared IAW chapter 11, and may not be altered in the ZC9 document.

NOTE 5: Quantity for suspense (Condition Code D, E, F, G, J, K or L) will be reflected in quantity field of ZCO card. Automatic downgrade date will be reflected in quantity field for DIC ZC9 cards for information.

NOTE 6: When a ZCO Card is produced as a result of a missing Next Inspection Date, the card will contain a 9999 in the corresponding field.

NOTE 7: An additional six months is provided on the maximum shelf-life period to accommodate items that are age controlled by quarters of the year (reference MIL STD 1523).

APPENDIX B-117

ACTIVITY ADDRESS FILE MASS UPDATE

1. PURPOSE

a. This transaction provides a means to update shipment planning data for a group of Activity Address Codes which match the input parameters.

b. Processing of this transaction must be coordinated with the Office of Data Systems. The maximum number of transactions which may be processed per run is 50.

c. Update of common data elements by DGSC will result in the change being transceived to all depots as a ZGP transaction, reference appendix B-126.

2. REFERENCES

a. Appendix D-183.

b. Appendix E-134 P.

3. This transaction requires input of two cards which consist of a parameter card and a data update card. The following are the fields of the transaction.

a. Parameter Card

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZYP.
Transaction Number	4-5	Enter the transaction number 01 through 50 depending on number of transactions to be processed.
Card Type	6	Enter A for parameter card.
Parameters	7-61	Enter any of the following data elements. All Activity Address records which match these parameters will be updated with information contained in the corresponding data update card.
Destination Cross-Reference Activity Address Code	(7-12)	Enter DCR activity address code or leave blank.
ZIP Code	(13-17)	Enter from one to five positions of the ZIP Code or leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Mode Restriction Code	(18)	Enter mode restriction code or leave blank.
PP Zone Code	(19)	Enter PP Zone Code or leave blank.
GBL Office Code	(20-23)	Enter GBL Office Code or leave blank.
Consolidated Pack Indicator	(24)	Enter consolidated pack indicator of leave blank.
Geographical Area Code	(25)	Enter geographical area code or leave blank.
Geographical Sub-area Code	(26-28)	Enter geographical sub-area code or leave blank.
Motor Standard Point Location Code	(29-34)	Enter from one to six positions of the SPLC or leave blank.
State Code	(35-36)	Enter State Code or leave blank.
Small Parcel Carrier Code (CONUS Activities)	(37)	Enter Small Parcel Carrier Code or leave blank. (Table 17, part 2, appendix B-66Q.)
CONUS Military Air Terminal Identifier	(38-40)	Enter military air terminal identifier or leave blank.
Port of Embarkation Air	(41-43)	Enter POE Air or leave blank.
Port of Debarkation Air	(44-46)	Enter POD Air or leave blank.
Port of Embarkation Water	(47-49)	Enter POE Water or leave blank.
Port of Debarkation Water	(50-52)	Enter POD Water or leave blank.
DICOMSS Bank Code	(53)	Enter DICOMSS Bank Code or leave blank.
Small Parcel Carrier Code (Overseas Activities)	(54)	Enter Small Parcel Carrier Code of Carrier(s) which provide service to overseas activities or leave blank (table 17, part 2, appendix B-66Q).
SEAVAN Indicator	(55)	Enter SEAVAN indicator leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Booking Group	(56-57)	Enter the SEAVAN Booking Group.
Stop Number	(58-59)	Enter the SEAVAN Stop Number.
Transit Time	(60-61)	Enter SEAVAN Transit Time.
Activity Address Code	62-67	Enter from one to six positions of the AAC or leave blank. Positions one and two or one through three may be blank.
Blank	68-80	Leave blank.

b. Update Data Card

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZYP.
Transaction Number	4-5	Enter the transaction number 01 through 50. Must match corresponding parameter card.
Card Type	6	Enter B for update data.
Update Data	7-61	Enter any of the following data elements. All AAC records which matched the parameter card will be updated. Enter question marks (?) if field is to be deleted.
Destination Cross-Reference Activity Address Code	(7-12)	Same as parameter card.
Blank	(13-17)	Leave blank.
Mode Restriction Code	(18)	Same as parameter card.
PP Zone Code	(19)	Same as parameter card.
GBL Office Code	(20-23)	Same as parameter card. Mass update restricted to DGSC.
Consolidated Pack Indicator	(24)	Same as parameter card.
Geographical Area Code	(25)	Same as parameter card.
Geographical Sub-area Code	(26-28)	Same as parameter card.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Motor Standard Point	(29-34)	Enter Motor Standard Point Location Code or leave blank. Mass update restricted to DGSC.
State Code	(35-36)	Same as parameter card. Mass update restricted to DGSC.
United Parcel/SPA Code (CONUS Activities)	(37)	Same as parameter card.
CONUS Military Air Terminal Identifier	(38-40)	Same as parameter card. Mass update restricted to DGSC.
Port of Embarkation Air	(41-43)	Same as parameter card.
Port of Debarkation Air	(44-46)	Same as parameter card. Mass update restricted to DGSC.
Port of Embarkation Water	(47-49)	Same as parameter card.
Port of Debarkation Water	(50-52)	Same as parameter card. Mass update restricted to DGSC.
DICOMSS Bank Code	(53)	Same as parameter card.
Small Parcel Carrier Code (Overseas Activities)	(54)	Same as parameter card.
SEAVAN Indicator	(55)	Same as parameter card.
Booking Group	(56-57)	Same as parameter card.
Stop Number	(58-59)	Same as parameter card.
Transit Time	(60-61)	Same as parameter card.
Blank	62-80	Leave blank.

4. VALIDATION

a. Parameter Card

FIELD POSITION	VALIDATION	VIOLATION CODE
4-5	Must be 01-50.	PB
6	Must be A or B.	PB

FIELD POSITION	VALIDATION	VIOLATION CODE
7-12	AAC value must be on file with the word "Master" in DCR field or blank.	B8
13-17	From 1 to 5 numerics with trailing positions blank or all blank.	B6
18	Must be 1, 2, 5, 7, A, B, or blank.	ZN
19	Must be 1-9 or blank.	B6
20-23	Must be all alpha or all blank (no imbedded blanks).	ZI
24	Must be 1 or blank.	8K
25	Alpha or blank.	JF
26-28	Alpha/numeric or blank (no imbedded blanks).	JS
29-34	From 1-6 numerics with trailing positions blank or all blank.	D4
35-36	Numeric or blank. Must match appendix A-80 if numeric.	LI
37	Alpha/numeric or blank. Must match table 17, part 2, (appendix B-66Q).	3G
38-40	No Edit.	
41-43	Address Code must be on file or all blank.	B8
44-46	Address Code must be on file or all blank.	B8
47-49	Address Code must be on file or all blank.	B8
50-52	Address Code must be on file or all blank.	B8
53	D or blank.	ZU
54	Alpha/numeric or blank. Must match table 17, part 2, (appendix B-66Q).	3G
55	1 or blank.	8L
56-57	Alpha/numeric or blank.	8L
58-59	Numeric 01-99 or blank.	8L

FIELD POSITION	VALIDATION	VIOLATION CODE
60-61	Numeric 01-99 or blank.	8L
62-67	From 1-6 positions alpha/numeric with trailing positions blank or all blank. Positions 1 and 2 or 1 through 3 may also be blank.	8L

NOTE: If pos. 25-40 contains data, then pos. 41-61 must be blank.

b. Update Data Card

Edits are the same as for parameter card but each field may be filled with question marks to indicate delete. Also, DCR cannot be entered in update card if DCR is blank in parameter card.

NOTE: Errors detected in either card will result in reject of corresponding card with Violation Reject Code HI.

APPENDIX B-119

ACTIVITY ADDRESS INQUIRY CARD

1. The Activity Address Inquiry may be input by CRT or on a general purpose card. The card must be input through the ENTRY SYSTEM. The inquiry provides total file information available in the computer for a given address or for a specific type address for an Activity Address Code. Processing of this card is covered in appendix D-97. Printout is provided in appendix F-84 if it is a card input.

2. Interpretation is not required.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZAB.
Activity Address Code	4-9	Enter the AAC for which data is requested.
Type Address Code	10	Enter Type Address Code per appendix A-43. Blank entry will result in all type addresses for AAC to be output.
Functional Routing Code	11-12	Enter FRC.
Blank	13-80	Leave blank.

4. VALIDATION

Violation rejects will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
4-9	Must match file.	LY
10	Must match file if other than blank.	4B

5. The following are the fields in the transaction for a listing of all Activity Address Codes within a destination.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZVN.
Destination Activity Address Code	4-9	Enter the master AAC for the destination.
Blank	10-80	Leave blank.

6. The following are the fields in the transaction for a listing by ZIP Code of the Freight Address (TAC 2) of all Activity Address records which do not contain a Destination Cross-Reference and the GBL ship to address (TAC G) of all Activity Address records which do contain a Destination Cross-Reference.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZVP.*
ZIP Code	4-8	Enter ZIP Code.
Blank	9-80	Leave blank.

*ZVP transactions can only be input by card through the Entry system.

APPENDIX B-120

MATERIEL RECEIPT ACKNOWLEDGEMENT TRANSACTION (D6S)

1. This transaction is created by DLA Container Consolidation Points (CCP) for each MRO in MEDALOC shipments. It is attached to the number one container of the shipment unit.

2. The following are the fields of this transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier	1-3	D6S.
Routing Identifier	4-6	Always HR2.
Status	7	Leave blank.
National Stock Number	8-22	Enter NSN from CDF data.
Unit of Issue	23-24	Enter Unit of Issue from CDF data.
Quantity	25-29	Enter Quantity from CDF data.
Document Number/Suffix	30-44	Enter Document Number/Suffix from CDF data.
Supplementary Address	45-50	Enter Supplementary Address from CDF data.
Signal Code	51	Leave blank.
Fund Code	52-53	Enter Fund Code from CDF data.
Distribution	54-56	Enter Distribution Code from CDF data in position 54. Leave pos. 55-56 blank.
Project Code	57-59	Enter Project Code from CDF data.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	60-76	Leave blank.
S/U Serial Number.	76-78	Last three positions of the Shipment Unit/Transshipment Control Number. Used to match D6S card to proper route slip.
Blank	79-80	Leave blank.

APPENDIX B-121

CONSOLIDATED SHIPMENT STATUS CARD (BBC)

1. This card image is created by DLA Container Consolidation Points (CCP) for each MRO in MEDALOC shipments. It is transceived to the Army LCA function Communication Routing ID RUWELCA content indicator DABZ upon completion of shipment from the CCP. This transaction will also be tranceived to the Defense Personnel Supply Center (DPSC) Communications Routing ID RUEOBKA content indicator IAZZ.

2. The following are the fields of the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier	1-3	BBC.
Routing Identifier	4-6	Enter Routing ID of shipping depot from CDF data.
Partial Indicator	7	Enter Z for CCP shipment.
Shipping Depot Transportation Control Number or CCP Consolidated Pack TCN	8-24	Enter TCN from CDP data.
Quantity	25-29	Enter Quantity from CDF data.
Document Number/Suffix	30-44	Enter Document Number/Suffix from CDF data.
Supplementary Address	45-50	Enter Supplementary Address from CDF data.
CCP Receipt Data	51-53	Enter date received at the CCP.
CCP Ship Date	54-56	Enter date shipped from CCP.
Project Code	57-59	Enter Project Code from CDF data.
Priority Designator	60-61	Enter Priority from CDF data.
Transportation Control Number	62-77	Enter Pallet TCN recorded by CCP.
Port of Embarkation	78-80	Enter POE the materiel will ship through as recorded by the CCP.

APPENDIX B-122

AIR INTRANSIT DATA CARD (TK6)

1. This transaction is created in duplicate by DLA Container Consolidation Points (CCP) for each consignee on a MEDALOC pallet shipped from the CCP.

2. The following are the fields for this transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier	1-3	TK6.
Routing Identifier	4-6	BY9.
Shipping Activity Address Code	7-12	Enter Depot shipping AAC.
Julian Date Shipped to APOE	13-16	Enter CCP ship date.
Mode to APOE	17	Enter Mode shipped to APOE.
Type Pack	18-19	Enter PT.
APOD	20-22	Enter APOD Code.
Pallet Serial Number	23-29	Enter Pallet ID in positions 23-24, leave the rest blank.
Pallet Transportation Control Number	30-46	Enter Pallet TCN.
DoDAAC of Activity Submitting Requisition	47-52	Enter consignee DoDAAC from CDP data.
Blank	53-80	Blank.

APPENDIX B-123

MRO HISTORY MANUAL CONTROL CARD

1. This input, on a General Purpose Card, provides the capability to code the History Record to indicate that the item is being controlled manually. As a result, followups, cancellations, and so forth, are not answered automatically but are output for manual processing.

2. Upon input of this card, a History File Listing of Items in DP status (F-107) will be produced showing the status of the file. This report is to be retained for manual handling of any inquiries.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZAQ.
Blank	4-29	Leave blank.
Document Number	30-43	Enter the document number.
Suffix Code	44	Enter the suffix code.
Blank	45-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter the RIC of the DSC which initiated the MRO.
Blank	70-76	Leave blank.
Functional Routing Code	77-78	Enter the applicable FRC.
Blank	79-80	Leave blank.

4. VALIDATION

Entry validation of DIC only.

APPENDIX B-124

MEDALOC AIR MANIFEST CARDS

1. The following are transceived to the overseas Air Port of Debarkation (APOD). They are card images of Transportation Control and Movement Data printed as an Air Manifest List for each MEDALOC pallet, reference appendix C-4. As indicated, these cards are also punched at the CCP to accompany the shipment.

2. The card images will be transceived to the following:

a. APOD = RMS - Transceive to Communications Routing Identifier RHFQAAB content indicator DKAZ.

b. APOD = FRF - Transceive to Communications Routing Identifier RUFLOJA content indicator DKAZ.

c. APOD = OSN - Transceive to Communications Routing Identifier RUAKDPA content indicator DKAZ.

d. APOD = HOW - Transceive to Communications Routing Identifier RUEOGWZ content indicator DKAZ.

e. APOD = EIL - Transceive to Communications Routing Identifier RUEBJKA content indicator DKAZ.

f. APOD = HIK - Transceive to Communications Routing Identifier RUHVAAA content indicator DKAZ.

3. The following Pallet Data Card is transceived and punched at the CCP. One card for each pallet.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier	1-3	TX2 - On Transceived Image. TXA - On Punched Card.
Pallet ID	4-5	From Pallet Data.
TCN Serial Number	6-8	Positions 12-14 of Pallet TCN on transceived image. Leave blank on punched card.
Consignor AAC	9-14	Consignor AAC of CCP Activity. SW3102 if DDMP. SW3201 if DDTC.
Blank	15-17	

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Air Commodity Code	18-19	Air Commodity Code of materiel on the pallet. Use Air Commodity of first shipment unit.
Air Dimension Code	20	Always A.
APOE	21-23	From Pallet Data.
[illegible]	24-26	From Pallet Data.
[illegible] of Shipment	27	F - On Transceived Image. A - On Punched Card Image.
[illegible] Pack	28-29	Always PT
[illegible] TCN	30-46	From Pallet Data Pallet. Pallet TCN.
[illegible] Consignee/ [illegible] Point	47-52	On Throughput Pallets (one consignee) enter Consignee Code if POD is not GSN, HOW, PLS, ETL or HTK. On other single Consignee and on Breakbulk Pallets (multiple consignees) enter as follows: POD=FMC - Enter WX4FDK POD=FRF - Enter WR4FDK POD=GSN - Enter WT4JR5 POD=HOW - Enter WP4LR7 POD=PLS - Enter WR9YDK POD=ETL - Enter WT1GR POD=HTK - Enter WK1JR7
[illegible] Priority Group	53	Enter highest [illegible] for [illegible] on the pallet.
[illegible] Delivery Date	54-56	Enter 999 if any [illegible] has 999 or enter earliest RDD from [illegible] on multiple [illegible] [illegible]
Project Code	57-59	Leave blank.
Day Shipped	60-62	Enter date shipped from pallet data.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Estimated Time of Arrival	63	Always 1.
Transportation Account Code	64-67	A951 MEDALOC-P (W8003H) A924 MEDALOC-P POD=PLA A991 MEDALOC-A POD=EIL A980 MEDALOC-E (DDMP) A984 MEDALOC-K (DDTC) A992 MEDALOC-H POD=HIK
Pieces	68-71	Always 0001.
Weight	72-76	From Pallet Data.
Cube	77-80	From Pallet Data.

N. The following shipment unit data card is created for each shipment unit on the pallet. One card is transceived for each shipment unit. One card is punched for each shipment unit if the pallet is a breakbulk pallet (multiple consignees) and APOD is BMS or FRF.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier	1-3	TXA.
Pallet ID	4-5	From Pallet Data.
TCN Serial Number	6-8	Position 12-14 of Pallet TCN.
Consignee ABC	9-14	Consignee from CDF data original shipping activity or CCP consignee if a consolidated pack.
Blank	15-17	Leave blank.
Air Commodity Code	18-19	Air Commodity Code from CDF data.
Air Commodity Code	20	Always N.
APOE	24-26	Same as TX2.
Mode of Shipment	27	Always F.
Type of Pack	28-29	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
TCN	30-46	TCN from CDF data or TCN from Consolidated Pack.
Consignee	47-52	Consignee from CDP data.
Issue Priority Group	53	Based on CDF priority 01-03=1, 04-08=2, 09-15=3.
Required Delivery Date	54-56	From CDP data.
Project Code	57-59	Leave blank.
Day Shipped	60-62	Date shipped from CDP data (origin Depot date shipped).
Blank	63	Leave blank.
Transportation Account Code	64-67	A980 MEDALOC-E (DDMF) A984 MEDALOC-K (DDTC) A92* MEDALOC-P POD=PLA A951 MEDALOC-P (W800)H A991 MEDALOC-A POD=EIL A992 MEDALOC-H POD=HIK
Pieces	68-71	From CDF data, 0001 for consolidated pack.
Weight	72-76	From CDF data.
Cube	77-80	From CDF data.

APPENDIX B-125

TRANSPORTATION FUND OBLIGATION CARD

1. The Transportation Fund Obligation Card provides Transportation Fund Obligation data to the Army Finance Center for payment of DLA issued GBLs. These cards are computer prepared at distribution depots and forwarded to DLA Centers with the weekly F-134 report. Card output is limited to DLA Stock Fund and DIPEC shipments.

2. Appropriation Code data used in the card originates from the MOWASP Appropriation Code Table (appendix B-66). It is imperative that distribution depots enter Appropriation Code data according to the formats shown in appendix A-93. This action will ensure proper formatting of fund obligation data.

3. Data fields for Transportation Fund Obligation cards are as follows:

a. DLA Stock Fund

Transportation Fund Codes C1, C2, C3, E1, E2, E3, G1, G2, G3, G4, I1, I2 I3, M1, M2, M3, S1, S2, S3, T1, T2, or T3.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Appropriation Department	1-2	Enter constant 97.
Fund Type	[illegible]	Enter constant 1.
Fiscal Year	[illegible]	Enter constant X.
Basic Symbol	5-8	Enter 4961.
Limitation	9-12	Enter positions 9 through 12 of Transportation Fund Citation (see note).
Program Year	[illegible]	Leave blank.
Operating Agency	[illegible]	Constant 49.
Constant	[illegible]	Enter constant 5.
[illegible]	[illegible]	[illegible]
Blank	21-28	Leave blank.
Constant	29-30	Enter constant 22.
Center Variable	31	Enter position 20 from Transportation Fund Citation. See note.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Fiscal Station Number Edit	32-37	
Constant	(32)	Enter constant 0.
Station Number	(33-37)	Enter position 23 through 27 of Transportation Fund Citation (see note).
Transportation Type Code	38-39	Enter constant 51.
Transportation Cost	40-49	Enter Transportation Cost associated with GBL appropriation code. Right-justify, fill with leading zeros.
Blank	49-55	Leave blank.
Government Bill of Lading Number	56-64	Enter alpha/numeric GBL Number.
Blank	65-72	Leave blank.
Constant	73-74	Enter constant 47.
Blank	75-76	Leave blank.
Constant	77	Enter constant 1.
Blank	78-80	Leave blank.

b. [illegible] shipments from DLA Depots

Transportation Fund Codes [illegible], [illegible], [illegible], [illegible], or [illegible].

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Appropriation Department	[illegible]	Enter constant [illegible].
[illegible]	[illegible]	
Fiscal Year	4	Enter 3rd position of Transportation Fund Citation (see note).
Basic Symbol	5-8	Enter constant 0100.
Limitation	9-12	Enter constant 5147.
[illegible]	[illegible]	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Operating Agency	14-15	Enter constant 49.
Constant	16	Enter constant 0.
Allotment Serial	17-20	Enter constant 0001.
Blank	21-28	Leave blank.
Constant	29-30	Enter constant 22.
Center Variable	31	Enter constant 9.
Fiscal Station Number	32-37	
Constant	(32)	Enter constant 0.
Station Number	(33-37)	Enter constant 40110.
Transportation Type Code	38-39	Enter constant 51.
Transportation Cost	40-48	Enter Transportation Cost associated with GBL Appropriation Code. Right-justify, fill with leading zeros.
Blank	49-55	Leave blank.
Government Bill of Lading	56-64	Enter alpha/numeric GBL number.
Blank	65-72	Leave blank.
Constant	73-74	Enter constant 47.
Blank	75-76	Leave blank.
Constant	77	Enter constant 5.
Blank	78-80	Leave blank.

is located in the MOWASP Transportation Appropriation Table.

APPENDIX B-126

ACTIVITY ADDRESS LOCAL DATA CHANGES

1. This transaction provides the means to add, change, or delete locally developed and DLA-DGSC developed data relating to Activity Addresses. Local data additions, changes, or deletions are prepared by depot personnel. Elements which are common to all DLA activities are developed by DGSC-TTB and distributed via AUTODIN to all DLA shipping activities.

2. Input may be prepared in the following card/CRT format or it may be received via AUTODIN.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZGP for additions/changes, ZGR for deletions. CGP and CGR will be used for AUTODIN transmission only.
Type Action Code	4	Enter 1 for CONUS activity, 2 for Overseas activity.
Activity Address Code	5-10	Enter address as coded in Address File.
Effective Date	11-15	Enter two position year in pos. 11-12 and Julian date in pos. 13-15 when date is to be effective or leave blank.
Destination Cross-Reference	16-21	This data element is provided by DGSC. Activity Address Code will contain the value of the Destination ARC which was developed for a group of homogeneous consignees which have a common destination, reference chapter 3, this manual, paragraph 3027[illegible]g.
Mode Restriction Code	--	(locally developed): Blank - No restrictions. 1 - No Go Parcel Post. 2 - No Go Rail. 5 - No Go Parcel Post IMG I and II. 7 - Express/WTP Eligible [illegible] - No Go Rail and No Go Parcel Post.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		B - No Go Rail and No Go Parcel Post IPG I and II.
Transportation Planning Data	23-80	Enter data only if destination cross-reference AAC pos. 16-21 is left blank.

a. Enter the following data for activities which are physically located in the CONUS and Canada (pos. 4 equals 1).

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Geographical Area Code	23	Enter alpha/numeric not including zero coding established by the depot for area shipment controls (locally developed).
Geographical Subarea Code	24-26	Enter alpha/numeric coding established by the depot for area shipment controls (locally developed).
Motor Standard Point Location Code	27-32	Enter Motor SPLC for activity (provided by DGSC).
Government Bill of Lading	33-35	Enter GBL/SC for activity as contained in Office Code appendix W, TL88 4500.3 (provided by DGSC).
State Code	37-38	Enter alpha state code (reference appendix B-80) (provided by DGSC).
[illegible]	[illegible]	[illegible] the depot area.
Small Parcel Carrier Code	40	Enter appropriate Small Parcel Carrier Code (appendix B-66Q, table 17) (locally developed).
CONUS Military Air Terminal	41-43	Enter the Military Air Terminal (i.e., Identifier LOGAIR/QUICK-[illegible] (provided by DGSC).

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Consolidated Pack Indicator	44	Enter 1 if eligible freight shipments for this destination are to be processed as consolidated pack (locally developed).
Phone Number	45-54	Shipping Activities transportation officer's commercial phone number.
Blank	55-80	Leave blank.

b. Enter the following data for activities which are outside of CONUS and Canada (pos. 4 equals 2).

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Government Bill of Lading	23-26	Enter GBLOC for activity as contained in Office Code appendix W, DLAR 4500.3 (provided by DGSC).
Port of Embarkation Air	27-29	Identify and enter Air POE as contained in DoD 4500.32R. Leave blank if not required (locally developed). Provided by DGSC when all numeric (pseudo POE for Navy ships in CONUS port).
Port of Debarkation Air	30-32	Identify and enter Air POD as contained in DoD 4500.32R. Leave blank if not required (provided by DGSC if different than one provided in TR/MR formats, reference appendices B-127 and B-128).
Port of Debarkation Water	33-35	Identify and enter Water POE as [illegible] developed). Provided by DGSC when all numeric (pseudo POE for Navy ships in CONUS port).

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Port of Debarkation Water	36-38	Identify and enter water POD as contained in DoD 4500.32R. Leave blank if not required (provided by DGSC if different than one provided in TA/MA formats, reference appendix B-127 and B-129.
DICOMSS Bank Code	39	Enter alpha D if subsistence MROs for this activity are to be entered into DICOMSS Work Bank (locally developed).
Small Parcel Carrier Code	40	Enter appropriate Small Parcel Carrier Code from table 17, part 2 (appendix B-66Q).
Consolidated Pack Indicator	41	Enter 1 if eligible freight shipments for this destination are to be processed as consolidated pack shipments (locally developed). Enter A if Activity is eligible for MEDALOC processing.
IEASSN Indicator	42	Enter 1 if freight shipments for this destination are to be processed as IEASSN shipments (locally developed).
IEASSN Load Plan Data	43-48	
Booking Group	(43-44)	Enter the Booking Group for this destination.
Stop Number	(45-48)	Enter the stop number assigned to this destination.
		[illegible] destination.
Blank	49-80	Leave blank.

NOTE: The Activity Address Local Data Changes Input provides control as follows:

c. DIC ZGP adds keypunched data from input to the Activity Address File. Blank positions will not add or change file data.

d. DIC ZGR deletes data from the Activity Address File for any input field containing 9's. Blanks or other than 9's will not erase the file data.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
4	Must be 1 or 2.	CF
5-10	ZGP - If not on file it becomes an add. ZGR - Violate if not on file.	LY
	If not alpha/numeric, violate. Blank allowed when together in pos. 5-6 or 5-7.	RZ
11-15	Numeric or blank.	KZ
16-21	Address code must be on file, blank or all 9's.	BB
	AAC contains DCN master or AAC and DCN are the same value.	AC
22	1, 2, 5, 7, A, B, 9, or blank.	IN
23-80	If pos. 4 is 1 the following applies:	
(23)	Alpha, blank, or 9.	JF
(24-26)	Alpha/numeric, blank or all 9's (no embedded blanks).	JS
(27-32)	All numeric or all blank.	JW
(33-38)	Alpha, blank, or all 9's.	JZ
(39-48)	Alpha, blank, or all 9's. Must match	LZ
(39)	Numeric 1 through 8.	BG
(40)	Alpha, Numeric, blank, or 9. Must match table 17, part 2 (appendix B-66Q).	JG
(41-43)	No edit.	

FIELD POSITION	VALIDATION	VIOLATION CODE
23-80	If pos. 4 is 2, the following applies:	
(23-26)	Alpha, blank, or all 9's.	ZI
(27-29)	Address code must be on file, blank or all 9's.	B8
(30-32)	Address code must be on file, blank or all 9's.	B8
(33-35)	Address code must be on file, blank or all 9's.	B8
(36-38)	Address code must be on file, blank or all 9's.	B8
(39)	Must be D, 9 or blank	ZU
(40)	Alpha, Numeric, blank or 9. Must match table 17, part 2 (appendix B-66Q).	3G
(41)	Must be 1, blank, A or 9.	8K
(42)	Must be 1, blank or 9.	8L
(43-44)	Alpha/numeric, blank, or 9's.	8L
45-46	Must be numeric 01-99, blank, or 9's.	8L
47-48	Must be numeric 01-99, blank, or 9's.	8L
49-80	Blank	

NOTE: For ZGR the only valid entry is 9 or blank.

APPENDIX B-127

MILITARY ASSISTANCE PROGRAM ADDRESS DIRECTORY CARD

1. This card is provided by the Defense Automatic Addressing System Office (DAASO) to establish and maintain the master Military Assistance Program Address Directory (MAPAD) at applicable installations.

2. The MAPAD card is prepared on a general purpose card and may also be locally prepared and processed to establish and maintain addresses not furnished by DAASO.

3. Cards are processed IAW appendix D-96.

4. Transactions may be input via CRT, card input through entry system, or AUTODIN.

5. When used for Foreign Military Sales (FMS) addresses, the following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	*Enter: MA1 - Addition to MAPAD. MA2 - Revision to MAPAD. MA3 - Deletion to MAPAD.
Routing Identifier Code To	4-6	Enter depot RIC.
Address File Identifier	7	*Enter Code F, identifies FMS Addresses.
Country Service Code	8	*Entry of 1-position alpha code devoting sponsoring Service (pos. 45 of MRO): Code B - Army Code D - Air Force Code P - Navy Code K - Marines Code T - Other Defense Organizations
Country/Activity Code	9-10	*Entry of 2-position code identifying the recipient Country/International Organization or account which is the recipient of materiel (pos. 31-32 of MRO).

best copy available

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Customer-Within-Country Code	11	*Entry of alpha/numeric code indicates FMS shipment will be: a. Shipped direct to the country by the shipping activity. b. Marked for the country destination but shipped to a CONUS country representative or freight forwarder. c. Numeric 0 indicates customer-within-country code not applicable (pos. 33 of MRO).
Country Representative/ Freight Forwarder Code	12-13	*Entry will contain: a. Numeric 0 in pos. 12 for all countries except Canada and issue priority 1-8 Air Force Saudia Arabia (DSR pos. 45, 31, 32 of MRO) with a 3, 4, 8 and 9 Freight Forwarder Code in pos. 47 of MRO. Address code in pos. 13 to identify the country representative/freight forwarder. b. Alpha address code in pos. 12-13 to identify representative for Canada (pos. 46-47 of MRO). c. Numeric 1 in pos. 12 for issue priority 1-8 for Air Force Saudia Arabia with a 3, 4, 8 or 9 Freight Forwarder Code in pos. 47 of MRO. Numeric 0 in pos. 12 for all other Saudia Arabia. Address code in pos. 13 to identify the freight forwarder.
Type of Address Code (TAC)	14	Enter applicable code from appendix A-43.
Clear Text Address	15-49	Enter the data desired for the address line being entered.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Special Instructions	50	Enter applicable codes from appendix A-65. Enter indicates special instructions or cargo exceptions apply to this address.
Port Designator (WPOD)	51-33	A 3-position code identifying a specific water terminal, geographic area, or location for the discharge of cargo (DoD Regulation 4500.32-R).
Air Terminal Designator	54-56	A 3-position code identifying the airport for discharge of cargo (DoD Regulation 4500.32-R).
Effective Date	57-61	*Enter the Julian date when addition, revision, or deletion is to be effective, or leave blank.
Deletion Date	62-66	*Enter the Julian date when the address for TAC 9 will be deleted or a projected deletion date for other addresses.
Change Number	67-70	*Enter change number assigned by DAASO. a. Field position 67-68 - calendar year. b. Field position 69-70 - sequence serial number.
Blank	71-76	Leave blank.
Freight Forwarder Location Code (FFLC)	77	Enter assigned FFLC as follows: Code 1 - East Coast Location. Code 2 - West Coast Location. Code 3 - Gulf Coast Location. Code 0 - Indicates that the address is the only freight forwarder for that MAPAC.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
TAC Sequence Code	78	*Enter numeric code beginning with 1 for each address for the MAPAC and TAC.
Last Card Indicator	79	*Enter 9 or blank. Last card for for each address contains 9, blank on all other cards.
Card Sequence Code	80	*Enter 1, 2, and so on not to exceed 7.

*For MA3 (deletes) only these data will be entered.

6. When used for Grant Aid addresses the following are the fields in the transaction:

Document Identifier Code 1-3 *Enter:

MA1 - Addition to MAPAD.
MA2 - Revision to MAPAD.
MA3 - Deletion from MAPAD.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Routing Identifier Code (To)	4-6	Enter depot RIC.
Address File Identifier	7	*Enter Code G, identifies Grant Aid addresses.
Grant Aid Identifier	8	*Enter Code X.
Country/Activity Code	9-10	*Entry of 2-position code identifying the recipient Country/International Organization or account which is the recipient of materiel (pos. 31-32 of MROs).
Customer-Within-Country	11-12	*Entry of alphanumeric code to identify the country customer. A numeric 0 in pos. 12 for all countries except Vietnam.
Constant	13	*Enter numeric 0.
Type of Address Code (TAC)	14	Enter applicable code from appendix A-43.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Clear Text Address	15-49	Enter the data desired for the address line being entered.
Special Instructions	50	Enter applicable code from appendix A-65. Entry indicates special instructions or cargo exceptions apply to this address.
Port Designator (WPOD)	51-53	A 3-position code identifying a specific water terminal, geographic area or location.
Air Terminal Designator (APOD)	54-56	A 3-position code identifying the airport for discharge of cargo.
Effective Date	57-61	*Enter the Julian date when the addition, revision, or deletion is to be effective, or leave blank.
Deletion Date	62-66	*Enter the Julian date when the address for TAC 9 will be deleted or a projected deletion date for other addresses.
Change Number	67-70	*Enter change number assigned by DAASO. a. Field position 67-68 - calendar year. b. Field position 69-70 - sequence serial number.
Blank	71-78	Leave blank.
Last Card Indicator	79	*Enter 9 or blank. Last card for each address contains 9; blank on all other cards.
Card Sequence Code	80	*Enter 1, 2, etc., not to exceed 7.

*For MA3 (deletes) only these data will be entered.

7. VALIDATION

a. Document Identifier MA1, pos. 1-3

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Alpha F or G.	KB
8-14	If MAPAC plus TAC is on file.	E4
8	If pos. 7 is alpha F, pos. 8 must be BD, P, or T. If pos. 7 is alpha G, pos. 8 must be X.	KO
9-10	Alpha/alpha or alpha/numeric.	KO
11	Alpha/numeric.	KO
12	Must be numeric 0 except when pos. 7 is F or pos. 9-10 is CN.	KO
13	If pos. 7 is F, pos. 13 is alpha/numeric. If pos. 7 is G, pos. 13 must be 0.	KO
14	Must be 1, 2, 3, 5, 6, 7, 9, or M.	BG
15-49	This field must have at least one entry in pos. 15-49, unless pos. 14 = 2 or 50 = C or S.	PA
33-38	TAC cross-reference MAPAC must be on file.	KJ
50	Must match appendix A-65 or blank.	KH
51-53	Must be on file.	B8
54-56	Must be on file.	B8
57-61	Numeric filled.	KZ
62-66	Numeric filled or blank.	KN
77	If pos. 7 is G, pos. 77 must be blank. If pos. 7 is F, pos. 77 must be 0, 1, 2, or 3.	KC
80	Numeric 1, 2, 3, 4, 5, 6, or 7.	PB

When any card in the MAPAD input (1-77) is violated, the balance of the cards for that input sequence will violate as H1 Code.

b. Document Identifier MA2, pos. 1-3

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Alpha F or G.	KB
8-13	MAPAC not on file.	LY
14	TAC not on file.	4B
15-49	This field must have at least one entry in pos. 15-49, unless pos. 14 = 2 or pos. 50 = C or S.	PA
33-38	TAC 9 cross-reference MAPAC, must be on file.	KJ
50	Must match appendix A-65 or blank.	KH
51-53	Must be on file.	B8
54-56	Must be on file.	B8
57-61	Numeric filled.	KZ
62-66	Numeric filled or blank.	KN
77	If pos. 7 is g, pos. 77 must be blank. Pos. 7 is F, pos. 77 must be 0, 1, 2, or 3.	KC
80	Numeric 1, 2, 3, 4, 5 6, or 7.	PB

c. Document Identifier MA3, pos. 1-3

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Alpha F or G.	KB
8-13	MAPAC not on file.	LY
14	TAC not on file.	4B
15-56	No edit.	
57-61	Numeric filled.	KZ
61-80	No edit.	

When any card in the MAPAD input (1-7) is violated, the balance of the cards for that input sequence will violate as H1 Code.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Effective Date	57-61	*Enter the Julian date when addition, revision, or deletion is to be effective, or leave blank.
Deletion Date	62-66	*Enter the Julian date when the address for TAC 9 will be deleted or a projected deletion date for other addresses.
Change Number	67-70	*Enter change number assigned by DAASO. a. Field position 67-68 - calendar year. b. Field position 69-70 - sequence serial number.
Blank	71-76	Leave blank.
Freight Forwarder Location Code (FFLC)	77	Enter assigned FFLC as follows: Code 1 - East Coast Location. Code 2 - West Coast Location. Code 3 - Gulf Coast Location. Code 0 - Indicates that the address is the only freight forwarder for that MAPAC.
TAC Sequence Code	78	*Enter numeric code beginning with 1 for each address for the MAPAC and TAC.
Last Card Indicator	79	*Enter 9 or blank. Last card for for each address contains 9, blank on all other cards.
Card Sequence Code	80	*Enter 1, 2, and so on not to exceed 7.

*For MA3 (deletes) only these data will be entered.

6. When used for Grant Aid addresses the following are the fields in the transaction:

Document Identifier Code 1-3 *Enter:

MA1 - Addition to MAPAD.
MA2 - Revision to MAPAD.
MA3 - Deletion from MAPAD.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Routing Identifier Code (To)	4-6	Enter depot RIC.
Address File Identifier	7	*Enter Code G, identifies Grant Aid addresses.
Grant Aid Identifier	8	*Enter Code X.
Country/Activity Code	9-10	*Entry of 2-position code identifying the recipient Country/International Organization or account which is the recipient of materiel (pos. 31-32 of MROs).
Customer-Within-Country	11-12	*Entry of alphanumeric code to identify the country customer. A numeric 0 in pos. 12 for all countries except Vietnam.
Constant	13	*Enter numeric 0.
Type of Address Code (TAC)	14	Enter applicable code from appendix A-43.
Clear Text Address	15-49	Enter the data desired for the address line being entered.
Special Instructions	50	Enter applicable code from appendix A-65. Entry indicates special instructions or cargo exceptions apply to this address.
Port Designator (WPOD)	51-53	A 3-position code identifying a specific water terminal, geographic area or location.
Air Terminal Designator (APOD)	54-56	A 3-position code identifying the airport for discharge of cargo.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Effective Date	57-61	*Enter the Julian date when the addition, revision, or deletion is to be effective, or leave blank.
Deletion Date	62-66	*Enter the Julian date when the address for TAC 9 will be deleted or a projected deletion date for other addresses.
Change Number	67-70	*Enter change number assigned by DAASO. a. Field position 67-68 - calendar year. b. Field position 69-70 - sequence serial number.
Blank	71-78	Leave blank.
Last Card Indicator	79	*Enter 9 or blank. Last card for each address contains 9; blank on all other cards.
Card Sequence Code	80	*Enter 1, 2, etc., not to exceed 7.

*For MA3 (deletes) only these data will be entered.

7. VALIDATION

a. Document Identifier MA1, pos. 1-3

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Alpha F or G.	KB
8-14	If MAPAC plus TAC is on file.	E4
8	If pos. 7 is alpha F, pos. 8 must be BD, P, or T. If pos. 7 is alpha G, pos. 8 must be X.	KO
9-10	Alpha/alpha or alpha/numeric.	KO
11	Alpha/numeric.	KO
12	Must be numeric 0 except when pos. 7 is F or pos. 9-10 is CN.	KO

FIELD POSITION	VALIDATION	VIOLATION CODE
13	If pos. 7 is F, pos. 13 is alpha/numeric. If pos. 7 is G, pos. 13 must be 0.	KO
14	Must be 1, 2, 3, 5, 6, 7, 9, or M.	BG
15-49	This field must have at least one entry in pos. 15-49, unless pos. 14 = 2 or 50 = C or S.	PA
33-38	TAC cross-reference MAPAC must be on file.	KJ
50	Must match appendix A-65 or blank.	KH
51-53	Must be on file.	B8
54-56	Must be on file.	B8
57-61	Numeric filled.	KZ
62-66	Numeric filled or blank.	KN
77	If pos. 7 is G, pos. 77 must be blank. If pos. 7 is F, pos. 77 must be 0, 1, 2, or 3.	KC
80	Numeric 1, 2, 3, 4, 5, 6, or 7.	PB

When any card in the MAPAD input (1-77) is violated, the balance of the cards for that input sequence will violate as H1 Code.

b. Document Identifier MA2, pos. 1-3

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Alpha F or G.	KB
8-13	MAPAC not on file.	LY
14	TAC not on file.	4B
15-49	This field must have at least one entry in pos. 15-49, unless pos. 14 = 2 or pos. 50 = C or S.	PA
33-38	TAC 9 cross-reference MAPAC, must be on file.	KJ
50	Must match appendix A-65 or blank.	KH
51-53	Must be on file.	B8

FIELD POSITION	VALIDATION	VIOLATION CODE
54-56	Must be on file.	B8
57-61	Numeric filled.	KZ
62-66	Numeric filled or blank.	KN
77	If pos. 7 is g, pos. 77 must be blank. Pos. 7 is F, pos. 77 must be 0, 1, 2, or 3.	KC
80	Numeric 1, 2, 3, 4, 5 6, or 7.	PB

When any card in the MAPAD input (1-7) is violated, the balance of the cards for that input sequence will violate as H1 Code.

c. Document Identifier MA3, pos. 1-3

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Alpha F or G.	KB
8-13	MAPAC not on file.	LY
14	TAC not on file.	4B
15-56	No edit.	
57-61	Numeric filled.	KZ
61-80	No edit.	

When any card in the MAPAD input (1-7) is violated, the balance of the cards for that input sequence will violate as H1 Code.

APPENDIX B-128

GOVERNMENT BILL OF LADING CLOSEOUT/MRO FORCE CLOSURE CARD

1. The Government Bill of Lading (GBL) Closeout Card may be computer prepared for non-MOFAST items based on options exercised by the distribution depot. (See appendix B-66 for method of exercising depot option.)

OPTION	EXPLANATION
1	One card will be prepared for each shipment unit.
2	One card will be prepared for each line item (MRO) of a shipment unit.

Computer prepared data elements indicated with an asterisk (*) will be prepunched and interpreted upon output. The MRO Force Closure Card will be prepared on a general purpose card to "force close" MRO when research of lost MRO does not indicate positive supply actions, i.e., shipment, cancellation, or denial.

2. This card is used in conjunction with Action Codes, appendix A-42, to accomplish the following types of transactions:

a. Report shipment of items via Government Bill of Lading/Commercial Bill of Lading (GBL/CBL).

b. Report shipment of items via registered/certified mail/insured parcel post.

c. Request appendix F-138, Movement Analysis - Research Detail Report.

d. Force close the MRO record in the Shipment Unit File and transfer record to MRO History.

3. The following are the fields in the transaction:

a. GBL Closeout

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	*Enter ZEN
Day GBL Prepared	4-6	Enter Julian day GBL prepared.
Blank	7	Leave blank.
Shipment Unit Number	8-14	*Enter shipment unit number assigned.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Shipment Unit Line Item Number*	15-18	Shipment Unit Line Item Number assigned. Applicable to Option 2 only. a. Mandatory entry for Action Code GT. b. Optional entry for Action Code GC.
Type of Hold Codes	19	Enter applicable code from appendix A-21.
Load Indicator	20	Enter numeric 1 for bulk area, 2 for Freight Consolidation Point.
Quantity	21-25	Enter the quantity actually shipped.
Blank	26-28	Leave blank.
Release Indicator or Reason for GBL Clearance	29	Enter 1 if local (any quantity), 2 for Standing Route Order (any type), 3 for other MTMTS Release.
TCN	30-44	Optional entry. When entered, it will change the computer assigned TCN. When using Action Code GR or GY, enter Reason for GBL Clearance. (See note 1.)
Blank	45	Leave blank.
TCN Partial Code	46	Enter only when partialling a shipment.
Mode of Shipment Code	47	Enter applicable code from appendix A-17.
GBL Identification Code	48	Enter B for GBL, R for Registered Parcel Post. Other alphas except O if appropriate, such as I for Insured Parcel Post.
GBL/Parcel Post Register Number	49-56	Enter appropriate GBL/CBL register number. Enter zeros in unused high order positions of pos. 49-56 with Registered/Insured Parcel Post Number.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Appropriation Code	57-58	Leave blank if DLA. When other than DLA, show fund code from appendix A-93.
Transportation Cost	59-65	Enter cost in dollars and cents or rate. (See note 2.)
Port of Embarkation	66-68	Enter only when different from computer assigned POE.
Date Shipped	69-71	Enter the actual date shipped.
Carrier Code	72-75	Enter carrier code.
Blank	76	Leave blank.
Functional Routing Code	77-78	Enter FRC or leave blank.
Action Code	79-80	Enter GR, GS, GT, GY, or GZ (appendix A-42).

NOTE 1: With Action Code GR or GY, enter DIC, Reason, and GBL Number (mandatory). Any other positions of data entered (optional) will be recorded on GBL register.

NOTE 2: When cost is entered, pos. 59-65 must be all numeric other than all zeros. When rate is entered, pos. 59 is R, pos. 60 is 0, pos. 61-65 must be all numeric other than all zeros (for cost per 100 pounds) and program will compute total transportation cost.

b. Requesting "Movement Analysis - Research Detail" report (appendix F-138) upon request from HQ DLA functional monitor. Two data sequence options are available for this format as follows:

(1) Option 1: Action Code GW will format F-138 data by destination (primary) and SPLC/DoDAAD sequence.

(2) Option 2: Action Code GQ will format F-138 data by destination (primary) and Stock Number sequence.

"Negative Report" will be produced when data is not available for a state code or destination code.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZEN.
Export Destination Code	4	Enter alpha code for export sub-area or numeric (1-8) for Major Export Area. See appendix A-79.
State Code	5-6	Enter State Code of destination desired. See appendix A-80.
Commodity Manager Code	7	Enter Commodity Manager Code from appendix A-44. Must be DLA Code excluding R (DIPEC).
Blank	8-76	Leave blank.
FRC	77-78	Enter Functional Routing Code.
Action Code	79-80	Enter GW or GQ.

c. MRO Force Closure

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZEN.
Blank	4-7	Leave blank.
Shipment Unit Number	8-14	Enter shipment unit number assigned.
Shipment Unit Line Item Number	15-18	Shipment Unit Line Item Number assigned.
Blank	19-20	Leave blank.
Quantity	21-25	Enter quantity to be forced closed.
Blank	26-29	Leave blank.
Status Code	30-31	Enter BE.
Blank	32-44	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Control Code	45	Enter: 1 - if closure action is by storage. 2 - if closure action is by transportation.
Blank	46-68	Leave blank.
Date Force Closed	69-71	Enter the force closure date.
Blank	72-76	Leave blank.
Functional Routing Code	77-78	Enter FRC.
Action Code	79-80	Enter GX.

4. VALIDATION

Violation rejects will be listed on appendix F-85.

a. Action Codes GR and GY

FIELD POSITION	VALIDATION	VIOLATION CODE
49-56	Numeric pos. 49, alpha/numeric pos. 50, numeric pos. 51-56.	LZ

b. Action Codes GS, GT, and GZ

FIELD POSITION	VALIDATION	VIOLATION CODE
8-14	Numeric.	IU
15-18	May be blank with Action Code GS, must be numeric for Action Codes GT and GZ.	JE
21-25	Must be all numeric, may be all zeros, or all blank.	AS
29	Only validated when pos. 47 is other than G, H, I, 4, 6, 7, 8, 9, or 0; or when pos. 15-18 is blank. Violated when not 1, 2, or 3 and pos. 48 is not B.	RC

FIELD POSITION	VALIDATION	VIOLATION CODE
46	Blank/alpha.	ZV
47	Alpha A, B, C, D, E, F, G, H, I, J, K, L, M, N, P, Q, R, S, T, U, V, W, X, Y or Z/numeric 2, 3, 4, 5, 6, 7, 8 or 9.	JB
48	Must not be B or O when pos. 47 equals G, H, I, 4, 6, 7, 9, or 0. Must not be I, O, or R when pos. 47 equals N, U, or 5. Must not be blank, I, O, or R when pos. 47 equals other than these modes.	LX
49-56	Validation only if pos. 48 equals B/R. When pos. 48 = B, pos. 49 must be alpha. When pos. 48 = R, pos. 49 must be alpha/numeric. Alpha/numeric in pos. 50, numeric pos. 51-56.	LZ
57-58	Validation only if pos. 48 equals B. May be blank for DLA item. When non-DLA item, pos. 57-58, must match A-93 entry in Table and Control File.	TA
59-65	Validation only if pos. 48 equals B. Field positions 59-65 may be all blank. When not blank, pos. 59 must be alpha R or numeric, 60 must be numeric, 61-65 must be all numeric and not all zeros.	TC
79-80	Alpha and valid for DIC ZEN.	CF

c. Action Code GW or GQ

FIELD POSITION	VALIDATION	VIOLATION CODE
4	Alpha/numeric, may not be blank when pos. 5-6 is blank.	LH
5-6	Alpha. Not validated when pos. 4 contains entry.	LI

d. Action Code GX

FIELD POSITION	VALIDATION	VIOLATION CODE
8-14	Numeric.	IU
15-18	Numeric.	JE
21-25	Numeric and when pos. 45 equals 1, must equal SU quantity open/when pos. 45 equals 2, must equal SU quantity offered.	AS
45	Must be numeric 1 or 2.	D9

APPENDIX B-129

ACTIVITY ADDRESS DIRECTORY CARD

1. This card is provided by DAAS to establish and maintain the master DoDAAD at applicable installations.

2. The Activity Address Directory Card is prepared on a general purpose card or CRT and may be locally prepared and processed for the following purposes:

a. To establish and maintain activity addresses not furnished by DAAS.

b. To establish project descriptive and/or title data on file.

c. To establish special ship to address for selected project codes.

3. These files will be used in conjunction with shipping procedures. Appropriate printout on DD Form 1348-1 will be provided.

4. Cards are processed as detailed in appendix D-96.

5. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter: TA1 - Addition to Activity Address File. TA3 - Change to existing Address File. TA4 - Deletion from the Activity File.
Blank or Routing Identifier Code (To)	4-6	Leave blank or enter depot RIC.
Type of Address Code	7	Entry of 1-position numeric code denoting a type of address. Code 1 Consignee address for mail (parcel post) or CONUS freight and in-the-clear address.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		Code 2
		Overseas consignee freight address or CONUS freight address when different from Code 1 and not published in MTMB 3 or 7.
Activity Address Code	8-13	Enter a 6-position, alphabetic/numeric code representing an in-the-clear address of individuals or activities authorized to direct, ship, or receive materiel, documentation and/or billing (1, 2, in pos. 7).
In-The-Clear Address	14-48	The narrative description related to the address code. This field will be blank for deletions.
Air Terminal Designator	49-51	A 3-position code identifying the airport for discharge of cargo.
Standard Point Location Code	52-57	SPLC from NMFTA Continental Directory.
Effective Date	58-62	Enter 2-position year in pos. 58-59, Julian date in pos. 60-62 when address is to be effective, or leave blank.
Change Number	63-66	Assigned by DAASO.
Blank	(63-65)	Leave blank (when locally developed).
Process Control Code	(66)	Enter Code 1 (when locally developed).
Break Bulk Point	67-72	Enter the destination to which consolidation shipments are directed for distribution.
Port Designator - Water	73-75	A 3-position code identifying a specific water terminal, geographic area, or location for the discharge of cargo (AR 55-10).
Blank	76-79	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Line Sequence	80	Enter a 1-position numeric code (beginning with 1) to denote the sequence of the in-the-clear address). (Four lines maximum.)

6. When used for Project In-the-Clear instructions or description, the following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter: TA1 - Addition to the Project File. TA3 - Change to the Project File. TA4 - Deletion to the Project File.
Blank or Routing Identifier Code (To)	4-6	Blank or depot RIC.
TAC	7	Enter 8.
Blank	8-9	Leave blank.
Service Assignment Code	10	Enter code (appendix A-5) of Service assigning project.
Activity Project Code	11-13	Enter 3-position A/N project code representing instructions and/or titles of projects controlled during shipments.
Project Name	14-33	Enter name related to the project code, unless classified.
Special Instructions	34-58	Enter project description.
Termination Date	59-62	Enter date (year, day) of project termination.
Blank	63-65	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Process Control Code	66	Enter Code 1.
Blank	67-72	Leave blank.
Special Packing Indicator	73	Enter Code A to indicate special project shipment requiring LEVEL A PACK; enter S to indicate shipment requiring SPECIAL SEA PACK; otherwise, leave blank.
Control List Indicator	74	Enter 1 if special control listing is required; otherwise, enter 0 or leave blank.
Effective Date	75-79	Enter the assigned date when project code is effective (2-position year in pos. 75-76; Julian date in pos. 77-79) or leave blank.
Blank	80	Leave blank.

7. The following card format will be prepared to load In-the-Clear Addresses for Special Selected Project Codes. Table and Control File (ZUA) must be loaded with a special consignee indicator when special address is to be utilized.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter TA1 to add, TA3 to change, and TA4 to delete.
Routing Identifier Code (To) or Blank	4-6	Enter depot RIC or blank.
Type Address Code	7	Enter 1 or 2.
Blank	8-9	Leave blank.
Service Assignment Code	10	Enter code (appendix A-5) of Service assigning project.
Activity Project Code	11-13	Enter 3-position AN project code representing instructions and/or titles of projects controlled during shipments.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Address Line In-The-Clear Text	14-48	Enter the data desired for the address line being entered. Leave blank if a deletion (TA4 in pos. 1-3).
Blank	49-57	Leave blank.
Effective Date	58-62	Enter 2-position year in pos. 58-59, Julian date in pos. 60-62 or leave blank.
Blank	63-65	Leave blank.
Process Control Code	66	Enter a 1 indicating locally developed.
Blank	67-79	Leave blank.
Line Sequence	80	Enter a 1-position numeric code starting with 1 indicating the sequence of this line of address within the entire address. A maximum of four lines may be entered.

8. VALIDATION

a. Document Identifier TA1, positions 1-3

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Must be numeric 1, 2, or 8 if TAC is already on file.	GB/E4
8-13	If pos. 7 is 1 or 2, pos. 8-13 must be filled alpha/numeric or blank in pos. 8-9 and alpha/numeric in pos. 10-13. If pos. 1-3 are other than TA4 and pos. 7 is 8, pos. 10-13 must be filled and 8-9 must be blank.	MD
10-13	If TAC (pos. 7 is 1 or 2, project code must be on project table indicating special address.	3J
14-48	If pos. 1-3 is other than TA4 or if pos. 7 is other than 8, this field must have at least one entry in pos. 14-48.	PA

FIELD POSITION	VALIDATION	VIOLATION CODE
49-51	APOD must be on file.	B8
52-57	SPLC must be 6 numerics or blank.	D4
58-62	If pos. 7 is 1 or 2, must be a valid Julian date, or blank. If pos. 7 is 8, pos. 58 must be blank and termination date pos. 59-62 must be numeric.	KZ
67-72	Must be on file unless blank.	3Z
73-75	WPOD must be on file.	B8
73	If pos. 7 is 8 and pos. 1-3 is other than TA4, pos. 73 must be A, S, or blank.	IF
74	If pos. 7 is 8 and pos. 1-3 is other than TA4, pos. 74 may be numeric 1, 0 or blank.	IK
75-79	If pos. 7 is 8 and pos. 1-3 is other than TA4, must be a valid Julian date, or blank.	KZ
80	Must be numeric 1, 2, 3, or 4. Number of cards input must equal largest number in pos. 80.	PB

When any card in a DoDAAD input for a type of address code (1 to 4 cards) is violated, the balance of the cards for that type address code will violate as H1 Code. Input may be from CRT, card reader, or AUTODIN. CRT input will reject randomly to input CRT. Other inputs will be rejected on Violation Reject Report, F-85, for DS/T.

b. Document Identifier TA3, positions 1-3

FIELD POSITION	VALIDATION	VIOLATION CODE
7	TAC must be on file.	TD
8-13	AAC must be on file.	LY
14-48	If pos. 7 is other than 8, this field must have at least one entry in pos. 14-48.	PA
49-51	APOD must be on file.	B8
52-57	SPLC must be 6 numerics or blank.	D4

FIELD POSITION	VALIDATION	VIOLATION CODE
58-62	If pos. 7 is 1 or 2, must be a valid Julian date, no blanks. If pos. 7 is 8 pos. 58 must be blank and termination date pos. 59-62 must be numeric.	KZ
67-72	Must be on file or blank.	3Z
73-75	WPOD must be on file.	B8
73	If pos. 7 is 8, pos. 73 must be A, S, or blank.	IJ
74	If pos. 7 is 8, pos. 74 may be numeric 1, 0 or blank.	IK
75-79	If pos. 7 is 8, must be a valid Julian date, or blank.	KZ
80	Must be numeric 1, 2, 3, or 4. Number of cards input must equal largest number in pos. 80.	PB

When any card in a DoDAAD input for a type of address code (1 to 4 cards) is violated, the balance of the cards for that type address code will violate as H1 Code. Input may be from CRT, card reader, or AUTODIN. CRT input will reject randomly to input CRT. Other inputs will be rejected on Violation Reject Report, F-85, for DS/T.

c. Document Identifier TA4, positions 1-3

FIELD POSITION	VALIDATION	VIOLATION CODE
7	TAC must be on file.	4B
8-13	AAC must be on file.	LY
14-57	No edit.	
58-62	If pos. 7 is 1 or 2, must be a valid Julian date, or blank.	KZ
63-74	No edit.	
75-79	If pos. 7 is 8, must be a valid Julian date, or blank.	KZ
80	No edit.	

When any card in a DoDAAD input for a type of address code (1 to 4 cards) is violated, the balance of the cards for that type address code will violate as H1 Code. Input may be from CRT, card reader, or AUTODIN. CRT input will reject randomly to input CRT. Other inputs will be rejected on Violation Reject Report, F-85, for DS/T.

APPENDIX B-130

INVENTORY CATEGORY CARD

1. This card is prepared at the distribution depot, based on data furnished by the DSC, in order to add or change Inventory Category Codes in the Item Locator Record which were not updated by the annual charge furnished to the depot via the Item Data Bank.

2. This card is also utilized to assign locally developed codes for non-DLA items when required to lot items for inventory as prescribed by owning manager outside of DLA.

3. The following are the fields in the input document:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZEP.
Blank	4-7	Leave blank.
National Stock Number	8-20	Enter appropriate NSN.
Blank	21-71	Leave blank.
Inventory Category Code	72	Assign appropriate code IAW appendix A-54.
Blank	73-76	Leave blank.
Functional Routing Code	77-78	Enter FRC.
Blank	79-80	Leave blank.

4. VALIDATION

a. Field position 8-20 must be all numeric - Violation Code AY

b. Field position 72 must be alphanumeric - Violaton Code LR. (See note.)

NOTE: When the NSN in pos. 8-20 is a DLA managed item, only alphas H, E, L, T, or U, or numeric 0, will be accepted.

APPENDIX B-131

MRO AND/OR EXCEPTION DATA VIA CRT

1. PURPOSE

Display required data element for MROs and/or exception data, with option of printing the DD Form 1348-1 on-line.

2. REFERENCES

a. Appendix B-7.

b. Appendix D-4.

c. Appendix D-41.

d. Appendix D-104.

e. Appendix E-003P.

3. DATA ELEMENTS

The following data element fields should be displayed to allow entry of MROs and/or exception data.

FIELD LEGEND	NUMBER OF POSITIONS	TYPE	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	3	A/N	1-3	Enter from MRO source.
Routing Identifier Code To	3	A/N	4-6	Enter from MRO source.
Media/Status Code	1	A/N	7	Enter from MRO source.
Stock Number/ Part Number	15	A/N	8-22	Enter from MRO source.
Unit of Issue	2	A	23-24	Enter from MRO source.
Quantity Ordered	5	A/N	25-29	Enter from MRO source.
Document Number	14	A/N	30-43	Enter from MRO source.
Suffix Code	1	A	44	Enter from MRO source.
Supplementary Address	6	A/N	45-50	Enter from MRO source.
Signal Code	1	A	51	Enter from MRO source.

FIELD LEGEND	NUMBER OF POSITIONS	TYPE	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Fund Code	2	A/N	52-53	Enter from MRO source.
Distribution Code	3	A/N	54-56	Enter from MRO source.
Project Code	3	A/N	57-59	Enter from MRO source.
Priority Designator	2	A/N	60-61	Enter from MRO source.
Required Delivery Date	3	A/N	62-64	Enter from MRO source.
Advice Code	2	A/N	65-66	Enter from MRO source.
Routing Identifier Code From	3	A/N	67-69	Enter from MRO source.
Purpose Code	1	A/N	70	Enter from MRO source.
Condition Code	1	A	71	Enter from MRO source.
Management Code	1	A	72	Enter from MRO source.
Type Pack	1	A/N	73	Enter from MRO source.
Unit Price	7	A/N	74-80	Enter from MRO source.

FIELD LEGEND	NUMBER OF POSITIONS	TYPE	EXPLANATION/INSTRUCTIONS
Release Indicator	1	A	Enter R for release on-line. Enter B for release to batch.
Partial Indicator	1	A	Enter Y if MRO is a partial release.
Freight Mode	1	A	Enter F if freight mode of shipment. This will assign a freight mode to on-line MROs. This will not avfect mode selection of MROs sent to batch.
Location	9 or 12	A/N	Enter location of materiel as applicable. Nine or 12 positions, right-justified.
LDC	5	A/N	Enter exception lot data code for JAN Class S items (two position year followed by two position week plus alpha character, or blank).

FIELD LEGEND	NUMBER OF POSITIONS	TYPE	EXPLANATION/INSTRUCTIONS
CAGE	5	A/N	Enter Contractor and Government Entity Code for JAN Class S items.
Part Number	1	A	Enter Y if part number MRO. Leave blank for NSN MRO.
MRO Weight	5	N	Whole weight of MRO. If Part Number MRO cannot be all zeros.
MRO Cube	3	N	Whole cube of MRO. If Part Number MRO cannot be all zeros.
NMFC	6	N	Enter per note.
NMFC Record Sequence Number	2	N	Enter per note.
LTL Code	1	A	Enter per note.
Water Commodity Code	5	A/N	Enter per note.
Special Requirements	1	A/N	Enter per note.
Air Commodity Code	2	A/N	Enter per note.
Air Dimension Code	1	A	Enter per note.
Physical Security Code	1	A	Enter per note.
Exception MRO Code	480	A/N	Enter only on exception MRO A55/A5E, C55/C5E, or A5J with Z Management Code, or Part Number A52, A5B.
Exception Address	245	A/N	Enter as required for exception MROs A55/A5E, C55/C5E, A5J with Z Management Code, or Part Number A52, A5B.

NOTE: Item data may be entered for any MRO. The system will use these data unless there is a locator master record; then the data from the locator will be used. On stock number MROs input item data will not be used if processed through batch programs. The following item data elements are provided by the program for DVD medical MROs. Operator may alter as necessary.

FIELD LEGEND	NUMBER OF POSITIONS	TYPE	EXPLANATION/INSTRUCTIONS
WT	5	N	
CUBE	3	N	
NMFC	6	N	135000
NMFC Record Sequence Number	2	N	00
LTL Code	1	A	J
Water Commodity Code	5	A/N	534Z9
Special Requirements Code	1	A/N	B
Air Commodity Code	2	A/N	MZ
Air Dimension Code	1	A	A
Physical Security Code	1	A	U

4. VALIDATION

When input data fail, validation cursor will be placed under invalid element fields. A5J, C5_, and/or DICOMSS Brand Name MROs can be entered through this program and will process through normal MOWASP, but will not be validated or printed on-line.

FIELD LEGEND	REMARKS
Document Identifier Code DIC	Must A5_, C5_. Third position may be 1, 2, 4, 5, 7, A, B, D, E or J. If 3rd position is 5 or E, must have exception data. Reject Code AA.
Routing Identifier Code RICT	1st position must be S. 2nd position must be depot. 3rd position must be alphanumeric. May not be blank. Reject Code AC.
Media/Status Code MSTAT	No edit.
Stock Number/Part Number SN/PN	If stock number, must be alphanumeric not blank or all zeros. If release indicator is

FIELD LEGEND	REMARKS
	R stock number must be all numeric, no blanks. If stock number alpha allowed in position 7, then make 67-69 S9U. Reject Code AY.
	If part number, third position of the DIC must be 2 or B. Must not be all blank or all zeros. Reject Code AY.
Unit of Issue UI	Must be alpha. Cannot be blank. Reject Code AN.
Quantity Ordered	Numeric, must be filled and not all zeros except C5_. QTY may be alphanumeric if first two positions of field. Reject Code AS.
Document Number DOC	DoDAAC (pos. 1-6) alphanumeric, date (pos. 7-10) numeric, control number (pos. 11-14), alphanumeric must not have blanks or all zeros. Reject Code AI.
Suffix Code SFX	May be blank, no validation.
Supplementary Address SUPL ADD	If pos. 30 is B, D, K, P or T, pos. 1 must be B, D, K, P, T or Y. Must not contain blanks or Y in pos. 45 when signal code is B, J, K, L, M or X. No validation if DIC A55/A5E. Reject Code BJ.
Signal Code SIG CDE	Must be A, B, C, D, J, K, L, M, W or X. Reject Code AU.
Fund Code FUND	May be blank, no validation.
Distribution Code DIST	May be blank, no validation.
Project Code PROJ	May be blank, no validation.
Priority Designator PRI	Numeric 01 through 15 only. If not, make it equal 15.
	If Code 999 is entered in Required Delivery Date field, and priority not 01-03, then blank out 62-64.

FIELD LEGEND	REMARKS
Required Delivery Date RDD	May be blank. If Advice Code is 2T, 21 or 32 must be greater than zero and less than 367. Must be 001 to 366 except as follows: if N or E in pos. 62 and PD 01-08 in pos. 60-61, process. If expedited handling signal 555 is entered in 62-64, process. If N or E in pos. 62 and PD 09-15 in pos. 60-61, blank the entry in pos. 62-64 and process in accordance with priority. Also may have A, X or S in position 62 and numeric in 63-64. Reject Code 3W.
Advice Code ADVICE	1st position numeric, 2nd position alpha or numeric or both positions blank.
Routing Identifier Code From RICF	Must be filled and on RIC from table. Reject Code AB.
Purpose Code PURPOSE	Alpha A-P (except I) and numeric 1-9. May be blank. Reject Code AQ.
Condition Code COND	Alpha A-H or J-M only. Reject Code AF.
Management Code MGT	Alpha or blank when 67-68 other than S9. Alpha A, F, G, H, R, S, U. If A5J with Z must have exception data, or blank when pos. 67-68 is S9. Reject Code AW.
Type Pack TYPE PACK	May be blank, no validation.
Unit Price UNIT PRICE	Numeric other than all zeros. Can be alpha F/V in pos. 80 when alpha in pos. 7 of stock number inputs. Reject Code AM.

APPENDIX B-132

INVENTORY ANALYSIS REQUEST CARD

1. This input is prepared on a general purpose card in accordance with appendix E-132 P and is utilized to request a Locator Inventory Analysis Report, appendix F-8, as depicted in appendix D-34.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZEU.
Blank	4-5	Leave blank.
NSN Grouping	6-9	Enter number of NSNs to be grouped within an FSC.
Blank	10-76	Leave blank.
Functional Routing Code	77-78	Enter FRC of organization element requesting the report.
Action Code	79-80	Leave blank for part 1; enter GU for part 2 (ICC U only).

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
6-9	All numeric fill with leading zeros.	W2
79-80	Action code must be GU or blank.	CF

APPENDIX B-133

ACCEPTANCE ALERT OR ACCEPTANCE FOLLOWUP

1. This card is received from Contract Administration Offices (CAOs) as an Acceptance Alert, an Acceptance Followup, or a request for retransmission of a previous card. The type of transaction can be determined by the Transaction Status Code in pos. 80. The A/A or Followup will be validated and, if acceptable, retained by a mechanical file to be utilized in the Automatic Acceptance Reporting Process. The following fields represent control elements for relating alerts and reports, and for discretely identifying one alert from another:

a. PIIN

b. Call/Order Number

c. Ship To Identity

d. Contractor Shipment Number

e. Contractor Shipment Number Suffix

f. Exhibit Line Item or CLIN

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter PK5.
Procurement Instrument Identification Number	4-16	Enter the 13-digit PIIN assigned to the procurement instrument against which the acceptance is to be reported.
Call/Order Number	17-20	Enter the call or order number under which the shipment was made, if applicable. Modification numbers, e.g., provisioning order numbers, will not be entered. Leave blank if no call or order number applies.
Contract Administration ADP Point	21-26	Enter the identity code of the ADP point servicing the CAO. (The Acceptance Report is later forwarded to this point.) This is the DoDAAD Consignee Code of the CAO.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Ship To Identity	27-32	Enter the identity code of the consignee to whom the shipment was made. This is the DoDAAD Consignee Code.
Contractor Shipment Number	33-39	Enter from the DD Form 250 or 1155 the shipment number assigned to discretely identify this shipment under contract.
Contractor Shipment Number Suffix	40	Enter the alpha suffix code from the DD Form 250 or 1155; otherwise, leave blank. This code will be a Z (final shipment) or an alpha indicating a replacement shipment. (See paragraph 13-6 MILSCAP).
Exhibit Line Item or Contract Line Item Number	41-46	Enter the Basic Exhibit LI Number in pos. 41-44, if applicable. If not, enter the Basic CLIN (right-justify and prefix with zeros). Enter the corresponding Subline Item Number in pos. 45-46, if applicable; otherwise, leave blank.
Quantity Shipped	47-54	Enter the quantity documented as shipped on the DD Form 250 or 1155 (right-justify and precede with zeros).
Purchase Unit	55-56	Enter the purchase unit shown on the DD Form 250 or 1155.
National Stock Number	57-69	If an NSN is reflected on the DD Form 250 or 1155, enter the NSN. Enter manufacturer's identification number if 13 digits or less in length; otherwise, leave blank. (Management Codes appended to NSNs or to part numbers will not be entered.)

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Date Shipped	70-76	Enter the date of shipment as reflected on the DD Form 250 or 1155. This date is expressed as year-month-day IAW appendix A-76. If the shipping document indicates that the shipping date is estimated, enter an X punch in pos. 70.
Procurement Quality Assurance Site	77	If quality assurance (inspection) is to be performed at destination, enter Code D; otherwise, enter Code S.
Liquidated Damages Clause	78	If the contract contains the Liquidated Damages clause, enter the appropriate code from appendix A-75; otherwise, leave blank. This advises the consignee that acceptance action should be expedited.
Cash Discounts Stipulation	79	Enter a D if contract contains cash discount provisions; otherwise, enter N.
Transaction Status	80	Leave blank for Acceptance Alert. If this is a followup card, enter a consecutive serial number for each followup beginning with 1 for the first followup. If this is a request for corrected transaction of a previous card, enter Code E.

3. VALIDATION

a. Violations will appear on the F-85 report.

b. Content Validation

FIELD POSITION	VALIDATION	VIOLATION CODE
4-16	Alpha/numeric (no imbedded blanks or special characters).	AI
17-20	Alpha/numeric or blank.	EX

FIELD POSITION	VALIDATION	VIOLATION CODE
21-26	Alpha/numeric.	RZ
27-32	Alpha/numeric.	RZ
33-39	Alpha/numeric.	IU
41-46	Numeric, pos. 41-44, pos. 45-46 alpha/numeric or blank.	JI
47-54	Numeric, other than all zeros.	AS
55-56	Alpha, no blanks.	AN
80	Numeric, Alpha E or blank.	TU

APPENDIX B-134

ACCEPTANCE REPORT

1. This card is prepared by distribution depot and transmitted to the appropriate Contract Administration Office (CAO). The Acceptance Report may also be manually created whenever the following conditions occur:

a. A request is received for correction to a previously transmitted Acceptance Report.

b. A cancellation to previously transmitted Acceptance Report is required.

c. A materiel receipt, previously downgraded to Condition Code L, is being reclassified to issuable status, i.e., Condition Code A. In this instance an interim Acceptance Report has been transmitted earlier to indicate that acceptance will be delayed.

d. The Unit of Issue of the receipt does not agree with the Purchase Unit in the Contract Data and a conversion factor is unavailable for mechanical conversion of Purchase Unit quantity to Unit of Issue quantity.

e. Automatic preparation of an A/R, DIC PKP, could not be accomplished due to an incorrect entry of an Administering Location Code other than those present in appendix D-69 and D-70 conversion tables. Administering Location Codes are those Contract Administration Service codes reflected in DoD Regulation 4105.59-H.

2. The Automated Acceptance Report System will mechanically generate an Acceptance Report (except for conditions outlined in paragraph 1a through d above) for each procurement line item identified as requiring this activity. In addition, interim reports will be automatically prepared and transmitted whenever the following conditions occur:

a. Acceptance Delayed - In the event that inspection and/or acceptance at destination requires extensive testing or other prolonged processes, an interim Acceptance Report will be forwarded with an estimated date of acceptance. An X ove punch will be entered in pos. 66. The quantity accepted field will be zero filled. The Transaction Status Code D will be used to indicate this is an interim report. The normal Acceptance Report will be forwarded upon completion of inspection and/or acceptance.

b. Undelivered - Upon receipt of a followup request prior to the materiel being delivered, an interim Acceptance Report will be forwarded. The quantity accepted field will be zero filled and acceptance date field will be left blank. Enter an X overpunch in pos. 66. The Discrepancy Reason Code U will be assigned. The Transaction Status Code D will be used to indicate this is an interim report.

c. Acceptance Alert Not Available - DIC PKP reports will be prepared for procurement receipts requiring destination acceptance, Management Codes D or F. Acceptance Reports, DIC PKP, will also be generated for any procurement receipt reflecting an Administering Location Code (001 through 172 only) with or without a matching PMRR. These A/Rs, DIC PKP, automatically prepared via the Receipt Confirmation process, will reflect certain zero filled data fields; the shipment number, quantity shipped and purchase unit fields may be zero filled. A zero fill shipment number, together with Code E in pos. 65, will serve to indicate to the DCASR that a DD Form 250/1155 was not available at the time of receipt; therefore, the vendor shipment number and shipment number suffix was unavailable. Zero filled Purchase Unit and Quantity Shipped fields will indicate that the DIC PKP was prepared with no Automated Contract Data or via a Receipt Confirmation, DIC ZX_.

3. The following fields represent control elements for relating alerts and reports, and for discretely identifying one alert from another.

a. Procurement Instrument Identification Number

b. Call/Order Number

c. Ship to Identity

d. Contract Shipment Number

e. Contract Shipment Number Suffix

f. Exhibit Line Item or Contract Line Item Number

4. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	To manually prepare an A/R, enter ZKN (Alert Received) or ZKP (Alert Not Received). Machine prepared DIC will be ZKN or PKP, respectively.
Procurement Instrument Identification Number	4-16	Enter the 13-digit PIIN assigned to the procurement instrument against which acceptance is being reported. (An X-punch in pos. 10 indicates a cancellation of the report.)

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Call/Order Number	17-20	Enter the call or order number under which the shipment was made, if applicable. Modification numbers, e.g., provisioning order numbers, will not be entered. Leave blank if no call or order number applies.
Contract Administration ADP Point	21-26	This is the DoDAAD Consignee Code of the CAO. Enter the identity code of the ADP point servicing the CAO. (The Acceptance Report will be forwarded to this point.) NOTE: This code may be obtained from the Administering Location Code entered in the Receipt Confirmation, DIC ZV_/ZX_, or from mechanical Contract Data File IAW appendix D-69.
Ship To Identity	27-32	Enter the identity code (as reflected in the contract delivery schedule) of the consignee to whom the shipment was made. This is the DoDAAD Consignee Code.
Contractor Shipment Number	33-39	Enter from the DD Form 250 or 1155 the shipment number assigned to discretely identify this shipment under the contract. May be zero filled when no DD Form 250/1155 is received with shipment.
Contractor Shipment Number	40	Enter the alpha suffix code from the Suffix DD Form 250 or 1155; otherwise, leave blank. This code will be a Z (final shipment) or an alpha indicating a replacement shipment.
Exhibit Line Item or Contract Line Item Number	41-46	Enter the Basic Exhibit Line Item Number in pos. 41-44, if applicable. If not, enter the Basic CLIN (right-justify and prefix

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		with zeros). Enter the corresponding Subline Item Number in pos. 45-46, if applicable; otherwise, zero fill.
Quantity Shipped	47-54	Enter the quantity documented as shipped on the DD Form 250 or 1155. Right-justify and precede with zeros. May be zero filled if no DD Form 250/1155 is received with shipment.
Purchase Unit	55-56	Enter the purchase unit entered on the DD Form 250 or 1155. If no document is received, enter zeros.
Quantity Accepted	57-64	Enter only that quantity actually accepted by the destination Government representative. If this is an interim report, zero fill.
Shipment/Acceptance Discrepancy Explanation	65	Enter the appropriate code from appendix A-74 to explain the difference between the Quantity Shipped and Quantity Accepted, or the materiel is accepted when complete shipping information is not available, i.e., documentation is missing or incomplete the vendor shipment number cannot be determined. Only codes D, E, M, N, O, S, T, U, W and X are applicable. If more than one, reason for the difference unless the shipment number is zero filled. In this case, Code E is mandatory. If no discrepancy is involved, leave blank.
Actual/Estimated Acceptance Date	66-72	Enter the date that the materiel was accepted by the Government representative as indicated on the DD Form 250 or 1155 (see note). This date will be expressed as year-month-day in

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
		accordance with appendix A-76. Leave blank if materiel has not been received.
MRC Date, DIC ZKP/ZKN only	(66-69)	For manual preparation enter Materiel Receipt Card Date of materiel acceptance; e.g., 8018, or enter an estimated date of acceptance (current Julian date plus 30 days). May be left blank if undelivered or acceptance delayed. See note if item is undelivered.
Date delivered/offered	73-79	Enter the date that the materiel was delivered or offered for delivery. This date is expressed as year-month-day IAW appendix A-76. Date may be blank if undelivered or if acceptance is delayed.
Date of Receipt, DIC ZKP/ZKN only	(70-73)	Enter Date of Receipt as reflected on Completed Receipt Data. May be left blank if undelivered.
TP Control Number, DIC ZKP/ZKN only	(74-79)	Enter TP Control Number of the Completed Receipt File record IAW appendix E-094 P.
Transaction Status	80	If applicable, enter only Code A, C, D, or E from appendix A-73; otherwise, leave blank.

NOTE: If this is an interim report, punch an X punch in pos. 66. Enter estimated date materiel will be accepted when materiel acceptance is delayed; if undelivered, leave blank.

5. VALIDATION

a. Violations will be output on the F-85 report.

b. Content Validation

FIELD POSITION	VALIDATION	VIOLATION CODE
1-3	ZKN or ZKP.	AA
4-16	Alpha/numeric (no imbedded blanks or special characters, X overpunch in pos. 10 acceptable).	AI
17-20	Alpha/numeric or blank.	EX
21-26	Alpha/numeric.	RZ
27-32	Alpha/numeric.	RZ
33-39	Alpha A through Z in pos. 33-35, numeric in pos. 36-39. May be zero filled with E in pos. 65. See note 1.	IU
41-46	Numeric - pos. 41-44 numeric, and pos. 45-46 alpha/numeric.	JI
47-54	Numeric, other than all zeros. See note 2.	AS
55-56	Alpha or zero fill.	AN
57-64	Numeric, zero fill if D in pos. 80.	AS
65	Alpha D, E, M, N, O, S, T, U, W and X or blank. If E, pos. 33-39 must be zero filled.	8V
(66-69)	If DIC ZKN/PKN (pos. 1-3), pos. 66-69 may be blank or numeric with pos. 67-69 equal to or greater than 001 and less than 367. X overpunch in pos. 66 is acceptable.	HP
(70-73)	If DIC ZKN/ZKP (pos. 1-3), pos. 70-73 may be blank or numeric with pos. 71-73 equal to or greater than 001 or less than 367.	HP
(74-79)	Numeric, DIC ZKN/ZKP only. May be all zero fill.	D9
80	Alpha A, C, D, or leave blank. If D, pos. 57-64 must be zero filled.	TU

NOTE 1: A zero filled shipment number, together with an E in pos. 65 (mandatory), will indicate to the DCASR that a DD Form 250/1155 was not received; therefore, the shipment number was unavailable.

NOTE 2: The automatic preparation of a DIC PKP will permit output of an A/R with a zero filled quantity shipped field when the receipt did not reflect a PMRR. Manual preparation of DIC ZKP/N will require quantity shipped to be other than zero fill.

APPENDIX B-135

MANAGEMENT INFORMATION SYSTEM CARD

1. This card format is originated by depot personnel to reflect an increase or decrease to recorded quantities to be shown on appendix F-9, or as the medium for collecting statistics for a special study (no more than one study during the period established for these special DLA or depot projects). Computer accumulated totals will be changed by input of this card. Data on this card will be reflected in the "Cumulative Adjusted" and "Adjusted Total" columns of the printout (F-9). Adjustment entries are printed on appendix F-99.

2. Element numbers (pos. 7-12) and (pos. 7-10) keying the data to F-9 format are listed in appendix A-83.

3. Data element numbers that are adjustable are contained in appendix A-83, paragraph 3c(6) and 4c.

4. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZUM.
Blank	4-6	Leave blank.
Element Number	7-10	Enter element number of appendix A-83, paragraph 3.
	11	Enter for IPG.
	12-13	Enter manager of appendix A-83, paragraph 3.
	(7-12)	Enter element number of appendix A-83, paragraph 4.
	(13)	Leave blank.
	14	Leave blank.
Quantity	15-23	Quantity to be increased or decreased. 11X overpunch will be entered in pos. 23 to indicate minus figure. Zero fill balance of field. No special punch for increases (see note). Input must be limited to whole numbers.
Blank	24-38	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Remark	39-62	Enter appropriate reason for adjustments, e.g., requisition number, project title, and so forth For special study enter MIS description. First entry will start in pos. 39.
Date	63-66	Enter current Julian date.
Blank	67-76	Leave blank.
Functional Routing Code	77-78	Enter FRC to identify organization requesting change.
Blank	79-80	Leave blank.

NOTE: Input where decimal entry appears in appendix F-9 will adjust figures to left of decimal only, e.g.,

PC0001 MRO Short Tons Shipped, DCSC, 59.43,
ZUM Entry in pos. 15-23 00000000011
Revised PC0001 Report 70.43

5. VALIDATION

Violation rejects will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Numeric, may not be alpha/blank.	QK
8-10	Alpha/numeric.	QK
11	Numeric 1, 2, 3 or blank.	DH
12-13	Numeric 01 through 08, 10 through 14, or blank.	12
15-23	Numeric, except pos. 23 may be alpha (11 X overpunch) to indicate minus figure.	AS
39-62	Must contain data when pos. 7-13 are all 9's.	DB
77-78	Alpha/numeric, may not be blank.	E5

APPENDIX B-136

MOWASP DATA BANK TRANSACTIONS

1. This card format will be used to provide data to the Central Data Bank. Action Codes in appendix A-42 will be entered in pos. 80 to reflect action required.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CBB.
Routing Identifier Code (To)	4-6	Enter SAB.
Blank	7	Leave blank.
Federal Supply Class	8-11	Mandatory - all transactions, numeric.
National Item Identification Number	12-20	Mandatory Key - all transactions, numeric.
Reason/Violation	21-22	Coded reason for reject, appendix A-82.
Unit of Issue	23-24	Enter applicable code, appendix A-48. Mandatory with Action Code A.
Item Name	25-33	Enter Item Name.
National Motor Freight Classification Code	34-39	Enter applicable code.
LTL	40	Enter code, appendix A-49.
Hazardous Storage Compatibility Code	41-42	Enter HSCC, appendix A-33 or blank.
Blank	43	Leave blank.
Physical Security	44	Enter applicable code, appendix A-28.
NMFC Suffix Code	45	Enter applicable code.
Blank	46	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Deleted Item/Replace Code	47	Enter 0, 8, 9, or blank. See note 3.
Demilitarization Code	48	Enter applicable code, appendix A-35.
Water Commodity	49-53	Enter applicable code.
Air Commodity	54-55	Enter applicable code.
Air Cargo Dimension	56	Enter applicable code (A or Z).
Blank	57	Leave blank.
Unit of Issue Weight	58-63	See note 1.
Unit of Issue Cube	64-69	See note 2.
Shelf-Life Code	70	Enter applicable code, appendix A-47.
Prime Depot Code	71	Enter second character of RIC of Prime Depot if available.
Inventory Category Code	72	Enter applicable code.
Blank	73	Leave blank.
Exception Manager Flag	74	Enter 1 if managed by Medical; otherwise, leave blank. Code inserted by SAB only.
Special Requirements Code	75	Enter applicable code, appendix A-81.
Item Manager	76	Enter Commodity Manager Code, appendix A-44.
Routing Identifier Code (From)	77-79	Enter RIC of activity preparing card.
Action Code	80	Enter applicable action code from appendix A-42.

NOTE 1: Field represents four whole numbers and two decimal places, fill with leading zeros.

NOTE 2: Field represents three whole numbers and three decimal places, fill with leading zeros.

NOTE 3: 0 or blank = Active Item
8 = Replacement
9 = Deleted

APPENDIX B-137

MOWASP DATA BANK CHANGE NOTICE

1. This card is used to provide data from the Central Data Bank to requester or user; it is also used to request prime depot for missing data in the bank. Action codes shown in appendix A-42 will reflect action required.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CBC.
Routing Identifier Code (To)	4-6	Enter RIC of activity requesting data.
Item Status Code	7	Enter status code, appendix A-70.
Federal Supply Class	8-11	Mandatory - all transactions, numeric.
National Item Identification Number	12-20	Mandatory key - all transactions, numeric.
Reason/Violation	21-22	Coded reason for reject, appendix A-82.
Unit of Issue	23-24	Enter UI, appendix A-48.
Item Name	25-33	Enter Item Name.
National Motor Freight Classification	34-39	Enter applicable code.
LTL	40	Enter applicable code, appendix A-49.
Hazardous Storage Compatibility Code	41-42	Enter HSCC, appendix A-33 or blank.
MTMC Confirmation	43	Enter 1 if NMFC was confirmed by MTMC.
Physical Security	44	Enter applicable code, appendix A-28.
NMFC Suffix Code	45	Enter applicable code.
Blank	46	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Deleted Item/Replace Code	47	Enter 0, 8, 9, or blank. See note 3.
Demilitarization Code	48	Enter applicable code, appendix A-35.
Water Commodity	49-53	Enter applicable code.
Air Commodity	54-55	Enter applicable code.
Air Cargo Dimension	56	Enter applicable code (A or Z).
Blank	57	Leave blank.
Unit of Issue Weight	58-63	See note 1.
Unit of Issue Cube	64-69	See note 2.
Shelf-Life Code	70	Enter applicable code, appendix A-47.
Prime Depot Code	71	Enter second character of RIC of Prime Depot if available.
Inventory Category Code	72	Enter applicable code, appendix A-54.
Blank	73	Leave blank.
Exception Manager Code	74	Enter 1 or blank: 1 indicates that item is managed by Medical.
Special Requirements Code	75	Enter applicable code, appendix A-81.
Item Manager	76	Enter Commodity Manager Code, appendix A-44 if available.
Routing Identifier Code (From)	77-79	Enter RIC of activity preparing card (SAB).
Action Code	80	Enter applicable code, appendix A-42.

NOTE 1: Field represents four whole numbers and two decimal places, fill leading zeros.

NOTE 2: Field represents three whole numbers and three decimal places, fill leading zeros.

NOTE 3: 0 or blank = Active Item
8 = Replacement
9 = Deleted

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODES
8-20	NSN - The FSC pos. 8-11 numeric not all zeros, the NIIN pos. 14-20 numeric not all zeros.	AY
23-24	UI - Alpha/alpha or blank.	AN
34-39	NMFC - Numeric not all zeros or blank.	IG
40	LTL - Alpha A through Z except I and O, or blank.	IA
41-42	HSCC - Alpha/numeric as in A-33 or blank (if A1 or A2, pos. 75 must be A or blank).	IS
44	PHYSICAL SECURITY CODE - Alpha as in A-28 or blank.	MW
45	NMFC - Suffix numeric, or change to existing code not allowed.	LF
48	DEMIL - Alpha A through M except I.	XO
49-53	WCOM - Alpha/numeric, not all zeros or blank.	IC
54-55	ACOM - Alpha/numeric, not all zeros or blank.	ID
56	ADIM - Alpha or blank.	JR
58-63	UNIT WEIGHT - Numeric other than all zeros (see note 1).	IE
64-69	UNIT CUBE - Numeric not all zeros (note 2).	IF
70	SSLIND - Blank, numeric, or alpha A through S (except I and O) or X as in appendix A-47.	HB
72	INVCAT - Alpha/numeric as in A-54 or blank (see note 4).	LR

FIELD POSITION	VALIDATION	VIOLATION CODES
75	SPROMT - Alpha/numeric as in A-81 or blank (see note 5). Must be A1, A2 or blank).	LS
76	MANAGER - Alpha/numeric as in A-44 or blank.	HO
80	ACT CODE - Alpha D or E.	CF

NOTE 4: When the NSN in pos. 8-20 is a DLA managed item, only alphas H, E, L, T or U, or numeric 0, will be accepted.

NOTE 5: When the special requirements code on the locator is B and the code on the incoming CBC is blank, do not overlay the B with a blank. Only overlay the B with another valid code.

APPENDIX B-138

MOWASP DATA BANK INQUIRY

1. This card will be prepared to inquiry the Central Data Bank for missing data. Action Codes in appendix A-42 will be entered in pos. 80 to reflect action required.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CBE.
Routing Identifier Code (To)	4-6	Enter SAB.
Blank	7	Leave blank.
Federal Supply Class	8-11	Mandatory entry.
National Item Identification Number	12-20	Mandatory entry.
Violation Reason Code	21-22	Enter reason for reject, see appendix A-82.
Blank	23-76	Leave blank.
Routing Identifier Code (From)	77-79	Enter RIC of activity preparing card.
Action Code	80	Enter applicable code from appendix A-42.

2. A card in the following format will be received as a result of CBE inquiry to the MOWASP Data Bank on a non-DLA managed stock number within a DLA class.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CBE.
Routing Identifier Code (To)	4-6	Military RIC of the activity to which the response is to be transmitted.
Blank	7	Leave blank.
National Stock Number	8-20	NSN.
Violation Reason Code	21-22	Constant QA.
Integrated Manager	23-25	Constant IMM.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Blank	26	Leave blank.
Item Status Code	27	I - inactive, blank - active.
Routing Identifier Code	28-30	RIC of Integrated Manager.
Blank	31	Leave blank.
Service Indicator	32-33	Constant AF.
Blank	34	Leave blank.
Item Status Code	35	I - inactive, blank - active.
Routing Identifier Code	36-38	RIC of Air Force Manager.
Blank	39	Leave blank.
Service Indicator	40-41	Constant AR.
Blank	42	Leave blank.
Item Status Code	43	I - inactive, blank - active.
Routing Identifier Code	44-46	RIC of Army Manager.
Blank	47	Leave blank.
Army/Stop/See Indicator	48-49	Applicable to Army only, not for use by DLA activities.
Blank	50	Leave blank.
Service Indicator	51-52	Constant NA.
Blank	53	Leave blank.
Item Status Code	54	I - inactive, blank - active.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Routing Identifier Code	55-57	RIC of Navy Manager.
Blank	58	Leave blank.
Service Indicator	59-64	Constant of NA SPL.
Blank	65	Leave blank.
Special Service	66-67	Enter Navy special supply source.
Blank	69-80	Leave blank.

3. VALIDATION

a. Computer prepared output transaction of paragraph 1 does not require validation.

b. Input from Data Bank depicted in paragraph 2.

FIELD POSITION	VALIDATION	VIOLATION CODE
21-22	Stock number not DSC managed.	QA

APPENDIX B-139

MOWASP DATA BANK DELETION

1. This card will be prepared to delete user registration or by the Data Bank Custodian to delete an entire record.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CBD.
Routing Identifier Code (To)	4-6	Enter SAB.
Blank	7	Leave blank.
FSC	8-11	All numeric, mandatory.
NIIN	12-20	All numeric, mandatory.
Violation Reason Code	21-22	Violation Reason Code, appendix A-82.
Blank	23-76	Leave blank.
Routing Identifier Code (From)	77-79	Enter RIC of activity preparing card.
Action Code	80	Enter G, to delete user registration, X to be entered by Custodian to delete entire record.

APPENDIX B-140

DAAS INQUIRY

1. This card format is utilized to request Item Manager Coding from Defense Automatic Addressing System (DAAS). Inquiry to DAAS will normally be made by MOWASP Data Bank. Defense depots may prepare inquiry to DAAS if Data Bank inquiry is not utilized.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter QUE.
Routing Identifier Code (To)	4-6	Enter RIC of activity requesting data.
Blank	7	Leave blank.
National Stock Number	8-20	Enter NSN for which Item Manager code is being requested.
Blank	21-80	Leave blank.

APPENDIX B-141

DAAS INQUIRY REPLY

1. This card will contain the reply from DAAS inquiry. This card will enter MOWASP and:

a. If the Integrated Manager is within DLA, the Depot locator will be automatically updated with the manager on the reply.

b. If the Integrated Manager is outside of DLA, the Locator Prime Tag will be changed to 9 (non-DLA), DIC will be changed to CBE and it will appear on the F-85 report for manual action with the message CONVERTED QUR.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter QUR.
Routing Identifier Code	4-6	Enter RIC of activity requesting the data.
Blank	7	Leave blank.
National Stock Number	8-20	Enter NSN.
Integrated Manager	21-22	Enter constant IM.
Blank	23	Leave blank.
Item Status Code	24	Enter: Active = blank, Inactive = I
Routing Identifier Code	25-27	Enter RIC of Integrated Manager.
Blank	28	Leave blank.
Service Indicator	29-30	Enter constant AF.
Blank	31	Leave blank.
Item Status Code	32	Enter: Active = blank, Inactive = I
Routing Identifier Code	33-35	Enter RIC of Air Force Manager.
Blank	36	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Service Indicator	37-38	Enter constant AR.
Blank	39	Leave blank.
Item Status Code	40	Enter: Active = blank, Inactive = I
Routing Identifier Code	41-43	Enter RIC of Army Manager.
Blank	44	Leave blank.
Army STOP/See Indicator	45-46	Enter for Army only, not for DLA activity.
Blank	47	Leave blank.
Service Indicator	48-49	Enter constant NA.
Blank	50	Leave blank.
Item Status Code	51	Enter: Active = blank, Inactive = I
Routing Identifier Code	52-54	Enter RIC of Navy Manager.
Blank	55	Leave blank.
Special Navy Indicator	56-61	Enter constant NA-SPL.
Blank	62	Leave blank.
Special Source	63-64	Enter Commodity Code for special Navy source of supply.
DAAS FSC Source Designator	65	Alpha designator of source of FSC in pos. 66-69; I = IMM, A = Army, F = Air Force, N = Navy, Blank = None.
Federal Supply Class	66-69	Enter FSC recorded in DAAS File.
Blank	70-80	Leave blank.

APPENDIX B-142

MOFAST PARTIAL OR OFFER PROCESS FOR DEPMEDS

1. PURPOSE

The input-output formats contained in this appendix will reflect the data elements that an operator is required to enter to initialize the MOFAST Partial or Offer Process for DEPMEDS.

2. REFERENCES

Appendix E-080 P

3. DATA ELEMENTS

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
Action Code	1	A	O = Offer. P = Partial. C = Cancel DEPMEDS.
Shipment Unit	7, 13	N	Enter shipment unit number.
Check Digit	1	N	Enter SU check digit.
Final Code	1	A	Must be F or blank.

APPENDIX B-143

MEDALOC SHIPMENT INQUIRY

1. PURPOSE

This process operates in an on-line environment to inquire the MEDALOC shipment file.

2. REFERENCES

Appendix E-058 P
Appendix F-057

3. DATA ELEMENTS

Data elements required to make an inquiry to the MEDALOC shipment files.

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
Enter Option	2	A	PD - Pallet File Inquiry. PM - Pallet File Inquiry. SD - Cons File Inquiry. SM - Cons File Inquiry. SR - CDP File Inquiry.

APPENDIX B-145

SUSPENDED RECEIPT FILE MAINTENANCE CARD

1. The Suspended Receipt File Maintenance Card is originated by Receiving Division to modify data elements in Suspended Receipt File Records. The use of this card will be limited primarily to correcting erroneous data elements in established records after materiel has been turned over to storage division for stowage. Only one data element may be changed in each card input.

2. The File Maintenance Card will not be used to modify NIIN or condition code. These elements can be changed only by deleting the Suspended File Record and entering a new Type A inquiry for the receipt or in the case of condition code, may be modified in the Receipt Confirmation Card. Receiving Division will prepare the Suspended Receipt File Maintenance Card IAW appendix E-162 P. The following entries apply:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZZR.
Teleprocessing Control	4-9	Enter the 6-position number assigned by the computer on the Receipt Control Document.
New Data	10-23	Enter new data element to be entered in the file record corresponding to the Action Code in pos. 79-80 (left-justify leave trailing positions blank). The data element will be deleted if this field is left blank. Only the following data elements may be deleted: Type Pack Supplementary Address Management Code Supplemental PIIN Shipment Number/Shipment Number Suffix Code Project Code Ownership/Purpose Code Signal/Fund Code Distribution Code Suffix Code
Blank	24-76	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Functional Routing Code	77-78	Enter code applicable to the originating activity.
Action Code	79-80	Enter the Action Code to accomplish desired change as follows: HB - RIC (To) HD - Type Pack Code HE - Unit of Issue HF - PIIN/Document Number HG - Line Item HH - Signal/Fund Code HJ - Distribution Code HK - Project Code HL - Ownership/Purpose Code HN - Management Code HP - Supplementary PIIN HQ - Weight HR - Quantity HS - Suffix HT - FSC HU - Supplemental Address HV - Discrepancy Code HW - Shipment Number/Shipment Number Suffix Code HX - Date Received

3. VALIDATION

a. Violations will appear on appendix F-85 report.

b. Content Validation:

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
4-9	All numeric greater than nine. Check will be made for transposed digits; if transposed, will reject.	D9

FIELD POSITIONS	VALIDATION	VIOLATION REASON CODE
10-23	Validation will correspond to the Action Code in pos. 79-80. Data element identified by a specific Action Code entry will be validated as the corresponding elements described in appendix B-108/109 or or B-41. If Action Code is HD, HH, HK, HL, HP, HS, HU, HN, HJ, or HW may be all blank. Action Code HD may not be used to blank Type of Pack if the Item Manager for receipt is S/U.	--
79-80	HB, HD, HE, HF, HG, HH, HJ, HK, HL, HM, HP, HR, HS, HT, HU, HV, HW, HX.	CF

c. Processing violations are shown in appendix D-95.

APPENDIX B-146

SUSPENDED RECEIPT FILE INQUIRY

1. The Suspended Receipt File Inquiry will be used to obtain a printout of individual Suspended Receipt Records or the complete file, as required. Entry of the inquiry will result in printout of an F-247 report the day after the inquiry is processed. Procedures for processing inquiries appear in appendix E-165 P.

2. The following entries apply:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZZQ.
Teleprocessing Control Number	4-9	Enter TP Control Number of record desired if Action Code in pos. 79-80 is HX.
National Item Identification Number	10-18	Enter NIIN for Suspended Receipt Record(s) desired if Action Code in pos. 79-80 is HY.
Blank	19-76	Leave blank.
Functional Routing Code	77-78	Enter the code applicable to the activity originating the inquiry.
Action Code	79-80	Enter applicable code as follows: HX - For printout of one record identified by the TP Control Number in pos. 4-9. HY - For printout of all records matching the NIIN in pos. 10-18. HZ - For printout of the complete Suspended Receipt File.

3. VALIDATION

a. Violations will appear on the appendix F-85 report.

b. Content Validation

FIELD POSITION	VALIDATION	VIOLATION REASON CODE
4-9	Must be all numeric greater than nine if Action Code HX; otherwise, blank.	D9
10-18	Must be all numeric or numeric with alpha A, B, J, L, or S in pos. 12, if Action Code in pos. 79-80 is HY; otherwise, blank.	AY
79-80	HX, HY or HZ.	CF

APPENDIX B-147

TYPE P REMOTE PREPOSITIONED MATERIEL RECEIPT FILE INQUIRY

1. The Type P Inquiry will be entered through a remote keyboard. The response provided from the Prepositioned Materiel Receipt (PMR) file will be printed at the terminal from which the inquiry originated. Procedures for processing inquiries appear in appendix E-061 P.

2. The following entries apply:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Identifier Code	1	Enter P.
National Item Identification Number	2-9	Enter NIIN being inquired.
Procurement Instrument Identification Number (PIIN) or Document Number	13-14	If a specific PMR record is desired enter PIIN or Document Number; otherwise, leave blank.

3. VALIDATION

a. Violations will be indicated by printing of error messages at the terminal from which the inquiry originated.

b. Content Validation

ENTRY POSITION	VALIDATION	VIOLATION REASON CODE
2-10	Must be all numeric except for position four which may be alpha A, B, J, L or S.	AY
11-24	Alpha/numeric or blank.	AI

APPENDIX B-148

TYPE R SUSPENDED RECEIPTS FILE MAINTENANCE INPUT

1. The Type R input provides a means to modify data elements in the Suspended Receipt File via remote keyboard.

2. This remote input may not be used to modify NIIN or condition code (see appendix B-145). Receiving Division will prepare the maintenance update IAW appendix E-162 P.

3. The following entries apply.

FIELD LEGEND	NO. OF CHAR.	EXPLANATION/INSTRUCTIONS
Identifier Code	1	Enter R IAW appendix E-194 P.
Teleprocessing Control Number	6	Enter the 6-position number assigned on the Receipt Control Document.
Action Code	2	Enter the Action Code desired to accomplish the desired change: HB - RIC (To) HD - Type Pack Code HE - Unit of Issue HF - PIIN/Document Number HG - Line Item HH - Signal/Fund Code HJ - Distribution Code HK - Project Code HL - Ownership/Purpose Code HN - Management Code HP - Supplementary PIIN HQ - Weight HR - Quantity HS - Suffix HT - FSC HU - Supplemental Address HV - Discrepancy Code HW - Shipment Number/Shipment Number Suffix Code HX - Date Received
New Data	14 (max)	Enter data elements (related to action to be changed). The data element may be deleted by selecting the appropriate action code and leaving the new data field blank. Note: only the following data elements may be deleted.

FIELD LEGEND	NO. OF CHAR.	EXPLANATION/INSTRUCTIONS
		Type Pack Management Code Supplemental PIIN Shipment Number/Shipment Number Suffix Code Project Code Ownership/Purpose Code Signal/Fund Code Distribution Code Suffix Code

4. VALIDATION

a. Violations will be indicated by printing the VRCs at the terminal of input origin.

b. Content validation

ENTRY POSITION	VALIDATION	VIOLATION REASON CODE
TP Number	All numeric greater than nine. Check will be made for transposed digits; if transposed, will reject.	D9
Action CD	HB, HD, HE, HF, HG, HH, HJ, HK, HL, HN, HP, HQ, HR, HS, HT, HU, HV, HW, HX.	CF
New Data	Validation will correspond to the Action Code. Data element identified by a special Action Code entry will be validated as the corresponding elements described in appendix B-109. If Action Code is HD, HH, HJ, HK, HL, HN, HP, HS, HU or HW, may be all blanks.	

NOTE: HD may not be used to blank a valid Type Pack field if the Item Manager is S/U.

APPENDIX B-149

FREIGHT DESCRIPTION - NMFC DATA ENTRY FORMAT

1. This format is used to maintain the Freight Description File with valid information relative to MTMC approved NMFC Codes. It is produced as a result of on-line additions, changes or deletions to the Freight Description File by user depots and transceived via AUTODIN to the Freight Description Manager for edit, who in turn, broadcasts the data to all user FDFs when such data are valid.

2. Data Elements used in this format are as follows:

a. NMFC Header Record

FIELD LEGEND	FIELD POSITIONS	TYPE DATA	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	A	DIC CBM is assigned by the computer process to transmit data between the FDM and user depots.
Routing Identifier (To)	4-6	A/N	RIC per DoD Regulation 4140.17M, Supplement 1.
National Motor Freight Classification (NMFC) Code	7-12	N	MTMC approved 6-position NMFC Code.
LTL Key	13	A	
Record Sequence	14	A	
Blank	15		Leave blank.
Transportation Mode	16	A/N	Transportation mode for applicable Freight Description per appendix A-17.
Action Code	17	A	A - Add new record. C - Change existing record. D - Delete record. S - Suspense.
Card Sequence	18-19	N	

FIELD LEGEND	FIELD POSITIONS	TYPE DATA	EXPLANATION/INSTRUCTIONS
Uniform Freight Classification (UFC) and Suffix	20-27	A/N	Valid UFC code. pos. 20 - U pos. 21-27 -Numeric or Zero filled when not required, no blank.
Commodity Indicator	28	A	T - Tariff M - Mode C - Tariff and Mode Blank when mode or tariff descriptions are not required.
LTL Code	29	A/N	Applicable code per appendix A-49 for NMFC description.
NIIN Scan Indicator	30	A	G - NIIN Description required. M - NIIN/Mode Description required. Blank when NIIN Description not required.
Density	31-36	N	High density (pounds/feet 3) parameter. Blank when not applicable. To identify an NMFC record group containing density description, enter a 9 in the first data field in the basic NMFC record, i.e., 00 in the suffix.
Value Clause Amount	37-42	N	Value amount. Assumed decimal (i.e., $999.99 is entered as 999999). Blank when not applicable.
Sequence Flag	43	A	

FIELD LEGEND	FIELD POSITIONS	TYPE DATA	EXPLANATION/INSTRUCTIONS
Delete Date	44-48	N	Date record is to be dropped from file. Use with Action Code D only. Blank when N/A.
Blank	49-66		Blank.
Routing Identifier (From)	67-69	A/N	RIC of depot forwarding Freight Description.
Date	70-74	N	Julian date transceived.
Time	75-80	N	Military time transceived including hours, minutes and seconds.

b. NMFC Description Record

FIELD LEGEND	FIELD POSITIONS	TYPE DATA	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	A	Enter CBM.
Routing Identifier (To)	4-6	A/N	RIC per DoD Regulation 4140.17M, Supplement 1.
National Motor Freight Classification	7-12	N	MTMC approved 6-position NMFC Code.
LTL Key	13	A	
Record Sequence	14	A	
Blank	15		Leave blank.
Transportation Mode	16	A/N	Transportation mode for applicable Freight Description per appendix A-17.
Action Code	17	A	A - Add new record. C - Change existing record. D - Delete record. S - Suspense.
Card Sequence	18-19	N	Line of Freight Description information. Enter 01-10, no blanks.

FIELD LEGEND	FIELD POSITIONS	TYPE DATA	EXPLANATION/INSTRUCTIONS
Blank	20-22	A/N	Blank.
Freight Description	23-62		In-the-clear Freight Description.
Blank	63		Blank.
Routing Identifier (From)	67-69		
Date	70-74		Julian date transceived.
Time	75-80		Military time transceived including hour, minute, second.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
7-12	Duplicate NMFC.	UI
18	Action Code not A, C, D or S.	CF

APPENDIX B-151

MOFAST PARTIAL LINE DELETE FORMAT

1. PURPOSE

To describe the CRT format used to cancel a 13-position SU number and close the SU/LI record.

2. REFERENCES

a. Appendix D-138.

b. Appendix E-169 P.

3. DATA ELEMENTS

FIELD LEGEND	NO. OF CHAR	TYPE	EXPLANATION/INSTRUCTIONS
Shipment Unit Number	13	N	MRO (DD Form 1348-1).
Field Separator	1	A/N	Must be a comma.
Check Digit	1	N	MRO (DD Form 1348-1).

APPENDIX B-152

MATERIEL RECEIPT DETAIL CARD FOR ARMY CCP

1. This card format is used to provide receipt detail data on each MRO shipped to Army and DLA MEDALOC Container Consolidation Points (CCP) of the Direct Supply Support System (DSS). Cards are formatted and output as a product of the shipment confirmation process and entered into the Defense Automated Addressing System (DAAS) for transmittal directly to the CCP identified by the Routing Identifier Code.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CDF (DWA data).
Routing Identifier (To)	4-6	Enter RIC of recipient CCP.
National Stock Number	7-19	NSN of the item shipped.
Priority	20-21	Enter priority code from MRO.
Shipment Indicator	22	Partial/final shipment indicator. Enter F when final shipment; enter P when MRO data indicate partial shipment. Leave blank on ALOC shipments.
Unit of Issue	23-24	Enter UI for item shipped.
Quantity Shipped	25-29	Enter quantity of item shipped.
Document Number	30-44	Enter document number of MRO.
Transportation Control Number	45-61	Enter TCN assigned to SU.
Fund Code	62-63	Enter Fund Code from MRO.
Project Code	64-66	Enter Special Project Code from MRO.
Routing Identifier (From)	67-69	Enter Routing Identifier Code of shipping depot.
Distribution Code	70	Enter Distribution Code from MRO.
Supplementary Address	71-76	Enter Supplementary Address from MRO.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Mode of Shipment	77	Enter Mode of Shipment.
RIC of Commodity Manager	78-80	Enter Routing Identifier Code of Commodity Manager from MRO.

3. VALIDATION

This is a computer prepared transaction.

APPENDIX B-153

TRANSPORTATION MOVEMENT DATA FOR ARMY CCP

1. This card format is used to provide TCMD data on each shipment unit shipped to Army and DLA MEDALOC Container Consolidation Points (CCP) of the Direct Supply Support System (DSS). Cards are formatted and output as a product of the shipment confirmation process and entered into the Defense Automated Addressing System (DAAS) for transmittal directly to the CCP identified by the Routing Identifier Code.

2. There are two cards necessary for data transmittal:

a. DIC CDP which contains data similar to that contained in the T_4 TCMD card.

b. DIC CDY/CBF which duplicates data contained in the T_9 TCMD card (see appendix B-154 or appendix B-155).

3. The following are the fields in the transaction format:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CDP (T_4 data).
Routing Identifier (To)	4-6	Enter RIC of CCP.
Consignor DoDAAC	7-12	Enter DoDAAC of shipping activity. SW3102 if DDMP. SW3201 if DDTC.
MEDALOC Shipment Only:		
Blank	13-15	Leave blank
Air Commodity Code	16-17	Air Commodity Code of Materiel Shipped (Predominant Air Commodity based on weight).
Water Commodity Code	(13-17)	Water Commodity Code of materiel shipped.
Consignee DoDAAC	18-23	DoDAAC of ultimate consignee.
MILSTAMP Type Pack Code	24-25	Shipment Unit Type pack code of materiel. If consolidated pack use CP. If more than one type pack code in the shipment unit use MX.
Transportation Account Code	26-29	TAC of materiel shipped.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Transportation Control Number	30-46	TCN of the shipment unit.
Pieces	47-50	Total pieces in which SU is contained.
Weight	51-55	Total Weight of the SU.
Cube	56-59	Total cube of the SU. Round decimal cube from SU Record to next higher whole number.
Required Delivery Date	60-62	Earliest RDD of MROs in SU or blank.
Date Shipped	63-65	Date SU is shipped.
Blank	66	Leave blank.
Routing Identifier Code (From)	67-69	RIC of consigning activity.
GBL Number	70-77	GBL number on which SU is shipped.
Blank	78-80	Leave blank.

4. VALIDATION

This is a computer prepared transaction.

APPENDIX B-154

TRANSPORTATION MOVEMENT DATA FOR ARMY CCP (REMARKS)

1. This card format is used to provide TCMD in-the-clear remarks data on each shipment unit shipped to Army Container Consolidation Points (CCP) of the Direct Supply Support System (DSS). Cards are formatted and output as a product of the shipment confirmation process and entered into the Defense Automated Addressing System (DAAS) for transmittal directly to the CCP identified by the Routing Identifier Code.

2. This card is the "trailer" card used in conjunction with the CDP document (see appendix B-153) when in-the-clear remarks describing the shipment are necessary. It is similar in content to the T_9 TCMD card. The first 46 field positions duplicate the data of the matching CDP card. Multiple cards may be produced to accommodate remarks data.

3. The following are the fields in the transaction format:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	CDY (TX9 data).
Routing Identifier Code (To)	4-6	RIC of CCP.
Consignor DoDAAC	7-12	DoDAAC of shipping activity.
Water Commodity Code	13-17	Water Commodity Code of materiel shipped.
Consignee DoDAAC	18-23	DoDAAC of ultimate consignee.
MILSTAMP Type Pack Code	24-25	Type pack coded of materiel.
Transportation Account Code	26-29	TAC Code of materiel shipped.
Transportation Control Number	30-46	TCN of the shipment unit.
Remarks	47-78	In-the-clear description of shipment data.
Card Sequence	79-80	Serial sequence of cards formatted.

4. VALIDATION

This is a computer prepared transaction.

best copy available

APPENDIX B-155

TRANSPORTATION MOVEMENT DATA FOR ARMY CCP
(HAZARDOUS REMARKS)

1. This card format is used to provide TCMD in-the-clear hazardous commodity NMFC descriptions on shipment units shipped to Army Container Consolidation Points (CCP) of the Direct Supply Support System (DSS). Cards are formatted and output as a product of the shipment confirmation process and entered into the Defense Automated Addressing System (DAAS) for transmittal directly to the CCP identified by the Routing Identifier Code.

2. This card is the "trailer" card used in conjunction with the CDP document (see appendix B-153) when in-the-clear hazardous commodity descriptions of the shipment are necessary. It is similar in content to the TJ9 TCMD card. The first 46 field positions duplicate the data of the matching CDP card. Multiple cards may be produced to accommodate all remarks data.

3. The following are the fields in the transaction format:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	CBF (TJ9 data).
Routing Identifier (To)	4-6	RIC of CCP as follows: New Cumberland Army Depot PA - AN5 Sharp Army Depot CA - AQ5
Consignor DoDAAC	7-12	DoDAAC of shipping activity.
Water Commodity	13-17	Water Commodity Code of materiel shipped.
Consignee DoDAAC	18-23	DoDAAC of ultimate consignee.
MILSTAMP Type Pack	24-25	Type pack code of materiel.
Transportation Account Code	26-29	TAC Code of materiel shipped.
Transportation Control Number	30-46	TCN of the shipment unit.
Remarks	47-78	In-the-clear hazardous materiel description.
Card Sequence	79-80	Serial sequence of cards formatted.

4. VALIDATION

This is a computer prepared transaction.

APPENDIX B-156

CARRIER/RIN STATEMENT MAINTENANCE

1. PURPOSE

This file provides the capability to print carrier instructions, carrier discount statements, and Routing Instructions Notes (RIN) on the bill of lading automatically. A complete printout of the file is available in appendix F-194, part 10.

2. REFERENCES

a. Appendix E-196 P.

b. Appendix F-194, part 10.

3. DATA ELEMENTS

FIELD LEGEND	NO. OF POS.	TYPE	SOURCE/EXPLANATION
Action Code	1	A	Must be: I=Inquiry, A=Add, D=Delete U=Update.
Type Statement	1	A	Must be: C=Carrier Statement, R=RIN Statement.
Code	3	A/N	If used with Type Statement Code C, a locally assigned number that relates to a carrier's instructions. If used with Type Statement Code R, it relates to RIN found in DLAR 4500.3.
Carrier/RIN Statement	300	A/N	Type up to six lines, 50 characters each line, the statement desired.

APPENDIX B-158

RECONCILIATION - DELETED LOCATION INQUIRY CARD

1. This card may be originated by DS/T and is used to inquire the deleted location file prior to release of a denial. This card is created as an internal transaction from denials processed and is used to generate the F-269 listing.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DIC ZAF.
Blank	4-7	Leave blank.
National Stock Number	8-20	Enter applicable NSN.
Blank	21-76	Leave blank.
Functional Routing Code	77-78	Enter applicable FRC.
Blank	79-80	Leave blank.

APPENDIX B-159

DSC/DEPOT RECONCILIATION TAPE FORMAT

1. This appendix portrays the format of records provided by DSCs for the purpose of locator reconciliation.

2. All unused quantities in trailer records will be zero filled.

3. All quantities are right-justified with leading zeros.

4. Enter First Record of First Reel.

5. The following fields are in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Record Identification	1	Enter constant 1.
Asset	2-6	Enter constant SAMMS.
Blank	7	Leave blank.
Data	8-11	Enter constant WESP.
Blank	12	Leave blank.
Constant D	13	Enter constant D.
DSC Indicator	14	Enter C, E, G, I, M, S or T as applicable.
Constant SC	15-16	Enter constant SC.
Blank	17-20	Leave blank.
Routing Identifier Code (To)	21-23	Enter applicable defense depot.
Blank	24	Leave blank.
Date	25-29	Two-digit year and three-digit Julian date.
Blank	30-81	Leave blank.

a. Record formats and data element for Header Record Content as follows:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Record Identification	1	Enter constant 1.
National Stock Number	2-14	Enter NSN.
Unit of Issue	15-16	Enter UI.
Inventory Category Code	17	Enter Inventory Category Code.
Issue Standard Price	18-26	Enter unit price.
Backorder Indicator	27	Enter 1 if backorder is recorded, 0 if not.
Decap Indicator	28	Enter D for Log Loss items, NIR Key Code DX or DZ; C for Log Gain item, NIR Key Code PG; or leave blank.
Maximum Release Quantity	29-33	Enter MRQ.
Date of Last Activity	34-37	Enter Date of Last Activity.
Due-In Indicator	38	Enter 1 if Due-In is recorded, 0 if not.
Nomenclature	39-57	Enter Federal Item Name.
Shelf-Life Code	58	Enter Shelf-Life Code.
1st Quantity Field	59-69	
Purpose Code	(59)	Enter Purpose Code.
Condition Code	(60)	Enter Condition Code.
Type Pack Code	(61)	Enter Type Pack Code.
Stock-On-Hand Quantity	(62-69)	Enter Quantity for this Purpose, Condition, and Type Pack Code.
2nd Quantity Field	70-80	Same as first quantity field.
Physical Security Classification Pilferage Code	81	Enter Physical Security Classification and Pilferage Code (appendix A-28).

b. Trailer Records (if required):

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Record Indicator National Stock Number	1	Enter constant 2.
National Stock Number	2-14	Enter NSN.
Blank	15-23	Leave blank.
3rd Quantity Field	24-34	Same as first quantity field.
4th Quantity Field	35-45	Same as first quantity field.
5th Quantity Field	46-56	Same as first quantity field.
6th Quantity	57-67	Same as first quantity field.
7th Quantity Field	68-78	Same as first quantity field.
Blank	79-80	Leave blank.

If additional records needed, use Record Indicator 2 in pos. 1.

c. Last Record of Last Reel

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Record Indicator	1	Enter constant 1.
Constant (15) Nines	2-16	Enter 15 9's.
Header Record 1 Counter	17-24	Enter total number of Record Identifier 1.
Trailer Record 2 Counter	25-32	Enter total number of Record Identifier 2.
Blank	33-81	Leave blank.

APPENDIX B-160

ACTIVITY ADDRESS INDIVIDUAL LINE CHANGE

1. This input allows update to address records which are on the file. One address line for the indicated Type Address Code may be changed. This change may be made using CRT or transaction format.

2. REFERENCES

a. Appendix D-96.

b. Appendix E-129 P.

3. The following are the fields in the transaction.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier	1-3	Enter ZNZ.
Activity Address Code	4-9	Enter AAC as recorded in Address File.
Type Address Code	10	Enter TAC to be changed.
Line Number	11	Enter line number to be changed.
Address Data	12-46	Enter new address data.
Blank	47-80	Leave blank.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
4-9	If not on file.	LY
10	Must be 1, 2, 3, 5, 6, 7, M, A, B, C and G. If not on file.	GB 4B
11	Must be 1 through 7.	PB
12-80	No edit.	

APPENDIX B-161

CUSTOMER COMPLAINT DATA CARD (CD1)

1. This procedure defines the Document Identifier Code (DIC) CD1 card format, which is one of four card formats used to transmit customer complaint data between the DSC/ICP and the user depot (see appendices B-162, B-163 and B-292). The DIC CD1 card format is generated when the DSC/ICP enters a Customer Complaint to the system. It is used to request depot investigation of a complaint, or as a followup when CD2 investigation results data have not been received from the depot within the prescribed timeframes.

2. On receipt at the depot, a card image of the transaction will appear on the F-150 Report, Part 1, CD1/CD3/CD4 Activity List, and will also be inquireable via program $$UWTM01 (appendix E-092) ICP-FILE inquiry option.

3. DIC CD1 card format sample follows. The field legends correspond to field titles shown in the ICP-FILE display, program $$UWTM01 application.

FIELD LEGEND	FIELD POS.	NO. TYPE CHARACTER	EXPLANATION/INSTRUCTIONS
ICP-CD1	1-3	3 A/N	Document Identifier Code CD1.
RIC TO	4-6	3 A/N	Routing Identifier Code To. Not shown in ICP-FILE display.
CNTRL-NO-ICP	7-15	9 A/N	CDCS Control Number (assigned by the Center).
STOCK/PART-NBR	16-28	13 A/N	National Stock Number or Part Number of discrepant item.
Followup	29	1 N	Number of Followup requests per specific complaint (optional entry).
DEP-ACTN-CD	30	1 A	Depot Action Code A = No depot action required. Information only. B = Furnish shipping data. C = Initiate tracer action. D = Furnish supply documentation. E = Offline instructions to follow. F = Furnish asset availability.
DOL-VAL-ROD	31-36	6 N	Total dollar value of item.
DOC/SFFX-NBR	37-51	15 A/N	Document and suffix number of discrepant item.

FIELD LEGEND	FIELD POS.	NO. TYPE CHARACTER	EXPLANATION/INSTRUCTIONS
CMPL/SHIP-DTE	52-55	4 N	Complaint (year and month) or ship date (Julian date) of discrepant item.
RIFR	56-58	3 A/N	Routing Identifier Code of center generating data (appendix A-2).
DISCR	59-60	2 A/N	Discrepancy Code (appendix A-3).
TP-DOC	61	1 A/N	Type of Document Code (appendix A-6).
Blank	62	1	Field position not used.
MODESHP	63	1 A/N	Mode of Shipment Code (appendix A-17).
GBL/TCN/CONTRACT-NBR	64-80	17 A/N	Bill of Lading Number, Transportation Control Number or Contract Number.

4. VALIDATION

Violations will appear on appendix F-150 part 1 CD1/CD3/CD4 Activity List.

FIELD POSITION	VALIDATION	VIOLATION MESSAGE
1-3	3 A/N	INVALID DOC-ID
7-15	9 A/N	INVALID CONTROL NUMBER
30	1 A	INVALID ACTION CODE
31-36	6 N	INVALID DOLLAR VALUE
37-51	15 A/N	INVALID DOCUMENT NUMBER
52-55	4 N	INVALID SHIP DATE
63	1 A/N	INVALID MODE OF SHIPMENT

NOTE: If any of these violations occur, records will have to be retransmitted from the center. Notify responsible DSC of these violations.

APPENDIX B-162

CUSTOMER COMPLAINT INVESTIGATION RESULTS CARD (CD2)

1. This procedure defines the Document Identifier Code (DIC) CD2 card format, which is one of four card formats used to transmit customer complaint data between the DSC/ICP and the user depot (see appendices B-161, B-163 and B-292). The CD2 functions as a response to the DSC/ICP-generated CD1 request for data/materiel investigation or research, and is created by user depot operator input of investigation results data via program $$UWTM01 (appendix E-092 P) for transmission back to the DSC/ICP.

2. DIC CD2 card format sample follows with brief instructions for field update. The field legends correspond to field titles shown in the ICP-FILE display, program $$UWTM01 application.

FIELD LEGEND	FIELD POS.	NO. TYPE CHARACTER	EXPLANATION/INSTRUCTIONS
ICP-CD2	1-3	3 A/N	Program generated Document Identifier Code. No operator input required.
RIC TO	4-6	3 A/N	Program generated Routing Identifier Code. No operator input required.
CNTRL-NO-ICP	7-15	9 A/N	Program generated CDCS Control Number. No operator input required.
INVSTGTN-RSLT-CD	16	1 A	Enter the appropriate Investigation Results Code from appendix A-96. Mandatory entry.
MODESHP	17	1 A/N	Enter the appropriate Mode Code from appendix A-17.
SHPD-DT	18-21	4 N	Enter date discrepant materiel was shipped (Julian date).
CBL/GBL/UPS	22-32	11 A/N	Enter the Bill of Lading Number of the descrepant shipment.
TCN	33-49	17 A/N	Enter the Transportation Control Number of the discrepant materiel.
SCAC	50-53	4 A/N	Enter the appropriate Standard Carrier Alpha Code from the National Motor Freight Classification (NMFC).

FIELD LEGEND	FIELD POS.	NO. TYPE CHARACTER	EXPLANATION/INSTRUCTIONS
PCS	54-56	3 N	Enter the total number of pieces in the discrepant shipment.
WGT	57-61	5 N	Enter the total weight of the discrepant shipment.
CBE	62-66	5 N	Enter the total cube of the discrepant shipment. The last two digits are decimals to the hundredth place.
RIC FROM	67-69	3 A/N	Program generated. No operator input required.
Blank	70-80		Field positions not used. No corresponding field in the ICP-FILE display.
TRANSCEIVE-ICP-CD2*	-	1 A	Enter an X when it is desired to transceive CD2 record to Center.
FUNCT-ROUTING*	-	2 A	Enter functional routing code to request an MRO history of discrepant item.

*These fields are included in the ICP-/FILE display for the depot's use, but are not transmitted to the center with the record.

APPENDIX B-163

CUSTOMER COMPLAINT DISPOSITION AND CLOSEOUT CARD (CD3)

1. This procedure defines the Document Identifier Code (DIC) CD3 card format, which is one of four card formats used to transmit customer complaint data between the DSC/ICP and the user depot (see appendices B-161, B-162 and B-292). The DIC CD3 card format is generated by the ICP/DSC in response to the depot's CD2 transaction. It provides the user depot with instructions for disposition of the discrepant materiel.

2. On receipt at the depot, a card image of the transaction will appear on the F-150 Report, Part 1, CD1/CD3/CD4 Activity List, and will also be inquireable via program $$UWTM01 (appendix E-092) ICP-FILE inquiry option.

3. DIC CD3 card format sample follows. The field legends correspond to field titles shown in the ICP-FILE display, program $$UWTM01 application.

FIELD LEGEND	FIELD POS.	NO. TYPE CHARACTER	EXPLANATION/INSTRUCTIONS
ICP-CD3	1-3	3 A/N	Document Identifier Code CD3.
RIC TO	4-6	3 A/N	Routing Identifier Code To. Not shown in ICP-FILE display.
CNTRL-NO-ICP	7-15	9 A/N	CDCS Control Number (Assigned by the Center).
Blank	16	-	Field position not used.
DISPSN-CO	17-18	2 A	Disposition Code (appendix A-95).
Blank	19-55	-	Field positions not used.
RIC FROM	56-58	3 A/N	Routing Identifier Code From. Not shown in ICP-FILE display.
Blank	59-80	-	Field positions not used.

4. VALIDATION

Violations will appear on appendix F-150 part I CDI/CD3/CD4 Activity List.

FIELD POSITION	VALIDATION	VIOLATION MESSAGE
7-15	9 A/N	INVALID CONTROL NUMBER
17-18	2 A	INVALID DISPOSITION CODE

APPENDIX B-164

TRANSACTION HISTORY/CUSTODIAL BALANCE REQUEST

1. This card is a request for transaction history from the ICP to the Storage Activity. This transaction will not be available until DWASP is implemented.

2. Type of Physical Inventory/Transaction History Codes are provided to permit identification of the types of inventories and/or to indicate custodial balance and transaction history transmission requirements.

3. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DZJ.
Routing Identifier Code (To)	4-6	Enter the RIC identifying the storage activity to which the request is being forwarded.
Type of Physical Inventory/ Transaction History Code	7	Enter the applicable type of Physical Inventory/Transaction History Code for the data being requested.
National Stock Number (NSN)	8-20	Enter the NSN of the item for the history/balance being requested.
Blank	21-22	Leave blank.
Unit of Issue (UI)	23-24	Enter the UI of item for the history/balance being requested.
Transaction History Time Frame	25-31	Enter data specifying the period for which Transaction History is being requested. Leave blank when Code Z is entered in pos. 7. Enter Transaction History start date in pos. 25-28. Enter the total number of prior days Transaction History required in pos. 29-31.
Blank	32-53	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Distribution Code	54-56	Enter appropriate MILSTRIP distribution code if stocks are segregated and maintained by codes reflected in the distribution field; otherwise, leave blank.
Lot/Segment Number	57-59	Enter the lot/segment number for controlling the inventory/reconciliation; otherwise, leave blank.
Type of Media Code	60	Enter the code which identifies the transaction history transmission media (see appendix A-37); otherwise, leave blank.
Record Date	61-64	Enter the numerical date established on which the custodial record balance is to be taken when Code Y or Z is entered in pos. 7; otherwise, leave blank.
Blank	65-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter the RIC identifying the activity from which the request is being forwarded.
Ownership/Purpose Code	70	Enter the applicable ownership/purpose code for the history/balance requested; otherwise, leave blank.
Condition Code	71	Enter the applicable supply condition code for the history/balance requested; otherwise, leave blank.
Blank	72	Leave blank.
Transaction Date	73-76	Enter the numerical date on which the transaction is prepared.
Blank	77-80	Leave blank.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	Alpha/numeric filled.	AC
7	Alpha W, X, Y or Z.	EK
8-22	Numeric filled.	AY
67-69	Alpha/numeric filled.	AB

APPENDIX B-165

TRANSACTION HISTORY TRANSMITTAL

1. This transaction is a response from the Storage activity to the ICP for a Transaction History or a Custodial Balance. This transaction will not be available until DWASP is implemented.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DZK.
Routing Identifier Code (To)	4-6	Enter RIC identifying the activity to which the transaction is being forwarded.
Type of Physical Inventory/ Transaction History Code	7	Perpetuate from DZJ Transaction History/Custodial Balance Request; otherwise, enter Code W for automatic submission of Transaction History.
Other Fields	8-29	Perpetuate from the original document. See note.
Document Number	30-43	When pos. 7 of DZJ request is X or Y and the storage activity has no recorded transactions for the stock number requested, for the dates specified in pos. 25-31 of the request, fill this field with 9s; otherwise, perpetuate from the original document.
Other Fields	44-50	Perpetuate from the original document. See note.
Blank	51	Leave blank.
Fund Code	52-53	Perpetuate from the original document. See note.
Original Document Identifier Code	54-56	Enter the DIC from pos. 1-3 of the original document.
Lot/Segment Number	57-59	Enter the lot/segment number for controlling the inventory/reconciliation; otherwise, leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Contract Shipment Number	60-66	Perpetuate from the original document. See note.
Routing Identifier Code (From)	67-69	Enter the RIC identifying the activity from which the transaction is being forwarded.
Other Fields	70-72	Perpetuate from the original document. See note.
Julian Date	73-76	Enter the date on which the original document was entered on the storage activity record.
Blank	77-80	Leave blank.

NOTE: All references to the original document relate to the document on the storage activity history file; e.g., A5_, D4_, D6_, etc.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	Alpha/numeric filled.	AC
7	Alpha filled.	EK
67-69	Alpha/numeric filled.	AB

APPENDIX B-166

INVENTORY BALANCE NOTIFICATION CARD

1. This transaction is originated by the DSC for transmission to distribution depots. It is computer created for all inventories as of COB on the inventory cutoff date. Transactions will be forwarded to appropriate distribution depot on/before the day following the cutoff day. This transaction is used by distribution depots as an aid in conducting physical inventory in that it serves to notify distribution depots of the DSC's positive inventory cutoff balance by NSN, Type of Inventory, Individual Condition Code, and Location Code. When DSC's recorded balance is zero for all conditions, a CKE card will be generated. A CKE will not be generated for:

a. Purpose Code L balances.

b. Condition Code H or K balances.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CKE.
Routing Identifier Code (To)	4-6	Enter RIC identifying distribution depot to which card is being forwarded.
Type of Inventory Code	7	Enter Type of Physical Inventory Code.
National Stock Number	8-20	Enter NSN.
Blank	21	Leave blank.
Type of Pack Code	22	Enter code (subsistence items only).
Unit of Issue	23-24	Enter UI.
Quantity	25-31	Enter sum total of inventory cutoff balance for each Condition and Storage Location Code. Precede significant digits with zeros. Quantity exceeding seven positions will be expressed as a second CKE card.
Unit Price	32-40	Enter U/P.
Blank	41-61	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Cutoff Date	62-64	Enter numerical day established for cutoff day.
Blank	65-66	Leave blank.
Routing Identifier Code (From)	67-69	Enter RIC identifying the activity from which card is being forwarded.
Blank	70	Leave blank.
Condition Code	71	*Enter code of NSN in pos. 8-20.
Inventory Category Code	72	Enter code of NSN in pos. 8-20.
Preparation Date	73-75	Enter numerical day on which this card was computer generated by DSC.
Blank	76-80	Leave blank.

*For DLA depots, pos. 71 is left blank when the Type Inventory Code is A, C, or E and the DSC on-hand balance for the NSN is zero.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
7	Alpha A, C, D, E or F.	EK
8-20	Numeric filled.	AY
22	Numeric filled or blank if pos. 6 is alpha S or N; otherwise, blank.	CK
23-24	Alpha filled.	AN
25-31	Numeric filled.	AS
32-40	Numeric filled or blank.	AM
62-64	Numeric filled.	BQ
71	Alpha filled or blank if pos. 25-32 is zero filled.	AF
72	Alpha/numeric.	LR

APPENDIX B-168

MRO DAILY REPORT CARD

1. This card is prepared daily by the depot and is used to transmit data, extracted from the F-9 report, to the applicable DSC.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter CEJ.
Blank	4	Leave blank.
Routing Identifier Code (To)	5-7	Enter RIC of DSC.
Blank	8	Leave blank.
Date of Report	9-12	Enter Julian date of F-9 report.
Blank	13	Leave blank.
Issue Priority Group I Materiel Release Orders	14-17	Enter IPG I.
Blank	18	Leave blank.
Number of Issue Priority Group I Materiel Release Orders Received	19-23	Enter quantity received.
Blank	24	Leave blank.
Issue Priority Group II Materiel Release Orders	25-29	Enter IPG II.
Blank	30	Leave blank.
Number of Issue Priority Group II Materiel Release Orders Received	31-35	Enter quantity received.
Blank	36	Leave blank.
Issue Priority Group III Materiel Release Orders	37-42	Enter IPG III.
Blank	43	Leave blank.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Number of Issue Priority Group III Materiel Release Orders Received	44-48	Enter quantity received.
Blank	49	Leave blank.
Total Materiel Release Orders	50-54	Enter total.
Blank	55	Leave blank.
Total Number Materiel Release Orders Received	56-60	Enter total quantity received.
Blank	61	Leave blank.
Routing Identifier Code (From)	62-64	Enter RIC of depot.
Blank	65-80	Leave blank.

APPENDIX B-169

LOCATOR NMFC FOR FREIGHT DESCRIPTION FILE COMPARE

1. This card is used by the Freight Description File to compare NMFC/NMFC Suffix updates to the locator. It will be mechanically prepared by locator program whenever an NMFC or NMFC Suffix on the locator is changed.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter ZVR.
Blank	4-7	Leave blank.
National Stock Number	8-20	Enter NSN.
National Motor Freight Classification Code	21-26	Enter NMFC.
LTL	27	Enter LTL Code.
National Motor Freight Classification Suffix Code	28	Enter NMFC Suffix.

3. VALIDATION

FIELD POSITION	VALIDATION	VRC
8-20	Alpha/numeric.	AY
21-26	Numeric.	HY
28	Alpha or blank.	HY

APPENDIX B-170

ACTIVATION OF WORKLOAD FROM INVENTORY WORKLOAD BANK BY PRIORITY

1. This input is used to activate workload from the Inventory Workload Bank based on priority contained in part 3, appendix F-16 listing.

2. The following are the fields in the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter DIC ZAY.
Blank	4-5	Leave blank.
Commodity Manager Code	6	Enter manager code or leave blank.
Blank	7-25	Leave blank.
Total Locations	26-30	Enter total number of locations to be pulled.
Blank	31-60	Leave blank.
Physical Inventory Cutoff Date	61-64	Enter numeric cutoff date.
Blank	65-76	Leave blank.
Functional Routing Code	77-78	Enter appropriate FRC.
Blank	79-80	Leave blank.

3. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
6	Alpha C, E, G, I, M or T or blank.	HO
26-30	All numeric greater than zero.	W2
61-64	All numeric and at least five days from current date.	BQ

NOTE: A limit of 20 ZAYs can be input per day.

APPENDIX B-175

INDUSTRIAL PLANT EQUIPMENT (IPE) MATERIEL RELEASE ORDER (MRO) CARD

1. The IPE MRO is the document by which DIPEC directs the shipment of industrial and military type Plant Equipment from a nonaccountable storage site. Processing of this document is depicted in appendix D-108.

2. The following are the fields of the transaction:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Enter: C5A - For CONUS Shipment with NSN. C51 - For OVERSEAS Shipment with NSN. C5D - For CONUS Shipment with PEC Number. C54 - For OVERSEAS Shipment with PEC Number. C5E - For CONUS Shipment, with Exception Data. C55 - For OVERSEAS Shipment, with Exception Data.
Routing Identifier Code (To)	4-6	Enter RIC of defense depot to which the IPE MRO is directed.
Media and Status Code	7	Enter the M&S Code shown on the requisition.
National Stock Number	8-20	Enter the NSN or PEC (first 13 positions) of the equipment to be shipped.
Submission Time	21-22	Enter the computed lapsed number of days from the date of the requisition until receipt by DIPEC.
Unit of Issue		A constant UI of EA will be assumed on IPE MRO.
Management Code	23	Enter Management Code as follows: 6 - IPE MRO for issue of industrial item. 7 - IPE MRO for issue of military item.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Condition Code	24	Enter the Condition Code of equipment to be shipped. If Management Code is 6, the condition code may be blank.
Transportation Citation Code	25-26	Enter appropriate DIPEC Code (appendix A-93).
Quantity	27-29	Enter the quantity of the item ordered shipped (constant 001).
Document Number	30-43	Enter the Document Number shown on the requisition.
Suffix Code	44	a. Enter the suffix code when the requisition quantity is divided into separate supply actions. b. Enter or update the suffix code if a previously denied MRO is resubmitted to the depot that had denied it.
Supplementary Address	45-50	Enter the Supplementary Address Activity Code as shown on the requisition, or leave blank, as applicable.
Signal Code	51	Enter the Signal Code as shown on the requisition.
Fund Code	52-53	Enter Fund Code as shown on the requisition.
Distribution Code	54-56	Enter the code as shown on requisition.
Project Code	57-59	Enter Project Code as shown on the requisition.
Priority Code	60-61	Enter Priority Code as shown on the requisition.
Required Delivery Date	62-64	Enter the Required Delivery Date (RDD) as shown on the requisition.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Advice Code	65-66	Enter the Advice Code as shown on the requisition.
Routing Identifier Code (From)	67-69	Enter the RIC of DIPEC (i.e., S9R).
Item Identification Number	70-80	Enter the IPE Item Identification Number (serial number) of the equipment to be shipped.

NOTE: Remarks box on manually prepared or annotated (Exception Data) IPE MROs will be used when necessary to repeat data entered by the requisitioner. In all instances pos. 3 of the DIC will identify the document as containing exception data, and the IPE MRO will not be transceived.

3. VALIDATION

Violation rejects will be listed on appendix F-85.

FIELD POSITION	VALIDATION	VIOLATION CODE
4-6	Rerouted if not depot's RIC (To).	-
7	System assigns Code 0 when input contains invalid entry.	-
8-20	Numeric, not all zeros.	AY
21-22	Numeric or blank. System will compute and replace with difference between current date and document date when not a valid numeric.	-
23	Numeric 6 or 7 only.	AW
24	Alpha A, B, C, D, E, F, G, H, J, K, L or M. May be blank when pos. 23 is a 6.	AF
27-29	Constant 001. System assigns 001 when input contains invalid entry.	-
30-43	Alpha/numeric pos. 30-35, numeric pos. 36-39, alpha/numeric 40, numeric pos. 41-43. No blanks.	AI
45-50	Alpha/numeric/blank field cannot be all blank/Y in pos. 45 and blank pos. 46-50 when pos. 51 is J, K, L, M or X.	BJ

FIELD POSITION	VALIDATION	VIOLATION CODE
51	Alpha A, B, C, D, W, J, K, L, M or X.	AU
60-61	System assigns 15 when input contains invalid entry.	-
67-69	Alpha/numeric, and must be contained in the Table and Control File.	AB

APPENDIX B-176

MOFAST FREIGHT DESTINATION ADDRESS DIRECTORY CARD

1. PURPOSE

This input is prepared by DGSC on a general purpose card or CRT to add, change, or delete addresses. All transactions accomplished by DGSC will be transceived via AUTODIN to all DLA shipping activities. Deficiencies in these addresses will be reported to DGSC-TTB for correction and transmission to all activities. Type Address Codes A, B, C and G may not be added to Activity Address Codes that contain a destination cross-reference (see appendix B-126).

2. REFERENCE

Appendix E-129 P.

3. DATA ELEMENTS

FIELD LEGEND	FIELD POSITIONS	TYPE	SOURCE/EXPLANATION
Document Identifier Code	1-3	A	Enter ZVD. CVD will be used for AUTODIN transmission only.
Consignee/SPLC	4-9	A/N	*Enter Consignee or Destination AAC, POE/POD Code, or Project Code.
Type Address Code	10	A/N	Enter A, B, C or G. May also enter 2 if POE/POD. Leave blank if all Billing Addresses for the consignee are to be deleted.
Line Number	11	A/N	Enter 1, 2, 3 or 4. Leave blank if all addresses are to be deleted or deletion is by consignee and type record. See note.
Address Data	12-46	A/N	Enter applicable address line.
Blank	47-79		Leave blank.
Delete Flag	30	A	Enter F, X or blank. F will delete entire AAC record. X will delete all billing addresses or selected billing addresses.

NOTE: For Type A, B, and C addresses, enter the Standard Point Location Code in parenthesis in the 2nd eight positions of the 2nd line of the address pos. 39-46, i.e., (NNNNNN). If input by CRT, SPLC may by entered anywhere in the second line, i.e., (NNNNNN).

*POE or POD will be entered as blank (pos. 4-6) and POE/POD (pos. 7-9). Project codes will be entered as blank (pos. 4-5) and Service Code plus Project Code (6-9).

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
1-3	Must be ZVD.	AA
4-9	Alpha/numeric, blanks (pos. 4-6) or blanks (pos. 4-5) must be on file if pos. 80 is F or X.	RZ/LY
10	A, B, C, G or if consignee is blank (pos. 4-6), this may also be 2. Must be on file if pos. 80 is X.	GB/4B
11	1, 2, 3 or 4 except if pos. 10 is A, B or C then only 1 and 2 may be entered.	PB
28-35	If type transaction A, B or C, last eight positions of line 2 must be parenthesis, six numerics, parenthesis, i.e., (999999).	3H
	If the file contains a destination cross-reference for this AAC other than MASTER or space, do not process this record.	ZJ

APPENDIX B-177

SPECIAL DELIVERY INSTRUCTION CARD

1. PURPOSE

This input is prepared by DGSC on a general purpose card and is used to add, change or delete the special delivery instruction data. All transactions accomplished by DGSC will be transceived via AUTODIN to all DLA shipping activities. Deficiencies in these data will be reported to DGSC-TTB for correction and transmission to all activities.

2. REFERENCE

Appendix E-129 P.

3. DATA ELEMENTS

FIELD LEGEND	FIELD POSITIONS	TYPE	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	A	Enter ZVE. CVE will be used for AUTODIN transmission only.
Consignee	4-9	A/N	*Enter consignee, Destination AAC, POE/POD, or Project Code.
Type Address	10	A/N	Enter A, B or C. Leave blank if all special instructions are to be deleted.
Blank	11		Leave blank.
Instruction Data	12-79	A/N	Enter applicable address data.
Delete Flag	80	A	Enter X or blank.

4. VALIDATION

FIELD POSITION	VALIDATION	VIOLATION CODE
1-3	ZVE	AA
4-9	A/N. Must be on file.	RZ/LY

FIELD POSITION	VALIDATION	VIOLATION CODE
10	A, B or C. Must be on file.	GB/4B
	If the file contains a destination cross-reference for this AAC other than MASTER of space, do not process this record.	ZJ

*POE or POD will be entered as blank (pos. 4-6) and POE/POD (pos. 7-9). Project Code will be entered as blank (pos. 4-5) and Service Code plus Project Code (pos. 6-9).

APPENDIX B-178

RECEIVING SPD MASTER RECORD

Following is a record layout of the Receiving SPD Master Record, used to correlate the Receiving site activity with the appropriate SPD Code, which will then lead to the appropriate SPD standard, Workcenter, etc., when it is converted to a DIC XMS.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Constant XMR.
Blank	4-11	Self-explanatory.
Receiving Site ID Code	12-13	A 2-position alphanumeric code identifying the kind of receipt and materiel involved, so it can be correlated to a specific work center. a. Position one - alphabetic entry. B - Bulk, central. C - Central (mechanized). D - Direct Bulk (warehouse). b. Position two - alphanumeric entry developed by the depot to designate an area or commodity that can be related to a specific work center. A-Z - EXCEPT I or O. 2-9 - EXCEPT 1 or 0.
Employee Identification No.	14-18	Employee's Unique Identification Number.
Blank	19-20	Self-explanatory.
Maintenance Code	21	Enter type action desired: A - Establish a new record. C - Change an existing record. D - Delete an existing record.

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Employee Type	22	Entry identifies employee's function. I - Inspector. V - Verifier (checker, counter, non-inspector).
Receiving Site Location	23-25	The first three positions of the actual site where the receipt was received. The first position must be alpha unless it reads 888.
Employee Name	26-60	Enter last name, initial, and first name with period and spaces where appropriate.
Blank	61-80	Self-explanatory.

NOTE:

a. If a change is required to Terminal Identification Number or Employee Identification Number, you must delete the old record and establish a new record; otherwise, do a normal change action. Data field 1-18 must match an existing record.

b. As a result of DIC XMR input, invalid record will print out on Report Number UWRG500E, followed by a Master Record print, Report Number UWRG500A.

APPENDIX B-179

RECEIVING SPD ACTIVITY RECORD

1. The following transaction is generated by the Receiving program and passed to the automated SPD Counts program, but it remains an internal transaction, never leaving the computer.

2. Data fields within the transaction are as follows:

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Document Identifier Code	1-3	Constant 9MS.
Blank	4-11	Self-explanatory.
Receiving Site ID Code	12-13	A 2-position alphanumeric code identifying the kind of receipt and materiel involved, so it can be correlated to the proper work center. a. Position one - alphabetic entry. B - Bulk, central. C - Central (mechanized). D - Direct Bulk (warehouse). b. Position two - alphanumeric entry developed by the depot to designate an area or commodity that can be related to a specific work center. A-Z - EXCEPT I or O. 2-9 - EXCEPT 1 or 0.
Employee Identification No.	14-18	Employee's assigned unique identification number.
Type Document	19	Entry indicates whether the receipt is procurement or non-procurement transaction. P - Procurement N - Non-Procurement

FIELD LEGEND	FIELD POSITIONS	EXPLANATION/INSTRUCTIONS
Type Work Code	20	Entry indicates kind of work being accomplished. R - RIDR Screen (Verifier). I - I/VN Screen (Inspector).
Type Storage Code	21	Entry is third position only (appendix A-45).
Julian Date	22-25	Self-explanatory (year Julian day).
Blank	26-80	Self-explanatory.

3. This transaction will be generated by the Receiving program and passed to the SPD program. The SPD program will process it to the Receiving SPD Master Record, update, and convert it to a DIC XMS, which will ultimately be summarized into DIC YHJs to APCAPS.

APPENDIX B-180

MOFAST RATING FILE CARD

1. PURPOSE

The format contained in this appendix will reflect the card image required to keep the SPLC rate base file updated in a batch program environment.

2. REFERENCES

a. Appendix B-185.

b. Appendix E-236 P.

3. DATA ELEMENTS

MOFAST rate base file maintenance batch processing, card format. Flat rate increases or decreases of rates can be made on the rate base file and special tariff file with the following input.

FIELD LEGEND	FIELD POSITIONS	TYPE	SOURCE/EXPLANATION
Document Identifier Code	1-3	A	Must be ZVH.
Blank	4		Not used.
Tariff Number	5-14	A/N	
Blank	15		Not used.
Increase/Decrease	16	A	Must be D for decrease, blank for increase.
